State Police assist in poison investigation

by Tony Pace

Indiana State Police, Notre Dame Security and an unnamed private investigative firm have combined forces to investigate the disappearance of food tampering in the Notre Dame residence halls. The investigation has met with moderate success and they are presently pursuanting leads in a possible case.

As was reported in the October 18 edition of the Observer, a chemical compound, later identified as sodium hydroxide, was found mixed in a barrel of sugar and in several salt shakers. Since then, WSND Studios has been the center of a media frenzy related to the ingestion of the compound.

Notre Dame Security was asked to investigate the case because, in the opinion of Director of Security Arthur Pears, “It obviously looked like the sugar and salt had been tampered with. How else could sodium hydroxide get into the salt shakers?”

The Indiana State Police were also asked to assist the investigation “due to the seriousness of the matter.” The decision to ask for their assistance was in no way related to the fact that Notre Dame security guards no longer have St. Joseph’s Hospital Detex system, according to Sgt. Zack of the Indiana State Police.

Commenting on the incident, Director of Food Services, Edmond Price, stated, “We’re, of course, very concerned. We are also somewhat surprised that no one has gone wild because of this. Our police are on top of the situation. They’re checking with the troops about the whole thing and they’ll come up with no reason for the recurrence of the problem.”

Because of the incident, the security at both dining halls have been increased. “It’s a little precau­­tionary,” said Price, “that our people are doing a little more with an extra eye first time. To prevent recurrence of this problem we are locking up both combination locks because they can’t enter the studio in an emergency. Therefore, I doubt there are the Detex.”

“Emergency. Therefore, I doubt there are the Detex,” said Price.

Goerner proposed additional security measures. “We’ve thought of getting an alarm, Detex system --- even an armed guard. But, of course, that takes time and money, and the availability of security is extremely limited. 

After considering the Detex system is a good idea,” agreed Wehver. “But the University doesn’t like our present security measures.

Goerner added that key-operated locks, as well, are absent in many offices and studios.

According to Goerner, all doors leading to the studios and offices were key-operated locks at the time of the theft. “Some also had combination locks.” he added.

To increase station security, WSND-FM program director Mike Karel revealed that all locks have been changed. “The keys can be rotated or removed,” he said, “and the combination locks can be changed as often as we like.”

WSND chief of technical engineering, Bob Stroks, also had key-operated locks in his office. “It’s extremely inefficient,” Stroks said, “the people who are holding the keys to the offices.

According to John Reid, assistant station manager and chairman for the trip, “The trip was a tremendous success. I received many good comments from the hotel staff, which is unusual these days.”

The response of the senior class was great overall, when the trip is not ESC, it hit a high for the year.

Senior Class Trip consensus ‘great’

by Maureen Eynes

Upon returning to campus after midsemester break, the usual question was “How was your break?”

For most students the answer was, “It was okay. I got to see some friends at home.”

For 427 ND-SMC seniors who went on the trip to San Francisco from Oct. 23-28, the consensus was “great.”

According to John Reid, assistant station manager and chairman for the trip, “The trip was a tremendous success. I received many good comments from the hotel staff, which is unusual these days.”

The response of the senior class was great overall, when the trip is not ESC, it hit a high for the year.

Senior Class Trip consensus ‘great’

by Diane Wilson

To "coordinate and centralize the concerns of 'campus life' will be the goal of the new student government," said Diane Wilson. Wilson, student government executive coordinator. The new group will be organized by Rod Juseta, president of student Affairs, and the current student Affairs Office.

Juste explained that the new Commission will be a "natural outgrowth of the realization of a group that has almost been identified as campus students. The old group was run through the Student Life Council," she said.

When the Student Life Council went out of existence so did the old group, Juste said.

White plans for the council have not yet been finalized, according to Juste, its members will probably include representatives from Student Affairs, Off-Campus Housing and Student Government.

The commission will meet periodically to "coordinate and centralize the concerns of 'campus life' will be the goal of the new student government," said Diane Wilson. Wilson, student government executive coordinator. The new group will be organized by Rod Juseta, president of student Affairs, and the current student Affairs Office.

Saying she has been shunned as an entertainer, Anita Bryant declared yesterday that death threats, the potential loss of her livelihood and various forms of harassment would not deter her from campaigning against homosexuality. "I'm not afraid," she said in an interview. "So they kill me. So what?" Saying that her more than $100,000-a-year job with the Florida Citrus Commission is in jeopardy, Bryant declared that she "Won't be intimidated." She continued: "If that's the price I have to pay for standing as the concerned mother of my four children and to make it a decent country to live in, then it's worth paying the price."

Guy Lombardo

HOUSTON - famed hard leader Guy Lombardo, 75, was reported in critical condition at Beaumont Hospital yesterday from an undisclosed ailment. Lombardo underwent cancer surgery Sept. 23. The surgery involved removal of an aneurysm ballooning section of a large artery near his heart. He had left the hospital Oct. 8, but returned last Thursday.

Teachers need help

INDIANAPOLIS - Teachers need more resources to combat students' poor reading skills, a problem at the heart of the nation's educational woes, Health, Education and Welfare Secretary Joseph Califano said in an interview.

"Teachers need more resources to help students from a biologist's view of bacteria," said in an interview.

St. Mary's B-Fall lottery winners act now!

Winners of the basketball ticket lottery at St. Mary's are asked to make a check payable to the Notre Dame Athletic Department in the amount of $22.50 and to turn it in at the St. Mary's Student Activity Office, 166 LeMans, no later than this Friday. Only bleacher seats are available.

