Students to choose new phone services

By MARK POTTER
News Staff

New telephones and a new long distance calling system will be the University's Christmas present to the students this year.

Along with this present comes the task of choosing among Infonet, Saverline or MCI as a student's long distance calling service.

Over Christmas break the old rotary dial telephones now in student rooms will be replaced with touch-tone phones.

Along with this change, Indiana Bell is discontinuing its discount billing cards. If a student wants to make long distance calls without collecting they will have to subscribe to a long distance calling company, such as Infonet, Saverline or MCI.

According to Ed Humphers, the University's assistant to the provost, the decision to replace the phones was made about two years ago, before the present break of A.T.

He said that this early phasing start saved nearly a year in getting the phones installed because many universities currently are converting their phone systems.

One of the reasons behind the decision is the phasing out of the rotary system by the phone company. Humphers describes the rotary system as having been "endangered species for years."

The University considered bids for the new system from eight different companies. A.T.

T will install the hardware, such as the new switching system that is being installed in the basement of the library.

Security officers will accompany the telephone installation as they get into the rooms to install the new phones.

All of the new phones will be A.T.

Infonet will be managing the long distance calling service being called The Notre Dame Student Telephone Network.

Infonet has contracted with the University to provide this long distance service to the students.

Infonet specialists in managing long distance calling for universities, said Don DeLaney. Infonet is also in use at the University of Tennessee, Eastern Michigan Uni-

The Indiana Bell company in Washington D.C.

DeLaney a representative from Infonet, was on campus this week to help with the early registration for Infonet, being conducted in the lower level of Lafortune.

Students will also be able to sign up for Infonet at registration in January. But DeLaney said he is worried that there will be long lines at registration because of the stu-

dent's new dependence on long distance telephone companies for making non-collect long distance calls.

When a student signs up for Infonet he will receive a six digit personal code. A student will be able to make a long distance call by dialing the number they want and then their personal code. However Infonet can only be used by student phones on campus. The personal code is only for billing and keeps people who are not subscribers of the lines from being billed. Infonet will be sent either to the student or to the student's parents.

"Infonet can save students up to 35 percent on their long distance calls," said DeLaney. He added that the average savings is around 10 percent. There is no monthly fee for Infonet, the stu-

dent will only pay for the calls he makes. Infonet is on the same time-

rate schedule as Indiana Bell, as is MCI and Saverline. This means the rates do not change significantly after 11 p.m.

Infonet is committed to the students, according to DeLaney. He mentioned that he would like to look into the possibility of a scholarship for Notre Dame student.

Students will be able choose among Infonet, Saverline, or MCI for their long distance phone service. The decision is being made by the student users as well. Saverline is the largest

Senate studies examination policy

By BARBARA HARDIN
News Staff

"Final exams are the single, best way to evaluate what work you've done here," said Academic Commissi-

nion Mike Hayes after listing three amendments for a new final exam policy at this week's Student Senate meeting.

The amendments, which have been proposed by Father James Henschel's committee, are being bestowed by faculty, staff and students.

The first amendment would make the official time and place for exams permanent.

Hayes said the earliest such a policy would be enforced is the beginning of next school year.

The second amendment would provide this long distance service to the students.

Infonet specialists in managing long distance calling for

Students have yet to be heard on the exam policy issue of dorm food sales. Hayes said the earliest such a policy would be enforced is the beginning of next school year.

Student Body President Brian Callahan said the amendment was made after a student presented a plan to the student senate committee to con-

sider the amendments further. Some senators, however, voiced disap-

proval last night.

In other business: The Student Senate addressed the issue of dorm food sales. After health inspections were conducted on the facilities, it was determined that there is a high risk factor in many of the dorm facilities.

Deane Weaver, manager of food sales for Stan-

ford, said the amendment was made after a student presented a plan to the student senate committee to con-

sider the amendments further. Some senators, however, voiced disap-

proval last night.

