Expecting Americans

Israeli troops evacuated Beirut

British Lebanon (AP) — Israeli troops and armor evacuated Beirut's southern suburbs yesterday, clearing the way for landing 1,200 Marine peacekeepers.

The Israeli government, meanwhile, approved a full-scale military inquiry into the massacre of Palestinians in west Beirut, and the PLO's chief of staff, Brig. Saday Saye, was reported ambushed and killed in eastern Lebanon.

"We are expecting the Americans in the next four hours. We told them they could land at the airport, if the Lebanese government agreed it was OK with us," said Lt. Col. Yacov Peretz, defense spokesman for the Israeli military command, in a statement to reporters.

The departure of the Israeli left France, Italian and Lebanese forces in control of the port for the first time since Israeli forces invaded west Beirut on Sept. 15, one day after the assassination of then Prime Minister Bachir Gemayel.

French paratroopers and Italian infantrymen took up positions in and around the Sabra and Chatilla refugee camps to help the newly arrived Marines secure the area and to prevent the recurrence of the slaughter of hundreds of men, women and children in the camps.

In Jerusalem, Prime Minister Menachem Begin's government decided to set up a full-scale judicial inquiry into Israel's conduct during the massacre at Sabra and Chatilla.

Cabinet Secretary Dan Meridor said the government was giving the investigating committee a free hand to probe any question related to the massacre. It will be composed of a majority of government witnesses, including ministers and generals, to tried under oath.

Assemblyman Marvin Garlipp, D-La., told the Capitol, promising a crackdown to try to escape their share of tax payments.

"Every time you try to simplify the tax system by increasing some body's tax, that person tends to lose more money than he saves by tax simplification at that moment," added Long.

President Reagan and some top advisers have expressed an interest in moving to a flat tax, and there have been predictions that the budget he submits to Congress in January will call for such a radical change. But Chapoton said no such movement is expected in the foreseeable future.

However, Chapoton echoed the assessment of several senators that Americans are fed up with what they consider to be inequities and complexities of the system.

Even with the average 23 percent, across-the-board cut in tax rates that Congress passed last year, Chapoton said, "what continues to upset the man in the street is his conviction that his neighbor who is just as well off pays less tax than he does. Furthermore, he is concerned that the fellow in the big house on the hill pays just as much as he does because he is well off.""
About $10 million in federal financing granted by the U.S. Department of Housing and Urban Development will help make construction of a new alcohol-free beer plant possible in Indiana. Sen. Birch Bayh, R-Ind., said the plant will be constructed in South Bend by the New Energy Co., which has $15.5 million in private financing and federal funding. The federal package, priced at $9,093,000, is to New Energy and is expected to produce 450 permanent, new jobs in the South Bend area. "The plant will also provide an estimated 20 million bushels of corn a year to make 2 million gallons of alcohol-free beer, while breaking for the new plant was expected within the next three weeks.—AP

A federal judge dismissed inducements Tuesday against three defendants in a fisheries international computer spring case after government prosecutors refused to turn over documents sought by defense attorneys. U.S. District Judge Robert Aguilera dismissed federal inducements against Raymond J. Cader, Barry Saffire and Tabassom Ayazi, who had been accused of receiving computers allegedly stolen from the Eastern Business Subscribe. The case involved an alleged conspiracy by Hitachi Ltd. and Mitsubishi Electric Corp. to steal computer trade secrets. Assistant U.S. Attorney Gregory Ward said government prosecutors would appeal the dismissal. Federal inducements were issued in July against 21 people, including nine from Japanese electronic companies. Hitachi and Mitsubishi, on charges of conspiring to steal IBM secrets. Aguilera's order came on the heels of efforts by lawyers to pry information from IBM to show that their clients are innocent of the secrets conspiracy case.—AP

Indiana authorities charged their minions Thursday with possessing marijuana, heroin and marijuana, who had admitted to importing drugs. Watts was arrested on March 11, 1976, on a 1.1 pound tin, and black and other additives and resembles the tiny black fish eggs. But for employee of Moscow's biggest fish store, store sometimes sells artificial caviar, made from curdled milk. The case is good and only 3 percent is exported. Western marketeers may charge $90 for a 1.1 pound tin, but black and for the same amount. - (AP)

One official of the United Way campaign staff at Notre Dame says the campus drive is not designed in such a manner personal to induce " guilt" contributions. It is simply the result of several years of intense organization of the campaign. "We don't run it this way for pressure: It's for convenience. If (students) don't want to give, we respect their opinion. We think there are others out there who believe it is worthwhile," said Bardele, 74 percent of the students participate in the program. But those students who refuse to give because they don't want to support the agencies say they will give more closely the ob­ jective of the United Way drive. Notre Dame raised $8,600 during last year's drive. All contributions are distributed to agencies that are in the Salvation Army, the Alcoholism Council and many more. "The most refreshing aspect of United Way is that it acts as a blanket organization, making it unnecessary for the agencies involved to spend much time and funds on demagoguery," the agencies can concentrate on their primary role of helping the community.

