Burke investigates Soph election result

By KEVIN BINGER
Campaign Reporter

Allegations that some sophomores were allowed to vote Tuesday in the junior class election are being investigated, according to Student Body President Kevin Burke.

John Decker, presidential candidate for the Mob ticket, charged that the extremely close election was invalid since various polling places ran out of ballots, hindering some students to vote.

"We're going to look into all the allegations and take any appropriate action," said Burke. He noted that if they find that the election for junior class officers was unfair, they will ask the Student Senate to declare the election invalid.

Decker's ticket came in first in Tuesday's election, receiving 34 percent of the votes cast. Vince Hata's ticket finished second with 35 percent — accruing only nine fewer votes than Decker's ticket.

Decker's ticket garnered 32 percent, only four votes behind Hata's 36 percent.

"There is no doubt, though, that it was our responsibility to get the right number of ballots to the dorms," said Decker.

As the investigation progresses, the Committee on Ballot Lobbying, for his right to be a part of the run-off, and stresses his ticket's strengths.

"We wanted to do something original and popular," said Decker. "That's not the same old junk that you hear year after year. Having a club where we'd do the job and work hard at it."

Zahm was the only one where someone who wanted to vote was turned away," said Decker. He added that the two sophomores who were Zahm continues to lobby for his ticket's opportunity to return later to vote, but never returned.

The investigation will not be completed before the runoff today, Burke said that "if the first election is declared invalid, then the second election (the runoff) is also negated and a new election will be required."

Koegel stressed his ticket's strengths.

"It's important that we do something that the other people that is similar to a real bar but in an environment that would be similar to a real bar," Koegel said.

"Students want a place to go on a consistent basis, to hang out at," McConnell said. "The club will have to be open on a regular basis to be successful. One of the reasons Chauteauqua is not the success it could be is that the ballroom has many uses. It must be decorated properly."

McDonnell has suggested putting booths in the south alcove of the ballroom. He would also like to make the 2D meeting room into a game room.

"There is a problem with interior aesthetics," McDonnell said. "We went so far with Chauteauqua, but the rest of the renovations must be completed. We will need to place double doors at the top of the stairs and the glass arch should be sealed. The Undergraduate Club will need to be an entity in itself."

Other problems, such as the need for refrigeration and water, neither of which are presently available in the Chauteauqua Ballroom, were cited by Van Wolvlear. There is also a need for drainage. In addition, he has not yet heard the result of his bid on a portable cherry arch that would be similar to a real bar.

"Little changes have been made in Chauteauqua," Abrams said. "Let's not continue making little changes. When we are trying to do this, we should do it right. Chauteauqua needs aesthetic changes and acoustic modifications."

"There are two things that are needed for the idea of the Undergraduate Club to be realized. Placement has to exist, but we could meet these and have the club. Someone
Doctor A. Robert Caponigri, philosophy professor and member at the University for 35 years, died yesterday in his home in Anchorage. Campaign was scheduled to visit Spain last year, this year to receive a government prize for translating the work of Spanish poet Federico García Lorca. Winner of the Pulitzer and Rockefeller fellowship awards, he was the author, editor, or translator of 17 books and numerous scholarly papers dealing with the history of modern and contemporary philosophy. He also wrote on aesthetics, humanities, and liberal education. Caponigri served as visiting professor or fellow at several American universities as well as at the Universities of Madrid and Rome, Harvard's Center for Italian Renaissance Studies, and the American University of Beirut in Lebanon. He lectured at several Italian universities in Genoa, Turin, Bologna, Parma, Perugia, Pavia, Milano, and Torno, and at Spanish universities at Cordoba, Valencia, and Salamanca. Funeral services will be set Saturday at Notre Dame. — The Observer

Corby's liquor license was renewed yesterday, after the owner Harold Rowley met with Alcoholic Beverage Board members to discuss underhanging drink at the bar. Corby Tavern originally was charged with selling alcoholic beverages to minors andfinder laws and allowed a minor. Loss in the upper story to low October. Since the bar did not have any current violations against it, renewal of the license was automatic. — The Observer

Authorities say an unemployed computer programmer in Glennallen, Alaska, went on a shooting rampage in a snowmobile competition, killing six of its 22 residents before Anchorage, charged with six counts of first degree murder, was 39-bond, and authorities said they had no clue to what prompted the dead.

Advertisers paid as much as against it, renewal of the license was automatic. — The Observer

Abernathy, 56, was flown to Johns Hopkins Hospital for treatment, based on a rating from the Southern Christian Leadership Conference and was a stop above the late Rev. Martin Luther King Jr.

The federal government agreed yesterday to accept $32 million from a Texas law firm to settle all claims arising from the largest oil spill in history, a 1979 blowout in the Gulf of Mexico that took nine months to clean up. The agreement was filed by the U.S. Environmental Protection Agency and had asked an unspecified amount for the cleanup work along the shores of South Texas, at a depth of 65.5 million gallons, when the tanker Amoco Norra, a Mexican outfit that had an exploration contract with the Mexican national oil company, exploded and burned off but the rest spread onto the beaches of Texas despite a 18-hour production carried over seven days.

Ralph David Abernathy, civil rights leader, has returned to a Baltimore hospital for brain surgery aimed at preventing a second operation on his brain, which was sub-divided by a blowout in the Gulf of Mexico that took nine months to clean up. The agreement was filed by the U.S. Environmental Protection Agency and had asked an unspecified amount for the cleanup work along the shores of South Texas, at a depth of 65.5 million gallons, when the tanker Amoco Norra, a Mexican outfit that had an exploration contract with the Mexican national oil company, exploded and burned off but the rest spread onto the beaches of Texas despite a 18-hour production carried over seven days.

In 1964 Edelman started the Washington Research Project, now the Children's Defense Fund, and has served as the director since its inception. CDF was organized to defend and expand the rights of children through the courts and has promoted the cause of quality child care.