In other business: The Student Senate addressed the issue of dorm food sales. After health inspections were conducted on the facilities, it was determined that there is a high risk factor in many of the dorm facilities.

“The Prince of Hunger,” a short film, will be shown today at 7:15 in the Center for Social Concerns. Peter Walsh, professor of government and economics, will hold a discussion afterward on the political and economic aspects of hunger. The film and discussion are sponsored by the World Hunger Coalition. All are welcome. The Observer

Raffle tickets will be sold in the dining halls today. The winner will receive dinner for four at the Head-Presidential Council, cost $50 each or 3 for $1. The proceeds are going to Cancio, a child abuse and neglect program in South Bend. The drawing will be Friday, December 9. The prizes are $25 gift certificates for Domino’s Pizza. The Observer

The Observer

NASA gave the Spacelab astronauts an extra day in orbit yesterday for a voyage that experts say already is rewriting science textbooks by disproving a 77-year-old Nobel Prize-winning theory and the inner ear. Mission controllers noticed that space shuttle Columbia will land at 7:04 a.m. Pacific time tomorrow morning after the six-man crew flew a full 10 days in orbit. Initially the mission had been due to end today. Mission commander John Young and his crewmates asked for some time off the mission was extended. The flight was arranged for the astronauts to have a break from the non-stop science and let them look out the window and take a rest on the Earth. The astronauts also plan to use the extra day for solar and materials processing experiments. AP

**Former Vice President**

Walter Mondale is favored to win the formal support of the National Organization for Women this weekend, but California Sen. Alan Cranston is pushing up a surprising effort to get the presidential endorsement, NOW officials said. Cranston was in the Democratic presidential race evaporated with his refusal to back federal homosexual rights legislation, NOW board members said in interviews during the past week. AP

A double plague of tornadoes and floods hit the Deep South yesterday, killing one person, tearing down houses from foundations, flinging sleeping people into streets and reducing barns to mounds of scattered ruins, meanwhile, churned over the Plains and into the East and threatened to count countless roads anew with ice and snow. A new, big chill turned the eastern Rockies into an icebox, with temperatures dipping to a bone-numbing 11 below in Colorado. Sections of Selma, Ala., were leveled. A housing project and crews working on the average of 50 people were dead. The death tolls at one and injuries at 15 in Selma, where 12 trailers, four houses and 50 new cars at a dealer lot were destroyed. AP

**Of Interest**

The annual snowball war between South and North Quad erupted last night with heaviest fighting reported in the main quad area, but correspondents have offered differing reports as to the victor of the clash. Primary sources indicate, however, that South Quad forces may have had a slight edge because they were able to claim the South Quad forces to gain a clear advantage. The first wave of Grace and Hanner recruits, later joined by Stanford and Keanan, attacked Dillon Hall at approximately 10 p.m. and, according to North Quad sources, captured the Dillon bug after heavy casualties. Pouring from the dorm in full force, Dillitones began the march to the tower quad. Meanwhile, North Quad, generals, after losing the initiative, had circled troops around the library to attack Dillitones from the Dillon bug to the east. Dillon capitulated on the weakening of North Quad forces, although by a strong force of some 100 members of Grace and Hanner at the pass between the North Dining Hall and Farley Hall, the South Quad forced the pass and surrounded Dillon Hall. The North Quad forces, pierced by the South Quad attack, regrouped, desperately attempting to hold off the surge. Siege weapons included a sledgehammer — made of surgical tubing and a funnel — battle rocks, and M-80 firecrackers. The fighting, which saw past midnight saw few casualties. Correspondents reported fewer than 10 windows broken. The Observer

**Weather**

Partly sunny and cold today. High in upper 20s. Becoming mostly clear tonight. Low in upper teens. Tomorrow it will be mostly sunny and not as cold. High in mid 30s. AP

1,000 applications will be accepted as delegates to the convention, representing their home states. The wide national representation among Notre Dame students provides an ideal situation for the convention, since every state will be represented," O'Leary says.

