U.S. diplomat expelled from Soviet Union allegedly mistreated

Associated Press

WASHINGTON — The State Department disclosed yesterday that two Soviet diplomats were expelled from the United States last month as alleged spies, and charged that a U.S. diplomat expelled yesterday from the Soviet Union had been mistreated.

The two Soviets were identified as Yuri Petrovich Leonov, an assistant attaché at the embassy here, and Anatoly Vsegenyevich Skripko, another attaché at the embassy. Both were declared persona non grata "for engaging in espionage," said Alan Romberg, a State Department spokesman.

Skripko was declared persona non grata on Aug. 17. The action against Leonov was taken two days later.

A State Department official, who spoke only on the condition that he not be identified, said the decision to announce the expulsions was made because the Soviets disclosed the expulsion of a U.S. diplomat, Lon David Augustenborg, on spying charges.

Augustenborg was vice consul at the U.S. consulate in Leningrad. His wife Denise also was declared persona non grata.

Also, the expulsions of the two Soviet envoys preceded the Soviet downing of a South Korean airliner carrying 269 people on Sept. 1, which has caused a serious deterioration in Soviet-American relations and prompted worldwide criticism of the Soviet Union.

Romberg said the United States is "vigorously protesting the physical mistreatment" of Augustenborg. He refused to elaborate on the matter, and went no further than to say that Augustenborg was a junior officer at the consulate.

The U.S. official who spoke on the condition that he remain anonymous said Skripko was caught handing money to someone for a classified document he had just received.

Another official said the other person, whose identity was unknown to Skripko, was an agent of the FBI, which had entered the case "at an early stage."

Leonov was said to have been apprehended carrying a suitcase containing classified documents.

One official said Leonov was the same diplomat who attempted in September 1981 to obtain information on MX missile deployment plans from Rep. David F. Emery, R-Maine.

The official said Leonov left the country temporarily after the embassy incident but later returned.

Core requirements being re-evaluated

By ELIZABETH FLOR

Student Body Vice President Peggy Pevosnak, a member of the University Curriculum Committee, said that the committee is re-examining the University's core requirements for graduation at last night's Student Senate meeting.

The committee, with members from each of the colleges in the University, is examining the necessity of some requirements as well as the structure of courses.

Headed by Dr. Timothy O'Meara, provost, and Vice Chairman Father Edward A. Malloy, the committee is considering "adding a mandatory computer course for freshmen or sophomores," Student Body President Brian Callaghan said.

Callaghan, a member of the Committee on the Responsible Use of Alcohol, reported on the committee's examination of the discrepancy between Indiana state law and University policies on drinking.

Indiana state law sets the drinking age at 21, but University policies allow regulated underage drinking. Callaghan believes that policies prohibiting students from drinking alcoholic beverages on campus will lead to increased drinking off campus.

The issue will be discussed by the Hall President's Council and the see SENATE page 4

Congress returns in anti-Soviet mood after summer long recess

Associated Press

WASHINGTON — The destruction of a Korean Air Lines Flight 007 over Congress in a bitter, anti-Soviet mood as it returned yesterday from a five-week summer recess, and leaders of both parties agreed that President Reagan is now far more likely to get his way in foreign policy.

In the Senate, Republican and Democratic leaders united behind a resolution condemning the Soviet Union for "a cold-blooded attack on a commercial airliner," and "a barbaric action" which "will rank among one of the most infamous and reprehensible acts of aviation history."

The resolution is likely to be approved unanimously tomorrow. Similar action is probable in the Democratic House later in the week.

The Senate version urges further sanctions against the Soviet Union unless it apologizes for shooting down the Boeing 747 jumbo jet and pays compensation to the families of all 269 people who perished, including Rep. Larry McDonald, D-Ga., and other Americans.

Majority Leader Howard H. Baker Jr., R-Tenn., said "over the longer term, we can hope that the combination of universal outrage and the various sanctions we can impose will convince the leadership of the Soviet Union that murdering innocent civilians does little to satisfy their paranoid obsession with security."

A co-sponsor of the resolution, Minority Leader Robert C. Byrd, D-W. Va., said the attack on the Korean aircraft had left Congress "shocked, offended and ashamed."

In the House, more than a score of congressmen took the floor at the first opportunity to express their outrage at the Soviets, not only for the attack but for Moscow's refusal to allow other nations to search the area where the plane went down.