Edelman has traveled to Haiti as a member of the President's Commission on MIA's and now serves as a board member of the German Marshall Fund, the NAACP Legal Defense and Education Fund, the Aetna Life and Casualty Foundation, the Atari Institute and Essence Magazine. She is also a member of the District of Columbia bar and the Commonwealth of Massachusetts bar.

Edelman has received numerous honorary degrees and in 1971 was named Time magazine as one of America's 200 young leaders.

The selection process for a commencement speaker is a long one which begins in the spring with suggestions submitted from the students of the junior class, Regents Alumnae Board, Parents' Council members, faculty and administrators. The compiled list of candidates is reviewed, screened and edited by the Academic Affairs Council, which is comprised of ten members of the President's committee.

It found to exemplify the qualities Saint Mary's seeks to foster in its students, the list of candidates is presented to the Board of Regents for final approval, according to Holland.

This year's honorary degree recipients include Father John Catoir, Frances Moore Lappe, Michael Mott, and Rosalyn S. Yalow.

Catoir, director of the Christoper Receiving, received a doctorate in Canon Law from Catholic University in 1964, and is author of the national bestseller Enjoy the Lord. Lappe is co-founder of the Institute for Food and Development Policy, a nonprofit public education and documentation center. A member of the faculty at Bowling Green State University, Ms. Lapp has written several books on poetry and presently is finishing the official biography of Thomas More, Yalow, the final recipient, is the second woman ever to win the Nobel Prize in medicine and is currently chairman of the department of clinical sciences at the Mount Sinai Hospital and Medical Center in the Bronx. She is a distinguished professor-at-large at the Albert Einstein College of Medicine at Yeshiva University.

The College also awards the President's medal to someone whose service merits recognition. This year that award will be given to Jerry Hammes, the vice-president of the Board of Regents.
Soviet ‘peace meeting’

Miners’ protest seems orchestrated

DONETSK, U.S.S.R. (AP) — The Soviet government cheers when anti-war demonstrations take to the streets in the West, but keeps its own peace meetings indoors and ensures they are carefully controlled.

At Donetsk’s Chelyuskin coal mine this week, 600 workers crowded into a meeting hall during their lunch hour for 45 minutes of protests against the North Atlantic Treaty Organization’s plans to deploy new U.S. nuclear missiles in Western Europe late this year.

The miners wore spotless miners’ uniforms creased, with no trace of coal dust on their boots, hats and lamps.

Like Western demonstrators, they carried placards — “down with the nuclear arms race,” “Do not permit nuclear catastrophe.”

A cowboy looking like Ronald Reagan was on one poster, balancing precariously on a tightrope with a bible in one hand and the letters “MC” in the other.

But these demonstrators did not wave their banners. They held them still while four cameras from Soviet Television photographed them.

The Soviet Union has staged a series of such meetings around official Soviet news agency Tass carries news reports on the meetings. The West German government of Chancellor Helmut Kohl, who favors the region opposed nuclear arms.

Donetsk is adorned with a large red banner after each speech from a podium where a full-blown guerrilla war has been fought for the past five years.

The point of the protest was to display in Sunday’s West German elections.

There was no cheering or chanting by the coal miners, just applause after each speech from a podium adorned with a large red banner proclaiming that miners from the region opposed nuclear arms.

The first speaker, Mikhail Kudrin, of the miners’ union, recited a ten-minute liturgy of alleged Western misdeeds familiar to any student of the Soviet media. After loud applause, five workers took the stand to read statements. The message in each was the same — peace without American missiles in Europe.

A pensioner remembered the fight against Nazism. The only woman to speak appealed to West German mothers to stop their children from dying in the holocaust threatened by the new American weapons.

The parade of speakers ended with a mine official, Valentin Sokolov, who read the text of a letter from the workers to their comrades in West Germany. It argued that Soviet missiles are “not first, or second, or third, or fourth, or fifth, or sixth, or seventh, or eighth, or ninth, or tenth, but a means of defense against U.S. nuclear weapons that have long been deployed in the Federal Republic of Germany and other NATO countries.”

It was no applause after the reading of the letter. Instead, the workers were asked if they approved the text. All raised their hands. Then the meeting broke up.

Pope John Paul II arrives in Costa Rica

SAN JOSE, Costa Rica (AP) — Pope John Paul II arrived yesterday with messages of hope and peace for Central America — a region shat­tered by violence that has killed 100,000 people in the past five years.

The pontiff’s plane touched ground at 5:24 p.m. (4:24 p.m. EST) after a 14-hour flight from the United States.

Hundreds of thousands of people crowded outside the airport. The Russian Orthodox Patriarch of Jerusalem, who’sCal­vina­tion of 2.5 million people was far from a festive atmosphere as the伦­ten­en season, generally a time of pa­re­n­s­ for the faithful.

John Paul kissed the ground at San Jose’s Juan Santamaria Airport, repeating a gesture from his three previous trips to Latin America, and then rode 18 miles to the city to meet with Central American bishops. Rain stopped just before the plane touched ground.

Cheering Costa Ricans waved and held aloft signs saying “Te­remmo­ns, Juan Pablo,” Spanish for “We love you, John Paul.” All business shut down at noon, and the government virtually stopped operations for the rest of the week, when the whole country appeared to want to make the best impression possible.

Costa Rica was playing up the religious aspect of the event. “We do not have to use his visit for our political purposes,” said one government official. He asked not to be identified, op­posed­ country the pope will visit, where the Somoza family was in­volved.

The itinerary includes El Salvador where the traditional church is under attack by a guerrilla­led government.

The Vatican has emphasized that the visit is strictly pastoral, but the pope will face political pressures that are bound to be as difficult as any he has faced in his 16 other foreign trips.

The prospect of the visit has brought joy and expectation to many of the people of Costa Rica, which is politically calm but is suffering severe social and economic problems.

A dreary, windswept rain did not keep city employees from draping pedestrians — overpasses with evergreens, banners and flowers.

The road to the seminary, where the Pope meets with 55 Central American bishops, was lined by mid­ day with civil guard troops, sta­tioned about 100 feet apart. They were unarmed but carried rope whips and clubs for crowd control.