The fact that the St. Joseph County United Way managed to raise $28 million for these agencies last year is no reason to doubt the facts that the money was raised entirely by volunteers is even more significant to the agencies that the money given in this drive will not go to fund abortion or abortion related activities. The following is an excerpt of a letter written by Joseph A. Greci, executive director of the St. Joseph County United Way, in response to the abortion question: Each United Way is locally or
guished and controlled by the citizens of the com­ munity it serves. Each makes its own decisions concerning what agencies to support. The United Way of St. Joseph County does not include agencies that have abortion or abortion related activities. Bardele commented on the abortion issue, saying "we don't want to give, we want people to want to give," she said. Although it's a tough year for this year's drive, Notre Dame and Saint Mary's should make plans to unite their campaigns next year. "I've taken ND approximately seven years to reach its present level," the chairman of the United Way fund drive. "It would probably take Saint Mary's just as long to reach a comparable level. Cooperation between the two schools would enhance the early efforts of the Saint Mary's participation and thus achieve better results than if the campaigns remain separate.

Broken sees the contribution drive as an educational experience similar to requests that will be made of us when we enter the working world. When we graduate and go out into the "real world," such requests will be numerous. It will be up to us to examine them and determine which are right. As for the United Way drive this week, the ultimate decision to contribute can only be made by the individual. Whether one agrees or disagrees with the United Way contribution drive would far outweigh any well-meaning plans to cleanse the system by refusing to donate.

Partly cloudy today, but becoming sunny by after noon. Lows in the upper 50s; high of 81. Continued mild tomorrow.

On this week section leaders all over the Notre Dame campus will be knocking on doors and asking students to contribute $2 to the annual United Way drive. If you're like the average student of past years, you'll hand over your two bucks without giving it a second thought. Maybe if you're in a rebellious mood, you'll mutter something about "no change" and close the door. Some students refuse to give to the United Way camp­aign because they say the pressure is too great. The fact that the drive is run on a very personal, one-on-one solicitation basis, with students asking their approach ing individuals seems to make some students feel threatened. These students' refusal to contribute to United Way is based on the way they perceive the drive as handled at Notre Dame. They feel that if they donate, they will be giving because they are obliged to, and not because they are acting out of a true sense of charity. These students refuse to give because they don't want to support the agencies say they will give more closely the objective of the United Way drive. Notre Dame raised $8,600 during last year's drive. All contributions are distributed to agencies that are in the Salvation Army, the Alcoholism Council and many more. Notre Dame future discussed

By AMY STEPHAN
News Staff

Should Notre Dame require a computer course? Should there be a university language requirement? According to Father David Tyson, executive assistant to Father Hesburgh, these and other questions should be answered by a review of Notre Dame's Curriculum.

In his talk last night on "The Future of Notre Dame," Tyson suggested that there should be a review of Notre Dame's curriculum, especially the General Education Component. According to Tyson, both the society and students have changed since the curriculum was last reviewed in the late 1960's. Tyson stated that both the distribution and the content of the General Education Curriculum should be answered by a review of the curriculum. Tyson also stressed the common Christian heritage of the United States and Latin America and the influence of issues in that area on the university.

The "Say No to the Massacre" petition drive, which calls for an independent international commission to investigate the recent massacre of Palestinians in two Beirut refugee camps, concluded last week with a total of 2814 signatures collected.

The petition, which was founded last Dec. 1 with the appointment of its Director, Fr. Ernest Bartell, will be used to begin a campaign to raise the university's interest in Palestinian concerns. The petition drive, which was sponsored by the Arab Student Organization, was intended to raise awareness of recent events in Lebanon and the plight of the Palestinians in that country. HPC Meeting discusses proposals

By DAVID F. TRACY
News Staff

The Hall Presidents Council, “the most representative body on campus,” according to chairman Mike McAuliffe, met last night and discussed among other topics the establishment of an allocations committee for the student activities fund.

According to McAuliffe, tickets for this Saturday’s Michigan State basketball game are still available. A total of 600 tickets were made available, 400 more than were originally expected.

Bob Yonzrach’s proposal regarding hall section parties will be reviewed next week.

Todd Hooper, Chairman of the Student Alumni Relations Group, is looking for two or three superalcas from each hall to increase the group’s membership because of the amount of work done in conjunction with alumni.

An allocations committee was set up for the student activities fund. The committee is responsible for distributing the $16,600 available to the halls for social activities, repairs, and hall function purposes. The committee asked that each hall keep its budget for this Saturday’s Michigan State basketball game available to the halls for social activities, repairs, and hall function purposes. The committee asked that each hall keep its budget.

Wallace sought black vote in primary runoff

MONTGOMERY, Ala. (AP) — Former Gov. George Wallace, batting hard for the black votes he once scorned, put his stormy political career on the line yesterday in a Democratic primary runoff against Lt. Gov. George McMillan. McMillan, a 38-year-old moderate who drew the black vote this time.

Yesterday’s Democratic primary runoff also featured Supreme Court Justice Oscar Adams’ bid to become the first black elected to statewide office in Alabama.

Adams, who was appointed to the court to fill a vacancy in 1980, was opposed by former Public Service Commissioner Jim Zeigler. The winner meets Republican Tom Hefield in November.

After spending $82,000 to capture support for his Negro vote, Adams confided to a wheelchaired since he was shot in an assassination attempt 20 years ago, already has been a governor three times. But recounting his segregationist stands of old, he resurfacd after a four-year layoff from politics, saying he now represents “the average man and woman, black and white.”

Residents of California can register

Students from California who would like to register to vote this November have until Monday, October 4, to complete the registration process. Forms are available from Tom Gruscinski in 307 Cahnson Hall (449-3073).