"This is not a time for restraint," said Rep. bar Halkin, D-Mo., "This act of violence is the very act that the Soviet leadership claims to support, and which has no respect for human rights and no respect for human life itself."

The anti-Soviet mood extended to a host of foreign affairs issues in both chambers, including financing of the MX intercontinental nuclear missile, the role of Marines in Lebanon, and Reagan's anti-leftist policies in Central America.

Baker said the plane issue will "deepen concern about the dangers of Soviet conduct in the world and will strengthen the president's request for a stronger military."

But Baker said there may also be new pressures for arms control talks with the Soviet Union because of fresh realization of the risks of nuclear war.
In Brief

Two Notre Dame students were arrested last week outside King Cello Liquor Store, 1623 South Bend Ave, for violating Indiana liquor laws. One student, a 21-year-old, was charged with furnishing an 18-year-old freshman alcoholic beverage. The other student, a 19-year-old, was charged with possessing liquor law violations. Police reported seeing the 21-year-old hand the other student a brown paper sack containing alcohol. Police said the alcohol was loaded into a vehicle owned by the 21-year-old. — The Observer

About 170 record albums were stolen from a Grace Hall resident during the first week of school, but there are still no leads in the case, according to Grace Residence Hall Director David H. W. Williams. The record collection, which contained nearly 40 rare rock albums of the 1970s, was taken from outside the student's door in the early morning hours of Aug. 31. — The Observer

Gilbert F. Schaefer, founder and president of Gal Schaefer, Inc., of Detroit, has endowed a $1 million professorship in economics at Notre Dame. The holder of this chair will be a specialist in world monetary systems. In announcing the gift, Father Theodore Hesburgh, president of the University, said, "The professorship will enhance the university's scholarship in a field of great importance to modern society, will augment generations of students, and will strengthen the Department of Economics, which has no endowed chairholder in its ranks." A former president of the National Club of Detroit, Schaefer is a 1923 Notre Dame alumnus, and will sponsor the first radio broadcast of Notre Dame football to Detroit — an event which led to Notre Dame games being carried throughout the world. — The Observer

Allen County, Indiana residents will soon be able to pay their property taxes with a credit card — thanks to an agreement between county officials and banks. Allen County Treasurer Linda K. Bloom says the plan — believed to be the first of its kind in the state — will begin Oct. 1. She says the county's seven banks have agreed to accept property tax payments for holders with MasterCard or Visa. "It's a way for people to save the cash to pay their taxes, we got our money quicker," Ms. Bloom said, pointing out that the plan gives property owners the opportunity to spend their payments, rather than write a large check. "Somebody may just need 30 days to get the money," she said. Thomas A. Edwards, director of counties and townships for the state Board of Tax Commissioners, said Allen is apparently the first county in the state to develop the pay-in-cash plan. The plan also has benefits for the banks, Edwards said. "The banks can pay their chief deputy treasurer. He pointed out the banks will be able to receive interest on the changes for taxpayers — don't want to get behind on their tax payments. — AP

In the mid-1960s, Brewer II S. Jeffress Jr., recalls, he was a long-haired singer and rhythm guitarist in a rock 'n' roll band who "made a little money" playing for the Notre Dame basketball team. But on Oct. 2, Brewer, 58, will blast into orbit from Kennedy Space Center in Florida as pilot of the Columbia on the space shuttle mission. Now, a native of Cape Cod, Mass., left his musical career behind in 1969 after earning a master's degree in engineering mechanics at the University of Wisconsin at Madison. "The Apollo program was just getting started, and the draft board said they weren't going to defer me any longer," Shaw said in a weekend telephone interview from his home in Texas. "I decided that rather than go into the Army, I'd join the Air Force voluntarily, because that way I could fly. He did win, winning a field of southside high school teams, and another of masters during the two combat tours of Southeast Asia. Columbia is to be commanded by John Young, who has flown more space than any other American, and the flight's mission specialist is to be Robert A. Parker. "You're not really an astronaut until you fly," Shaw said. "That's my definition. If you ask NASA, they'll tell you I'm an astronaut." — AP

The largest gift ever given to a women's organization— a $25,000 check — has been donated to the University of Iowa Women's Center in Iowa City by the Iowa-based Scheinfeld Foundation to help inaugurate the center's first "think tank" for women, said Irma Gerstl, co-founder of the National Forum for Women. The dedication ceremony included an address by Mrs. Carter, a talk by historian Gilder Lemaire and performances by women artists and musicians. — AP

Weather

Partly sunny and cool today, high in mid and upper 60s. Fair and cool tonight. Low in mid to upper 50s. Partly sunny and pleasant tomorrow. High in mid and upper 60s. — AP

What, me worry?