At the convention the delegates will elect a Democratic presidential nominee and draw up the party platform, which will express student opinions on major political, social, and economic issues.

According to O'Leary, this year's convention will emphasize the choosing of the platform more than in previous years. He also points out that the convention will be "as relevant as possible, with banners, speeches, and performances by the marching band."

O'Leary sums up the convention as "a chance to experience an actual political event, to become actively involved in the presidential election, and to meet a lot of other students with similar interests. We hope to have a large response for delegate positions and committee positions."

continued from page 1

An attempt is now being made by the 10 members of the committee to circulate the dorms, talking to students and getting input on the campus alcohol issue. Seven dorms will be visited this week. Callaghan said "some tightening of restrictions will definitely be made," but he added that he is "95 percent sure the campus won't be dirty for everyone."

The Alcoholic Awareness Committee will sponsor a student study break on Wednesday, Dec. 14 from 9 p.m. to 11 p.m. on the main floor of Lafortune Student Center.

long distance calling company in the South Bend area, with about 2,500 customers.

Like Infonet, Saverline also will not charge students a monthly users fee. Usually Saverline users are charged $750 per month. Charles Hutson, Saverline representative, said, "Saverline calls are discounted up to 4% with an average savings per call of between 50 and 25%.

When a student signs up for Saverline he receives a personal identification number and a local number to call when he wants to make a long distance call. This is because Saverline has its switching facilities in South Bend, which directs calls out. Because Saverline's switch facilities are in South Bend, calls can be made on the Saverline network from any phone in the South Bend area.

Saverline is offering a drawing for free trips to Florida over Spring Break. Hutson says this is "to call attention of our service."

Students may also choose to receive MCI, which is the largest long distance company in the nation. A student also gets a local calling number as well as a 5 digit international code from MCI. MCI, like Saverline can be used from any phone in the South Bend area, and the bill can be sent anywhere, as can Saverline's bills.

MCI has three types of service to choose from. The full time plan allows a student to call at any time. It has a $10 per month service charge, and calls on it save an average of 55-60%. Also available is the SuperSaver plan, which has a 45 cent per minute service charge. It lets a student call from 4 p.m. to 10 the next day, and all weekends and holidays. Calls on it are discounted the same as on the full time plan.

The basic plan has a one time service fee of $10, however calls on it are discounted only 5-15%. Calling hours on the basic plan are the same as those on the SuperSaver plan.

The rates from all the companies are all fairly close. A call from Notre Dame to the west coast after 11 p.m. will cost approximately 19 cents per minute on Infonet, 17 cents a minute with MCI's SuperSaver package, and 15 cents on Saverline.

A call from Notre Dame to the east coast is 17 cents per 60 seconds with Infonet, 15 cents on MCI and 14 cents with Saverline. The same call to the east coast between 5 and 11 p.m. costs 22 cents per minute, 19 cents per minute, and 23 cents per minute, on Infonet, MCI, and Saverline respectively.

---
Final exam code tests faculty patience

It is easy to get the impression that certain administrators don't care about faculty and student opinion, especially in light of the Academic Council's recent action on course requirement change.

The committee's primary goal is "just improving the University." To at least a few thousand people around campus, it is obvious that reforming finals will reach that end.

The proposal would eliminate senior exemptions, enforcing the final exam mandate; and increase the weight of exams to a minimum of one-third and a maximum of two-thirds of the semester grade.

The University Academic Council chose to delay action on the proposal, and with good reason. Even Father James Burke, a supporter of the changes, admitted that the proposal as it is, and it's been so long since the Council has had the opportunity to discuss something pedagogical.

The proposal seems ill-advised not only because tensions between the administration and faculty already are strained, but because it would set a dangerous precedent.

Many professors ignore Du Lac as it is. Several give non-cumulative tests, since comprehensive exams would force them to add another test a week or two before finals. Others prefer to substitute an extensive research paper for a final exam, believing that papers provide a greater learning experience than rehashing old material.

In some classes, a final exam (let alone one that counts 50 to 67 percent of the final grade) seems out of place. Art classes, computer programming and some seminar classes come to mind.

