ND parent calls Mexico coverage 'irresponsible'

By MARY HEILMANN
Assistant News Editor

All 10 Notre Dame students in Mexico City last Thursday, within hours after reading an account of the earthquake damage printed in The Miami Herald under the banner headline "Mexico City in ruins," the university is keeping things intact, and no real apparent or severe damage.

While it is true that the center of the city did in fact sustain severe damage, Conroy noted that this heavy damage has been, in his estimation, about two square miles or approximately one percent of the city.

"The situation there is a classic case of international journalism," Conroy noted. "The press has taken an angle that really exaggerated the damage in one very small part of the city and projected it over the entire area, when in fact it isn't the case."

According to Conroy, the students at the Universidad Iberoamericana, through which Notre Dame operates in Mexico City foreign exchange program, experienced the earthquake primarily in their classrooms and residential halls. He added that most of the Notre Dame students are now participating in the rescue and salvage operations.

"I would say that the students simply reacted like every other responsible citizen. It didn't matter that they weren't Mexican citizens by birth. They were just lending a hand where they saw it needed."

The university is being utilized as a shelter for the homeless, Conroy noted, so classes are presently suspended.

"Classes are about the farthest thing from anyone's mind. I know that the university is keeping things in perspective and addressing the emergency in the best possible way. Right now, providing shelter for those whose homes were destroyed is more important than conducting classes."

It is true that some of the students have expressed plans to go home.

SMC forced to deny food jobs to students after federal audit

By MARY FRAN GISCHE
Staff Reporter

Saint Mary's Financial Aid Office determined that 20 to 25 dining hall workers were ineligible for work earlier this semester following an audit by the federal government.

"There was a lot of confusion and misunderstanding," said Katte Orie, SAGA head student manager. "Those couple of weeks were really frustrating because we didn't know what was going to happen."

Judith Casey, director of financial aid, said, "The rules haven't changed. These are the same rules that held in 1972. We have to make sure that as many students as possible get the chance for campus employment."

"We also have to make sure that other students don't make more than they are allotted in their financial aid."

Robert Feldes, director of administrative services and liaison to SAGA food services said, "We have to make sure that the student body is not overpaying for their food."

By FRANK J. MASTRO
Staff Reporter

Father William Beauchamp, executive assistant to the president, and The Observer's liaison with the University administration, said it would be in the best interests of The Observer to be as open as they can be with their financial information.

"If they're going to put out a quality paper, it's going to cost a considerable amount of money," said Beauchamp. "It's in their best interest to give an idea where the money comes from. They could explain how the advertising figures are arrived at."

Student Activities Director Joni Neal said she has a similar view.

"I agree with the student organization. We spend a large percentage of student funds for advertising," said Neal.

"Are those rates accurate and can they be lowered for non-profit groups based on your cost and budget?" she asked.

A request to make The Observer's financial books public was issued in a letter last week from Student Body President Bill Healy and 11 other student leaders. Observer Editor-in-Chief Sarah Hamilton denied the request.

"We are accountable to the students in the same way SAB is accountable to the students, through the Budget Unit Control system," Hamilton said.

But Student Activities Board Manager Lee Brossard said he disagrees.

"We were trying to justify the rates. We're trying to find out the budget forecast to see if they need that money," said Brossard.

Neal said she would like to see the advertising rate increase clarified.

"We are advertising advertising rates. I would like to see what their costs are like," she said.

Beauchamp said the ball is now in The Observer's court.

"My reaction is that it is clear that it is a decision to be made by The Observer. We have made it clear that The Observer is an independent organization," said Beauchamp.

Deb said The Observer's financial record should be as available as student government's.

"Any student on campus has access to our audit report. It's a mandatory fee. It's not a loss of autonomy. It's public information," said Neal. "It's the student newspaper as any different from student government's."

"It's the student body newspaper."

Notre Dame's answer to frats: the residence hall system

This weekend, students who leave the friendly confines of the Notre Dame community to cheer on the football team will confront a different kind of social atmosphere.

Fraternities. And Sororities. Oh, boy.

For those not used to them, fraternities get a bad rap. They are accused of running television programs and in those insane, pseudo-collegiate rings like "Campus Voice," places where groups of modern-day gladiator-types spend their days chugging beer and chasing pretty co-eds who wear towels.

Sororities get even worse press, if that is possible. To the uninformed, the image of a "sorority girl" brings to mind a blonde, card-carrying type-two.

