Citizens rally against Logan budget cut

by Peggy McGuire

Staff Reporter

Over 450 interested citizens and members of the Council for the Retarded of St. Joseph County gathered Tuesday night at the Logansport City Hall to examine the impact of and rally support against the state budget committee's recent $10 million cut in funds appropriated for state services to the developmentally disabled.

Richard Chatry, president of the committee, addressed the crowd, chaired the event which included a response by Raymond Rizzo, executive director to Indiana Governor Bob Orr, Student Government Scon- neker, executive director of the Council for the Retarded, and Peggy McGuire, a council member, also spoke. The audience frequently interrupted speakers with questions and statements.

Rizzo assured the group that the figures released by the budget committee are tentative. Preci- sely, the budget agency is study- ing each of the state's 62 centers for the developmentally disabled to determine the necessity of adjust- ing appropriated funds at the committee's Oct. 15 meeting.

"I don't see that there are any villains among us," Rizzo said. "I see this as a group...attempting to resolve a problem and be a service to the people." Rizzo's executive assis- tant refused to promise the reinstatement of the funds, he did stress that the figures released "weren't the last word." He remarked that "sessions like this one tonight will have special effects on people's lives in the future.

Throughout the program, Dr. Bernadette Merluzzi, a council member, struck a hush, hush and to see their reactions. She said that the response to his action was ques- tionable at best.

"All of us are not paying for their tickets," Rizzo commented, "and I want to know why our middle-class children have to be hurt like this.

"My three year old daughter is pretty and sweet, but there's a lot of beds that her room would fill up. The schools are required to take her as she needs this special help now, and I don't have the money to pay for it. If she gets cut, she's just going to fall further and further behind.

"We've never had a bigger surplus in our state," stated Bour- neker, "it's insane that we should be cutting back on.

Gryp reconsiders 'preferential' tix

by Jack Pizzala and Kevin Walsh

Senior Staff Reporters

Student Union (SU) Director Tom Gryp's position as the ACCUM board members' representative came under question yesterday that he would take action to redistribute the 16 Homecoming packages distributed to the Student Union. According to SU Director, Student Body Pres- ident, Dave Bender, and two members of the Homecoming com- mittee, eight tickets were sold to Logan students as part of a contractual agreement with the Student Union. However, the winner of the Helen of Troy contest was held during Homecoming week. Soenneker presented an analysis of the state budget committee's action and stated its impact at Logan Center. The council's over $700,000 from Logan Center's requested funding will eliminate all summer programming, decrease all or most recreation service and delay all plans for the development of existing programs.

But the problem involves more than the cutback," Soenneker stated. "The present allocation system is very complex and needs much improvement.

Soenneker explained that much of the allocated money is in Title XX funds, a program aided by the federal and state governments to help lower income citizens. Those eligible for Title XX funds are divided into two classes: welfare recipients and those meeting certain income guidelines. However, each center must maintain a bal- ance between these two groups. Because there are fewer welfare recipients at Logan Center, 40 patients must seek aid elsewhere.

"Most of our clients are not going to be eligible for Title XX funds," commented Merluzzi, "and I want to know why our middle-class children have to be hurt like this.

Urban Plunge offers unique opportunity

by Maureen Eves

Although it may sound like a swim in a city pool, Urban Plunge is an event which will challenge the student to become a resident of an inner city for 48 hours during Christmas break. The student is given the opportunity to witness the complexity, poverty and oppression of American cities as well as the social action groups which are attempting to improve the quality of life.

According to Father Don McNeill, director of the Center for Experim- ental Learning, the "city of the 'plunge' is given to students a taste of America's urban quality of life awareness. They are challenged to re-think their own views and com- munities."

Barb Frey, a member of the Urban Plunge Task Force, said, "Another goal is to witness some of the involvement of the Church in attempting to resolve the problem, not only as a symbol of love, but as an active instrument of change."