Feeling jittery? It's not quite the beginning of the year anymore, but you probably haven't really shifted into school-mode yet either. Perhaps the summer memories are having a hard time fading and you're just not in the mood for different activities.

And you're worried.

Stress is a fact of college life. Stereotypical images of caffeine undergrads in the early months of college, hit by the 21-year-old, was charged with furnishing an 18-year-old freshman alcoholic beverage. The other student, a 19-year-old, was charged with possessing liquor law violations. Police reported seeing the 21-year-old hand the other student a brown paper sack containing alcohol. Police said the alcohol was loaded into a vehicle owned by the 21-year-old. — The Observer

Mortar shells slam into Marine positions at Beirut airport

Associated Press

BEIRUT, Lebanon — Mortar shells slammed into U.S. Marine positions at the Beirut airport last night, wounding three of the American peacekeepers, a Marine spokesman said.

Maj. Robert Jordan said two of the wounded were evacuated to the helicopter carrier two Lima anchored offshore. One suffered a shrapnel wound in the left hand and the other had a dislocated shoulder, he said.

The third Marine was treated on the compound for a minor shrapnel wound in the leg. He said Jordan refused to speculate about who fired the mortars, but both Shi'ite Muslim militias and leftist Druse militias hold positions that would be in range.

The attack, which began after sunset and lasted about an hour, came more than 12 hours after Marines exchanged small arms and machine gun fire with snipers firing from areas largely under the control of the Shi'ite militia, Amal.

"Some pay would just pop up and let off a few rounds," Jordan said. "But the heaviest concentration was out of Hay el-Sellum." Hay el-Sellum, a crowded, poor Beirut neighborhood south of Beirut, is a stronghold of the Shi'ite militia.

Jordan said a U.S. Navy task force, with an additional 2,000 Marines had arrived off the Lebanese coast. President Reagan dispatched the task force to the area after two Marines were killed last month. Two more Marines have been killed since then.

Lebanese army spokesman Capt. Youssef Aristi said Amal gunmen in the Beruit neighborhood of Chiyah fired mortars at the Lebanon army. He said the army responded with "all kinds of weapons," including tanks and machine guns, and destroyed an unspecified number of Amal bunkers. There were no reports of casualties.

In Lebanon's central mountains, leftist Druse militias battled the Lebanese army at the army's strong

ghold of Souk el-Gharb, a Christian town which controls the major route from the mountains to Beirut. The army said its gunsists blasted a Druse convoy carrying weapons, causing enormous explosions.

Souk el-Gharb is the Lebanese army's only stronghold on the mountain ridge overlooking Beirut, and if the Druse took it they would command the area and the Beirut-Damasus highway.

The Druse claim their forces have overrun about 60 percent of the Chouf and Aley mountain ridges since the latest round of fighting between leftist Druse and rightist Christian militias began Sept. 4, when Israeli forces withdrew from the area.

The Druse claim the Lebanon army supports the right-wing militias of the Christian Phalange Party and have resisted attempts by the army to take over positions vacated by the Israelis.

U.S. demands compensation for Americans killed in airliner attack

Associated Press

The United States demanded compensation from the Soviet Union yesterday for the 64 Americans killed in the Soviet destruction of a South Korean airliner as a pilots' boycott of flights to Moscow took hold in Europe and NATO governments pressured to bar the Soviet airlines from their airports.

Meanwhile, a third body believed to be from the wreckage of the downed jetliner was found on Japan's northernmost coast, and the Kyodo news agency reported the plane did not crash for more that 12 minutes after one or more of its four engines was hit by a heat-seeking missile from a Soviet fighter.

The U.S. demand for compensation was presented in Washington by John H. Kelley, an assistant secretary of state, to Oleg Sokolov, second-ranking member of the Soviet Embassy staff, but Sokolov refused to accept it.

Kelly also tried to give Sokolov a note on behalf of the South Korean government demanding compensation for its citizens who were killed, but Sokolov rejected it also.