Obviously, reality bears little resemblance to the stereotypes presented in these media. The Greek system is actually very worthwhile to its members. Besides providing habitation, fraternities and sororities offer members a social identity. A person becomes known as a "Tri-Del," or an "Ome-Ga Man," and becomes identifiable with the type of person the characteristics of that house dictate.

The Greek system also allows members to make important contacts that can be worthwhile later in life. According to Dulac, the rulebook for the University, Notre Dame has no fraternities or sororities.

Or does it?

Not only are the advantages of living in a fraternity already present within the residence halls at Notre Dame.

Unlike Saint Mary's and many other schools, most men and women at Notre Dame live in the same dormitory for all four undergraduate years. They get to know the other residents of their halls, building friendships and acquaintances throughout their college career.

And each dorm at Notre Dame gives its residents a certain identity with which they can compare themselves to other students. 

For example, all of the characteristics and stereotypes are applicable to every person in the dorm, but each dorm has a spirit that is unique and identifiable and which is shared by every student in one way or another - whether it is a loud and obnoxious Dillon resident or a studious Cavanaugh man, to take two extremes.

Most incoming freshmen have some idea of what he or she is getting into. Whether it is the advice of an older sibling to stay away from a certain dorm or the promise of the Dillonaries and who have outstanding potential for leadership in any phase of government. - The Observer

for strong friendships and good times.

These descriptions emerge from the dorms, according to Evelyn Reinhold, director of student residences. From these they are approved by student affairs, printed by residence life, and distributed by administrators, she said.

Through tradition and the continual renewal of identification, each residence hall has, in effect, defined itself throughout the years. And the incoming freshman is able to choose which type of people he or she wants to spend undergraduate years with - in much the same way that students at other schools can choose a fraternity or sorority during rush week.

So students who visit Purdue this weekend are impressed with the virtues of the Greek system, don't feel too bad to leave. Notre Dame has fraternities. They're just closer to campus. And the names are easier to remember.

Grotto repairs to cost $25,000

By DAN McCULLOOGH
News Editor

Repair began almost immediately after a fire swept through the Our Lady of Lourdes Grotto at Notre Dame early morning Monday. "It is hoped that most of the repair will be completed by this weekend," said Father Daniel Jenky, rector of Sacred Heart Church. Repair began Monday afternoon.

"We're just chipping off the old brick that was burnt and chipped by the fire," said Jenky. "I don't even think there are any plans for sandblasting."

"Mostly, we're just using water and chemicals to clean the rocks," he said.

Jenky said plans are being made to redesign the candle holders. Fire officials said Monday the fire began when the great heat caused by the many candles lit by visitors of the weekend fused many of the candle holders together and erupted into flame.

While a specific cost for the repairs has not yet been determined, it is expected to cost less than $25,000, said Ronald Ertschen, assistant director of maintenance for the University.

"We can't make a true estimate until the cleaning is done so we can see the extent of the topknotting required," Ertschen said.

While Jenky said he does not yet know what repairs would cost, he said he doubted they would cost anything near that amount.

Several companies were on the scene yesterday to begin the cleaning and repair process.

"We have a stone and marble company removing the stones that were heated and cracked," Ertschen said. "A cleaning company is removing the smoke stains and burnt wax. We have removed all the wrought iron and debris this morning for cleaning."

"It looks like the northeast corner where the fire began, is beyond repair," he said.

Jenky said he was optimistic about getting the Grotto back to its original form soon. "We don't have to rebuild the Grotto," he said.

It looks like the Blessed Mother wasn't burned," Jenky said. "She was just covered with soot. Some of the sacrifices are just going to repair her."

Library automation coming in spring

By PATRICK CREADON
News Staff

The University Libraries are experimenting delays with a five-year program to computerize library systems.

On April 30, 1984, The Observer reported that the new library automation system could be used by January 25, 1985. Due to complications, said Robert Miller, director of automated systems and coordinator of technical services at the library, that date has been extended.

Miller said the delay is due mainly to the fact that the library has not decided which computer vendor will provide the equipment. He said a company was chosen, but because of problems within that company, the project committee has looked elsewhere for a contractor.

"We have laid down the groundwork for the system, and we have decided on exactly what we want. Basically," he said, "all we have to do now is find a company." Miller said that will probably be decided by December 1 what company will do the job.

Once a contractor is found, the project committee will be able to get approval from the University and begin installing the hardware. "I don't see any problems with the project approved once we decide on a contractor," Miller added.

Installation of the hardware is scheduled to begin in the spring of 1986. Over the summer, the data base will be loaded, and by January, the system should be in full working order, Miller said.

