Women undergrads return to Badin

by Dave O'Keefe
Staff Reporter

After a year's absence, undergrad women once again are returning to Badin after living in Lewis for a year. They cited several reasons and as a general rule were in almost unanimous agreement that Badin has more advantages.

Jean Sculati, president of Badin Hall, pointed to the location of Badin, pointed to the location of Badin as its primary advantage. "The convenience of it is a big thing. The distance of Lewis prevented you from doing a lot of things," she said.

Sculati also cited that there are singles and a variety of rooms in Badin, a feature which Lewis does not have. There are all double rooms, Jacks, singles and a variety of sized rooms, but also a lot of singles.

Roemer states attitude about parietal policy

by Barb Breitenstein
Senior Staff Reporter

A parietal policy which could include forcing second offenders to move off-campus was expressed this year by Dean of Students James Roemer.

With this policy all parietal violators, their parents, or, who will review each case. First offenders will "probably get some kind of work assignment," while secondtime violators will be asked to move off-campus, according to Roemer.

Roemer's attitude as dean of students is that "there is a rule on the books it will be enforced," he said. "It is up to their discretion as to what exactly is a violation. I'm speaking of violation of a matter of minutes."

Roemer continued, "I don't want to come to the conclusion that after a year, I can be more lenient to certain things. The only enforcement of parietal should be by bad conduct.

He stated his policy to the hall rectors and assistant rectors last week in an orientation meeting. He read the rules of the parietal policy. He also told the rectors to be conscientious in enforcement of the parietal rule.

"I want to be fair and consistent," Roemer said. "If a student should be abided by in some way, the rule means nothing. If the dean of students handles any violation in mutual cooperation with rectors, "he concluded.

Church looks for anti-abortion plank

by Gregg Banks
Executive Editor

Democratic presidential nominee Jimmy Carter continued to withhold support for a constitutional amendment to ban abortion today.

According to an article written by Charles Mulhern that appeared in the Sept. 1 edition of the New York Times, the clergymen remained "disappointed by the lack of action in recent meetings following the policy, which was set up by Carter and held in Washington.

However, Archbishop Joseph Bernardin, chairman of the National Conference of Catholic Bishops said that Carter had indicated that he would not oppose an effort to obtain a constitutional amendment. "We are opposed," he said, during a Supreme Court decision in 1973 that legal abortion is the first trimester of pregnancy.

Carter, contacted later in the day in New York City, confirmed that he had taken this position. He also said that he objected to his own party's platform plank on abortion because it "insinuates that Catholics. Protests, Jewish or private decisions have a right to seek such an amendment.

"I would never try to block such an amendment," he added. "I do believe that the Catholic church is the church of the conscience of the church. But I would never try to block such an amendment." Although the clergymen publicly expressed disappointment at Carter's views, "in private" they seemed encouraged by his willingness to study the question further, though they had no assurance that his position would change.

According to a Sept. 1 Associated Press report, Archbishop Bernardin was also encouraged that both presidential candidates have a "definite identity in this problem."

Bernardin, who is archbishop of Cincinnati, also said: "We do not oppose or support any individual candidate. We address ourselves to the issues and the practice of moral and religious issues.

"A by-product of these meetings is that there is no consistency of the issue and it will be discussed not only by the candidates but by the people themselves," he pointed out.

Bernardin also made reference to the abortion planks of the respective parties. He said there was "considerable difference" between the Republican and Democratic parties on the issue. The Republican viewpoint, unlike their Democratic counterparts, opposes an anti-abortion amendment.

He said that the bishops would like to meet with President Ford and his cabinet. "We have expressed support for an amendment to give states the "local options" on the matter," he said.

Bernardin also expressed his opposition to New York and Washington. Aside from the meeting with the bishops, Carter also met with labor leaders and Sen. Edward Kennedy (D. Mass.) while he was in Wash-

Increased enrollment causes crowding or at least two weeks

by Tom Byrne
Senior Staff Reporter

An unexpected increase in enrollment at Notre Dame and St. Mary's creates a temporary overcrowding problem in the residence halls on each campus.

