**Perrucio fund collects over $3000**

By Roger Wake

Report Staff

Over $1000 was collected across the campus for the Ton Perrucio fund which will help the Perrucio family defray medical costs, the Hall Presidents' Council announced last night. Over $1700 was collected for the fund during half masses on Sunday.

In other HPC News, Don Murray, former Student Senate president, handed out questionnaires for the HPC to distribute as a part of a project to evaluate the social life at Notre Dame. According to Murray, 300 questionnaires are being passed out to a random sampling of students, faculty and administration personnel. The surveys will be sent to the University of South Carolina for professional evaluation.

Dieding says the questionnaire is a standardized type distributed through colleges and universities across the country and will help compare Notre Dame social life to that of other campuses. The surveys should be turned in to the library or sent through on-campus mail by Friday, April 23.

Also in the meeting, Tim Satler asked the council to help conduct a survey evaluating Notre Dame's attitude toward alcohol abuse. The survey will inquire about the personal drinking habits of the students and their thoughts on the drinking habits of the students around them. The survey is meant to help Psychological Services, the administration, and the students have a more complete understanding of alcohol use on campus.

---

**Women's Lectures**

**Flaherty's speech ends Women's Lectures**

Sr. Helen Flaherty, President of the Sisters of Charity of Cincinnati will present a speech "The Person As a Woman: A Christian Perspective," tonight at 8 p.m. in the Library Auditorium.

Flaherty will speak as the final lecturer in Notre Dame's "Distinguished American Women" series, celebrating 10 years of cooperation with the National Leadership Conference of Women Religious and was the only woman member of the National Evaluation Team for Jesuit Theologates in the U.S. in 1979. Flaherty has also organized various major retreats and is presently a member of four religious boards.

Sr. John Miriam Jones, co-chair of the lecture series, said "Sr. Helen Flaherty will fittingly close this 'Distinguished American Women' series, which has provided such excellent exposure to remarkable women. Both her presence and what she has to say will be no exception, She is her own best message."

**El Salvador**

**Hesburgh continues to outline journey**

**Editor's note:** The following is the third in a series of excerpts taken from the diary of University President Theodore Hesburgh during his recent trip to El Salvador as part of the United States official observer team for the Salvadoran elections.

**Saturday, March 27**

We went back to the hotel where we had a real Notre Dame lunch. We began with alcohol abuse. The survey will inquire about the personal drinking habits of the students and their thoughts on the drinking habits of the students around them. The survey is meant to help Psychological Services, the administration, and the students have a more complete understanding of alcohol use on campus.

Rolando Duarte, the brother of the President, and Armando Palomo and Ernesto Sol, whom I mentioned yesterday, later, as the Marichi band started up, we were joined by the President of the Juana and my former student, Napoleon Duarte. I must say that all of the eyebrows were raised as he walked into the room and gave me a big hug. As usual, he had his own guard, a captain in the Army, who was staying very close to him, also hand on butt of gun. It was also interesting to note that while most of these students have varied political views, they are, as Notre Dame men, very close to each other and very cordial with each other. Somehow when we all sit down together, the political differences seem to fade away. That's nice to see, and not unlike the nature of a university where people can disagree without being disagreeable.

Following lunch, I take off for the airport where I am meeting San Salvador’s Acting Archbishop Bishop Rivera y Damas, appointed when the former Archbishop Romero was murdered while offering Mass in a small chapel. It was obviously a professional job, apparently planned by the Right. Before coming down here, I had Bryan Hehir of the U.S. Catholic Conference, the advisor to the Bishops on all international affairs, cable Bishop Damas to tell him I was coming and to expect to hear from him when I arrived here. I found out that he was at a meeting of the Carreras International Airport. I also learned that he was returning to San Salvador after about 2:10 from Costa Rica and would only be in town a few minutes before leaving for his Diocese of San Salvador de Gracia, which is about fifty miles from here. It seemed to me that the best time to meet him was to catch him at the airport so that we could talk from the airport back to town which is a good hour’s drive. I also had the good fortune of finding out from my companions, Monsignor Freddy Delgado and Bishop Marco Rivelo, Bishop of the western Diocese of Santa Ana who is the candidate of the more moderate bishops to be the new Archbishop of San Salvador. I would believe that the Pope or the President would side would rather have Bishop Rivera y Damas, but it is up to the ecumenical council and they haven’t done so, even though more than two years have passed since the killing of Archbishop Romero.

It was interesting going downhill to the airport, along the same road we took when arriving. By now, I’m a little more at home riding in an armored car and I could almost go out ahead riding shotgun. We arrived at the airport and while we were there, I managed to get the whole story of the three sisters and one lay religious worker murdered here. It’s a very gruesome story and one that I

**Palestinians suffer too Hussaini argues**

By SONYA STINSON

Staff Reporter

The only alternatives for Middle Eastern peacemakers is a peaceful coexistence of Jews and Arabs in a "secular democratic state" or the establishment of an independent Palestinian state, said Palestinian Information Office Director Hemet Hussaini in a lecture in the Library Auditorium last night.

