Fortas blasted, may resign

WASHINGTON (UPI) - Rep. Robert Taft Jr. (R-Ohio), predicted yesterday a bill of impeachment will be filed against Supreme Court Justice Abe Fortas unless there is firm evidence Fortas was accepted from financier Louis Wolfson.

Fortas said he took a fee, but later returned it when he discovered he would not be able to advise and write for Wolfson's family foundation. Wolfson has since gone to jail for violation of the stock market laws.

"I have the feeling that unless he explains further, impeachment is a good possibility," Taft told a news conference.

Under the constitution, impeachment proceedings must begin in the House. If a bill of impeachment is agreed to by the House, the Senate then acts as a court in trying the impeached official.

Any House member may file an impeachment resolution. It

The present $10,000 deficit in student government expenditures is primarily the result of "over expenditure' by the Academic Commission, and the Social Commission, Student Government Treasurer John Coughlin said yesterday.

Coughlin estimated the Academic Commissions deficit to be in the neighborhood of $5,000, while the Social Commissions deficit from $6,000 to $9,000. Of the Social Commissions deficit, all these figures are estimates. "There are no figures will be definite until August 31," Coughlin said.

An enormous part of the Social Commission deficit will be made up of losses incurred if Grand Prix is not a money maker.

"If Grand Prix is successful, then the Social Commission deficit will be less," Coughlin declared. "Any profit we make will be channeled into the scholarship fund. We just want to get back expenses." Coughlin cited two projects, one by each commission, whose losses made up large parts of their respective deficits. One was the Black Power Conference, which was run by the Academic Commission, and lost $4,000, while the play, "A Funny Thing Happened on the way to the Forum," ran on junior parents weekend, by the social commission, lost $5,000.

"This deficit was no one's fault. The people upstairs thought these things would go, but they didn't. Anything these two commissions do is a gamble," Coughlin declared.

At the Senate meeting Tuesday night, Coughlin asked for a referendum on the question of raising the activity fee by $2.00. The present fee is $16.00. He claims that added revenue would amount to approximately $11,000.

Coughlin said, "This money would be applied directly to the debt. Last year, when they raised the fee, it was promised that all sorts of things would be used up and not applied to the debt."

Coughlin also said that the Student Government budget would definitely be cut next year.

"The Academic Commission will get as much as they did this year," he claimed. "Nor will the Social Commission."

Coughlin plans to set up a fund earmarked for absolutely involving student publications. Administration stated, "Resolved, that academic credit will not be granted only for courses taught by faculty members holding an appointment in one of the regular (that is, non-military) departments of the University, that appropriate authorities may select, certify, or otherwise designate any number of such courses for the purposes of the Reserve Officers Training program; that no limit in terms of credit hours be placed on the number of such courses that students may select other than those limits imposed by the degree programs of the several departments and colleges; and that this imply recommendation or approval of a major or other degree program in the specific area of military training or studies."

The student publication's resolution was recommended to the Senate by the Committee on Student Affairs. The first point brought out in this report stated, "Student publications should be free to develop their own editorial, policies and news coverage." The resolution also states, however, "Each student publication should have a separate tripartite board of directors responsible for the publication policy and standards of quality of the publication, the appointment of editors, and their removal for cause." The "Resolution," made up of student body officers and class presidents, will appoint SMC delegates and alternates. All appointments are subject to the approval of the Student Assembly.

Next week's agenda will include discussion of enforcement procedures for all regulations which appear in the Student Manual. The administration will form a subcommittee of the Senate on Student Power with its chairman serving as SCA advisor. He will also come before the body. The Assembly will also consider a bill to abolish required attendance at an Open Forum or speeches by the candidates before a student may vote in student body elections.
Senior week activities altered

Senior Class President Dave Witt and Senior Week Chairman Al Knappenberger today announced a major restructuring of the schedule of events for Senior Week. Originally planned as a series of six activities, the new schedule calls for a reduction of that number to four, as well as other changes in format.

The new Senior Week program will be kicked off Monday, May 12 with a free Wine and Cheese Feast at the Alumni Club. Beginning at 8:00 p.m. and open to all seniors, the event will feature 80 gallons of Rhein and Rose wines as well as a large assortment of American and imported cheeses. Additionally, there will be an unlimited supply of free beer. Entertainment will include W.C. Fields' movies and the sounds of the Jug Band.

