Byrne, students receive President's response

by Ken Gironnet
News Editor

Student Body President Ed Byrne yesterday announced that he had received a letter from President Gerald Ford. The letter is in response to a letter which Byrne sent to the White House on April 1, concerning the President's visit to Notre Dame.

Byrne said that the letter was drawn up with the advice of members of the Student Affairs Office and was then forwarded to Father James T. Burchaell, university president.

"I took the letter to Father Burchaell and, after reading it, he said he liked the tone. He said that he could help make sure that the letter got to the President's desk," Byrne said.

According to Byrne, Burchaell then sent the letter, along with a letter of his own, to Frank Ursomarso, a member of the White House Advance Office.

The President had, in truth, thought good opportunities to speak has mind to the campus and to the national emphasis on student government. Some of our Student Body President and a few colleagues to create an exchange by returning their own remarks to the President. I hope we will take them in good stead.

He said that he was pleased with the letter of response from Ford. He felt that the third paragraph of the letter was the most interesting. He agrees with the words of the third paragraph when talked about the writing of academic ideals and practical experience that we will do it again if necessary. Additionally, if we cannot "rule out the possibility" of warmongering in the Middle East for necessary oil, why can't India use the same "sensible" logic to justify the use of her atomic weaponry?"
Heart Club plans benefit semi-formal dance function

The Notre Dame Heart Club and Brown Phillips Hall are sponsoring a semi-formal Benefit Dance, Friday, April 30, in Sacred Heart Center with music provided by Talisman.

In order to provide the benefit the Heart Fund of St. Joseph County has raised a total of $607.43. The mission of the Heart disease is the nation's number one killer. It is responsible for more deaths than all other causes combined. Last year there were 1,527 deaths in St. Joseph County, 1,256 of which were due to Heart Disease.

The theme is "Put a Little Love in Your Heart." Tickets will be sold in the dining halls and at the door. Refreshments will be provided. If there are any questions contact Jim Moshler or chairman at 8181, rm 521 Planner or Cathy Falkenberg at 5181, rm 120 Brown Phillips.

On Saturday-

Seniors plan picnic

The St. Mary's College Senior Class will sponsor a senior picnic Saturday afternoon from 2 to 5 on the field in front of the cafeteria. All seniors from the ND-SMC community are invited and proceeds will go to the SMC graduation fund.

According to Senior Class President Carol Collins, seniors with ID's, showing them to be the 115 seniors, can try to drink for $2.00. Hot dogs will be sold for $1.50.

Miss Fitzgerald lived in South Bend all her life. Her father, Dr. John J. Fitzgerald is Assistant Vice President for the Advancement Studies at Notre Dame. Services will be held at 10 a.m. Friday at Sacred Heart Church. Mr. John Trigg, a cousin of New Bedford, Mass., will say the Mass. Burial will be in Cedar Grove Cemetery.

Former students, family and friends on May 16, the night before graduation. "This pic is w/ at least as good as the one "of last fall,"

Collins stated.

In case of rain, the picnic will be moved inside of Regina Hall. The picnic will be provided by Talisman.

Senior dies as result of May bicycle accident

Aline Marie Fitzgerald, 21, a senior math and philosophy major, died morning in St. Joseph Hospital after being hospitalized since a bicycle accident May 30, 1974 in Cleveland.

State Dept. urged
Thieu resignation

CHICAGO (UPI) - The State Department worked over the last two weeks to persuade former South Vietnamese President Nguyen Van Thieu to resign in order to ward off an imminent military coup, the Chicago Tribune said Wednesday.

In a Saigon-dated story, the newspaper quoted Huy Nguyen Van Cu, a Vietnamese air force officer and personal assistant to former Premier Nguyen Cao Ky, as saying...

"...The American embassy knew there would have been a military coup if Thieu had not resigned, as it played the role of a mediator..."

On said U.S. Ambassador Graham Martin visited Ky's residence at Tan Son Nhat Air Base near Saigon two weeks ago and pleaded with Ky to help prevent a military coup, the Tribune said.

The Observer is published daily during the college semester except vacations by the students of the University of Notre Dame and St. Mary's College. Subscriptions: Non-Indiana students: 1st year $7.25, 2nd year $6.00, 3rd year $5.00, 4th year $4.00. From Indiana students and alumni: $5.00. Collect. 25¢ per copy.

To comply with Ammendment
Academic records opened
by Ken Bradford

Despite the absence of a formal written policy, Notre Dame students have been allowed access to their "educational records," according to Dr. Philip Faccenda, University general counsel.

