Student Senate

By TOM MOYLE
Staff Reporter

The Student Senate was renamed the Student Government Activities Board by a 12-4 vote at last night's student senate meeting.

The primary effect of the change according to Student Body Presi­dent Lloyd Burke, will be to give the Senate more control over the student government budget. "As it is," he said, "not one elected official is responsible for the use of funds" be­cause "appointees affect half the budget, while elected officials have little control over how money is spent." The purpose of the constitutional amendment, Student Body Treasurer John Eichenlaub said, is "to change the negative connotation that student government and the Student Senate have on campus as 'do-nothing groups.' The amendment's sponsor, Patsy Borchers, exe­cutive coordinator of the student government, said its intent is to more fully integrate the Student Union with student government.

Student Union Director Steve Strake said he no longer is in favor of the change because it would "only cause confusion." Eichenlaub stated the name change would actually decrease confusion in the student government, enlarging "the purpose of the board" in its name.

Another effect of the name change, noted Student Body Vice President-elect Pegge Prevukovich, will be to "increase the visibility of Student Government." Brian Callag­han, Student Body President-elect, agreed "most people do not see the connection between the Student Union and student government," but with the change, "student government would carry more weight and would show influence." Senior Class President Mark Ma also agreed that "no relationship, except for the budget," Eichenlaub stated at Student Union and sen­dante are "not supposed to be

McBrien promotes ND as Catholic institution

By POLLY HUDAK

"Notre Dame is probably as Cath­olic a university as you could find in this country," says Father Richard McBrien, president of Notre Dame's theology department. He goes on to explain what "Catholic" means in terms of his recent publication, Cat­holicism, and what it means in today's society.

Sacramentality, mediation and communion are the fundamental ideals incorporated by McBrien in his work and in the opening pages of the "First Principles" (Studies and Guide­lines for Excellence) Report. In or­der to maintain the Catholic ideals, the authors of PACE stress that the University must envision God in all things. A Student Union as "a hub for persons and events and material objects." The PACE Report also states that

the ideal Catholic relationship with God is committed not to au­tomate.

McBrien locates the role of Cat­holicism in education as an open-mindedness to all areas of in­tellectual inquiry which leads us to truth. He .

Q&A

Theresa Tull

Q: When did you join the State Department, and what is your cur­rent position there?
A: I entered the department in August 1963. I am now the director of the Office of Human Rights, and that is one of three offices in the Bureau of Human Rights and Humanitarian Affairs. The office that I head monitors human rights developments around the world.

Q: How are human rights developments monitored?
A: It is an ongoing process. There is information coming in daily. The first and most important source of information is the foreign service of­ficers at the embassies. We also meet in the bureau with foreign officials as they come through, and with op­ponents of the various regimes. We try to deal with the ins and the outs. And we receive a variety of information from non-governmental organizations and are assessing certain elements of human rights in various countries. We read that information. We do not always agree with it, but we try to take it into account.

Q: For what purposes do you use this information?

Naturalist reflects on trip with Thoreau

By HOLLY ANN HINSHAW

Aha! The Old West, freedom, individual survival. Edward Abbey, naturalist and modern cowboy, developed these themes in his essay "Down the River with Henry Thoreau" last night as part of the Soph­omore Literary Festival series. Abbey reflects on his trip down the river as "loafing." He calls us the "lackluster nation," in contrast with the rest of the world's nations, which are either surviving or fighting.

Abbey also says that survival is difficult in our "expanding empire of industrialization." He feels we cannot manage with dwindling resources. He used Thoreau's idea of having one inhabitant per square mile as the ultimate solu­tion to the resource problem. Through his down-to-earth humor, Abbey presented a message concerning our "overdeveloped" nation - a na­tion where no great man has been produced since the killing of the great Indian leaders in the nineteenth century. He said

Headline: A headline-making career

The Observer

By The Observer and The Associated Press

I grew up reading newspapers. One of my earliest memories of journalism — when I was four — is of being blown through the classified ads in The San Francisco Chronicle by Hurricane Ida. Any page I could see had to be important. It didn’t matter, since I couldn’t read anyway.

