Exam survival kit prices ‘absolutely outrageous’

By CAROL CAMP
Staff Reporter

A company selling exam survival kits to Notre Dame parents and students has no official merchandising representation on campus, according to Student Activities Director James McDonnell.

The distributor of the survival kits, the University Campus Company of Atlanta, Ga., has sent order forms to the parents of most ND students.

The prices are as follows:

- Assorted fruit and granola: $3.99
- Assorted fruit: $1.99
- Granola: $1.99
- Granola bars: $2.15
- Yogurt, dried fruit and nuts: $2.99
- An assortment of bars, cereal and nuts: $3.99

The form which the company has sent out guarantees to parents and students has no phone listing for the company.

We spoke about the sale of survival kits to parents and students, McDonnell explained that “After the adverse publicity that came out around Christmas, some students approached me and we were interested in running it (a similar program) which would be sanctioned by the University.”

They went through local merchants to purchase the items, but to my knowledge, nothing more has been done.

He added, “The University did not furnish the company with the names and addresses of students or parents; however, anyone can get hold of a telephone directory or use the mail.”

While attempting to locate a company representative who could legitimize its actions, it was discovered that the company has no phone listing in the classified or public phone books.

Also, the company’s post office box is registered in the name of an individual; therefore, the Atlanta Postal Inspector General is investigating.

El Salvador elections

Huges prepare for ‘war zone’

Editor’s Note: The following is the fourth of a series of edited excerpts taken from the diary of University Professor Theodore Huggins during his recent trip to El Salvador as part of the United States official observer team for the Salvadoran election.

A lot of people gave me messages when they knew I was coming down here, efforts to try to free people who are in prison. I would say most of the people who were on the street when we arrived were farm workers who had picked cotton on our farm. I was able to get my first taste of what life is like here, and I began to care of some of these particular tasks, and I also called the father of one of our senior students who stopped in to see me last week. The father was

"We are moving into an age of women," Flaherty said. Flaherty said, Flaherty, Sisters of Charity President, noted Notre Dame’s Distinguished American Women lecture series in the Library Auditorium.

Throughout her 40 years as a teacher, counselor and administrator, Flaherty praised her relationships with women. She noted that the women of Notre Dame should seek to capitalize on the "powerful symbol" which resides upon the Dome.

Stressing that she "came to speak about women’s beauty and power," Flaherty called for a "positive change" in women’s abuse and discrimination.

"Beauty is the expression of truth known and lived out best by women," Flaherty noted. True beauty reminds us of God.

Describing the history of women as "filled with struggle, doubt, service and accountability," Flaherty noted that "women to the ancients were seen as a symbol of evil, weakness, and as property."

Flaherty described women’s cultural status as being measured in terms of domestic skill and sexual pleasure.

The beauty of women is born of struggle, struggle to get through the bonds which compel women to be subjective to men. The crucial time of emancipation is now," Flaherty said.

Formulating a plan of action for women, Flaherty emphasized that women must know where they received their first image of what it means to be woman. To do this, she said, one that’s cultural background, educational opportunities, individual life experiences and expectations must be reviewed.

Survey royalty ranged from school essentials, such as calculus books, to personal items such as toothpaste. In all cases, the Notre Dame prices, while not always lower, were generally no higher and often lower than those of other college bookstores.

The information was collected from private institutions, such as Harvard and Princeton, state schools, like University of Kentucky to Transylvania University.

That is the conclusion of an observer survey sent recently to sources at various colleges and universities throughout the country.

Items surveyed ranged from school essentials, such as calculus books, to personal items such as toothpaste. In all cases, the Notre Dame prices, while not always lower, were generally no higher and often lower than those of other college bookstores.

The bookstore manager, Bro. Conor Moran, thinks the Notre Dame bookstore is "well respected in the college field" and he "wouldn’t trade it for any other." The bookstore is owned and operated by the University and any profits generated by the store are put back into the general fund, said Moran.

Moran added that ownership and operation of a bookstore by the university is the norm in the bookstore field, though there are exceptions, such as a T. Harward and Yale. At these schools, the stores are run as a co-op. Students pay $1 to join the co-op and then at the end of the year the students receive a dividend determined by the amount of purchases they made. Moran commented that Harvard’s bookstore has had problems in the past where no dividends were paid.