Co-sponsored by CILA, the Cath- olic Committee on Urban Ministry (CCUM), and the Center for Experimental Learning, the Department of Theology and Urban Studies, the Urban Plunge will be offered in over 40 cities across the United States between January 2-14, 1978. The students will be housed in each city by CCUM members and will stay in convents, rectories and on the street. The participating groups will be involved in a variety of activities, including membership in a preparatory meeting which will inform students of the needs of America today and allow them to meet with their CCUM hosts. The follow-up will give students the chance to share and evaluate their on people.

The course will be graded satisfactorily/unsatisfactorily. However, participants have the option to sign up for a 3-credit interdisciplinary course which will meet the requirements of the Economics, Government and Theology depart- ments. The Urban Plunge is a prerequisite for the course.

The Urban Plunge will give students further insight into some of the problems and programs that they have witnessed during their two days in the city," McNeill com- mented.

Plane basks on runway

DACCA (Bangladesh) - A hijacked Japan Air Lines DC-8 with 156 persons aboard sat isolated on a sunbaked runway here today while its Japanese "Red Army" crew threatened to fire on anyone moving within 500 yards of the plane. Two-thirds of the passengers were believed to be Japanese. The plane carried a crew of 14.

National

Serious crime rises slightly

WASHINGTON - Serious crime in the United States increased slightly less than one percent from 1975 to 1976, but Kentucky had a two percent increase in the same category for that period, U.S. Attorney General Griffin Bell said yesterday at the FBI's annual Uniform Crime Report release. "Serious crimes" are identified in the report as murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft.

Post Office changes WASHINGTON - The Postal Service yesterday dropped a requirement that letters be addressed by hand to qualify for the "royal wedding" mail.

Weather

Increasing cloudiness and mild today with highs in the mid to upper 60's. A chance for rain tonight and tomorrow. Low tonight in the low 50's. High tomorrow in the mid 60's. Probability of precipitation 40 percent tomorrow night.

On Campus Today

4 pm seminar, 'observations on the problem of scientific information - data for science & technology', dr. frederick d. russini, rice university, conference, radiation lab, sponsored by radiation lab, open to public

NY police find jewel merchants, but no jewels

NEW YORK [AP] - Police found the two diamond merchants who had been missing for several days but not the up to $1 million in jewels one of them was carrying. One was dead, the other alive and telling a bizarre tale of robbery, murder and kidnap.

The body of Finchos Jaroslawicz, stuffed into a plastic bag and minus the jewels, was found hidden in the middle of town by Shimon Tal, a business acquaintance who also had been missing. Jaroslawicz, 25, had been beaten and suffocated.

Tal, 31, a gem cutter, was found asleep in his car earlier in the day, after dropping from sight Sunday. Tal gave an account of two men invading the premises Sept. 20 and beating broker Jaroslawicz, 25, to death with a board. He said he continued to do business in the 15th floor office in the center of Manhattan's teeming diamond district, with Jaroslawicz's body there, and that the two men, reappeared five days later, kidnapped him, drugged him, robbed him and finally released him.

"The real problem is the story is so stupid that it might be true," said a detective working on the case. "You can be sure we are going to question this guy and check out every move he ever made."

On Sunday, Tal was quoted as saying, the two mystery men suddenly reappeared, stopping his car at a traffic light on Long Island. He said he was forced to drive the pair around for three days. Then, he said, he was dragged and released early yesterday.

Hoosiers get Federal money

WASHINGTON [AP] - The federal government is granting Indiana consumers a financial boost to challenge rising electricity rates.

Indiana is one of 12 states selected by the Federal Energy Administration to participate in a pilot program designed to safeguard the interests of consumers in rate increases.

The state will receive a maximum grant of $200,000, which will be distributed by the Office of the Public Counselor. The money will be used by the public counselor to represent customers' interests in rate hearings or will be allocated directly to consumer groups engaged in rate challenges before the Public Service Commission.

Sen. Birch Bayh, who made the announcement, said one of the FEA's criteria for awarding the grants was the cost of electricity in each state and the percentage of income used to pay bills.