"The Palestinian people are victims," Hussaini said. "They have been destroyed as a nation. They can neither issue a birth certificate for a child nor get born but a child. They no longer have a child. They are destroyed as a nation."

The Palestinians should not be afraid to criticize the establishment, Hussaini said, and they should not be afraid to challenge the West in the Middle East. "That's nice to see, and not a stand against the establishment of terrorism. There is a difference between criticizing the establishment and anti-Semitism," he stated.

Hussaini denied that the PLO is a terrorist organization, saying their fight is a "struggle for freedom."
A highway inspector who was injured when an east Chicago bridge ramp under construction collapsed last week filed a $15 million damage suit Tuesday. The unfinished bridge on the Clune Avenue Extension project in East Chicago was collapsed last Thursday, killing 12 men and injuring 17 others. Frederick Torrijas, 22, of Michigan City entered the suit in Cook County court. Circuit Court andreducers from Midwest Steel Erection Co. of Chicago, Superior Construction Co. Inc. of Gary, Ind., and Fugger and Nelligan Engineers Inc. Inc. of Chicago are defendants. The suit accuses them of negligence and willful and wanton misconduct, and it claims repairs of the collapsed concrete, into which a test witness said the bridge started swaying and cracking shortly before the first section fell. The cause of the collapse is being investigated by several agencies in Indiana. (AP)

AUTHORITIES HAVE A "Prime suspect" in the Roofop Murders of three CBS employees, but he is not the man being held in Kennebunk and believed to own a van linked to the slayings, District Attorney Robert Morgenthau said yesterday. Morgenthau was the first law enforcement official to reveal the existence of a particular suspect in the murders, but he would not identify the man. Morgenthau said Donald Nash of Kennebunk, N.J., also known as Donald Bowles, appears to own a van that was sighted at the abduction of a woman from a rooftop parking lot on a Hudson River pier in Manhattan. The three CBS employees who tried to help her were killed by a gunman, and the woman's quarters were fraud investigation - was later found dead. Police descriptions of Nash do not fit those of the gunman. A prosecutor from Morgenthau's office and police detectives flew to Kennebunk yesterday to talk to Nash, who agreed to return to New York to face a charge that he fled sentencing on a taxacious license forestry conviction. (AP)

AUTHORS JOHN UPDike and Tracy Kidder won the 1982 American Book Award for the same works which earned them Pulitzer Prize Awards last week, announced Book Award-Chairman Thomas Guinzburg. Kidder won the book award in the hardcover fiction category for "Rabbit in Rich." This award-winning book continues the adventures of Rabbit Angstrom, the hero of This award-winning book continues the adventures of Rabbit Angstrom, the hero of "Rabbit, Run" and "Rabbit Redux." Tracy Kidder won the award in hardcover General Nonfiction with "The Soul of a New Machine." This book is story about people who build computers. (AP)

REAGAN'S STATEMENT on the budget negotiations was his most conciliatory to date and marked the first time that he took to limit his hard line on tax increases to those affected the most. Reagan said, "I have always been of the opinion that what I am talking about is that tax programs are designed to provide incentives," Reagan told, when asked what he would do about any tax increase. Budget negotiators are discussing tax increases that would include a four percent income surcharge levied on the richest taxpayers and possible levies on oil and energy usage. (AP)

PRIME MINISTER MARGARET THATCHER today rejected an Argentine plan for averting war with Britain over the Falkland Islands. She told the House of Commons that "the Argentine proposal falls short in many important respects" of what Britain would deem an acceptable solution to the crisis. She did not disclose details of the Argentine plan. Although Thatcher tactically rejected the proposals presented, she said that Britain considered it "a stage in the negotiating process which must now be continued. We are examining the propositions very closely." (AP)

LITERARY CONTEST winners were announced April 19 and each of the contest categories will be awarded on April 27 at 7:30 p.m. in 331 O'Shaugnessy. The winner of the Samuel Hazo Poetry Award was sophomore David Germano. Other poetry award winners were first place Carol Losi, senior, and Honorable Mention, Laura Martin, sophomore, of the Ernest Sandeck Poetry Award; and Elizabeth Dickson, senior, of the Associated Students Poetry Award, who won both the Academy of American Poets Prize. First place for the Richard T. Sullivan Award for fiction went to junior John Burbridge and second place went to seniors Sean F. F, Purnell and Anne N. Barsanti. The John T. Frederick Prize in English went to junior Philip Fowler. -- The Observer

WEATHER will be clear and cold today with a high of 43. Tomorow, sunny and warmer with a high of 55. -- The Observer

Count your blessings

As graduation draws near for most college seniors, it's not a bad time for us soon-to-be- alumni to stop and evaluate the adversity we have had to deal with during these last four years, and, more specifically, the last nine months. It is easy for many of us to moan over the various complications which have touched our college days. The problems are many:

- I've been expelled by three small schools, but I still haven't heard from Harvard.
- "Should I go to grad school or take a job in the real world?"
- "Should I get married now, or wait until she has her degree?"
- "Or maybe I'll just drop out?"
- "I'm close to flunking Art Tracks. I may not graduate. Mom will die."
- "Fourteen rejections!! What am I going to do with my life?"