Problems are caused at bookstores because of the nature of the business. Textbook ordering is difficult for a store, said Moran, since many professors do not decide what

"Age of women"

Flaherty calls for new model

By PETER GIOTTA
New Staff

Emphasizing that women must have a complete and positive understanding of themselves, Sr. Helen Flaherty urged women to move away from a "war zone" and search to create new male models.

"We are moving into an age of women," Flaherty said. Flaherty, Sisters of Charity President, noted Notre Dame’s Distinguished American Women lecture series in the Library Auditorium.

Throughout her 40 years as a teacher, counselor and administrator, Flaherty praised her relationships with women. She noted that the women of Notre Dame should seek to capitalize on the "powerful symbol" which resides upon the Dome.

Dorm safety deserves careful eye

As the academic year draws to a close and students face the burden of making living arrangements for next semester, a long, serious look should be taken at the structural safety of the residence halls, and what can be done to improve them.

Three incidents of note regarding dorm safety occurred this semester: two power failures on the North Quad and a sewage break in Sorin. After the second North Quad outage, it was reported that there were no emergency lights in several buildings. Farley, Breen-Phillips and Cavanaugh to name a few.

Keenan resident Richard Conyers noted that Keenan has no emergency lighting system, in addition to other potential safety hazards. He added, however, that he believes Maintenance Director Donald Dedrick is trying to keep buildings up to standards. "Hopefully, they're staying ahead of tragedies," he said.

Conyers said one "hazard" is the inadequate steel treading on the stairs leading to all four floors in Keenan. Although repairs for the stairs have been approved, no action by Maintenance has been taken.

Keenan was a physical wreck when inman was not immediately available for comment, but the White House released an exchange of letters dated a month ago in which Inman asked to leave as soon as a successor could be confirmed. President Reagan accepted the resignation "with deep regret." It took years of planning and participation. Maintenance at the dormitory for next semester, a long, serious look should be taken at the structural safety of the residence halls, and what can be done to improve them.

President Reagan accepted the resignation "with deep regret." It took years of planning and participation.

Initiative must be taken within the dorm, according to Conyers. "Structural renovation is more important for dorms such as Farley and Sorin, which are mostly wood."

Conyers believes that when dorms are this old, priorities should be re-evaluated. St. Mary Lou Marchetti thinks emergency lights will be installed in the necessary dorms as soon as possible. Although the electrical wiring is scheduled to be renovated during the summer of 1981, she noted that the emergency-light situation surfaced after the wiring agreement, and that confident that the emergency lighting will be installed immediately.

Marchetti supports student initiative in upgrading dorm appearance, but doubts that students have the time or supplies to perform major renovations. The University should provide these renovations "it is their responsibility," she said.

A long-range dormitory renovation project for the dorms began in 1980, with older dorms a major concern of Housing Director Fr. Michael Heppen.

While dorm renovation is listed as a priority in the Campaign for Notre Dame proceed at Heppen said, but "never discoursing student input -- as long as they don't make the final decision themselves." As of this writing, there is no procedure for dorm improvement proposals, Heppen said.

Students interested in taking the initiative in caring for dorms should submit the proposal to the dorm rector, who then brings the proposal to Heppen for approval.

The Student Affairs Committee of the Trustees approved a $10,000 stipend proposed by former Housing Cabinet Head Patrick Borchers last fall to improve social space in the dorms.

Before social space is improved, it would be advisable for student leaders to concentrate on making the dorms safe for students to live in. It seems both students and administration are responsible for 'oversights' as far as dorm safety is concerned.

While students usually do not hesitate to object to administrative 'shock' regarding dorm social space, little enthusiasm has been shown for encouraging the administrative representatives to expedite installation of functional emergency exit lights in the halls.

The administration, although it has laid the groundwork, has been quite slow in completing dorm repairs where life-safety is concerned. The Saint Edward's Hall fire two years ago could have been avoided, had a sprinkler system been installed at the first indication of a fire hazard. The emergency light situation presents a dual challenge for Dorm Directors.

Leisure also helps

Bellalta stresses work 'obligation'

News Staff

Proving that "Work is good for the environment" was Professor Jaime Bellalta's main objective in his lecture, "Hospitality is for Working Householders," delivered last night in Saint Mary's Carroll Hall.

In the last of the "Christian and Justice Series" of lectures, Professor Bellalta stressed the "moral obligation" we have to work, noting that work is "a good thing for man because it develops him, makes him what he is." Prof. Bellalta also stated work "helps in forming a family and establishes the first school within the home." Also "work is the basis of cultural and historical links."