Officials at both schools said yesterday that they expected congestion will be alleviated during the next two weeks.

At Notre Dame, Director of Admissions John T. Goldrick attributed the situation to a decline in parietal admissions which was up to 59 percent by males, explained Goldrick. "Whether or not Notre Dame is more attractive than ever last year, I don't know. A questionnaire will be sent to freshmen main to find out if this is the case," he added.

Fr. John Maloney, director of student housing, indicated that past solutions to overcrowding will not be satisfactory. "We used to use study lounges and places like that but this year we put students in RA rooms," remarked Maloney.

Approximately 55 freshmen were originally assigned to alternate accommodations. Maloney predicted that the problem will soon be rectified.

In two weeks it will all be settled," he stated, "we are seeing more beds open both day by day from non-shows and kids deciding to move off campus," said Maloney.

According to Maloney, halls such as Fishor, Soren and Howand which have only one basic type of room, were not assigned extra students. Keenan, Stanford, Grace, and Flaneo, however, accepted a large number of freshmen.

Fr. John Conyers, rector of Keenan, asserted that there was "no physical way" to overcrowd Keenan or Stanford halls since all the rooms are small doubles. Conyers added that while earlier in the year about eight students in Keenan were living with RA's, only one freshman is still being done. He also expressed confidence for placing extra students in RA rooms instead of the use of the beds in the infarmary or study lounges.

"We did have 50 students more than we expected," observed Maloney. "We are seeing more beds open both day by day from non-shows and kids deciding to move off campus," said Maloney.

Both houses of the Irish Parliament gave their approval yesterday to setting up a national state of emergency as part of a nationwide plan to smash the outlawed Irish Republican Army.

The Ford administration has disclosed the complete disclosure of the contents of the accused of the recent shooting of Senator McGovern. The Radiation Laboratory research staff at Notre Dame has nearly doubled as a result of the recent announcement of the new chair with the Radiation Research Laboratories at Carnegie-Mellon University at Pittsburgh.

Consolidation also means new equipment, including a Van de Graaff generator being transferred here from Carnegie-Mellon's underground concrete vault in Pittsburgh and being added to the south side of the Radiation Research Laboratory's building to house the Laboratory's second generator.

According to Dr. Robert H. Schuler, who assumed the directorship July 1, the new personnel will expand research activities, broadening the Laboratory's scope of interest. "We will be engaged in a wide range of activities including research, teaching, and service to the community."

The former director of the Carnegie-Mellon Radiation Research Laboratories brought five scientists with him to Notre Dame and aides 17 new appointments, for a total research staff of 48. The facility is located adjacent to the chemistry, physics and biology departments and fourteen members of the department. The increased number of researchers is expected to further the Laboratory's mission of research and development in the fields of energy research, health, and the environment.

In addition, the Laboratory has announced a $250 increase in undergraduate tuition, bringing it to $32,350, as well as a $50 increase in room and board charges, which will now average $2,750.

The increases were voted by the University's Board of Trustees and announced in a letter to parents of undergraduates written by Rev. Theodore M. Hesburgh, C.S.C., president of the University. Father Hesburgh said he regretted the additional burden on parents but noted that Notre Dame's tuition and other charges remain below those of many other independent universities in the nation.

Graduate tuition was also increased $250 to $3850 annually.

House overturns pay increase

WASHINGTON (AP)—The House voted yesterday to deny a cost-of-living raise this year to its own members and also to senators, federal judges, Cabinet members and other top executive officials.

It adopted, 325 to 75, an amendment to the legislative branch appropriation bill barring funds for the pay raise. 

A four-vote majority is needed to pass the appropriation bill by voice vote. The measure now goes to the Senate, which is expected to act on the appropriation after the Labor Day congressional recess. If the Senate disagrees with the House action, a conference will be needed to settle the disputed provision.

The pay raise, the exact amount of which still is to be determined, would be automatic Oct. 1 in the absence of congressional action. 

A House vote to remove its salaries from this election year's absence of congressional action. The issue now goes to the Senate, which is expected to act on the appropriation after the Labor Day congressional recess. If the Senate disagrees with the House action, a conference will be needed to settle the disputed provision.