Faccenda said Tuesday that the current procedure is that students wishing to check information in University files must apply to the Counsel's Office. He noted that only three or four students have used the procedure so far.

The new procedure has been instituted in order to comply with the amendments to the Family Educational Rights and Privacy Act of 1974, which was scheduled to go into effect on January 1, 1975.

Faccenda said the new procedure was delayed until the Department of Health, Education and Welfare could draw up final guidelines for universities and other schools in use in implementing the policy.
The act gives the student the right to inspect his education records and challenge any information which is incorrect. The act also forbids the schools from keeping information about students to interested agencies or institutions if the student has indicated in writing that he does not want his records to be released. 

"Today America can again rise to the challenge that the war is over the nation's third and fourth objectives -- full employment, a richer life, and freedom from hunger and disease," Ford said in his address to the Tulane University student assembly.

"The time has come to look forward to an agenda for the future, to unity, to managing the war's wounds and restoring it to health and to personal and national self-confidence..." Ford said.

"As we stop refighting the battles and recapitulating the war, I ask that we strive to become, in the future, as we are. A new generation, something more tomorrow than we are today..."

White House aides told reporters the President wants Americans to rise to the occasion in perspective, in the past, and turn the nation's objectives to what he called "an entirely new agenda for the third century..."

"It's sad, indeed, truly something more tomorrow. We are now a generation to what he called "an entirely new agenda for the third century..."

"We are now a generation to what he called "an entirely new agenda for the third century..."

"The Vietnam conflict and the events in Indochina, but these events are not evidence of pride that existed before Vietnam. But it cannot be achieved by refighting a war that is finished--as far as I know--and producing nations achieve a..." Ford said.

resurrecting scott joplin

For over fifty years the music of Scott Joplin had been lost in the piles of back-shelf material in Old America Music Shops. The ragtime sounds he composed near the turn of the century were presently on most best-selling record charts in the nation. A year ago the complete works of Scott Joplin were published, and it was this collection which came to the attention of University Music Chairman, William Cerny, and inspired the recording of Joplin rags which is presently being sold and distributed on campus.

The recording is presented on the album, Scott Joplin, Piano Rags. The release and marketing of the recordings are well-performed and meticulously. The familiar key-pounding of the piano is excellently performed and executed. Joplin insists that his rags are played at any tempo, never play the ditty fast at any time. The recordings are well-performed and executed. Joplin insisted on the recordings for four dollars and making them available according to hall salesmen was to use the proceeds to establish a music scholarship fund. If the album sells out completely, so the proceeds could begin with $3,000.

The recordings are well-performed and distributed. Cerny himself as they were recorded in his home in December. The intention of relieving the burden of his mental imbalance, he enjoyed only a brief commercial success. The end of his album, Scott Joplin, Piano Rags are played by Cerny himself as they were recorded in his home in December. The intention of selling the recordings was for four dollars and making them available according to hall salesmen was to use the proceeds to establish a music scholarship fund. If the album sells out completely, so the proceeds could begin with $3,000. The recordings are well-performed and distributed. CREATING SCOTT JOPLIN

Cerny, a graduate of Yale University, taught at Eastman School of Music in Rochester, New York, prior to his chairmanship of the Music Department at Notre Dame. The idea of recording Joplin rags to aid in the establishment of a music scholarship fund came to Cerny upon receiving the collected and published works of Scott Joplin as a gift from two of his students, Lydia Lebanauskas and Kendall Rafter. Cerny has devoted himself not only to the recording and his career at Notre Dame but to his pursuit of musical perfection. This album, reflective of his talents, is excellently performed and dedicated to a noble cause.

"The worst thing cancer did to me was make me sound like a tough cop."

Police Captain
Paul Sychynsko

"31 years ago I got one of Cancer's Warning Signals, huge mass. I went to the doctor fast. A shot was given and then they removed my lungs. In seven months I was back on the beat. Three years later I got my Sergeant's stripes. And here I am today, cured of cancer. Know Cancer's 7 Warning Signals and give to the American Cancer Society. We want to wipe out cancer in your lifetime."

American Cancer Society

The space contributed by the publisher
When Charles Dalton announced in 1905 that his experiments had supported the atomic theory, the reverberations of the news spread far and wide. His experiments had not only illuminated the deep structure of the universe but also shed light on the nature of matter and energy. His findings challenged the long-held views of physicists and chemists. Even as the implications of Dalton's work were being debated, the term 'atomic' started to be used more frequently, not just in the scientific community, but also in everyday conversation. The explosion of information about the atom led to a new understanding of the world, prompting scientists to explore the boundaries of the universe in search of further insights.

