Michigan raises drinking age

by Mike Shields
Staff Reporter

Based on the early returns it seems that Michigan voters passed the proposition raising the state's minimum age for purchasing liquor from 19 to 21.

The proposition will automatically become law on Dec. 22, 45 days from today. The new law is required by the state constitutional amendment.

Senator Charles O. Aslan (8 Niles) of Michigan said in a telephone interview yesterday that the referendum was the result of complaints received by the Michigan legislature from the public about drinking and a "dramatic" rise in alcohol-related traffic involving young people.

Zollar explained that the new proposal would have prevented 18-year-olds, many of whom are still in high school, from buying alcohol for younger friends.

"It would certainly be more rational to probably reduce the drinking age to 19," said Ellen Dorney, president of Badin Hall. As a result of the discussion, the head of Badin Hall. As a result of the discussion, the head of Badin Hall was pointed out that lottery campus. Both proposals were

held an alcohol abuse conference. The proposed lottery included the

APF - Among incumbents assured of re-election to the Senate was Democrat John Brademas, who won an 11th term handily over Republican Thomas Thurston, the same man he defeated two years ago. Brademas, third-ranking Democrat in the House as majority whip, had been considered a possible GOP target earlier this year until he learned the wrongdoing in accepting-and legally reporting-more than $5,000 in campaign contributions from South Korean businessmen Tong- sun Park and others.

With 99 percent of the precincts reporting Brademas defeated Thurston 62,836 to 58,551 or 56 percent to 44 percent in their third district race.

In other major Indiana races, Republicans swept to victory.

In Michigan, Republicans swept to victory.

Democrats swept to victory.

By Kathleen Connelly
Senior Staff Reporter

Dean of Students James Roemer has reported that blatant abuse of alcohol and illegal drinking at home football games has decreased sub­

stantially this season. Roemer indicated that reports he has received and from his personal observations, apparently both students and nonstudents are drinking less in the stadium.

"From the press box," Roemer commented, "I have a bird's-eye view, and I have seen far fewer incidents of serious alcohol abuse this year than in the past." The decrease is attributed to the "fantastic response of the student body to the concern about drinking in the stadium," Roemer noted.

Interestingly, students have been requested to pass out in the stands and being left there following games as examples of such abuse.

Roemer also noted that, while drug tests were taped off, alcohol-related problems in the stands have not been eliminated entirely. As an example of such persisting problems, Roemer said, the police arrested a student during which a girl was injured while being "passed up" through the stands. Another potential hazard arises from cans and bottles that are thrown by intoxicated fans.

SMC launches 'College Career Days'

by Lisa Follas

Saint Mary's launched its 1978 "College Career Days" with a lecture by two alumnae on the benefits of a liberal arts education. Carol Weber and Denise Cavanaugh, liberal arts majors who grew up in Chicago together and continued as roommates at Saint Mary's, discussed the different paths their lives took after graduation in 1964. Cavanaugh operates Cook-Cavanaugh Associates, an organizational management consulting firm for women. She lectured on career opportunities in the working world for liberal arts majors and the business world's view of these graduates.

She cited certain basic skills as being highly important for a liberal arts major in the working world and in personal life. Learning to develop decision making, problem solving, forecasting, planning and communication skills is extremely crucial to the success of a liberal arts major, Cavanaugh said.

Cavanaugh also discussed some of the characteristic stereotypes that women in the working world must face. She claimed that a liberal arts education enables a woman to incorporate such "womanly" virtues as being emotional, dependent and detail-oriented with the more "manly" virtues of rationality, initiative and risk-taking.

"The real need is to hang on to the core of who you are. This is the result of your liberal arts education," Cavanaugh noted.

Weber dealt with the family-oriented domestic alternative for a liberal arts graduate. She maintained that motherhood, a full-time job with many rewards and many problems, can also include a part-time career. While her husband was in law school, Weber worked full-time.

Over the ears, Weber has worked as a full-time high school English teacher and a part-time newspaper reporter. She still finds time for several community activities, particularly the League of Women Voters.

Weber went on to say that a full-time working mother must learn how to handle the criticism directed at her by society. It is possible, she asserted, to be a mother and have a full-time career.

However, one must be highly motivated, organized and realistic about the demands which will be made in both areas of her life.

Both women asserted that a broader image of the future must be taken when a graduate starts looking for a job. This task is only the first of many decisions a woman will have to make in life, Cavanaugh stated.

Although a liberal arts education might not seem extremely helpful in securing a job right after graduation, it ultimately will pay off in the working world as one develops basic skills. Cavanaugh commented. Besides contributing mental health, a liberal arts education can be of economic value. It is an investment in the future, she added.

INTENSIVE CARE VS. THE MENTALLY ILL: THE CASE FOR EUTHANASIA
Hesburgh discusses policies

by Rob Powne
Staff Reporter

"The University is not investing in any banks that lend money to the South African government," University President Fr. Theodore Hesburgh told a crowd of 100 in Kenan-Stanford Chapel last night.

Hesburgh discussed the University's investment policy, as well as the proposed new women's dorm, coed dorms and Notre Dame-Saint Mary's relations, at the forum which was sponsored by theStanford Academic Commission.

Hesburgh, a board member of Chase Manhattan Bank, said that, in 1977, Chase Manhattan became the first bank to adopt officially the policy of refusing loans to the South African government.

Hesburgh said that he spent two weeks in South Africa last summer working to reform the university's policy of refusing loans to the South African government.

Hesburgh said that the passage of the Civil Rights Act of 1964 has not yet been decided, Hesburgh said that he told those South Africans whom he met on his expense of converting men's halls, Notre Dame's tradition as a men's school and the greater generosity of men alumni.

