College reveals science hall plans

By JOANIE GIBLIN  
Staff Reporter

The $5 million Saint Mary's Science Hall renovation is slated to be "essentially done" in time for Spring 1985, according to Vice President and Dean of Faculty James Hickey.

"We hope to go to our board of Regents in October with the final plans that will be all of the final details, for approval," said Hickey. "I hope to start accepting bids for a contractor in January, begin construction as soon as possible and see the project completed in the fall of 1985."

Plans for the renovation and addition have been in the works since 1979. The College hired a consultant in 1981, and selected the Minnesota Architectural firm of Sork Mather, Sutham and Quackenbush in 1982 from a large group of interviewees.

Clinton Sutham, a senior member of the firm, is the building consultant, due to his work on science buildings at other schools.

"It goes without saying that the case for a science facility was made exceedingly long before the formal planning began," said Hickey. "The present science facility was built in 1955 for an institution with an enrollment of 700 students. At that time, there were five full time members of the science faculty, and the only requirement in this area for the non-science major was a year of science and mathematics. Presently, all students must take a year of laboratory science and the introductory physics and biology courses.

The increased number of science majors during the past 28 years, the reorganization of the science curriculum, and the growth of full-time science faculty are other reasons for the renovation.

"In the four-year period following the opening of the present science facility, there were 100 science majors. During the period from 1980 to 1983 we expect to see approximately 445 science majors in our science program. This project will provide our 75 laboratory technology programs," noted Hickey. "These students are now bought by a staff of 16 full-time, 2 part-time faculty, and 5 full-time lab and assistant assistants. The need for research space and equipment is great, especially for the senior science majors. Hickey commented, "Science has to be done, not just studied."

The new facility will include: controlled environmental spaces, instrumentation rooms, computer facilities, as well as highly sophisticated pieces of equipment essential for a variety of scientific experiments.

This expenditure will be offset by the savings of 1,500 square feet (32,000 existing and 45,000 new) at a proposed total cost of $6,000,000, plus the capital outlay for a new building, which includes not only new construction but also numerous furnishings and pieces of equipment. There will be additions in the area of electronic research as well as ... see SCIENCE, page 3

Mondale blasts Reagan policies

Associated Press

WASHINGTON - Walter Mondale said Sunday that President Reagan has said "no" to the search for peace in the Middle East and that four more years under the president's leadership "will take us closer to the brink of war.

"No wonder the world has the jitters," the Democratic presidential candidate said Sunday as he accused Reagan's record in U.S.-Soviet relations, Central America, human rights and Mideast policy of being "inadequate." In an address to a group of Jewish supporters, Mondale said Reagan has been "essentially absent" from the search for peace in the Middle East and that Reagan "has squandered the promise of the Camp David accords between Israel and Egypt.

Mondale said he would "scrap the failed Reagan plan" for peace in the region and propose the new Israeli government time to develop its own policies toward the Arabs. He also said he would move the U.S. embassy to Jerusalem.

"The president's candidate," Mondale charged that Reagan has pursued a policy of "illusion" that has included dealing with Israel at times as though it were an adversary. Late yesterday at a UTV steel plant in Cleveland, Mondale proposed cutting in half the current level of steel imports for five years to give industry a chance to raise capital.

Mondale recalled that four years ago when Reagan was running for president "he said he would sell a steel mill in Youngstown, Ohio, and told workers, 'I won't forget you.' Mondale said, 'He forgot you and it's now your turn to forget him.' In his foreign policy speech, Mondale displayed the newly aggressive style he first unveiled late last week.

"We want jobs, we don't want wars. We do not want policy by evasions, economics by racket foot, government by a single hand, and leadership by notations," he said.

Mondale made his remarks as he set out on a cross-country campaign today, the first leg of a long week of campaigning in which he is working with an "inexperienced and ill-equipped" Congress "to remove the American who had taken the citizenship of citizens at the Orange Bowl in Miami.

"Welcome to your country," Bush said the packed stadium. "This land is your land. But America is more than a land. It is an idea."

Bush's opponent, Democratic vice presidential candidate Geraldine Ferraro, took the day off from campaigning yesterday before heading to the Midwest and South-

Senate debates election procedures

By MIKE MILLEN  
Staff Reporter

An animated discussion regarding the merits of election endorsements by The Observer took place last night. President Cathy Vlack addressed the Senate for the first time as a member of the Senate, and the body passed a resolution in support of the Senate's election procedures.