Once sent to school, I not only learned to read, but also eventually became involved in “student journalism,” a school subject that for this day seems never ending. One of my earliest efforts was to write about events at my high school for the local paper, The Santa Cruz Sentinel. My editor, who became a close friend of mine, told me that most articles written by students were dull and that I should make mine differ.

The Sunday following my first meeting with him, 50,000 subscribers to The Santa Cruz Sentinel were treated to my first “inside story,” a look inside my school. Although my school resented the honest reports I presented on flagrant class contests, audiences, and romances. And my opinions on the excellence of the school was also taken quite offensively.

Not only did I learn a valuable lesson in responsible journalism, but also one on the limits of the official administration for intelligence. Dr. Dirckstra, paid a higher price to operate in 1982, but we haven’t lost them bad enough for them to make major changes. They’ve just made adjustments to far, but that day will come. — AP

The murder of female babies, a frequent practice in rural areas in the neuropathogens of the brain, is enforced by fines as high as 20,000. "The first signal that this day was never ending; among the valley air was choked with too much wood smoke, a little red light was beamed in each home."

The government prohibits more than one child per family. China’s new program is directed to putting married women into other men’s families. Girl babies are drowned, so that the parents can take care of their parents in old age, inherit property and bring wives those who try to be publishers are strangled, tossed down public toilets and left to die in the wilderness of exposure.

The advantage of being an arts and letters student is that you can do almost anything you want with your degree. For instance, this week I thought to myself that when those letters from the alumni office sweep like vultures into my mailbox, I want to have something to feed them.

To begin I questioned my origin placed a life in journalism, as I was always bored by the spectre of advertising, and I can track the faces of publications. It was varying, as usual.

The seminar was held at the headquarters for Knight-Ridder Newspapers. They are one of the largest chains of papers in the country, and unlike the more well known Gannett, which raided its papers of assets to start up the losers USA Today, Knight-Ridder Newspapers has made a profit for its solid journalism and excellent editing.

"During the week I had the pleasure of working with some very talented people. Most were editors from papers in towns like Detroit, Philadelphia, Boulder, Akron and Tallahassee. What impressed me most during the day at the seminar and through the night at ‘Johnny Radio’s Lobo Lounge’ was not just these individuals’ capacity for beer. It was their dedication. Most of them could double their salaries by quitting journalism and getting a job in some other in-

Commencement Weekend housing

**Students must demand extension**

By MARY EILEEN KENNEY  
News Staff

With commencement weekend only 82 days away, the Commencement Accommodations Committee is urging all undergraduate students who wish to remain on campus that weekend to request written permission by March 1.

To qualify for extended housing, students must be a member of an organization connected with commencement weekend or have a brother, sister, or fiancé(e) who is graduating.

According to Peter J. Lombardo, conference coordinator the committee has mailed brochures to the parents of prospective graduates. The brochures state the guidelines for securing housing and meal service for May 13, 14, and 15 only. The housing and meal option is available to all parents and guests of the prospective graduates and all requests will be handled on a first-come, first-served basis. Requests must be received from the parents of prospective graduates by April 22. The Commencement Accommodations Committee will be unable to honor requests for housing and meal services for parents and guests until it has received an accurate account of the number of undergraduates who require accommodations for the weekend.

Lombardo expects 4,000 parents and guests to reside on campus and participate in the commencement activities this year. The Commencement Accommodations Committee has published a tentative schedule of events for the weekend which includes: a lawn concert performed by the university concert band, Phi Beta Kappa installation, the Baccalaureate Mass, a cocktail party and buffet supper, and a concert performed by the University of Notre Dame Glee Club.

Hindu/Catholic speaks

**Christians urged to be ecumenical**

By PATRICK MULLEN  
News Staff

"If Christianity wants to be taken seriously in the world, it has to take other religions seriously," he said.

Panikkar, one of the world's leading experts on "cross-cultural religion", philosophy, and economic and political systems, holds doctorates in science, philosophy, and theology and has taught at Harvard, Mysore, and Benares (India) and is presently teaching at the University of California. This was the son of a Hindu father and Catholic mother.