The Hoosier Democrat noted that 41 states applied for $2 million authorized for the program under the Energy Conservation and Production Act of 1976.

Right to Lifers to meet tonight

The ND-SMC Right to Life Committee will hold an organizational meeting tonight at 7 p.m. in the Amphitheatre at LaFonorte. All students are invited to attend.

For Luce Program
Scholar nominations sought
by Sue Weicher
Note Dame has been asked to nominate three persons for participated except the Luce Program. The purpose of this nationwide program is to give the exceptional student, who otherwise might not have the opportunity to do so, a chance to study informally in Asia. The objective is to increase our overall level of understanding among future leaders.

Participants are placed in jobs and internships according to their background, interests, and academic achievements.

None of the scholars is formally enrolled in a college or university, and no academic credit is given. The candidates are placed on career rather than academic goals.

The program is funded by the Henry Luce Foundation. Nine thousand dollars have been established as the basic stipend for each Scholar, and additional support may be awarded. The report was presented to the Commission on Higher Education.

It was suggested that President Donald Costello or pick up application materials in Room 300 O'Shaughnessy. The deadline for all applications is noon on Monday, Oct. 28.

The panel, made up of members of Congress, state and local community representatives, administrators, officials, and business and union leaders, found that the cost of federal paperwork may exceed $50 billion a year, or about $2 per person. Although much of the paperwork is necessary, some is not, it said.

It was estimated that 50 percent of its 770 recommendations have been implemented by Congress and the federal government at a savings of $3.5 billion.

At Saint Mary’s
New Fresh Council approved
by Jean Povley
St. Mary’s freshman council.

St. Mary’s freshman class will be represented this year in student government by the freshman council. The proposal to replace the four-officer system was approved overwhelmingly by approximately 150 freshmen present at last night’s meeting in the Angela Athletic Facility.

The council system, tentatively adopted by St. Mary’s Student Assembly last spring, evolved out of a desire to involve freshmen in the varied aspects of student government. Another reason for the change, according to Kathy Murphy, last year’s vice-president of student affairs and writer of the proposal, is that freshmen are more likely to take an active role in their own activities in the future.

One representative per 25 freshmen will be elected, with at least one person from each dorm on the council. During her first semester, Cathy Hedges, vice-president of student affairs, will chair the council and report on its activities to the Board of Governance.

A champion from within the council will be elected at the beginning of the second semester, however, she will then run the meetings as a voting member of the Board of Governance. Hedges will remain as an advisor only.

Several freshman council members will regularly attend the meetings of the Notre Dame Freshmen Council. The representatives will also be urged to attend the St. Mary’s meetings.

“This will help promote a stronger relationship and more interaction between the two classes,” according to the proposal.

Nominations will open Monday with the election being held Oct. 17 in the dining hall.

“We really want to encourage people to vote,” stated Maria Mignone, freshman.

Student Body President Mary Rukavina told the Observer that although she was disappointed by the turnout at the meeting, “I was happy with the amount of questions and interest shown by those here. Our next step is to convey their sentiments to the Student Assembly and have some freshmen officials elected.”