Government expectations for the turnout at an open-air Mass in Sabana Park today reach 1 million — more than a third of Costa Rica’s population.

Molson Ale Bottles

$1.00

Go ND Basketballers!

EARN OVER $1000 A MONTH. AND OPEN THE DOOR TO A TOP ENGINEERING FUTURE.

How many corporations would be willing to pay you over $1000 a month during your junior and senior years just so you’d join the company after graduation? Understandable, isn’t it? And why would a special Navy program we’re discussing be any different?

It’s called the Nuclear Propulsion Officer Candidate-College Program. And under it, you’ll not only get top pay during your junior and senior years, but after graduation you’ll receive a year of graduate-level training that is not available from any other employer.

If you are a junior or senior majoring in math, engineering or physical sciences, find out more today. And let your career pay off while still in college.

Personnel departments promote summer work

By AMY STEPHAN

News Staff

Still searching for summer employment? There might be a summer job for you under the Dome. The Personnel Department of Notre Dame will be accepting applications for summer employment this Monday. The Saint Mary's Personnel office will begin accepting applications on May 1.

According to Carol Seager of the Notre Dame personnel department, it is still too early to determine how many positions will be available this year. However, she said that approximately 225 jobs were available last summer.

Seager explained that her office has contacted various student leaders and groups concerning their need for summer employment. The department heads have until April 1 to send in their requirements for summer workers.

Since the April 1 deadline, the personnel office will begin to match applicants to available jobs, according to Seager. Although the department has not set a deadline for accepting applications, Seager stated "it would be to the (applicants’) advantage to have their applications in by April 1.

Saint Mary’s personnel department has not yet determined exactly what jobs will be available this summer, according to the office of the assistant dean of students. However, the Saint Mary’s office will be accepting applications until May 1.

Jobs in both schools fall into three main categories. Service jobs include: bookstore, payroll, receptionist, cafeteria, and maintenance; clerical jobs involve working in an office or in the library; and technical jobs involve work as a lab assistant or computer programmer.

Seager specified that those applying for jobs at Notre Dame are asked to indicate on their application any specific field of interest.

Last year 600 applicants applied for 225 jobs, according to Seager. A priority system is in effect at both Saint Mary’s and Notre Dame which places students of each respective school third in order of hiring, unless they have specified that those applying for the position.

Seager commented, "I don't want the students to think they're at the bottom of the list."

The personnel office at Notre Dame is located in Brownson Hall and is open from 8 a.m. to noon and 1 p.m. to 5 p.m., Monday through Friday. Saint Mary’s personnel office is open from 8 a.m. to 4:30 p.m., Monday through Friday.

Seager noted that students must complete a new application every summer.

____

Student Government must see how much student support there is. The Administration, the Student Government must see how much student support there is before they'll allot the money.

Abrams suggests building a disc jockey booth in Chautauqua. The set up now used for "The Dance" presents acoustic problems and he feels that a built-in booth would solve these problems and improve the sound quality.

He also feels that a wide screen television placed in the ballroom with the jockey booth, a soap opera, MTV and feature television movies would be shown, making the Undergraduate Club into something of a coffeehouse at those times. Abrams believes the club should be open seven days a week.

"The money for the club is here," said Abrams. "The Student Senate made money this year. But the administration, the Student Union, and the Student Government must make the students want to use it or else there will be no money."

One dollar of each student's activity fee is included in the tuition, could be allocated to a departmental renovation of Chautauqua. But students must be willing to want this. Maybe there should be a referendum to show the administration how much support there is.

"Whether or not there is an Undergraduate Club in Chautauqua is in the hands of the students, so the students should enjoy it. Support or lack of support for Chautauqua will determine whether Chautauqua will go under or become the Undergraduate Club," Abrams continued.

Abrams’ term as Chautauqua manager will end April 1. Cozza, who proposed the Undergraduate Club, has applied for the position. Cozza is hoping that he will be able to do more for the club by working from that post.

"I like the Undergraduate Club idea," McDonnell said. "In January, I attended a conference in Illinois. One of the items that came up was alcohol prevention. At the University of Minnesota, a group has created a nonalcoholic, alternative bar."

"The University of Minnesota alternative bar is funded through a grant from the Minnesota Student Association and sponsored by a group called Chemical Abuse Prevention through Peers. It offers a mixture of ten nonalcoholics that can be ordered in any bar."

"If we didn't have the problem of the Placement Bureau, we might be able to go ahead," McDonnell said. "I have heard that when the faculty office building is finished, the Placement Bureau will move to the basement of the library."

"Let’s drink to that."
The government's main economic forecasting gauge shot upward 3.6 percent in January, the biggest gain in three decades and an apparent new sign that the nation's recovery from recession may be more robust than many have predicted.

Commerce Secretary Malcolm Baldridge called his department's report yesterday "highly favorable" for recovery. And a national business group quickly raised its own forecast of 1983 U.S. economic growth.

"If anyone still doubted the nation was pulling out of the 1981/82 recession, Baldridge said, "There has never been a gain in the leading index in the past this large without an economic recovery." The January gain in Commerce's Index of Leading Economic Indicators was the fifth monthly increase in a row and the largest since the 4.4 percent of July 1970.

The index, a compilation of 12 economic measures, is designed to show trends in the whole economy. Baldridge, commenting in a statement distributed by aides, cautioned that the January figures "should not be taken as a sign of a coming economic boom" since the index was pushed up by certain factors such as unusually mild weather and a new type of bank account that avoided the measured money supply.

Most economists already were assuming an economic rebound had begun, and Undersecretary of Com- mercial Robert Dotzler, had said Tuesday the recovery almost surely will be stronger than the administra- tion's forecast of a 3.1 percent over- all business expansion from the fourth quarter of last year to the fourth quarter of 1983.