The discussion centered around the Omnibus election rules and a proposal to add them to the Student Senate meeting. The amendment, which failed 10-3, would have penalized candidates for Ober user endorsements. Henry Sterkman, Omnibus director, pointed out the inconsistent relationship between election victories and Ober user endorsements.

Alison Yurko, executive coordinator, agreed, adding "If this rule affects a student's little more credit (than simply following The Observer's opinions)" Supervisor Class President Jim Domagowski was completely against the amendment, noting the importance of communication between politicians and media. "Don't let personal experience with The Observer stult your view," he said.

Some senate members were concerned with the ambiguity of the proposed rules. Section Four of the student amendments states campaigning in The Observer office is forbidden. With the exception being the interviews for Observer endorsement, these meetings will be held within the time allowed for campaigning.

Rule 11, however, states "no one may receive or solicit public endorsements from any organization with normal working hours." Note 1 says "no one may receive or solicit public endorsements from any organization with normal working hours.

Students who have been involved in the student Senate for some time were concerned that the rules would be put into place immediately.
Mr. Hickey, let me talk

Dear Mr. Hickey,

I have heard that you are a very understanding man, the only member of the administration who listens to what students say. So, I would like to comment on some of the things which have happened in the dining halls of late.

The walls in the North Dining Hall have disappeared, to the great joy of nearly everyone who are there. This is one bit of evidence which supports your reputation as a liberal. Yet, happy though I am with this change, I might even be willing to have them back if only I could have the rest of the dining experience upgraded.

Last year may have been the pinnacle of culinary pleasures here, I fear. Dinners were passable, and lunches actually good. I looked forward to lunch then. No more deli line, like freshman year. No, I could confidently go to North Dining Hall and commit myself to regular food line without even knowing what would be served. This was a pleasant contrast to the year before when I made the long trek to the South, where it was easier to move to the deli upon seeing what was being served.

But what has happened, Bill? This year I have yet to eat a meal I was really pleased with. The dinners have not really declined that much, I was very pleased with my meatless chicken last night. It was and innovation worthy of Yale. But the lunches... It is sad to once again dread the unknown.

I would not be so upset with the poor quality of the dinners except that these comments must be limited to the food. In earlier times, if I found a dinner unpalatable, I could always get a nutritional salad. But alas, it seems there has been an embargo on such things at the South Dining Hall. There have been no bowls for salads or desserts or anything else the last several times I have eaten there.

Even if there were bowls, I admit I still would not be completely pleased. I, like many college students, do not put peanut butter or ketchup on my salad. Yet this is what has been in the salad dressing bins. This is by no means a new occurrence; I have always felt an advantage of the North over the South was that the North had better salad bars. They still do, but the disparity between the two is becoming gross.

One thought I was forced to during my under grad years has been Sunday Night on Sunday nights. But this has also been taken from me, at least at the South Dining Hall. There is almost no ice cream there; what there was had the consistency of warm milk. I could have had all the toppings I wanted; strangely, no one had been eating them.

I myself see advantages to each dining hall. But it seems someone is going to lose the first place in favor of the North. Please stop them. My International Relations professor has told me of the unfairness of the North-South economic disparity, and of its potential consequences. The North cannot handle the refugees. Indeed, neither seems to have the resources to handle the current population. If it is between 12.15 and 11.15, go out your window at the treating masses waiting for them not what. You are not a cruel man, Mr. Hickey. I beg you, take pity on them, and on those who do not have the time to eat at all because of the lines.

Perhaps you feel my basis for judgment of the dining halls is too limited to be fair. Over the summer I attended Air Force Field Training along with a variety of college students from all over the northeastern quarter of the U.S. To a man, they complained about the quality of the food. I thought it was rather good, but then what experience do I have in such matters?

Realize you try very hard to please the students, and I appreciate it. I am only raising these issues because I know you will listen. I am very confident that, now aware of these issues, you will act swiftly to rectify matters. Thank you.

Sincerely,

Thomas S. Mowle

**SMC judicial process offers options**

By MARY LOUISE PADDEN

The arrest of a Saint Mary's junior in Indianapolis during the Notre Dame-Purdue weekend drew attention, yet little has been said of College policy concerning such situations.