Tuesday is being billed as "The Longest Happy Hour Ever." Seniors will be able to purchase two drinks for the price of one all night long at the Alumni Club.

Wednesday night will feature a free Viking Meal at the Alumni Club. Seniors beef and ham will be supplemented by thousands of hamburgers and hot dogs—all of which will be washed down by an unlimited supply of free beer. Tommy and the Tornadoes will play the best of early rock.

Senior Week will conclude Thursday with a Traditional Pub Crawl. On that night, local tavern owners have agreed to give special discounts to members of the senior class upon presentation of a "Bar Certificate." Certificates will be available at all Senior Week activities.

Collegiate Scholars are named

Juniors Michael P. O'Connor, Stephen Raymond, Eric Sandeen, and Thomas Takott have been named Collegiate Scholars, and will study under special faculty supervision next year.

The four juniors, while auditing a few classes next year, will spend most of their time on special projects.

M. Chiara's Sports Car Capitol

GO HOLLYWOOD!

MAINTAIN YOUR COOL!

Jaguar George is offering a free pair of sunglasses and an ASCOT with every sports car (what every sports driver should have) you'll even buy your first 1,000 gallons of gas. You can't beat a deal like that with a big stick.

WHO CARES ABOUT STUDENT OPINION? BUSINESSMEN DO.

Three chief executive officers—The Goodyear Tire & Rubber Company's Chairman, Russel DeYoung, The Dow Chemical Company's President, D. Doan, and Motorola's Chairman, Robert W. Galvin—are responding to serious questions and viewpoints posed by students about business and its role in our changing society and from their perspective as heads of major corporations are answering views through means of a campus (corporate Dialogue Program on specific issues raised by John Bookspan, an Ohio State Chemistry major, who plans a medical career, is exploring issues with Mr. DeYoung in the course of the full Dialogue Program. David G. Clark, a Master of Arts candidate at Stanford University, also will explore issues with Mr. DeYoung, as will David M. Butler, Electrical Engineering, Michigan State, and Stan Chess, Journalism, Cornell, with Mr. Doan; similarly, Arthur M. Kleinoff, Government, Yale, and Arnold Shelby, Latin American Studies, Tulane, with Mr. Galvin.

These Dialogues will appear in this publication, and other campus newspapers across the country, throughout this academic year. Campus comments are invited, and should be forwarded to Mr. DeYoung, Goodyear, Akron, Ohio; Mr. Doan, Dow Chemical, Midland, Michigan, or Mr. Galvin, Motorola, Franklin Park, Illinois, as appropriate.

Dear Mr. DeYoung:

There is evidence that we of the mid-twentieth century are experiencing the first economic revolution equal in magnitude and in impact to the industrial revolution of the mid-eighteenth century. Instead of hand tools giving way to power-driven machines, though, man-run machines are giving way to computer-run machines. Many phases of business and industry which once depended exclusively on human effort (e.g., accounting, quality control, purchasing, order filling, and even sales) are already showing the intrusion of computers. Someday, machine-computer-computer-machine complexes may eliminate most human participation in industry.

Such change will produce several significant results (they've already started!):

1. The rapid decrease in need for unskilled and semi-skilled labor.
2. The ever accelerating need to retrain personnel to move from obsolete jobs to newly created ones.
3. The requirement that those frequent technological retraining periods be with full pay (i.e., elimination of a job should not produce unemployment).
4. The need for economic stability with nearly 18% of our labor force employed. (The need for 3%-5% unemployment is not directly evident.)
5. The increasing emphasis on service industries. As proportionately more people are involved in research, teaching, counseling, etc., our society will lose its production-consumption basis.

What are you, an American businessman, doing to avoid massive social disorientation, such as was experienced in nineteenth century England in the wake of the industrial revolution, as we shift to a service-oriented society? How will the excluded millions start to feel and to become a benefiting part of the changing society?

Yours truly,
Mark Bookspan
Pre-Med, Ohio State

Mr. DeYoung:

Machines are in... People out... Net: Massive social disorientation

Approximately 58-million additional jobs were created, while some 50-million jobs were eliminated, leaving a net gain of 8-million positions. Significantly, technology in a large measure created the job gain, but was not the major cause of job losses. Rather, this resulted more from increased wage rates occasioned by statute and agreements negotiated with unions, and for the most part affected unskilled jobs, as might be expected.

