Haley calls to preserve special family heritage

By SONYA STINSON
Senior Staff Reporter

Americans should celebrate and preserve the special heritages of every culture because what is exciting about this country is its diversity, author Alex Haley said in an audience in the Library Auditorium last night.

Haley, who wrote the bestselling novel Roots and The Autobiography of Malcolm X, said that "traveling has taught me that we are really one people, though different attitudes may apply, and we ultimately have one common destiny."

Haley's lecture was the last of a series sponsored by the Student Body on the future of American society. Through vivid recollections of his family life as a child a few miles up in Henning, Tennessee, he spoke of how he sees the prospect of the future of the family.

The modern family has changed in ways from day past. Haley pointed out. Today, there are more and more single parent households and less couples living together, and three-generation families no longer common. But, Haley said, "I don't think any of these changes indicate anything but a natural order of the family; it's just that society is changing." For members should make a special effort to get to know one another and preserve the memories of their families.

Haley suggested that families bound peri-

Immunization program

"No measles cases" reported at ND

By CECILIA LUCERO
Assistant News Editor

"We had no reported case of measles here," said Student Health Center administrator, Sister Marion Rudl, commenting on recent developments in the measles issue that affected Saint Joseph county residents.

"We're hoping that we won't have any," Dr. James Bowers (from the Public Health Department of Saint Joseph County) and his staff and our ward worked very hard to prevent that," she said.

A measles immunization program for Notre Dame and Saint Mary's students was conducted before and during spring break by Saint Joseph County Public Health Department. Health officials were wary of a measles outbreak when a student from a student from the immunization

Ground Zero Month

Group urges nuclear awareness

Assistant News Editor

The United States Government has learned of an explosive situa-

tion in Central America—Cuba has sent 5,000 troops and a large sup-

port party to join the Cubans in Cuba under a U.S. protest.

It's April 9, 1983.

Your, as special advisory to the U.S. President, must decide whether to promulgate a national quarantine of Nicaragua, use diplomatic pressure against the Cubans, or deploy American troops to the area.

The above scenario is not a prediction of the world situation in five years. Rather, it is a hypothetical problem which arises during Firebreaks, a nuclear war/peace game organized by the Notre Dame/Saint Mary's Ground Zero Organiza-

ation.

Dividing into two teams Sundays in April, Firebreaks is "just one part of the effort during Ground Zero Month to provide information about a possible nuclear war," said Brigette Goudet, publicity chairman for the campaign.

Created by former White House nuclear strategist Roger Molenader, the national Ground Zero Organization has grown extensively over the past few years as a nuclear war education project. The key focus of the movement is to increase awareness of the possibility of nuclear war and to get a deeper understanding of how nuclear proliferation will affect the U.S. society.

Goudet said, "the game is very

U.S. government representative at the game, student participation was less than Ground Zero organizers. Notre Dame's Club

Goudet said that he hopes Notre Dame and N.C. State will continue to play one another during the regular season. He did not mention Notre Dame's participation in Browning公社 on page 4.
God made Notre Dame...

Yozo Matsushima, a professor of mathematics at Notre Dame for 14 years, died Saturday in Osaka, Japan following a brief illness. He was 62. Matsushima received his Ph.D. in 1947 from Nagoya University, Nagoya, Japan. Prior to joining the Notre Dame faculty in 1966, he was a postdoctoral fellow at the University of Paris. He also taught mathematics at Osaka and Nagoya Universities, a member of the Institute for Advanced Study at Princeton University and a visiting professor at the University of Grenoble, Grenoble, France. He left Notre Dame in 1980 to resume teaching at Osaka University. Dr. Matsushima was internationally known for his work in differential geometry, Lie groups and complex manifolds. He was the author of three books and more than 40 research papers. — The Observer

Some brands of birth control pills raise levels of a type of cholesterol linked with heart disease, and long-time use of these pills "may be undesirable," a study in Boston says. The research may explain why women who use the pill face an increased risk of heart attack and stroke. The researchers found widely varying levels of different forms of cholesterol in pill users' blood, depending largely on the pill's ingredients and how its various hormones balance with a woman's control pills. Pills that are relatively high in progesterin and low in estrogen raise the levels of the hazardous form of cholesterol, called low density lipoprotein cholesterol, or LDL. But pills that were low in progesterin and high in estrogen didn't do this. — AP

Prof links computers to chemistry

By CHUCK KRILL and KATHY WEISENBERGER

The world of chemistry is being reshaped by computers, said Maurice Schwartz, associate professor of chemistry, in a talk on "Computers in Chemical Research" yesterday afternoon.

The lecture was part of a series entitled "Computers in Science Research," which is highlighting Time magazine's "Machine of the Year." "Noting the expanding role of computers in everyday life, Schwartz displayed many newspaper and magazine articles that indicate the amount of attention computers are receiving today. In the field of chemistry, he said that computers have been fully integrated into experimental and theoretical work and that they are becoming more and more useful in the research laboratory. "I don't need to convince anyone that computers are extremely important and useful," he said.

Schwartz outlined various experimental and theoretical problems in quantum chemistry, molecular orbital chemistry and spectroscopy which indicate how the power of computers can be used to aid in research. The computations faced by chemists trying to understand molecular structure and bonding, he said, are so numerous and tedious that a computer is necessary to handle them. "It's not the kind of thing that a computer is well set to do — big calculations that are repetitive and need to be done many times until some criteria have been satisfied," he said.