Hesburgh said that the trend toward coed dormitories on college campuses has Beyond off. He pointed out that Princeton is offering single sex housing for the first time in several years.

Hesburgh also commented on the importance of Notre Dame's social relationship with Saint Mary's. "Women should associate with Saint Mary's women," he stressed.

He also discussed the importance of Notre Dame's social relationship with Saint Mary's. "Women should associate with Saint Mary's women," he stressed.

Hesburgh said that he writes directly to those companies which have plants in South Africa, "keeping an eye on them" and recommending that they recognize black laborers.

In response to a student's question, Hesburgh stated that he plans to enroll 500 more women at Notre Dame, but that a quota system would be maintained. He explained that some of the reasons for keeping a quota were the expense of converting men's halls, Notre Dame's tradition as a men's school and the greater generosity of men alumni.

A few years ago, the president of Bryn Mawr (a women's college) had to practically kill himself to raise twenty million dollars. Hesburgh offered as an example.

The architectural plan for the proposed women's residence has not yet been decided, Hesburgh said, "because students keep changing their minds." The first plan for another high-rise hall was approved by students in one survey and then disapproved in a later survey.

"I doubt we will have coed dorms," Hesburgh said in reply to another student-raised question. He pointed to single-sex dorms as having "the best of both worlds," offering "privacy and allowing students to visit each other better than half of each day.

Offering reciprocated

Dear Editor:

According to J. Erle Bauwens in the Notre Dame communal summer meeting, \( X \) was true.

[Continuation of the text]

Tickets needed

Dear Editor:

This Friday, November 11, the ND-SMC Council for the Retarded, Big Brothers-Big Sisters, and the Notre Dame-Community Center are planning a project to take approximately 300 mentally handicapped or underprivileged kids to the Notre Dame-Fisher Football game. A trip to the football game is a tremendously fun and good experience for the mentally handicapped kids and adults. We often end Saturday Retirement at Legion Center by singing the ND fight song, and the spirit and enthusiasm that the kids have for the team is unmatched. Last week the retard- ed worked on noontime and a banner with which they hope to cheer the team on this Saturday.

A football game is an event in which a community shares a common purpose and understanding. The mentally handicapped people are very much a part of the South Bend community, and they offer much to the spirit of the ND-SMC. An opportunity to see the football game will make this weekend a very special one for the retarded.

Student ticket contributions are needed to get the kids into the game. With your ticket, a mentally handicapped or underprivileged child can go to the game Saturday, and have a very good and special time.

ND-SMC Council for the Retarded

A question of effectiveness

Dear Editor:

In the wake of two potentially disastrous conferences regarding residents in Fisher Hall, some students feel it is not necessary to pay such fees as the ND-Security's handling of such calamities. In the first case above, the security guard took the time that he did because he was tending to a person who had stolen a bike. Is this more important than getting a guy that had an accident over in pain to the hospital? Clearly, some priorities must be considered.

Fortunately the two students involved in these cases were not beyond treatment. But, if security continues to take as long to arrive on the scene of such accidents, the day will arrive when they will reach their destination too late. When they do find themselves headed toward legal actions because of this, they will then regret their decision. Something must be done about the operations of the security force.

To avoid fire hazards

ND halls clean out chimneys

by Kathy Rosenthal

"Bryan's Soothing Sweep" is cleaning out the chimneys of Alumni and Dillon Halls, which, according to John Michalski, director of Maintenance, "have not been cleaned for as awfully long time, at least as far back as 1967."

These chimneys are badly in need of sweeping. If the soot caught fire, your dorms would instantly become flaming volcanoes," said chimney sweep Pat Bryan, adding, "Chimneys should be swept every two years if they are used frequently."

Michalski agreed, "If the chimneys had remained unswept they would have had high potentials as fire hazards."

Bryan said that Alumni's and Dillon's chimneys are the tallest ones he has ever swept. Had the chimneys been any taller his brooms would instantly become flaming volcanoes," said chimney sweep Pat Bryan, adding, "Chimneys should be swept every two years if they are used frequently."

Michalski agreed, "If the chimneys had remained unswept they would have had high potentials as fire hazards."

problem," he commented.

However, as a result of concern expressed by hall staffs and students, Roemer has issued a recommendation to ACC officials, suggesting that the University stop selling alcohol at the Tip Off Club which operates during basketball games and Blue Line Club at hockey matches.

"It is the position of the Office of Student Affairs that the University should not be in the business of selling alcohol during sporting events," Roemer said, adding that it is inconsistent to prohibit smoking during the football games and allow it at basketball and hockey matches.

members, many of whom expressed their doubts that any type of program along the lines of the one I suggested would be successful.

"Are we doing this just to satisfy someone above us?" Donney asked, adding, "In my dorm (Badin), I can't think of anyone who really has a serious problem."

DeGrande stressed that "there was no pressure from above."

Peggy (Cronin, alcohol and drug counselor for the Notre Dame Psychological Services Center) and Andy (McKenna, student body president) released the proposal to

Jayne Rizzo (Student Judicial Co-ordinator) and me. It seemed like a good way to address the problem."

"It's a pervasive problem. There are a limited number of ways we can deal with it. We thought this would be the best," DeGrande added.

Jose Morrocco, Pangborn hall president summer up the HPC's consensus about the issue by commenting, "This approach seems to be so superficial. Why can they come up with money for the conference, which makes a good appearance, but not for any of the social space problems? We're not attacking the roots. The real roots are the lack of social space and LaFortune (renovation). Maybe the money could be better spent that way."