According to St. Karel Jackowski, dean of student affairs, the College does not have to take any action in regards to the arrest. "In cases involving off-campus violations which are handled through civil proceedings outside the College, there is no reason to bring the incident to the attention of a Judicial Board as the student has already been sanctioned for the offense." The College be notified of that violation, the student in question would receive a letter acknowledging the arrest and offering help in the form of legal assistance.

According to the Student Affairs Office, no other arrests on charges of underage drinking have been brought to their attention so far this year. However, due to the apparent growing popularity of off-campus socializing, more violations are expected.

In the past, several hall directors have helped to deal out students held on charges of underage drinking. For the most part the hall director has little if any disciplinary power concerning off-campus violations, unless the case is referred back to the school for judicial proceedings.

Should this be necessary, the student in question is notified and required to meet with the director within 48 hours, the beginning of all judicial proceedings. From this point four options are available.

- **An agreement between the student and the hall director is the basis for deciding upon the best course of action.** The severity of the violation most often provides the basis for this decision. In cases when the violation is relatively minor, the initial meeting between the student and the hall director serves as a hearing providing the individual that filed the report is present.
- A hearing by the Student Relations Board is the next option. This board is designed to encourage self-discipline. Peer influence is utilized to enforce regulations and assure student rights and responsibilities. The Board is chaired by the Student Judicial Commissioner and includes a total of eight members. The Dean's board is the next option followed by the Administrative Board which is the highest ranking Board in the Saint Mary's College judicial system.

"Ibc said, "We are presently thinking of ways to reschedule classes to reduce the level of noise for students and teachers. It will be difficult, but luckily most of the heavier work will take place in the summer." Dr. Richard Pilger, professor of Chemistry and Physics, is also looking forward to the new facility. "We'll put up with all of the troubles during construction, and we're sure the space will be a huge benefit. The problems will be, but boy, we need it."

Pilger echoed Hugr's thoughts on the need for more space. "Many of the present faculty offices were originally built to be janitor's closets or cloak rooms. Our coffee room and computer room are now located in what was once a simple closet." Pilger noted that many faculty members, himself included, have done most of the designs on the labs and offices themselves.

Although this project will take a great deal of time, efforts to make the most of this renovation will be well worth any inconvenience.

SMC abroad programs offer travel and credits

By SHEILA KANEHANN
News Staff

Saint Mary's Summer Programs in Rome and London are ideal for interested Saint Mary's and Notre Dame students who want the experience of travelling in Europe as well as gaining an appreciation of other cultures, according to the program's originator, Dr. A.R. Black.

Black, an associate professor of History at Saint Mary's, said the program was originally conducted during the winter break between semesters. It has since grown, and now takes place during the summer months.

Combining travel and course work for college credit, the program is an excellent opportunity for students to live in Europe and hear tours and lectures first hand, Black said.

The Rome Program includes travel through France, Germany and Switzerland. Dr. Portia Spano, director of the Saint Mary's College Rome Program, organizes tours for students studying in Rome for the summer. A two-week stay there includes all major places of interest.

Classes in Rome are held on the SMC Rome Campus.

Students enrolled in the summer programs in London may take a maximum of six credits, and travel includes sites in Ireland, Scotland, England and France.

The program runs from May 21-June 22, and extra travel time can be arranged without any increase in air travel costs.

Professors for both programs include Saint Mary's and Notre Dame faculty.

Beth Seiber, a junior, was enrolled in the London Program this summer.

"I think travel and course work are very important, and I take travel courses fairly regularly," Seiber said.

"I learned that there are many different aspects of British culture. Each region has its own manner of doing things," Seiber said.

Registration drive starts tomorrow

By BUD LUEPKE
Staff Reporter

If you haven't registered and plan to vote in the Nov. 6 election, you will have the opportunity tomorrow and Thursday of this week.

The Student Lobby, a branch of Student Government, is planning a voter registration blitz on campus. The group is conducting the drive in cooperation with College Republicans and the Young Democrats, who will provide the volunteers necessary for the drive. Bill Krat, head of the Student Lobby, said, "We will offer students the opportunity to register regardless of their political affiliation."