Throughout the lecture, Schwartz presented examples of computer applications in chemistry performed by Notre Dame professors and showed that their computer-predicted results corresponded very well with their experimental results. Until recently, he noted, many of these experimental results could not be predicted from theory.

The first lecture of the series, "Computers in Biological Research," was presented April fourth by Notre Dame biology professors Theodore Crovello, Harold Esch, Harold Helinski, and Stephen Caprini. They emphasized the ability of computers to collect and arrange vast amounts of data, simulate experiments and present them to users.

Each pointed out that computers enable trouble understanding of animal behavior. For example, one speaker noted that when students perform experiments with mice in mazes they complain that it takes the mice over 30 minutes to reach the end of the maze. But when students themselves are required to go through a maze on a computer screen, it takes them over an hour. In this way students become aware that mice possess spatial intelligence which humans do not.

Crovello specified several current problems in the field of computers where there is a need for new methods of analysis, for reliable data, and for trained people not only to accumulate data but also to analyze and interpret it. "There definitely will be a computer in your life," he said, "and people need to know how to use computers in the various broad areas in which they can be useful."

Project Future effort

Business College mails surveys

By THERESA HARDY

Nine hundred ninety-six surveys are being sent out to businesses and organizations in St. Joseph County, by researchers at Notre Dame as part of Project Future, an organization which stimulates growth in St. Joseph County by retaining established businesses and starting new businesses, said Birley.

The 20-page, multiple choice survey asks entrepreneurs a variety of questions about their business, including: What kind of business is it? When was it started? What are the contacts he should make, and the problems that he may encounter.

"It's the kind of thing that a computer is well set to do," Birley said. "Many businesses, including small businesses, need help in starting their business, contacts he should make, and the problems that he may encounter." Although Birley has only received a few responses, she is already predicting what the survey will indicate. "The manufacturing sector is on the decline, whereas the service sector, which includes the computer industry is on the rise. Businesses will need to focus their efforts on this sector, which is in rapid encountered healthy growth," she said.

Birley believes that "businesses are far more affected by the Government than by the economy as a whole." "Businesses," she said, "are interested in small expansion and economic development."

"I am using the survey for academic purposes, but it's also going to be very useful for Project Future, an organization which stimulates growth in St. Joseph County by retaining established businesses and starting new businesses," said Birley.

"Such a survey is particularly helpful since it is directed to businesses started in a time of recession and not in a time of prosperity," said Birley. "I am interested in small firms and businesses. This area is small, contained and easily accessible for such a survey. It will be useful in retaining St. Joseph County to other industrial counties in Indiana."

After the surveys are returned to Birley, she will compile the information to be used by Project Future. This organization, which was started a year ago by the Chamber of Commerce, is interested in helping businesses with expansion and economic development.

"Project Future is an economic developing program designed to build a better business/Mishawaka area into a viable economic center assuming future growth and prosperity," said a representative from Project Future. "This is our primary objective is to significantly increase employment and the business base in St. Joseph County."

The representative said that "the information collected from the survey will provide the entrepreneur with the step by step procedure to follow in starting his business, contacts he should make, and the problems that he may encounter."

Birley said that there is a need for new methods of analysis, for reliable data, and for trained people not only to accumulate data but also to analyze and interpret it. "There definitely will be a computer in your life," she said, "and people need to know how to use computers in the various broad areas in which they can be useful."

Former Ambassador to speak at St. Mary's

By HELEN LUCAITIS

News Staff

Donald McHenry, former United States ambassador to the United Na-
tions, will speak on current issues of foreign affairs at Saint Mary's
Business Association's annual spring dinner April 15.
The Business Associates program is made up of area business people
who contribute to Saint Mary's Col-
lege and meet twice a year for din-
er and to hear a speaker.

The interest in getting the
former ambassador to come to Saint
Mary's because he serves both the
public and private sectors," said
Tom Becker, director of Develop-
ment at Saint Mary's. "He will bring
a unique perspective to our area busi-
ness associates.

Currently a University Research
Professor of Diplomacy and Interna-
tional Affairs at Georgetown,
McHenry served as chief U.S.
representative to the United Nations
from September 1979 until January,
1981. During that time he was also a
member of President Jimmy Carter's
cabinet.

McHenry, who has studied, taught
and worked primarily in the field of
foreign policy and international law,
joined the U.S. Department of the
State in 1963 and spent eight years
in various positions related to U.S.
foreign policy.

He served as a member of Presi-
dent Carter's transition staff at the
Department of State in 1976 and
then was appointed U.S. deputy rep-
resentative to the U.N. Security

McHenry also is president of In-
ternational Relations Consultants,
Inc. director of Coca-Cola and is in-
volved with many other organiza-
tions. He is the author of "Micronesia: Treaut Betrayed" and of
numerous articles.

Washington promises unified leadership

CHICAGO (AP) — Harold Wash-
ington promised an "open-handed,
healing" administration yesterday as
Chicago's first black mayor, but his
defeated Republican opponent
snubbed a promised unity luncheon
and left a Florida vacation.

Bernard Epton, bitter over losing
his seat to the city's first
Republican mayor in 52 years,
offered no concession. He
dispatched his vice mayor to the
community meeting, breaching a pledge made
even to attend, much less to vote.

The election of Washington, a	two-term Democratic congressman,

means several of the nation's
other black big-city mayors and
national Democrats, who had rallied to
his side as many Chicago party
toliths regular followed to Epton.