The goals of the Automated Plan are numerous, he said. The Plan was devised to integrate present systems, to improve accessibility in the library collections, to convert the card catalog system to computer-base form, to modernize the systems of book loans, and to manage the journal literature.

Although the switch to a computer-base system will save money since manual labor expenditure will be greatly reduced, Miller stressed that the saving of time as the major reason for the project. He noted that time will be saved not only by the library personnel, but also by the student using the library.

For instance, under the new system, a student in one of the five branches of the library located throughout the campus can look up a book without leaving the building he or she is in. Under the present system, the student would have to walk to the main library and look through the card catalog.

Also, students with their own personal computers will be able to tap into the library's data-base. Computer terminals will be installed on the main library to serve the same purpose.

Miller also stressed that although the new system relies heavily on the use of a computer by the individual, a student having no previous experience with computers should have "no problem" using the terminals.

The project was funded mainly by Mr. John T. Ryan of Pittsburgh. Ryan is a Notre Dame Trustee and President of Mine Safety Devices.

SBC hair salon planned

By CANDICE BECKER
News Staff

Need a haircut or some shampoo? Or maybe even a fast tan for that up coming prom? It's in luck. A professional hair salon is coming to Saint Mary's.

The salon will be located in LeMans Hall because it has the most available space for the store, said Jason Lindower, Controller and Business Manager at Saint Mary's.

"We would have liked to put the salon in Haggan College Center, but there just isn't room," he said.

The salon is a branch of Haircrafters, a South Bend stylist located on Lincolnway. There are other branches of the store for the salon on campus, but Haircrafters gave the best proposal, Lindower said, and there was a lot of campus support for this particular salon.

According to Frances Map, director of purchasing at Saint Mary's, it is only a matter of signing a contract before the salon can move in. Also, some minor renovations are being made in LeMans in order to accomodate the salon.

"You're not likely to get an exact date," he said, but the salon will definitely be open sometime after October 15.

"We will provide full hair styling services, manicures and tanning as well," he said.

Another Saint Mary's campus business, Plants and Flowers, has closed, perhaps only temporarily.

Lindower said the florist had an illness in the family and it really was not in the best interest of the florist or Saint Mary's to continue the business.

Mary Anne O'Donnell, Director of Student Activities, is working with one of the marketing classes, however, to determine the need for an on campus flowers. If the support for a florist on campus is substantial, another one will be brought in, she said.

Plane hits mountain in Virginia, kills 14

Associated Press

WEYERS CAVE, Va. - The bodies of 14 people killed when a commuter plane slammed into a mountain and burned were carried down rugged trails yesterday as investigators looked for clues to the cause of the crash.

"It's amazing how a plane that size can be reduced to nothing," said state police Sgt. R.L. Bass, one of about 30 officers assisting National Transportation Safety Board investigators gathering pieces of the shredded aircraft yesterday and at the site of the crash, which was spotted nearly nine hours later from a Marine helicopter.

The first ground team to reach the crash site on Trophy Mountain didn't arrive until after 2 a.m. yesterday.

The victims' bodies were placed in bags at the site yesterday and stretcher teams carried them to the nearest road, more than a mile away.

"It appeared the plane came in straight or slightly descending, but clipped the tops of trees," said Patricia Goldman said "Very little is intact." She said some of the bodies were burned.

At an afternoon news conference, Mr. Goldman said investigators had not been able to confirm reports that the pilot had trouble with navigation equipment before the crash.

The said investigators would listen to communications between traffic controllers at Leesburg and the pilot to determine if there was any such problem.

Col. David Carter, a spokesman for the Civil Air Patrol in northern Virginia, said Monday that one of the plane's radio messages reported a failure in a device called a locator, which tells the pilot where the plane is in relation to a runway. Carter said that should not have had a serious effect on an experienced pilot's ability to navigate.

State police Sgt. A.J. Anderson said the plane hit the brush-covered mountain from the northeast after clipping the tops of trees.

No luck

Virginia State Police and rescue personnel walked to the terminal at the Shenandoah Valley Airport after unsuccessfully searching for commuter plane that crashed near a town on approach to the airport Wednesday. The plane was later found with no survivors.

Chinese Politburo turns younger

Associated Press

PEKING - In a triumph for top leader Deng Xiaoping, the Communist Party promoted 38 young policymakers to the ruling Politburo on yesterday replacing old revolutionaries with a new generation to guide China's reform.

The changes were made during a full meeting of the party Central Committee in Peking. It capped a series of three meetings which Deng used to bring in newcomers to continue market-oriented reforms he launched seven years ago.