The displacement, or redeployment, of workers resulting from automation certainly is no cause for alarm. Quite frequently, people are released from lower-paying jobs and advance to better-paying positions, all brought about by automation. Most firms applying newly available technologies retrain and place their employees in new positions, and invariably experience the need for additional personnel as well. For the most part this means an upgrading of skills along with an increased income-earning potential, and expanded employment.

Compare the significant increase in the total work force of over 70-million, with average earnings of $2.50 per hour, to that of 63-million in 1955 whose hourly earnings averaged $2.00 (equivalent 1965 dollars). In other words, wage rates and employment both rose during a decade that witnessed considerable automated innovations.

Aside from these bare-bones statistical facts, the impact of automation is measurable in other terms: namely, the increasing release of man from dawn-to-dusk drudgery. Through the utilization of machines in lieu of brute force to increase productivity, significantly greater numbers have been able to shift to exciting new occupations that mean for them larger incomes and fuller lives. A vast spectrum of new activities through increasing applications of automation is profoundly affecting our whole mode of life. The future potential is as great as man's imaginative intelligence can develop.

Sincerely,
Russell DeYoung
Chairman: The Goodyear Tire & Rubber Company

Dear Mr. Bookspan:

The fear that human beings will be made obsolete by machines, and the prospects of a resulting mass dislocation of society, or social disorientation, has prompted cries of alarm since the harnessing of steam power and the invention of the mechanical loom.

These traditional forebodings have become increasingly vocal in some quarters with the continuous application of automation. As the litany goes: Automated machines controlled by computers are self-adjusting, repairing, and programming without human labor...can outperform any worker at the task undertaken, and likely outthink him as well. Inevitably more and more workers will be replaced with each progressively sophisticated generation of computer complexes, and unemployment will rise to crisis proportions.

Historically these fears have proven groundless, and there is no rational basis to conclude any catastrophic developments in the future with increased automation.

There is no end to the needs of human beings as they have more disposal income and more leisure time. Without automation, we would not have had the capacity to fulfill the demands of a constantly increasing standard of living.

As a matter of fact, while automation does cause displacement, it does not cause significant unemployment. Quite to the contrary, automation has created more jobs than it has destroyed. The development of the computer is a good example. Actually, there is greater employment now than we have been the case if the technological advances brought about by automation had not occurred.

This is illustrated by industry's experience during the ten-year period ending in 1965.

Mark Bookspan
Electrical Engineering, Ohio State University

Mr. Bookspan:

The displacement, or redeployment, of workers resulting from automation certainly is no cause for alarm. Quite frequently, people are released from lower-paying jobs and advance to better-paying positions, all brought about by automation. Most firms applying newly available technologies retrain and place their employees in new positions, and invariably experience the need for additional personnel as well. For the most part this means an upgrading of skills along with an increased income-earning potential, and expanded employment.

Compare the significant increase in the total work force of over 70-million, with average earnings of $2.50 per hour, to that of 63-million in 1955 whose hourly earnings averaged $2.00 (equivalent 1965 dollars). Aside from these bare-bones statistical facts, the impact of automation is measurable in other terms: namely, the increasing release of man from dawn-to-dusk drudgery. Through the utilization of machines in lieu of brute force to increase productivity, significantly greater numbers have been able to shift to exciting new occupations that mean for them larger incomes and fuller lives. A vast spectrum of new activities through increasing applications of automation is profoundly affecting our whole mode of life. The future potential is as great as man's imaginative intelligence can develop.

Sincerely,
Russell DeYoung
Chairman: The Goodyear Tire & Rubber Company
An Tosta! weekend

The Hall Presidents Council and J.E. Brogan describe this An Tosta! weekend as a “dazzling ode to sun and surf.” We’re not quite sure where the sun is coming from and in Indiana the sun is always a question mark, but regardless, the weekend is full of many different games, contests, and assorted trivia, and amazingly inexpensive.

An Tosta! was conceived and inaugurated last spring. It was quite successful. This year the HPC has increased the “nerdmyaking” to include the selection of a queen, an expanded Gentle Thursday, and an Irish Barn Party Saturday night.

