Most students have two semesters to discover the South Bend area. Summer students have six weeks.
To help with the accelerated course in South Bend-Mishawaka, a guide to the area can be found on pages six and seven. Included are places to eat, places to drink and dance, parks and recreation areas, shopping centers, and a short history of the community.
On page 11, you can find maps of South Bend and Mishawaka to help you find your way around.
Welcome to "River City!"
The Stanford University Alumni magazine has charted the most productive life spans of men in various fields. It found that the best between the ages of 40 and 44. Sculptors, between 30 and 39. Scholars between 36 and 34. Novelists and book sellers are written between the ages of 46 and 46. Whereas the most influential books are written between the ages of 35 and 39. Papers do best between the ages of 50 and 52.

Some of the best college students are veterans.

Let's face it. Not everyone wants to step right into college after high school. Maybe you'll stay for a year or two. To travel, to learn a skill, to find out what you can do, to mature. For you, being a college student can be a meaningful affair.

Join the Army who's joined the Army.

It's summertime, and the living is easy. But beware of the dangers of outdoor recreation this summer.

At this time of the year, news of water-related accidents is in the news. Most of these accidents involve drowning. Each year, thousands of people die in water-related accidents.

Some of the basic rules for safety in water-related activities are:

1. **Swimming Safety**
   - Always swim with a buddy.
   - Don't swim alone.
   - Never leave your common sense at home when swimming.
   - Always swim in designated areas.
   - Be alert to the signs of water-related accidents.

2. **Boating Safety**
   - Wear a life jacket at all times.
   - Don't drink and drive.
   - Know the rules of the waterway.
   - Check the weather before boating.

3. **Fishing Safety**
   - Wear a life jacket.
   - Don't fish alone.
   - Be alert to the signs of water-related accidents.

4. **Other Water-related Activities**
   - Don't swim in rivers or streams.
   - Don't swim in areas where there are power lines.
   - Be alert to the signs of water-related accidents.

Remember, safety is always important. Enjoy your summer, but be safe!

Death Education May Cause Greater Fear

Instead of reducing excessive fear of death, death education may be causing greater fear.

According to results of an experiment described in the current issue of the Notre Dame Journal of Education, eighth-grade students who were given death education exercises did not show any decrease in the death anxiety of those who received no such exercises. However, the unexpected results now raised the question as to whether treatment groups are in the process of overcoming death anxiety or do they merely mask their real anxieties.

The experiment proposed to test the hypothesis that one can learn to overcome the fear. A scale to measure fear of death was developed, "built on the tentative theory that, while the fear of death essentially involves items from helplessness and hopelessness, there are eleven other fears and seven indicators directly related to the intensity of an individual's fear of death. The other fears include fear of possible death-causing events, ghosts, parental anger, punishment, failure, getting older, death-defying or death-denying attitudes; use of euphemisms when speaking of death, aggressiveness, expression of the death wish for self or others; certain dream content; exaggerated need for one's own body; and general pessimism, discouragement and insecurity.

Moeller received her Ph.D. in Education from the University of Notre Dame in May, 1975.

Registration Near Completion

The majority of registration for the Summer session was completed on June 27, according to Ki. "Students wishing to drop or add a course are instructed by Ki to go first to the department or departments involved, then to Student Accounts, the fourth floor of the Administration Building. "Even if the department is aware the student stays the same, it will avoid confusion by going to the Office of Student Accounts first. The final stop is to go to the Registrar's Office where the course will be properly processed, according to Ki.

"Any student, who for one reason or another arrived late and has not yet registered should come to the Registrar's Office," said Ki.

The office is located in room 215 of the Administration Building. The students may then be sent to Student Accounts to finalize his bill and receive a receipt.

Any students who have any problems concerning the registration process should visit the Registrar's Office or call the office at 383-7044.

Campus Food Prices Hiked in June

by Andy Fruehak

Associate Editor

A University-wide price hike on many prepared foods and beverages has been implemented by Notre Dame Food Services, headed by Edmund T. Price, director. The increase will effect customers of the North Pay Cafeteria, the North Pay Cafeteria, the Huddle, campus snack. It is a result of the yearly reevaluation of prices carried on the prices yearly, in the month of June, for the purpose of keeping the prices stable throughout the year, despite wholesale price changes. He did point out, however, that price of items in the grocery section of the Huddle are subject to change according to the prices on the market.