Many May graduates at present are facing similar problems. What is it that makes a person able to deal with such catastrophe, and, no matter how bad off you think you are, someone else has it worse.

Consider the case of a student trying to keep her or his mind on school while mother or father or some other loved one is losing a battle with some terminal illness. These days it seems like everyone either is in that situation or is close to someone who is. It's an emotional and even physical drain that has its toll on dozens of members of this community.

Consider this scenario. A summer school student receives a call from home - some sudden, some terminal illness. These days it seems like everyone has to deal with over the last four years, someone else has it worse. It's an emotional and even physical drain that has its toll on dozens of members of this community.

After driving through the night, Mom greets him at the door with a hug. "You're an impulsive little son of a bitch, but I love you for it."

After her surgery, the chemotherapy begins - and does her biweekly torture. Half a country away, all she can do is worry... and work toward graduating.

The first semester comes and goes. After his last final, it's time to relax, enjoy a cold beer and, in that good night's sleep and wait for the ride home in the morning. The phone rings. It's his sister.

Non-quantifiable costs include as a result of hunger and starvation a nourished infant will survive from a year. The IMR is used with the less per year. The IMR has ended (as a basic issue) that country. Among the countries that have and have not eliminated hunger, the IMRs are respectively, 75 to 125. The Ending Hunger Briefing also revealed that the majority of the world's hungry, over 90 percent, are concentrated in the Indian subcontinent, Africa, East and Southeast Asia, the Middle East, Latin America, and the Caribbean region.

With an IMR of 15, the United States does not categorize hunger as a basic national issue. Yet, hunger is confined to particular groups and individuals such as the American Indians on reservations, the elderly, some Black communities, and migrant farm workers. Food programs, such as food stamps and free meals in schools, have dramatically alleviated the hunger problem in the United States within the last 15 years. The hungry most often find themselves in circumstances of poverty though low income is not necessarily the cause of the hunger situation. For example, Sri Lanka is classified as a poor country, but is considered a nation that has eliminated hunger as a basic issue. Even with a good IMR, the statistics only reveal what the vast majority, is doing.

Many deaths, resulting from one of the four forms of hunger and how they are manifested, the Martins discussed. Hunger is measured as undernutrition among populations. The hungry are those who go hungry. Every year alone, 15-20 million people die as a result of hunger. Ninety percent of these die from hunger, while ten percent or fewer die from starvation (starvation is defined as hunger as associated with famine).

There are 37 countries which conducted a two year study on the worldwide hunger situation, along with historical highlights, statistical data, measurements regarding population and hunger, and possible solutions to the growing dilemma.

A recent study estimated (according to its IMR of 42) a nation of over one million, 850,000+ people to be undernutrition in the last 15 years. The 1977 report by the National Academy of Sciences, which conducted a two year study on the worldwide hunger situation, along with historical highlights, statistical data, measurements regarding population and hunger, and possible solutions to the growing dilemma.

Three quarters of the hungry live in areas, where they are landless laborers or tenant farmers. Those who own land often do not have necessary access to credit and technical support to be productive. The other 25 percent of the hungry population dwell in urban slums, ghettos, and shantytowns.

For people in 50 countries, with a population of over one million, hunger has ended (as a basic issue) according to a variety of methods relating to differences in climate, economic systems, political systems, and agricultural techniques. Martin says, "There is no one way to end hunger.

To end hunger on this planet, an estimated $25 billion per year, for 20 years, is needed. This accounts for only 25 percent of the Gross Planetary Product (about $105 billion), which is less than 80 per person per year. In the world, for $1.5 billion, children deaths due to hunger could be prevented, according to UNICEF. Cots to allow the hunger situation to prevail include: $5 billion a year in international food aid, $12 billion a year in US food stamps, over $20 billion in food stamps outside the US, and $1 billion to support hungry refugees.

Non-quantifiable costs include medical expenses, nutrition feeding programs, plus an overwhelming influx of people from rural to urban areas for employment purposes. In summary, elimination of hunger would be comparatively less to finance than to allow to persist.

Saint Mary's installs fire hydrants

In an effort to improve the fire prevention system of Saint Mary's College, fire hydrants are being installed outside of the Marlow Hall. The hydrants are being placed by the southeast and northwest corners of the building. "This is just a general upgrade of the fire prevention program," said Director of Public Relations Anne Reed.

Dr. Zing to appear Friday

Chautauqua officials have announced that Dr. Zing and the Mojo Handlers will appear Friday evening at Chautauqua. The Antotal schedule booklet currently lists the concert in today's festivities.

