The Mock Democratic Convention's Platform Committee accepted a plank calling for an "overhaul" of the present criminal justice system and the decriminalization of marijuana at its meeting last night. The committee voted to largely uphold the status quo in areas of military spending, national security and campaign finance.

They later adopted a more liberal stance in voting for the decriminalization of marijuana, the establishment of a national health insurance program and the legalization of gambling.

The following planks were voted on and passed by the committee:

**Crime Prevention:** The most ardently discussed topic at the meeting was that of crime prevention. The final plank called for an "overhaul" of the present criminal justice system, an expansion and upgrading of the penal system, an increase in the number of Federal judges to more efficiently handle the number of court cases and Federal medical aid to the victims of violent crimes. It also called for the decriminalization of marijuana and the removal of obstacles to the legalization of gambling. A minority plank included the legalization of prostitution with government regulation.

**National Defense:** Discussion on this topic was continued from Tuesday night's meeting. The committee supported the establishment of a civil agency to oversee defense spending and defense contracts, the increased reduction of overseas U.S. military forces, a governmental study with the end of reducing bureaucracy and increase efficiency in the military, a rebuilding and upgrading of the present military, and a reaffirmation of our commitment to the Strategic Arms Limitation Talks (SALT). An amendment for the reduction of spending for the maintenance and development of nuclear weapons failed to pass.

**Government Secrecy:** The committee voted to put an end to unnecessary secret classification of information or classification which involves individual political needs and provided for automatic declassification of material after a given period of time. A minority plank included decriminalization of BEEN classified documents which expose illegal activities.

**Security:** The committee expressed concern over power abuse by the FBI and CIA and voted to establish a supervisory committee with members from all three branches of the Federal government.

**The committee would have access to files in both agencies, and would see that they remain within the guidelines of the law and of their established purposes.**

**Sensitivities:** This plank called for abolition of the seniority system to "decentralize power in government.** and "make committee chairmen more responsive to the ideas of committee members, their colleagues in Congress, and their constituents."

**Campaign Finance:** The committee upheld the maintenance of campaign contributions and provided for federal aid to candidates, a re-evaluation of the national primary system and a plan to equalize the election chances of incumbents, major-party candidates and independent party candidates.

Lobbyist Reform: Stricter lobbyist laws were called for in the mandatory registration of all lobbyist and periodic financial reports submitted by lobbyists. These reforms would apply to lobbyists in state and federal government.

**Health Care:** Legislation was sponsored to prevent doctors from raising malpractice insurance costs, to establish guidelines for malpractice suits, to provide free medical checkups for elementary school children, to subsidize doctors who would practice in free clinics and to establish a form of national health insurance.

A minority plank would set up a two-audience intensive nation health insurance program as well as set up a national health maintenance organizations (HMO's), groups of doctors and nurses who would function more efficiently than private practitioners.

Discussion by the Platform Committee will continue tomorrow night and possibly into the week-end, committee assistant chairman Mike Benjamin pointed out.

"Tomorrow night's topics will be the environment, the middle class, abortion, family planning and women's and minorities' rights."

Chairman Rick Littlefield noted the discussion will very likely be quite heated and he urged both delegates and visitors to attend.

The meeting will begin at 6:30 p.m. Wednesday in the LaFortune ballroom, 1274 Science Hall, and discussion of the campaign finance topic will begin promptly, at 8:30 p.m.
Violinist Gordon to solo with Chamber Orchestra

by Mary Nathaniel
Staff Reporter

Violinist Cora Gordon will be featured soloist with the Mid-West Chamber Orchestra, Feb. 14 at 8:30 in O'Laughlin Auditorium at St. Mary's College.

Gordon began her violin studies at the age of eight and gave her first solo performance in New York's Town Hall at 11. By the age of 15 she had performed major concertos of Mendelssohn, Bruch, Mozart, and Bach with the East Coast orchestras.

She has performed as soloist with the Marlboro Festival Orchestra under Pablo Casals and the American Symphony under Leonard Stokowski.

Presently on the music faculty of Long Island's Dowling College, Gordon also directs the New Chamber Orchestra of Long Island.

Her concert tours have taken her to Europe, Asia, and South America including a tour in Sweden. Highlighting Saturday's performance will be Bach's "Concerto in D Minor for Two Violins and Strings," with Gordon and conductor-violinist Seymour Rubenstein.

Rubenstein, a native New Yorker, has appeared as soloist with major orchestras and chamber groups throughout the U.S. and Europe and as soloist with the New York Philharmonic and the Boston Symphony Orchestra.

Tickets for the concert are available at St. Mary's box office or at the door. General admission is $4.50 and student tickets are $2.50.