Another ND student, Bill Carmichael, employed on campus for the summer explained that the increases may be justified. However, his main objection to the increase is that no adequate amount of warning was given to the customers of the Huddle, he stated. Edmund T. Price, Director of Notre Dame Food Services is on vacation and unavailable for comment.

Bakery. The price of a bag of ice had increased by ten cents a strip, a sandwich made of three strips of bacon is going for sixty-five cents. This increase is a result of the yearly reevaluation of prices carried on the prices yearly, in the month of June, for the purpose of keeping the prices stable throughout the year, despite wholesale price changes. He did point out, however, that price of items in the grocery section of the Huddle are subject to change according to the prices on the market.

Tom Grogan, manager of the Huddle, explained that in some instances wholesale prices had increased, and the increases were virtually passed on to the customers.

Tom Grogan explained that as in any increase, there will be much confusion but in a short while all will become normal. Many Huddle customers, however, are vocally announcing their displeasure at the price increase. One angry man was claiming that prices of a bag of ice had risen fifty per cent since last summer and asked that the manager be advised of his displeasure.

Mary Kane, Campus Tour Guide and ND student, remarked, "I feel that they have taken away one of the few breaks that we, as students, get. Speaking as one of their better customers, I'm going to have to be a worse customer after the price increase."

This increase is a result of the yearly reevaluation of prices carried on the prices yearly, in the month of June, for the purpose of keeping the prices stable throughout the year, despite wholesale price changes. He did point out, however, that price of items in the grocery section of the Huddle are subject to change according to the prices on the market.

However, his main objection to the increase is that no adequate amount of warning was given to the customers of the Huddle, he stated. Edmund T. Price, Director of Notre Dame Food Services is on vacation and unavailable for comment.

Death Education May Cause Greater Fear

"While a moderate fear of death is healthy," Mueller writes, "there is much that indicates the presence of an excessive fear in most Americans. Since a high fear of death hinders a person's living a full life, it follows that one important goal of education should be to lessen the fear."

The experiment proposed to test the hypothesis that one can learn to overcome the fear. A scale to measure fear of death was developed, "built on the tentative theory that, while the fear of death essentially involves items from helplessness and hopelessness, there are eleven other fears and seven indicators directly related to the intensity of an individual's fear of death. The other fears include fear of possible death-causing events, ghosts, parental anger, punishment, failure, getting older, the unknown, separation and darkness, blindness and physical restraint."

Seven categories which, when found in combination, indicate a more moderate fear of death include death-defying or death-denying attitudes; use of euphemisms when speaking of death or the dead; aggressive behavior; expression of the death wish for self or others; certain dream content; exaggerated need for one's own body; and general pessimism, discouragement and insecurity.

Mueller received her Ph.D. in Education from the University of Notre Dame in May, 1975.
The Art Gallery, by the way, moved from its infancy atop the fifth floor of the old Library (now the Architecture building) in 1927. The Gallery, of course, moved to O'Shaughnessy Hall at some point in the 1950s.

Since that date the fifth floor has been unused and barricated.

The Blockade explained

"Why is it blocked off?" I asked.

"There's no demand for the space," reasoned Fr. Wilson. "The wing on the third floor above Mr. Frick's office would be used first anyway."

"Plus there's heating problems," he continued. "It requires more energy to pump the heat up that far."

Then there's always four flights of stairs. Even the fourth floor with its three flights is known to the building's mail carriers as the card room. Some nurses would not be able to lecture there, not to mention exhausted students.

An interesting view of this problem appeared in the Notre Dame Scholastic which then appeared describing the new Main Building:

"It is well known that the old College was too high, the upper story being practically useless on account of the long line of stairways to be climbed before reaching it. In the new building there is not only a reduction of stairs to the second floor, and nearer the first floor, and hence, much more comfortable."

Wilson warns of the dangers involved in breaking up. Although the fifth floor affords a magnificent view of the Dome, a fall down there is likely to be the last place one would choose for a window display.