No foods enforce such policies, and those with similar restrictions allow a weeklong "reading period" before the start of exams.

Still others require a senior thesis before graduation.

In the end, individual professors are in the best position to decide whether a course should have a final exam, how much such an exam should count and whether or not seniors should be exempt.

Some professors have threatened the University's move with a "just let them try it" philosophy. In order to enforce its decision, the University would have little choice but to fire the teachers who fail to comply. Such a price seems unfair for such a dubious goal.

Yes, the Academic Council should be concerned with the academic quality of the University. But telling professors what to do—in short, dictating their teaching philosophy—is the wrong way.

And if anybody cares, students aren't too hot on the idea either.

P. O. Box Q

Food services

Dear Editor:

As a food sales manager, I am extremely alarmed at the findings of Mr. McCauslin, Notre Dame's Environmental Safety Specialist, concerning health and safety conditions in the food services. It is not due to doubts that there are problems, some extremely severe, that the answer to which Fr. Van Woelckar and the Rectors Committee of the Office of Student Affairs handled the situation seems unfair.

First, I understand Mr. McCauslin will visit the campus to confirm the recommended improvements, however, the initial spot inspections should have been carried out with the food sales managers present.

There is nothing wrong with a spot inspection, but if the manager in charge of the area was not present, all the managers aware of exactly what he looks for when inspecting and what general standards he deems acceptable.

The exclusion of managers from the inspections hampers me to my second point. The University tends to believe that students have little interest in the dealing of campus problems which affect their welfare. The Knights of Columbus incident, The Observer "swallow" and the "go to the corner and keep quiet" mentality, all reflect a dangerous and disturbing pattern of paranoid paralysis.

The fact that I only learned of food sales problems following an article in an observer being testimony to the breakdown of communication between students and the increasingly isolated Dome.

I am insulted, Fr. Van, that you did not consider my opinions or input important, or even pertinent — and I wonder how you expect cooperation from a group of students you refuse to acknowledge.

Perhaps such language is a bit strong, however, these are the unmistakable feelings generated by unilateral threats and closed-door committee meetings.

Had any food sales managers been consulted, these are perhaps a few suggestions we would have suggested:

First of all, the reason conditions are so atrocious is not due to the deliberate efforts of food sales managers. On the contrary, the problem exists because students operating these facilities have little or no background in the food services business. The conditions exist in ignorance, and the best solution to this is education.

The University could hold workshops for food service owners and their employees, explaining and demonstrating proper health and safety procedures. Student managers could learn what is expected of them and University personnel could be assigned the task of working with individual halls and the problems peculiar to their business.

Secondly, a permit system could be initiated by the University where, upon passing an initial health and safety inspection, a student manager could be granted a permit to serve his hall. Additional inspections would be done periodically, and retention or permit would be contingent on satisfactory inspection reports.

Eventually, once certain standards and procedures had been outlined, the permit system could be transferred to government, who would administer to their respective halls.

There are two reasonable and practical solutions to the food sales problems. Fr. Van and the Rectors Committee would be wise to consider them before taking action. An acceptable compromise can be reached if the University is willing to act reasonably.

We stand at a crossroads, Fr. Van — either accept the challenge of cooperation and work with food sales managers to improve health and safety conditions, or act unilaterally to stall your own food sales policy, only further cementing the University's image of being militant and reactionary, and isolating your office even further from the respect and support of the students.

David A. Dzrzevski

ND prohibition

Dear Editor:

The current talk of a dry Notre Dame is reminiscent of Prohibition, speakeasies, and bathtub gin. Although I applaud the University for trying to look at the use of alcohol on campus, I must consider the dry campus option as detrimental to an already serious and delicate problem.

We must look at reality before we try to solve this problem. Alcohol is a major component of the social life here and until we change that attitude, students will feel the need to drink to celebrate, cope and forget.