CIA denies involvement in Angola

Some newspapers and SAS spokesman John Brest say it comes from American sources involving the CIA and the American Embassy in London. The U.S. Embassy says it has nothing to do with the recruiting of mercenaries.

John Banks, a 35-year-old paraproteo who recruited for the Angolan operation, said Wednesday the money has been coming from a man in the northern city of Leobs named Don Beltord.

"In this business, it doesn't pay to ask too many questions," Banks said in an interview here.

His apartment 35 miles southwest of London served as headquarters for the SAS until recent developments, including return of 50 of the mercenaries and reports that 14 of their comrades were executed after demanding to go home.

Architect sees present bathrooms dangerous

AP Newslleisure

Think "old age" when you plan to build or remodel a bathroom. That way you may reach some conclusions that will benefit every member of the family.

"Things that are necessary in the bathroom for the elderly are necessary for all," says Alexander Kira, professor of architecture at Cornell University. "It is just that younger people are more tolerant of inadequacies and are likely to single out necessary things as being geriatric devices or solutions."

Although in the past few years bathrooms have improved, it is still the most single underdeveloped area in the average house, Kira says.

Burdened with arthritis, eyeglass problems, back problems or other physical disabilities, some older persons may find the bathroom ceasing to be a convenience. They shun it because it may be unsafe, poorly lighted, unhygienic and a mechanical failure with fancy features that are difficult to manipulate. In fact, some older people may resort to sponge baths in the kitchen, he said.

Kira was discussing his book, "The Bathroom," which has been reviewed and released. First published 10 years ago, it took seven years to write and includes the social and psychological aspects and design criteria for cleansing of the body, as well as other aspects of the subject.

He contends that every tub or shower should have grab bars at the entry and out so that the elderly persons may find the bathroom ceasing to be a convenience . They shun it because it may be unsafe, poorly lighted, unhygienic and a mechanical failure with fancy features that are difficult to manipulate.

Although in the past few years bathrooms have improved, it is still the most single underdeveloped area in the average house, Kira says.

Kira is particularly concerned with the plight of many older persons who live in rent-controlled apartments with antiquated room facilities. Landlords simply won't spend the money to remodel these buildings. Sometimes it costs a little more to get the proper fixtures, but such things are not really expensive, he maintains. It is just a matter of using your wits when you put the bathroom package together.

"You can go to a discount place and buy the whole works - tub, lavatory and toilet for maybe $100, even though you can also spend $500 for a bathtub if you can afford it," Kira remarked.

Safety is lacking

"If one is doing a bathroom from scratch, I would not use the typical solution of installing a shower head in the tub. Some elderly persons might want to take a shower sitting down and even some of the one-piece molded plastic units have built-in seats and other built-in features. A hand shower also is extremely helpful.

The bathroom usually is the first place people go in the morning and the last place they go at night, he points out. If it is cheerful and it works, it can be a pleasant way to start the day. We should want to bathe and enjoy it. Seeping, littering and scrubbing serve useful massage purposes as well as removing dirt. They can improve blood circulation, nourish the skin and help maintain muscle tone.

Lighting is important to the whole scheme and good light is particularly necessary if one has failing eyesight. Older people may need to adjust contact lenses - some may have cataracts and need special mirrors.

The floor should be considered, not only as a matter of safety, it can be made warmer with bath mats. And every bathroom should have a night light or night switch.

"People often spend a good deal of money in bath boutiques and what they are doing usually is decorating the bathroom after the builder has left," Kira says. "They buy additional bath racks, mirrors, trays, special holders, whereas many of the necessary items could have been built in. They succeeded only in having a good deal of clutter that doesn't really solve their problems.

"It is like applying a little adhesive bandeage to a bad cut. Real luxury should be something that works. You need a place for your hair drier, water pick, toiletries, and any number of other things necessary to personal comfort."

Kira is particularly concerned with the plight of many older persons who live in rent-controlled apartments with antiquated bathroom facilities. Landlords simply won't spend the money to remodel these buildings. Sometimes it costs a little more to get the proper fixtures, but such things are not really expensive, he maintains. It is just a matter of using your wits when you put the bathroom package together.

"You can go to a discount place and buy the whole works - tub, lavatory and toilet for maybe $100, even though you can also spend $500 for a bathtub if you can afford it," Kira remarked.
Swede attacks nationalism at Winter Olympics

INNSBRUCK, April 18 - The Swedes are by no means a small group of people. They are a nation of 7 million inhabitants in a country that is roughly the size of Illinois. And they are determined to show the world that they are a nation to be reckoned with in the Olympic Games.

The Swedes have been enjoying a string of victories in recent years. They won the gold medal in the men's hockey tournament in 1994, and the silver medal in the women's hockey tournament in 1995. They also won the silver medal in the men's luge event in 1994. These victories have helped to boost the confidence of the Swedes, and they are now looking forward to the Winter Olympics, which begin next week.