The Carnival campaign

(continued from page 1)

The labor leaders promised Ca- ter that they would stage "the strongest most effective get-out-the-vote campaign ever conducted by the labor movement" the autumn.

This pledge came when Carter addressed 169 presidents of the affiliated unions of the American Federation of Labor and Congress of Industrial Organizations. George Meany, president of the 14-million member labor federation, said the unions would do everything possible to help elect Carter.

Fears that the planet may be coming apart in a thundering storm of tremors—with the U.S. West Coast being a particularly vulnerable target—are groundless, according to one quake expert here.

"What appears to be a quake epidemic, says William Cloud, earthquake researcher at the University of California's Berkeley Seismographic Station, is actually nothing more than increased news attention given normal quakes that happened to cause unusually heavy loss of life."

The recent Chinese and Philippine earthquakes, said Cloud, occurred in two densely populated areas known to shake frequently and violently. Most Asian quakes, he said, occur in sparsely populated areas and are little noticed.

The August quakes struck both regions with massive force and in places where urban centers made vulnerable targets for crushing destruction.

More than 25,000 persons have died in earthquakes this year, according to U.S. Geological Survey records. Many of the fatalities suffered in huge Soviet and Chinese earth tremors where figures were not available.

Measurable for damage, however, 1976 quakes are the most costly since 1970. That year 67,000 lost their homes when a normal range of quakes hit viciously at heavily settled regions in Peru and Turkey.

**PIE TROIEY**

A leading but recent theory of earthquakes—called the plate tectonic theory—holds that the earth's land masses sit atop a set of huge plates that move around ever so slowly. That, according to the theory, can give rise to tremendous pressure points that occasionally break free with potentially city-destroying violence.

The north China coast and the Philippine Islands, Cloud says, are both situated on Asian plate margins—where history's most deva-

**Jazz Band tryouts to be held Sunday**

Auditions for the Notre Dame Jazz Bands will be held on Sunday Sept. 5 at 1:00 p.m.

The Notre Dame Jazz Big Bands and combos perform regularly during the year in the Naz and at the Collegiate Jazz Festival where the combo received an "outstanding performance" award last year. This year members of the big band can receive one cruise award.

There are openings on all instruments with bass players and saxophonists especially needed. Again this year the combo also will have an important marching role in the football season.

**LSAT registration nears deadline**

The registration deadline for the last Law School Admission Test (LSAT) this year has been set for 9:30 p.m. on Sept. 17. All law school is welcome to sit in and listeners are invited.

"We're experiencing quite a problem," said Herb Martin, executive director of the Marion County Humane Society. "We're going out to collect three or four dead deer every day—maybe more.

"People with water and gardens involuntarily are helping some animals through the summer that might not otherwise make it," said Gil Thomson of the state Department of Fish and Game.

"Every animal is affected to some extent, including fish and even waterfowl."

Descending from the wooded hills around San Francisco Bay are racoons, skunks, owls, rattlesnakes, rodents, quail and even bobcats, and other wildlife, said Martha Williams at the Marin Museum of Science.

"A lot of animals are getting run over because they're closer to roads," Mrs. Williams said.

"And there is an upsurge in poaching—people just shoot the deer standing by the roadways."

Even the lowly turtle is suffering, says Bay Area Turf and Terrestrial Society founder Richard Hobbs. He says that at one time there were 500 turtles in 896-acre Lake Nicano. Now, with the lake shrunk to less than 75 acres, "I doubt that they'd be surprised if there were 200 left."
Kiss and Bob Seeger put on an fine show as one who could ever hope to see in South Bend, Indiana. Seeger came out swinging and confidently with a mixture of old and new material designed to exhilarate the crowd. His voice was in fine shape and he was able to move the crowd at will. Kiss, on the other hand, was put on the spot by Seeger's voice, which proceeded to put on a frenetic and highly-charged show.

