Go Irish' files suit against Notre Dame

By GREGORY SWERZ

The publisher of Go Irish, a weekfootball publication, has filed suit against Notre Dame, accusing the University of interference with business activities of the publication.

Fan Action Inc., publisher of Go Irish, filed suit in Saint Joseph Superior Court in Mishawaka on Sept. 17.

According to the suit, the University's Sports Information Department discriminated against the journal by denying it normal access to Notre Dame players and coaches, preventing it from attending the release of press credentials to any sports group.

The suit further charges that Roger Vladiemer, director of Sports Information, has engaged in activities that have reportedly damaged Go Irish.

James P. Groves, attorney for Fan Action, said the legal action was started to determine whether the University is guilty of discrimination in denying Go Irish press credentials, and whether the University has interfered in the business relations of the publication.

Officials at Go Irish declined to comment on the suit but confirmed that the journal has been kept on the University's alleged blacklist, with the publication.

According to the suit, no specific

On civil rights

Studies refute Reagan assertions

WASHINGTON (AP) - Internal evidence of the Equal Employment Opportunity Commission and a lawyers' study of Justice Department operation contrast President Reagan's claim that his administration has enforced civil rights laws more actively than its predecessors.

An EEOC document obtained by The Associated Press showed that, contrary to Reagan's recent claim to a black audience, the number of job discrimination suits approved by the commission has dropped sharply.

And the independent Washington Council of Lawyers concluded that "the administration has retreated from well-established, bipartisan civil rights policies" in several areas. Enforcement of school desegregation and fair housing laws has all but halted, according to the 138-page study.

Only in prosecuting police brutality and similar violent details of individuals civil rights has the Justice Department excelled, the report said.

Reagan told a dinner for black Republicans on Sept. 15 that he usually "tries to ignore personal attacks." "But one charge I will have to admit strikes at my heart every time I hear it," he said. "That's the suggestion that we Republicans are taking a less active approach to protecting the civil rights of all Americans."

"No matter how much you simplify, that's just plain nonsense," Reagan said.

"Look at the record," Reagan suggested. "The level of activity of this administration in investigating and prosecuting those who would attempt to deny blacks their civil liberties by violence and intimidation has exceeded the level of every past administration."

The lawyers council, which bills itself as a bipartisan association of attorneys from private firms, government and public interest groups, said in its study published the same day Reagan made his speech, that the administration's record in this area is at least equal to those of the two previous administrations.

But Reagan went on to say, "The Justice Department has filed nine desegregation suits against public employers and has reviewed more than 9,000 electoral changes to determine compliance with the Voting Rights Act. And that, too, is a higher level of activity than in any prior administration."

Opposition leaders plan to oust Schmidt

BONN, West Germany (AP) - Despite a state election setback that could erode their strength, conservative opposition leaders went ahead yesterday with a plan to unseat Chancellor Helmut Schmidt this week.

Helmut Kohl said after a meeting of his Christian Democrat party that he will plan to oust Schmidt and get himself elected chancellor in a parliamentary vote of no-confidence scheduled for Friday.

But he added that a no-confidence vote would be conducted only "if I have the certain expectation that a majority will vote for it."

But there were growing doubts about whether he had sufficient backing to oust Schmidt, leader of the Social Democrats who have led West German coalition governments for 15 years.

In a parliamentary election Sunday in the state of Hesse, Schmidt won an unexpectedly high share of the vote and the Free Democrats, whose help the conservatives need to oust the chancellor, suffered a major defeat and were voted out of the state parliament.

Schmidt, whose coalition government collapsed Sept. 17, said yesterday he still wants early national elections to solve the country's political crisis.

Two hit and run victims were shot early Sun-
day morning at a Fort Wayne hospital in the 9000 block of Highfield Road. Three were injured in the attack, but their condition is unknown.

A doctor has been arrested for a trumped-up charge of assault in a little Florida town, his brother said yesterday.

Last day's newspaper included a story about the new health care program that drains federal and state treasuries of millions of dollars every year.

Deep disappointment and relief that the waiting is over can be seen in the mood of the people in Fort Wayne today after interna-
tional civil rights leaders announced they would close its Fort Wayne truck plant.