Echoing that opinion, Alexander Traversi, president of the Na- tional Association of Manufacturers, said yesterday. "Based on the January numbers, we think we can revise upward our estimate of real growth in 1983 to a level of about 3.5 percent to 4.5 percent, which is up over our earlier estimate of 2.5 per cent to 3.0 percent. "So things are looking better," he said.

The only negative indicator was a drop in orders for new plants and equipment.

---...

its own financial data, the government is projecting a 1.75 percent increase in gross domestic product in the fourth quarter of this year compared with the fourth quarter of 1983. It is not the first time the government has projected a strong recovery. In 1981, the government predicted a 3.5 percent increase in GDP for the fourth quarter of 1982. However, that prediction was not realized.

The government's forecast of a 3.1 percent overall business expansion from the fourth quarter of last year to the fourth quarter of 1983 is based on a variety of economic indicators. These indicators include consumer spending, business investment, and government spending. The government's forecast is based on the assumption that the economy will continue to grow at a moderate pace.
Economic Update

Speaker of the House Tip O’Neill jr. said today he would urge elimination of "pork barrel" provisions from a $4.6 bil-

lion recession-relief measure under way. The House had already voted to eliminate a number of "pork barrel" pro-

visions in the past year, and it is expected to consider such measures again when it reconvenes in January.

John Connelly, vice-president of Apple Computer, Inc., demonstrated Lisa, Apple's newest microcomputer, yesterday afternoon at the Center for Continen-
tially speaking, performance.

While it is faster and has more memory than its predecessor, Lisa’s notable feature is its revolutionary easy-to-learn instructions, designed for the nontechnical user.

Instead of requiring special lan-
guages and commands to perform a task, Lisa displays, either verbally or pictorially, the options available to the user. The user then selects the option he desires with a "mouse," an indicator that can go anywhere on the display by using a hand-held control.

Lisa is designed to overcome two major problems with using com-

puters in the business world. Lisa solves the first problem, the length of time required for first-time users to acquaint themselves with the computer, its software (built-in instructions), and the normal business office. The TV-like display acts as an "electronic desktop," on which the user can put "documents" (reports, graphs, balance sheets, "folders"), which can have documents inside them, and "lining cabinets," which can store folders. The user can also put on his desktop a clock, a cal-

culator, and a garbage can which temporarily keeps documents the user no longer wants to see.

Lisa solves the second problem, difficulty in moving data from one place to another, by storing data in a new way. Before, a computer would store more in one user-specific format, and the data could only be used in that format; for example, numbers could be stored to make mathe-

matics easy for the computer, but then precluding those numbers on paper required a complex trans-

formation.

Now, Lisa stores the method the data will be used with the data, so the transformation is done by changing the format.

Besides solving these problems, Lisa has a number of more specific advantages. The computer can do more than one task at a time. It can talk to other Lisas with any kind of cable system, store novels in its main memory, and huge tomes on hard disks or floppy disks. Lisa includes word processing, accounting, and graphics functions, among others in its available software. Lisa can be updated to in-

clude additional functions written by the user or memory pack, and Apple promises to be able to make Lisa act like a standard computer, with special languages and com-

mands in the near future.

Business & Technology

Engineering Update

The United States leads the Soviet Union by a 15:1 margin in basic technologies that "have the potential for significant-
ly improving the military balance in the next 10 to 20 years," a Pen-
tagon report says. "This indicates that the United States has maintained its lead in most of the basic technologies critical to defense, although the Soviets are eroding the lead in some of the basic technologies," Richard DeLauer, undersheriff of defense for research and engineering, said in his annual report to Congress. One of the key technologies in which the United States is ahead of the Soviet Union involves "stealth" which are expected to allow development of bombers, cruise missiles and fighters that would be virtually invisible to Soviet radar, the report indicated. But the report, which became available yesterday, also said the Soviets are gaining in six technical areas of defense where the U.S. military still maintains its lead. DeLauer said the Soviets are spending nearly double U.S. outlays in an effort to close what he spoke of as the "technological gap." The Reagan administration's fiscal 1984 budget calls for $33.5 billion on research, an increase of $4.8 billion over this year.

By ALEX SZILVAS

"Ethical Considerations and the World of Commerce" was the topic of yesterday’s sixth annual Faculty Forum Justice Teach-In held in the Hayes-Healy Board Room.

Professor Ken Milani of the Ac-

countancy Department introduced a distinguished panel of professors, each of whom discussed the implica-
tions of business ethics in their respective areas of expertise.

Decision-making and leadership were the focus of Sal Bélair’s commen-
tary. Bélair had the audience consider the question, "Is it right or wrong to raise or have a good conscience, he stated that the manager "must carefully consider alternative investments. This has resulted in an ethical dilemma which the financial manager must continually face. Given the goal of management is to maximize profits of stockholders, when does one differentiate between sound business judgement and one between duty and un-

ethical practice?"

"Traditionally, regulatory authori-
ties have watched out for the depositors’ interests while the manager’s job was to watch out for the stockholders’ interests," Bélair said. He added that the role of regulatory authorities has grown in the last decade. These authorities see their task today as involving more than keeping the institutions from failing. Regulations protecting potential borrowers, the commu-
nity, and other parties have become increasingly common. A bank, for example, may be required to reinvest funds in a low income neighborhood where the rate of return is substantially lower than that of alternative investments. This has resulted in an ethical dilemma which the financial manager must continually face. Given the goal of management is to maximize profits of stockholders, when does one differentiate between sound business judgement and one between duty and un-

ethical practice?"

"Numerous opportunities exist, which are being missed while upholding the letter of the law," Bélair said. "Banks view these regulations as obstacles to their major responsibility — making profits for their stockholders.”

Professor Jon Gaertner of the Ac-

countancy Department was unable to speak due to scheduled illness.

The Most Sophisticated Training Ground For Nuclear Engineering Isn’t On The Ground.

It’s on a Navy ship. The Navy has more than 1,900 reactor-years of nuclear power experience—more than anyone else in America. The Navy has the most sophisticated nuclear equipment in the world. And the Navy operates over half of the nuclear reactors in America.