"It will be the hope of black
evoters," said former United Nations
ambassador Andrew Young, the
second black to serve as mayor of
Chicago.

"It is the first bite for me of

Washington (AP) — With plenty of votes to spare, the House yesterday took the decisive steps to a nuclear freeze resolution labeled "a formula for permanent insecurity" by President Reagan.

House Democratic leaders removed their objection to the proposal over the largely symbolic call for a "mutual and verifiable" halt in the arms race. Before the chamber's slow progress suggested a final vote might still be days off.

By 229 to 190, the Democratic-run chamber rejected major modification proposed by Rep. Elliott H. Levitas, D-Ga., that would have permitted older nuclear weapons to be replaced by newer ones in lieu of a freeze.

In the wake of that test, Speaker Thomas P. O'Neill, D-Mass., said the decision showed voters "quite candidly" despite anxious lobbying by the president and ranking officers of his Cabinet.

But a welter of other amendments still stood in the way of a final vote. Many were filed by Republicans and defense-oriented conservative Democrats who claim the proposal, although nonbinding, could undermine the president's ability to negotiate with the Soviet Union.

"If we were to finish it now, we'd finish it next week, . . . We've got plenty of time," O'Neill said.

Levitas told the House his "strategic build-down" proposal, which sought to delay the old warheads after each new one produced, would give the president more flexibility.

But freeze proponent Rep. Edward J. Markey, D-Mass., called the Levitas proposal "just a public relations cover for the arms buildup the Reagan administration wants."

The Levitas amendment was viewed by both sides as a key vote, perhaps the best chance freeze opponents would have to modify the proposal to make it more to the ad

ministration's liking. O'Neill suggested that freeze opponents would be able to fend off all other major amendments — including a proposal by Rep. Mark D. Siljander, R-Mich., endorsing the administration's insistence on reductions of U.S. and Soviet nuclear arsenals before consideration of a freeze.

The chamber first took up the legislation last month, but leaders ordered it put aside after more than 12 hours of debate failed to produce a final vote.

President Reagan, in a letter read during House debate, said the freeze proposal would "hinder, not help" efforts to reduce the risk of nuclear war.

But Rep. Clement J. Zablocki, D-Wis., chairman of the Foreign Affairs panel and chief author of the freeze resolution, defended the document as a move to help "restore stability and sanity" in the world.

Olympics looks for volunteers

By RENE FOY

WASHINGTON – Volunteers are needed for the annual St. Joseph's County Special Olympics. Joe Kernan, spokesperson for the Special Olympics committee, asked for student support during a St. Mary's government meeting last night.

Kernan said volunteers are needed to collect donations for the larger Special Olympics that will be held this summer. St. Joseph's County will host over 150 handicapped children from this area for the preliminary round of the special sporting events. The second round of competition will include children from several other counties. St. Joe will also be hosting these games.

Only 90 children from St. Joe Catholic School will be allowed to participate in the state finals because of a new rule on the number of participants based on the preliminary round of the special sporting events. The second round of competition will include children from several other counties. St. Joe will also be hosting these games.

A door-to-door campaign is scheduled for April to collect funds for the event. The committee hopes to entice the help of "50 volunteers to help collect the additional 25,000 dollars for the larger national competition."

The Saint Mary's student government has agreed to give its full support to the project. Sign-ups will begin next week in the dining hall and LeMans lobby.

Lech Walesa questioned about underground meeting

GDANSK, Poland (AP) — Lech Walesa, chief of the outlawed Solidarity labor federation, was seized and interrogated by police for nearly five hours yesterday about a clandestine meeting with under-ground union leaders.

"As a free man, I have a right to meet with anyone, even criminal elements, so long as the meeting has no criminal intent," Walesa told reporters after he returned to his apartment in the early evening.

Walesa, who disclosed Tuesday he had met with the Solidarity underground group over the weekend, said he was too tired to discuss the police interrogation and would hold a news conference next Wednesday.

"Walesa's spokesman, Adam Kinaszewski, said Walesa 'didn't confirm or deny' to the police that he met with the Solidarity underground. He simply refused to make any kind of statement (to police)."

The Solidarity chief was seized about 2:45 p.m. (7:45 a.m. EDT) and as police bundled him off in a red van for questioning, he yelled to reporters: "Tell the whole world they are breaking the law."

Before Walesa's release, government spokesman Jerry Urban issued a statement in Warsaw denying "the false information that Walesa has been arrested." But a spokesman for Walesa said officers arrived with guns and threatening to use force did arrest him.

It was the second time Walesa was detained since he was released from an 11-month martial law internment in November. He was picked up by police and driven around Gdansk for nine hours Dec. 16 to keep him from addressing a rally outside the Lenin shipyard, where Solidarity was born in August 1980.

Under Polish law police may detain people for up to 48 hours without charge, a tactic they used often in dealing with Walesa and other labor activists before the creation of Solidarity, the first independent union in the Soviet bloc. The labor federation was outlawed in October.

Walesa, interviewed briefly at his Gdansk apartment Tuesday night, refused to disclose details of his meeting with Solidarity's underground.

Walesa told reporters he was seized "as a move to help various students & Sibs $3.00 in advance at Acc Box Office Box Office Closes at 5:00 PM Friday Friday April 15 8:00 Pm Doors Open at 7:00 Pm
Increase non-defense spending

Senate committee revamps budget

WASHINGTON (AP) — The Republican-controlled Senate Budget Committee reshaped President Reagan’s budget knife on welfare, food stamps and other key social programs yesterday, as it tentatively crafted an overall spending program containing $14.7 billion more than he wants for non-defense items.