President Ford has everything going for him. He is in the running. He can give the economy those little shots that are now customary just before election time. It is an advantage not to have been elected when the last two elections for our two top leaders gave us Agnew and Nixon. The Nixon pardon was perhaps the shrewdest move Ford made, and the one that will reelect him. It did not get rid of Watergate, but it did settle his particular Watergate problem. It allowed the crimes in order to dismiss them. If that made him "soft on Nixon," nothing could be nicer from his own point of view.

What should not be forgotten—who others forget, but never Ford—is simply this: The Nixon constituency is still out there. That landslide election of 1972 was not a fluke, that will reelect him. Nixon's constituency is still out there. That "soft" Harry is an unabashed winner. It is an strategy. paid off. By 1972, Nixon had extended his own margins, and Wallace had added to his own kind of Agnew. shrewdest move Ford made, and the one McGovern brought only a landslide election of 1972 was not a fluke, that will reelect him.

What should not be forgotten—who others forget, but never Ford—is simply this: The Nixon constituency is still out there. That landslide election of 1972 was not a fluke, that will reelect him. A Short History

When Rene Robert Cavalier de La Salle stepped foot in Indiana, there were already a tribe of Miami Indians planted in what is now South Bend. The Pierre Navarre became its first white resident when, in 1802, he married Potawatomi Squaw and, in what has become a long tradition, convinced her to stick around until something better turned up. Twenty-one years later, when Alexis Coquillard, of the enormous gravestones on Notre Dame Avenue, opened up a trading post on the banks of the St. Joseph River, Coquillard called the community “Big St. Joseph Station” and the name was shortened to “St. Joseph’s.” Then, when the area was infested by anti-religious forces, the name became “South Hold,” which was far inferior in the eyes of Mr. Coquillard to the former name. In 1839, after a long identity crisis, the town became known as South Bend.

Industry sprouted immediately along the banks of the St. Joseph River. Coughlin founded a flour mill and sawmill. Then, in 1832, the Studebaker Brothers arrived and set up their internationally famous motor company, bringing in thousands of workers, many of whose descendents are still here.

The story of the town’s business may be traced to the early 1890’s when John Emery and Corby’s opened a livery stables on the far west side of town. It was to be the first of South Bend’s famous bars.

In the Parks

The St. Joseph River, winding its way through the South Bend-Mishawaka area, has given the community a “veritable playground” of parks and picnic spots. The South Bend city planners saw to it that the citizen’s need for pleasant parks and recreational areas was filled. The numerous city parks, zoo and playgrounds provide pleasant locations for Sunday afternoons in the sun or any afternoons or mornings for that matter.

South Bend-Mishawaka’s parks are used by everyone and there are recreational activities for all, including volleyball, basketball, handcrafts, tennis, swimming and senior citizen’s programs; great go-buoys for those under the age of thirty.

Swimmers have their choice of medium or Olympic-sized pools, indoor or out, or the beach at Pinhook Park, which is located on a beautiful natural lake tract.

For tennis buffs, there are the courts behind the A.C.C. on campus, or the nearby Lerper Park Tennis Center, with 15 lighted, all-weather courts.

Golfers wishing to sharpen their game, and tiring of the Notre Dame links, can take their choice of one of the seven public or two private courses in the area.

ON THE TOWN

South Bend is not without its nightlife. There are several bars in the area that feature entertainment, dancing, live bands, and all of the elements necessary to assuage the nocturnal debauch.

The corner of Corby and Eddy streets has become a legendary watering hole for Notre Dame students. One can find here four favorite student bars. The newest of these is Riverside’s, which features a 20’s style decor, taped rock’n’roll, and an atmosphere totally conducive to friendly drinking.

Across the street from Bridge’s is Nickelodeon, where is just making the change to entertainment on the weekends. Nickles offers a dance floor, pool tables, and some of the best Southsiders in town, just in case drinking gives you the munchies.

The black exterior of Corby’s may scare the uninhibited away, and a look at the clientele after midnight may also do the same, but to those who call it home, Corby’s offers the ultimate in the drinking, experience. Take it as you can.