Prof. Bellalta also discussed the subject of leisure, saying, "leisure does not exist for the sake of work but rather that leisure helps to fulfill the sphere of human activity." According to Bellalta, leisure by itself is a form of silence since it is not productive in and of itself.

Bellalta added that as products of our environment we tend to see only what we are conditioned to see and ignore what we believe to be unusual or out of the ordinary.

Work is necessary to improve our environment, according to Bellalta, and through work we develop a respect for our surroundings and as a result we help to curtail the negative aspects of our society.

'Professions' series

Sinclair focuses on engineering

By LAUREL-ANN DOOLEY
News Staff

Focusing on the close ties between engineering and the American way of life, Professor Bruce Sinclair concluded the 11-part lecture series "Professions in American History" Tuesday night at the Centennial Center.

A professor of history at the University of Toronto and an award-winning author, Sinclair dealt with the changing role of American engineering societies and integral problems with the structure of the profession.

Sinclair said that "engineering incorporates some of America's most cherished ambitions," Sinclair views the profession as solidly connected to national goals. "Technology is the natural artistic medium of America," he said.

Sinclair believes the field is capable of creating prosperity for the masses as never before, thereby proving the success of the democratic system.

With an estimated two million engineers functioning in the United States alone, the profession has expanded immensely since its birth. Originally made up of only civil and military divisions, specialization has increased greatly.

The field was at first comprised of white Protestant males only, resulting in a "men's club quality" in early engineering societies, according to Sinclair. He said, however, devotion to ambition, hard work, and success together with a self-image of being hard-working and hard-playing have prevailed.

A panel consisting of the vice president of engineering of the Bevila Corporation, the president of a resource management company and the Dean of the College of Engineering at Notre Dame later discussed current problems in the field with much participation from the audience.

Expanding bureaucracy was cited by Sinclair as a major drawback with regard to innovation. "It seems that engineering functions better in smaller firms," he said. Extreme specialization was seen as a weakening force in terms of political lobbying and the rate of technical progress was considered to be sharply decreasing, due largely to governmental regulations.

'Dealing with life'

Poet Tillinghast utilizes maxim

By ANNE MONASTYRSKI
News Staff

Dealing with life as you find it is as the maxim on which American poet Richard Tillinghast said he bases his poetry.

Tillinghast read a selection of his poetry in Stapleton Lounge Tuesday night at the Centeren Hall.

A professor of history at the University of California at Berkeley, Tillinghast has taught at Berkeley, but is recognized for his involvement in the college program at San Quentin Penitentiary.

"The importance of knowing one's personal history is to know that it need not stay static. The real woman gradually emerges when she accepts who she is," Flaherty said.

Flaherty continued that women have difficulty with power since they associate it with men or evil.

Assuming that power is brought out in women when women implement its "nurturant" and "integrative" qualities. "The mystery of every woman is that she has the power to be co-creator, she has the power to be a life-giver," Flaherty said.

Praising this life-giving mystery of womanhood, Flaherty remarked that "women are in absolute tune with the universe.

Flaherty determined that the dehumanization and violence perpetuated by our involvement in Latin America, the economic fear and depression caused by repressive budget cuts, abortion and nuclear war are the major immoral issues facing us today.

Calling women "peace makers," Flaherty called for women to attack these problems on the grounds that they are "aberrations of life and therefore are women’s problems.

"Women because of their wisdom, mystery and power are the greatest hope for peace," Flaherty said.

Citing the intimate experience women have with pain and hardship, Flaherty concluded, "God is calling women to shift the tide of destruction."

Praising the emergence of women at Notre Dame, Flaherty concluded by calling for women to unite and to share their personal experiences. She added that women must read and study the works of women in order to create a brighter future for themselves.

...Hesburgh

continued from page 1

the south and around the
capitol where most of the
voting was going on. We had to
make some telling visits to
polling places in the eastern
guerrilla land. There was a
general agreement on this,
except that there were so
many places to the helicopter.
In general, it was agreed that
more or less all of our official
group should go to the east,
and since Congressman Jack
Murtha had already arranged to
be one of the two, I volunteered to be the second.
There had been only one
extra place on the helicopter
and that was assigned to
State Department official
named Joe Sullivan, mainly
because he knew Spanish.
Since I also can speak Spanish,
I suggested that I take his
place. The whole group was
agreed, and Joe Sullivan
gave to be his place,
obtaining thereby a good deal
of good-natured ribbing on the
part of the others. In any
event, that's where we stand
now. The security people will
be looking at the picture in the eastern
guerrilla land. There was a
real sense of
wound up, as it always does, in
a kind of compromise.