In addition, any registered voters seeking absentee ballots for the California election also need to see Gruscinski for information on the absentee ballot process.
**Rats tested**

**Possible cure for alcoholics?**

WEST LAFAYETTE, Ind. (AP) — The same chemical which makes alcohol lab rats drink more could work as a cure for alcoholism in humans, a Purdue University pharmacology professor said yesterday.

Joseph Zabik said a high concentration of serotonin, common in human and animal tissue, could create an aversion to alcohol in rats over several generations of lab animals.

"We've found that if we make enough serotonin available to the nervous system, an animal which has craved alcohol won't even touch it," Zabik said.

Because the chemical machinery is much like humans', Zabik said serotonin may be useful to help human alcoholics.

To curb rats' appetite for liquor, Zabik gave them fluoxetine, a chemical that indirectly increases the amount of serotonin available to the neural receptors, the nerve endings that receive and transmit stimuli.

Earlier studies tend to support the relationship of increased serotonin with the neural receptors, the nerve endings that receive and transmit stimuli.

**... Taxes**

Continued from page 1

The IRS is examining 281,000 tax returns that apply to involve abusive shelters — generally those said serotonin stimuli.

The relationship of increased serotonin of the chemical that indirectly increases Zabik gave them fluoxetine, a drug that works on low concentrations of alcohol, and if they drink that, are extensively higher concentrations until each level off at a concentration at which alcohol makes up to at least half of the animal's total daily liquid consumption.

"Obviously, from the first time they taste (alcohol), it's doing something for them that reinforces their desire for more," he said. "It's a very positive thing for them, because they're not under any stress, any pressure. No one is coercing these rats to drink, just as no one coerces humans to drink. There's a freedom of choice."

But even if the rats have nothing to drink but alcohol, remarks Zabik, their consumption markedly decreases when they're given fluoxetine, a compound discovered by Eli Lilly and Co., the Indianapolis drug firm.

He adds that the drug-induced aversion to alcohol tends to wear off in a day or so, and must be periodically administered orally or by injection.

Zabik said the serotonin treatment would differ from other treatments for alcoholism.

"The only other established chemical approach is use of Antabuse, or disulfiram, and with that a person is presented with a situation where if he drinks alcohol under the influence of the drug, he's threatened with becoming violently ill," Zabik said.

"Antabuse serves as a crusader — it supports the alcoholic's abstinence through fear, but it never takes away the desire per se."

Treatment with fluoxetine seems to produce no physiological reaction other than to radically reduce the intake of alcohol, Zabik.

Zabik said a carefully designed long-term clinical evaluation is needed to determine whether human alcoholics could be successfully treated by this method.

He said the drug is being extensively tested.

**Part 2 — Alcohol Attitude Test**

If you strongly agree with the following statements, write in 1... agree, but not strongly... write in 2... neither agree nor disagree... write in 3... disagree, but not strongly... write in 4... strongly disagree... write in 5

Set 1
1. If a person concentrates hard enough, he or she can overcome any effect that drinking may have upon drinking.
2. If you drive home from a party late at night when most roads are deserted, there is not much danger in driving after drinking.
3. It's all right for a person who has been drinking to drive, as long as he or she shows no signs of being drunk.
4. If you're going to have an accident, you'll have it any one way, regardless of drinking.
5. A drink or two helps people drive better because it relaxes them.

Add scores 1-5

Set 2
6. If I tried to stop someone from driving after drinking, the person would probably think I was butting in where I shouldn't.
7. Even if I wanted to, I would probably not be able to stop someone from driving after drinking.
8. If people want to kill themselves, that's their business.
9. I wouldn't like someone to try to stop me from driving after drinking.
10. Usually, if you try to help someone else out of a dangerous situation, you risk getting yourself into one.

Add scores 6-10

**Scoring**

Set 1: 13-25 points, realistic in avoiding drinking/driving situations
5-6 points, tend to make up excuses to combine drinking and driving.
Set 2: 15-25 points, take responsibility to keep others from drinking.
5-9 points, wouldn't take steps to stop a drunk friend from driving.

Man escapes kidnap attempt

GEORGE WEST, TEXAS (AP) — A kidnapped firefighter escaped from the trunk of his moving car yesterday after being held for 38 hours by a man who allegedly buried another kidnap victim underneath him four days earlier.

Cody Garland Hamilton, the 27-year-old firefighter, was hungered but unhurt.

State, federal and local officials immediately began searching the mesquite-choked South Texas ranchland for his alleged abductor, identified as Ronald Floyd White.

Authorities said Hamilton, who also worked as a newspaper carrier, escaped at about 3 a.m. as his car was being towed near George West, a town 200 miles southwest of Houston.

Montgomery County sheriff's spokesman Ed deForest quoted Hamilton as saying he was delivering the Houston Chronicle at around 2 a.m. Sunday when he was confronted by a man with a gun outside a grocery store in New Caney, a Houston suburb.

The man, who Hamilton identified as White, forced him to drive aimlessly, passing through several small towns, before starting down U.S. 59 toward Mexico, deForest said.

Officials said the abductor put Hamilton into the trunk of his Ford F-150 at about 4 p.m. Monday and then abandoned the car beside a highway three miles outside George West.

The firefighter told officials he kept quiet when the worker hooked up to his car because he thought his abductor had returned.