Dates to pick up season passes will be announced by the University of Notre Dame. St. Mary's students will be able to sit with ND students.

Students listed who do not turn in their checks by Friday will be eliminated from the lottery and a completely new listing will be posted for remaining tickets on Monday Nov. 7. If there is to be a new listing on Monday, then student checks will be due no later than Tuesday, Nov. 8.

All deadlines for final and no checks will be accepted after the dates listed above. If you have any questions please call Mary Lawerent, Director of Student Activities at 4319.

WASHINGTON (AP) - A microscopist organismo previously thought to be ordinary bacteria actually is a separate form of life and may be the oldest living thing on earth, it was announced yesterday.

The major development could provide new clues to the ancient stages of evolution that immediately preceded the development of life as it is known today, scientists said.

The discovery by a University of Illinois research team was announced jointly by the National Science Foundation and the National Aeronautics and Space Administration which funded the work.

The team led by Dr. Carl R. Woese, Dr. Ralph S. Wolfe and Dr. George F. discovered the organism's uniqueness by analyzing its genetic composition.

Science traditionally divides living organisms into two basic types, the "higher" forms of animals and plants, and the "lower" forms of bacteria.

The researchers say their organism, which lives without oxygen and produces methane gas as its waste product, fits neither group.

"The organisms are a distinct class, no more related to typical bacteria than to higher forms," Woese said. "They are a third form of life on this planet."

Woese said this type of organism probably evolved during the first billion years of earth's 4.6 billion year existence when conditions would not sustain other known forms of life.

Its ability to live without oxygen in temperatures greater than 170 degrees Fahrenheit means it that probably could have survived on earth at that time. The atmosphere then was composed of hydrogen and carbon dioxide and temperatures were very warm. Woese says the methane-producing organisms are best suited for these conditions.

The traditional theory of two lines of evolution is based largely on the hypothesis that all life came from a common ancestor, probably a simple primal cell. The methane-producing organism may be an early offspring of this common ancestor that precedes even bacteria, the scientists said.

Woese said in an interview that discovery of a third evolutionary line opens the possibility that even more lines sprang from the common ancestor.

"This discovery is very important from a biologist's view of studying evolution," Woese said. "This allows a lot more perspectives and choices when there is disagreement on a question that can't be resolved using two lines of descent."

The methane-producing organism technically called methano-bacteria thermoautotrophic, is widespread in nature even though it is killed by oxygen. It is also the naturally occurring listening material of some other bacteria and other organisms use up all the oxygen. The Illinois team found that the organism's basic genetic material, (ribosomal RNA, was distinctly different from the RNA of bacteria and "higher" cells. This was the key evidence that the methane-producing organisms are not a unique evolutionary line.

Demo club officer nominations

Any member of the Young Democrats Club who wishes to run for a club office must call Paul Faddio at 3454 before next Wednesday. Elections will be held at 7 p.m. Thursday in Room 20 of the student center.

Baroni stresses the importance of the neighborhood in solving city problems

by Leo C. Hansen

Until recently, the church was the integral unit behind neighborhood reform. When neighborhood and parish interest in solving city problems declined, so did the neighborhood, and such idealistic concepts as "place" and "space" were also.

There is a new wave of interest in the neighborhood and the tasks of resource allocation, revitalization, renewal, re-evaluation and self-improvement.

Monsignor Geno Baroni addressed the Catholic Committee of Urban Ministry yesterday. [Photo by Greg Trupke]

By a more immediate goal is neighborhood preservation and conservation.

Perhaps one of the greatest spokesmen for this new national awareness is a Catholic priest, Monsignor Geno Baroni, the first Catholic clergyman to hold a Catholic chair in Urban Ministry. Baroni addressed the Catholic Committee of Urban Ministry (CCUM), on urban planning and a possible national policy on neighborhoods.

Baroni is currently producing guidelines for a national urban planning policy on neighborhoods. There is no lobby for families or neighborhoods in Washington, he notes. "Urban Renewal and freeways destroyed many neighborhoods. Urban Renewal destroyed more houses than it built." He made the following points:

1. This is a nation of cities. Cities are important to society. They should not be allowed to deteriorate. To turn around the core of cultural and economic strength.

2. Rates of growth and effects of growth vary with different parts of the country under different economic conditions. Urban areas exhibit different effects and rapid changes. To sustain urban life.

3. We must revise national thinking to encourage community development for our scarce resources. Cities are our best place to start because they use less energy and have an existing capital structure. To sustain urban life.

4. The Federal Government has done a great deal to assist cities. More needs to be done. The effects of the nation's problems are beyond the power of the city to control. To sustain urban life.

5. Arbitrary and inflexible urban boundaries are the cause of many of our urban problems, particularly fiscal and financial problems.

6. Most city problems are caused by the factors of poverty, economic and social change. To sustain urban life.

"People live in neighborhoods. If neighborhoods die, cities die," claims Baroni. "Neighborhoods are the building blocks of cities. If neighborhoods work, cities work." Baroni said.

President Jimmy Carter, in his recent plunge into the urban areas of Detroit, Chicago and New York City, was asked many questions about neighborhoods, according to Baroni, who accompanied him on the tours. "When Carter went to the Bronx," he remarked, "I think he was one of the few who really cared about anything for housing of themselves and their own people.

That he feels is the direct of the urban strategy, today's encouragement and guidance, as well as insight into individual neighborhoods into our own community survival. Participating in the key to urban life and complete answers to the problems of our cities.

Baroni called upon the conference committee to support the neighborhood cause. The church," he told the 800 delegates, are the most important existing networks in our neighborhoods and cities.