By prohibiting the use of alcohol, we are not prohibiting the students to drink, we are only forcing them to work a little harder at obtaining and using it. In essence, we are not solving the problem, just whitewashing it so we can not notice it so readily.

We should take a positive approach towards addressing this problem, instead of the negative, prohibitive action. First, we can attack the alcoholic attitude by encouraging and organizing nonalcoholic activities as a permanent solution. However, this takes time. Therefore, we also need a more direct immediate plan.

If we recognize alcohol abuse as a personal problem, not merely a disciplinary problem, even for the first-timer, and if we recognize that responsible drinking is a realistic expectation and skill, we can begin to affect the situation immediately.

Swift and strong response to anyone found intoxicated is necessary. This response should include counseling, retribution for any damage and a general discussion and possible reformation of the student's attitude towards alcohol. Of course, this must be strict and very consistently enforced in order to have any effect.

But we must be willing to invest the needed time, effort and money into our campus. In this manner we treat the cause, not the symptoms of the alcohol problem, and we take a positive step towards mature and responsible handling of alcohol, instead of a negative step towards hidden closed doors.

Denise M. Mick

The Observer

The Observer is an independent newspaper published by the students of the University on the principles of the administration of other institutions. The news is reported as accurately and as objectively as possible. I single editorials are the opinion of a majority of the Board of Editors. Letters, columns, notes and the Inside Column present the views of their authors. Column space is available to all members of the community and the free expression of varying opinions on campus, through letters, is encouraged.

Everybody says it's a rebuilding year and it is hard to disagree. We like to use the word building, though, because our program is still aspiring. Northwestern now stands at 1-1, one loss coming at the hands of Loyola of Chicago. Last year's NIT tournament was the first ever post-season appearance for the Wildcats. Just making it to a tournament was quite a boost for Northwestern; consequently, its win over Notre Dame did wonders for the program.

"It (the NIT win) brought credit to our program," comments Falk. "We are labelled as a winner on the outside now and once you are recognized for post-season achievement, Falk continues, "it's uplifting. It's obvious. We see it every day in our players." "We haven't forgotten that this is the team that beat us in the NIT," comments Phelps on his players' feelings about the game. "I think the players know that you respect Northwestern because they beat you, and we do respect them.

Northwestern's pressure defense. "We did something Saturday we had to do," says DiStanislao. "We played consistently for the whole game and the players did as they were told. We'll have to do the same thing against Northwestern. They have some real tenacious players and, despite losing five letterwinners, Northwestern has a tradition that always makes them tough to beat,"

Much of that tradition which the Wildcat women's basketball program has comes from DiStanislao herself, who coached NU for five years before moving to Notre Dame. DiStanislao led the Wildcats from obscurity to national prominence in five years there, winning a 90-27 mark and leading the Wildcats to the quarterfinals of the AIAW National Tournament.

But, while she still has a number of friends at Northwestern, the Wildcats will not act too friendly to the Irish as they try to build their own tradition under DiStanislao.

continued from page 8

will be trying to punch the ball into are Mary Beth Schreiber and Carrie Bates, among others. Schreiber, the 6-7 sophomore, had her best game of the year against UCLA, scoring 17 points and pulling down nine rebounds. Bates, who was named North Star Conference player of the week for her outstanding performance against the Bruins (18 points, six rebounds in 22 minutes), will be able to see some action despite sitting out against UCLA.

Forwards Trena Keys, Ruth Kaiser, and Lavetta Willis will help out Schreiber and Bates inside, while point guard Bonnie Thompson will guide the Irish offense. Denise Stanford, Lynn Ebben, and Laura Dougherty will help Thompson try to beat Northwestern's pressure defense.

Revenge on their mind

Irish travel to Northwestern

By JEFF BLUMBERG

With revenge on its mind, the Notre Dame basketball team travels to Evanston, Ill., tonight to face Northwestern. The Irish hope to avenge last year’s 60-47 loss to the Wildcats, which ended a nine-game Notre Dame domination dating back to the 1960-61 season.