Plant and flower lovers can view the horticultural marvels of the upper Indiana Conservatories at either the Elia L. Morris Conservatory or the Mussel-Ellison Tropical Gardens in Potawatomi Park. The community has the Children’s Storyland Zoo located in Rum Village Park. It is a very small Zoo, with only black bears, chimpanzees, and numerous domestic animals, which are available for petting and other amusing animal activities.

The Potawatomi Park Zoo contains the larger animals, lion, tigers, and camels, as well as such favorites as the wallabies, dingo’s and the “one and only” hairy armadillo.

The heavily wooded countryside of Michigan has ample opportunity for hiking, bicycling and hunting. Just ten miles west of South Bend is Bendis Woods, where fishermen drop their lines and hikers enjoy a brisk walk around the premises, a favorite spot for a ‘day in the woods,” including picnicking and general fraternizing.

Just 30 miles away from South Bend is Lake Michigan. The giant lake, with its sand dunes and many public beaches, is just a short drive away, and well worth the trip. The Warren Dunes and the Indiana Dunes have become student favorites over the years for the extreme change of pace and scenery from the university setting.

Moving away from the infamous corner, one can head up South Bend Avenue to Loisies, which becomes more of a bar than a restaurant site for night wears on, but still retains its jolly atmosphere.

In South Bend, are two bars of note: Sweeney’s and Fat Wally’s. Sweeney’s is everything you could imagine in a Notre Dame bar. Fat Wally’s is a bar-night club frequented by those slightly above student age; they have entertainment five nights a week.

In Mishawaka, one can find Bill Nagy’s Hideaway, which calls itself “The World’s Top Rock Night Club”; they have dancing every weekend, and highlight the occasional concert.

Up in Michigan, we find the “Rock of Michigan,” Shula’s. They feature Rock Night Club sets, which utilize in a type of hybrid of the Night Club-show and the Dance Band. A large dance area, and an expansive bar, both in tastes and in physical size, can be found here.

Also in Michigan is the White House Inn, only recently discovered by students. They have dancing and entertainment, and cater to a slightly less flamboyant crowd than Shula’s. Some say it’s not as much fun.
SHOPPING: River Bend Plaza and others

One hundred years ago, shopping in South Bend was extremely limited. Most of the women shopped for their own clothes in the clothing of their families. Food was withered bartered for at the local general store and prepared at home.

Today, the picture is entirely changed. Huge shopping centers dot the outskirts of the city and a complete pedestrian mall fills the center.

The preparation in South Bend for the bicentennial goes beyond the painting of fire hydrants. A new center, "Century Center," is scheduled to be completed and opened on July 4, 1976. It will house a convention center, an art center, recreation and education facilities, the Studebaker Museum (in this corner, the 1867 Rambler) and a mixture of community events. It has been architecturally designed to complement its location on the banks of the St. Joe.

The River Bend Plaza, along Michigan Street, is the core of the retail area in South Bend, and offers a relief for shoppers tired of the sterile shopping center atmosphere. The pedestrian mall, with canopy-covered walks, trees and planters, pools and sculpture, and many other attractive conveniences, offers a unique shopping experience. Most of the stores welcome the casual browsing which the mall lends itself to. The plaza is also a center for civic and community activities, such as the welcoming of President Ford.

Those looking for an enclosed shopping center might consider Scottsdale Mall. More than 100 stores can be found here, layered on two levels. Scottsdale is typical of the large modern shopping complexes that have sprung up on the outskirts of cities all over America. In the center of the mall, large walkways are rest areas and fountains, giving a comfortable atmosphere to the expansive development.

One of the most unusual shopping complexes to be found anywhere is the 100 Center, built in the main building of a former brewery. Most of the stores center on the less-than-practical tastes, many of them are what can be called gift shops. It's a good place just to browse around and spend an afternoon. The pace is quite a bit more relaxed than anywhere else in South Bend, though the prices here can cause one to raise a bit.

At the 100 Center, you can wind your way upstairs and downstairs in the main building of the brewery, or step outside for a venture into one of the annexes. The 100 Center also features an excellent movie theatre, which shows films longer after they have seen their premiere days, but at a much deflated rate.