First of all, it was decided that
our Huey helicopter could
only take 11 people, including
the two pilots, and, therefore,
we had to drop two or three of
the media people. It was
finally settled that the follow-
ing would be the people aboard
our Huey helicopter.
First, NBC would be the pool for all of
the other networks, not only
CBS and ABC, but all of
the networks of the world.
We also had one person from
the Embassy who was to be
our liaison in friendly territory:
Todd Greenstreet. Todd had
worked with me and Jim Grant
at the Overseas Development
Council and was a fine choice
for this task. His Spanish is
quite good and he knows how to
deal with the military in this
country. Lastly, there were the
two pilots, Guillermo Pena and
Amado Cuellara. Curiously,
their Huey helicopter had been
in Houston yesterday with
them and was flown in here
last night by a C-130 and is
ready to go today with us. As
some might remember, this
aircraft had most of its
helicopters destroyed a few weeks ago
by the guerrillas.
We finally decided that we
would push on to San Miguel,
a conflictive area and work on
our movements form there.
San Miguel is the third-largest
airport in the country after
Salvador and Santa Ana, and is
right in the middle of the the
trouble zone. They had been
having fire fights in the town
all day and we could land there
and plan our meetings following that
landing.
In any event, we were ready
to leave about 9:15. The
preparations were a little
troubling, since we were all issued
flak jackets, which we put
under our seats so that if we
were shot at from the ground,
the bullets might be
attacked on the ground, at
least those members of our
helicopter was rather heavy
morning for Mass and render-
so we were able to give a bloody blow to the
guerrilla forces. It's a fairly
farcical charade, but it is the way
all of us that unless we do this,
we are not really going to pass
muster with the large press
corps here who are not able to
gain entry to the capital. I really
want to see that someone does
dose the voting situa-
tion.
While I was in the plane
thought, I am calling it a night
because we're up at an
morning for Mass and render-
several at seven o'clock for the
final session of the security
information is available.

books they are going to use
to the next school year. Also,
there is much class-
switching at the beginning of
each semester causing many
"averages and shortages."
said Moran. He added that
this problem sometimes causes a
shortage of books because of
the large use of students in a
certain class.

Prices are continually rising
because of labor and shipping
costs. He noted that graphs
and pictures in new textbooks
also add to the rising costs.
The profit margin is very
low, he said, because
when new editions are
published, the old ones become
"worthless."

Profits from the "soft goods"
area of the store -- the
first floor -- help with the
operation of the store, ex-
plained Moran. He added that
not many schools get the
name of Notre Dame receivers and that
this makes the Notre Dame book-
estore a "national" one.

Sunday March 28
This is the day for which
everyone in this country has
been waiting for so long. I
think I can say in all honesty
that it was for me one of the
most exciting, most demand-
ing, most dangerous, and most
satisfying days of my life.

As I probably have indicated
earlier, we were divided into
groups, A, B, C and D.
Group A, the one that I am
part of, is leaving for the east
and north and will be involved
in looking at the election in
all of those regions which are
called in Spanish "conflictive,"
that is to say the guerrillas
claim to have control.

Presumably, they will try to
cancel the elections in that part
of the country and will take
a very day view of our come in
to see what is happening
in the area. Group B is going
in the opposite direction out to the
west. Group C along the coast
and north, it suddenly became
apparent
there was a
serious attack and that it
prematurely.

Meanwhile, we

Academy researches natural areas

Scientists and researchers attending the spring meeting of the Indiana Academy of Science April 23-24 at Notre Dame also will have the opportunity to examine sugar maples at the Bendix Woods Nature Preserve and visit the Indiana Dunes National Lakeshore.

The field trips, including additional nature sites in northern Indiana, are part of the first Northern Indiana Natural Areas Conference. Field Days also are being held in conjunction with the Academy’s spring meeting.

Dr. Theodore Marovich, chairman of the Notre Dame Biology Department, said the combined Academy meeting and natural areas conference is hoped to serve “the overlapping goals” of scientists, researchers, conservation organizations and governmental agencies concerned with the preservation, research and development of northern Indiana’s natural areas.

Consumption falls, incomes rise

WASHINGTON (AP) -- Personal consumption rose modestly in March, but consumers spent less on goods and services, underlining the trend that kept the economy from falling into an even deeper recession, government figures showed Tuesday.