In order to beat Northwestern, Notre Dame will have to contain the fine forwards of the Cats, Art Aaron and Andre Goode. Northwestern’s second-leading scorer last season had an average of 14.9 points per game, 6-8, 200-pound Aaron is the Cat’s top offensive threat.

Aaron started all 30 Northwestern games last year, shooting 51 percent from the field on his way to being an honorable mention on the all-Big Ten team. Key shooter, Aaron is also one of the Wildcats’ top defensive players, as shown by the fact he led Northwestern in steals last year with 47.

“Aaron is a very, very quick forward who has good ability to get open and get a shot off,” says Irish coach Digger Phelps. “If our concern is our concern is our match-up to him. He plays like a Magic Johnson with his size and ball handling ability. We really don’t have somebody that quick defensively to play him.

Goode is the other big Northwestern threat. The 6-10, 225-pound fixture averaged 9.8 points per game a year ago playing out of position at the center slot. Playing in all 30 games last year as Aaron did, Goode also had a team-leading 6.7 rebounds per game and was the Wildcats’ top shot blocker with 22.

“Goode is a dangerous shooter when he gets open shots in their transition game,” says Phelps. “He’s also very strong inside.”

“The key to beating Northwestern,” Phelps continues “I think if you can control those two post threats, then I think you’re controlling Northwestern.”

Playing at center for Northwestern tonight will be 6-8, 230-pound senior Paul Schultz. As the NU sixth man last year, Schultz averaged only 2.7 points and 2.1 rebounds per game.

The Wildcats start a pair of freshmen at the guard spots. One is 6-7, 190-pound Ben Brown, who averaged 6.6 points as a senior in high school, and the other is REVENGE, page 6

ND women take on Wildcats

By MIKE SULLIVAN

The Notre Dame women’s basketball team must earn some national recognition after its victory over UCLA last Saturday afternoon. Coach Muffet McGraw acknowledges that the challenge that day did it before it picked up the big win.

It has to prove that it deserves to be among the top teams in the country.

The first test that Mary Del Stanislao’s squad must pass comes tonight when it travels to Evanston, Ill., to take on the Lady Wildcats of Northwestern in its first road game of the year.

It will not be an easy task for the Irish, although Northwestern has already lost twice this season.

Beth Ann Polaha, one of those losses came to nationally-ranked teams, including No. 1 Southern Cal which escaped from Evanston with a 67-65 overtime victory — the closest game USC has had this year.

“Don’t want to be known as a flash in the pan,” says Del Stanislao.

“When we come out ready to play, and plays downside 40 minutes every game,”

Del Stanislao will be looking for the same consistency that her team showed against UCLA when Notre Dame takes the court tonight. After seeing how close the Wildcats came to pulling a major upset against USC, she knows that Anette Lynch’s team will be looking to bring the Irish back to earth.

“The Wildcats impressive showing this far has been somewhat of a surprise,” Lynch lost five letterwinners from last year’s 17-10 team. However, forward Anucha Browne and guards Laura Wiesen and Carrie Erickson return from last year’s squad to lead the team this year.

“Anucha Browne is a fine all-around player, but Northwestern plays to its strength, which is the guards,” explains Del Stanislao.

“They’ll probably be trapping and pressing a lot. They look to Erickson to score, but it’s Wiesen that controls the tempo and she can score as well.

They’ll probably use a 1-3-1 half-court trap. If we don’t turn the ball over, we should be able to punch it inside.”

Those people who Notre Dame must stop tonight as they travel to Evanston, Ill., to take on the Wildcats. For more on tonight’s game, see Jeff Blumberg’s story below.

Irish to face Wildcats, start ‘Big Three’ week

Irish Items

Hello again, everybody!

Seeking revenge for last year’s NIT loss, Digger Phelps and the Fighting Irish take to the road tonight to dedicate the newly refurbished McGaw Hall and hall of fame. The Irish are coming off a 73-68 loss to USC, following tonight’s game, the Irish return home to start the 1983-84 version of “Big Three” week, playing host to St. John’s Saturday afternoon before closing out the weekend by traveling to Connecticut Saturday evening.