Seeger put on an extremely esoteric show. For a man whose last album went Top Ten, he played a very annual set. Relying mostly on old blues tunes such as "Mary Lou" and "Nhurtush City Limits" and none of the Billyid chestnut "Who Do You Love?" Seeger won over the crowd with splendid vocal delivery and a rather sophisticated and talented band. The unusual vouching of obvious Seeger favorables were instead performed with panache and abandon. The highlight of the set was a searing treat "Katmandu" that combined funky instrumental breaks with a wild shouted vocal. This brought the crowd to a frenzy. Seeger wasted little time in hastening to the stage to perform a show. For a man whose last album went raucous versions of obvious "Mary Lou" and the songs dealt with some sort of violent act, although it is not necessarily a physical one.

Steve Dal, Royal Seann—Walter Bekker, Donald Eagan & Co. have put out another class album. The only problem with this group is that they don't tour. This is something of a concept album in that all the songs deal with some sort of violent act, although it is not necessarily a physical one.

Crosby and Nash, Whilas-Down the Wires—This album is somewhat of a disappointment after Wind on the Water. Although Crosby and Nash have always tended to favor a laid back approach, the lack of spark in this album can put you to sleep. They should've waited for better material.

Fool's Gold—Dan Fogelberg's back-up band sounds exactly like some of Fogelberg's best friends—the Eagles. Their best material was also written by Fogelberg and the album was produced by Glennville Jr who happens to be a guitarist for the Eagles. "Nuff said?

John Cale, Helen of Troy—Cale is known in this country mostly for his work with the Velvet Underground, but he has released many fine solo albums of which this is no exception. The songs deal with some sort of violent act, although it is not necessarily a physical one.

Alfie Cooper, Alice Goes to Jail—It's difficult to choose among the many well-crafted tunes, but I'm inclined to say that they're personal friends of mine fromdominated by surging energy of the crowd to their feet.

Burl Jones, Firefall—What happens when you mix a Burrito with a Byrd with a Spirit-Gun and a Zepher, with a few twangs, and then let it run into the sun? Boulder Cole did. It came out with "Hot Little Band" who put out the best country-rock album since the first Eagles album or the Manassas album.

The summer in music --- 'quick cuts'

dominick salemi

Firefall, Firefall—What happens when you mix a Burrito with a Byrd with a Spirit-Gun and a Zepher, with a few twangs, and then let it run into the sun? Boulder Cole did. It came out with "Hot Little Band" who put out the best country-rock album since the first Eagles album or the Manassas album.

Marshall Tucker Band, Long Hot Ride—By default, the Tucker's have become the standard-bearers of the Southern Rock banner. Their new album is more Countyishstil it features precise guitar work and a good sense of humor and the different instruments. A new star is born in "KamaRi" -- the song that contributed the best bass solo that has been heard recently and the best songs.

Arrogance, Rumors—This generally unknown band put out a refreshing album on the Vanguard label. It's one that had to classify their music, then it would be a combination of a contrabass, a good guitarist, a good vocalist, a large and a large amount of originality. It's a good, in fact, that the songs deal with those little bits that really bring them to life. Their voice is still his strongest asset.

Ritchie Foray, Floor—This is a beautiful series of short musical pieces to evoke a patterned world. World is a beautiful series of patterned worlds. World is a beautiful series of patterned worlds. World is a beautiful series of patterned worlds.

Dennis Wilson, Spirit-Gun—An aural panorama. Dennis Wilson is coming out with his first solo album or the Manassas album. It's not only a line from the title track. It's not only a line from the title track. It's not only a line from the title track. It's not only a line from the title track.

The Richie Furay Band, I've Got A Woman—The Ramones, with a few exceptions, have a lot in common. The Ramones, with a few exceptions, have a lot in common. The Ramones, with a few exceptions, have a lot in common. The Ramones, with a few exceptions, have a lot in common.
Sex scandal forces resignation

by Jim Adams

WASHINGTON (AP) - Rep. Wayne L. Hays, the once powerful House chairman who was toppled by Capitol Hill sex scandal, submitted his resignation from Congress yesterday, effective immediately.

But in a letter distributed by his staff, Hays said, "I hereby resign my office as a representative in the Congress of the United States from the 18th District of Ohio, effective immediately."