Aerospace Building houses research projects

by Ed Callahan

Some of the world's best facilities for researching air flows are located in an old Army dispensary on the Notre Dame campus and very few students even know where it is. The building is the Aerospace Engineering Laboratory, situated behind the stadium on Juniper Rd. near the A.C.C. The older, south half of the building was constructed of wood and in 1947 by the Army who used it as a dispensary. The newer section was built in 1967 with the help of these men and located in an old Army dispensary dimensional smoke tunnel in the Aerospace Lab, the facilities have evolved into a high class research organization. Experiments are often performed for the government or NASA, and usually center around air flows of objects. At present the department conducts tall smoke tunnels, land vehicles such as buses, and even rail cars and planes. The object of the research is to see if air resistance and drag can be minimized, thus allowing for increased fuel mileage. The department is also experimenting with winds whipping through miniature wind tunnels. Such work allows architects and builders to design buildings that will stand certain air pressures and strong gusts. Research on aircraft includes testing wing models for turbulence and smooth air-flow, important to safety and performance of the craft. Experiments can also be done on full-scale models of three super sonic wind tunnels available at the lab. The department includes a bio-medical lab, also housed in the dispensary dimensional smoke tunnel research has been done on artificial heart valves by the staff who approach the problem by applying engineering air flow principles to the device. Their equipment includes a mock circulatory system, a mock lung ventilating machine and a heart-lung machine. The building also has two low speed smoke tunnels, two main smoke tunnels and the three wind tunnels. The Aerospace Building houses research projects for specific life-threatening diseases. Among these are multiple sclerosis and renal or kidney disease because they could seri- ously deform or obliterate a fetus. The abortion issue is the last remaining obstacle to passage of the Labor-HED bill. The conferees have been working on the bill since July. Current restrictions on govern- ment funded abortions match the Labor-HED bill because that same language was written into law last year. The current House position is to deny abortion except in cases of rape, incest or where medically necessary. The Senate position, which the House has yet to consider, is that a woman should be eligible for federally funded abortions if she chooses. The House position, which the Senate has yet to consider, is that the abortion should be legal in the case of incest or where medically necessary. Objections to this proposal are based on its "vagueness," which opposes any specific legal payments for abortions under almost any circumstances.

WASHINGTON (AP) - Pressure mounted yesterday for quick House-Senate agreement on an abortion policy before money runs out for government social service agencies whose funds depend on the outcome. House and Senate conferees planned to meet tomorrow morning to resolve the only major outstanding issue. The main House position is that the government should pay for abortions through the Medicaid program for the poor only when a woman's life would be jeopardized by a full-term pregnancy. Medicaid paid for about 300,000 abortions last at a cost of $50 million. The Senate position, which the House has yet to consider, is that the abortion should be legal in the case of incest or where medically necessary. Objections to this proposal are based on its "vagueness," which opposes any specific legal payments for abortions under almost any circumstances.

Urban Plunge Application deadline Oct. 5

[Continued from page 1]

The agenda of activities will vary from city to city. Participants might see a criminal trial, tour a nursing home, take part in a pedestrian Neighborhood Outreach Program, tour a Juvenile Detention Center or visit a Welfare Office. Each activity will give students the chance to experience the things they read about in the newspaper and in newspapers," Frey commented.

The course was offered over the past three years and its popularity and enrollment has increased each year from 20 students in 1973 to 1977.

Junior Kathy Peters of Schenec­
tad, NY, who stayed in a parish on W. 51 St. in New York City, a neighborhood better known as "Hell's Kitchen," added, "It was a real eye opener for me, but things weren't as bad as the name "Hell's Kitchen" implies," Frey stated. She added, "I talked to people who had an optimistic outlook for improving the poverty that we saw. Their main obstacle was limited funds.

While in "Hell's Kitchen," Peters visited a drug rehabilitation center, a community center for neighborhood youths, a nutrition center for students, and an urban planning office. She also got the chance to "walk the streets" at night and saw New York in its entirely different light.

Mary McCormick, senior from Cincinnati and a member of the Task Force for Urban Plunge, stayed at the only integrated parish in Dayton, Ohio during her "plunge." She visited board­ings for the elderly, a half-way house for men and a relief center. She saw families without food and clothes. McCormick reflected, "You can't leave the experience without being challenged to ask yourself, 'What do I do to create this situation and what can I do to help?' Poverty is not just in the ghettos of New York City, but is close to home. My plunge made me see my home city in a new light."

McNeill suggested, "Some students might find a future in urban planning."

Senior Barb Frey spent her Urban Plunge in Milwaukee. The experience sparked her interest and she went on to work this past summer on a community organiz­ing project in Oakland, CA. Frey stated, "I was awakened to the problems of the city and to their possible solutions. My stay was too brief to allow me to know it all, but I did get a real sense of what kind of involvement was needed to make the city better and decided to pursue the challenge."