Panikkar is a man well-versed in the different religions and philosophies of the world. His non-Westerners cannot accept a religion which has no basis in their culture. "Christianity," Panikkar said, "exists and still exists as a foreign body in the East.

Panikkar said that Easterners would have little difficulty accepting Christianity if Christians abandoned their "triumphalistic" ideas of their religion and culture and conformed their views with those of the rest of the world. Panikkar spoke of the necessity of establishing a "pluralism" in the world through which all cultures would come to the realization that these religions are not the only way to the ultimate truth. Once different cultures accept other religions, they accept other cultures, said Panikkar.

"One cannot take a culture seriously if one does not take its religion seriously."

The lecture was sponsored by the Kellogg Institute for International Studies, the Theology Department, the Economics Department, and the O'Neill Chair in Education for Justice.

Raimundar Panikkar

lecturer centered on the importance of the Western and Eastern cultures developing a mutual understanding of each other's religions. He emphasized that the Western world needs to come to the realization that "the Christian concept is far from being universal."

Christians are convinced that only their religion holds the ultimate truth, said Panikkar. He said that Christians should understand that Christianity is based on Western culture and on Western understanding and is therefore not applicable to all cultures. He noted that Christians have tried to proselytize for centuries by establishing colonies and missions in the non-Western world, but have had little success because

**‘Snow Week’ continues despite spring weather**

By MARGARET FOSMOE  
Saint Mary's Executive Editor

Planners of the first annual "Snow Week" Festival at Saint Mary's were expecting a little help from Old Man Winter, but he did not cooperate.

Nevertheless, Senior Class President Beth Bunker insists enthusiasm for the festival hasn't melted away.

"I think it's going to be even better because of the weather," said Bunker. "We might have to change the name to Snowy/ Spring Week, but we encourage everyone to come out and enjoy themselves."

Today marks the opening of the "Snow Week" Festival at Saint Mary's, sponsored by the Senior Class. The festival events will remain the same, regardless of the recent spring-like weather.

"Snow Week" activities will take place daily, through Friday.

An ice cream social will be held tonight from 10:30 p.m. to midnight in the LeMans Lobby. Cost will be 25 cents per scoop.

Tomorrow the singing group "Trinity" will perform in Stapleton Lounge from 8 p.m. to 9 p.m. Cost is 25 cents and refreshments will be served after the performance.

Thursday's activity, ice skating at the South Bend Park District rink on Jefferson Boulevard, was scheduled for 4 p.m. This event will be cancelled unless winter weather reappears.

"Snow Week" closes Friday with a Happy Hour at Rafferty's Park from 4 p.m to 6:30 p.m.

professor of management, elaborates further on the concept of community at Notre Dame. The basic element which he believes keeps the university family together is a unique tradition of administration. Tyson refers to the source of this continuity as Notre Dame’s “mission statement,” or collection of ideals and goals which distinguishes the University as a leading Catholic institution. According to a case study conducted by Tyson several years ago, Notre Dame’s mission statement is built into the University’s heritage so that all who experience Notre Dame become aware of the Catholic ideals it defines. There is little apparent difference among students, faculty and administrators in their knowledge of the university mission, as well as their perceptions of the mission’s impact.” Tyson concedes in his study.

In what ways do individuals become more aware of Notre Dame’s Catholic message? Tyson offers an interesting supplement to the efforts of the theology department.

“Knowledge of the University’s mission statement is frequently attained in an informal and tacit fashion,” he claims.

“By an informal and tacit fashion,” Tyson means that members of the Notre Dame community come to know the mission statement through such basic campus components as the buildings, liturgies, figureheads, and various university symbols.

“Even the ringing of Sacred Heart’s bells conveys the message,” Tyson notes as he reflects on the powerful tradition which continually touches the growing community of Notre Dame. In summarizing his ideas, Tyson describes the unique continuity as “an A1 example of organizational saga.”

Professor Jay Dolan, director of the center for the study of American Catholicism, acknowledges the fact that Notre Dame supports a unique Catholic community. Nevertheless, he feels that since Vatican II, Catholicism has been redefined. Consequently, the modern Catholic university needs to continually reevaluate its ideals.