The Swedes are a hardworking people, and they are known for their determination and their ability to work long hours. They are also known for their love of sports, and they have produced many world-class athletes over the years. The Swedes are now looking forward to the Winter Olympics, and they are confident that they will be able to perform well in the games.

The Swedes are also known for their sense of humor, and they are looking forward to the Winter Olympics with a bit of a sense of fun. They are looking forward to the opening ceremony, which will take place on February 16, and they are hoping for a lot of excitement and entertainment.

The Swedes are a proud people, and they are looking forward to the Winter Olympics with a sense of pride. They are a nation of hardworking people, and they are determined to show the world that they are a nation to be reckoned with in the Olympic Games.
Parents, children in conflict over religious cults

WASHINGTON (AP) - The battle of the cults has come to Washing- ton. On one side are some parents who claim their children have been brainwashed by some of the newly organized religious cults. The parents are young people who claim their First Amendment right to worship whom they choose.

In separate hotels, the two groups held news conferences to hurl charges and defend themselves, each claiming to be mis- understood.

The parents have formed a group called the Individual Freedom Foundation, which is based in Airdmore, Pa., and are appealing to President Ford, Congress and the Justice Department to have the cults investigated. Twenty-five members of the group marched in front of the White House Wednes- day and talked with individual congressmen.

HUNDREDS of these controversial, new religious cults have sprung up across the country, but the best known and largest are the Unifica- tion Church of the Rev. Sun Myung

Mom, the Children of God Sect, the Divine Light Mission of the Guru Maharaj Ji, which says it’s not a religion but a way of life, and the Hare Krishna movement.

Some critics have called the groups “withdrawal groups,” be- cause of their demand for total devotion of converts, many of them young people 15 to 35 years old.

Critics have also accused them of brainwashing converts, and par- ents have said their children kid- napped from the groups and had their “freedom” taken away.

Some of the groups, such as the Hare Krishnas and the Unification Church, are big business and young, idealistic converts often relinquish their possessions and live in near poverty to flower flowers, candles and candy for the church.

“Want to bring to the attention of the nation the horrendous problem of mind control and brainwashing by these cults,” said Ben Roehman, president of the newly formed organization and father of a child who joined one of the cults. “We want to educate the public about the, mind control.”

Roehman, who said he didn’t want to discuss his child’s situa- tion, claims the cults often encour- age the young people to quit school, get menial jobs to raise money for the group, work long hours and dissociate from the family.

Once under the influence of the cults, he said, many young people lose all interest and emotional attachment to anyone but those in the cults.

Roehman said he has received letters of support from about 200 families across the country.

One goal of the group, he said, is to have laws passed to protect the public from the cults’ influence. But when pressed on what kinds of laws they had in mind, the parents were vague.

Ted Patrick, a controversial “deprogrammer” whom parents have hired to “kidnap” their children from the cults, said

there should be laws against “psycholog- ical kidnapping.”

Patrick is one of the main targets of the young people who claim they have a right to worship as they please, in this case members of the Unification Church, one of the fastest growing of the cults.

Neil Salonen, 30-year-old presi- dent of the Unification Church, said his members have been “victims of unjustified attacks on their religi- ous freedom.”

Patrick’s charges of brainwash- ing are met by control “totally ridiculous,” Salonen said. “We’re interested in promoting harmony and cooperation of different groups in our society. Communism is the antithesis of our beliefs.”

One of the young men present, 19-year-old Mark Goodman, said he was kidnapped in New York by Patrick last month and has a lawsuit pending.

“I feel terrible that I have to press charges against my par- ents,” Goodman said, “but this must be stopped.”

Kelley warns against restrictive FBI guidelines

WASHINGTON (AP) - FBI Director Clarence Kelley said Wednesday that too much restrictive legislation over the agency's domestic intelligence activities may hamper its ability to investigate terrorist groups in the future.

Kelley, in testimony to a House Judiciary subcommittee, said he warned the Justice Department, but was told that restrictions should not go too far.

He went on to emphasize that these domestic intelligence investigations are not undertaken for the purpose of collecting information on those who hold unpopular or controversial political views, Kelley said.

"The focus is on conduct, not ideas - conduct that involves or is likely to involve a violation of federal law," he noted.

The proposed FBI guidelines would broaden the FBI's definition of 'intelligence' or 'investigation' by the FBI of criminal acts; the dissemination of information for the purpose of holding of an individual or group up to scorn, ridicule, or disgrace; the dissemination of information anonymously or under false identity; and the incitement of violence.

Kelley stressed that domestic security cases are undertaken primarily to thwart illegal activities, not to prosecute.