The Central Committee Secretariat, which runs day-to-day affairs, was altered from nine seats to 11 members, with three newcomers replacing retirees.

The newcomers were led by Hu Qili, 56, China's fastest-rising political star. A former Communist Youth League boss and mayor of Tianjin, he is expected to succeed his mentor, Hu Yaobang, 69, as party general secretary.

IMF decries protectionist tide

Washington, Oct. 7 - The International Monetary Fund warned yesterday that rising in protective measures by industrialized nations could discourage trade and hurt the world economy.

The warning came in the IMF's annual report, released as President Reagan was in Washington to head off increasing pressure in Congress to pass protectionist legislation for American industries.

The report was prepared in time for the annual meeting of the 149-member IMF and its sister organization, the World Bank, next month in Seoul, South Korea.

The IMF helps indebted countries finance austerity programs that encourage private banks to supply additional credit. The World Bank deals with loans to development projects in poor countries.

"The evolving campaign was the strongest in almost a decade, and inflation continued to recede," said the report, adding there were "encouraging signs" that the recovery is spreading to the developing world.

Many developing countries face better prospects because they have been able to earn more from increased exports and because they had used "incremental flexibilities" in economic austerity programs at the expense of domestic demand.

It did not single out any countries for criticism, but the United States, which has a trade deficit approximately $50 billion, has used quotas to restrict steel imports Japan's restrains on exports of cars to the United States have only recently been lifted.

Volunteer saves dogs but still gets charged

MOUNT VERNON, Ind. - A humane Society volunteer who tried to keep about 50 dogs that would have been killed otherwise was charged yesterday with animal cruelty.

Posey County Prosecutor Bill Gooden said Pat Ritz of Evansville apparently meant well, but the poor condition in which the dogs were kept justified the charge.

Miss Ritz, 60, would be served a summons to appear in court.

A volunteer for the Vanderburgh County Humane Society, Miss Ritz kept the dogs penned on a rural lot near the courthouse, where she said all of the dogs were unsanitary and showed signs of severe skin infections.

A county veterinarian, Dr. Carol Dudasak, said the dogs were neglected.

"This is probably the most miserable case of neglect I've ever run across," she said.

The dogs, strays collected from the humane Society pound in a new generation of shelter dogs, apparently seemed well, but the poor condition in which the dogs were kept justified the charge.

The charge was filed after Gooden reviewed a report on the animals' condition prepared by veterinarian Barbara Geistfeld, who said all of the dogs were malnourished and several had worms and severe skin infections.

Firm ships 'Hummer'

Associated Press

MISHAWAKA, Ind. - AM General began shipping the first of more than 50,000 of its "Hummer" all-purpose military trucks yesterday.

"This is the day we have been waiting for," said Eugene Zembruski, general manager of the company's program that produces the vehicle under a $1.2 billion contract with the Army.

The company shipped about 60 of the vehicles yesterday to Army field units at Fort Lewis, Wash., and Fort Ord, Calif.

About 1,200 people work at the plant on Mishawaka's east side, which is now in the second week of a three-week production shutdown. Zembruski said the shutdown was necessary to make changes in the plant to allow for mass production of weapons carrier vehicles, another one of 15 different versions of the Hummer.

Donald Gilliland, a company spokesman, said although the average price for all the models is about $45,000, the utility vehicle that was shipped yesterday costs only about $19,000. He said the basic Army jeep costs $17,000.

"The Army is getting a lot more vehicle for that $20,000," said GIliland. "This has five times the Jeep payload and can go places and do things a Jeep could never do."

AM General said Tuesday it had fully corrected a mechanical problem discovered in Army testing of the Hummer earlier this year. Front drive shafts snapped while Hummers were driven at high speed during the tests.

The psychological advantage in advance of the summit.

In his speech, Shevardnadze accused the United States of trying to achieve a first-strike attack capability through the development of a defensive shield against Soviet missiles. Washington has denied it, saying space-based defenses are necessary to offset a Soviet advantage in nuclear missiles.

Shevardnadze said the Soviet leadership would respond to the American space challenge, if the administration goes ahead with Star Wars, at whatever cost and that he had been directed to make this clear to the United Nations.

Adworks, the new student government advertising agency, is contracted to pay $3.75 per column inch for camera-ready ads since it saves The Observer supplies and labor. Camera-ready ads are ads that are ready for publication and need no further production work.

Adworks pays $3.65 for ads that are not camera-ready because they send a large volume of advertising, she said.