In contrast, the same panel had slashed his defense buildup by one-half in a lopsided vote last week.

The committee left welfare, food stamps and subsidized housing programs virtually unscathed, and slowed his cutsbacks in Medicare, Medicaid and other health programs considerably. And instead of a one-year freeze on federal pay, it voted for a 6-month delay of the next boost.

Still ahead was a decision on possible tax increases, yet another area where aides said the panel was likely to override Reagan.

The committee was expected to complete work on tax and spending blueprint late yesterday and today. Some aides cautioned, though, that a majority of the panel might reject the emerging plan entirely if the deficit became too large.

The latest decisions were all put together by Sen. Pete V. Domenici, the New Mexico Republican who chairs the committee, and embraced by both sides. Republicans hold a 12-10 majority.

Details include:

— Instead of Reagan’s proposed $31 billion reductions in Medicare, Medicaid and other health programs over five years, the committee supported cuts of $14 billion. Aides said that makes it unlikely Congress will approve Reagan’s plan to increase hospital costs for many Medicare patients in exchange for a new program of catastrophic health insurance.

— It rejected Reagan’s proposed cuts in welfare, food stamps and subsidized housing. The president wanted to trim food stamps by $1.1 billion, claiming that could be saved from “waste and corruption.” But a Congressional Budget Office study issued earlier yesterday said such a cut, in a program now costing $12 billion, would fall upon the nation’s poorest families.

— The panel voted to reject entirely Reagan’s call for revision of the Civil Service retirement system.

Kenneth L. Aldeman

Senate debates Reagan nominee

WASHINGTON (AP) — White President Reagan and his high command lobbied by telephone, Senate opponents of Kenneth L. Adelman’s nomination as arms control director asserted yesterday that his selection raises doubt about the administration’s commitment to curb the nuclear arms race.

Supporters of the embattled nominee said they had the votes to gain confirmation by a narrow margin when the Senate votes today. An Associated Press survey showed they were close.

Supporters also claimed the strength to defeat any effort to kill the nomination by returning it to the Senate Foreign Relations Committee where it would most likely be today, the day the full Senate is scheduled to vote on the nomination.

A poll by The AP showed 514 senators in favor of Adelman’s confirmation or leaning toward voting for him, 38 against and 14 undecided. One of the 14, Sen. Robert Packwood, R-Ore., will not be present for the vote today because he is attending a Republican conference in his home state.

Opponents said if they decide to offer an amendment to send the nomination back to the committee, it would most likely be today, the day the full Senate is scheduled to vote on the nomination.

A poll by The AP showed 514 senators in favor of Adelman’s confirmation or leaning toward voting for him, 38 against and 14 undecided. One of the 14, Sen. Robert Packwood, R-Ore., will not be present for the vote today because he is attending a Republican conference in his home state.

No further hearings are going to be held,” he said. "No further hearings are going to be held.”

Mayoral race lacked imagination

The Doyle Dane Bernbach ad agency, which is responsible for some of the classic advertisements of modern times (Volkswagen, Avis, Kodak, Levi’s, Polaroid, Chivas Regal), was fired recently by the Israel Tourist Office after more than 20 years of serving the account.

It was never much of an account, from the standpoint of size, but now that the Israelis are ready to spend some money — $2 million this year — the business has gone to another agency, Needham, Harper & Steers.

In the agency business, there are no contracts for life. Needham, Harper & Steers, the winner of the Israeli tourist account, was stunned at the end of 1981 when it was fired by McDonald’s after 10 years of award-winning advertisements. The McDonald’s account, which was handled by the Leo Burnett agency, from whose artists we get ads for Marlboro cigarettes, Kellogg’s Corn Flakes and United Airlines.

Accounts move about all the time. The Coors beer advertising is about to move from Texas Brand Management to Coopers & Lybrand. The reorganization of the Miller beer campaign is about to move. And Walter Thompson has just been fired off the Kawasaki motorcycle account. The Japanese firm is being unpleasantly undecisive about its two-wheeler failure. New plans will be moved to place the brand in another market.

Walter Thompson does the Ford ads. Kawasaki moved its $5 million account to Kenyon & Eckhardt, which does the Chrysler advertising.

The Israelis are also unhappy about falling "sales." It seems the Israeli government feels the country didn’t fare too well in America’s media coverage of the war in Lebanon. That coverage may have convinced some Americans that the Israelis are bloodthirsty militarists. On top of that, tourism to Israel was down 12 percent last year.

The Israelis asked Doyle Dane to come up with a new campaign to improve the image of Israel in America. The agency that created the warm James Garner Marlette Hartley commercials for Polaroid couldn’t come up with an approach that satisfied the Israelis. So they moved the account to Needham, Harper & Steers, which beginning May 1 will start a new campaign at you geared to the theme, "Come to Israel, come stay with friends.

One ad, for example, will show an Israeli cab driver saying: "The tourists asked me to take them to the best restaurant in town — so I took them to my house.