SAINT MARY'S COLLEGE CAMPUS MINISTRIES

COMMUNICATION ARTS AT NOTRE DAME

Practical skill-oriented communications courses designed for teachers and for prospective professionals. M.A. may be acquired in four summers, or in two summers and the connecting academic year. Also open to non-degree students. 11 day session from June 22 to July 6. 22 day session from July 7 to August 5. Courses also available for entire 33 day period. Special feature of 1983 session: All-Day Workshop on Writing and Designing Publications. Other 1982 courses include: Looking at the Visual Arts (Painting and Photography, Film, Theatre, Architecture), Prose Writing, The American Film, Television Production, Advertising and Promotion, Photography, Independent Projects, Design, Mass Media, Slide/Sound production and Promotion, Public Relations, Literature and Journalism. Write:

Prof. Donald P. Ostello, Chairman
Department of Communications Arts,
University of Notre Dame,
Notre Dame, IN 46556.
immediately after arriving in San Salvador, so this was my only opportunity for a good talk with him and his companions.

We conversed for an hour en route, all in Spanish, which seems to get better the longer I try it, even though I am completely shameless and almost ignorant of grammar. It really doesn't matter as long as you can say all you understand everything that is being said to you. I was pleasantly surprised to find how optimistic the Bishops were about the election coming up tomorrow. They are sure the people are going to vote with their feet and somehow tell the world that this country can stand up and freely vote itself a better life. They certainly deserve it after these years of agony. Bishop Rivera y Damas thought that the Christian Democrats would probably get a majority vote.

We talked about many other things, including a new Catholic university that the hierarchy wants to build here in Salvador to train leadership in the years ahead. I told them many things about Notre Dame, and they promised to come and visit us to see how it is done. I think they are impressed by the quality of Notre Dame alumni here and how they are all taking positions of leadership with good Christian responsibility and a sense of social justice that does not exactly permeate this society. Many subjects later, we arrived in town and delivered Bishop Rivera y Damas to his Salesian House from which he is leaving for his diocese up country, and then dropped off the other two, at which point our car gave up the ghost. We returned to the Hotel Presidente in the jeep and sent someone out for our companions who were stranded.

Back at the hotel, I ran into Joe Sullivan and Congressman Jack Murtha. We talked about the assignments to view the voting all across the country tomorrow. We hope to fan out in all directions. It seems that the most difficult assignment is to the west which is the part of the country that is mostly dominated by guerrilla groups. All of the other groups will go in armed cars, but for the eastern assignment there is only one way to get there and that is by a large helicopter (a Huey, which can take about 14 people, and therefore include a few rifle men). No one has too clear a picture of who is dominating in the eastern region at the moment and whether or not voting will be allowed to take place because of the threats from the guerrillas. Our delegation feels it would lack all credibility if we covered all of the other parts of the country, however difficult, and did not go to the east, which is really guerrilla country. They don't want to go there in an armored car because of road blocks and possible shootouts, but they do think they might get through in a helicopter and then take their chances. We will need two volunteers for this particular trip and since Congressman Murtha, a Marine officer from Vietnam and a very large and strong fellow, has already volunteered to go, I told them I would be happy to accompany him. They still want to check it out with security at the Embassy, but that's where we stand at the moment. I have suddenly become quite popular because they all say no matter what happens, if I'm with them, at least they'll get the Last Sacraments. I always smile at this because I wonder who takes care of me, and I guess the only answer is the Lord.

Coeducation: large strides taken, but job incomplete

By SONYA STINSON

After ten years of coeducation, the traditional image of Notre Dame as a "male bastion" has been to include the women who are participating more and more fully in campus life, but we still have a long way to go in building social relationships, say students and administrators.

"I don't think that there are other campuses that have similar problems," said Jim McDonnell, Director of Student Activities. "On reason Notre Dame students might have more problems than students on other campuses is the lack of space for social activities. McDonnell said. Former Student Body Vice President Tara Kenney helped to present the proposal for a new student center as an answer to the need for social space.

"We took a look at the social alternatives on campus and there weren't too many," Kenney said. She said that most students do not view Lafayette as a place to gather socially.

McDonnell added that "People don't perceive Lafayette as a student center, and they certainly don't perceive it as a place to meet people." He commented.

McDonnell said that a Student Activities survey shows that students want facilities for activities that would bring people together. They have suggested a bowling alley, game rooms, a movie theater, and a place for eating places, "something with a decor more masculine than the Huddle," McDonnell said.

More social space might help make a better social life possible for Notre Dame men and women, but McDonnell said it is not enough. "You can put up a new building and it might get people together; but attitudes will still need to change. Anybody who thinks putting up a building will solve problems in the future is being unrealistic," he said.

Another concern which ties in with the problem of social space is that Notre Dame students don't date much. "I hear students complain that there is no place to take a date," McDonnell said. And there's not much excitement in having a bag of popcorn at the Huddle.

Another reason for not dating is that some students prefer to concentrate on academics."A lot of students would like to defer any sort of involvement until they get their degree," Fr. Greg Green, Assistant Vice President for Student Affairs said. Kenney added, "You have to make sacrifices and the easiest sacrifice to make is to give up the social life. Here you can't really accommodate all your social needs if you want to be successful."