Contrary to the expectations of many, the atom was not the ultimate unit of matter. It was only the beginning of a larger journey into the unknown. As scientists continued their work, they discovered that the atom was not as simple as first thought. They found that the atom was composed of even smaller particles, leading to the development of quantum mechanics and the advent of the modern atomic model. The atom, once thought to be the smallest particle of matter, became a gateway to understanding the very fabric of the universe. This journey of discovery continues to this day, with our understanding of the atom evolving at a rapid pace.

The introduction of the atomic theory was a milestone in the history of science. It not only changed the way we perceive the world, but also opened up new avenues for scientific exploration and technological advancement. The implications of Dalton's work are still felt today, as we continue to delve deeper into the mysteries of the atom and the universe.
Pechek Dismissal

The firing of Physical Education Instructor and Wrestling Coach Fred Pechek demands a public explanation. Fr. Burtchaell, University Provost, has stated that there is a "firm rule" in the administration not to comment on individual cases of faculty hiring, firing and promotion. This case, however, is no longer a private matter between Pechek and the administration.

The fact that 1500 students felt strongly enough to petition the University to reinstate Pechek is the reason that this case is now a public matter. The mere fact that such a large number of students, largely freshmen and sophomores, have expressed their disapproval of the firing and their approval of Pechek as an instructor is significant in itself. With the exception of the basketball ticket controversy, no single issue has so united the student body this year.

Look at the facts as they have been presented so far: Pechek was confronted in May, 1974, by Thomas Fallon, chairman of the Physical Education Department, and told that the 1974-1975 academic year would be a trial period for disagreement with expressed their disapproval of the firing that such a large number of students, were dress and attitude. An evaluation Promotions in the Physical Education presented so far: Pechek was confronted had stated that there is a exception of the basketball ticket

The best indicator of the falsity of these charges is that 1500 students, mostly the basketball team, got excited enough to demand he be reinstated. These students demand some sort of explanation why a good teacher and coach will not be allowed to return to Notre Dame next year.

It is possible that Fallon, the Promotions Committee, and Burtchaell have other reasons for the firing that should not be revealed publicly. If this is the case, Pechek at least deserves a private explanation simply as a courtesy.

If these reasons do exist, they must be good enough to outweigh the petition of a significant part of the student body.

If such private reasons are not serious, then the case must be re-opened in the face of an overwhelming student support for Pechek.

The Editorial Board

Pechek contends that he has never been given a definite explanation for his dismissal and questions motives as dress, remodeling, and teaching. As class academic year would be a trial period for disagreement with expressed their disapproval of the firing that such a large number of students, were dress and attitude. Dear Editor:

When the "Christian Community" can somehow rationalize launching a ghastly "co-ed" in the hallowed grounds of Our Lady of the Sacred Heart? I am appalled at the reason: There is one reason for the manufacture of guns, that is, to kill. There is one reason for the manufacture of hand guns, that is, to kill. There is one reason for Notre Dame, that is, to instruct us as the University's "Rights to Life" to others to kill in the battle for the souls of death. The truth university cannot give us the ‘right' to instruct others to kill. This right is not a free weekend: they are dollar-gren and blood.

But I find that high moral standards dissolve when exposed to the glare of the spotlight. The sport of cheerleading has become an easy prey. Having a gun show at Notre Dame is not going to promote the university in any way, shape or form. It is simply more of the same, dedicating an abortion clinic on Mother's Day. BANG!

Bill O'Herbert

Gun Rationale?

Dear Editor:

I recently had the pleasure of glancing through the Course Evaluation, which was published in the scholastic each semester. In my opinion, this bias, in itself, earned the wrath of many. I have learned to cherish these pamphlets as though they were so many fine tools of higher education. I refer to this bias as a student's, and I believe that this is so radically disorganized that it defies any position of structure. A simple look at the organization of one country to another presents an entirely different picture.

My evaluation, you are certainly aware, is as accurate as yours. My opinion is as drastic as yours, but I stand by it, and I'm sure you can see that I can't possibly differ with others in order to see your opinion has just as much weight as mine. I've used such an evaluation, carry with them such responsibility. You apparently chose to shirk yours.