Zvi Rimon, an Israeli tourist official, told Advertising Age’s correspondent in Tel Aviv: "We hope to fight the American media with its own weapons." It’s touching to see this mystical faith in the efficacy of advertising even by government bureaucrats trying to influence public opinion. The Israeli government is trying to teach the American public how to come up with good advertising. Unfortunately, we are always changing hands! Research studies indicate that the most well-remembered advertising of 1982 was the Miller beer campaign. Yet Miller’s beer sales were down one million barrels last year.

Another one of the most well-remembered campaigns was the "Be a Pepper" commercials for Dr Pepper, executed with great flair by Young & Rubicam, the nation’s largest ad agency. Yet Dr Pepper came out of 1982 with a 58 percent decline in profits and the company all but conceded that its award-winning ads did not convert cola drinkers to Dr Pepper.

There is, of course, always one sure-fire remedy for falling sales: fire the advertising agency.
Remodeled at a cost of $352,000, the center provides 11,000 square feet of space for several facilities, including a hospitality room for informal discussions; a resource room in which visual accounts of center programs are displayed; a multi-purpose area for lectures, films and large meetings; a reading room, furnishing books, periodicals, papers, and audio-visual material for justice education; a reflection room for liturgies and private prayer; and several seminar rooms and offices for center administration.

A variety of center-sponsored films, slide shows, lectures and seminars examine issues including nuclear armament, world hunger, Third World development, and race relations. The center's academic courses — "Theology and Community Service" and "Reflections on Service" — encourage students to see opportunities for theological insight in their social service and analysis opportunities.

The director of the center is Father Don McNell, Kathleen Weigert and Sister Judith Anne Bente are the center's assistant directors. There is also a part-time staff including several University faculty alumni and students.

EARN OVER $1000 A MONTH.
AND OPEN THE DOOR TO A TOP ENGINEERING FUTURE.

How many corporations would be willing to pay you over $1000 a month during your junior and senior years just so you'd join the company after graduation? Under a special Navy program we're doing just that. It's called the Nuclear Propulsion Officer Candidate-College Program. And under it, you'll not only get great pay during your junior and senior years, but after graduation you'll receive a year of valuable graduate-level training that is not available from any other employer. If you are a junior or senior majoring in math, engineering or physical sciences, find out more today. And let your career pay off while still in college.

For more information, call the Naval Management Programs Office at:
1-800-382-3782

became interested in an unusual program in religion and psychiatry at the Menninger Clinic in Topeka, Kansas. At Menninger, Nouwen met John Santos, who was soon to become the first chairman of Notre Dame's new Department of Psychology. It was at Santos' invitation that Nouwen visited Notre Dame. Nouwen says that he never planned to be a writer. "It was quite accidental how I got started," he said. "I was asked to give a lecture to a conference of priests at Notre Dame. A stringer from the national Catholic Reporter sent the whole text to his paper and they printed it. "There was an enormous response to the article, so I did more reflections, and eventually they were put together in a book called Intimacy in 1969. The response was very encouraging and I have continued to publish. But I've always thought of writing as secondary to teaching, and most of my books have resulted from teaching."

Leslie Ann Cole, 28, returns home to Bethlehem, Pa., after a federal judge in Baltimore ruled that she should be freed from the Navy and receive an honorable discharge as a conscientious objector. Cole was accompanied by her mother as she left court.

SPORTS BRIEFS

Mary Sieger
Sports Writer

Disappointments — every team faces in fair share of them during the course of a season. Despite the glorious moments Notre Dame fans forget the disappointments every team encounters a period of frustration. This weekend was one such period for many Notre Dame club teams.

MEN’S VOLLEYBALL — An optimistic men’s volleyball team traveled to Bowling Green, Ohio to participate in the Midwest Intercollegiate Volleyball Association’s championship tournament. Ranked in first place in the league with a 55-17 record, the Irish anticipated their first championship in the tournament. Unfortunately, the Irish left the tournament disappointed with a second place finish after the host team, Bowling Green, defeated the Irish 15-9, 12-15 in the final. Next week the Irish will host IUPU-Fort Wayne in their last home match of the season. The narrowly defeated Notre Dame in their last contest and according to Gibson, the Irish plan to “wipe off the face of the earth.

RUGBY — Notre Dame’s rugby club lost two of the three games it played against the Lincoln Park Rugby Club this weekend. The A and B teams dropped their games 0-3 and 6-12 respectively while the C team won its game 8-0.

On Saturday, the Irish host Eastern Illinois University at 1p.m. behind the Stepan Center. This will be one of the last two games Notre Dame will play before the Mid- west championship tournament which will be held later this month.

GYMNASTICS — The Notre Dame gymnastics club finished its season as it purchased this weekend. The women and men dropped their matches leaving them with a 4-5 and a 6-6 season record respectively.

WOMEN’S TRACK — Notre Dame women’s track team lost its meet against Hope College this weekend. The Irish did not expect a strong finish at this meet since many of the runners did not accompany the team to Hope.

“We ran in a typhoon,” said coach Brian Coniff. “Those were the worst racing conditions I’ve ever seen — wind literally knocked us over. Coniff expects the team to do well at the Saint Joseph’s relay next Monday at Saint Joseph’s College because he believes his runners will compensate for the relays by preparing the team for the Little League meet on April 30.

SAILING — Notre Dame’s sailing club captured fourth place at the Regatta held at Marquette University this weekend. The team is frustrated by the outcome of this Regatta and claims that it was poorly managed.

“We plan to write a letter to the Midwest- term College Sailing Association in an attempt to get people to do a better job of hosting,” said team captain Chris Hussey. Hussey claims that a failure to round boats and inadequate identification of those boats may have led to Notre Dame’s fourth place finish.