Personal consumption spending, which declined 0.2 percent in March, should continue to fall, it would raise new questions about whether the economy will recover this summer, as the Reagan administration and many private economists forecast.

The Commerce Department’s report said Americans’ total personal income rose 0.4 percent to an annual rate of $2.52 trillion in March, topping a four-month period of sluggish growth through the worst months of the recent recession.

But the report said personal consumption spending -- expenditures for all consumer goods and services -- declined less than a rate of 0.5 trillion in March after rising faster than income in recent months.

By all accounts, businesses won’t increase production and begin hiring back laid-off workers as long as consumer demand can hardly go up if consumers are cutting spending.

"I don’t know that consumers stopped spending in March," officials said, adding that the reported decline might be made up of distortions caused by severe weather earlier this year.

"We were hoping to see a little bit more encouragement there," in the spending figure, said a second official.

With income rising slightly and spending dropping in March, new personal savings rose 16.2 percent to a rate of $121.8 billion, the first increase in that category since October, the report said.

Sure, he's not Reagan, but...

With all of the protests which surrounded the commencement of Ronald Reagan as last year's speaker, one might think that the selection of Notre Dame has hit upon a choice which pleases almost everyone.

Edward Konrady and Randy Fahn

Well, the administration fail ed to learn from last year's debacle. They did choose some one who comes more in line with Notre Dame ideals, they found everyone somewhere has heard of and they managed to keep it a big, dark secret until it became late enough to organize a protest and voice their disapproval.

There are two main mistakes in the choice of Trudea u as the speaker. The first is that we know something about him. It is a severe blow to students who have never heard of him. The second, nobody bothered to ask the people who are about to graduate who they wanted to ask a commencement speaker. On the first point, getting a politician to come in and speak, regardless of what this person stands for, seems to serve one function: increasing the prestige of the University. Notre Dame has an opposition policy on this campus to promote dialogue between people from all points of view. This is essential to the operation of a free-thinking university. But, commencement is the highest point in the career of a student. Not him, the speaker who best represents and symbolizes what the graduate has learned?

On the second point, commencement is supposed to be a moment for oneself. Let's also make it so the graduates should have the right to give input as to their choice of a commencement speaker. We should be honoring the graduates on their day, not use it to try to cut the legs out from under Notre Dame. I am at odds with the choice of political speakers because this policy draws attention to them and away from the graduates. Last year's commencement became a circus of press and secret service.

These statements against politicians may seem very biased. Everyone has his biases and we are no different. We have nothing against Minister Trudeau, in fact, we are very supportive of most of his programs. We feel that the commencement speaker should not be a political figure because his views may not only spark controversy, but they may be diametrically opposed to the goals and ideals of Notre Dame. We hope that this space will not be filled with speakers who have something important to say to the graduates, and we hope that the graduates have some say as to who speaks at their commencement.

Edward Konrady

It's so obvious

If you are like me, you are tired of reading about all the troubles in the world and not being able to do anything about them. Unlike the weather, if there are things we can actually do, we will solve all the world's problems.

Michael Molinelli

Pollution, while on the surface seems to be a complex problem, is actually a simple one. Make sure everybody buys electric cars so the air will be clean. Make it illegal to dump any sort of waste into the rivers and let's make people to make it so we don't need toxic chemicals for anything. While we are at it, why don't we ban the garbage dumps far away from where people live, so no one has to smell them.

Let's put the nuclear power plants next to the garbage dumps, so they won't bother anyone else. Then make sure that they are all radioactive proof. Also, let's find a safe place to put the garbage for a new earth, guided and guarded by the local stockpiles of both superpowers.

Steve Mangine

have continued to grow larger and more deadly, hundreds of thousands of tons have been gathered in Europe demanding an end to the arms race and on June 12 a similar event will take place in New York City during the United Nations special session discussing disarmament. While we dangle by thin threads of sanity over an inferno of misery, more and more voices raise the cry for a just world in which human needs are given priority over military spending.

At this moment in history, two masters struggle for our allegiance. Soon we must choose our own fate by love and loyalty to one, and forever despising the other. We fast approach the fork in the road. One is death, the other is the dangerous cynicism and creeping numbness that tempt us to the despairing resignation that all efforts for peace are futile; that inevitably we will someday demonstrate that the race of Francis of Assisi, Beethoven, Michelangelo and Shakespeare is in reality no better than a race of bums.