The goal of the drive is to register as many students as possible. A College Republican student said, "We would like to have everyone register, but realistically we're shooting for about 200 people." He added that many students don't register by the deadline and render themselves ineligible. The registration deadline for the Nov. 6 election is Wednesday, Sept. 26.

The Student Lobby reminds students who are non-Indiana residents to not hesitate registering in Indiana. As four-year residents of Notre Dame, students may register as residents and participate in local elections.

Those students who have registered in their home state, the Student Lobby will offer absentee ballot information at registration booths located in the dining halls on Tuesday and Thursday of this week.

Available September 18-21st in the Student Activities Office. Applications due Friday, September 21.

Interviews will be held on Tuesday, September 25th.

The ‘New Nationalism’ that’s blinding America

Reaganites around the country have become fond of telling us that Americans once again rose to their country. The implication, of course, is that President Reagan is responsible for the restoration of American pride presumably lost during the Carter-Mondale Administration. Allusions to the brainwashing inherent to a democratic society and the suggestions of Soviet dominance are contrasted with the victory in Grenada and aggressive anti-communism in Central America; the shame of international impotence contrasted with the pride of militaristic virility.

This new-found pride in America, however, translates into every rhetoric. One need only to watch the two week orgy of flag waving that masqueraded as the Olympic Games to see that a nationalistic fervor has indeed swept this country. Perhaps even more disturbing are the movies coming out of Hollywood in recent months. The industry that makes its millions by knowing what American audience wants has suddenly given rise to a large doses of sordid nationalism in the form of Washington Uncommon Valour, Red Dawn, and Call to Glory. Americans are enthusiastic-ly responding to the feeling that America is winning the war between international politics; that we are once again the greatest nation since then.

But before we pop the champagne corks in celebration and sweep Reagan into another four years term, some consideration should be given to the nature of this neo-conservatism phenomenon. Just what are we Americans so proud of?

Have we cured our social, moral, or economic ills? Not by a long shot. Incompleteness remains unacceptably high, race and sex discrimination continue, and virtually every major disease rates have never been worse, and our cities are in decay. Yet despite these problems, or, more accurately, because of them, Americans have found something to celebrate: the joy of displaced aggression. It is as if a frustrated assault on the enemy is unable to express itself and suddenly seized upon the reality that it could indeed sweep the hell out of everyone else and take pride.

As China and Japan, the men’s gymnastics team not only won a gold medal, they vindicated an America humiliated by banan, Toyota, and Honda. The team served the pride wounded by West German steel and Saudi Arabian oil. The gold medal in track and field and the three gold medals in basketball washed away atonement from the humiliation.

The pride we see sweeping this country is not the pride of baseball hot dogs, and apple pie, but rather a combination of international and, perhaps even more disturbing is the irritable nationalistic pride that we are once again the greatest nation since then.

Almost 20 years ago, Senator Robert Ken- nedy addressed Congress on the topic of foreign aid: “I believe, that foreign aid is not a giveaway; we must be both moral obliga­tion to fellow human beings and a sound and necessary investment in the future. Unfor­tunately, the rich nations of the world have not taken this obligation to the world’s poor discriminate nations seriously. The World Bank estimates that 30 children die each min­ute from starvation. This means that 9000 children will die quite painfully during our typical half-hour lunch break today. Indeed, the world in which we live is one of glaring inequality and unfairness. While we in the rich world pursue our material desires, the people of the poor world pass each day in miserable life of starvation simply because they were born into a distinc view of it out of limitation of their own.

Our moral obligation to feed the hungry

Social life at Notre Dame. A contradiction in terms? I don't think so. Everyone agrees this university needs to do something to improve social life. For one thing, it needs to include the off-campus students directly, others in a more meaningful way. There are just plain social inequities in this community, and the free expression of varying opinions on campus through letters, Editorials and columns is encouraged.

Dear Editor:

I found Bill Healy's column in defense of HPC funds benefitting the resident halls quite enlightening. It seems to me that both Quinlan and Julka have failed to understand the policies, actions, and yes, votes affect the whole student body.

Michael P. Slott
Former HPC President

Clearing the air of Varga's decadent view

Dear Editor:

In response to Michael Varga's Tuesday inaccessibility of the education system, I would like to point out the following:

- There is a big difference between the public school system and the Catholic university system.
- In public schools, the goal is to teach all students, regardless of their background. In Catholic universities, the goal is to provide a higher education to those who choose to attend.
- Public schools are funded by the government, while Catholic universities rely on tuition fees, donations, and endowments.