Part of the problem is shyness and lack of confidence. McDonnell said. "How do you convince a guy that it's not so bad to ask for STRIDES, page 8

ND-SMC

Women's relationship: limited but changing

By MARGARET POSMOE

and MARY AGNES CAREY

Saint Mary's News Editors

After ten years of women at Notre Dame, one would think that a stereotype of Notre Dame as a 'man's school' is non-existent. Surprisingly, this is not the case. The traditional image of Notre Dame as a 'man's school' persists.

"There's a bit of a backlash rivalry" between the schools, which he feels is "healthy for both schools."

Roemer said the building of the new Alumni/Senior Bar this summer will aid in developing the relationships between the women. He feels the present Senior Bar provides the proper air for socializing, but that more space is necessary. b new Senior Bar will provide an additional 7,000 square feet, which will "make socializing even better," according to Roemer.

Saint Mary's Dean of Student Affairs Kathleen Rice said that, during her five years at Saint Mary's, activities (such as freshman orientation on both campuses) have been planned to bring the ND-SMC women together, yet they (ND women) are always welcome to attend any SMC lectures or other programs.

1981-82 SMC Student Body President Eileen Murphy, however, disagrees.

"ND, it seems, likes to separate itself from Saint Mary's," she stated. "I've experienced a few people in just the right, shall we say, who feel very self-sufficient. I think that's a very dangerous mistake. It's a hysterical problem, any-way," she continued. "It strikes me that there's this 'woman against woman' thing. It's about damn time we start pulling together."

Murphy also said that there is "obviously much room for improvement on both sides," yet more thought than action exists to correct the situation.

Anne Bodoh, ND Transfer Orientation Commissioner, said she believes a stereotype carried on year after year is "a good relationship between the schools."

Bodoh said she also believes the stereotype is based on a minority. "People characterize the typical 'SMC chick' based on a minority and assume it fits all Saint Mary's students. And thus in turn fuels the fire so the stereotypes continue," said Bodoh.

During her four years at Saint Mary's, Mary O'Keefe has served as a hall representative, sophomore class vice president and junior class president, and has witnessed "an overall improvement in the relationship with Notre Dame and Saint Mary's women."

"As class president, I had to get to know girls and work with them. I never had that bias, that prejudice, that stereotype against ND women. The ND women agreed that was a narrow way of thinking, O'Keefe added that one way to bring the two groups together is to publicize events for the respective classes, instead of billing them as sponsored by either ND or SMC.

Junior Nia Delone, three-year member of ND Student Government and next year's student alumni representative on the student cabinet, thinks such prejudice is just an image that is not really carried out.

"People talk a lot about it but in true relationships, it's not like that at all," Delone said. "It's taken more to heart than it should be."

She pointed out that "antagonism can happen at either college by itself. It doesn't have to be between the schools."

Delone said as the male/female ratio at ND becomes more equal, the
Five of today's women give views on coeducation

By SUSAN O'HARA
News Staff

Ten years have passed since women were admitted to Notre Dame. To commemorate this anniversary The Observer interviewed five leading women of the university: Jackie Bollass, Mary Ann Fenwick, Martha Jiminez, Tara Kenney and Shari Matvey.

"We must admit women to the university using the same criteria they use for men. Otherwise, this imbalance creates the need for women to grow as individuals," said Bollass, one of the senior class valedictorians. She would like to see the social life at Notre Dame thrive through academics.

"They must admit women to the university using the same criteria they use for men. Otherwise, this imbalance creates the need for women to grow as individuals," said Bollass, one of the senior class valedictorians. She would like to see the social life at Notre Dame thrive through academics.

"Women are encouraged to achieve in the classroom, yet when they do, are they not still feminine since achievement is primarily a masculine trait?" She adds that "we need a balance between men and women." Academically, Fenwick thinks that "we have to take too many credits per semester and ultimately you can't devote much time to any one area." She concluded that "Notre Dame can give students challenges to grow as individuals." To improve the social life at Notre Dame they must "increase the allotment of dorms." She added that "we need a balance between men and women.

"As for the university's academic programs, Jiminez feels it is "a great project." She is what ND needs to stimulate growth of coeducation. Growth of Coeducation.

With 1982 celebrating a decade of women at Notre Dame, the Observer recently interviewed the above five women on the increase in female enrollment in each college of the University. Total enrollment of undergraduate women who have declared majors has increased from 365 in 1972 to 1989 women in the fall of 1981.

Women profs more than double since '72

By VIC SCIULLI
News Editor

The University of Notre Dame employed a total of 794 faculty members during the 1980-81 school year. Ninety-eight of these were women. The 12.3% ratio is nearly double that of 1972, the year women were first admitted as undergraduates, when 48 of the 728 faculty members were women.