With a nuclear program like that, you know the Navy also offers the most comprehensive and sophisticated nuclear training.

Every officer in the Nuclear Navy completes a year of graduate level technical training. Outside the Navy, this kind of program would cost you thousands.

In the Navy, you’re paid while you learn. Then, as a nuclear-trained officer, you supervise highly trained personnel in the operation of the most advanced nuclear propulsion plants ever developed. You get a level of technical and management experience unequalled anywhere else.

You get important responsibilities and you get them fast. Because in the Navy, as your knowledge grows, so do your responsibilities.

Today’s Nuclear Navy is one of the most challenging and rewarding career choices a man can make. And that choice can pay off while you’re still in school. Qualified juniors and seniors earn approximately $1,000 per month while they finish school.

As a nuclear-trained officer, after 4 years with regular promotions and pay increases, you can be earning as much as $45,500. That’s on top of a full benefits package that includes medical and dental care, and 30 days’ vacation earned each year.

As a nuclear-trained officer, you also earn a place among this nation’s most qualified and respected professionals. So, if you’re majoring in math, engineering or the physical sciences, send in the coupon.

Find out more about the most sophisticated training ground for nuclear engineering. Today’s Nuclear Navy.

Navy Officers Get Responsibility Fast.

M*A*S*H completes 11-year growth

Television reared its powerful head again Monday, convincing even the skeptics of its ability to mesmerize the masses—to hold a nation in its grasp.

Skip Desjardin

On the Media

America came to a standstill as it hadn't since President Nixon resigned. People sat glued to their television sets, or the sets of those whose television sets were on, just as they did in the summer of 1969, when The Mary Tyler Moore Show first aired.

"Goodbye, Farewell, Amen," the final episode of television's most successful series, M*A*S*H, ran on CBS Monday. With its airing, an era to rival TV's Golden years in the late 1950s drew to a close.

In the early 1970s, CBS brought a nation a trio of situation comedies that may never be equaled in terms of quality or popularity. It began with All in the Family and The Family Ties Moore Show. It continued with M*A*S*H.

That show opened the door to us," says Alan Alda, the driving force behind M*A*S*H. "Without them, we could not have done the things we did, we could not have dealt with death, could not have treated the war as a comedy.

We are all too young to remember the final episodes of The Fugitive. That show captivated a country, something that I doubt many people today feel is possible. It created a phenomenon.

But we can all remember the long-awaited episode of that series, and the build-up was to rival the coming of emotion and anticipation that accompanied Monday's show.

In 11 years, M*A*S*H touched us all. It made us laugh, but rarely without reminding us of the horror of war.

"It was more about Vietnam than people think," says Gene Reynolds who, like Alda, wrote, directed and produced at various times. Indeed, when the show made its debut, Americans were dying in Vietnam, in a war more senseless even than that to which Hawkeye and Radar and H.H. were ever destined.

As America in the 1970s changed, so did the "TV. At Vietnam peace talks progressed, M*A*S*H featured programs on fake truce announcements. When Watergate rocked America, M*A*S*H featured a government cover-up. As we grew up, so did the show characters. Radar O'Reilly became a man. Margaret Houlihan became a woman. Time altered personalities and relationships. Men died, other men replaced them, and America watched it all.

But M*A*S*H was not always as popular as it was Monday night. In its first season, the show once finished 56 out of 60 programs in the Nielsen ratings.

When peace finally came to the 4077th, it came while its characters were in the operating room, battling to preserve life—despite the imminence of new lives for themselves.

And it is fitting that the men and women of M*A*S*H should be working as the war ended. For the series always taught us one thing—verbalized by Col. Henry Blake in an episode entitled "Sometimes You Hear the Bullet."

"Rule number one in war is that young men die," Blake—ironically the only cast member to die in the war—said Hawkeye. "Rule number two is that doctors can't change rule number one."

For 11 years, through laughter, pathos, and stirring drama, M*A*S*H never let us forget that.

Goodbye, farewell, amen.

P. O. Box Q

Validity counts

Dear Editor:

As everyone knew would happen, the "challenge to be pro-life" has been met. A few weeks ago in these pages has been refused because the pro-choice perspective has been refused because the pro-choice perspective has not been met.

I am fairly certain that in most cases "pro-choice" does not imply "anti-life" but to the question of the morality of abortion, I would have to disagree.

I am certain that the majority of pro-choice writers refer to the "pro-choice" position, as it is, not ultimately addressed to the question of the morality of abortion, but to the question of the morality of a woman's right to choose.

If a woman has sinned so much, what's one more sin?" Catholics should not judge others, but show compassion, understanding, and understanding for those who carry the greatest burdens.

In addition, I am not sure that abortion is of a sufficient social character to warrant legal reform. Of course, the situation does exist, but relatively few women come to the abortion clinics.

The distinction between the two groups of people is that the former like to kill babies and the latter do not, but the former see the justice of life and the latter see only that, but different people do different things in different situations. It may very well be that, if life situations surrounding abortion were similar, people could agree on a moral assessment of abortion; but in fact those situations vary greatly. Most of the "pro-life" writers mention these past few weeks have presented such a similar context for all abortions, one in which everyone agrees that life begins at conception, in which all worried mothers, abandoned children, and large poor families are cared for, in which poor mothers and their families are given help, in which everyone is sufficiently mature to handle decisions and responsibility, and so forth. But in the world is it (which we would surely welcome 1), a general moral assessment of abortion might be possible (agree on it, I think), but we have not created such a sufficiently common context for abortion decisions (a task for which many "pro-life" supporters have lent invaluable aid), I do not think that laws and regulations for this group are not consistent with moral agreement.

In addition, it is not true that abortion is of a sufficiently social character to warrant legal legislation. Of course, the situation does exist, but relatively few women come to the abortion clinics.

I would like to share my thoughts

Pragmatic look

Dear Editor:

I would like to share my thoughts regarding abortion. As a Catholic, I believe that life begins at conception and that the world is not as ideal as one might believe. Again, many people here have thought of as "pro-life" supporters have done.