The Miller Brewing Company will give a presentation on their marketing strategies Wednesday, Sept. 29 at 7:30 p.m. in Room 122 Hayes Hall. The talk will include information on how effective advertising has enabled Miller Brewing Company to rise from a number seven beer product to number two.

Food stamp benefits increase

WASHINGTON (AP) — The nation's 22 million food stamp recipients will get an average 8.5 percent benefit increase - their first in two years - starting Oct. 1, as the government begins a new fiscal year.

But the start of fiscal 1983 will also bring sweeping cuts in cutsbacks and emergency measures in other welfare programs and Medicare, the health insurance program for 26 million elderly and disabled Americans.

St. Thomas More Society conference

The first annual St. Thomas More Conference will be held Saturday, Oct. 2, at the Galvin Life Science Auditorium on the University of Notre Dame campus. The day-long event is sponsored by the Thomas More Society of Notre Dame.

The conference will consist of a series of lectures and panel discussions involving such noted scholars as Joseph Berrigan, Professor of History at the University of Georgia, and John F. O'Conner, Professor of political science at Illinois State University and keynoter speaker. Ralph McInerny, of the Maritain Center, Notre Dame Professor of Philosophy.

In addition, a film and slide presentation on Thomas More will be shown.

The purpose of the conference is twofold, explains Society President Carroll. Equally important, though, will be the emphasis on the value of the Philosophy.

The conference will begin at 1 p.m. in the Ballroom and at 7:45 p.m. in the Student Activities Office.

This offer is limited to Notre Dame and Saint Mary's students only!

Interested in taking a class in Ballroom Dancing?

It's still not too late to sign up for the Ballroom Dance Class which is being HELD ON SAINT MARY'S CAMPUS IN THE REGINA HALL LOUNGE BASEMENT FROM 6:15 p.m. to 7:45 p.m.

NEXT SCHEDULED CLASS DATE: SEPT. 29.

SIGN UP NOW IN THE SAINT MARY'S STUDENT ACTIVITIES OFFICE

PHONE: 284-4561

COST IS ONLY $25 FOR FIVE WEEKS!

This offer is limited to Notre Dame and Saint Mary's students only!
Hall legally entitled to remain on ballot

KNOX, Ind. (AP) - Sen. Katie Hall, D-Gary, is legally entitled to remain the candidate to replace the late U.S. Rep. Adam Benjamin Jr. on the Democratic ballot in November's general election, a Starke Circuit Court judge ruled Monday.

Judge Marvin D. McLaughlin denied a request by Democratic leaders in Lake, Porter and LaPorte counties for both temporary and permanent injunctions against Mrs. Hall's name being placed on the ballot.

His action upholds a decision by Secretary of State Edwin J. Nimmo, which said that as chairman of the 1st District congressional committee, Gary Mayor Richard G. Hancher had the authority to appoint Mrs. Hall to replace Benjamin on the general election ballot.

The three-term congressman was found dead Sept. 2 in his Washington apartment. A coroner rated Benjamin's death as an apparent suicide.

However, members of the congressional district committee argued they should have had a say in the nomination and that they filed suit. "This case has been tried on very narrow issues, and the court believes that some evidence was admitted in an effort to restrict the issue," McLaughlin said at the 12:20 p.m. hearing Monday. "As tried, the sole issue is which of two statutes apply."

Schmidt continued from page 1

Faced with the possibility of being ousted and a new chancellor elected, Schmidt asked for new elections.

The opposition would rather try to round up the votes to pick a new chancellor this week than face new national elections. Schmidt's coalition fell apart when leaders of the Liberal Free Democrats decided to withdraw from the government and try to form a coalition with the conservative Christian Democrats and its sister Christian Social Union of Bavaria.

If the opposition plan fails, Schmidt is likely to ask President Karl Carstens to dissolve Parliament and call new national elections within 60 days.

Under West Germany's constitu­tion, there are two methods to replace a chancellor: one is by new elections and the other is by an opp­ position majority vote in Parliament to oust the chancellor and immediately vote to approve a succes­ sor.
California storm ruins crops...