A total of 159 full professors were on the faculty last year. Only three were women (Two more have been added this year). Of the total number of tenured faculty members, only 12 were women.

Although statistics for the 1981-82 are still being compiled, there are approximately 80 female professors involved in teaching and research at the University, an increase of 15 from the previous school year. Female professors currently are tenured in academic administration. This is the largest number since 1972 when Sr. John Miriam Jones S.C., currently assistant provost, was the only administrative woman.

No one is certain why there is such an imbalance between the number of male and female professors at the University. Availability of qualified women applicants is a problem in many fields. For example, only two or three of the Ph.D.'s are awarded to women.

In the life sciences, women comprise ten percent of the number of doctors. Only in education are the number of doctors equally awarded between men and women. Jones believes that the University is moving toward the point where availability won't be a problem.

The job-market has also been responsible for the low number of women in certain fields. Women with degrees in engineering and business, for example, are receiving more lucrative offers by companies. The promise of a high salary is the most common reason given by women.

Jones believes that a woman must be very determined to turn down these offers in favor of the additional educational required to teach.

Turnover rate is a problem for certain departments within the University. "Departments become highly tenured," Jones said. This problem will increase after July, when the retirement age in universities will be raised from 65 to 70. The higher age will keep currently tenured professors longer, making advancement difficult.

The University has also experienced rejection of their offers made to female professors. One reason cited by Jones is the increase in the number of professional married couples. Often, a couple is unable to move to a new department composed entirely of men.

"Notre Dame is the most major universities in the country, has an Affirmative Action Program. The program evaluates and reviews a department's efforts in hiring women and minorities. The committee can then recommend to the provost changes that must be made," said Jones.

Dr. John F. Millan, the University's Associate Provost, is the only woman on the University's faculty. With 1982 celebrating a decade of women at Notre Dame, the Observer recently interviewed the above five women on the increase in female enrollment in each college of the University. Total enrollment of undergraduate women who have declared majors has increased from 365 in 1972 to 1989 women in the fall of 1981.

The University of Notre Dame employed a total of 794 faculty members during the 1980-81 school year. Ninety-eight of these were women. The 12.3% ratio is nearly double that of 1972, the year women were first admitted as undergraduates, when 48 of the 728 faculty members were women.

A total of 159 full professors were on the faculty last year. Only three were women (Two more have been added this year). Of the total number of tenured faculty members, only 12 were women.

Although statistics for the 1981-82 are still being compiled, there are approximately 80 female professors involved in teaching and research at the University, an increase of 15 from the previous school year. Female professors currently are tenured in academic administration. This is the largest number since 1972 when Sr. John Miriam Jones S.C., currently assistant provost, was the only administrative woman.

No one is certain why there is such an imbalance between the number of male and female professors at the University. Availability of qualified women applicants is a problem in many fields. For example, only two or three of the Ph.D.'s are awarded to women.

In the life sciences, women comprise ten percent of the number of doctors. Only in education are the number of doctors equally awarded between men and women. Jones believes that the University is moving toward the point where availability won't be a problem.

The job-market has also been responsible for the low number of women in certain fields. Women with degrees in engineering and business, for example, are receiving more lucrative offers by companies. The promise of a high salary is the most common reason given by women.

Jones believes that a woman must be very determined to turn down these offers in favor of the additional educational required to teach.

Turnover rate is a problem for certain departments within the University. "Departments become highly tenured," Jones said. This problem will increase after July, when the retirement age in universities will be raised from 65 to 70. The higher age will keep currently tenured professors longer, making advancement difficult.

The University has also experienced rejection of their offers made to female professors. One reason cited by Jones is the increase in the number of professional married couples. Often, a couple is unable to move to a new department composed entirely of men.

"Notre Dame is the most major universities in the country, has an Affirmative Action Program. The program evaluates and reviews a department's efforts in hiring women and minorities. The committee can then recommend to the provost changes that must be made," said Jones.

Dr. John F. Millan, the University's Associate Provost, is the only woman on the University's faculty. With 1982 celebrating a decade of women at Notre Dame, the Observer recently interviewed the above five women on the increase in female enrollment in each college of the University. Total enrollment of undergraduate women who have declared majors has increased from 365 in 1972 to 1989 women in the fall of 1981.

Women profs more than double since '72
Women face 3-fold challenge in discovering future roles

By CAROL CAMP
Staff Reporter

"As women of Notre Dame, we are on the cutting edge of discovering what our future role will be," says Sr. Jones. "I believe that we face a three-fold challenge in the coming years being tolerable, maintaining important personal values, and being realistic." These observations, which were recently made by Assistant Provost and Dean of Women, Sr. M. John Miriam Jones, reflect the depth of her commitment to the excellence of coeducation at the University of Notre Dame. In a recent interview Sr. Jones shared her perspectives as to the future role that the University's 1,900 women will assume.

At the present time, there are approximately 1,900 women at Notre Dame. Sr. Jones predicted that "about 200 more will be added to the total student body in the near future."