Next weekend, the Irish sail against Xavier University and anticipate at least a fourth place finish in the Regatta. We “expect some good competition and hopefully, a well run Regatta,” said Hussey.

BOWLING — Not all of Notre Dame’s club sports had disappointing weekends. The Notre Dame men’s bowling club claimed seven first place finishes in nine events. The Irish competed against the University of Chicago, Northwestern, and the Irish American and Catholic Club. These teams are considered some of the toughest competition the Irish will face this season.

Naylor, Larkin return

Linebackers follow strong tradition

By STEVE LABATE
Sports Writer

Except for the lone possibility of the tailback position, the 1983 Notre Dame football team will have more talent and depth at linebacker than any other spot on the field. Over the last decade, linebacker coach George Kelly's units have been loaded with quality.

During the 1970's, Penn State earned a reputation as the No. 1 supplier of linebackers to the National Football League. Lately however, the Irish are making a name for themselves in this area.

Bob Golic, Steve Heinzeke, Mike Whittington, Bobby Leopold, and Bob Crabbe are all former Irish linebackers who have made it in the NFL. This year Mark Zavagnin is certain to be the next link in the chain.

Next season, the Irish will once again be strong at linebacker. Two starters will be returning on the outside, senior Rick Naylor and his high school teammate junior Mike Larkin. In the middle, Chicago, Ill. native Tony Furjanic will most likely inherit Zavagnin's spot.

Currently Furjanic is sitting out spring practice as he awaits for his injured thumb to heal. Originally reported in Monday's Observer as four broken fingers, the injury was actually diagnosed as a ligament tear resulting from his hand getting caught in a practice jersey. Although he will only be a sopho-

me in the fall, Furjanic will fill the void created by Zavagnin's graduation. The junior middle linebacker, 6-3, 225 pounds, had a fine season last year but he is still hampered by a nagging shoulder injury.

Larkin next season. As of right now, the depth chart at the time of Furjanic's injury, McCabe has been called by the coaches to switch to tight end.

"On Monday they (the coaches) called me in and told me they needed a lot of help at tight end right now," comments McCabe who played that position in high school. "I guess they are pretty short at tight end except for Mark Bavaro."

"Since I played in high school, they figured that I was a likely choice. We're going to try it this week and then they'll evaluate me, and I will evaluate myself. So it's not permanent in any sense."

The fact that McCabe had been backing up Furjanic prior to the switch makes it all the more strange. The handwriting may have been on the wall, though, on Saturday when he left on defense - second string middle linebacker. Larkin has the position all sewn up as he just may be the best on a very good defensive unit.

In Larkin, the Irish have power and speed. He showed last season that he has remarkable field savvy. Only a junior, Larkin can only get better. Upon Weissenhofer will back up Larkin next season. Weissenhofer hails from Oak Lawn, Ill. where he attended the same high school, St. Rita's, as Mark Zavagnin. Weissenhofer has looked pretty good this spring, but make no mistake about it, the position belongs to Larkin.

In the past the strongside linebacker has been the coaching property of Kelly, but this year that is not the case. Defensive line coach Greg Blache is working with this position because the Irish will change their defense a slight bit in the fall. Notre Dame will run a 4-3 and a 5-2 on defense. When they are in a 5-2, the strongside linebacker will line up on the line. In the 4-3, he'll drop back into his normal linebacker position.

"Our defense will be based on the other team's offensive alignment," explains George Kelly. "It won't be predictable or steadfast."

The man doing the shifting most of the time will be senior Rick Naylor. The Cincinnati, Ohio native had a fine season last year but he is still hampered by a nagging shoulder injury.

At spring practices wind down, any battles for linebacker positions are among the reserves, except in the case of middle linebacker when Furjanic has not been told the spot is his yet. As of right now, the senior - 10 opener looks like it will feature NFL - Naylor, Furjanic and Larkin talent.

Hicks, Bowen ink ND commitments

continued from page 16

Williams is there.

Bowen, a 6-8 forward who holds the unofficial Pennsylva­nia state record for career rebounds, will add depth and versatility to the Irish front line. Despite his lofty statistics (27 points and 20 rebounds per game). Bowen is nomi­nated and is listed as one of the four team all-American by Street and Smith's.

Bowen, according to Gillen, was a victim of circu­m­stance.

"He's a strong, physical kid, and he's a good outside shooter," says Gillen of the Warren, Pa., native. "But his stock went down a little because he didn't have a great summer in Pittsburgh at the Five-Star Camp (a highly regarded showcase of the nation's high school talent). Nobody realizes that he was playing with a new coach and inexperienced players at the camp.

"He'll be good for us because he can play three posi­tions: he can play forward power because he's 230 lbs., he can be a disease-free forward or he can spell Tim­my Kempston at center. He can shoot a 20-footer just as well as he's a strong rebounder and a good control of a perman­antarious.

By MIKE RICCARDI

"We're just a point guard and a center away," says DiStanislao said after Notre Dame's 81-77 win over St. Louis in the hands of then-No. 1 Louisiana Tech. If those two final spots were filled, the Irish could add a basketball star, well­reasoned, her team would find itself regarded among the nation's power teams.

When DiStanislao is searching for her aircraft car­rier, she might have filled the other bill, and she's cer­tainly established depth on her front line with her recruit­ing class of 1983.