SAN FRANCISCO (AP) — Torrential rains brought to California's tropical storm Olivia wiped out most of the new U.S. raisin crop and struck hard at canning tomatoes, according to industry figures quoted yesterday.

"It is a disaster," Oregon growers say.

The unseasonal, harvest-time rains that struck yesterday, according to Industry figures quoted yesterday, "will mean a disaster for the industry," said Jack Kister of the Raisin Bargaining Association.

General Motors Corp. and Toyota Motor Co. executives have ended four days of negotiations on a proposed joint venture in the United States, a Toyota spokesman said. The spokesman refused to divulge any details of the talks between Jack Smith, GM's international production manager, and Toyota's Vice President Yoshio Morita. Kyodo News Agency said the talks centered on GM's idle plant at Fremont, Calif., a candidate site for the joint venture, and the degree of U.S.-made parts to be incorporated into what would be a jointly produced car. Kyodo said it was likely Toyota would come up with a decision on the partnership with GM by next month. AP

Oil imports are not likely to decline greatly by the year 2000 unless new efforts are made toward conservation and use of alternate fuels, according to a study by the Office of Technology Assessment. The congressional agency said oil imports could as high as 4 million to 5 million barrels a day at the end of the century, "unless imports are reduced by a stagnant economy or by a resumption of rapidly rising oil prices." U.S. petroleum imports averaged 5.4 million barrels a day in 1981. The three options for cutting oil imports suggested by the study were: increased automobile efficiency, greater synthetic fuels production and reduction of oil use in utility and industrial boilers — AP

Wall Street Update

A late rally in blue-chip issues helped turn a stock-market slide into a narrowly mixed performance Monday in the lightest trading in six weeks. The Dow Jones average of 30 industrials, which fell 13.27 points from its 13-month high over the three previous sessions, reversed course late in the day to post a gain of 1.58 points and reached 44.84. Volume on the New York Stock Exchange, but 76 issues rose to 52-week highs and only three slid to new lows. Volume on the NYSE reached 41.64 million shares, down from 46.60 million Friday, and the lowest since 44.72 million shares changed hands on Aug. 13. AP

Business Advisory Council completed its annual meeting last Friday after reviewing new graduate business programs and considering plans for the establishment of a business research center. Unanimous to many students, the council is one of four groups which advise University President Father Theodore Hesburgh on matters dealing with respective colleges. The BAC consists of 61 executives from various companies who offer insight into what business organizations would like to see in a business, school and its graduates. "Our focus is on improving and expanding the business school," BAC Chairman Thomas Grojean of Tiger International explained. "We try to ensure that the necessary resources are made available."

The current emphasis is placed on the graduate program, Grojean said. "New enrollments are down to 60 this year from 90. We would like to reach 750 for the two-year program."

One major influence of the council has been the new Executive MBA program, Assistant Dean Vincent Raymond said. The new program is designed for veteran business executives who live in a 100- to 120-mile radius of South Bend. Students attend daylong classes on alternating Fridays and Saturdays to fulfill course requirements in two years.

We asked the council what they thought when they were students in the program," Raymond said. "Mostly, they responded to ideas we had already decided on. They were very helpful." The concept was also presented with plans for the establishment of a business research center. Grojean stated that such a facility would assist faculty research and greatly enhance the quality and reputation of the graduate school.

"The major aspect of business school research is a solid database," Raymond said. "This database, the first produced and networked around on its way here. We discussed with the council where additional resources would be obtained."

Raymond emphasized the advisory nature of the council. "No immediate decisions were expected," he said. "These things take a great deal of time and planning. This is just the seed." Raymond added that plans for funding of the center were yet to be finalized.

The council members insisted that research into prospective employers and knowledge of computers is essential for those seeking a position in government or private business. "We're hiring only with a few of the estimated one billion containers that are involved," he said. After being collected by retailers, many end up at recycling centers, such as the Container Recovery Inc. of Des Moines.