State Department spokesman Alan Romberg said the United States would "continue to press the Soviets to meet their clear obligation under international law to pay compensation to both the United States and Korea."

The pilots' ban, begun Friday in Britain, was joined by pilots in Italy, the Netherlands, Norway, Denmark, Finland and Sweden, cancelling 13 of the 27 weekly flights into Moscow from NATO countries.

Pilots of Air France, which operates six flights a week, were to join Tuesday, and the West German Lufthansa, which operates the remaining seven, said these would also be halted Thursday.

But the government of neutral Switzerland delayed deciding whether Swissair pilots could suspend their four weekly flights to the Soviet capital, and Finland's state railway began adding extra passenger cars to its two daily trains to the Soviet Union.

But four members of the alliance — France, Greece, Spain and Turkey — refused to take part. And the Danish Pilots' Association proposed that the pilots' boycott be reduced to two weeks also. It said a two-month boycott "probably will hurt Western airlines, and it could jeopardize Soviet route allocations."

With the TI-55-II.

What you need to tackle complex problems.

While the higher mathematics in a science or engineering curriculum are more functions than a simple slide-rule calculator has.

Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because it's preprogrammed to perform complex calculations. It's like having linear regression and hyperbolas at the touch of a button. And it can be used to solve problems without re-entering the entire formula. Included is the Calculator Data Sourcebook. It makes the process of using the TI-55-II even simpler, showing you how to use all the power of the calculator.

Encephalitis outbreak could become serious health hazard

By AMY STEPHAN

We are "right in the middle of an encephalitis epidemic," according to Dr. George Craig, director of the Notre Dame vector biology laboratory. Ten cases of Eastern Equine Encephalitis (EEE) have been reported in horses in St. Joseph and Elkhart Counties during the past week.

This is the first time since 1973 that EEE — a disease that usually affects horses, but can affect humans — has occurred in St. Joseph County, said Craig. A widespread epidemic of EEE took place in Michigan and parts of northern Indiana in 1980.

Craig said there is no known cure for EEE, and his department is "not doing much but keeping score." "There is very little we can do to stop it," said Craig, adding that he is not prepared to recommend a spraying program at this time, because there are not enough cases. If the number of cases increases, however, he will consider recommending such a program. For now, Craig said he is "praying for snow."

The mortality rate for EEE is 60-80 percent. Although a vaccine is available for horses, the vaccine itself has a one percent mortality rate and is therefore too dangerous to be used on humans, Craig emphasizes, however, that the disease is rare in humans.

EEE is an explosive disease which usually occurs in outbreaks of epidemics, said Craig. It is difficult to predict where or when outbreaks will occur.

Researchers are not sure what the vector (the insect which transmits the virus from one organism to another) is for EEE. Craig said that Coquillettidia perturbans, a type of mosquito which breeds in lakes of swamps where there are emergent marsh reeds, is the current suspect.

Researchers do not plan to research EEE in the near future because "there's no money in it," said Craig. Because several species of mosquitoes are involved in an outbreak of EEE in a particular area, Craig said it is difficult to obtain funds to research this disease. "How do you convince people of the economic value of a disease that didn't happen?" he asked.

The Notre Dame vector biology laboratory is currently researching a different type of encephalitis, La Crosse. Craig said the laboratory does not plan to research EEE in the near future because "we have enough to do with La Crosse. We can only solve one problem at a time."

Parasite research seeks protection

By KATHLEEN DOYLE

Now that microbial infectious disease has yielded to bacteria and viruses and are under control to a greater degree than in previous years, the importance of parasitic infections has increased.

The development of antibiotics and immunizations has enabled scientists to turn their attention away from the microbial diseases such as polio, choler a, and measles. Instead, protozoan and worm parasites have come to the forefront as the most important agents infecting humans and causing disease and death.

The three diseases of most concern to researchers today are parasitic diseases which are produced by worms (or "worms") in infections. On a global basis, malaria, schistosomiasis, and filariasis rank as the most important diseases, even though many other disease-causing parasites have come to the forefront as the most important agents infecting humans and causing disease and death.

Schistosomiasis and filariasis are caused by parasites called helminths. In the Department of Biology, under the direction of Paul Weinsein, research is being conducted with filarial parasites. Researchers are attempting to devise procedures and different types of media and physical-chemical conditions that are appropriate for the development of a parasite during its life cycle. However, in the past, the parasite which occurs in humans is not being used, instead researchers are experimenting with a model system.