I hope this helps to clear up any misconceptions.

Sincerely,

Evan Farley
President of the Notre Dame Student Government
Sports Briefs

Observer Sports Briefs are accepted Monday through Friday at 4 p.m. as the Observer office on the third floor of Latrobe. Briefs must be written clearly.

An ultimate frisbee club is now forming. The schedule will include weekend full practices and spring games against Purdue, Ohio State, Michigan, and others. If interested, call Lance or Gerry at 588. - The Observer

Colorado football tickets are still available at gate 10 of the ACC. The tickets are $16 each. - The Observer

Dilibernaro will see a great deal of playing time the remainder of the season.

Watching Notre Dame play in the second half of the Miami State game, it appears that the defense has found its legs. Both the defense and offense played an emotional brand of football that Irish fans have not seen in a long time.

"We believe in ourselves," says Dilibernaro.

Happily the last thirty minutes of last week's game is all the Irish needed to get back on top.
The Nebraska Cornhuskers, 58-7 winners over Minnesota, made it two weeks in a row at the top of the Associated Press poll yesterday. They received 35 of 59 first-place votes and 1,151 of a possible 1,800 points from a nationwide panel of sportswriters and sports editors.

Auburn, the preseason No. 1 team, dropped its opener to Miami and promptly lost to Michigan after attaining the No. 1 ranking.

Clemson, idle last weekend, remained in second place with 15 first-place ballots and 1,085 points, while Texas defeated Auburn 55-27 and climbed from fourth to third with four first-place votes and 1,046 points. Michigan, which had been third, lost to Washington 20-11 and slipped to 16th.

Miami, which tied with Iowa for fifth place last week, defeated Purdue 24-17 and moved into fourth place with one first-place vote and 897 points. Ohio State, crushed Washington State 44-0 and vaulted from ninth to fifth with 806 points while Brigham Young rose from eighth to sixth with 817 points following a 58-13 victory over Tulsa. Penn State, a 20-13 winner over Iowa, jumped from 12th to seventh with 745 points; Iowa fell to 14th and UCLA slipped from seventh to eighth with 726 points after struggling past Long Beach State 23-17. The Bruins also received the other two first-place votes.

Rounding out the Top Ten are Washington, with 718 points, and Boston College, which also was 10th a week ago. The Eagles, who were idle over the weekend, received 698 points.

The second ten consists of Oklahoma, Oklahoma State, Southern Methodist, Iowa, State, Michigan, Southern Cal, West Virginia, Auburn and Georgia.

Last week, it was Auburn, Penn State, Oklahoma State, SMU, Oklahoma, Washington State, Alabama and Southern Cal. Pitt dropped out following a 42-1-1 trouncing of Tulsa.

It was a shaky third-straight victory for the unbeaten Dolphins, who seemed on their way to a rout when Marino hit his third touchdown pass, a one-yarder to Nat Moore, with 10:27 gone in the third period. But it was all Buffalo from then on.

The Bills followed that touchdown with a 1-yard plunge by Speedy Neal that made it 21-7, then closed to 21-17 on a 37-yard scoring pass on a fourth down and three situation from Joe Ferguson to Julius Dockett with 2:02 left in the game. In addition to his gold-metal performance, Marino earned two silver and two bronze medals in team and individual events.

Tiger victory clinches tie for top spot in AL East race

Associated Press

DETROIT - A solo homer by Lance Parrish in the 11th inning was the difference as the Detroit Tigers won their third straight game in the American League East with a 7-3 victory over the Minnesota Twins last night. The Tigers improved their record to 22-11 and pulled within a half-game of the White Sox for first place in the AL East.

Irish women’s tennis team in action

The Notre Dame women’s tennis team is in action against North Star Conference foe DePaul today at 3:30 p.m. at the Courtney Tennis Center.

Sharon Perez’s squad is coming off a close victory over Illinois State. The match was held on Saturday in Champaign.

The Irish won the match 5-4, taking four of the singles matches and one of the three doubles matches. The Fighting Illini kept each of the individual sets close, but Notre Dame edged them out for the victory.