Looked at in this way, it seems to me, that the challenge to be pro-life is really an invitation for Notre Dame (and the country) to realize that there are different and valid moral perspectives and ways of life, and that the world is not as ideal as one might hope. Again, many people here have thought of as "pro-life" supporters have done.

Freelance Away!

You've lost in a strange land. You have no money, no credit cards. What will you do? What will you do?

You've no other choice but to take what you can get. 

Many of the seniors who are about to graduate in May have already lined up jobs with prestigious firms across the country, many others have been accepted for graduate work at countless institutions. A large number have not. 

For those who are college graduates, the book is designed to help the serious freelancer keep track of finances and lifestyles while trying to maintain a steady flow of creativity and cash.

Nonetheless, even if you aren't planning to go out and start your own corporation (one of the books better points — even if you are the entire product, incorporate anyway) the book will probably be a great help to anybody starting out in the real world. Included and of major interest are sections on buying, renting or just plain old finding a job, establishing a credit rating, setting up work space, arranging taxes, and a particularly fascinating little dialogue on "creative side management."

If, in fact, you are planning to go out and start your own business or plan to make a career of your own in the arts, this book is an indispensable encyclopedia. It is set up and arranged as a reference book — interesting to read all the way through but more valuable to keep around just as a handy helper when specific situations arise. Whittlesey provides a wealth of studied advice in areas such as how to remain creative, how to cope with late times, how to live economically and still enjoy it, and how to keep the sort of record efficiently, that keep freelancers out of jail and the poorhouse at the same time.

"As a freelancer, you are your own employer, employee and product." This is a much more popular lifestyle than it used to be, and I can vouch for the fact that it holds many very rewarding benefits. Freelance Forever is an invaluable investment for anyone who is considering the route of the freelancer.

Joe Musumeci

Whittlesey's book is a regular cornucopia of information on how to get and keep your own business on track. Whittlesey herself is a freelance writer and has incorporated the testimony and advice of many, many other freelancers in various lines of work to compile her guide. The book is designed to help the serious freelancer keep track of finances and lifestyles while trying to maintain a steady flow of creativity and cash.

Nonetheless, even if you aren't planning to go out and start your own corporation (one of the books better points — even if you are the entire product, incorporate anyway) the book will probably be a great help to anybody starting out in the real world. Included and of major interest are sections on buying, renting or just plain old finding a job, establishing a credit rating, setting up work space, arranging taxes, and a particularly fascinating little dialogue on "creative side management."

If, in fact, you are planning to go out and start your own business or plan to make a career of your own in the arts, this book is an indispensable encyclopedia. It is set up and arranged as a reference book — interesting to read all the way through but more valuable to keep around just as a handy helper when specific situations arise. Whittlesey provides a wealth of studied advice in areas such as how to remain creative, how to cope with late times, how to live economically and still enjoy it, and how to keep the sort of record efficiently, that keep freelancers out of jail and the poorhouse at the same time.

Besides being a freelancer with a good feel for business (something the book would have us believe is rather uncommon), around just as a handy helper when specific situations arise. 

Claudine in what?

Combine a confused seventeen-year-old girl, an effeminate cousin, a rabid uncle, and an absent minded professor and you will have a list of the main characters in Claudine in Paris by Colette. You will also have a headache.

Now, don't get me wrong, it's not a bad book. It just isn't really a good book. It has been translated from French, and it seems to have lost something in the translation. The story perhaps.

Written in diary style, the book consists of short, choppy sentences. Because of this, it sometimes tends to be incoherent, as does the title character.

As far as I am told, the story seems to center around a precocious young woman who has been forced to leave the French boarding school in which she grew up and move to Paris.

Because the move to Paris meant leaving behind her lesbian school friends, Claudine decides to re principally by becoming ill. In fact, it is just after her recovery that we meet her. Claudine has had her hair cut to ease the fever, and is lying abed, listening to her maid propose lovers for her.

She tells us about her school life in Montreuil. Her friend, Luce, with whom she has had an affair is agonized at her leaving. It is perhaps, her saner and with the theatrics of Luce's farewell that make Claudine decide, finally, to accept Paris.

While in Paris she meets her cousin Marcel. Colette describes him as a pretty boy, with fair hair, a light complexion, and blue eyes. He also has a boyfriend. Marcel introduces Claudine to his Uncle Renaud, Marcel's father.

About the same time that Claudine meets Renaud, she finds her school friend, Luce, in Paris. Luce tells her that she has run away from home and is living with her mother's brother-in-law. In return for her "lost honor," Luce is provided with the luxuries of wealthy life.

This discovery sends Claudine into raptures. From this point the story becomes the tale of CF's — 'mide transition to adulthood. She accepts the notion that Luce has had relations with a man, and begins to consider it for herself.

During this period of transition, Claudine goes out and gets drunk with her uncle, Renaud. Renaud expresses his love for her, and she begins to experience normal feelings. As she struggles with herself, she must also struggle with her uncle. Renaud feels that she is still a child, and he must keep away from her. Claudine realizes that to keep Renaud's love she must sacrifice her childhood and her past relationships by taking the step to maturity. The story ends with her marriage to Renaud.

Class in what?

Atlantic Coast Conference
Cavaliers, Tar Heels win easily

ATLANTA (AP) — Michael Jordan scored 24 points, 15 in the second half, as eighth-ranked North Carolina downed Georgia Tech 85-
4 in an Atlantic Coast Conference basketball game last night. Jordan had two baskets, one a slam dunk, during an 11-0 Carolina
spurt that stretched a 12-9 deficit to a 55-46 lead in the game.
Tech never threatened thereafter as the Tar Heels eventually rolled up a 25-point lead, their biggest of the game, which they held on five occa-
sions.
The victory lifted North Carolina to 24-6 for the season and 11-2 in the ACC. Tech fell to 12-14 and 10-10.
Sam Perkins added 16 points for North Carolina.