The whole idea of stealing beer cans, racing beds, milking cows, or even chasing pigs can seem ridiculous, yet last year it was proven that these simple diversions were really a lot of fun. In fact, many have said it was the best time they had all year. When one considers the cost of this weekend compared to other “gala ND weekends”, he cannot be faulted for thinking something is wrong. The allotments for the weekend from Student Government and the hall councils add up to about fifty cents per student. For an additional five dollars any student can throw a lot of pies, dunk a lot of poobahs, and even take in a party Saturday night.

While we admit we like the Four Tops, Rascals, proms, and even go-carts, we hope the Student Union Social Commission will take a cue from the HPC and An Tosta! weekend and realize that most spectacular events are not always the best and certainly are the most expensive.

We congratulate the HPC for the job they have done setting up An Tosta! weekend and we hope that such weekends will be planned more often than just once every spring.

Open forums

Last month in the St. Mary’s student body presidential elections, 42 per cent of the student body voted. In Tuesday’s elections for hall president and the first Student Assembly approximately 200 students bothered to cast their ballots.

St. Mary’s students have always been labeled as politically apathetic, especially with regard to their own campus interests. Because so many positions are contended for by only one candidate (the student body vice presidential “race”), and three of the four hall presidential positions, for example), an absurd method of election has been adopted. We believe that the aspiring “get-out-the-vote” for by only one candidate room-to-room or floor campaigning will encourage. And the candidate will have to be a grave and serious mistake.

The apathetic student will not vote, open forum or not. The interested voter should have the opportunity to confront the candidates on the almost personal basis that room-to-room or floor campaigning will encourage. And the candidate will certainly have to show her initiative, mettle and imagination in her campaigning.

We encourage the abolition of the Open Forum, a boring afternoon of the usual repetitive political rhetoric, to a better program in which the candidate as well as the voter must expend an effort.

The purpose of the forum is to educate the voters to the abilities of the candidates; to make sure that each voter knows exactly the stance of the person for whom she casts her ballot.

The unfortunate outcome of this arrangement is that the burden of the election is almost entirely on the voter; the candidate need not campaign at all, and in many cases the campaign room-to-room or floor campaign will not even be noticed.

The apathetic student will not vote, open forum or not. The interested voter should have the opportunity to confront the candidates on the almost personal basis that room-to-room or floor campaigning will encourage. And the candidate will certainly have to show her initiative, mettle and imagination in her campaigning.

We encourage the abolition of the Open Forum, a boring afternoon of the usual repetitive political rhetoric, to a better program in which the candidate as well as the voter must expend an effort.

The Hall segregation

Editor: I would like to voice my objection to the current action that Dillon, Alumni, and Wage halls have taken regarding on campus housing for Negroes. I believe the measures of segregation these halls have taken are unfair and unwise and, in fact, are contrary to the intangible existence of Notre Dame as a community. I feel this way for the following three reasons:

1) Having blacks room together in definite sections of certain halls will certainly be easier on the black man, he will not have to continually prove to those in authority around him that the black man is equal to or better than the white man, since those around him will be of his own color. But, this is not what the black man should want if he wishes to be accepted as a person; he has to live with the race the community will become an integral part of it.

2) Having blacks room together will cause the blacks to be stereotyped; they will not be thought of as individuals, though this is what they are. Thus, this move will promote racism. If blacks are not thought of as individuals but approach as individuals it will definitely harm the community, and even more so the blacks. If the whites are not able to come into contact with the blacks they are obviously the white’s concept of the black will not be able to improve, it will remain stagnant, and most likely incorrect or distorted.

3) Lastly, rooming blacks together in large groups is unfair to all other Notre Dame halls. Room assignment has always been based on seniority, grades, and hall rules. This year, being a freshman I was not able to get the room I wanted and the roommates I wanted to room with next year. Therefore, why should a freshman if he does not have a better average than I do, have the opportunity to vote together with his friends in a good hall just because he is black.

Therefore, I would like to state that granting the Negroes in the Notre Dame black men in certain sections of the three dorms will be a grave and serious mistake.

Joel replies

Editor: I hate to get into a controversy with the officials of Notre Dame’s “Ministry of Propaganda and Public Enlightenment,” but I feel I must respond to Mr. Murphy’s letter. I assume he supposes the man did the campus a service of sorts in pointing out that the new dorm is named for Joseph R. (instead of J. Peter) Grace. Also, he was right in saying that J. Peter Grace holds an honorary degree from N.D. and has received the Laetare Medal. I would point out, however, that both awards are “for sale,” in other words given to prominent contributors from time to time. They are in no way indicative that Mr. Grace is or is not an ethical or honorable man. After all, Curtis LeMay was once Patriot of the Year.