Members of the Ethics Committee, meeting after Hays' announcement, said they were not sure which would be the resignation date.

Before Hays would resign, his aides pressed for an assurance first that the resignation would halt the Ethics Committee's payroll-sex probe against him, sources said.

They said Hays' aides were ready to submit the resignation letter Speaker Albert yesterday morning but did not when they realized they had no promise the committee would vote to halt its investigation.

The Ethics Committee had voted Monday to begin hearings for its probe Sept. 16 despite a plea that Hays was too mentally depressed to defend himself.

Albert said the Ethics Committee told Hays the probe would automatically be dropped if Hays resigned from Congress because he would no longer be congressman.

The Ethics Committee Tuesday took no action on a proposed resolution declaring that whereas Hays was resigning as of Sept. 8 the committee would suspend its investigation and then terminate it on his resignation.

The inquiry was on the charge by Hays himself asked for the Ethics Committee's investigation and then to terminate it on his office as a representative in the 18th District of Ohio.

The charges forced Hays to resign as committee chairman and then to quit as committee payroll only to be his mistress.

The charges forced "Hays to resign as head of the Democratic Campaign Committee, quit as committee chairman and then to announce he would not seek re-election to Congress."

Hays himself asked for the Ethics Committee inquiry saying it would exonerate him by establishing that Miss Ray did committee work for her $14,000-a-year pay.

But Hays said when he dropped his re-election campaign three weeks ago one reason was "I don't want to give that woman a chance to make another appearance."

There was some confusion about when Hays actually leaves office.

By Capitol Hill sex scandal, Hays, the once powerful L.

Democrat, Jim Adams, 1976 Texas Instrument's Incorporated

The SR-56 is a tremendously powerful slide rule calculator. Yet you can program it whenever you're ready. There are 74 preprogrammed functions and operations. You can do arithmetic within all 10 memories. It has AOS - a unique algebraic operating system that lets you handle problems with up to 9 levels of parentheses. There's also polar to rectangular conversion - built in. Mean, Standard deviation, Degrees, radians, grads. And, it works with TI's new printer - the PC-100.

Chances are, you'll be programmed. That's what professionals in your field are doing - right now. And with an SR-56 you're ready. It has 100-merged prefix program steps, 6 logical decision functions, 4 levels of subroutines. You can decrement and skip on zero to iterate a loop as many times as you specify. There are 4 levels of subroutine to let you use your program steps to maximum advantage. And, you can even compare a test register with the display to make a conditional branch. So you can check an intermediate result for convergence, or a maximum.

The edge you need. Now. And in your career.

Texas Instruments will rebate $10.00 of your original SR-56 purchase price when you return this coupon and your SR-56 customer information card postmarked no later than October 31, 1976. To apply:

1. Fill out this coupon
2. Fill out special serialized customer information card inside SR-56 box
3. Return completed coupon and information card to Special Campus Offer P.O. Box 1210 Richardson, Texas 75080

A national consortium of 19 universities and eight research laboratories, formed to aid minority students to seek graduate degrees in engineering, has been announced by Dr. Joseph C. Hogan, dean of students to seek graduate degrees at the Indiana nonprofit corporation, the National Consortium for Graduate Opportunities in Engineering, Inc., will be located at Notre Dame.

The consortium will offer financial support and practical laboratory experience to minority students, specifically, Black Americans, American Indians, and while they pursue a master's degree in engineering at the University of Notre Dame, Indiana nonprofit corporation, the National Consortium for Graduate Study in Engineering, Inc., will be located at Notre Dame.

Hogan, who is chairman of the board of directors and president of the corporation, said that while recent efforts have increased the number of minority students pursuing undergraduate degrees in engineering, most minorities are underrepresented in research laboratories. Most professionals in a research university are graduate students, Hogan said, and anyone hired with only a graduate degree would be at a disadvantage in that atmosphere. The university has the need for a co-operative effort to attract minority students and pursue graduate degrees, he said.