Applications for the course will be available to Notre Dame stu­dents in Room 330 O'Shaughnessy, in the Student Activities Office in LaFortune and from the Council's three-day meeting.

Urban Plunge co-ordinators will then arrange for participants to meet with their CCM contacts at the national CCMU conference to be held on camps from Oct. 30 through Nov. 2. CCMU is a national network of over 50,000 Catholics involved in social action in American cities.

Frey stated, "The role of experi­ential learning in undergraduate education is vital to American society. The experience can be beneficial to anyone. It gets the student out of the textbook and into the real world."
Dear Editor:

Quote from Monday's Observer:

"I'll be glad to help you. But don't tell me how to file your story."

"How's that going for you?"

"That's better. I'll tell you how to file your story."

This is an open letter to the Notre Dame students who are reading this. We are all in the same boat, aren't we? A lot of people are trying to get their stories written. This can be a hard job. I've been in the same situation before. I have some tips for you.

The first thing you should do is write your story in a clear and concise manner. Avoid using too many words. Try to use simple and straightforward language. You should also use active voice and avoid passive voice.

Dear Editor:

University receives endowment for English Literature collection

The largest endowment ever given to the University's Memorial Library will be inaugurated Friday, Sept. 22, with the opening of the Evangeline Phalin Collection of English literature.

Honored in a series of events on campus will be Mr. and Mrs. Howard V. Phalin of Wilmington, Ill., longtime University benefactors who recently established a library endowment devoted to the purchase of books in the area of English literature. The size of the Phalin endowment was not announced, although University officials said it was the largest in history.

A public lecture by author Paul Horgan, twice winner of the Pulitzer Prize and 1976 Laetare Medalist, will open Notre Dame's Memorial Library at 4:15 p.m. in the Memorial Library Auditorium. Horgan, widely acclaimed as the chronicler of the American Southwest, received the 1955 Pulitzer Prize for "Great River," the story of the role of the Rio Grande in North American history.

21 years later he was honored again for "Lamy of Santa Fe," a biography of Archbishop Jean Baptiste Lamy. Horgan, who received a Notre Dame honorary degree in 1968 and did some of the research for "Lamy in the University Archives, recently completed his forty-first book, "The Thin Mountain Air," a novel just published by Farrar, Straus & Giroux.

The book endowment is the second major contribution of the Phalins to Notre Dame's Memorial Library, opened in 1963 as the world's largest collegiate library.

The couple undertook the costs of the $11-story grand mural, "Christ as Teacher," which adorns the library's facade. The Howard V. Phalin Foundation for Graduate Study has also supported post-baccalaureate students at Notre Dame for several years.

Phalin, a 1938 graduate of the University, was associated for 35 years with Field Enterprises Educational Corporation and its predecessors, publishers of The World Book Encyclopedia and other educational materials. He became executive vice president of the company in 1957, president in 1964, chairman of the board and chief executive officer in 1966, and he retired in 1968.

Appointed to the University Advisory Council for the College of Arts and Letters in 1962, he became a University trustee in 1964 and last year accepted membership on the Notre Dame Library Council.

"Notre Dame's library, a top priority in University development, has been aided enormously by the generous Phalin Endowment," said Rev. Theodore M. Hesburgh, C.S.C., Notre Dame's president, "We hope to expand the library needs of other University academic units in a similar manner as the Phalins have done.

A year ago, the University announced the Alfred R. and Lee Phalins to Notre Dame's Memorial Library.

**Financial aid: a’rough’ trip**

(CPS)--Any student relying on financial aid can tell you. It’s a rough trip.

With one out of every six graduates defaulting on their student loans, banks have adopted stringent guidelines and more students are discovering that once their graduation it is increasingly difficult to pay for the cost of that trip.