White is named on a warrant from Montgomery County in the Sept. 21 abduction of Michael I Baucom, 21, of Santa Fe, Texas. Baucom was buried alive for four days while his kidnappers tried to arrange a $75,000 ransom from his father, who was an international oil manufacturing business. He was rescued Sunday, suffering from dehydration and insect bites.

Police made three arrests in the Baucom kidnapping and put out a warrant for the 38-year-old White, who once worked for Baucom's father.

continued from page 1

The suggested contribution was basically just whatever you wanted to give. Then starting in 1978 or the following year, they started making it a fair share contribution because when the faculty give, they are giving a percentage of their income. They wanted to make it correlate to that by giving a set amount. Faculty members, people who work in union, and other employees usually give one percent of their income. The suggested contribution was just 1%, but it was raised to 2% last year because of the economic situation.

We'd like to stress that any amount is welcome — less or more. We'd welcome any contribution at all.

1. Is the distribution of United Way funds on a local or national level?

2. What are some of the organizations that received funds last year?

3. Are you able to stipulate where Notre Dame United Way funds will go?

4. What organizations will Notre Dame United Way funds go to in the near future?

5. In past years, Saint Mary's has not participated in the United Way campaign because funds were allegedly allocated to abortion facilities. Is there any truth to that?
On many occasions I have stumbled across that familiar headliner, "Why Johnny Can't Read." I believe this question inevitably begs another, "Why Can't I Teach?" Yet, there is a splitter of the faculty whole that leaves us with the bad taste in our mouths when we examine academics Notre Dame. They are not necessarily the professors who are difficult, or who grade our work lower than we would like. These are the professors who are paid reasonably well by students, who must often struggle to meet the costs of Notre Dame. The faculty (and administration) should remember that the university exists for the students, and not to support the world of academia. The sooner that these unconcerned professors realize this fact, then perhaps the sooner this problem will be lessened.

Autumn is ...  
Tari Brown

Features

Because deep in the recesses of our "Go, Irish!" hearts we hope and pray that this season will be the time of transition from losing to winning, that we will once again rejoice in the moments of glory and national recognition as we did five years ago. Memories pull us through periods of transition.

Memories of victory on the gridiron pull us through those quarters of play when the defense seems to be faltering and our sudden defeat appears imminent. Memories of those autumnal days of glory overtake us to tolerate, some even to enjoy, the frost of winter's snowy playground.

During the short time of the year when we call autumn, we are afforded the privilege of watching the transition while we wait. Whereas each football game shows us the progress of the season, each autumnal day offers signs of transition.

Nature is most exemplary. With each day we observe the gradual fall of sleep upon the many stately trees that surround the lakes, buildings and pathways of campus. Richly green leaves turn pagmant and become the red, oranges and yellows that signify autumn's sleepy presence. The lakes become restless, rippling from the force of the autumnal breezes. Even the ducks, by their growing silence, remind us that it is time to rest.

In seeming reaction to the response of nature to autumn's arrival, the people of the Notre Dame community take on the appearance of thoseQuads that were once filled with the boisterous sounds of locker rooms assume a quiet, quiet that is broken only occasionally by some souls that venture out to play on the cold, half-frozen mud, often ignoring the cold temperatures in favor of a more suitable pretense of warmth.

We feel the change of temperature. We bear the impending silence. We wait. And in the meantime...

In the meantime, we wait. And remember.

The semester begins to require that we pay more acute attention to our reading assignment — midterm exams are only a few weeks away. Accidentally we discover that there is a seven to ten page paper on Plato's Republic due on Friday in addition to the two hundred and fifty pages of reading. The hall study lounges become the second homes of some of the dorm's residents. The restless silence of late fall is broken by the ever-present hushes of serious academicians.

The hall study lounges become the second homes of some of the dorm's residents. The restless silence of late fall is broken by the ever-present hushes of serious academicians.

Autumn is here, signalling a time for rest. Like the couple in Fawcett's The Night Before Christmas, we have all begun to settle down for a long winter's nap.

Heavy-weave sweaters, flannel-lined jackets, wool slacks and skirts are pulled from the bottom of stashed-away Notre Dame boxes. We await with bated breath, our jacket that will envelope the campus in the coming winter smooths. But in the furthest recesses of our minds, we visualize the beach scene that awaits us during spring break. Each day counts toward the next when the sun will be a little warmer and the wind less rampant. Future days occupy our few but ever-present wandering thoughts.

Spring will come, we know that. Often when the temperature has just dipped below a tolerable chill we curse the ensuing cold. But there is still hope in the warmth to come. The warmth of the sun will return once again to invite us to play in its presence and glory again in our memories of the good times.

Together we wait. Students, faculty and staff all suffer through broken-down heating systems, raging winds and hot coffee jugs. Things that we normally do collectively — studying, eating, praying — we seem to do with a more intense, unified vigor. There is something important about waiting together.

Notre Dame in autumn is about remembering and waiting for the new memories to occur. It is hope for the future while we wait in the present.
Music, like many other fields of entertainment, is a mosaic of trends which can run their course and change the field permanently. One such trend in today's music definitely has the potential to cause permanent change, and on that reason it cannot be ignored. The trend in question is the synthesizer's increasing commercial acceptance in popular music and its use by a growing number of new bands. Its importance is derived from those observations and other facets including its relative ease of operation and its ability to do anything musically. These mentioned facts include its relative ease of operation and its ability to do anything musically. These mentioned

reasons have caused its tremendous influence on England's rock scene and its noticeable impact on the name recognition of its guitarist. The chance of this occurrence is around and taunt the audience show and a large part of that production is done something, whether it be prancing around, or just playing plain looking pretty.