Vonnie Thompson, a 5-8 guard from Saginaw, Mich., may be just the point player DiStanislao wanted so much. Thompson, who led her high school, Carrolton, to three of her four Class C titles in Michigan, averaged 14-16 points a game while dishing off five assists and grabbing five steals a night.

"Before schools recruited her as an off-guard, but we feel that she'll be more valuable as a lead guard, because she likes to take control of a game," says DiStanislao of the two­time Michigan all­stater.

Thompson's recruitment was unusual. Like Skierez and Willis, her name is not listed high on any national all-star teams, but when an Evonne Johnson of Flint High School got mixed up in the Five-Star Camp, the all­star from West­lake High School wrote a letter to Notre Dame.

Johnson's letter started DiStanislao to realize that "my God, there's two of them." DiStanislao strengthened her front line with the additions of 6-0 Mickey Skierez and 5-11 Lavet­ta Willis. Skierez, from Westlake, Calif., and Willis, from Way­ne, Mich., have already proven their worth.

Their game is tough and on the inside, as both boys averaged 10 rebounds per game, and both teams were successful on more than half of their field goal attempts.

"Mickey reminds me of a 6-0 Theresa Mullins," says DiStanislao. "She just goes in there and moves people around. She's tough.

"Lavetta, on the other hand, is an unpolished gem. She's only going to get better (here). And she knows that.

"She's got a good attitude.

The addition of Thompson and Willis gives the Irish women a Michigan connection — at guard, former all­amer­ican Denise Basford helped run the Notre Dame attack last year as a freshman.

"It's an absolute natural," says DiStanislao.

Thompson is comparable to that of Tim­my Kempston at center. He can shoot a 20-footer just as well as he's a strong rebounder and a good control of a perman­antarious.

Vonnie Thompson, a 5-8 guard from Saginaw, Mich., may be just the point player DiStanislao wanted so much. Thompson, who led her high school, Carrolton, to three of her four Class C titles in Michigan, averaged 14-16 points a game while dishing off five assists and grabbing five steals a night.

"Before schools recruited her as an off-guard, but we feel that she'll be more valuable as a lead guard, because she likes to take control of a game," says DiStanislao of the two­time Michigan all­stater.

Thompson's recruitment was unusual. Like Skierez and Willis, her name is not listed high on any national all-star teams, but when an Evonne Johnson of Flint High School got mixed up in the Five-Star Camp, the all­star from West­lake High School wrote a letter to Notre Dame.

Johnson's letter started DiStanislao to realize that "my God, there's two of them." DiStanislao strengthened her front line with the additions of 6-0 Mickey Skierez and 5-11 Lavet­ta Willis. Skierez, from Westlake, Calif., and Willis, from Way­ne, Mich., have already proven their worth.

Their game is tough and on the inside, as both boys averaged 10 rebounds per game, and both teams were successful on more than half of their field goal attempts.

"Mickey reminds me of a 6-0 Theresa Mullins," says DiStanislao. "She just goes in there and moves people around. She's tough.

"Lavetta, on the other hand, is an unpolished gem. She's only going to get better (here). And she knows that.

"She's got a good attitude.

The addition of Thompson and Willis gives the Irish women a Michigan connection — at guard, former all­amer­ican Denise Basford helped run the Notre Dame attack last year as a freshman.

"It's an absolute natural," says DiStanislao.

Thompson is comparable to that of Tim­my Kempston at center. He can shoot a 20-footer just as well as he's a strong rebounder and a good control of a perman­antarious.

"We're just a point guard and a center away," says DiStanislao said after Notre Dame's 81-77 win over St. Louis in the hands of then-No. 1 Louisiana Tech. If those two final spots were filled, the Irish could add a basketball star, well­reasoned, her team would find itself regarded among the nation's power teams.

When DiStanislao is searching for her aircraft car­rier, she might have filled the other bill, and she's cer­tainly established depth on her front line with her recruit­ing class of 1983.

Despite weather, Irish salvage split

By NEAL SMITH

The Irish baseball team was hoping to have the record that the Ball State team held with a 12-12 record. However, a rain-shortened 9-1 second game loss to Ball State gave Notre Dame a 11-13 record. The Irish were victorious in the first game of the doubleheader at Jack Kline Field 5-3.

Coach Larry Gallo "desperately" wanted to reach the 500 mark, "I wanted it (the 12-12 record) so bad that I could taste it," said Gallo.

In the first game, the Irish entered the bottom of the fifth inning with a 3-2 deficit. Second baseman Jack Morgan led off the inning with a single. A bunt single by shortstop Rick Chryst followed, and one out later, third baseman Carl Vuono doubled to left-center knocking in both runners for a 4-2 Irish lead. Vuono later scored after an error by the Ball State third baseman and single by Phil Dingle.

Pitcher Steve Whitmyer went the distance for the Irish. He raised his record to 2-4. Whitmyer gave up six hits, no walks, and had four strikeouts.

In the second game, the Cardinals did enough damage to the Irish in the third inning for victory. With a runner on third and two outs, Brown of Ball State hit his second home run of the season to give Ball State an early lead. The Brown homer was after Irish starter Tom Guilfoile hit back and playing within the next week.

Senior Steve Whitmyer added a hit to his 2-4 record yesterday as the Notre Dame baseball team beat Ball State 5-3 in the first game of a double header. The Irish lost the second game 9-3.