Drunkards, fools

The serious problem of drunk driving has once again struck home as two Notre Dame students were suddenly struck from behind by a speeding car early Sunday. On September 18, another student was injured during a similar hit-and-run at the intersection of Corby and Eddy. The drivers of the second vehicle were charged with, among other counts, driving while intoxicated. If there is one consolation concerning these two tragedies it is that the students involved were not killed. This is little comfort, however, for who knows how soon these potential murderers behind the wheel will actually kill one of us. Because the three injuries reported are part of this country, we all share their pain and suffering and that of their families and friends. But an even more painful aspect is that these scenes occur throughout the country. In fact, every day last year, 30,000 Americans and maimed thousands more. We read about these sad incidents daily, about fathers and mothers, sons and daughters, about entire families being wiped out because of reckless driving.

How many times have you driven your car after downing six or seven beers? Too many of us don't think twice about doing this. We feel we're in complete control of our faculties and vehicle. We are so sure of ourselves that we push off the plausible consequences of our driving while intoxicated with a wonderful cliche, "It could never happen to me." The driver of the car that seriously injured Kerin Mannheim and Elizabeth McNerny early Sunday morning probably thought the same thing.

The responsibility lies with all of us. The solution is as simple as not drinking that next beer or, more importantly, not serving it to some blithering drunk whom we know must drive or walk home. More likely, however, the eternal god alcohol will ultimately win. More likely, however, the eternal god alcohol will ultimately win. While overpopulation at Notre Dame has not yet reached catastrophic proportions, we have all felt the unacceptable effects of a steadily increasing student enrollment. Perhaps a few examples will prickle your memories.

Uproar caused by your found yourself waiting in lines more often and for longer periods of time than a few years ago? Whether it the dining halls, the Administration Building, or wherever we enjoy the latest Notre Dame pastime, lines seem to be one inescapable aspect of crowding.

Perhaps you were on the waiting list for a room on campus. As you all must know by now, freshmen (jealously) have priority. They are all-garrisoned rooms, though some may have to make do with a steady lounge, kitchenette, bathtub, or closet for a week or two at the outset. As the number of freshmen increases each year, and more students must move out of the dorms to accommodate them. While we have to face the draft-like prospect of an off campus lottery, those who want to move onto the campus must spend more time on the nebulous waiting list, hoping that one day their number might pop up. Meanwhile, more and more students are being forced to find off campus lodging in less and less desirable locations. Niles and Nookloye, for example, are nice communities compared to certain places in South Bend, but less students really want to live there. The crowding problem has extended into the sphere of studies as well. Finding a desk in the library is, at times, a task in itself. The classroom often takes on a sporting event atmosphere, where eyes strain to get a glimpse of what's going on. While the student/teacher ratio is not horrendous here at Notre Dame (especially if you have a seminar or classics course in your schedule), it shouldn't be ignored in the face of a constantly increasing student population.

Maybe you're a freshman who'd like to purchase basketball tickets. Once upon a time, freshmen could buy entire ticket packages, not having to worry about missing big games like UCLA, Indiana, Kentucky, or De Paul. Those days are long gone. Nowadays freshmen are content to get any package.

Drunk drivers are a problem of national proportions. But the real problem is finding a solution. Those who hold the key to the problem, however, are the same people who created the problem: the students. To establish credibility, we are asking the freshmen to commit to a pledge that we have been told that we must move out of the dorms in order to get a room. If we have to face the draft-like overcrowding, then so be it. We have to live with the consequences of our own actions.

Massacre demands explanation

It has always been popularly believed that only those who have something to hide will suppose inquiry and investigation. When suspected organized crime figures are charged with the第五 amendment right to silence during Congressional investigations, for example, most of us cynically label such testimony as proof of guilt. Often the cynics are correct.

Thomas Melshimer

Guest Columnist

Israel's refusal to open any sort of public inquiry into the massacre in Lebanon is yet another example of this world's most well-known logic. If this heinous tragedy really occurred through no fault of the Israelis, would not an investigation into the charges made by Lebanese journalists be of some good public relations. The fact that Prime Minister Begin has refused any inquiry with characteristics of obscenity and narrowness suggests some amount of Israeli complicity in the massacre.

Even without Begin's intransigence, however, the available record of events is daunting enough.