The unusual experiences of the 100 Center include a venture into the cheese world to a discovery in the art gallery, a meal in what once was the brewery's ice house, even a visit to the former stable that has been converted into an antique shop.

Farmer's Market can offer you an exciting morning trip. Crowded aisles of justling shoppers make their way through bins of fruits and fresh vegetables in this old-world atmosphere. Fresh flowers during this time of year add a touch of festivity as shoppers purchase fresh meat during this time of year add a touch of festivity as shoppers purchase fresh meat and eggs that are practically still warm from the hen. The small store also serves excellent breakfasts at very reasonable rates. Remember, come early, you're on farmers' hours.

Close to the Notre Dame campus is the Town and Country Shopping Center, a newly formed College Square complex. The Town and Country features more than 40 stores, restaurants and shops, as well as a mini-mall and movie theatre. The College Square features a tobacco shop, a jewelry store and a record shop.

Wining and Dining

South Bend-Mishawaka's restaurants run the gamut from classic greasy spoons to the finest in elegant dining. At any rate, a restaurant can be found to offer even the shiniest pocketbook or the most homely cooking.

Starting at the lower-income bracket and moving up, we find three McDonald's in the area. All of them on U.S. 31. If the golden arches seem like golden armpits to you and (who doesn't get that feeling every once in a while) the way they've ingrained themselves into our being), you can settle into an A&W's Big Boy, of which there are three in the area. Never lacking in fast food franchises, the area also offers a Burger King, several Kentucky Fried Chicken stands, and various independent fast-food havens.

Now, all of that is too much for your sensitive taste buds, there is some recourse in just a slightly higher price bracket. The first of these is the J&J Grill, which also is one of the finer 24-hour spots in town. The second is in the J&J Grill, which also is one of the finer 24-hour spots in town. The second is in the J&J Grill, which also is one of the finer 24-hour spots in town. The second is in the J&J Grill, which also is one of the finer 24-hour spots in town. The second is in the J&J Grill, which also is one of the finer 24-hour spots in town. The second is in

Down the street and down the hill is Milanes which features "East Coast Plaza,) whatever that is. In the River Bend Plaza, next to the Morris Civic, is the Hansen, home of concert goers and other assorted clientele.

If you're looking for a meal that lends itself a bit more to the occasion, there are many fine restaurants that will stretch your budget enough to let you know you've been out on the town, but not enough to put you in the poor house. The Bean's Head, a short drive from campus, offers an exceptional beef and seafood menu in an old-world atmosphere. The Cray, just down Angela Boulevard, offers fine Italian food in an attractively Italian-American setting. The Hass House, on St. Joseph River and offers a fine salad bar and very good food at good prices.

Finally, if you're looking to shoot the works (and who not, you're only in South Bend once!) the area offers some very fine, and fairly expensive, dining rooms. But, if you're into putting on the big, then who's counting the pennies, or the dollars, or whatever?

The Dunn Under, near near Scottsdale Mall, is one of the finest restaurants in the area. Excellent atmosphere, excellent food, excellent wines and beer and an excellent room make this worth it in the bucks department.

The Wooden Keg has been a student favorite for years. They have very good food, very pleasant service, and an atmosphere that is not overly oppressive.

Finally, there's the Marrietta Inn. If you're a Trustee, an Administrator, or an officer of the University, or enjoy watching one of the above eat, then this is the place for you. Otherwise, the prices are hot and the food is lukewarm. The view offers you the expanse of the Notre Dame Golf Course.

IUSB Presents New Plan for Dealing with Required Courses

All across the country, students are taking courses which are required for graduation or to get into a graduate school. Most of these courses are unrelated to the student's majors.

IUSB is no exception. Except at IUSB, students have a choice of what requirement courses they must take.

According to Eugene Love, director of University Division at IUSB, the IU system has changed a great deal. IUSB is flexible in their requirements by letting the students choose courses.

Love's office counsels incoming freshmen on courses that can be taken at the freshman level for a required course. He also noted the variety of courses the students can take throughout his or her college career towards a degree program.

Traditionally, colleges and universities have a certain curriculum of requirements which a student must take before he or she graduates. IUSB gives a student a choice of courses. However, the student must take certain number of courses in a particular school. In Arts and Sciences, for example, a student must take two sciences, two math's and four history to get a degree plus those subjects specified for their major.