GREENSBORO, N.C. (AP) — Ralph Sampson scored 28 points as No. 2-ranked Virginia cruised to a
107-74 Atlantic Coast Conference basketball victory over Wake Forest yesterday.
The victory boosted the Cavaliers/ ACC-mark to 11-2 and 2-3 overall.
Wake Forest raced out to a 20-13
lead in the first seven minutes, but Virginia rallied and tied it on a Rick
Stokes jumper with 11:39 remaining in
the opening half.
The score was tied twice more before the Cavaliers slowly pulled
owns and eventually opened a 16-12 edge on a Sampson dunk with 5:28
left. Using 62-percent shooting, Vir-
ginia claimed a 54-38 halftime lead.
Wake Forest went scoreless for four minutes—start the second half as
the Cavaliers expanded their margin
to 69-41 with 15:59 remaining.

No. 3 Louisville leads from
start, beats Hokies easily

BLACKSBURG, Va. (AP) —
Charles Jones, Rodney McCray
and Lancaster Gordon teamed for
49 points as Louisville's third-ranked
Cardinals led from the start en route
to a 73-64 Metro Conference basket-
ball victory over Virginia Tech's
Hokies last night.

It was the 1,000th win in the his-
tory of the Louisville basketball
program.

Louisville raced to a 27-10 lead
with 8:39 left in the first half before
the Hokies rallied to cut their inter-
mission deficit to seven at 38-31.

The Hokies pulled to within three
early in the final 20 minutes. But
Louisville, leading 40-37 with 17:09
to play, reeled off nine straight
points on a dunk and free throw by
Jones and field goals by Gordon, Milt
Wagner and McCray. The closest
Virginia Tech got after that was five
points at 65-60 with 1.20 left in the
game.

The Cardinals, now 26-3 overall
and 11-0 in the conference, led by as
many as 19 points, 63-44, with 4:43
to go.

rebounds. Kempton was a distant
second over this same period with
49 rebounds.

Dolan also led the team in scoring
twice in the stretch (including a
career-high 20 points against
Maryland) and was the runner-up
other times. He also led the
team in rebounding in six of those
10 games (including a career-high
15 caroms against Bucknell),
and was second in another context.

Such performances have earned
him a starting forward slot in the last
eight games.

"I didn't think I would come
so far so soon," admits Dolan, the 6-10
highest scorer in New Jersey high
school history. "I'm happy with the
way I've progressed, but I still have a
long way to go."

Still, Dolan has reached that point
where he realizes that most of his
mistakes now come, not from being
a freshman, but from being human.

Dolan's recent statistics, however,
are actually a poor source for
measuring his overall performance
and abilities on the hardwood. As
Phelps said after the Hofstra game, it
is his ability to "really make things
happen" through his intelligence,
consistency, resourcefulness, and
court savvy that has helped the Irish
maintain their hopes for a Tourn-
ament bid.

Nevertheless, the most im-
pressive part of Dolan's game is his ability
to not to dwell on past mistakes or
focus on any single facet of his game
during the course of a contest.
Against DePaul, for instance, Dolan
did not take a shot in the entire
game. Instead of forcing shots,
though, he displayed his most over-
looked skill, passing. Twice during
the last, futile rally, he drilled
picture perfect passes inside to set
up layups.

"Right now I think I'm contribut-
ing to the team with my passing and
rebounding," says Dolan, "but I try
to prepare myself for whatever a
game situation demands. It's impor-
tant to have a complete game and
not just specialize in one thing.
A complete pg t yr is more aware of
things going on on the court and can
react to things better."

So while he may not have the raw
power of a Kempton, the fluid
smoothness of a Barlow, the outside
shooting of a Price, or the defensive haw-
king abilities of a Buchanan, Dolan
has managed to synthesize all of
those elements into his own little
package to become, in the second
half of the season, the most pleasant
surprise of Phelps' squad.

Leaves it to a man who comes from
a town in New Jersey called Point
Pleasant to be the most pleasant
point and surprise of this year's
team.

Phelps, though, knew it all along.

DRAWING TONITE AT SENIOR BAR!
Roller-coaster season

Basford rebounds from adversity

By MIKE RICCARDI
Sports Writer

In the wild ferris wheel ride that has been the 1982-83 season for the Notre Dame women's basketball team, no player has experienced more drastic highs and lows than freshman Denise Basford. Basford's recent contributions off the Notre Dame bench are the result of a long, up-and-down year of growing up for the 5-9 guard from Farmington, Mich.

Basford made an impressive debut with the Irish starting in November's intramural game and playing more than 20 minutes in each of Notre Dame's Orange Crush Tournament games, showing poise and ball-handling ability that belied her lack of experience. She was a large part of the senior list of the two tournament losses to Top 20 opponents in the tournament.

"Before the first game (against UCLA), I wasn't real nervous," says Basford, "but when I first went in, there was a feeling of how playing against a team like that. Once I shook that, though, everything was all right.

"It seemed that everything was going Denise Basford's way — in November. She was being groomed to take over at point guard, of course. And she just kept turning that spot before the season was out.

"The leader of two-state champion-ship teams at Our Lady of Mercy High School and at Notre Dame, like most athletes, with impeccable credentials. Basford was an unanimous all-state choice at both schools and an honorable mention selection on two national All-America squads.

"My grade school athletic director also recall some women's basketball games," says Basford. "He said when I announced my decision (to go to Notre Dame), he said, 'Good job. You know, a couple of years ago, I referred a game in Chicago and saw the heat coach I've ever seen.

"She's a good athlete, of course," says that coach, Notre Dame's Mary DiStanislao. "She has consistent effort and works hard. (When we were recruiting her), we saw her good speed and quickness, as well as a potential to be an aggressive defensive player. She has lots of potential.

"Taking a major role so early in her freshman year, tied good and better things for Basford. Playing with an aggressiveness that didn't match her mild looks, she became an early-season crowd favorite.

"I've learned a lot and I've come back,

Yes.