The inexcusable negligence of allowing the historically belligerent Phalangists militiamen into the camp has been adequately described in the press. Israel's internal denial of any knowledge of the massacre followed by a statement that Israeli soldiers ran to stop it smacks of Orwellian Newspeak. Finally, Defense Minister Mofared's statement that the Israeli soldiers received orders to leave the refugee camps on a Friday and allowed them to stay another 24 hours, bands an Israeli of culpability.

The New York Times reported on Friday of last week that refugee camp inhabitants made by Israeli soldiers who claim to have witnessed some of the slayings. One soldier reported to his com-

mander that a Palestinian woman had approached him screaming of mass murders taking place in the camp. According to the soldier, his commander replied, "It's all right. Don't worry." The Times further reported that the Israeli army has ordered soldiers to refrain from making any more comments to the press. Truth is a casualty of war and cover-ups. Oftentimes, the truth is damned. Even enough. Sharon's statement that the Israeli soldiers asked the militiamen to leave the camp is garbage.

While overcrowpage has not yet reached catastrophic proportions, we have felt the unacceptable effects of a steadily increasing student enrollment. Perhaps a few examples will prickle your memories.

Uproar caused by your found yourself waiting in lines more often and for longer periods of time than a few years ago? Whether it the dining halls, the Administration Building, or wherever we enjoy the latest Notre Dame pastime, lines seem to be one inescapable aspect of crowding.

Perhaps you were on the waiting list for a room on campus. As you all must know by now, freshmen (jealously) have priority. They are all-garrisoned rooms, though some may have to make do with a steady lounge, kitchenette, bathtub, or closet for a week or two at the outset. As the number of freshmen increases each year, and more students must move out of the dorms to accommodate them. While we have to face the draft-like prospect of an off campus lottery, those who want to move onto the campus must spend more time on the nebulous waiting list, hoping that one day their number might pop up. Meanwhile, more and more students are being forced to find off campus lodging in less and less desirable locations. Niles and Nookloye, for example, are nice communities compared to certain places in South Bend, but less students really want to live there. The crowding problem has extended into the sphere of studies as well. Finding a desk in the library is, at times, a task in itself. The classroom often takes on a sporting event atmosphere, where eyes strain to get a glimpse of what's going on. While the student/teacher ratio is not horrendous here at Notre Dame (especially if you have a seminar or classics course in your schedule), it shouldn't be ignored in the face of a constantly increasing student population.

Maybe you're a freshman who'd like to purchase basketball tickets. Once upon a time, freshmen could buy entire ticket packages, not having to worry about missing big games like UCLA, Indiana, Kentucky, or De Paul. Those days are long gone. Nowadays freshmen are content to get any package.

Drunk drivers are a problem of national proportions. But the real problem is finding a solution. Those who hold the key to the problem, however, are the same people who created the problem: the students. To establish credibility, we are asking the freshmen to commit to a pledge that we have been told that we must move out of the dorms in order to get a room. If we have to face the draft-like overcrowding, then so be it. We have to live with the consequences of our own actions.

Massacre demands explanation

It has always been popularly believed that only those who have something to hide will suppose inquiry and investigation. When suspected organized crime figures are charged with the fifth amendment right to silence during Congressional investigations, for example, most of us cynically label such testimony as proof of guilt. Often the cynics are correct.

Thomas Melshimer

Guest Columnist

Israel's refusal to open any sort of public inquiry into the massacre in Lebanon is yet another example of this world's most well-known logic. If this heinous tragedy really occurred through no fault of the Israelis, would not an investigation into the charges made by Lebanese journalists be of some good public relations. The fact that Prime Minister Begin has refused any inquiry with characteristics of obscenity and narrowness suggests some amount of Israeli complicity in the massacre. Even without Begin's intransigence, however, the available record of events is daunting enough.

The inexcusable negligence of allowing the historically belligerent Phalangists militiamen into the camp has been adequately described in the press. Israel's internal denial of any knowledge of the massacre followed by a statement that Israeli soldiers ran to stop it smacks of Orwellian Newspeak. Finally, Defense Minister Mofared's statement that the Israeli soldiers received orders to leave the refugee camps on a Friday and allowed them to stay another 24 hours, bands an Israeli of culpability.