“Thirty or fifty years ago, ‘Catholic’ could be defined in more concrete terms,” Dolan explains. “Since Vatican II, the ideals Catholicism represents no longer are so clear; there is much more questioning.”

Dolan believes that in establishing its best Catholic identity, Notre Dame should “concentrate less on the definition of Catholic and more on what is Christian behavior. Then what is truly Catholic will come naturally.”

In evaluating the areas through which Notre Dame might improve its Catholic identity, McBrien offers some fundamental suggestions. The expansion of the theology department to accommodate more faculty would be a valuable improvement. McBrien argues, as it would provide the opportunity for wider selection of theology courses to students. McBrien feels that the two semester theology requirement is sufficient with respect to present faculty resources.

McBrien and the rest of the theology department, however, feel that “three semesters of undergraduate theology would be ideal; it is only a matter of time.”

Additional areas on McBrien’s list of improvements for Notre Dame’s situation was the end of January this year, we saw definite, clear-cut improvements in the past six months in the situation in El Salvador.

The certification document that you refer to addressed four areas that Congress requires you addressed: reforms in the economic and agricultural situation, movement toward popular participation in government, control over the armed forces and efforts to end human rights abuses. Fun in the February sun

The quads are alive with action as the warm weather continues. It seemed like everyone "blew off" yesterday afternoon to enjoy the beautiful sunshine. Even a wayward puppy (below), who has been temporarily adopted by some Walsh residents, got into the act. And luckily, there's no end in sight, as today's forecast calls for continued mild temperatures.

**Marketing Update**

**General Motors Corp.** is conceding that the Japanese are better at building small cars by joining with Toyota Motor Corp. to produce a small-car compact in California, industry analysts say. The move also will teach GM, the world's largest automaker, how to build smaller cars with few quality problems, and how they manage their plants, analysts said. The deal indicates to the public "GM has gone out and selected Toyota and is saying 'Hey world, Toyota builds a great car, we want to sell your product,'" said Marv-k Keller, analyst at Paine Webber, Mitchell Hutchins & Co. in New York. During the past several years, the Japanese have earned a reputation for making profitable, high quality subcompacts, while U.S. automakers have had difficulty recovering their expenses on their small cars. - The Observer

**Economic Update**

Six Persian Gulf oil-producing nations facing a possible worldwide price war called an emergency meeting for yesterday. A Saudi newspaper said they planned rollbacks of up to $7 a barrel. The state-run Saudi Press Agency said ministers at the Saudi Gulf Cooperation Council would meet in Riyadh to discuss "current trends in the petroleum market" because of price reductions by Nigeria, Britain and Norway. A price war would benefit gasoline consumers in the United States by at least $1 a barrel if there is a price cut to $30 a barrel. But major reductions in prices would affect the oil market.

Norway, which has large oil reserves, would gain a two and a half-cent drop at the pump. The cut in price of a barrel of crude oil represents a two and a half-cent drop at the pump. But major reductions in prices would affect the oil market.

**Science Update**

Earthquake monitoring equipment -- in the crater of Mount St. Helens reveals that the lava dome is still building. But scientists say the weather has been too cloudy for them to make many observations of the resulting figures. In the current eruption, she said, Tuesday was the last time U.S. Geological Survey crews were able to enter the crater and confirm that the eruption was continuing. In each eruption of Mount St. Helens, she added, seismic activity is monitored to show the total energy released by the volcano and a graph is made of the resulting figures.

**ND research grants announced**

More than 90 percent of the $1,037,448 in research grants to the University of Notre Dame during January were awarded to researchers from the College of Science. The $870,957 awarded for research in chemistry, biology and mathematics was the largest amount. The $52,000 awarded to the College of Engineering was the second largest amount. The $59,744 awarded to the College of Business and Economics was the third largest amount.

**Quasar's energy holds mystery for scientists**

Quasars (short for quasi-stellar objects) are relatively new phenomena in the study of the cosmos, having been first identified just twenty years ago (by Schmidt and others) as bluish, starlike objects at the fantastic distances of 12 billion light years and more. Being visible at such great distances implies that quasars produce an equal or greater amount of energy (about the equivalent of 10 trillion of our suns), but the biggest surprise is their relatively small size, much less than that of an average galaxy. This astronomical paradox of size and energy has led astrophysicists to the conclusion that the heart of some of the most distant quasars lie black holes, the remnants of millions or billions of stars that have collapsed together into virtual nothingness, leaving behind only their immense gravity and torrential internal energy. While the majority (more than 90 percent) of quasars are classified as visible in action, it is the distant, usually invisible ones (those with black holes) which are the creating the most excitement.