Karl Kemph

The Notre Dame-Macho

Dear Editor:

As though they were so many learned to cherish these pamphlets for the future of mankind, devalued, deprived individuals populate this campus. This reaction is prompted by high-pitched emotions, I realize, but all too well I'm sure that I am not alone in my sentiments. I was not only the only regretted by this display of twisted sexual behavior, but others will support my feelings.

Name withheld upon request

Karl Kemph

The ALPP

Dear Editor:

In regards to the recent decision not to reinstate Coach Peck as a Physical Education instructor, I feel I must speak out. I have had the experience of having both Coach Peck and Dr. Fallan, as instructors in handball and racketball respectively. I've found both men to be equally competent in teaching the fundamentals of their respective sports. Both men have been equally helpful, enthusiastic and available. I feel that both of these men are able instructors. If Coach Peck isn't rehired because it felt that he is an incompetent handball or racketball coach, then I feel it is only right that Dr. Fallan isn't rehired for the same reason.

Paul White

Make the First Step

Dear Editor:

I am writing to express my desire to start a movement on the Notre Dame campus, one that will hopefully bring together both men and women in the Notre Dame community.

The movement is centered around the idea that sex is not a private matter, but something that should be shared with others. It is important to understand that sex is not only a physical act, but also a emotional and spiritual one. It is important to embrace this fact and work towards creating a culture of respect and understanding.

In conclusion, I urge everyone to join me in this movement and work towards creating a more open and accepting environment on the Notre Dame campus. Together, we can make a difference and bring about positive change.

Sincerely,
[Your Name]
United Farm Workers director discusses human dignity fight

by Bob Mader

Eliseo Medina, National Director of the United Farm Workers, said last night that migrant farm workers are fighting for human dignity and the right to select their own union in a lecture at the Student Center auditorium.

The lecture, covering the lecture and grape boycotts, was sponsored by MCHA.

Medina’s talk centered around problems of underemployment and substandard living conditions in the United States. He cited the plight of migrant and migratory workers, including the labor contractor's treatment of these workers.

Medina discussed the difficulties of a strike, highlighting the need for solutions that go beyond picketing. He pointed out the importance of legal problems, substandard sanitary conditions, and the right to survival for migrant farm workers.

Medina emphasized the need for human dignity and the right to the same treatment as any U.S. citizen. He encouraged students to support their cause and fight for equal rights.

Medina talked about the challenges of organizing a strike and the importance of legal protection for workers. He mentioned the need for a contract that bans discrimination and ensures fair treatment.

Medina said that the farm workers have been forced to work under extremely hazardous conditions, often in the face of substandard living and working conditions.

Medina concluded by thanking his audience for their support and encouraging them to continue fighting for the rights of all workers.

Medina stressed the importance of understanding the challenges faced by migrant workers and the need for solidarity in the fight for human dignity and rights.
To raise funds for retarded
Bike-a-Thon slated for Sunday

by Barb Boylan
Staff Reporter

The Local Chapter of the Indiana State Teachers Association will sponsor the third annual Bike Ride to help the children at Logan Center Sunday, April 27. This event offers to bicycle enthusiasts of all ages an opportunity to ride their bikes for enjoyment as well as for the benefit of the mentally retarded.

Security image to change
with new uniforms: Pears

by Jean McQuillan
Staff Reporter

The Notre Dame Security force will attempt to change its image this summer by wearing new uniforms. The change is part of an experimental program that Arthur Pears is instituting "in order to get away from the 'police image.'"

The guards at the main and north gates on the morning and afternoon shifts will be the first to participate. Their uniforms will be navy blazers with light blue shirts and striped ties.

Pears hopes to gradually change all personnel uniforms, though this may be possible in situations where a clear public image is necessary, such as traffic control.

The present uniforms were introduced in 1966. Proposals for changing them have been in the works for a couple of years, but have materialized in the past 90 days. Programs such as this have been successful at Northwestern and Utah.

The 25 mile scenic ride will begin at Logan Center, home of the Council for the Retarded of St. Joseph County, at 1:00 p.m. Fr. Theodore Hesburgh gave his support to the students stating, "It is my pleasure to endorse the marvelous Ride-A-Bike foragain mentally retarded campaign again this year. The proceeds from the ride will assist Logan Center in providing a meaningful program for handicapped youngsters bef-

"As a community, we at Notre Dame have always held the tradition of service to our fellowman. Your participation in the 1975 Ride-A-Bike to be held on April 27 will again demonstrate our concern for others who need our help," Hesburgh stated.