Irish in tennis action

Saturday morning at the Courtney Tennis Courts. The coaches of both teams decided to shorten the match due to the weather, which forced the final sets indoors. The Irish won with the Irish women's season record to 5-2.

In singles action, No. 1 Susie Panther had to default for the second time this year due to a back ailment, this time to Purdue's Molly McGrath after two sets. It was obvious that her back affected her performance on the court. Notre Dame's No. 2, Laura Lee lost a close match to Auto Jan -5-6, 6-5. Freshman Mary Collins was defeated by Debbie Mackey of Purdue 6-0, 6-0 at No. 3. After an excellent start, No.1 Lisa LaRatta fell to DePaul's Prohaska at fourth singles, 6-0, 6-1. Purdue's Barbara Barnes was too much for No. 5 Cathy Schnell, taking a 6-2, 6-2 verdict. No. 6 Lisa Gleason didn't fare any better in her 6-0, 6-0 loss to Ruth Burginski.

There was only one doubles match played Saturday due to the weather. At No. 3, the team of Cathy Schnell and Greta Roemer fell to Purdue's Burginski and Barnes 0-6, 5-7 in a rain-interrupted match.

Coach Sharon Petro was very disappointed with the outcome of the match. She cited the numerous injuries that are plaguing the team as one possible explanation for her team's poor performance. Petro expressed concern for Panther's back, Camille Cooper's tender elbow, which kept her out of the match, and for Mary Colligan's nagging cold. "I'm not using these injuries as an excuse, but I'd be more confident about winning if everyone was healthy," she explained.

Coming up next for the women is the Milliken Tournament in Decatur, Ill. this weekend. This is a singles and doubles tournament where the team will try to regroup before the rematch with DePaul next Tuesday in Chicago.

Cardinals clinch division

The Angels, who swept a three-game series from Kansas City last week in California, can capture its second division title in four years by winning one of the next two games against the Royals.

The victory was California's rights in its last 10 games, while Kansas City has lost 10 of its last 11.

Baylor stopped a 2-2 tie with a one-out single in the seventh that drove in Brian Downing from second. It was Baylor's 21st game-winning hit of the year, tops in the American League.

Downing opened the inning with a walk off Vida Blue, 15-12, and stroked to second on Rod Carew's sacrifice bunt. Doug DeCinces was intentionally walked before Baylor dropped a drive to the wall.

John, 18-12, defeated the Royals for the fourth time in this season and the 14th time in his career against four batters.

Angels-3, Royals 2

KANSAS CITY, Mo. - Tommy John, backed by another game-winning hit from Don Baylor, clinched his mastery over Kansas City as the California Angels defeated the fading Royals, 3-2, and narrowed their magic number in the American League West to two.

Baseball roundup

MONTEREY (AP) - The St. Louis Cardinals clinched the National League's Eastern Division title last night with a 4-2 victory over the Montreal Expos, last year's East winners.

Wille McGee's three-run, inside-the-park homer highlighted a four-run first inning. Dave LaHunt, 9-3, was the winning pitcher.

The victory - which enabled Manager Whitm Herzog's club to become the first team to nail down a division flag this year — gave the Cards their first title since the advent of divisional play in 1969.

Entering last night, the Cards' magic number for winning the title was two. St. Louis clinched a tie for the East pennant when second place Philadelphia lost to Chicago, 8-1, earlier in the night.

With two out in the first inning, Dave Lorg gave the Cardinals a 1-0 lead by singling home Ken Oberkfell, who had doubled off Montreal starter Bill Gallickson, 12-15.

After Darrell Porter walked, McGee blooped a fly ball to center. Andre Dawson attempted a shoe-string catch but the ball bounced under his glove and rolled to the wall. McGee circled the bases, just beating the relay to the plate for the cardinals' 4-0 lead.

THE OBSERVER, page 10, Sept. 29, 1982

Tommy John (right), shown here with California pitching coach Tom Morgan, was the winning hurler last night as the Angels topped Kansas City, 3-2, thus reducing the Angels' magic number to the American League West to two. (AP Photo)

THE MILLER BREWING COMPANY PRESENTS...