However, as the Irish recovered from the "Crash" last game with an exciting streak that carried the team into the New Year, Denise was getting tougher on herself, and her consistency began to question.

While Basford dwelt on her er-
earlier, she didn't realize her potential, a potential that was never off during the season, as still flashes of her November brilliance were shown in a few contests during a trying month.

"Tech Week," the mind-bending days of hype and promotion before the game against No. 1 Louisiana State, became a heart-rending experience for the freshman as she sat on the bench the entire game. "I was so ready for that game, so into the preparation and everything," says Basford. "I was really upset that I wouldn't get to contribute. But I think she (DiStanislao) didn't play me in that game to make me wake up. There's a reason for everything the does, and besides, Lisa (Brown), who played 16 minutes, earned her slot.

The week off between Tech and the Irish women's key road trip to Bradley and Illinois State gave Basford time to take stock of herself and her potential.

The last two weekends have been a return to form for the sophomore. Her career-high eight points against the Demons, scoring four key points in the final minute of the first half to give the Irish breathing space going into halftime.

"Denise has such a quick step toward the basket," says DiStanislao. "She can be a driver for us, as she's shown on occasion. She's been, like any other freshman, up and down this year, but, when she's been on, she's given a big lift to the team.

"Denise, in one of her more interesting coaching moves, has helped to me a backcourt of Basford and freshman walk-on Brown. The combination of quickness and aggressiveness to the Irish backcourt.

"We were working Denise in as a pure lead guard," says DiStanislao. "She's comfortable in a two-guard setup where there's somewhere else back there to handle the ball too.

"She put us in to bring up the tempo and instill quickness," says Basford. "We like to run, bring up the pace, whereas Laura (Dougherty) and Delphi (Hensley) use their smarts to set a more deliberate pace.

Basford's attitude has allowed her to overcome adversity. The future, however, presents another challenge to the popular freshman.

"I'm not scared at all," says Bas-

"I'm speaking, very much a unlike a freshman. "I'm not the one to serve a meal to the team, and she'll let me make a lot of hard.

But if I play, I can learn the game. The competition will improve my game. I'll learn a lot and I've come back.

COTH

COTH offers a comprehensive course of study in the theory and practice of contemporary media and theatre
All students interested in film and video, media studies and mass communication are cordially invited to visit departmental facilities in the Loft, O'Shaugnessy Hall, Thursday, March 3 from 8:30pm to 8:00pm
All students interested in theatre are cordially invited to visit departmental facilities in Room 1, Washington Hall, Today, March 3, from 6:30pm to 8:00pm

Badgers beat Michigan in battle for Big Ten cellar

BADGER BASKETBALL

MADISON, Wis. (AP) - Freshman Rick Olson scored a career-high 25 points and Ohio State hung in to an 82-70 Big Ten college basketball victory over Michigan last night.

Olson scored 12 points during a 27-10 Badger spurt that turned an 8-23.25 Wis-
colin lead with 2:18 remaining in the first half. Wisconsin led 41-29 at intermis-
sions and Ohio State had the ball right where he left off when the second half opened, Ohio State took over.

The Wolverines, behind Richard Eastman, scored first 15-10 deficit into a 17-25 Wis-
colin lead with 2.18 remaining in the first half.

Seton Hall visit tonight
Irish get chance to even score

By RICH O'CONNOR
Sports Writer

Sometimes you just know that things aren't going to be easy, for instance Seton Hall basketball team that arrives at Notre Dame tonight. Take the Irish in the ACC, at 8 p.m.

Suffering through a 5-21 season to date despite beating Penn in Big East Conference action – the Pirates must close out their season against a Notre Dame team they embarrassed last season 71-58 in the Byrne Arena against the Irish in New Jersey.

This Notre Dame series is a team whose record stands at 16-9 and must win a chance at NCAA post-season play. On top of all this, a Pirate win would be their first win on the road in ten tries.

Seton Hall does not return a starter from last year's team that finished with an 11-16 record after winning nine of its ten games.

Guard Dan Carolan, forward Daryl Devero, and forward Howard McNeill, who combined for 43 points and 15 rebounds a game last season, have graduated, and Mike Ingrassia and John Collins, the No. 2 men, are gone. Four starters, are scoring this season with injuries.

All three are the team's season's two head coaches, Bill Ezerial, who stepped down three weeks before Christmas to tend to Hody Mahon. Stepping in to fill the void is P.J. Carlesimo. A 1971 Fordham graduate, Carlesimo played for Digger Phelps' 26-5 Hoosiers.

Carlesimo had spent seven years as the head man at Duquesne from 1975-81 attaining a record of 65-85 and taking the Seahawks to three post-season tournaments before taking the Seton Hall job.

Carlesimo immediately began the process of bringing Seton Hall up to the competitive level of the Big East Conference this season and recruiting.

Three of these additions have earned starting berths in their first year at the Hall. Freshman Andre McNeill, John Paxson, and the rest of his teammates have a score to settle tonight at Notre Dame.

You can thank Digger's deliberate, if unorthodox, offer of ball for that. Had the Irish gotten into a first-half track meet with the Pirates, the game would have been a rout. To Ray Meyer's credit, he doesn't want to see his best four-guard court of the season, save the final two minutes.

Best assured that NBC will come to regret its overexposure of announcers Dick Enberg and Al McGuire. Surely, the Peacock People realize that familiarity all too often breeds contempt, especially when it comes to sportscasters. It may be difficult to believe, but the Peacock People are certainly lacking in the ling of TV sports.

In the first place, Enberg's wardrobe is outrageous. Recently, he has made an uncharacteristically high number of slip-ups. That should hardly come as a shock to NBC executives, who made Emberg resemble Pac-Man as he scurries from airport to airport.

Although I still find him both entertaining and enlightening, McGuire is beginning to wear thin in some circles. As somebody else put it, as smart as he sounds, McGuire isn't doing all that much to make the air more interesting.

On the contrary, the eventual, but the now-ridiculed Curt Gowdy was once the Peacock People's choice as he scurries from airport to airport.