In a larger sense, though, Mr. Murphy has operated on a face value level. This is understandable since the hierarchy of this society is dedicated to the furtherance of image as opposed to the promotion of substance, wit

Worth of ROTC

Though I will probably sign my name to this letter, I might as well say that I number, my address, my telephone number, etc. Though we agree that the ROTC is worth more than the total of his digits, still we are day laborers and therefore interested people. The ROTC is in fact a greater moral leader than himself and deserves the honor. It will be quite a task of persuasion, but perhaps it can be accomplished.

Tell it to Tommy

Dear Tommy,

Don't worry about it. I always leave 'em speechless too.

Dear Confused,

A kiss in time saves nine (months).

Dear Tommy,

I'm a senior at Notre Dame and haven't been out on a date since I was here. I'm shy and an introvert and just can't bring myself to go over to St. Mary's to find a girl to take out. What can I do?

Waiting hopefully

Dear Confused,

To be about thirty miles an hour. The kart began to move, and I spun into one of the bales of hay that were set up. The driver wasn't hurt, but I wasn't at all encouraged.

The Morrissey drivers helped me into the required jacket and helmet. The bubble on the stock engine was a little too big (Rogers and Ruggs were doubling as their mechanics for the day) and it took a few seconds to adjust to the slightly blurred vision. They lowered me into the soft leather seat and started the engine.

"Okay, Ted, your ignition switch is here on the steering wheel, in case anything happens. 'Wonderful!' Take it easy, and good luck."

I was starting to get a little bit tricky, especially if you've never driven a kart before. /Great! So take it easy, try to keep the test to a white thing."

The Union's Bruce Boyd, team coordinator, came over to explain the track rules to me. "You've come at a good time, there aren't any problems."

So I looked closely at one of them. When you think that three karts can approach fifty miles an hour, then you begin to look at awkwardly flimsy vehicles. A few simple bolts hold everything together. The seat and a two-stroke engine. Add a steering wheel, accelerator, break and centrifugal clutch, and there it is, folks, about 125 pounds of potential energy.

Less than a month after the Student Union, bought a driver's pass and returned to Morrissey's pit to receive my instruction: "We've got a practice engine on here now, you know we have a big one we'll be racing with," explained Mark Ruggs, one of the regular drivers. "So take it a little easy and try to resist the temptation to open wide on the back straightaway."

The course was in 30 miles an hour. We've been here. I'm a little afraid of rolling. But as I gained confidence, I began to take the turns a little faster, and discovered that a speed: 80. I looked off to my right and saw the hairpin turn of about 150 degrees. I was used to coming into it far too fast and tapped the brake. The kart lurched and in about a second and a half I lost half my speed.

The G-forces in a kart are much more noticeable than in my mother's Pontiac, and I was a little afraid of rolling. But as I gained confidence, I began to take the turns a little faster, and discovered that a sexy wiggle of the hips to the outside pushed the rear end around without any sensation of lifting.

Besides Mom's station wagon, I have this vibrating monster. I understand that sometimes journalism is dangerous, but this was certainly above and beyond the call of duty.

The starter then flagged me onto the track. I gulped and pressed my right foot to the floor until I was up to the starter, who held me back. The track. I gulped and pressed my right foot to the floor until I was more than a little afraid of rolling. But as I gained confidence, I began to take the turns a little faster, and discovered that a speed: 80. I looked off to my right and saw the hairpin turn of about 150 degrees. I was used to coming into it far too fast and tapped the brake. The kart lurched and in about a second and a half I lost half my speed.

I rolled slowly into the Morrissey pit at the end, and noticed that where I had been clutching the wheel in a two-handed death grip, I now rested my right hand on top of the wheel, relaxed as if in Mom's wagon. I could feel my face in a broad grin.

All Rogers helped me up from the kart while Mark Ruggs went to the rear to take care of mechanical considerations. Roger looked at me and said that a lot of conversation was unnecessary. /Great, huh?/ /Yeah./ Eat your heart out, Plimpton.