The very existence of these weapons of mass destruction proclaims that men and women are not infinitely valuable sons and daughters of God, each one to be treasured, but mere beasts; that there is not a precious gift, but a burden to be dragged about, for no purpose, until death's deliverance into oblivion. The bombs proclaim that Christ shed his blood and a fool and a lunatic; that his bones still be cold in a borrowed grave.

The reality of love which we have all known condemn these infernal declarations of lies and blasphemies, slanders against the goodness of God and the glory of humanity. Though the United States and the Soviet Union have both expended enormous amounts of resources on the development of nuclear weapons in the past decade, is either nation more secure than it was ten years ago? If this is not the case, then it is reasonable to expect that either nation will be more secure after ten more years of arms spiraling. If the spiral is not halted voluntarily, then where, logically can it be cut to rest, except with the final battle?

This week is 'ground Zero', a national effort to raise awareness and to promote open discussions about the nuclear arms race. Concerned individuals of all viewpoints are encouraged to participate in the local events. Today, "Gentle Thursday," Mass was celebrated at the Grotto at 8 a.m.; there will be a gathering for song and celebration on the South Quad at 4 p.m.

While the world stands poised for war, more voices than ever cry out for peace and justice. The agony which our world now suffers will only continue to prove that death points, or the pains of childbirth. We ourselves shall choose.

The Observer

The Observer is an independent newspaper published by the students of the University of Notre Dame du Lac and Saint Mary's College. It does not necessarily reflect the views of the administration or the student community. The paper is distributed as accurately and as objectively as possible. Editors represent the opinions of a majority of the Editorial Board. Commentaries, opinions and letters are the views of their authors. Column space is available to all members of the community, and the free expression of varying opinions on campus, through letters, is encouraged.

Established 1966

Founded November 3, 1966
ATHENS (AP)- Athens extended its record-setting winning streak to 13 games last night when Claudey Washington slugged a two-run, two-out single in the ninth inning to give the Braves a 6-4 victory over the Cincinnati Reds.

The Braves started their winning rally off Bob Shirley with a walk to Matt Sinarro. Rafael Ramirez then reached on an infield single when his attempted sacrifice bunt got past Shirley.

After Rufino Linera flied out, Brett Butler's double struck Sinarro as he was running to second from third. Sinarro was out, but Ramirez was safe at second and Butler was on first.

The Reds then brought in reliever Jim Kenny whose first pitch to pinch-hitter Biff Pocoroba was a wild pitch, advancing the runners to second and third. Kerr then intentionally walked Pocoroba, and Wash­ington came to bat against the Reds third pitcher of the inning, Joe Price.

Washington took a ball, then bouncing a single up the middle scoring Ramirez with the Winning run. The Braves broke the modern Major League record on Tuesday by winning their 13th straight.

Eddie Miller started the third inning for the Reds with a single but was erased when Dan DiSieno lined into a double play.

Atlanta capped the lead to 3-2 in the seventh when Dale Murphy doubled, took third on a fly ball by Chambliss and scored on a sacrifice fly by Ramirez.

Te Braves staged a two-out threat in the eighth when Washington and Bob Horner each drew walks, but reliever Tom Hume bear out an infield single to load the bases. Shirley then replaced Hume and struck out Chambliss to end the threat.