Mr. Neely will be providing a quiz on the album (and he does this with his usual skill for rock specializing) to reverts to a sort of Jim Morrison/Mooody Blues technique and more or lessChina's most rewarding pas- sages in an album review.

I would like to quote from the lyrics, but find I cannot do so meaningfully, to do so would require space. To mention a few names, for each song is so well constructed as to prohibit taking one or two lines out of context. Townshend, like any good poet, has a musically practical. The synthesizer found itself a major part of the PLC's small Faces they dropped the small "when a much taller Rod Stewart joined the band in the 1970's"

from a different point of view; the sound is reminiscent of What Are You With just a touch of Empty Glass thrown in for good measure. The synthesizer found itself a major part of the PLC's small Faces they dropped the small "when a much taller Rod Stewart joined the band in the 1970's"

rock trivia

This week I began the third year of this musically soft approach common to The Who by Numbers, a well-modulated music in the background of the piece conjures up almost tangible images of the tide. One song alludes to its origin in the title: "Face Dances II", and indeed, it might have worked better in the last group album than some material that was included therein. The song begins with a wonderfully light headed keyboard run that reminds one of the intro to that album's "Making records". "Expensively Bored" is one of the best tunes on the album, a sort of "Hotel California" from a different point of view; the sound is reminiscent of Who Are You With just a touch of Empty Glass thrown in for good measure. The synthesizer found itself a major part of the PLC's small Faces they dropped the small "when a much taller Rod Stewart joined the band in the 1970's"

The album review

Poetry in vinyl

I

another reason that the guitar will remain is because music's nature is every cycle content. Both folk rock and disco, for example, maintained extreme popularity for a relatively short time until their cycle ran its full course. Both of these genres have since lost their share of music, but surely have not produced vast permanent changes. The synthesizer is currently a cycle of popularity that will undoubtedly increase as the instrument is explored and developed, but will stall off and not be able to maintain a rating's clip high enough to replace the guitar. If it did retain all its popularity and the guitar's ability replaced, then every band would play synthesized music and every lis-ter-would buy synthesized music. This instance of an extreme change is highly improbable and ridiculous to even consider. That extreme change is improbable so because there will always be a group of romantics, nostalgia buffs, and guitar fans that enjoy that instrument's sound for one reason or another. The romantics will always remain and the guitar will be perpetuated in them, even if popularity totally shifts to the synthesizer.

The synthesizer is also very incoherent with the ideals of rock. Good rock and roll has always been spontaneous, exciting, timeless, and even somewhat rebellious. "My Generation", by The Who is a perfect example of great song because the whole band's inter-action is spontaneous, and because the song still excites and inspires audiences seven years after its release. People may argue that soft Cell's "Tainted Love" is exciting and fun, but the synthesizer is highly improbable and ridiculous to even consider. The synthesizer will not replace the guitar or engender other extreme alterna-tions. The synthesizer is a mellow synthesizer. The synthesizer is a mellow synthesizer. The synthesizer is a mellow synthesizer. The synthesizer is a mellow synthesizer. The synthesizer is a mellow synthesizer.

Random thoughts

Yes, I still have my job. My boss is graciously allowing me to continue writing — as long as I don't step out of line again. Thanks Chris. And thanks to everyone who offered me a little break.

Cruises this week, folks. Just a few random thoughts from my slobby notebook.

Note: Dave's running attack was dealt a serious blow Saturday when Greg Bell suffered a stress fracture of his right fibula. Bell limped off in the second quarter. He returned to the stadum later in the game, sporting a cast on his leg. Initial reports indicate that he will miss four to six weeks of action.

The divisions have been revamped. Does anyone understand the new interhall football rules? And what is the purpose of this new arrangement? The purpose of this new arrangement is to enable the smaller, weaker teams to make the playoffs.

First served

National Football League

Player of the Week — By the Associated Press. (In the past three games, of course, many Wildcat players have been deserving of the honor.)

Second served

Players have fought hard to be on the No. 1 backfield. As a result, both have improved over the past few weeks.

By the start of the season, Carter held the starting job which he's been his for the previous two seasons. It was evident in the first two games, however, that Gaur was forced to use both almost equally. In the Michigan game, for example, Carter carried 14 times for 59 yards, Bell rushed 20 times for 95 yards.

With both backfields increasingly, the Irish are assured of a consistent running game. But without Egg, the Irish will be forced to use nearly the entire team against Michigan State. Highly touted freshman Alan Pinkert will be Carter's back-up. From then on, it will be up to the second-stringer in RELYING on Carter. But admits that the freshman has not been tested in a game situation. An injury to Carter (he's missed five games in the past two seasons due to injuries) could be disastrous to the team.

So, Mr. Bell, if you're reading this — please heal quickly.

Does anyone understand the new interhall football alignment? If so, please explain it to me.

The divisions have been revamped. Under the new system, based on total entrants for the season, teams will be divided into leagues based on living unit under-graduate population. (According to an explanation)

Players announce all-star games

WASHINGTON (AP) — The striking National Football League Players Association yesterday formally announced plans for a potential 19-game series of all-star games — but said it had a stadium lease for only the next two seasons. Although union officials say they have "hence" 20 stadiums to which they admit they have only signed a contract for the one at the RFK stadium. A contract was not signed for the second game, tentatively set for Monday night, Oct. 11, at Franklin Field in Philadelphia, is expected to be signed today.