Working with HUD and the Carter Administration he wants to create neighborhood jobs to help housing and to institute a lot of social services, which, he says, can be done for a lot less money, with people in the neighborhood doing it themselves. The government cannot do it alone. Baroni is interested in the support of the community and the neighborhood to plan a city and the government can do a lot of things, but it can't love cities."

Baroni and Teamsters disagree on size of union

Assistant Director of the University Relations Office, John Goodwin, announced Thursday that activity would form the basis of possible unionization.

The Teamsters wish to limit a possible union to the 21 groundskeepers, but the University lists 43 employees in the "Service and Maintenance" category, all of whom "operate under the same personnel policies and guidelines," according to Thomas J. Mason, vice-president for Business Affairs.

The administration wants to consider all 433 workers if a union is formed. In this case, laundry workers, maids and janitors, the Athletic and Convocation Center staff, golf course crew and others would be included, in addition to the groundskeepers. "It seems to us that this is a fair more reasonable approach both for the University and the employees than to be subjected to segmentation tactics by the Teamsters," Mason stated.

According to Bernard Dobranski, professor of labor law, this con-

Women’s Career Center moves offices

The Women’s Career Center, a career counseling service run by and for women, will establish its offices in the YWCA effective Nov. 1 in an effort to consolidate women’s services in Northern Indiana.

The announcement was made jointly by the presidents of the boards of directors of the two organizations, Mrs. Donna Lindberg of the YWCA and Paula Auburn of the Women’s Career Center.

Lindberg noted that the two groups have offered joint programs in the past and that the move will merely solidify an existing relation-

ship. “Because we share the same goals, we see a natural alliance between the YWCA and the Career Center,” she said. “In fact, the YWCA national standards adopted in 1976 have committed us specifically to providing supportive services to help women find adequate income and economic opportunities.”

Auburn, who also is a member of the YWCA board of directors, said, “We expect this association to solidify an existing relationship.”

Auburn also announced a new schedule of programs which will be offered beginning in November.

Job Readiness Training. This workshop teaches the skills needed for an effective job search and includes skills and interest assessment, resume writing, tips on researching jobs, and practice interviews. Conducted by Judy Reeves and Judy Markwicz, it will be held from 7 to 9 p.m. Mondays and Wednesdays beginning Nov. 7 and ending Nov. 30. The cost is $35 for the six-session series.

Assertiveness Training. In small group sessions, women learn and practice assertive behavior skills to build their self-confidence in business and personal situations. The group will meet from 7 to 9 p.m. on five Thursdays, Nov. 10 and 17 and Dec. 1, 8 and 15. Counselors are Andrea Yokich and Carol Murset, and the cost is $30 for the series.

Individual Career Counseling and Planning. Appointment may be made by calling 288-8488.

Dean Roemer fields questions at an informal gathering in Holy Cross last night. [Photo by Greg Trupka]

Roemer fields questions

by Mike Ridenour

Staff Reporter

Answering questions before an informal gathering of 30 students in Holy Cross Hall last night, James Roemer, dean of students, explained that his job is greatly misunderstood around campus.

“Where does all the paranoia come from,” Roemer remarked. “I think people have spent too much of my time for disciplinary action. A lot of my time is spent on positive actions mostly with student af-

fairs.”

Responding to the questions concerning the abolishment of the University Judicial Board and Appeals Board, Roemer reiterated his feelings on the controversy by citing a few reasons for the decision. “There is a lot of responsibility placed on the students and I think they perform well under the stress of hearing another student’s case,” Roemer said that problems of confiden-

tiality arose with the students hearing cases.

Another reason for the board’s departure, according to Roemer, was that the students hearing the cases “may have factual information which is not part of the judicial process.”

Along with the dismissal of the Boards came the removal of direct student participation in the discip-

linary process. Yet, Roemer countered, “Students do have a say in picking the panel (Review Board).”

Roemer said a lot of cases that come before him are not simple. “Many of these cases are very complex in nature,” he explained. “But it’s better off with the dean of students rather than the local authorities. There, you can have a criminal record with a mis-

ter among students rather than the local authorities. There, you can have a criminal record with a mis-

Sailing pix today

Sailing Club members take note; Club pictures will be taken at 4:30 p.m. down by the boat house.

Winners of the Sailing Club’s raffle, held last night, are: 1st place, Colleen M. Tidwell of Boardman; 2nd place, Janice Tegeler of Boardman and 3rd place, Bob Juba of Zahm.

Howard Hall presents film

Howard Hall will present a film series on the lives of the great Christian thinkers.

The series will consist of three one-hour documentaries. “William Blake” will be shown tonight in Howard Hall at 5:30 p.m. “Leo Tolstoy” will be shown on Nov. 8, followed by “Dietrich Bonhoeffer” on Nov. 15.

The films are sponsored by the Howard Hall Academic and Religious Commissions and are free.
Saint Mary's Counseling Center to sponsor behavior seminar

by Honey McHugh

The St. Mary's Counseling Center is currently sponsoring a workshop series geared toward eliminating self-defeating behavior patterns. The seminar will begin this Monday and will be held once a week for four consecutive weeks. The workshop will be led by Suzanne Arenson, director of the SMC Counseling Center, and Gary Ritchie, assistant director of the center.

According to Arenson, the format for each two-hour session will be structured, unlike similar encounter groups. Arenson said that there will be a limit of 20 students per group in order to provide maximum individual attention.