"I'm a strong time in that STEREO. Name brings great profits. have a firm call, make a call!"
MEN'S VOLLEYBALL: "Young, inexperienced and at times somewhat inconsistent in our practices," is the way Volleyball Club President Barry Smith summarized the trials the team had before its opener back in January. That was when 25 teams showed up to claim the "Midwest Intercollegiate Club Volleyball Championship" to be held at Bowling Green (Ohio) on April 17. Despite a shortage of players and an inauspicious start, the Irish were one of the 12 teams that qualified for last Saturday's event. At the afternoon's end, the Irish were in the championship match against Northern Illinois University. Split up into two sides, the Irish breezed into the semi-finals by sweeping matches against Miami (Ohio) and Kalamazoo College. When Wallace and Bowling Green, while splitting with Wheaton. A gutsy "never say die" effort propelled Notre Dame against former team member Tim Allmaras, "The team, the Irish fell behind again by an 8-2 count before finally earning a 15-14 triumph in the match. "They (Northwestern) were pretty upset with themselves at the match's end," chuckles Smith. Unfortunately, the Irish had the semi-final scene reversed in the championship. After winning the first game 15-10, the Irish dropped two straight heartbreakers, 15-12 and 15-13, to lose out on the Midwest Championship. "It's just another tournament for us," says Smith. "I think we should have won it all, but as other teams have shown, after the loss, there aren't any losers after a championship game performance such as ours." Besides the second-place team trophy for the second consecutive year, the squad received plaques for outstanding individual performances by Mark Streozel, Eric Wolfe, Kevin Hinders, Scott Erbs, Mark Frierott and Mark Smith. WOMEN'S SOCCER: The soccer team had its own second place finish last Saturday. It wasn't in any championships for the Midwest, but given the circumstances it was an impressive performance. "It was our first of the 1982-83 season," boasts coach Tracey Walters of the six-team tournament. "The weather has hampered us all year as we only managed to get in only one full week of practice before the spring season. The other teams have been practicing much longer and were more experienced. In the 1-0 shutout game of Kalamazoo, freshman Lynn Webster tallied the lone goal on an assist from classmate Kay Helmers. Walters helped earn the shutout as the goalkeeper. The Irish then defeated Marquette enroute to the championship match. Another freshman, Sarah, Hand, scored a goal along with Helen Healy in Notre Dame's 2-0 win over the Wolves. The Irish then bowed, 1-0, in the championship match against Northwestern. The team will host Western Michigan on Friday, April 23, at the Soccer Center on Saturday afternoon. A tentative time has not yet been set.

WOMEN'S TRACK: Wind, cold and rain restricted track team competitors to sub-par performances on Saturday. Southern Illinois, however, managed to capture second place in two three-team meets held in the last week. First place Track performances by Mary O'Connor and Evie Allmaras in Sunday's defeat of Aquinas ans the Hope (at Hope College) highlighted the meet for Notre Dame. O'Connor won the 1500 and 3000 mile runs with respective times of 5:17.20 and 11:40.45. Allmaras won the javelin event with a 91 feet 6 inches throw, and also took the discus title with a heave of 74 feet 2 inches. Other top performances were turned in by Mary Kennedy, Rose Marie Lukiok and Lisa Monti as each placed second in their events. Kennedy ran the 3000 meters in 21:15.11, while Lukiok ran the 1500 meters in 5:22.99.

On Tuesday's meet at Hillsdale (where Notre Dame defeated Siena Heights, but lost to Hillsdale), four Notre Dame women placed first in an event. Susan Lee placed behind the high jump, Allmaras the javelin (97 feet 11 inches), Kennedy the 800 meters (2:32) and Lukiok the 3000 meters (11:42). Lukiok also placed second in the 1500 meters (5:22) and as did Allmaras in the discus (87 feet 10 inches). Lore Sruzk was third in the 1500 meters (5:16). Monti and Celia Driscoll also placed third in third out of six competitors in the 100 meters and long jump. It was only the second time that Driscoll competed in the long jump event.

WOMEN'S SOFTBALL: By virtue of the sweep over Bethel College and a loss of Purdue, the women's record moved to 24-3 overall. "We could easily be 8-1," says student-coach Bob Spahn, "but we have just had so much had back in one way or another. I think we sometimes get some consistent weather, we can really start a winning roll."

On Monday, the team swept Bethel by scores of 6-2 and 16-2 (a game shortened to five innings). Alyson Hertz went the distance in the first game as she gave up only four hits in her first outing. Mary Ann and Jill Strezel had two hits in four at bats to pace the hitting. Srenzel and Molly Ryan hit back-to-back triples in the first inning to help the team out to a quick start. Ann's two RBI's were tops for the team. In the second game, Linda Kellerher won her second game without defeat on the mound. Chris Callahan was 2-for-2 and had three RBI's to lead the balanced attack. Karen Alig was also 2-for-2 and scored three runs as did Nancy Jackson.

On Tuesday, however, the squad bowed by a 12-8 count to Purdue. Alig and Callahan both were 2-for-2 in the game. Ann's bases-loaded triple was a main highlight in the game as was Val Hart's second home run of the year. (the only two on the club this year). Harris was 3-for-4 overall, and leads the team with a .467 batting average. Ann is currently hitting at .417, while Alig is at .412. Alig also has a .730 on-base average. The best is yet to come, though, according to Spahn. "One of these days we are really going to kill someone," he says. "We just had a lot of walks in that second Bethel game. There is just too much talent in our lineup for us to be kept down. We are only a year behind, the season."
In the dark about night football

At first glance, next September 18 should be a wild day. I mean, what more can one ask for— Notre Dame against Michigan, under the lights, in prime time, on ABC, in the first night game ever in Notre Dame Stadium.