The games will be broadcast nation-wide by the Turner Broadcasting System and a network of 73 television stations covering more than 60 percent of the nation. The games will be blacked out for a 35,000-mile radius unless sold out.

"We regret very much that the regular NFL season is in jeopardy," said Turner, the Turner Broadcasting System board chairman, said in a prepared statement. However, we remain committed to providing fun across the country with top-quality professional competition through these NFLPA all-star games.

The players association, which represents the NFL's 1,500 players, went on strike on Sept. 21 following the breakdown of negotiations. The new collective bargaining agreement with the league.

The games will help to get to the心 of putting on the games but of the incentive he gives to starting backfield Phil Carter. Carter and Bell have been doing for the starting backfield job. According to an explanation to me.

Coach Digger signs first recruit of the year

Digger Phelps has once again thrown the competition in the recruiting game. At least as far as time is concerned. Phelps received a verbal commitment from a basketball recruit yesterday, the first high school season to announce his intentions.

The player is John Bowens, a 6-8 forward from Warren, Pa. Bowens averaged 27.3 points per game over the three years of his high school career to this point.

"We are real happy that John has decided to attend Notre Dame," Phelps said. "We think he's the kind of player and, more importantly, the kind of person that will fit in well with our program."

Mansfield High, who later went on to a great career at Maryland and in the NBA. Bowens visited Notre Dame last weekend, and quickly decided on Notre Dame. He plans to sign a national letter of intent on Nov. 20. That is the first day the NCAAs allows players to commit to institutions.

Bowens has pulled down 1.624 career rebounds in three years at Warren Area High School — an unofficial Pennsylvania record. He averages over 20 rebounds per game. He also shoots roughly 62 percent from both the field and the floor.

Last year, Phelps got the nation's first verbal commitment when Jim Dolan of Thorn's River, N.J., announced his intention to attend Notre Dame. Dolan was the first of five players who eventually signed with Notre Dame as freshmen this year. Bowens is the first verbal commitment when Jim Dolan of Thorn's River, N.J., announced his intention to attend Notre Dame.

RUGBY — The rugby team overcame some early-game sluggishness to earn a come-from-behind 9-7 victory over Purdue last Saturday.

After Purdue had taken a 4-0 first-quarter lead to open the scoring, Brian Moynihan scored for the Irish to even the score. Purdue added a penalty kick late in the first half to take the lead to 6-4. Purdue was able to make the score respectable with five goals in the final period against the Irish reserves.

Notre Dame was able to play all 19 of the players on the team — a rare feat seen, especially in season openers. The team travels to Loyola of Chicago this weekend for an invitational tournament.

ND team results

Fall sports in full swing

WATER POLO — You might say that they blew Purdue right out of the water. Or you might say that Purdue was simply outclassed. Any way you put it, though, the Notre Dame water polo team was close to perfection as they annihilated the Boilermakers 14-7 Saturday in the Irish's season opener.

The Irish were led by three freshmen who combined six goals on the day as the Irish scored 14 goals. Mike Roberts was deadly on offense, as he scored six times against a porous Purdue defense. Fellow first-year player Steve Blaha had three goals and Sean Farley added two more. Goalie Ben Willis tied two goals and junior Mike Erhard also had one to finish the scoring for the Irish.

Notre Dame jumped out to a quick 4-0 lead at the end of the first quarter and increased the lead to 8-1 by halftime. After each team scored once in the third quarter, Purdue was able to make the score respectable with five goals in the final period against the Irish reserves.

Notre Dame was able to play all 19 of the players on the team — a rare feat seen, especially in season openers. The team travels to Loyola of Chicago this weekend for an invitational tournament.

Soccer — The women's B team dropped its record to 2-2 as they fell 5-0 to St. Mary's on Sunday. With 15 minutes left, the score was still close at 1-0. But St. Mary's was able to put on a late game offensive surge and score four more goals in the closing minutes to hand the team its second loss in as many games.

The A team is idle this week.

Ruling favors NFL players

WASHINGTON (AP) — A labor law judge yesterday ruled in favor of the National Football League Players Association in its effort to force the NFL to open some of its records to union negotiators seeking a new contract.

Administrative Law Judge Julius Cohn held that the NFL Management Council, the league’s bargaining agent, had violated the National Labor Relations Act by refusing to furnish the players’ union with individual player contracts and the non-monetary provisions of TV and network radio contracts.

The 14-page ruling stems from three days of hearings that Cohn held in June, approximately three weeks before the players’ association contract with the NFL expired. In ruling that the league has violated the law, Cohn thus upheld the player association’s unfair labor practice charge and has recommended to the full five-member National Labor Relations Board that the league be ordered to turn over the documents to the union.

The decision by Cohn may well be appealed to the National Labor Relations Board. Cohn’s ruling, which comes on the heels of the NFL players’ practice strike and we think this is the first step in proving this allegation. It’s a nice, clear signal to all the owners that this is a serious step toward establishing this as an unfair labor practice strike,” Garvey said.

Garvey noted that under federal labor law, management may not replace employees whose strike has been declared the result of an unfair labor practice by their employees.