"This wonderful project should do much to enhance the lives of the mentally retarded and their families, as well as those who make the effort to help them. Needless to say, the project has my complete and enthusiastic support and encouragement," he added.

Dan Devine, football coach, has also given his support to this unique project as a significant contribution to the community and retarded children.

For more information about riding or sponsoring a rider, students may contact Will (8397), Pat (8996), or Kevin Connolly (389-5088).

Hesburgh offers $5000 reward for March homicide information

The University of Notre Dame has offered a $2,000 cash reward for information directly resulting in the arrest and conviction of the person who murdered a cleaning woman on campus March 22.

Mrs. Helen H. Tobolski, a 62-year-old widow employed at Notre Dame since 1962, was fatally shot by a person who had broken into the Aerospace Building before she arrived at about 2:45 a.m.

The reward was announced by the Rev. Theodore M. Hesburgh, C.S.C., president of Notre Dame, who is in charge of the University's police force.

The vice president plans to make a final selection for the position by Thursday, April 30.

Duties of the post include attendance at hall president's meetings, coordinating interhall activities, attendance at the board of governance meetings in an advisory capacity, and serving on the student assembly in an advisory capacity.

Reasons for applying for the post and qualifications should be listed on the application, according to Bilek.

The vice president plans to make a final selection for the position by Thursday, April 30.

"This is the first year that the hall life commissioner will be appointed by the vice president for student affairs. In previous years, the post was an elected office. With the restructuring of student government earlier this semester, this change was made.
Better health care demanded

Workers' conditions cited

(continued from page 8)

Medina said that many die from the sun or pesticides.

"Some workers, even though they are the main workday of a farmer, they think of a guy in a sana and a shirt, milking the cows and going inside for a box of soda and a sandwich. Medina said, "But that's not what it's like. They are working, and they toil in the sun. They are Standard Oil, Dow Chemical, and other large companies. The workers they are Coca-Cola and Pepsi-Cola, and in the Midwest they are Camp and Budweiser. Medina pointed out.

Another camp, near Seaside in southern California, is "a man's" camp, one where many live in the sun. "Men are used to the conditions that they work in," Medina said.

Most of these camps were closed for two months in California due to tenant rains. He said his family was given food by the federal government which consisted of peanut butter, rice, meat, and cornmeal, all unpalatable. "I learned the value of a $1 bill that year," he said.

A U.S. Department of Health survey showed that 800,000 farm workers die each year from pesticides. These include organophosphates, organochlorines, and carbamates. Medina explained, "They brought them into the crops, and the crops they were not discovered they kill bugs, too," Medina said. These pesticides cause skin rashes, inflammation of the eyes, lung diseases, and make the skin crack and bleed. He also said that the pesticides have been poured into the soil and are absorbed by fruits and vegetables contaminating them. "The government hasn't really done the proper research," Medina said. "Why do they say these things?" Medina asked. "They're made by Dow Chemical, Standard Oil, and Ester Oil." Medina stated the the UFW contract bans 11 of the most dangerous pesticides, forces the employees to provide protective clothing when sprayed, and after spraying before workers re-enter a field. A health and safety committee has been set up to enforce these terms. The contract demands one toilet in the fields for every 30 workers. "It's ridiculous. If you go to a bar, a rock or a bush," Medina said. "This is not a place for human beings." A medical plan is called for in the UFW contract where the employer would pay 60% of the cost per worker per hour. Right now the workers are being paid 70% of the United Farm Workers for medical care in the U.S. where a migrant worker can have an office check up, X-ray and lab tests, and medications for nine dollars. According to Medina, the doctors working in these clinics receive five dollars a week, plus room and board. Children are $4.50 for clinic services, and all additional visits after the first for all workers in free of charge. Tuberculosis tests are now conducted in the labor camps.

Rape, assaults are a lesser problem at Purdue than at other Indiana campuses

(continued page 1)

"Police and IU!" Two of the leading Indiana state in- dicated that rape and other physical assaults were very minor problems.

Assistant Dean of Student Af- fairs at Purdue University, Sheila Shearon, commented that "Purdue is lucky; there is probably a lesser problem here than on most campuses." She reported that very few in- cidents of actual rape occur at the LaFayette campus of 17,000 students. "The Purdue Police work in conjunction with the Dean of Students office and residence hall personnel," she said. Sheen said Deterrents to assault include an emergency phone system and good campus lighting. In addition, students are shown a movie containing sensible procedures to use in the event of an attack, and are encouraged to walk in pairs.