Sue Panter also returned to the team, after being out with an injury.

Further details on the match with Illinois and results from the DePaul contest will be in tomorrow’s paper.

Irish volleyball team drops match to Redbirds in three straight games

By CHUCK EHRMAN
Sports Writer

The Notre Dame volleyball team won another game to start the fall season of the Lambert Era on Saturday at Illinois State.

The match was the team’s second win of the year, but the second consecutive loss for Illinois State.

The Irish dropped the first two games, but fought back for the win in the third. The final score was 15-11, 15-13, 15-12 in the third game.

The Irish improved to 5-1 in Lambert’s first season as head coach.

The match was held on Saturday in Champaign.

The Notre Dame women’s tennis team is in action against North Star Conference foe DePaul today at 3:30 p.m. at the Courtney Tennis Center.

Sharon Perez’s squad is coming off a close victory over Illinois State. The match was held on Saturday in Champaign.

Sue Panter also returned to the team, after being out with an injury.

Further details on the match with Illinois and results from the DePaul contest will be in tomorrow’s paper.

Lindenfield knew that the match would be important to his team’s progress.

"We have to learn how to put teams away," said Lambert of his team’s performance. "Until we do, we’re in for a long season."

So the volleyball team must now regroup and ready itself to play DePaul, a North Star Conference opponent. The contest will give Notre Dame a chance to even its record, which dropped to 3-4, and gain its second victory without a loss in conference play.

The match is set for Friday at 8 p.m. in the main arena of the ACC.

DiBernardo’s return helps Irish on defense

By JERRY MELIA
Sports Writer

The 1984 Irish defense has been a topic of much criticism. In watching the lackluster and unimpressed performances against Purdue and the first half against Michigan State, this criticism has a firm basis.

In fairness to the defensive unit, injuries in key positions and inexperienced players seeing a lot of action has, at times, hurt the overall defensive performance.

However, after watching the efforts of the Irish in the second half at Michigan State on Saturday, the repeated errors committed by the defense seem to be a thing of the past.

In the first two quarters, the Irish allowed only a little over one hundred yards, but more importantly, yielded only three points.

A strong performance by Rick DiBernardo and others, enabled the Irish to come back and win the match which was on an out of the second half appeared out of reach.

"I think we showed a lot of character last week," said DiBernardo. "The results prove that there are four quarters to a football game."

DiBernardo’s return is a major factor in the reason Carl Butler was stopped in the second half after gaining 90 yards on the ground in the first half.

"We really benefited from DiBo’s presence out there," Head Coach Jerry Faust said after Saturday’s performance. "The lack of experience at that position was evident in the Purdue game."

In 1983, DiBernardo earned his letter for his fine job in backing up Rick Naylor at his current position, outside linebacker. He spent most of his freshman season playing on special teams.

Last week is any indication of his capabilities, then it is sure that DiBo’s return will help the team.

The team’s first game of the season was against Illinois State on Saturday afternoon.

The Irish emerged from the weekend of tough competition with a record of 2-0. Notre Dame lost to York of Ontario, 3-1, Ohio University, 1-0, and Central Michigan, 2-0, while beating the University of Waterloo, 3-2.

Coach Jill Lindenfield approached the Sauk Valley Weekend Games as a chance for the Notre Dame team to gain valuable experience.

"I looked at this as an experimental tournament," said the Irish coach. Lindenfield knew that the tournament games would not count toward the Notre Dame season record, so the substitute freely during each contest, trying to find the most successful combination.

"I tried lots of different combinations to come up with the best team," she said. The Notre Dame coach played as many players at as many different positions as possible for good reason. Lindenfield hoped to find replacements for the Irish’s three injured starters and a second team.

Defensively for the Irish, Molly McCabe had a total of 2 goals and 2 assists, Melissa Sommert had 1 goal and 1 assist. Corinne DiGiacomo also had 1 goal and 1 assist.

Lindenfield cited Regina Degnan and Mary Rose Rodgers as standouts defensively, and also mentioned the fine versatile play of Nancy Camarote.

Even if the victory over the University of Waterloo did not count on the team’s record season, Lindenfield felt good about the game. She thought it was important for the Irish to get their first win under their belts.

The Notre Dame field hockey team will be in action this Friday at Valparaiso College at 4:30 on Alumni Field.