With the additions of Pasquerilla East and West, 960 women were admitted to the University, raising the percentage of female undergraduates to thirty-five percent. This percentage would increase to thirty-five or even forty percent, however, "if we did not pay attention to it," Sr. Jones said.

In expressing the hope that "we will change our attitude," Sr. Jones acknowledged the importance of examining the "myth" which increases the number of female students has had on the university. "By responding to the frequent charge that women at Notre Dame do not share the same opportunities as their male counterparts," Sr. Jones expressed her view of the challenge confronting female students.

"At Notre Dame, we give a mini experience of life in a male-dominated world. The University is a training ground for what society is like. Happily, it's changing and so are we, but there's still a bit of adjustment that needs to be made."

Although no one wants to admit it, Notre Dame has served its women as a laboratory for life in the real world. Believe it or not, it's been a blessing."

Concerning the possibility of adding courses specifically designed for women to the University's curriculum, Sr. Jones said, "I am, however, a humanist who believes that people should be accepted as people, capable of their own fulfillment, without regard to some gender-oriented trait. We should not attempt to delineate the capabilities of individuals on the basis of sex. Why shouldn't women be able to come to Notre Dame for the same reasons that a male would, to acquire a top-rate education?"

In 1972, the student body of Notre Dame consisted of 6,000 students -- of that number, 565 were women (125 freshmen and 240 transfers). I believe we have come a long way since the pre-admittance chauvinistic era of those Notre Dame men. In the past, women were confronted with a narrow perspective. In more than a few cases, their mature development will be intensified in a community of education where women are present.

Although these two reasons seem to be just cause for females to be admitted to Notre Dame, they are very chauvinistic. In the first case, women are tolerated so that a course, which is not attractive to top-ranking men, can be created.

The other serves as a means to achieve a psycho-social male homestasis where the male can make himself a "well-rounded" individual realized for the real world.

There should be no differentiation between male and female students in the curriculums of academia. I have never thought of myself as an active proponent of ERA, nor have I been overly concerned about voicing the opinion of any discriminated group. I have, however, a humanist who believes that people should be accepted as people, capable of their own fulfillment, without regard to some gender-oriented trait. We should not attempt to delineate the capabilities of individuals on the basis of sex.

Coeducation risky topic for Notre Dame man

By JOE MUSUMECI

Editorial Writer

The Administration of our University seems to feel that an education is not an education, as the case may be, does not extend beyond the classroom. Men and women share the same classes, and the same meals. This is as far as coeducation goes at Notre Dame. Men and women live in different buildings; the women's dorms require a card to enter, in the building, men's dorms do not. Men have a laundry service, women have machines in the basements of their dorms.

But I think you can agree with the above statement. In fact, I have decided that a majority would consider the first two propositions much safer than the latter. There seems to be a feeling that some sort of entity exists between men and women at Notre Dame; that there is something different about coeducation at Notre Dame.

My experience seems to indicate that the difference is not in coeducation. An associate of mine remarked that the men here have an attitude problem whenever women are around. They, he felt, were bigger than the men. When people have different ideas on how to handle the problem of coeducation, then there is something different about it.

Again, after talking to several friends here of both sex, I have decided that all the hubbub about education at Notre Dame, I find, there's not really much to say about it. I will not speak of my personal problems back in the beginning years, and I am sure many have been solved, just as many others have remained unidentified and unreported. But it seems that the system of education is the major concern, not of the students involved. The University was a step toward the "real" world, but we have a long way to go to make it easier.

I was discourage for a number of men and women here, and they are (for the most part) perfectly normal young adults. They treated one another with respect, in turn, the women treated them in the same fashion, they involve themselves in deep discussions together. None of them feel coeducation.

Coeducation risky topic for Notre Dame man

Asst. Provost reflects upon 10-year transition

Editor's note: Recently Staff Reporter Kathleen Doyle met with Associate Dean of Student Affairs, Sister John Miriam, S.C., and Assistant Provost, to discuss the effects of the transition to co-education at Notre Dame.

Q: What are the positive ramifications of having women at Notre Dame?

A: The recent survey of our 2400 alumni which has just been completed gives us some idea of what it has meant to Notre Dame since we've prepared them well academically. And an interesting thing is in the survey we asked the women on campus to whom the women were coming and whom they were joining, nor some of the women themselves. Some of the women were greatly surprised to find out that they were being put in a position of pioneering where they were expected to come solely as, in their mind, the first women students at Notre Dame. So it was not by our department, didn't make the connection as to the trail-blazing that was going to be imposed upon them. The ratio of women to men was 1 to 17 and with that kind of public stance and with expectations being laid down to you, that the women, the students, it could be somewhat burdensome.

Q: What are some of the most common problems faced by your office?

A: At this point, do you think Notre Dame has satisfactorily prepared women for life after graduation?