The consortium's goal is to increase by 100 the number of minority students receiving a master's degree in engineering. In 1972, 104 of the 17,200 engineering master's degrees awarded were to American Indian students, according to a 1974 report of the Planning Commission for Expansion of Minority Opportunities in Engineering. At the same time, only 93 master's and 11 doctoral degrees went to Spanish-surnamed Americans and only 15 master's and one doctoral degree was awarded to American Indian students.

The consortium's vice-president is Theodore J. Habarth, a manager at the Applied Physics Laboratory, Johns Hopkins University, and Philip J. Fore, former general counsel for Notre Dame, is secretary-treasurer. Mr. Fore, professor of aerospace and mechanical engineering at Notre Dame, has been appointed temporary executive director.

Cepable minority engineering students will be recruited during their junior year from every accredited engineering school in the country. Applicants may be offered summer employment by one of the participating research centers. Continued in the program then depends on satisfactory performance and acceptence in the graduate program of one of the participating universities. Each student will receive a $3,000 fellowship for the academic year as well as tuition, which will be shared by the corporation and the university. Most students will spend three summers working at a research laboratory. Participation in the project for similar work that the student receives the master's degree will also be considered. In addition, the laboratory nor student has a further commitment. Those students who may decide to pursue the doctorate will require additional support. The program is funded by a $15,000 annual membership fee paid by each laboratory or industrial member of the consortium, and by partial tuition remission by the universities. Hogan said the consortium will seek foundation support for administrative and will try to expand the membership base to include research laboratories as well as federally funded laboratories. The participating universities include the California, Georgia, Illinois and Massachusetts Institutes of Technology; Tuskegee Institute; Arizona State, Boston, Cornell, Howard, Johns Hopkins, North Carolina A&T, Purdue, Rice and Stanford Universities, and the Universities of Florida, Illinois, Michigan, Notre Dame and Texas.

Participating laboratories include Argonne National Laboratory, Bell Telephone Laboratories, Jet Propulsion Laboratory, Johns Hopkins Applied Physics Laboratory, Oak Ridge National Laboratory, Sandia Laboratories, Savannah River Laboratory and Sanford Linear Accelerator Center.

German chemist visits ND lab

Dr. Armin Henglein, director of the Hahn-Meitner Institute for Nuclear Research and professor at the Technical University of Berlin, is briefly visiting the Notre Dame Radiation Laboratory. He opened his stay at Notre Dame with a seminar, "Electron Attachment and Detachment in Hydrocarbon Solutions."

During his stay at Notre Dame Dr. Henglein will meet with the resident chemists and observing current radiation research projects. His work in electro- and photochemistry will also be discussed.

Dr. Henglein, born in Cologne in 1923, received his Ph.D. in 1950 from the University of Mainz, Germany, while working at the W. Plank Institute for Chemistry and was affiliated with the University from 1955 to 1962. Since 1952, and Mellon Institute (Carnegie-Mellon University), Pittsburgh from 1958 to 1968.

CAPITALISM AND SEX

Two dynamic themes of American civilization come to life on the screen of the Western Drive-In Theatre this weekend in these R-rated films:

Nurses for Sale

Females for Hire

The Western, exclusive exhibitor of meretricious movies in the area, recommends these three films as prime entertainment. They are: economics, (macro), sociology, and American culture, according to American Georgia Spelvin freaks.

The Western is located six miles west of Main Street on scenic Western Avenue (St. Rd. 2). (Unfortunately, one travels the Western before the scenic part.) The driver will be admitted free with any ad. Passengers pay $2 each.

At the end of the Democratic and Republican National Conventions, President Gerald R. Ford has cut deep into Jimmy Carter's political polls according to a survey released yesterday by Time magazine.

Carter now holds 46 percent of the public's vote while Ford commands 40 percent. Forty percent of the voters remain undecided.

These findings are a result of a nationwide telephone survey taken of 1,544 registered voters by Yankelovich, Skelly and White, Inc., an opinion research firm. The survey was conducted between August 20 and August 24.

Jimmy Carter-a factor

The research of the Yankelovich firm clearly displayed that 65 percent of the Ford voters indicated an uncertainty about Carter as the reason for their choice of Ford.