What, how, exactly, do black holes get all of this energy and gas? What is the fuel for these quasars? The answer to this question is at the heart of the controversy about the origin of the energy and matter in these distant quasars.

What if you could look all the way out — all the way to the last thing observable? Is there such a limit? Is there a boundary in space where there are no more physical objects anywhere? Astronomers are considering this question and some believe the answer to be yes.

Col. Tech astronomer Martin Schneider of Cal Tech and Idaho leg of Aviation Week have pinned their hopes for the future of the universe on the idea of intergalactic quasars, a distance beyond which no other objects appear.

Quasars (short for quasi-stellar objects) are relatively new phenomena in the study of the cosmos, having been first identified just twenty years ago (by Schmidt and others) as bluish, starlike objects at the fantastic distances of 12 billion light years and more. Recent bishops' letter addresses war and peace

The nuclear arms race has thrust the world into an age of crisis. During this crucial time, the possibility of nuclear war threatens the existence of life on our planet. In an address to Warner, the following editorial presents a member of the committee and attended this order to present the moral and religious resources of the Catholic tradition. Due to his editorial entitled. The author's self-contradiction is

P.O. Box Q

Challenge

Dear Editor,

I am writing this letter in response to the editorial entitled: "The challenge to be pro-choice," which contained several contradictions.

The author asserts, "Our concern should be for the quality of our democratic pluralistic society." Instead, as responsible social individuals we should seek to advance the quality of human life. How ironic it is that the author should lament the life of a fetus when we are more likely to cause "damage" in the same editorial wherein he or she states, "to deny this fetus a right to life implies the idea of an abnormal life is useless." The author's self-contradiction is

Disturbing view

Dear Editor,

I would like to state this comment as an expression of my immediate and somewhat disturbing reaction to Robert Lloyd Snyder's editorial of February 15, "America: Land of Beauty and Advantage." Without further apology, I would like to challenge the Smiler's notion that our nation's foreign policy is enlightened and just. As a country, we have

Box Q Notre Dame, IN 46556

The Observer is the independent newspaper published by the students of the University of Notre Dame and Saint Mary's College. It does not necessarily reflect the policies of the administration of either institution. The newspaper is reported as accurately as possible. All material reproduced with permission from majority of the Editorial Board. Comments, letters, and the Inside Column depict the views of their authors. Column space is available to all members of the community, and the free expression of varying opinions on campus, through letters, is encouraged.

The weak points of the second draft continue to be raised. For example, is there not more validity to the Catholic just war theory than implied in the present letter? Does the West have the right and duty to defend its citizens because of its moral superiority (human rights, free elections)? For the American and the French, claims that the final version will stand as a testament to the greatness of the United States and the Soviet Union as well as expanding upon the "just war" theory. In addition, Warner predicted that the next topics to be addressed and more clearly resolved during this past weekend would include: a more in-depth scriptural analysis of both Old and New Testaments, a more clearly delineated argument of the deterrence issue and the bishops' conclusion, as well as a series of peace, alternatives and pastoral practices that would educate and involve the lay community. There can be no doubt that each step towards a final version of the pastoral letter serves to increase the effectiveness of such a letter as well as initiating a series of dialogue that has international ramifications. Yet, it is also important to note that along with the bishops' struggle to establish a "theology of peace," comes an renewed appreciation of the Catholic tradition and respect for the role it is to play in the future.