"As a consequence, Intelligence work involves the gathering of information, not necessary evidence. The purpose is to focus the government has enough information at its disposal to either frustrate or minimize the consequences of the intended harm," he said.

"If we are to accomplish these objectives, the FBI must initiate the investigation in advance of the crime," Kelley declared.

He said terrorist acts are growing in the United States. In fact, Kelley said, four recently published issues of the Weather Underground's newsletter contained this threat for the bicentennial: "The rulers have set the time for the party; let us bring the fireworks.

In that light, Kelley asked, "what would you have us do about the presence of revolutionary organizations in our society?" "Should they be totally ignored on the premise that somehow government will receive an adequate warning that violence is imminent and will be able to take the necessary measures to prevent the crime that may minimize its consequences?" he said.

Subcommittee member Rep. Herman Badillo, D-N.Y., denounced at the hearing the he is filing a House resolution asking for rejection of the proposed FBI guidelines on grounds they are not tough enough.

Tax seminar

There will be a seminar tonight for those interested in working on the Tax Assistance Program. The seminar will be held in room 101 of the Law Building at 7:30. Anyone wishing to work on the program should attend at least one session.

Guatemala tourist trade to resume despite quake

GUATEMALA CITY, Guatemala (AP) - The government said Wednesday it plans to have Guatemala's tourist trade back in full swing in two months, despite the ravages of the earthquake and aftershocks that killed an estimated 17,000 and left one-sixth of the population homeless.

Guatemala Tourism Institute director Jose Senn Bonilla told a news conference that most of the centuries-old Maya ruins are largely undamaged.

"We are doing everything possible to return to normality," he said.

Two months of repairs

He said it would take two months to repair some of the damage, principally to the main hotels in Guatemalan City.

Most of the luxury hotels in the Guatemalan capital of 1.2 million people underwent extensive superficial damage, but their structures were not affected and they can easily be repaired, Bonilla said.

He said a large part of the damage was caused by water lines and pipes shattered by the heavy vibrations unleashed by the earthquake and after-tremors. The smaller hotels which cater to the Central American tourist trade were much less damage "and practically have not interrupted their services."

Crisp swing-like weather and the archaeological remains, some of the foremost in Latin America and renowned worldwide, are the two main tourist attractions of this mountainous Central American nation of six million people.

An estimated 412,000 tourists visit Guatemala every year, 114,000 of them Americans. The State Department estimated there were 5,000 U.S. citizens in the country, counting visitors and residents, when the earthquake hit before dawn Feb. 4.

Tourist trade revenue

The tourist trade earned Guatemala $85 million last year, making it that country's major thoroughfares.

"It's likely to involve a violation of the premise that somehow government will receive an adequate warning that violence is imminent and will be able to take the necessary measures to prevent the crime that may minimize its consequences," he said.

The purpose is to insure the investigation in advance of the crime," Kelley declared.

He said terrorist acts are growing in the United States. In fact, Kelley said, four recently published issues of the Weather Underground's newsletter contained this threat for the bicentennial: "The rulers have set the time for the party; let us bring the fireworks.

In that light, Kelley asked, "what would you have us do about the presence of revolutionary organizations in our society?" "Should they be totally ignored on the premise that somehow government will receive an adequate warning that violence is imminent and will be able to take the necessary measures to prevent the crime that may minimize its consequences?" he said.

Unorthodox governor wins wide voter support

SACRAMENTO, Calif. - Gov. Edmund G. Brown Jr. is winning broad public approval in California as an unorthodox politician of pessimism and a rejection of the traditional governors.

Brown's message is that things are getting worse every day, and that he can't do much about it. He says he's trying to make people face reality, reject a preoccupation with material possessions and work harder to get to the root of the problem.

His style is described even by some friends and supporters as abrasive and bruising, but they say he's arrogant, calculating and cold.

The 37-year-old Demo placed as Jerry, has proven international protocol, angered state and national leaders of his party and made himself a symbol of antipolitica in 1975 style.

He respected the mansion, timelanes and executive jet that go with the job. His personal schedule is chaotic. His working hours are long and unpredictable. He makes few promises for speeches or appointments with more than a day or two's notice.

But Brown likes to drop in unannounced at public events or in state offices. And telephone calls from the governor at midnight - even 2 a.m. - are reported by people involved in issues that catch Brown's personal attention.

Brown has stunned the liberals

Butler Ondplas.) one set in broad public approval in California is winning wide voter support among some friends and supporters as appointees with more than a rosy tomorrow. Brown's message is that things will be a Valentine's Day gift. Brown says he's not reject a preoccupation with material possessions and work harder to get to the root of the problem.

His style is described even by some friends and supporters as abrasive and bruising, but they say he's arrogant, calculating and cold.