The basic format of the program was first developed by Milton Cudney, professor of counseling at Western Michigan University, stated Arenson. As a psychologist, Cudney analyzed the process of continuation self-defeating behavior. His workshops were concentrated efforts to help people change such behavior as smoking, overeating, proscriptionism and alcoholism.

The SMC Counseling Center will follow Cudney's guidelines in helping students understand the pattern of self-defeating behavior. "The emphasis is on the process," stated Arenson. "We will help students to work on whatever behavior gets in their way. Once the pattern has been eliminated, individual problems of any nature can be solved, she added.

Candidates for the series will be interviewed prior to the workshops in order to determine if their needs fit the goals of the program. The program aims to provide opportunities for growth and understanding.

"The way the human system is designed, when any of us does something that works against us, there are organized reactions," Arenson remarked. "These results are there to tell us we need to change." Although the number is limited, there are still a few spots available. Students may sign up at the Counseling Center, 165 Le Mans Hall by tomorrow. For further information, interested students should call 4835.

'Sattelite One' open house

by Ed Callahan

There will be an open house today at the new audio-visual theatre, "Sattelite One," from noon to five p.m. The theatre is located in 242 O'Shaughnessy.

The theatre is an expansion of the AV Center, and thus the name "Sattelite One." The theatre was built with environmental controls, and provides a comfortable visual, acoustical and thermal view of the projection booth.

Numerous features of the theatre were designed with these aspects in mind. There are black-out shades, adjustable lights and a screen which is capable of projecting two simultaneous images. Acoustically, the theatre has a carpeted floor, draperies, soundproof booth and an external cooling system.

The main services are 16 mm, 16 mm slides and slide projection, but almost any other AV function can be handled. The theatre has filmstrip projection, overhead transparencies and opaque projection, but anything not supplied by Sattelite One can be found by the AV Center.

Sattelite One has a seating capacity of 55, and any faculty member on campus can schedule the theatre for any media presentations. Other highlights include the capacity for blending one slide into another, remote control of slides from the front of the room, and the availability of TV, cameras and videotape recorders for small scale productions.

This is actually a rerun of the open house according to the Director of the Office of Educational Media, Sr. Ed DeRosiers. "The first open house was very well attended. The eighty or so people who were there have probably told others about the project and the slide projection. This 'rerun' open house," she said, "will refreshments will be served at the open house.

Rear Admiral O'Conner to speak at reception

Rear Admiral John J. O'Connor, CHC, USN, chief of Navy chaplains, will be the guest speaker at a combined Navy-Marine Corps Anniversary Ceremony and Reception at 4:45 p.m. Friday in the Memorial Library Auditorium.

The celebration will be sponsored by Notre Dame's Navy ROTC Unit. A brief review of the 202nd anniversary of the founding of the Navy and Marine Corps will be followed by the reception in the adjoining lounge.

O'Connor is a Catholic priest of the Archdiocese of Philadelphia who was elevated to the rank of Monsignor by Pope Paul VI in 1966. Today Monsignor O'Connor is Chief of the Chaplain Corps of the Navy.

O'Connor began active duty as a Navy chaplain in 1952. Since then he has served with units of both the Navy and the Marine Corps. As a result of his experiences in Vietnam, he wrote A Chaplain Looks at Vietnam, for which he received the Navy League's Alfred Thayer Mahan Award as the outstanding work of its kind in 1976.

Guy Fawkes, a red-bearded man, will be the keynote speaker. The annual reunion of the Guy Fawkes Society will be held this Saturday at 8:30 p.m. at the home of Prof. J.Bauer, 1230 Black Oak Drive, South Bend.

Membership in the society is open to all persons who have lived in England. Membership, which may be obtained at the reunion, is $2.

clip out and use
Ever notice how it's easier to ace the courses you like?

It finally comes down to commitment. When you don't like a course, it's hard to excel. The class gets tedious. The texts get boring. The lectures get dreadful. Your work suffers. And so do your grades.

Compare that with the courses you really believe in. You care more. You try more. And without even noticing, you just naturally do better.

It's true in school. It's true outside of school.

For example, we believe there's just one way to brew Busch beer. The natural way. With natural ingredients. Natural carbonation. Natural ageing.

We believe that's the best way to brew a beer. And when you believe in what you're doing, you just naturally do it better.

Taste a Busch and we think you'll agree.

BUSCH
When you believe in what you're doing, you just naturally do it better.
The reassertion of deeply rooted patterns of Africa which is reserved by law for white time that labor has been denied civil rights systematic racial discrimination has been coined term apartheid. In essence, white cans) and white political power (controlled descent) have used black labor to develop a Britain and English-speaking South Afri­ by Afrikaners of Dutch and German England and taught for several years Lsotho [southern Africa].

Editor's Note: Walshe was born the Architecture November 6, 1928. He received his degrees from Oxford University, England and taught for several years in South Africa. He is currently a professor of government at Notre Dame. He will speak at the South Africa Workshop to be held Sunday, November 6 from 1:00 to 5:00 p.m. in the Architecture Auditorium.

Southern Africa has been in the head­ lines; the coup in Portugal followed by independence for Mozambique; civil war in the South African army and Cubans in Angola; the United Nations versus South Africa in Namibia; guerrilla warfare and the Angola-American proposals for Rhodesia; ferocious repression of black protests in South Africa, bannings, arrests and recently over twenty prison deaths including that of Steve Biko. The Security Council is now considering arms and economic sanctions.

This regional ferment is not simply the result of racial discrimination and counter­ vailing violence. It is not a situation that can be adequately analyzed in terms of dismantling color-bar and encouraging the equivalent of a civil rights movement - a process with which most Americans would feel at ease. More awkward issues have to be addressed and they go to the heart of United States foreign policy. These issues can be seen most clearly in the core state, the Republic of South Africa.