But others, listed by the Yankelovich firm, have an advantage over Carter, his experience in the Oval Office and the advantage of being as a president. Ford, a Republican, had little impact on the voters' decision to choose him only since 15 percent know him as a factor.

According to Time Magazine's State of the Nation Indicator, a measure of the people's confidence in the American way of life. Those who are optimistic about the nation's future offer Ford 80 percent and Carter 9 percent are bound to Carter. Those voters who lack confidence in America's future will, according to the survey, vote 53 percent for Carter and 35 percent for Ford.

Carter and change favor Carter

Ford's pardon of former President Richard M. Nixon and the sentiment among voters for change in the White House are the major reasons why Carter is ahead in the survey.

Another 44 percent of the respondents were against Ford's pardon of Nixon. According to the Yankelovich study, this factor continues to hang like a cloud over him. The need for leadership was indicated by 81 percent of the respondents.

First lady Betty Ford predicted a very close race between her husband and Democratic hopeful, Carter. Yet she pointed out in an interview with the Associated Press in Vail, Colorado last Monday that the president has an advantage.

As seen in the Yankelovich study, Mrs. Ford said her husband's strength lies in his experience in Congress and in the presidency. She labeled the Carter-Mondale ticket as a "strange combination" since Carter was a Southern Baptist conservative and Mondale was "to the extreme the other way."

Mrs. Ford said that the President's pardon of Nixon has not been raised as a campaign issue. But though Carter and Mondale said they would not mention the pardon issue.

Toman added to Irish coaching staff

by Paul Stevenson

The Irish coaching staff has a new face this season in Ron Toman, coordinator of quarterbacks and receivers. Toman replaces Ed Chlebek, who left to become head coach at Rice University before the spring break, a ticket for that game will be issued after all other students have played on Saturday, Oct. 16, the first tickets list NFL games for the 14-week pro football season. That is scheduled for the same time the Tuesday following the sixth week of the regular season.

Montana injured in scrimmage

Quarterback Joe Montana left yesterday's scrimmage with a separated shoulder. The extent of his injury is not fully determined. The shoulder will be set and the team might be weakened if the injury falls to respond to this treatment, surgery may be deemed necessary, in which case Montana would miss the entire season.

Cagers take to the diamond

Head Basketball Coach Digger Phelps and his cagers farseek the hardwood for the diamond this Sunday for their annual softball game. The Diamond, Lake Kline Field at 2 p.m. and will feature the entire basketball team and coaching staff.

Pro football lottery begins

Dover, Del. (AP) - Delaware kicked off its controversial pro football lottery games Wednesday, with high hopes of turning a profit for the state. Lottery officials said it was too early to predict first-week sales. Delaware is offering two football lottery games Wednesday, the first tickets list NFL games for the 14-week pro football season. That is scheduled for the same time the Tuesday following the sixth week of the regular season.

Rozelle limits NFL squads

NEW YORK (AP) - National Football League teams, with the exception of The NFL, are permitted to practice 48 hours before their games, but not 24 hours before their games. The NFL is expected to have 48 hours before their games.

After two years on the high school level, Toman moved to West Virginia State and played on the football team, where he was named to the all-state team.

The Observer sports staff tonight at 7:30

Attention!

There will be a meeting for anyone, male or female, who is interested in joining the Observer sports staff tonight at 7:30 in The Observer office.

Correction noted

In yesterday's football article listing players for the football lottery games Wednesday, the first tickets list NFL games for the 14-week pro football season. That is scheduled for the same time the Tuesday following the sixth week of the regular season.

Dahling named

Debbie Dahling has been named to the new position of St. Mary's Sports Information Director. This position was announced last night by Observer Sports Editor Fred Herbst. Dahling, a senior at St. Mary's, is the most recent addition to the team's depth chart and therefore appears to be a probable starter at offensive tackle.

Elton Moore is currently rated slightly ahead of Horansky on the depth chart, but there is no guarantee that he will be named to the starting lineup.

Delaware faces a federal court fight next month whether it is infringing on trademark rights or violating a federal law that prohibits sports teams from using the name "Delaware." The university has been accused of infringing on the trademark rights of the Delaware state lottery.