However, the way things have been going for the Irish last year, maybe we shouldn’t brush off any team. Phelps entered this season worried about outside shooting and rebounding, and he hasn’t seen anything lately to calm his fears. Hopefully, the Irish can get their act together in Evanston tonight and come away from that snail pit known as McGaw Hall with a victory.

The St. Patrick’s Day Massacre . . . After failing to get an NCAA tournament berth, the Irish entered the NIT tournament last year with an 18-7 record and defeated No. 16 Notre Dame in the second half. Northwestern outrebounded the taller Irish, 43-25, helping them coast to a 79-51 win behind Art Aaron’s 17 point game. It was Northwestern’s brightest basketball moment in quite some time, but it also was a painful memory that the Irish would like to erase tonight.

A Word on the Wildcats . . . Northwestern has lost three starters from last year’s team, but Coach Rich Falk has a pair of good players back in Aaron and Andre Goode. Aaron is a 6-8 guard (that’s right – guard) who loves to drive to the bucket, as he showed in the Notre Dame game last year when he collected 17 points and nine rebounds in a forward role. Phelps compares Aaron with Magic Johnson because of his size and ball handling ability, but do not expect to see Aaron in front of a seven-figure contract or making commercials with Willis Shoemaker after the season’s over.

The 6-10 Goode spearheads a tall Northwestern front line, which includes forward Rich Polaha, who is 6-9 and 270 center Colin Ogren. This trio will provide another big test for the Irish big men, who have had their hands full all afternoon on Saturday against the front court players from UCLA. Northwestern, on the other hand, cannot afford to be slow on the boards as they were when these two teams met last March.

Engineer’s Notes . . . Since Lehigh’s nickname is the “Engineers,” I turned to my roommates, Tom and Jim (a pair of fine engineers themselves) for a scouting report on Lehigh. Here’s what they had to say:

Believe us, this game won’t be on any of the major networks. Our sources tell us that the Engineers have been losing with alarming frequency starting their season with a 0-3 record. They are making their East Coast Conference play. First-year coach Tom Schneider has been forced to integrate several young players into the lineup and taking six players with him on tour.

Lehigh will try to maximize the offensive potential shown by sixth-man Mike Andreolici, who has been averaging 8.6 points a game to lead the offense. He will receive some support from fresh- man Mike Polaha, whose current average is eight points a game from his guard position. Overall, we have calculated that if the Irish play with any kind of intensity at all, the Engineers should provide little resistance to a huge scoring differential.

Irish Target Practice . . . As mentioned earlier, the Irish have had their problems finding the mark on their shots. Against UCLA, Notre Dame posted a dismal 34 percent mark from the floor, and only managed to improve that number to 40 percent against St. Francis of Potsdam Sunday night.

Two bright spots for the Irish have been the steady play of forwards Tom Slaby and Jim Dolan. Slaby has led the team in scoring in three of the first five contests, while Dolan has been consistently good in the early going, usually finding his name listed among the rebounding leaders. If the rest of the team can become as consistent as these two, Digger Phelps’ job will be a lot easier by mid-season.

Pick of the Week . . . Since we picked the women’s swimming team last Wednesday, it seems only fair to give the nod to the male swimmers this week. Coach Dennis Stark’s team will be in action Saturday morning at 11 a.m. on Cleveland State in the Rocker Memorial Pool.

The veteran Irish mentor lost quite a few fine swimmers from last year’s squad, but he has a wealth of talent returning. Cleveland State is always a tough meet for the Irish, and the guys would appreciate your support Saturday morning.

Northwestern’s Art Aaron, shown here being guarded by Indiana’s Bob Hansen and Steve Carfino in Big Ten action last year, is the key man that the Irish must stop tonight as they travel to Evanston, Ill., to take on the Wildcats. For more on tonight’s game, see Jeff Blumberg’s story below.