Requirements are becoming more flexible. The new requirement is that a student must take at IUSB 131, English Composition. But a writing class may substitute for this if designated in the Schedule of Classes.

Love said the University Division does not push students into deciding on a major for the first two years. Before 1970, a student had to declare a major. Sophomores in the University Division are counseled on the best career for the individual student.

Red Tape Engulfs IUSB Parking Lot Improvements

If students want the chuckholes in the parking lot repaired, the time may come when they will have to do it themselves, if something is to be done.

According to a reliable source, the money from IUSB's paid parking is tied up somewhere between IUSB, IU in Bloomington and the State Government. The money is being held up for renovating the parking lot. As yet, the state has not given a reply on the parking lot repairs.

A source in the IUSB business office said all of the financial arrangements and specifications have been made. All that is needed is for contractors to bid on the job. The holdup, according to the business office, is the State Government.

By paying for parking decals, students faculty and staff are putting money into a fund towards the supposed improvements of the parking lot. This is the only way the money can be spent.

Violators of the parking rules (no decals, not parking a car, parking in a no parking zone) end up with a ticket and a fine. The fine money is put into a scholarship fund called the South Bend Fund. The fund is a general fund which a student must take at IUSB 131, English Composition. But a writing class may substitute for this if designated in the Schedule of Classes.

Love said the University Division does not push students into deciding on a major for the first two years. Before 1970, a student had to declare a major. Sophomores in the University Division are counseled on the best career for the individual student.

Registration for Indiana University at South Bend's second summer session will be held on the campus Wednesday and Thursday, July 2 and 3.

Classes for the six week session will begin July 7 and run through Aug. 15.

Schedules listing available classes can be picked up at the registrar's office in Northside Hall, or can be requested by mail from the university-relations office.

Prospective students can obtain registration cards in divisional offices June 25, 26 and 27. Student data cards will be issued on these days near the registrar's office. Both cards will be available on registration day.

Beulah P. Schwanke, IUSB registrar, urged enrolling students to bring an accurate Social Security number to the registration process.

Taxes and priorities for the registration procedure are included in the Class Schedule.
IUSB Receives Grant for Michiana Transportation Development

Indiana University at South Bend has been awarded a $33,700 federal grant to improve coordination in the planning and development of public transportation facilities in the Michiana area.

The I.H.E.W. grant was awarded under the Title I provisions of the Higher Education Act and will be administered through IUSB's Division of Public and Environmental Affairs.

Cooperating agencies in the project plan to employ the Illinois Area Council of Governments (MACOG) and the Michiana Committee for Improved Transportation, a local citizens' organization interested in improved public transportation.

The project is based on the belief that "there must be new policy responses and innovative approaches on the part of public administrators" at the state and regional level in order for public transportation to become more effective.

Thomas A. DeCoster, IUSB director of the public affairs division and program director, said IUSB will attempt to provide "a mechanism to formalize dialogue between transportation planning between representatives of various local governmental agencies."

The program will work with public administrators in 17 Northern Indiana and Michigan Counties: Elkhart, Fulton, Kosciusko, Marshall, Noble, LaGrange, LaPorte, Pulaski, St. Joseph, St. Joe and Whitley; and 16 commission members, transportation agency attorneys, airport authority members and related persons.

The project proposal was based on the fact that previous regional transportation has been planned and developed on a fragmented basis. Seminars, lectures and simulation sessions will be offered through the IUSB project to overcome such fragmentation of planning.

In the program, transportation systems, consider the landuse planning implications of transportation development, examine the energy and environmental perspectives of transportation planning, and study the special needs of the poor, the elderly, the handicapped and the inner-city population in planning for transportation.

The program is a comprehensive program under way early in July, according to Ryan. Demaree will be returning to South Bend Symphonic Choir to Begin Tenth Season

Cooperating agencies in the program have chosen as its new conductor Robert W. Demaree, Jr., chairman of the IUSB division of music and associate professor of music.

Speaking of the residency arrangement recently was approved by representatives of the choir and IUSB.