The model is a filarial parasite common in gerbils. Ticks transmit the parasite in gerbils, whereas mosquitoes and biting flies carry the disease in humans. Weinsein and his colleagues are trying to culture the filaria in vitro (in culture), just as scientists have done with microbial organisms. In this way, they hope to learn more about the filaria's life cycle.

The researchers are not sure what the model system will be translatable to the human system, Weinsein said. "We have reason to expect that this will occur based on our work done previously with other filarial parasites."

Previous Notre Dame researchers studied dog heartworm, a disease transmitted by mosquitoes and in which the parasite lives in the heart of a dog. Using it as a model system, they found that it was possible to take the infection and apply it to the human filaria.

Work done by Eileen Frank for her doctoral dissertation involved growing in vitro a filarial parasite to the young adult stage in chemically defined media. Franke is the first to accomplish this and her work was recently reported in science.

Much is already known about the filaria parasite. In one type of filaria, the adults reproduce in the lymph glands of humans and from there the larvae move into the bloodstream. The larvae stay there for many months without further development, waiting for a mosquito to take a blood meal.

The number of filaria increases to a maximum level at about midnight (the mosquito is a night-biter) and this may hinder the flow of lymph. This eventually leads to elephantiasis, a disease common in the tropics.

Another kind of filaria results in blindness. This type of filaria lives under the skin of humans. An inflammatory reaction to the worm produces nodules about the size of hens' eggs. If these nodules occur on the head or scalp, the larvae may migrate into the eye chamber, with the inflammatory reaction causing blindness. Filarial blindness is common in parts of Central America and West Africa, affecting millions of people in those regions.

Encephalitis Cycle in U.S.

The Eastern Equine Encephalitis virus is maintained in a cycle between birds and Culiciseta melanura in the swamps. Coquillettidia perturbans can pick up the virus from birds and pass it on to men or horses. This transmission marks the end of the cycle, which usually results in coma or death for the victim.

EEE Virus Cycle in U.S.

Late Charger rally downs Chiefs

KANSAS CITY, Mo. (AP) — Dan Fouts, unleashing his throwing arm after San Diego was shocked by a 48-yard Kansas City touchdown pass play, drove the Chargers 80 yards in five plays last night, passing 12 yards and time will help the Irish improve their defense, Bishop says. "We're still very flexible," Bishop said.

Fouts, striking again

"I know what to expect from them," Fouts said after Saturday's win over Adrian. According to Bishop, the team's loss was due to overheating. "It was not a factor in the team's loss," Bishop said.

Lafayette. According to Bishop, the extreme heat wasn't so bad until the last few minutes." Bishop attributed Saturday's loss to a lack of discipline in Notre Dame's stick work and she plans to work on this area. She feels that experience and time will help the Irish improve their defense.

The Chargers, disdaining the pass in one long drive after another, took a 10-7 lead in the third period when Muncie capped a 96-yard, 15-play drive by sweeping 10 yards for his third touchdown this season.

At the end of the match, DiGiacomo said later. "The heat wasn't so bad until the last few minutes."

Bishop feels that playing in the morning was an advantage, due to Saturday's unusual heat in West Lafayette. According to Bishop, the extreme heat affected the team, but it was not a factor in the team's loss since it affected both teams equally. "We were able to work on our defense," Bishop said.

San Diego 87-73-580 - Chicago 87-79-79

DiGiacomo said after the game, "Any hope the Chiefs had of fighting back were extinguished by a 100-yard, 16-play drive by San Diego.

The Chargers, disdaining the pass in one long drive after another, took a 10-7 lead in the third period when Muncie capped a 96-yard, 15-play drive by sweeping 10 yards for his third touchdown this season.

in 14-11 before a service error halted the charge.

"What the spectator sees when he sees the errant play," said Vanslager, "is how the players start out with good concentration, but the level of concentration is not the same throughout the match.

"They have to have the same level of concentration on every point, in every game, whether they're winning or losing."

Despite the erratic play, through the team's performance is getting better. At times, the offense was running efficiently and the defense was digging well.

"Our transition from offense to defense was better tonight," said Vanslager. "The front row players were pulling back from the net the way they should.