South Africa has its own complex history of black and white interaction, an industrial revolution sparked by the discovery of diamonds and gold in the late 19th century, the rise of white Afrikaner nationalism and the reassertion of deeply rooted patterns of segregation under the more recently coined term apartheid. In essence, white financial power (controlled at first by British and English-speaking South Afri­ cans) and white political power (controlled by Afrikaners of Dutch and German descent) have used black labor to develop a rapidly urbanizing economy. At the same time that labor has been denied civil rights in the economy it was creating. This system has been built around a legal fiction that black laborers are migrants, that is temporary sojourners, in the 87 percent of South Africa which is reserved by law for white property rights and white political power. The vast majority of South Africans are therefore impersonally used as labor units, and told to focus their political aspirations on their "homelands" or Residence, where they do not work and live - the dying overpopulated agricultural back­ waters comprising 13 percent of South Africa's land mass. The Transkei was the first of these backwaters to be offered political independence. Although this occurred in October 1976, the territory has yet to obtain diplomatic recognition and its statehood should be ignored as a shroud maneuver to entrench white supremacist over the wealth of South Africa.

Apartheid is therefore an efficient means for the exploitation of man by man, and the recent black uprisings give a glimpse of the suppressed tensions arising from systemic injustice. Racial discrimination in the core state has been used to reinforce class exploitation with United States corpora­ tions increasingly a major part of the system. Indeed, the investment and technical expertise of these corporations have been crucial in building up mining, atomic power, chemical, vehical and electronics industries. These industries have bolstered white power, functioning in part as the economic base for the South African military, police and surveillance systems.

Opposition to racial and economic ex­ ploitation has existed in South Africa throughout the 20th century. Africans passed resolutions, dispatched delega­ tions, petitioned and were killed for almost half a century before turning to armed resistance. In the 1950's, black organizations, the African National Con­ gress and Pan Africanist Congress, were then banned in 1960 and forced under­ ground. In the years following this repression, the United States offered verbal condemnation of apartheid while the build-up of corporate investment increased sharply. Simultaneously the liberation movements were neglected.

After sixteen years of rumbling discon­ tent and draconian repression black student protests erupted again in late 1976 and have spread to the major South African cities. For a brief moment, three-quarters of Johannesburg's black workers withheld their labor in solidarity with the protesters. These protests have been ruthlessly crushed. Over six hundred demonstrators have been shot, thousands arrested, some have already been tried and one legislator rushed through the white parliament to entrench still further the racial class and black privilege of apartheid. Prime Minister Vorster and his government have to be disciplined, that is brought effectively under the constraints of public policy and prior to their allies with foreign elites. As pools of skilled administrators, research teams and inno­ vators, these corporations could still assist third world countries - whether socialist or otherwise - but on a contractual basis rather than by direct investment and control.

United States policy in Southern Africa has been a classic cold war strategy search for regional stability, support for anti-Communist governments and the maintenance of an arena for increasing corporate investment. On the one hand the world is more complex and poten­ tionally destabilized than Moscow, Wash­ ington, the Chase Manhattan or General Motors would have us believe. Equilibrarian movements striving to redistribute resources and to establish participatory democracy in South Africa could be an important training ground for the anti-Communist governments and the maintenance of an arena for increasing corporate investment. On the one hand the world is more complex and poten­ tionally destabilized than Moscow, Wash­ ington, the Chase Manhattan or General Motors would have us believe. Off campus residences burglarized

by Jerry Perez

Twelve off-campus residences were burglarized during a period from October 3 to 26 according to South Bend police. One such burglary was discovered by Greg Young, who returned to his house at 621 Napoleon Blvd. He purchased a new stereo system he had purchased five days earlier stolen. The stereo equipment had been recently bought to replace a similar system stolen from the same residence in early September.

Individual pieces taken in the October 22 burglary of Young's residence included a Nakamichi pre-amp tuner and power amp, a TV turntable, an RG Dynamic Processor, a pair of Dahlquist speakers and stands, and a Dahlquist sub-woofer. Among additional items stolen were various small personal possessions, such as a wallet with a checkbook and some money, a watch, and a piece of jewelry. The total value of the stolen goods was estimated to be approximately $1800.

Palma cautioned anyone wanting to steal equipment to check serial numbers against police records. "The big problem," she said, "is finding out where all these stolen goods are going. There must be some kind of market for them."

Certain evidence and a past arrest indicate that the burglaries were committed by juveniles, Palma revealed. She described such methods as kicking in doors or "juvenile stuff." She also cited the inability of police to match up burglars' fingerprints with those on file at the police department. "The law prohibits the fingerprinting of juveniles," she said.

"If indeed the thefts are being committed by juveniles, then where are they unloading the goods?" Palma asked. She explained that juveniles do not have a peer group to which they could peddle stolen property. She also conjectured that professionals would not involve themselves in "small-time operations." The actual market for these goods, according to Palma, might consist in the possibility that some students are buying back "hot" stereo and portable television sets.

Foreign student enrollment increases

A total of 313 foreign students from 63 countries are enrolled this semester at the University of Notre Dame. This compares with 296 students from 65 nations last year, the previous record for number of countries represented on the campus. Compilred by Rev. Daniel J. O'Neil, C.S.C., director of the Office of International Student Affairs, the list shows a 100 per cent increase in the number of freshmen enrolled this year, 26 compared to last year's 13. There are also 29 sophomores, 27 juniors, 24 seniors and one enrolled in a fifth year program among the 107 undergraduates at Notre Dame. The 206 graduate students from foreign countries include 58 in engineering, 61 in science, 44 in arts and letters, 34 in business administration and four in Law School. Counting undergraduate and post-baccalaureate students, there are 85 engineering majors, 81 arts and letters, 73 science and 47 in business administration.