For Phelps, two down, two to go

By CHRIS NEEDLES
Sports Editor Emeritus

Yesterday — the first day for signing spring institutional letters of intent — came and went without any fanfare in the Notre Dame men's basketball office. With two recruits (forward John Bowen and guard Scott Hicks) having signed during the special one-week signing period in November, Digger Phelps and his staff now must sweat it out while their two remaining hopefuls — swingman Donald Royal and first-team all-America forward David Popson — make their decisions.

Popson, the blue-chipper from Kingston, Pa., has indicated that he will make his decision public at a press conference next Wednesday, April 20. He has narrowed his choices down to Notre Dame and the University of North Carolina, but is reportedly leaning toward the Tar Heels (see related story).

That leaves the Irish with two in the bank and two undecided, so even though the high school basketball season is over and only a few all-star games remain, the recruiting continues.

Royal, a 6-6 guard-forward from New Orleans, is a surprise prospect. Street and Smith's Basketball Yearbook, whose all America lists is highly regarded, did not see fit to list him as a candidate even as an honorable mention — and their list contains over 500 top prospects.

But Royal has one thing going for him — he's a winner. His school, St. Augustine, captured the Louisiana state championship this season. As a result, others have taken notice — Georgetown, UCLA, Virginia, Marquette and Tulane have joined Notre Dame in courting Royal, although the Irish seem to have the inside track.

"He's a diamond in the rough," says Irish assistant coach Pete Gillen, who coordinates ND's recruiting efforts. "He's a lot like (UCLA forward) Darren Daye — not quite as smooth yet, but he'll get better. He's a great athlete with the quickness we really need. Hicks doesn't have his name recognition that others have, but I think right now he can compete with the top 25 high school players in the country. I think we have a good shot at him.

Gillen's hopes were buoyed somewhat yesterday with the announcement that first-team all-America Reggie Williams of Dunbar High in Baltimore — a 6-7 swingman — had chosen to attend Georgetown.

"John Thompson (Georgetown's coach) is really good with the inner city kids," says Gillen. "Maybe now Royal will choose not to go to Georgetown now that see DIGGER ... , page 13"

Victors overcome wind rain, sloppy courts

By JEFF BLOMB
Sports Writer

Wind, rain and wet grounds hindered Bookstore XII play yesterday as the tournament entered its second round. Whether or not it was because the teams playing wanted to get out of the weather or not, most of the day's games were over faster than usual.

It was a day that saw many tournament seeds take to the court. Double Decker Oreo rookie continued its quest to be Bookstore Champion with a 21-9 win over Three Guys Who Hate Their Team. The story with Double Decker continues to be their hot shooting. They have now shot an identical 81.8% in both of their games, or 60/Casey Newell and Bill Vanner both hit on six of 10 shots to lead Double Decker yesterday.

Six-time tournament par-

Larkin a lock

Junior Mike Larkin appears to have the middle linebacker position all locked up for next season. Larkin will be adding speed and power to a talented Irish linebacker unit. Steve Labate reviews the situation on page 12.

LARKIN A LOCK

N. L. WEST
Will Steve Garvey return to haunt L.A.?

By CHRIS NEEDLES
Sports Editor Emeritus

Last season, the Atlanta Braves surprised even themselves by taking their first division title since 1969 — despite losing 19 of 21 games at one point in midseason. Three other teams were in the race in September, and while some faces have changed, the same four teams should contend ... with different results.

San Diego — The addition of Steve Garvey won't make that much difference — any good-hitting first baseman would have sufficed. The Padres are overloaded in the outfield and bullpen, and should use some of them in a trade for a starting pitcher — as of now, John Montefusco is the No. 2 starter. But Atlanta won without starting pitching.

Los Angeles — Tommy Lasorda would be wise to forego a championship this year to give his many youngsters some playing experience. The Dodgers future stars — Greg Brock (first base), Steve Sax (second base), Dave Anderson (shortstop), Mike Marshall, Ron Roenicke and Candy Maddonado (cutoff) — will lead LA to glory in future years.

Atlanta — Last year's champs are solid on offense and have two fine relievers — reliever Gene Garber and fireballer Steve Bedrosian. But both are righthanded. Sore-armed Terry Forster, acquired from LA, will try to fill the Braves' lefthander void.

Poor starting pitching — 44-year-old Phil Niekro is the stalwart — turned a 15-0 start into an 88-73 finish last year. This year, that won't be enough.

San Francisco — The Giants won 13 of their last 67 in 1982 to make a run for the pennant, which would have been their first title in 12 years. Mike Krukow (from Philadelphia) joins a good young pitching staff, supplemented by the best left-right bullpen combination in baseball (Gary Lavelle and Greg Minton.). Their defense (175 errors in 1982) must improve for SF to have a chance. But as long as the Giants have Johnny LeMaster (216) at shortstop, they will not win a title.

Houston — the best news out of Houston is that Ray Knight's wife, golfer Nancy Lopez, is expecting (they've been married less than a year). That proves that the Astros have at least one talented performer. The worse news is that reliever Joe Niekro, who used to be baseball's best lefthanded reliever, is gone for another season with arm troubles. Dimes for the Astros' pennant hopes.

Cincinnati — The former Big Red Machine has become nothing but a collection of Smurfs — 170-pound catcher Alex Trevino hit a .251 with one home run, Dan Dresens's 17 HR's led the Reds. Beyond Mario Soto, there's nothing here, in fact, their Indianapolis farm team would give them a good game.