JURY DUTY
ONE MAN'S DAY IN COURT

by Andy Przachal
Associate Editor

In an effort for civic support at Notre Dame this year, the student government conducted a massive voter registration drive across campus. The drive was proclaimed a success, registering over 2,000 Notre Dame students.

It was noted, though, that Notre Dame students are not attending jury duty at an above average rate. In fact, according to the responsibility of selecting the most qualified candidates of the students, it may be his last.

This court is under the jurisdiction of the Burna Indiana Statutes, passed by the Indiana legislature.

According to Sue Schwartz, Personnel Secretary to Judge Douglas Seely, prospective jury members in St. Joseph County Court are selected by the two existing jury commissioners. These commissioners are appointed by the presiding judge.

Sue Schwartz explained that she was unable to describe the exact process used by the commissioners to select prospective jurors. "They simply go through the registration drive and use the book and select the names at random," she said. "Boyle was available, however, to state that no type of computer or other mechanical device was used to insure a completely random selection of names.

Schwartz explained that very few people are exempted from duty once their name has been selected. "By law, the only people automatically excused from duty are police officers, firemen, dentists and veteranarians," she recited. She also explained that persons sixty-five years of age as a juror proved quite convenient. 

Nonetheless, as with any privilege there is an accompanying responsibility of serving on a jury. For at least one Notre Dame student this was only the beginning of a very inconvenient week. "I spoke to the bailiff, explaining the situation and being very understanding, he excused me from future service," said Boyle. "Between this incident and his official sitting in in on an entire case, Boyle experienced what he termed to be the most aggravating of all the situations. "Many times they would call me in two days before a case was scheduled and request my appearance. Then, at the last minute, they would call back and say that the case had been canceled. Boyle noted that this situation caused more inconvenience than it may at first seem. "Knowing that I was scheduled to appear in court on a certain day, I would postpone preparing for that day's classes," he continued. "That usually, when the case was postponed, I would be forced to show up for totaly unprepared, still waiting for my chance to do my duty as an American citizen."

Boyle noted that it was around this time that he became very iritated with the system and started to refuse to answer his phone...

"I am considering having my name taken off the registration list in Indiana."

"I am considering having my name taken off the registration list in Indiana."

The time finally came when he spent his full day in court as a juror. "The case took the entire day and I earned the $7.50 they had promised," he said. If the rumors that Boyle heard held true, he can expect to receive a check for $7.50 in about eleven months.

Looking back on the entire situation, Boyle notes that if he had reported for duty all the days he was supposed to, his academic standing would be quite different.

Many believe that selecting people for jury duty can act as a deterrent for registering to vote. In this particular case, it may be assumed that it could not be used as an instrument to discourage Notre Dame students from registering in South Bend. However, Boyle pointed out that he can only remember coming in contact with one other student that had been chosen. "She was a St. Mary's student who had been excused because her father was directly involved with the case being tried," he said. "Other than her, I can't remember meeting anyone under the age of thirty," he recalled. He said that most of his fellow jurors were elderly ladies and a few men.

"I spoke to the lady on the phone that I may be unable to show up on the day I was required to spend in court, "although this was noted in the form letter that an attempt would be made to contact him at the telephone," he explained. "The lady asked why I hadn't appeared in court that day," he continued.

Boyle said that he had explained the situation but the voice on the other end of the telephone still seemed to sound quite skeptical. "If I remember correctly, she was being quite smug to me," he said.

Boyle noted that following this encounter, he had what seemed to be on his better memories of the ordeal. "They called me back that Tuesday and said I was to report for another case on Thursday," he said. For Boyle, this was to be quite an inconvenience.

He pointed out that not only was he in the process of running for Notre Dame Student Body President, but his parents were coming to South Bend for Junior Parents' weekend. He had to go through all this and was called again this morning." He explained. The law provides for Junior Parents' weekend in the American system would be quite different.

No one available to answer the phone..."
Charles Named Acting A&L Dean

Isabel Charles, O.P., assistant dean of the College of Arts and Letters at the University of Notre Dame, has been named acting dean of the College by Rev. Theodore M. Hesburgh, C.S.C., president of the University. The appointment is effective September 1.