Founded November 3, 1966
The Fellowship of Christian Athletes will hold a meeting tonight in St. Ed’s Chapel at 8 p.m. All are invited. — The Observer

Any remaining participants in the men’s underdgrad and men’s grad singles racquetball tournaments should call the NVA office at 329-5630, 7:30 and 11:30 a.m. and 1:30 p.m. until one player drops out. A $210 deposit will be required for each tournament. — The Observer

Tomorrow is the deadline for registration for two interhall tournaments. The open racquetball tournament, open to anyone on campus—students, faculty, and staff will be a single elimination tournament, best of three games, one round per week. A wrestling tournament also will be held—the weight classes are 123, 136, 149, 164, 175, and unlimited. Hail may sign up as teams. Call 239-6000 or stop by C-2 of the ACC to register for either of these tournaments before tomorrow. — The Observer

Windsurfer class starts today for Free University, at 7:30 p.m., 105 O’Shaughnessy. At that time, and a place price is set for a simulator session and a $3 fee will be collected for supplies. Any questions, call WIND at 3182. — The Observer

Prospective cheerleaders take note. There will be an organizational meeting for those interested in trying out for the team on Tuesday, March 1, at 7:30 p.m. at Ratskeller — The Observer

The Notre Dame Rowing Club will hold a mandatory meeting tonight in the LaFortune Little Theater for all those interested in rowing on campus this coming season. The meeting will begin at 9 p.m. If you have any questions, call Tom at 277-1705. — The Observer

The Notre Dame Judo Club competed in the Milwaukee Open and Purdue Invitational over the past two weekends. Coached by four-time National Champion Jackie Coachey, the Judo Club placed third and second place in those meets in Milwaukee. The same two players both finished first in place at those meets. The team practices Sunday and Wednesday at 7:00 p.m. in the Rock. New members are welcome and wrestlers are especially encouraged. Call Mark at 8510 for additional information. — The Observer

The Ultimate Frisbee Club will be practicing behind Jake Kline field, weather permitting. The practices will run from 4:30 to 5:30 Monday through Friday. New members are welcome. — The Observer

Driver Bruce Jacobi, injured at Daytona International Speedway last week, was being treated with help of a respirator and not responding to treatment, a hospital spokesman said. Jacobi, who is from Speedway, Ind., has been in critical but stable condition at Halifax Hospital since last Thursday, when he suffered a head injury in a violent crash while trying to qualify for Sunday’s Daytona 500 stock car race. "He is not responding at this time and his breathing is laborious," said a T.G. Hospital spokesman. "We do not anticipate an improvement in that condition in the near future." Jacobs, 47, suffered a bruised spine when his car flipped wildly through the muddy infield grass Thursday. In a release issued Saturday, doctors said they are waiting for swelling to subside. At Halifax, doctors said, they hope the driver will show some response to outside stimuli and start moving. The chip was released from Halifax at 8:30 a.m. yesterday after being kept overnight for observation. Waltrip was shaken up when he car spun into an infield wall during the 3rd lap of the Daytona 500 — AP

Win two out of three

Swimmers finish dual meets

By THERON ROBERTS
Sports Writer

The Notre Dame men's swimming team closed out its dual meet season by being a thriller at Bradley on Saturday after eking out victories against Illinois-Chicago and Northern Illinois on Friday.

The Irish swimmers came through the weekend with a pair of wins and one loss in their quest to prepare for the Midwest Invitation- al, which begins March 4 in Chicago.

The meet swept a "double dual" meet with Northern Illinois and Illinois-Chicago, beating Northern 62-51 and whipping UC, 80-33.

The meet against Northern Illinois came down to the last relay, but the 400-yard freestyle relay team of Glenn Battle, Greg Bohnen, Dan Carey and Al Harding escaped with the win, six-tenths of a second faster than the Huskies' team.

"It was a real pressure battle for us at Northern Illinois," said Irish coach Dennis Stark. "They keyed on this meet and we're up for us, and because of that they just swam well.

"Green had a good split and got an early lead for us on the relay. After that we just held on for the win."

Battle also swam well in his individual races. He won the 200-yard backstroke in both meets and captured a first-place spot in the 200-yard IM against Chicago.

Paul McGowan also had three individual wins in the two meets. He took first place in the one-meter diving against the Flames and was victorious in the three-meter diving on both occasions. Dan Flynn tallied a pair of first-place finishes in the 200-yard butterfly, while Blaise Harding won the 200-yard breaststroke both times.