Leading the representation of foreign countries are 40 students from India, 35 from Taiwan, 20 from Canada, 12 from Panama, 11 from Mexico and 10 from Peru. There are also 21 students from the U.S. Territory of Puerto Rico and three from Guam. Also on the campus this year are students representing the international news centers of Uganda, Rhodesia, South Africa, Saudi Arabia, Egypt and Jordan.

The Observer is now accepting applicants for the position of Assistant Advertising Manager. Please schedule interview at the Observer Office, 3rd floor, Laforteun.

Brezhnev proposes moratorium on explosions

MOSCOW (AP) - President Leonid Brezhnev proposed a halt in nuclear explosions for both military and peaceful purposes yesterday in a speech marking the 60th anniversary of the Bolshevik Revolution.

Brezhnev omitted this point when delivering the speech, and Western observers said later they thought the omission might have been due to a last-minute revision or from an inadvertent slip-up in reading the text.

In Washington, Secretary of State Cyrus R. Vance welcomed Brezhnev's proposal for a moratorium on all nuclear explosions, calling it "a major step toward a comprehensive test ban agreement."

Vance told a news conference "the proposal he (Brezhnev) made is in the direction of what we have been talking about for several months on the need to include all kinds of nuclear explosions, including so-called peaceful nuclear explosions in a comprehensive test ban."

Both the United States and the Soviet Union staged test explosions underground just last week. Western monitors reported the Soviet set off a double explosion in Siberia on Friday and the United States exploded a nuclear device with a 20 kiloton blast last Wednesday.

The proposal in the text to reduce stockpiles of nuclear weapons matches a goal of U.S. President Carter, who last month told the United Nations General Assembly the United States was "willing now to reduce its arsenal of nuclear arms if the Soviet Union would do the same."

During the one and one-half hour address Brezhnev said the Soviet grain harvest this year amounted to a disappointing 194 million tons, the lowest since the 1975 grain disaster. This year's crop was 19 million tons below the target of a sharp drop from the 1976 record crop of 223.8 million tons. The 1975 decade-low grain crop amounted to 140 million tons.

The Soviet shortfall raised the prospect of increased imports from the United States and higher U.S. grain prices following general market weakness.

In his speech Brezhnev also warned that Western countries shouldn't count on the China-Soviet split lasting forever. But his renewed criticism of Peking at the same time prompted the Chinese ambassador to stalk out of the Kremlin hall.

Asserted that the Soviet Union is not seeking to impose on other Communists its "prescriptions for the socialist transformation of society."

Brezhnev's comments were in apparent response to sharp criticism of the Kremlin by Western European Communists. Restated the Soviet Union's interest in continuing to develop relations with the United States on "a basis of equality and mutual respect."

For handicapped Portable voice machine?

CHICAGO (AP) - A portable push-button voice machine that "speaks" with a slight Scotch brogue and can form almost any word in the English language will restore "freedom of expression" to people with speech impairments, its developers say.

The thin, gray box, which measures about 14 inches high by eight inches wide, is designed for use by deaf-mutes, cancer patients whose vocal chords have been removed, victims of muscle-impairing diseases, like multiple sclerosis and strokes, and people with hearing disabilities like deaf-mutes, cancer patients whose vocal cords have been removed, victims of muscle-impairing diseases, like multiple sclerosis and strokes, and people with hearing disabilities.

The speech scientist said they found "the machine is available in the direction of what we have been talking about for several months on the need to include all kinds of nuclear explosions, including so-called peaceful nuclear explosions in a comprehensive test ban."

There are two varieties of the machine. In one model, sounds are programmed by punching out numbers on a keyboard. The other has a 120-button keyboard with each key marked with a specific sound.

Kathy Fone, a speech scientist who helped develop the machines, said the first is "for persons who have high intelligence but little muscle control. The 120-key model is for persons with better control of their fingers but with mental impairment."

A spokesman for the manufacturer said the company hopes to persuade Blue Cross, Medicare and Medicaid to include the machines among benefits. Production units will be sold only to persons referred by doctors, speech therapists or other medical professionals.

The machines will introduce an element of freedom of expression never before experienced by the speech-impaired," said Fons.

Joyce named 'distinguished American'

Rev. Edmund P. Joyce, C.S.C., executive vice president of the University of Notre Dame and chairman of its Faculty Board in Control of Athletics, has been named 1977 recipient of the National Football Foundation and Hall of Fame’s “Distinguished American Award.”

Joyce will receive the award at the Foundation’s 20th annual awards dinner Dec. 6 in New York City’s Waldorf Astoria Hotel. He will be the second Notre Dame president to receive this honor.

Lewissio’s reopens

Lewissio’s will be open again for business tomorrow evening in the basement of Lewis Hall. Lewissio’s features all the spaghetti, salad and desert you can eat for $2. As treasurer of the University and chairman of its building committee, Joyce has been the architect of Notre Dame’s long range financial and facilities planning. He has also been a frequent supporter of college football, and was instrumental in Notre Dame’s return to postseason bowl competition in 1970 after 45 years.

Joyce is of the new College Football Association, a group of more than 50 major football revenue-generating schools formed to promote the interests of national college football programs within the National Collegiate Athletic Association.