The play of Henken, Mollie Mer-
chant, and McKewen was another bright spot as Henken did well in her

first start, and Merchant and McKewen performed well late in the match when the pressure was on.

IRISH ITEMS — The Irish will try to take the series in two out of three when they take on Butler and Dayton Monday in Indianapolis to open North Star Conference play. The next home match will be on Saturday at 10:30 when Northwestern Michigan visits the ACC Pit.

Australian challenge

U.S. for Cup

NEWPORT, R.I. (AP) — in
Australi a II the breakthrough boat that will seize the America's Cup that has been U.S. property since before the Civil War.

Does the more traditional Liberty have enough around strengths to stave off one of the strongest challenges to America's 152-year dominance?

After a summer filled with con-

dominance?

merion of the Australia II, the first few moments of today's opening race of the best-of-seven final series may answer those questions.

"It would be interesting for the first 30 minutes" to see which boat has the edge, says Liberty skipper Dennis Conner.

"Give us 20 to 30 minutes with average wind and you'll know pretty quickly if someone is getting blown out of the water," says Warren Jones, executive director of the Australia II syndicate.

Since trials to determine the two finalists began June 14, Liberty raced 10 times, compiling a 3-1-6 record, and Australia II, in 94 races, amassed a 68-0 mark.

But they've never measured their relative strengths in the same race, making the beginning of today's battle especially revealing.

Australia II, an exceptionally maneuverable boat skippered by John Bertrand, was the favorite for the rescheduled foreign trials and excelled on the first, fourth and sixth legs, which go upwind. Its crew was happy to stay even going downwind on the second, third and fifth legs of the six legs of the races over a triangular 24.5 mile course on Rhode Island Sound.

Moderate northeast winds of about 15 knots and scattered showers were predicted for Rhode Island Sound today. The winds were expected to pick up Wednesday.

Irish take 'must-win' game for first victory

By MIKE SULLIVAN
Sports Editor

Before this season started, it was doubtful that Sandy VanSculptr. her Notre Dame volleyball team thought that their match against St. Francis - Ft. Wayne would be an important one. But a rash of injuries and careless mistakes put the Irish in a "must-win" situation against the Cougars.

They got the win - their first in eleven matches this year - by defeating St. Francis, 5-7, 15-4, 15-1, 15-11, 15-13, last night at the ACC Pl.

"Getting a win under our belt was a real important," said VanSculpt. "The girls proved to themselves that they could put a combination together to win.

The victory was not as smooth as VanSculpt. would have wished as her team played very erratically, but, at times, it appeared that the players were about to break out of the slump that had seen them lose more games (10) in the first two weeks of the season than they had all last year (9).

Once again, the team's injury problem was very noticeable as starters Karen Bauters and Mary McLaughlin did not play, and another, Karen Sapp, played with a badly jammed thumb. Terese Henken started for the first time in McLaughlin's place.

However, it was many minor mistakes that caused the most problems against St. Francis. Service errors and net violations hurt the Irish just like they have all year, at least they don't expect that anymore, according to VanSculpt. traces the problem to a lack of concentration.

"We're working on these things every day in practice," she said, "but we are not executing them in the game." The execution was especially bad in early in the first game as Notre Dame was called for a line violation and made service errors in falling behind -6.

The team's performance improved when Jone Maternowski began her serving. She also served the Irish won 11 of the last 12 points of the game.

The streak of good play did not last long. After taking a 6-4 lead in the second game, Notre Dame proceeded to commit numerous service errors and violations, allowing the Cougars to take the last eight points of the game for a 15-7 win.

S. Francis made it 15 points in a row as it jumped out to a quick 5-0 lead in the third game, but Maternowski once again prevailed and kept her on service, lifting the Irish to a 6-5 lead.

The lead went back and forth until S. Francis committed a costly service error, allowing the Irish to have a chance to take control of the game. With Kathy McAdams and Karen Sapp, Henken and Mary Jo Henley scored points with spares, and Notre Dame ran off the last five points of the game to win.

The Irish put the match away in the fourth game as they jumped out to a large 15-4 lead and hung on as best they could.

Sapp, who had been having serving problems all night, took her team out to a 6-1 lead. Henken extended the lead, and it appeared that the Cougars would not be able to catch it.