The Notre Dame athletic department is still buzzing over the idea, and all the talk over there is about how neat it’s going to be to “break tradition” and all that. Of course, $1.1 million in the till, which is ABC’s standard fee for a prime-time game, won’t hurt either.

It seems like a situation where nobody loses. ND and Michigan can get their million and their exposure, and ABC gets what is sure to be a hit in the ratings during a period when it would normally show old “Love Boat” and “Fantasy Island” reruns. The only added expense will be the $90,000 necessary to import the portable lights from Iowa. Of course, that translates into about 25 seconds of prime time advertising.

ABC first approached Notre Dame about this unique idea a few weeks ago. Chuck Howard, ABC’s vice president of programming production and the senior producer of NCAA Football, came up with the brainstorm about six weeks ago in what now looks like a last-ditch effort to get a Notre Dame game on ABC.

You see, the network had been unsuccessful in two previous attempts to get the Irish to adjust their schedule for TV. First, the network wanted to move the Nov. 6 Pitt game to Labor Day evening in prime time. Notre Dame refused. Then, ABC asked the Irish to switch their Nov. 27 battle with USC to Dec. 4. Once again, ND refused, which explains why this year’s ND-USC game will be on CBS.

Finally, after much debate among the ABC hierarchy (Howard, senior VP Jim Spence and executive producer Roone Arledge), the network proposed the night game using lights from the Musco Lighting Co., an Iowa-based firm that had contacted ABC and the NCAA two years ago just in case their services might come in handy some day.

According to ABC’s media director for its NCAA coverage, Don Bernstein, getting Notre Dame to agree this time wasn’t a problem. “We had to clear the idea with both teams and their coaches,” he said. “But getting Notre Dame to approve the idea wasn’t a problem. We’ve experimented with these lights enough in pilot studies, and our ABC engineers think it is a viable system.”

Of course, the people over at the ND athletic department can hardly hide their enthusiasm. “I’m all for it,” said Gerry Faust. “It’ll be a first-ever thing for Notre Dame and it ought to be a lot of fun. It’ll be good for college football, too, to get a really good intercollegial rivalry on prime-time TV.”

Athletic Director Gene Corrigan echoed Faust’s sentiments. “When I first heard about it,” he said, “my first reaction was ‘Why not?’ As long as it was okay with the coach and the team, and Fr. Hesburgh and everybody else, it was okay with me.

Those are the two major problems that come to mind right away. Surprisingly, nobody seems to believe that a problem will exist. “We’ll take care of themselves,” said Corrigan in reference to the students’ excessive drinking. “I don’t think they’ll sit and drink all day — you’ve got to be stoned to do that.”

Oh yeah? Then there must be an awful lot of stupid people at Notre Dame. Now don’t get me wrong. I’m looking forward to Sept. 18 as much as anyone else, and I think it’s going to be an awesome experience for everyone involved.

But it seems to me that Notre Dame is taking the security aspect of the situation very lightly. And that may turn out to spoil all the fun.

"When you win two games even though you're playing without intensity," said Irish Baseball Coach Larry Gallo, "I guess you should feel some consolation. But we didn't play well at all.

The Irish swept a doubleheader from St. Joseph's College, 7-2 and 13-5.

Gallo was very upset with his team's performance. "We were laying back on our backs all day, not charging the ball, but letting the ball play us."

Jim Cameron provided the offensive thrust for the Irish in the first game as he hit a two-for-three, scored two runs, and had three RBIs.

Brian Smith (6-1) was credited with the win, going the rest of the way.

In the second game, Notre Dame was ahead 6-5 going into the bottom of the sixth, with one out. Cameron pinch-hit for John Deasy. Cameron singled, and scored the first run of a nine-run inning that put the game out of reach.

Co-captain Chuck Tasch was two-for-five, including a triple, and had three RBIs.

Mile Cameron (4-0) went five innings, striking out three and walking one. Larry Lackner got the save, going the rest of the way.

"It just wasn't a good day of baseball - we've got to get considerably better," said Gallo. "Especially if we want to get into the NCAA playoffs."

The NCAA people look at two things, our record and the quality of our opponents.

"These next games will be tough ones, and we'll have to play better."