Tom Bolden (1,000-yard free) and Al Harding (100-yard free) were also winners against Chicago. Bill Green won the 50-yard free against Huskies.

The action was just as exciting at Bradley, but the outcome was the same. However, the same type of circumstances determined the result.

Notre Dame lost the medley relay by just one-tenth of a second to the Braves. That proved to be the margin, although the rest of the meet was equally close.

"Bradley was pretty tough, but we weren't that far out of it," Stark said. In addition, Stark pointed to outstanding individual performances by Blaise Harding and Brian Casey.

Harding was a double winner for the Irish, placing first in the 200-yard IM and the 200-yard breaststroke. His time of 2:16.4 was only three-tenths of a second off the varsity record, his best time while at Notre Dame.

Casey won the 200-yard butterfly with a time of 1:56.8, an all-time personal best.

The 400-yard freestyle relay team of Battle, Bohnen, Carey and Al Harding also won, making it a sweep for all three meets in that event.

"These three meets were a good way to set up for the Midwest (Tournament)," said senior Lou Bowerman. "The combination of confidence in winning and excitement in the closeness of the meet was good preparation."

The men's swimming team concluded its dual meet season with a record of 9-4, and next competes in the Midwest Invitational March 3, 4 and 5.

continued from page 12

what awed by Notre Dame's strength and aggressiveness," said Rupert. "We were more emotionally tired from playing the three games in five days."

"We weren't tired physically but we were just mentally exhausted."

Tonight Notre Dame's opponent will be Akron. The Zips, coached at the ACC with a record of 17-6, scored enough for first place in the East Coast Conference.

Third-year Honora coach Dick Berg's squad is led by forward David Taylor. The 6-8 senior is scoring 17.1 points a game and is the team rebounding leader averaging 9.3 rebounds a game. Taylor leads the ECC in blocked shots with 56, and his scoring, 59 percent field goal percentage and rebounding totals all are good for second place in the league.

Running the Honora's offense is guard Doug Mills, a 6-0 junior is the only other Honora player to average in double figures. Scoring 15.2 points a game. Mills also is listed tenth on the NCAA statistics for steals with 78.

Chris Rankin, a 6-5 senior forward, combines with sophomore center Myles McPartland, a 6-9 transfer from Providence, to round out the Dutchmen's frontline. Averaging 17.2 points between them, Rankin and McPartland give Honora its rebounding power.

"History will show that we've had two tough games with Hofstra," says Digger Phelps. "In the NCAA tourney (90-83 in 1976-77) and in the ACC (65-55 in 1980-81), they hold their own. They play that tough brand of Eastern basketball. And this year, Hofstra seems to have put it together as shown by their first-place standing in the East Coast Conference."

Phelps expects the Flying Dutchmen to stall should they get into the lead in tonight's game and emphasizes the need for the students to respond once again for the Irish.

The conference that Hofstra leads is the same conference that includes American University (a team that beat Georgetown) and LaSalle (a team that beat Villanova before falling at the buzzer). Expect the Flying Dutchmen to be in the NCAA tournament at season's end and look for a difficult game for the Irish tonight.

IRISH ITEMS — Tom Sluby came down with the flu and asked to be held out of practice. Phelps is hopeful that Sluby will be alright for tonight's game with Hofstra.

"Another area of concern is the guard play, but we're not worried in the backcourt."

Northern Illinois Comes Down to the Last Relay

The Irish swimmers came through the weekend with a pair of wins and one loss in their quest to prepare for the Midwest Invitation- al, which begins March 4 in Chicago.

The meet swept a "double dual" meet with Northern Illinois and Illinois-Chicago, beating Northern 62-51 and whipping UC, 80-33.

The meet against Northern Illinois came down to the last relay, but the 400-yard freestyle relay team of Glenn Battle, Greg Bohnen, Dan Carey and Al Harding escaped with the win, six-tenths of a second faster than the Huskies' team.

"It was a real pressure battle for us at Northern Illinois," said Irish coach Dennis Stark. "They keyed on this meet and were up for us, and because of that they just swam well.

"Green had a good split and got an early lead for us on the relay. After that we just held on for the win."