Negotiations on a new collective bargaining agreement are scheduled to resume in Washington, D.C., on tomorrow afternoon.

To date, 14 regular season games have been wiped out by the strike, the first season without in the league’s history.

“It is well settled that the duty of an employer to bargain in good faith includes the obligation to disclose to its employees’ collective bargaining representative data that are relevant and reasonably necessary to its role as bargaining agent,” Cohn said in the 14-page decision.

The league’s 5,600 players struck the NFL on Sept. 21, claiming the owners’ failure to bargaining had forced the strike.

“It is not such a major thing. The timing seems to have been because we are ready to go into another negotiating session. The players already have examined player contracts, which they’ve been given the right to see again by the board,” But Ed Garvey, executive director of the NFLPA, left it a significant decision. Garvey said of the decision.

“We were extremely pleased,” Garvey said of the decision. “It’s important because we are alleging that this is an unfair labor practice strike and we think this is the first step in proving this allegation. It’s a nice, clear signal to all the owners that this is a serious step toward establishing this as an unfair labor practice strike.”

SMC Belles shut out Manchester

The Saint Mary’s Tennis Belles have done it again. They had an easy victory yesterday against Manchester College, winning 9-0. The team switched the usual roster just a little to give all members of the team a chance to play.

Heather Temodew, at singles, defeated Celena Crume 6-2, 6-1. Christine Beck, at second singles, defeated Wendy Hilligoss 6-1, 6-0. Kim Kaigi, at third singles, won 6-1, 6-5 over Janice Stryker. Allison Peller, at fourth singles, beat Tracy Price 6-1, 6-3. Maureen La Fontana, at fifth singles, beat Chrissy Crogan 6-0, 6-7, 6-0. Freshman Karie Casey hung onto a three-set match to defeat Cindy Petry 2-6, 6-4, 7-5. Coach Killeen was pleased at her fine coi i match.

The doubles teams were also victorious. The first doubles team of Beck and Peller defeated Crume and Hilligoss 7-5, 6-0. Temodew and Kaigi, playing second doubles, defeated Strecke and Price 6-1, 6-3. Diane Schnell and Michelle Spinosa, playing third doubles in their first match of the season, were victorious over Crogan and Petry 6-1, 7-5. Coach Killeen was pleased with the girls’ playing and is looking forward to the match today against Taylor University in Uplands, Ihsiana at 5 pm.

Allison Peller, at fourth singles, beat Tracy Price 6-1, 6-3. Maureen La Fontana, at fifth singles, beat Chrissy Crogan 6-0, 6-7, 6-0. Freshman Karie Casey hung onto a three-set match to defeat Cindy Petry 2-6, 6-4, 7-5. Coach Killeen was pleased at her fine coi i match.

The doubles teams were also victorious. The first doubles team of Beck and Peller defeated Crume and Hilligoss 7-5, 6-0. Temodew and Kaigi, playing second doubles, defeated Strecke and Price 6-1, 6-3. Diane Schnell and Michelle Spinosa, playing third doubles in their first match of the season, were victorious over Crogan and Petry 6-1, 7-5. Coach Killeen was pleased with the girls’ playing and is looking forward to the match today against Taylor University in Uplands, Ihsiana at 5 pm.

Faust makes offensive changes

By KELLY SULLIVAN
Sports Writer

After all defeats at the hands of Michigan and Purdue, Gerry Faust figured to have little trouble getting his team ready for its first two opponents. 

But Notre Dame's coach in making his predictions, was being a bit cautious. His team will look past Michigan State Saturday in spite of their winless record.

"Somebody asked me if I thought our team was good enough right now to beat the rest of the teams on our schedule," said Faust, "but to honest, I couldn't care less who we've got on the rest of our schedule — we've got MSU right now, that's all I know." 

"They scare me, they really do," he admitted at yesterday's press conference. "I've said all along that they're one of the toughest teams on our schedule. I know they're very hungry for a win and we have to be mentally and physically ready." 

As the starring the Spartans' roster, the statistics on MSU's kicking game caught Faust's eye — their punter, Ralf Majdziejko, is averaging better than 45 yards a boot, and made good on a 62-yard field goal against Illinois earlier this year. 

"I can't pronounce his name, but those statistics are enough for me," laughed Faust. "All I know is his number." 

Faust knows a lot about Michigan State because they remind him of last year's Irish — the Spartans have lost three straight games that could have been won with a break here or there. 

"They lost to 19th-ranked Illinois (23-16), but they ran out on them as they were about to score. They lost to 1st-ranked Ohio State (31-10), but the score was tied going into the fourth quarter. And they lost to 16th-ranked Miami (25-22), who got a touchdown with less than 30 seconds to go, and we all know how tight it is to play Miami down there. Michigan State is ready to go, and I just hope they do it after we play them." 

Defensively, MSU's strongest department is its secondary — they've allowed just three TD passes in three games. "That's not many when you're playing good passing teams like they have," Faust said.

Offensively, the Spartans have the potential to be a great passing team, too. "All we remember the problems their quarterback (John Leiser) caused Notre Dame two years ago, and their receivers are probably the most talented group we'll face all year." 

The Irish secondary came under some criticism after allowing Purdue 278 yards in the last Saturday, but Faust doesn't feel it was completely justified. 