They were not quite ready to rollover, however, as they moved with

Field hockey team drops first to Purdue

By MARY SIEGERT
Sports Writer

While the Notre Dame football team was up a stunning victory at Purdue on Saturday, the Irish field hockey team can't claim to have had as much fun. They dropped their first game of the season to the Boilermakers.

Although the game will be recorded in the books as a loss, Irish head coach Jan Galen-Bishop considered it a win for her team. She believes the game, the most important game of the season, was a wake-up call.

"This is a wake-up call for the whole team," she said. "We had two back to back victories, I think we can learn on our way to a successful campaign this year.

Fischette's optimism will be tested once again next weekend when the Irish face Butler at 3:30pm on Friday and Depauw at 9 am on Saturday in two duals on the Courtneys.

Irish women lost to Georgia in straight games, they had better luck last night against St. Francis. See Mike Sullivan's story at right.

Topples Boilers and Illinois

Irish netters win two over weekend

By JANE HEALEY
Assistant Sports Editor

Astonishing victories were not exclusive to the football field this weekend. The Notre Dame women's tennis team upset a surprised Purdue 7-2 on Saturday and then went on to topple Illinois 5-4 on Sunday. The victories were the first ever against Big Ten opponents.

Seeking revenge for two previous losses to the Boilermakers *(7-0 and 7-2 last season)*, an inspired Notre Dame squad handily defeated both teams 7-2 the previous Tuesday and Thursday. For five hours in the sweltering heat, the Irish served, stroked, and sized their way to victory.

"It was so exciting," Coach Sharon Petro said. "I wasn't really certain before if we could beat them (Purdue) and it was a little concerned, and I hoped we could give our best.

"We gave it our best, and just bowled them over. They were surprised - really surprised!"

A look at the final score raises the question whether Purdue has gotten worse over the off season, or whether Notre Dame is just that much improved over the same period of time.

"I thought they were strong this year, but it looked our team is stronger," commented the lone Irish senior, Pam Fischette. "It was our first match and 1 think played a lot better than wanted to start the season with a victory - especially against Purdue.

The only two matches Irish lost were at No. 1 singles (Mary Coligan) and No. 2 doubles (Susan Panather and Laura Lee). At No. 2 singles Lisa Lauratza squeaked by Deb Prokowska 7-6, 4-6, 6-3, and 6-3, and Fischette had some easy trouble with barley Barbee before finally winning 6-7, 6-1, 6-2. But the other three singles players, No. 1 Monica Butler, No. 3 Anne Panather, and No. 6 Laura Lee - all started their first victories of the season in a relatively easy fashion, while the doubles pairings of Fischette Collignon and Laffair Greta Rorner won their game eight pro sets, 8-5 to each game.

The momentum created in Saturday's victory carried over into Sunday's duel with Illinois.

"Having beat Purdue on Saturday really helped us against Illinois," Petro said. "If we didn't beat Purdue, I don't think we would have defeated Illinois."

The Irish were also battling the meat of a close 3-4 loss to the Illini last season.

"Illinois is an improved team," Petro said. "Last year we played so bad, it wasn't indicative of our ability.

"Going into Sunday's match, I was confident about our talent, but I was concerned about how tired we were after Saturday."

Petro's concerns were not satisfied until the very last match of the day. After splitting the six singles matches and the first two doubles matches that were played, the team victory came down the last set of a doubles match featuring Collignon Fischette.

With the win, the other action completed, the crowd at the Courtneys Tennis Courts focused their attention on the deciding game beyond the talent that the crowd witnessed. They also saw sheer movement and positive attitude at its best. The Irish batted back a 6-2 loss in the first set to win the Illini off 6-2, 6-2.

"Finishing third in the nation (in the Division II National Championship) at the end of last season didrated us to a win we can compete with the best," Fischette said. "I think it motivated the team members to work hard over the summer, and now it's paying off."

Petro noted the importance of a heightened team attitude, but as coaches are likely to do, she cautioned against overconfidence.

"We have a different attitude this year," she said. "We started from day one wanting National Championship. They (the team) are really psyched. Now we have to maintain that attitude."

As players are apt to be, Fischette was more optimistic about the rest of the season.

"Our first two matches were our toughest opponents of the season," she said. "With two back to back victories, I think we can be on our way to a successful campaign this year."

Fischette's optimism will be tested once again next weekend when the Irish face Butler at 3:30pm on Friday and Depauw at 9 am on Saturday in two duals on the Courtneys.