Battle also swam well in his individual races. He won the 200-yard backstroke in both meets and captured a first-place spot in the 200-yard IM against Chicago.

Paul McGowan also had three individual wins in the two meets. He took first place in the one-meter diving against the Flames and was victorious in the three-meter diving on both occasions. Central Collegiate meet

Irish keep up with tough foes

By DEAN SULLIVAN
Sports Writer

The Notre Dame track team faced its stiffest competition of the year at the Central Collegiate Conference meet last weekend and finished the weekend with mixed results. Although the team's eighth-place finish did not quite put the Irish among the top seven as Coach Joe Pane had hoped, there were some sterling individual efforts from the runners.

Assistant Coach Ed Kelly, who filled in for Pane who was away on personal business, led his runners into the Kalamazoo tournament only to be met by some of the fastest times the Irish had seen all year. For instance, the Notre Dame distance medley relay team of John McNelis, Jan Kania, Jim Tyler, and Tim Cannon were just 2.2 seconds off a meet record but only came in fifth place.

Co-captain Steve Durbin placed the highest among Irish runners, finishing in second place in the 500 meters. He also qualified for the NCAA by more than one second with a time of 1:01.17.

There were several other Notre Dame runners who also did well. Graduate student John McCloughan finished third in the high hurdles, while Cannon and Ed Juba each took seventh places. Cannon in the two-mile run and Juba in the 5000 meters.

Durbin thought the C.C.C. field was the best since he has been at Notre Dame.

"Most every event was spectacular," said the senior from North Mayfair, Indiana. "There were at least one or two good individuals in every race and the times showed that. There were quite a few national qualifiers."

Durbin is confident that the team is in good shape as far as the future is concerned. He expects a few more national qualifiers, such as Van Pearsy and McCloughan.

Another reason for his optimism is the return of injured co-captain Jim Orr who returned to action last weekend.

Next up for the track team is the Illini Classic at the University of Illinois. The Classic is an individual meet without team standings. The NCAA competition in Princeton, New Jersey will be held the following weekend.

If one notices the last of the NCAA’s leading scores, one sees names such as Kelly of Texas Southern, Bradley of South Florida, and Yates of George Mason.

At the top of the list is Jakubek.

While these players compile their impressive scoring lists for relatively unknown teams, John Paxton of Notre Dame showed what distinguished American from a scoring machine as he led Notre Dame to an easy 85-20 rout over Jakubek, and the Irish Aces at the ACC last night.

Paxton averaging 17 points per game compared to Jakubek’s lofty 26.4 figure, scored a game-high 24 points while chipping in with four assists and a pair of steals. Jakubek fired in 15 points for the losers.

“He (Paxton) just wanted to say I’m John Jones and I play basketball,” said Irish coach Digger Phelps, referring to the Notre Dame team.

Notre Dame raced to a 40-16 halftime lead behind Paxton’s 8 of 10 shooting and domination of the boards. Tim Kempton equalled the Akron record for most wins in a season last night.

“Some in the first half we wanted to hit the boards as much as possible,” said Don Tabb, Jr. “They weren’t a bad club but we were overheated in the loss.”

After making just 29 percent (8 of 28) of their first 10 rebounds, Jakubek, who

**Best amateur athlete**

**Tabb wins Sullivan Award**

INDIANAPOLIS (AP) — Long-distance runner Mary Decker Tabb, who broke seven world records and 10 American standards last year, received the Sullivan Award last night as the nation’s best amateur Athletic Union’s top athlete for 1982.

The winner of the prestigious award was presented annually since 1930 by the AAU, was announced at the annual meeting of the Indianapolis Convention Center.

Last year Sullivan Award winner, track and field star Jim Ryun, made the presentation to Tabb.

“This is the most prestigious award an athlete can win,” said Tabb, 24, a native of New Jersey who blacked out in the 1500.

“Then the way things this basketball to be an Olympic medal. It’s going to just be among the most athletes like this.”

Tabb set women’s world records

**For the second year in a row, and skier Phil Mahre was a finalist for the second time in three years. Mahre, who finished fourth in the 1982 World Cup, had a career year on the World Cup circuit and was a member of the U.S. Olympic team for the third straight year.**