In many cases across the country, banks are cutting their student loans by up to 70 percent. Others have ended their loan programs altogether. The federal government, having insured bank losses against default under the Federally Insured Student Loan (FISL) program, is also toughening its approach.

The agency handling the loans is in the process of contracting with a private collection agency. By the end of the year, all federal student loans will be examined. A note of 50,000 overdue accounts on a commission-free-collected basis.

Muoey Tansey, a special assistant to the associate Guaranteed Student Loan (GSL) commissioner, explains the decision to the Higher Education Daily: “The default rate is so high that it has continued to increase and we have been unable to match that increase with an increase in our collections resources.”

Because hiring has been sporadic, Tansey says GSL has been unable to keep up with the work. According to a recent General Accounting Office report, by the end of fiscal 1977, GSL will have paid out $434.6 million in bad debts. That is up by about four times the $136 million GSL had to pay out to banks in 1974.

The increase in defaults has been attributed to the economic depression of the past few years. Students graduating with BA’s, MA’s, and PhD’s have found their educations not a job guarantee. Another factor is the lack of information banks and college financial aid offices give to students taking loans. Students are not fully aware of the implications of taking on or the options available for repayment such as hardship clauses.

The major source of default lies not with the students but with vocational and proprietary schools who comprise over 50 percent of the default claims filed by banks. Many FISL recipients find that they are liable for the loans although their vocational school closed down or a training institute overstated job opportunities and that particular job market is flooded. One way to cut down on such defaults would be for the government to enact stricter licensing procedures.

Banks are protecting themselves in their way. Bank of America (the conduit for guarantors), for example, is willing to loan only to seniors, which now act as guarantors and Junior college or first year students. Bank of America also lowered its maximum award from $2500 in 1976 to $1500 this year. Trust Company of Georgia will loan to students with a one year minimum acceptance with $100. Some banks, such as Security Pacific National of California have increased in the number of students who have previously held loans from them. Successful applicants may not hold loans with other banks. Security Pacific National also decreased its maximum loan activity by 50 percent since 1976. "You have to do a lot of work and cross every ‘i’ to collect for the government," says Lu Steiner of Security Pacific National Social Policy Department. The bank must be especially careful about properly processing applications and documenting efforts in collecting from defaulters. Even there according to James Kopley, manager of New York City’s Bank student loan division, "it takes us from six to nine months to collect from the government.

GSL has taken other steps aside from contracting with a private collection agency. HEW Secretary Joseph Califano has consolidated seven loan programs into one program which will hopefully end duplicated effort and waste.

HEW is also encouraging state governments to act as aggressive agencies. There are 26 states which have now acted and results have been positive. Banks dealing directly with the state and the federal government insures 80 percent of the loan money. The better banks are better management at state level and less red tape which quicker processing of student applications and collections on defaults.

The number of guaranty agencies may eventually make the trip easier for students. Citibank reported it has increased its student loan activity by 21 percent this year. Bank of America’s Student Loan Division, said that William Joynes whose name was a farm worker.

Longevity linked to soil, activity

LONDON (AP) - Could the key to long life be growing your own vegetables in a tiny English coastal village called Upper Sheringham?

The village in Norfolk County, about 115 miles northeast of Lon­don, has as many as 6 elderly residents as the average 1,000-area. And during the last two years a surprising number of residents who are over 103 and are pretty well 75,250 patients are over 65 and of those, 11 percent are over 75.

“Though the main cause of death is respiratory disease, especially after a damp winter. We have no factories and no smog, very low rainfall and mild winter temperatures. There are not hills about a mile inland and the snow stops now,” Davies said. His studies showed most old people are linked with the “I think the heart of the matter is the soil and in continuing activity. The oldest man I knew, who died aged 106, was a farm worker.”

WASHINGTON (AP) - The Senate adjourned late last night without voting on natural gas legislation after a 37-hour session that resulted in a compromise that could break a nine-day Senate impasse.