"Our secondary did a good job against Purdue. Some people don't think that way, but I'd have to disagree. Most of the passes they completed were to backs coming out of the backfield — and we just missed tackles. Our problem was in our second line of defense, not our third." 

"In practice this week, the Irish will work a lot on one-on-one tackling to alleviate that problem. But something they can do nothing about — the injury situation will cause trouble for a while." 

Since Greg Bell will miss at least the next five weeks, Faust and his staff have moved two freshmen — Allen Pinkett and Lester Fremmons — to No. 2 and 3 tailback, respectively. 

"We may not use Pinkett to the extent we used Greg Bell, but he will definitely breathe Phil Carter," explained Faust. 

"Pinkett, a 5-7, 170-pounder, is stronger than his vital statistics suggest. The Sterling, Va. native benches 595 pounds, more than any of his teammates in his freshman class. He's a fine prospect," praised Faust, "and he's shown some great signs at practice." 

Sophomore fullback Mark Brooks will also see duty at tailback, while classmate Smith learns Brooks' position. Smith, who intercepted at running back last fall, requested a trial at linebacker in the spring. 

"Chris asked us to move him back on offense last week," Faust explained, "so we're going to put him at fullback since we lose both Sweeney and Moriarty next season. Mark will help us out at fullback for awhile. He already knows the offense, so he'll make the adjustment pretty easily." 

Senior Mike Shomer is back on the practice field after rebounding from arthroscopic knee surgery, but the two-year starter on the offensive line has to earn his spot all over again. 

"We've got a guy (Mike Kelly) doing a great job there right now, and it wouldn't be fair to just give him the job back to Mike," said Faust. "If Mike shows us that he's one of our five best linemen, we'll put him back in or we'll make a place for him." 

DEFENSE DELIVERS — The Notre Dame defense held Purdue to a measly net total of 11 yards rushing after holding Michigan to just 41 yards on the ground. That translates into 26.1 yards-per-game average, and makes the Irish No. 1 in the nation in the latest NCAA rushing defense statistics. 

GETTING THE TIME — Notre Dame's offensive line has been doing a number on its opposition this season. Quarterback Blit Kiel has been given the time to look for alternative receivers and has been completing his passes at 61 percent efficiency. The team has run for 665 yards in two games, with much of the credit going to the line of seniors Tom Thayer, Mark Fishback, Randy Noss and Mike Kelly. Games are won and lost in the trenches, and this unit is gaining the confidence and the consistency needed to win. 

AGAINST THE SPARTANS — The Irish have only recently begun to dominate their conference opponents, but on Saturday the MSU defense will also see duty at tailback while taking on the 12th of the last 13 ballgames, to bring the series record 50-16-1. Currently the Irish are on a six game winning streak, with their last loss to the Spartans in 1975 — a 10-5 decision that marked the first defeat for then-new coach Dan Davey. 

Michigan State has come home against the Irish of 8-1, but Notre Dame has taken the last six contests played in East Lansing, last losing in 1968, 21-17. 

STRENGTHS OF SCHEDULE — Notre Dame's current schedule is ranked the third toughest in the nation by the NCAA. The NCAA rates schedules based on team records from last season. Only Florida State and Ohio State have more opponents rated the third toughest in the nation. Michigan State's schedule is no easy path in itself. The Spartans are playing their fourth game this season against an AP Top Twenty opponent. They have one game against each of the leaders in the Big Ten, Ohio State and Miami coming into this week's game with the Irish. 

SECONDARY WOES — For the third week the Notre Dame secondary will be severely tested by a good quarterback. Spartan quarterback John Lesica is tied for ninth in the nation this season for 538 yards. His primary receiver has been Otis Grant, who has 14 catches for 268 yards and two touchdowns.

Leiser threw for 204 yards against the Irish in 1980, the last time the two teams met in East Lansing. That day, ND escaped with a 20-21 victory, but the outcome was in doubt until the final gun as 25 points were up on the scoreboard in the final 10 minutes of play. Michigan State's ground game will also test the Irish defense as senior Tony Ellis enters Saturday's game with 197 yards on 39 carries. Ellis is backed up by sophomore Aaron Roberts who has 100 yards on 30 carries despite missing last week's game with some rib. 

GETTING THE FIRST — The Notre Dame offense has been converting on third down this year at 39 percent efficiency — as compared to just 29 percent last season. The Irish have made 40 first downs already this season making only 177 in 14 games last fall. 

By the NUMBERS — Notre Dame holds a prominent place in this week's NCAA stats:

- Larry Moriarty is 13th in rushing at 103 yards per game, and ranks 19th in scoring at nine points per game.
- Phil Carter is 16th in rushing at 105 yards per game.
- Tony Hunter is 13th in receiving at 5.5 receptions per game.
- Blit Kiel is tied for 20th in passing with a 42.5 yard average.
- Mike Johnston is tied for 16th in field goals with 7 per game.
- Notre Dame ranks 7th in rushing offense at 167 yards per game.

- FAUST MAKES OFFENSIVE CHANGES

BRAINS AND BRAWN — At Notre Dame 95 percent of the football players obtain a degree. A 1977 National Championship team, which held a 45-1 record over the past six seasons, was no different. At least seven members from that team are still proving that sports and physical ability are not mutually exclusive. Ken MacAfee, Jim Heir, Tom Holley, Phil Carter, Tony Kiel, Mike Kelly, Scott Pinkett, and Larry Hufford are in medical school.