SMC bequeathes to Notre Dame four young ladies—Terry Buck, Missy McCrary, Ann Steinger and Molly Tiernan—who have become ND's first female cheerleaders. Their first performance will be on September 20th when Ara's disciples grapple Northwestern.

Thur., May 8, 1969

By Ted Frac

I guess everyone some time in his life is attracted by racing, especially where some kind of machine is involved. You have all the excitement and skills against those of another person, with all the complications of potential dangers. Your senses are all tuned to the sound of the engine, the feel of the road, almost automatically aware of your speed. All that's the way you think it is, especially with a little go-kart.

So if you've never done it before, and you find an opportunity to try, grab it and hang on, even though you're sure you'll come away with only one arm or something.

That's the way I felt last Thursday, when I was able to talk to the Student Union and the Morrissey team into permitting me three laps around the course in the Convo parking lot. Uh, I listened while all the safety features of karts were explained: how they are almost impossible to roll, how easy they are to drive without undue danger, and so forth.

But then I looked closely at one of them. When you think that three karts can approach fifty miles an hour, then you begin to look at awkwardly flimsy vehicles. A few simple bolts hold everything together. The seat and a two-stroke engine. Add a steering wheel, accelerator, break and centrifugal clutch, and there it is, folks, about 125 pounds of potential energy.

Less than a month after the Student Union, bought a driver's pass and returned to Morrissey's pit to receive my instructions: "We've got a practice engine on here now, you know we have a big one we'll be racing with," explained Mark Ruggs, one of the regular drivers. "So take it a little easy and try to resist the temptation to open wide on the back straightaway."

Ten pigs arrive on campus

Ron Mastriana bought ten hogs last night for the An Tostal pig chase on Saturday. The ten pigs, which average 143.5 pounds apiece and cost the An Tostal Committee $308.99, were obtained at Wallace Investments Inc.'s weekly livestock auction in Walkerton, Ind.

The hogs will be put in a round pen on Saturday and will have to face teams of four which will try to capture as many of the greased pigs as possible in the allotted time. The pigs which survive their ordeal will then be resold on Wednesday's auction.

Gary Gardner of the An Tostal Committee convinced Mastriana, general chairman for the May 8-11 weekend, to buy the pigs. After Ron had no luck in trying to borrow the animals. Gene Hatke, who is in charge of the pig chase, and Mastriana asked thirteen different farmers if they could borrow ten—150 pound pigs for the An Tostal event. But the most common reply the two received was, "Are you guys nuts!" Other farmers gave a simple and straight "No!"

Paul Pieffer, Mastriana's special assistant, and Hatke accompanied Mastriana to the auction yesterday afternoon. When they arrived in Walkerton Mastriana asked Joe Golubski, a Wallace employee, to do the bidding for him.

"Golubski was about the only person who didn't say I was crazy when I told him why I wanted to buy the pigs," Mastriana explained.

Hatke and Mastriana then jumped into the pens to inspect the hogs before the bidding took place. When he got out Mastriana remarked, "I swear I'm going to throw these clothes away when I get back. I think that one now know me."

Five hours later the right pigs came up for bid.

"When I saw what I wanted, I signaled Golubski and he took care of the rest," Mastriana said. Golubski then agreed to care for the An Tostal pigs until Saturday when Mastriana will pick them up and bring them back to ND.

SMC workshop

Burr Tillstrom, the originator of the Kukla, Fran and Ollie television characters will be among a series of communications experts who will lecture at a five-day communications workshop to be held at Saint Mary's College in June.

The workshop sponsored by the Saint Mary's Art Department will combine the series of talks and films with experiments involving newer concepts of mass communications. The program will be held from June 2 to 6 and will offer one graduate credit.

In addition to Tillstrom, a media critic and program director, other lecturers will include Harley Parker, a consultant for the Center for Culture and Technology and collaborator with media authority Marshall McLuhan; Joseph Carlson, of the Office of Technology Utilization, National Aeronautics and Space Administration who will speak on the "spin-off" ideas for communications developed through NASA research; Yale University painter Jack Tworkov, and Saint Mary's College linguist Dilaver Berberi.

Persons interested in enrolling in the workshop are asked to contact Sister M. Jeanne Finske, C.S.C., coordinator of the Saint Mary's College Summer Session.