A spokesman for Indiana State University reports one or two incidents of rape on the Terre Haute campus last year, but none this year. Donald Mighell, Associate Dean of Student Life described "rape workshops" which are conducted through the Student Activity Office. The workshops feature speakers dealing with physical protection from assaults and mental reactions to them. He stated. (continued on page 11)
Midwest campuses guard against assaults

(continued from page 10)

The campus of 10,000 students employs a good lighting system and an escort service to provide security. Students are instructed to walk in groups.

Michigan State University at East Lansing, "the problem of physical assault is not at the beginning of the year," according to Police Chief White. "It is always the number one for student affairs. Each September, educational programs on self protection and avoidance of rape and other personal attacks are presented in residence halls.

"I don't expect that we've had almost any increase in the number of rapes this year," White said. "It is only about as much as we've had in the past year."

Reports of rape are publicized in student newspapers, although the practice is criticized by some.

White added, "When some rapes are reported and published other victims are more willing to come forward."

"Rapes seem to occur in sports and parties, though the attacker is not necessarily the same person," White mentioned.

She noted, however, that in neighboring East Lansing one man is currently awaiting trial for allegedly committing forty-five different assaults in one year. Available to Michigan State University is a rape counseling service in East Lansing. The campus police system is presently being considered in student government.

White also stated that the new state law concerning rape has been in effect since April 1. According to this statute, rape is defined in four degrees, and a victim's past sexual experiences cannot be released in court.

At the University of Illinois in Champaign, where 45,000 students are enrolled, "If one incident of rape takes place, it is treated as a substantial problem," said Jacky Kram, assistant dean of campus programs. "If the number have occurred, though not in the campus per se, is the noted."

The campus programs office has worked with the campus security to coordinate programs to prevent rapes and assaults. One of these is Michigan's "Women's Self Protection Program," which has volunteer women who train women and men to protect themselves.

women faculty and students.

When you've a national television star at the age of 12 the rest of your life might be anti-climax but Bob Stratta has managed to stave it off. Stratta was the tragic heroine in the 1972 Little League World Series, a 12-year-old left-bander from Chicago, who lost to West York 3-2 in the final, forever in her honor.

"Some guy this high hit a homer off me," Stratta said after her team's 6-4, 6-2 decision to in number three singles, 4-6, 6-1, 6-2. Inchauste who was 25-3 last season powered by MU's Eric Friedler 6-4, 6-3, 6-2.

Friedler teamed with John Amaya to win the Big Ten doubles title and he was also a member of the All-Big Ten.

Michigan's Jerry Karzen managed to handle W'lack's fourth singles match. Miller was the fifth singles match. Miller's record now stands at 9-6. The tandem of Amaya and Karzen defeated Stratta and Miller in 3:30.

The afternoon began on a bad note for the Wolverines when his Chicago Roseland North learn suffered a 5-3 loss left his record at 11-4. The tandem of Amaya and Karzen defeated Stratta and Miller in 3:30.

Amaya lost to Buddy Gallagher 6-3, 6-2. Inchauste, like Scalea, has managed to avoid that problem.

"I've always thought of myself as a pitcher first even though I've played third and the outfield when I'm not pitching," Scalea said after his team's 6-4, 6-3, 6-2 decision to in number three singles, 4-6, 6-1, 6-2. Inchauste, like Scalea, has managed to avoid that problem.

Yesteray was not a good day for Notre Dame tennis. The Irish were shut out for the first time all season by a powerful Michigan team in a 9-0, 6-3 decision to in number three singles, 6-1, 6-2. Inchauste, like Scalea, has managed to avoid that problem.

"It's been great and we're a part of it," says Stratta. "But we're learning something tonight.

"The tandem of Amaya and DeJesus was too much for Carrico and Kane during the first doubles action. The last left the Irish with 3-3.

"I'm not sure if we'll get things going again. I'm not sure if we'll get things going again.

"Stratta made it one of the main reasons the Irish have got off to their best start in years with a 3-1-0 mark in the Big Ten. This was a year for his pitching success especially the fifth inning. They've all senior pitchers returning another and play together well. Shortstop is a very important and-and-and-and-and overall, they're great. "We've gotten left-handed pitching this year," Stratta said. "Bob Hughes and Don Wolfe have been big additions to our team."

Yesteray coach Chuck Apes said there has been a big factor also according to Stratta, "Some people who know them elsewhere have told me and baseball continued to