A search committee for a permanent replacement for retiring Dean Frederick J. Cruson, which has been chaired by Dr. Charles, will continue its work, Father Hesburgh said.

Dr. Charles did her undergraduate work at Manhattan College, Riverdale, N.Y., and received her M.A. and Ph.D. in English from Notre Dame. After a year of postdoctoral study in 1968 at the University of Michigan, she served as executive vice president and academic dean of Ohio Dominican College in Columbus, where she had previously taught for three years on the English faculty. When she came to the University in 1973 as assistant dean, she was the first woman to hold that position at Notre Dame. Dr. Charles also holds a diploma in English from Notre Dame.

The appointment is effective September 1.
Kline Retires: .559

The first winning record since 1970 was the Notre Dame baseball team's going-away present to Coach Jake Kline who retired at the end of the season after 43 years as head coach. The 17-14 mark brought the 80-year old coach's final winning percentage to .559. The team broke to an all-senior infield. Pat Coleman scored with 21 and home runs with three. Captain Mark making just three errors all year. Mark. along with freshman Dave DeFacci.

squad's greatest asset was doubles. Carrico had an excellent season he contended that the Kane to post a well, the guys at the lower spots line, "the players at the top positions didn't do mark for several weeks."

season. But the Irish had some progress. He started the season four matches we lost were by position, but was soon playing the off its champion in the Irish Invitational. teams highly regarded in the Big

The first winning record since Notre Dame's captain John O'Neill had a fine .300 and a 23-game winning streak in the NCAA tournament. The 14-7 record but a 3-7 finish when they lost .222. was the all-underclass pitching wolf was ND's steadiest pitcher down the stretch finishing with a 2.70 ERA. On April 20 he No.1 Butler, the first hitters game by an Irish pitcher in 27 years. Strikeout artist Bob Hughes overcame some control problems to win four games while fellow sophomore Jim Sholl was always contenders for league honors, posting a 3.24 record in league play. He also coached two American Legion baseball state champions during the summers.

Fallon Explains Tennis Success

Notre Dame's tennis coach Tom Fallon turned out to be a prophet. At the beginning of the season he contended that the squad's greatest asset was balance, and by spring he was convinced of it. "We were pretty evenly even up and down the line," he admitted. "When the players at the top positions did a well, the guys at the lower spots picked up the slack and vice versa."

The squad he speaks of gave the 10-year coach a 6-4 record, a bit off its 8-6 mark season. But the Irish had some tough competition. "Three of the four matches we lost were by scores of 5-4," says Fallon. "All of our losses (Michigan, Illinois, Indiana and Ohio State) were to teams that were regarded in the Big 10." Only in the Michigan match were the Irish out of it all the way when they lost 6-0.

The netters were led by sophomores Ray Shehky, Stachik, a southpaw from Peru, Ind., was enjoying a 14-0 record and a 25-6 winning streak before losing to Michigan's Victor Amaya. Randy finished the season at 17-3 in addition to being named Most Valuable Player in the Galviston Island Spectacular and second singles champion in the Irish Invitational. The season's effort gave him a career record of 46-8.

Notre Dame's captain John Carrico captured 12 matches in 38 outings while playing in the number-one-slot. Carrico, a senior from Lake Forest, Ill., also combined with teammate Chris Kane in post a 10-4 record in first doubles. Carrico had an excellent spring, two of three of four matches while in Texas, but he began to play rather inconsistently after that, hovering around the .500 mark for several weeks. Senior Chris Kane enjoyed his finest season as an Irish regular as he posted a 13-7 mark. Kane had been bothered by a sore arm for the past couple of seasons which had seriously hampered his progress. He started the season playing in the fifth singles position, but was soon playing the number three spot. He stayed there for the remainder of the season.

In fourth singles, the Irish had help from senior Ron Inchausti. The right handed form Bolivia recorded a 1-2 slate in his first season as a varsity regular. He saw limited action the year before when he won five of six. Fallon received a pleasant surprise in the performance of freshman Brian Hainline. A native of Detroit, Hainline took 13 of 21 matches while playing in the fifth spot.

In sixth singles the Irish got a hand from junior Juan Inchausti (16-5), junior Mike O'Donnell (13-1) and freshman Tony Bruno (12).