MAY 17 1:30 RACE FINALS

Tickets: Gilberts, Bookstore, Dining Halls
McCoy doubtful for Saturday

It is bad enough to be shut out in a football game, but it’s even worse when some of those who do the damage are your former teammates. That situation may prevail this Saturday when the Blue meets the Gold in the annual intra-squad game in the Stadium at 1:30.

Injuries have removed Pat Mudron from the picture and made Mike McCoy a doubtful starter; so the second team Gold eleven may see four freshmen manning the defensive line. Walt Patahski, who played high school bass and fullback as a tight end, and Fred Swendsen will start at the ends. Greg Marx will man one tackle spot and, if McCoy’s cut knee fails to respond by Saturday, Mike Zikas will replace him at the other.

Backing up the fresh front line, however, will be a veteran quartet of linebackers. Defensive captain Bob Olson heads the group, which includes Larry Schumacher, Tim Kelly, and Bob Neidert. There has been a battle going on in the defensive secondary between trios of Iron and vets. Saturday, it looks like Chuck “Sillic” Zloch, and John Gauer will team with freshman speedster Clarence Ellis. One freshman who was making noise during practice, Ed Guylas, has been hurt and will probably not play much.

Little Joe Thiermann will start a new season off by devilish bigger opponents as he quarterbacks the Blues. His running mates will most likely be Ed Ziegler and freshman Andy Huff at halfback and Jeff Zimmerman at fullback.

Dewey Piskow is the choice at tight end, but there are several candidates for the split end post. Jim deArrieta, Tom Eaton, and Tom Gatewood should each see plenty of action, for one side or the other.

The offensive line has been partly rebuilt due to graduation losses. Jim Reilly and Larry DiNardo are veterans on the left side of the line, while Mike Martin and Gary Kos will cover the right tackle and guards spots. Mike Grind, a starter much of last season, will be at center.

Rugby

The following is the schedule for the Irish Challenge Cup Rugby Tournament, to be held on Saturday and Sunday:

SATURDAY (behind Stepan Center)
10:00; Chicago Lions Club vs. the Irish Canadian Club
11:15; Notre Dame vs. Army
1:00; Irish Canadian “B” vs. Notre Dame “B”
2:15; Irish Canadian vs. Army
3:30; Notre Dame vs. Chicago Lions

SUNDAY (in the Stadium)
1:00; Chicago Lions vs. Army
2:15; Notre Dame vs. Irish Canadians
3:30; Notre Dame “B” vs. Chicago Lions “B”

slugging average has been close to .500 all year, and a terrible one for Arrenz.

Two more singles, the run- producing liner under G. Boyce, scored a run, but Arrenz pitched out of further trouble. The Spartans added single runs in the second and third innings, the last one unearned because of an error by first-sacker Chuck Horan, one of six Irish miscues.

Arrenz took matters into his own hands in the bottom of the third. Spartan hurler Kurt Maas, who had blanked the Irish for two innings, walked up a fat 0-2 pitch to Arzie who promptly rode one over the left field fence with Phil Krill on base via a single. Arrenz, ND cashed in three singles and a ground-out for two more runs. (RBIs to Dick Lucke and Keenan) and a 4-3 lead.

Michigan State had gotten the idea, however, and roared back to beat up Arrenz and reliever Ron Schmitz. John Lansky pinch-hit for Maas and doubled, and the track met was on. Gavel walked twice in the inning as MSU sent twelve men to the plate. The key blows were a two-run single by shortstop George Petroff and a two-run, ground-rule double by 214 hitter Mike Olson. The Spartans scored six times to take a 9-4 lead.

State tied Larry Hooper as a reliever in the bottom of the fourth, but it backfired. Hooper faced five men, walking the first two and last two. The third man, right-fielder Bob Voitier, slugged a triple to right-center. And before new pitcher Mickey Krill on base via a single, hit a two-out, home run. The seventh run brought in the ninth Charger in order, striking out four of them. In the bottom of the first, Voitier grounded a single right, moved up on an error, and scored when Lucke doubled off the left-center field fence.

Notre Dame widened the margin in the third with a two-out rally. Schoen was hit by a pitch and Tony Lux singled. After both runners moved up on a costly error, the Irish (all the runs were unearned) for four innings.

Hillsdale’s freshman hurler, Rich Miller, settled down and pitched out of further trouble. Arnzen was chosen on the eighth round by the Detroit Pistons, while Whitmore was nabbed by the world champion Boston Celtics.