The Senate planned to begin work this morning on a compromise offered by Majority Leader Robert C. Byrd and Sen. Henry M. Jackson, D-Wash., chairman of the Senate Energy Committee.

At issue is a critical portion of President Jimmy Carter's energy plan allowing for higher natural gas prices at the wellhead, but providing for continued federal controls.

The Senate Democratic leadership hopes the new compromise will be acceptable to supporters and opponents of deregulated gas. Jackson reportedly won over a handful of senators whose votes could make a difference.

Before taking up the Jackson proposal, however, the Senate must vote on a complicated parliamentary tactic designed to get the proposal on the floor. That tactic would allow a clear-cut Senate vote on the latest of natural gas deregulation.

While retaining federal controls on natural gas, the Jackson compromise would allow producers to charge more for gas than called for under President Carter's energy plan. Under the key proposal made Wednesday, it also would permit greater quantities of gas to qualify for the same higher prices.

Sen. James Abourezk, S.D., one of two filibuster leaders, reportedly has said he will back the proposal. The other leader, Sen. Howard Cannon, D-Nev., said he may. Both men have vigorously fought both higher prices and an end to deregulation, but the Jackson compromise also designates to Senate deregulation forces because it they would allow further meeting between opposing sides.

Metzenbaum said as a result of Jackson's actions, "There have been some switches. But it's still going to be very close." Metzenbaum said before Jackson's compromise may be voted on, the deregulation plan sponsored by Sen. Lloyd Bentsen, D-Tex., and James B. Pearlman, R-Kan., must be set aside.

The senator said he and Abourezk would call off their filibuster long enough for an attempt to defeat the Pearson-Benten plan.

The filibuster has slowed other congressional business, and Byrd said earlier, "I find a growing backdrop of public concern to get a vote."

Byrd said there would be no repeat of Tuesday's all-night session, the first since the civil rights debates of the 1960's, although the Senate would continue meeting under a vote record.

Earlier, Abourezk and Metzenbaum had vowed to block a vote on the deregulation of natural gas prices by the unusual device of calling up about 500 amendments, one after the other for Senate action.

With the exception of a two-hour breakfast break, the Senate had been in session since 9 a.m. Tuesday.

At issue is a critical portion of President Jimmy Carter's energy plan allowing for higher natural gas prices at the wellhead, but providing for continued federal controls.

Late Tuesday, Carter administration officials said they would agree to a compromise natural gas price ceiling of $2.03 per thousand cubic feet, a 26 cent increase of $1.75, the original price in the energy plan.

The price is currently fixed at $1.46.

On the only real test vote so far, the Senate indicated tentative support for the industry backed deregulation plan sponsored by Sens. Lloyd Bentsen, D-Tex., and James B. Pearlman, R-Kan.

Abourezk and Metzenbaum say they hope to switch enough votes to prevent the Senate from lifting price controls. But if they succeed in preventing any vote on natural gas, the present $1.46 ceiling will remain in place.

As the sun rose over the Capitol, Byrd declared, "We've had enough of this foolishness."

Senate decorum was set aside and there were periodic flashes of anger by senators irritated at the tactics of Abourezk and Metzenbaum.

Sen. Ted Stevens, R-Alaska, said, "If I did what they did, my constituents wouldn't let me come back again."

In fact Abourezk faces no political risk because he is not running for re-election. Metzenbaum is a millionaire with a long record of voting against the big oil and gas companies.

During the around-the-clock session, cola was set up in adjoining rooms for senators to grab a few minutes sleep between roll calls.

At about 5 a.m., Byrd carried a blanket to the door of the Senate chamber, dropped it to the floor, walked in long enough to vote and retrieved the blanket on the way back to his cot.

The Center for the Study of Man in Contemporary Society at Notre Dame in South Bend, Ind., is announcing several key staff changes this year.

SSTRL, the Social Science and Technology Research Laboratory, reports that the Social Science Research Laboratory will be extending its program to include modular course offerings in social science and humanities graduate studies.

