A Possible Disguise.

It is practically apparent that the American legislators are bent on extinguishing the flag of independence in this country, in the form of the people's action for self-government. The actions of the people are being disarmed and disarmed, with the object of preventing the Japanese "exclusion measure" being their discriminatory action not only on the government that the social, economic, and industrial measures in the country, but also on the people. The people are being told that the action is a legitimate one, that there is no need for protest. However, they are being forced to comply with these actions.

Editorial coincidence in a Chicago newspaper characterizes this action on the part of the American government as a new declaration of American independence, not less significant and epoch-making for America and the world than the declaration of 1776. It certainly has taken upon the aspect of an international precedent similar to the declaration made in Independence Hall one hundred and forty-eight years ago. It is very unfortunate that the government has not taken into consideration the rights of the people, and they do not hesitate to state that their change of attitude was brought about solely by the pressure of public opinion. Their threatening note to our government, in which they unhesitatingly declare their determination, which would normally form part of the "exclusion policy" should be adopted.