A multi-image presentation of the marketing and advertising strategies that have catapulted Miller Brewing Company from seventh place in the beer industry to second place today. This entertaining program is free and open to the public.

Date: Wednesday Sept. 29
Time: 7:30 pm
Location: Rm. 122 Hayes-Healy Ctr.

**Irish baseball team wins one, drops pair**

By NEAL SMITH
Sports Writer

Notre Dame won one out of three home games this weekend on Jake Sisko, dropping its season record to 1-4. The Irish defeated Valparaiso University Saturday, 4-3. Purdue was a 2-1 winner over St. Vincent College, 4-2, and St. Vincent College, 4-1, on Sunday.

St. Frances, visiting from Louisville, scored early in the first game of the doubleheader. The Irish got back on top in the fourth when they got three runs and a man on first. The Irish then went on to score two runs in the sixth inning on a pass to shortstop Paul Didel. On the last out, Tom Basbari scored on a sacrifice fly to right field by Phil Blue.

**TV rights suit raises old questions**

By Skip Desjardin

It has been difficult, to say the least, to decipher the conflicting signals coming out of courtrooms in Oklaho­ma. First, a judge said that colleges could televise football games however they wanted. Oklahoma promptly sold the rights to last weekend's game with USC. Then, more judges said that colleges couldn't sell TV rights to their games.

"What's going on here?" is Notre Dame on the verge of a multi-million-dollar bonanza? How did all of this get started?

In a nutshell, it started in the early 1950s. Notre Dame was on TV every week, and the other colleges got jealous. So, they voted to control TV rights through the NCAA. Nothing was said about basketball or other sports. Just football.

Since then, the arguments on each side have changed very little. The big schools want control of their own games. The little schools, who stand to lose revenue on the deal, and who want to maintain the football, keep voting to maintain control.

How little has the issue changed? Judge for yourself.

The following are excerpts from speeches given before the National Association of Radio and Television Broadcasters conventions in May, 1954.

Baker Byers, Executive Secretary of the NCAA: "The important thing you have to come face to face with is that television hurts attendance. . . . The NCAA is an organization through which the universities and colleges speak on athletic matters at the national level. The colleges have handed together for self protection on this subject. "The University of Notre Dame, for instance, has consistently voted against controlled televising in our organization and has presented forceful arguments for its position. . . . I assume the reason the University of Notre Dame takes that position is that they have seen no evidence of television losses upon the campuses. . . . The University of Notre Dame, andquote; quite rightly, I think, and therefore they have no reason to consider televising."

"If the day comes that there is no damage to attendance or that there are offsetting gains of such damage, the colleges will no longer control television."

"We all sincerely hope . . . that television will make no difference to the little schools. But if it does, there will be no argument."

Tom Baungartner, putting the game in perspective: "When we speak as a decided minority in the college ranks, but we are optimistic enough to feel that time will substan­dize our position."

We found ourselves in the same minority position when Coach came into prominence. The athletic direc­tor of one of our prominent Pacific Coast universities said that he was convinced that broadcasting "is hurting and will continue to hurt attendance." Knute Rockne had taken the opposite viewpoint. He had enough foresight to realize that radio could help dramatize college foot­ball and bring countless new fans into the stadium. Sub­sequent experience proved him right.

"Now, another feature of the NCAA plan that disturbs us is that controls by their nature tend to become more and more restrictive. Penn State has worn its nose in court and it will not be long before he will take the whole tent and you'll be sleeping outside."

"However, the most ominous development of all it seems to us, is the recurrent suggestion that" a share of the "white elephant" might be adopted whereby the proceeds from television would be divided between all the colleges, whether their teams were on television or not. Besides its inutility to the integrity of a college, such a suggestion is to, "our mind, socialist and dan­gerous."

"It is so easy for an opponent to win back. . . . Yes, Notre Dame is a football power. But they would stand to gain financially from a more liberal program. They have little concern for the adverse effect on the" their" colleges as well as they enjoy the proceeds from television. They will not stand to gain. However, money has never governed the policies of the NCAA in any program."

I don't have an opinion on them—necessary. While they may not speak well for the men involved, the comments are certainly representative of the relative intelligence of both sides.