He has served as a trustee of the National Conference of Christians and Jews, has served as a member of the Board of Visitors for the U.S. Naval Academy, and holds honorary doctorates from the College of St. Thomas and Belmont Abbey College.

New Orleans enforces law

NEW ORLEANS (AP) — Even its supporters are worried about a new ordinance that makes it illegal to drink liquor in soft drinks or anything else from glass or metal containers in the French Quarter. The law takes effect today.

Paper cups are permissible. The ordinance, which is 100 feet or 40 feet high in a jail or building.

VIDA volunteers sought

Rev. Ervin Smith will be on the list of people who are looking for volunteer work Friday as part of a Integrity on April 6. Smith is seeking interest among his group.

People in Diocesan Action (VIDA) who live in parishes and congregations in the New Orleans area are also needed.

North Quad dominates South, 23-14

by Bill Caldwell
Sports Writer

Last night's men's interball all-star game the North Quad rolled over the South Quad 23-14. The South Quad was stopped on the opening series in the North Quad. The first play from scrimmage resulted in a fumble by South's Bruce Teaching. The fumble was recovered by North's Ken Dike for a 21-yard pick. The South Quad scored no points on the opening possession. The North Quad scored 17 of the first 23 points. Tim Duits anchored the starting defensive line, and fullback Frank Hopke led the starting offensive line. Tackle Mike Calhoun, Ken Dike, Jeff Weston and Jay Case as they will games they will be bowl material at 8-3. Their players and coaches know what a win on Notre Dame's home field is worth. The South Quad has been jelling of late and a little added incentive produced by those scouts look their way. Georgia Tech has a talented squad and this is how defensive effort. At the other linebacker spot, called the star, is Mackel Harris who aids Sanford in patrolling the area with under-utilized receiver.

When the Irish are on offense: In their last two outings the revamped Irish offensive attack has posted 92 points on the board. Truly a multiple-offense, the Irish attack has developed around the running of John Heavens as was in evidence on his 49-yard jaunt against Navy. The Irish offensive line seems more together and more effective with the versatile set behind it. Tackle Steve McGlory and Tim Duits have been effective paving the way for Heavens and the running game. Good blocking has helped the Irish offensive line this year.

The Irish appear to be rambunctious in an unstoppable manner to a slowdown with a high-level of blocking. Speculators are ordering plane tickets to Dallas in anticipation of a National Championship, and against Notre Dame, an once-beaten Oklahoma in the Orange Bowl with the national title to the winner.

But, those games will be held eight weeks from now. In two days a 5-3 Georgia Tech squad will be looking for the upset that will propel them to the Bowl with a 6.3 yard average. Gary Lanier however, is Drew Ziegler's up right. The Georgia Tech offense was led by the running of Joe Montana to the nose. Joe Mackacek, Dan McCaffrey and Joe Montana to the backfield. The extra point attempt was made, and the score at 21-14. The quarter ended with this score.

The North Quad offensive line did a good job of keeping a line of scrimmage as the backs consistently got yards for a yard. An offensive line was played on three plays by Frank Hopke and Ken Dike. The South Quad's offensive line also was impressive in the third quarter, and this is how the game played out.

The game began with the South Quad driving the ball to the North Quad 27-yard line. The game was 17-0, and in favor of the North Quad. The South Quad's one man offensive set wasn't enough, and the North Quad drove the ball to the safety, and promptly scored a touchdown. The game was now 21-0, and in favor of the North Quad.

The South Quad mounted a fourth quarter drive, but they were unable to get in for the score as time ran out in the half with the score 23-0.

The North Quad dominated the South Quad once again got on the board. This time it was the South Quad which gave them the points. On fourth down the South Quad mounted a drive from the one yard line. The snap from center captured from the North Quad, and the two yard line for a safety. That made the score 19-0, and in favor of the North Quad.

After several series of exchanged punts the North Quad once again got on the board. This time it was the South Quad which gave them the points. On fourth down the South Quad mounted a drive from the one yard line. The snap from center captured from the North Quad, and the two yard line for a safety. That made the score 19-0, and in favor of the North Quad.

The final score 23-14. The South Quad had 241 yard total offense with Tech. The South Quad had 124 total yards with 3 points.

Coach Phil Volpe remarked after the game that much of the success was due to Pete Johnson who coached the defensive line and linebackers, and Lenny Lacher. Coach Volpe stated that the reason the South Quad was able to control the game was because "the team played with intensity and emotion and that these two qualities led to the win. We played with a lot of emotion."

By saying, "they (the North Quad) played a great game."

Harrells encounter setback

by Gregory Solman
Sports Writer

Coach Joe Plane, reflecting on the Irish harriers' last two upsets in this year's Big Ten schedule, said, "If we're going to have bad races, let's have them now in order to win our first game in the Conference." The Irish harriers are the ones to watch, and those races were the best times to have them.

The wishbone is the purest of the option offenses. Defensively, the pass game is the key to stopping the Irish. The key to stopping Tech will fall heavily on the play of Georgia Tech's running backs, but unfortunately for Griffin, they were not able to stop the pass rush. The final stats showed the North Quad with 241 yard total offense with Tech. The South Quad had 124 total yards with 3 points.

Strategy

Repetitious words and the sweat is want are to taste the sweetness of vengeance this weekend as the Ramblin' Wreck of Georgia Tech comes to town.