A: The body of 600. We converted Badin and Walsh for the living of women over the summer. The next step was to place the women on campus to whom the women were coming and whom they were joining, nor some of the women themselves. Some of the women were greatly surprised to find out that they were being put in a position of pioneering where they were expected to come solely as, in their mind, the first women students at Notre Dame. So it was not by our department, didn't make the connection as to the trail-blazing that was going to be imposed upon them. EDMONTON, Alberta (AP) -- An unidentified gunman seized Edmonton Oilers hockey team owner Peter Pocekling as a hostage in his own home yesterday and demanded ransom, city police reported.

They said the gunman also was holding two of Pocekling's household servants.

The intruder, also armed with a knife and described by city police as extremely dangerous, had released Pocekling's wife, Eva, to obtain the ransom money, police said.

The amount demanded could not be learned immediately.

Members of police emergency force ringed the area of the National Hockey League team owner's home on the edge of the University of Alberta campus near the downtown section of this western Canadian city.

Mrs. Pocekling was seen standing on the house's front lawn in her bare feet, crying and talking with police.

Inconsistency plagues Irish

By MIKE SULLIVAN

Sports Writer

The Irish lacrosse team had returned from a three-day, three-game road trip through Ohio with mixed results after splitting games against Ohio State and Kenyon College. In both games, the Irish fell behind early and attempted to come back. While they were able to overcome Kenyon and run away with a 17-8 victory, they could not catch Ohio State, dropping a 14-10 decision.

The loss to the Buckeyes last Thursday followed form with most of the other losses this season, though. Everybody played poorly in the first half," said Irish Coach Rich O'Leary, explaining his team's collapse. "We tried to put in substutes and they played poorly, too. We had trouble even completing a pass.''

The second half was another story, though, as the Irish played two strong quarters, outscoring the Buckeyes 9-4. However, the good effort was in vain as the nine-goal halftime margin proved too large to overcome.

Steve Linehan tossed in three goals to lead the Irish attack. Bill Bonde contributed two goals, while Joe Hart, Mike Quinn, Justin Shay, Steve Pearsall and Kenyon each added one. Rob Simpson was tough in the goal with 18 saves.

The Kenyon game on Saturday was the other Ohio State game, except that the Irish did not need as much time to get rolling.

Once again, the Irish scored first but fell behind as Kenyon scored in the first and second quarters. The Kenyon lead did not last long as Irish outscored the host team 16-5 over the rest of the game en route to an easy win.

"We played very aggressively and were much more physical," explained O'Leary. "We were really hitting them hard."

Bonde led the team with five goals and two assists. Linehan also helped out, scoring three times and assisting on five other scores. Dan Pace, Pearsall and Jerry Lewans each scored in a two-apiece. Simpson again stopped 18 shots.

O'Leary singled out the fine play of the second line of midfielders comprised of Mike Farino, Mike Quinn and Kevin Smith.

The team does not have much time to rest, however. Perennial midwest lacrosse power Dennison visits tomorrow.

"If we play four quarters like we played the last two against Ohio State," said O'Leary, "we may be able to beat them. We still lack consistency, though.

The Irish now hold a 6-4 record overall. They are 4-2 in the Midwest Lacrosse Association and are tied for the lead in their division with a 2-1 mark.

STICKER DUCKS - Senior co-captain Mike Lynch was injured in the Ohio State game and missed the victory over Kenyon. His playing status for Dennison is uncertain.

The defensive corps got a shot in the arm this week when Rick Winkel returned to action. A member of last year's squad, Winkel was injured in the off-season and told by doctors that he would miss the entire season. However, he has been given the OK by his doctor to finish the season.

Hornung hospitalized in New York

NEW YORK (AP) -- Paul Hornung, former Heisman Trophy winner from Notre Dame and later a star with the NFL Green Bay Packers, was in stable condition last night at Bellevue Medical Center after becoming ill earlier in the day while visiting New York.

Stephen Matura, a hospital spokesman, said Hornung, 46, was admitted about noon as an emergency case. He said Hornung requested that nothing about his ailment be released until today, but Matura added that Hornung was in good spirits after undergoing a series of tests and diagnostic procedures.

An All-America halfback at Notre Dame and winner of the Heisman Trophy, Hornung played for 10 seasons in the National Football League with the Packers.

Hornung received the award for his 1955 Heisman Trophy-winning performance, which was the first of its kind in college football history. The award was presented to Hornung by the Associated Press and the College Football Hall of Fame.

Hornung was a three-sport athlete at Notre Dame, excelling in football, basketball, and track. His Heisman-winning season was highlighted by his 522 rushing yards and 42 touchdowns, which he achieved in just 11 games.

While Hornung's career was cut short by a knee injury in 1956, he went on to play in the NFL for 10 seasons with the Green Bay Packers, and became known for his elusive running ability and incredible scoring ability.

Greg Russell may have played with cracked ribs in his junior season, but he's looking forward to the College Basketball Tournament game against tournament hopeful and #1 ranked North Carolina. Russell believes that Notre Dame has a chance to pull off the upset if they play up to their potential. Russell credits his 12-point performance against the Fighting Irish for starting a trend that led to the team's victory.