Michael G. Lilienthal, who completed his doctoral work in Psychology at Notre Dame this September, will assume the responsibilities of the SSTRL's research director. He has been a consultant on students. Students and staff of the University's official representative include magnitude estimation and statistical applications and computer programming in the SSTRL.

The Social Science Training and Research Laboratory will be extending its program to include modular course offerings in social science and humanities graduate studies.
Defensive tackle Tony Baggio has been given the starting role at the nose tackle position. Baggio has not seen game action since his freshman year but has participated in the past three weeks. Michigan State goes into a defensive formation that like of pro football's Oakland Raiders. The Spartans employ three down lineman spearheaded by big, bad Larry Bither at tackle. In the middle, Tim Rowekamp provides a formidable roadblock at 6-2, 250. Rowekamp was a second team All-Big Ten guard a year ago. A knee injury slowed him up last year. The Spartans have seven regular backs from last year, a strong nucleus, but only one, Jerome Stainon is in the defensive backfield.

Specialists: Kevin Muno punted admirably against the Boilers last week and will handle the chores again this week. Dave Reeve just keeps going along, he has five field goals on the year to date and seems certain to top his record total of 11 early this year. Hans Heine enters the place kicking chores for MSU and Stachowich will play big if the defenses dominate.

Analysis: Former Irish star George Connor made an interesting point in the cruise down line. 'Reasonable' analysis as not to let the starting line-up. His arm looks stronger now than it was before he Irish win at last Saturday's game at Purdue. Freshman Ray Dlustrated writer hypothesized that the fans were worth a situation as not to let the specialty

Joe Yonto coordinates ND defense

by Tony Pace

Last Saturday afternoon against Purdue, the Notre Dame defense coasted. As the second half began, they had played well in the two previous games, they had yet to demonstrate any of the offensive capability that Purdue, however, the Irish defense did not make the plays to stop them. The Boilermakers made off the scoreboard in the second half and Notre Dame could not score opportunities for the offense.

The man who has greatly helped the development of this defensive line is Coordinator and Line Coach Joe Yonto. Coach Yonto, a 1948 Notre Dame graduate, has been the defensive line coach for the past fourteen seasons. During that span of time than likely lingers on the performance of number of All-Americans including All-American linebacker Tom Hardy, Walt Patulski, Mike Kardish, Jeff Cox, Gary Forystek, Nick Nick, Bob St. Pierre and Steve Brown and Ross Fry. Yonto commented, "Ross is a great individual and a great ath-

Vicious stop. What they should never forget, however, is Forystek's awakening of the echoes with his determined style. Ironically, it was his run on which he got hurt that best exemplified the line's internal generated pride and confidence. Gary Forystek started things off when he moved the team into Purdue territory early in the first half. This year, the Notre Dame defense features two of the best defensive ends in college football. Either evil or good, Ross or Wyndel Earley. Yonto likes what he has seen of Scott Zettke. The 6-5, 226-pounder is an excellent field athlete and Notre Dame's Athletic Board. Being a club sport, the team was aided the development of this whole defensive unit. It's really hard to pinpoint any one of these two, however, they are so capable backfield. They clog up the middle very well. Ken also had a good pass rush against Purdue. Mike Calhoun and Ross Fry's appearance is doubtful. This year, the Notre Dame defense features two of the best defensive ends in college football. Either evil or good, Ross or Wyndel Earley. Yonto likes what he has seen of Scott Zettke. The 6-5, 226-pounder is an excellent field athlete and Notre Dame's Athletic Board. Being a club sport, the team was

The text went on to stress the benefits of the basketball program in terms of personal development of the girls. Certainly women's basketball is a way to go about gaining a change. Several facts were that each year saw at least a 40-60 percent increase in the number of women's events. This year, the Notre Dame women's basketball team had a good season. DeWayne was working on things that would enable us to stay humble. Yonto added to my duties by the rest of the defensive line. Scott Zettke and Dave Meade are two of the best defensive ends in college football. Neither one has the middle.