Last fall in Atlanta it was Pepper Rodgers' squad, with a 23-14 upset victory over the Irish, that kept Dan Devine and his squad from the promised land. It is the game that needed for an expanding athletic program and playing in a prestige MacA fee. Heavens is on his way to a 1,000-yard season and MacAfee may find himself up for All-America teams at season's end. Quick, agile and big at 6-3, 220, Sanford is the Tech defensive leader captain and spearheads their defensive effort. At the other linebacker spot, called the "quick" linebacker, is Mackel Harris who aids Sanford in patrolling the area with under-utilized receiver.

score of 17-0. The South Quad received the ball to open the third quarter of play and scored a touchdown in an impressive manner by taking the ball in for a 9-yard touchdown. The game came on another brilliant run by Mike Calhoun for 9 yards. The two point conversion was good on a run by Mike Fasler (Kent Southeast), and it was 21-0.

After the ball changed hands the South Quad once again got on the board. The score was 17-14, and it was 21-14 at the end of the first quarter. The extra point attempt failed and that left the score at 21-14. The quarter ended with this score.

Although the game saw no more scores there were several exciting plays that happened. The first was an interception of a South Quad aerial by Frank Hopke (Heavens) that led to a South Quad opportunity. The second big play was an interception by Jim Ziede (Gardz) of the North All-Stars at the 39-yard line. The game ended with this score.

The defensive line has been jelling of late and a little added incentive produced by those scouts look their way. Georgia Tech has a talented squad and this is how defensive effort. At the other linebacker spot, called the star, is Mackel Harris who aids Sanford in patrolling the area with under-utilized receiver.

When the Irish are on offense: In their last two outings the revamped Irish offensive attack has posted 92 points on the board. Truly a multiple-offense, the Irish attack has developed around the running of John Heavens as was in evidence on his 49-yard jaunt against Navy. The Irish offensive line seems more together and more effective with the versatile set behind it. Tackle Steve McGlory and Tim Duits have been effective paving the way for Heavens and the running game. Good blocking has helped the Irish offensive line this year.

The Irish appear to be rambunctious in an unstoppable manner to a slowdown with a high-level of blocking. Speculators are ordering plane tickets to Dallas in anticipation of a National Championship, and against Notre Dame, an once-beaten Oklahoma in the Orange Bowl with the national title to the winner.

But, those games will be held eight weeks from now. In two days a 5-3 Georgia Tech squad will be looking for the upset that will propel them to the Bowl with a 6.3 yard average. Gary Lanier however, is Drew Ziegler's up right. The Georgia Tech offense was led by the running of Joe Montana to the nose. Joe Mackacek, Dan McCaffrey and Joe Montana to the backfield. The extra point attempt was made, and the score at 21-14. The quarter ended with this score.

The North Quad offensive line did a good job of keeping a line of scrimmage as the backs consistently got yards for a yard. An offensive line was played on three plays by Frank Hopke and Ken Dike. The South Quad's offensive line also was impressive in the third quarter, and this is how the game played out.

The game began with the South Quad driving the ball to the North Quad 27-yard line. The game was 17-0, and in favor of the North Quad. The South Quad's one man offensive set wasn't enough, and the North Quad drove the ball to the safety, and promptly scored a touchdown. The game was now 21-0, and in favor of the North Quad.

After several series of exchanged punts the North Quad once again got on the board. This time it was the South Quad which gave them the points. On fourth down the South Quad mounted a drive from the one yard line. The snap from center captured from the North Quad, and the two yard line for a safety. That made the score 19-0, and in favor of the North Quad.

The final score 23-14. The South Quad had 241 yard total offense with Tech. The South Quad had 124 total yards with 3 points.

Coach Phil Volpe remarked after the game that much of the success was due to Pete Johnson who coached the defensive line and linebackers, and Lenny Lacher. Coach Volpe stated that the reason the South Quad was able to control the game was because "the team played with intensity and emotion and that these two qualities led to the win. We played with a lot of emotion."

By saying, "they (the North Quad) played a great game."

Harrells encounter setback

by Gregory Solman
Sports Writer

Coach Joe Plane, reflecting on the Irish harriers' last two upsets in this year's Big Ten schedule, said, "If we're going to have bad races, let's have them now in order to win our first game in the Conference." The Irish harriers are the ones to watch, and those races were the best times to have them.

The wishbone is the purest of the option offenses. Defensively, the pass game is the key to stopping the Irish. The key to stopping Tech will fall heavily on the play of Georgia Tech's running backs, but unfortunately for Griffin, they were not able to stop the pass rush. The final stats showed the North Quad with 241 yard total offense with Tech. The South Quad had 124 total yards with 3 points.

Strategy

Repetitious words and the sweat is want are to taste the sweetness of vengeance this weekend as the Ramblin' Wreck of Georgia Tech comes to town.

Last fall in Atlanta it was Pepper Rodgers' squad, with a 23-14 upset victory over the Irish, that kept Dan Devine and his squad from the promised land. It is the game that needed for an expanding athletic program and playing in a prestige MacA fee. Heavens is on his way to a 1,000-yard season and MacAfee may find himself up for All-America teams at season's end. Quick, agile and big at 6-3, 220, Sanford is the Tech defensive leader captain and spearheads their defensive effort. At the other linebacker spot, called the "quick" linebacker, is Mackel Harris who aids Sanford in patrolling the area with under-utilized receiver.

When the Irish are on offense: In their last two outings the revamped Irish offensive attack has posted 92 points on the board. Truly a multiple-offense, the Irish attack has developed around the running of John Heavens as was in evidence on his 49-yard jaunt against Navy. The Irish offensive line seems more together and more effective with the versatile set behind it. Tackle Steve McGlory and Tim Duits have been effective paving the way for Heavens and the running game. Good blocking has helped the Irish offensive line this year.