The SAB's contract with The Observer is $3.50 per column inch. If SAB purchases more advertising than contracted, The Observer offers a rate of $3.55 per column inch. SAB ads are not camera ready, according to Hamilton.

"It's $3.75 per column inch because it does not purchase a large volume, nor send camera-ready advertising," she said.

"From what I hear, the public is not concerned with our advertising rates. If anyone else is interested, I'll share the information with them," Hamilton said.

Rick Pinkowski, a University accountant in the controller's office who oversees The Observer's budget under the Budget Unit Control system, defended his decision not to release his copy of The Observer's budget to student government leaders.

"No accounting firm or auditing department would release a financial statement without that person's authorization," Pinkowski said.

The Observer's involvement in the Budget Unit Control System began when the University finished auditing The Observer in July of 1985.

"They found a lot of problems with our organization's financial responsibility and questionable business practices," said Hamilton.

The University saw the need for The Observer to be accountable, according to Hamilton. In February of 1984, The Observer joined the Budget Unit Control System.

The Observer must submit a budget to the University in the spring of each year and an updated version at the end of the first semester. Pinkowski is the final check, Hamilton said.

"It improved their record keeping and it helps The University keep track of what they're doing," said Pinkowski.

"The whole situation has forced The Observer to act as a business," Hamilton said.

Not messing around

A S.W.A.T. team steps up the United Nations Library watches for problems at the U.N.'s 46th anniversary meeting. They are part of extensive security at this week's U.N. meeting in New York.

Rates continued from page 1

They have a right to see its expenditures.

When asked how he would respond to a student request to see Student Government's books, Healy said, "it's the students' money and they damn well be open. Myself and the treasurer would even sit down and go over it with him."

"I'd have no problem with that," said Broussard.

"We are accountable to the students in the same way as SAB," said Hamilton. "They want to monitor our expenditures."

The one difference between The Observer and the Student Activities Board is that the students see what we do with their money. They get a newspaper," said Hamilton. "If I wanted to subscribe to the Chicago Tribune, that's my choice."

Beauchamp said. "Here, however, the students don't have that choice."

Hamilton sent letters to the dozen student leaders who signed the original petition explaining the increases in The Observer's advertising rates.

In the past year, photo and production supplies, phone line rental and printer's fees all increased, she said in the letter.

In addition, The Observer must repay over $100,000 in loans for their computer and typesetter, Hamilton wrote.

"I called seven daily college newspapers at random and our advertising rates are lower than all but two," she said. "We still have some problems." said Healy, "One of the statistics forah sent, she said that a school charged $4.70 per column inch and that school doesn't collect fees from students. It's incorporated and totally independent from the university."

"I don't know whether the schools charged student fees," said Hamilton. "I just asked them, 'What is your display ad rate for campus organizations?'"

But Broussard said the ad rate increase was still unclear.

"I see no problem paying that if its justified. I need to see some real figures," said Broussard.

The Observer charges a standard display advertising rate for campus organizations which is $3.75 per column inch, Hamilton said.
Dear Editor:

In Wednesday's ten-thirty Eucharist had been scheduled as the official opening mass of the Student Center's social event that Notre Dame/Saint Mary's has on the campus, in the Holy Cross Hall Grotto is the rock to which my life is anchored. Do the students ever appreciate what they have, while they have it. I know I never did."

Smith's argument still leaves questions

Dear Editor:

In the Viewpoint column of Sept. 17, Profes- sor Janet Smith took columnist Bill Kraw to task for arguing that Roman Catholic teachings on birth control and procedural contraception present some ambiguity and that the fact that contraception will not help the people about whom Krau had expressed concern. Smith goes on to detail various aspects of the Women's Care Center, obviously has had first-hand experience with some frightening questions about sexuality and contraception in a very immediate and personal way, and I would like to assure you she deserves not only our attention when she speaks on these issues, but our gratitude for taking on a difficult and demanding task that is morally incumbent upon a community like Notre Dame.

When I say Smith's experience in counseling people on these issues commands our respect, this does not contest us to agree with all of her judgments. Although her very powerful columns bring us a very important point about the nature of arguments often given in favor of various forms of birth control and mentions some eye-opening facts about the sexual awareness of a large group of women, this may not be a sufficient reason, nonetheless leave some very important questions unanswered.

Smith rightly points out that arguments in favor of birth control tend to be utilitarian or consequentialist, they argue from the actual or likely effects of a proposed action to a judgment about the morality of the action itself. This implicit point is that utilitarian arguments are only appropriate in the absence of ineludible obligations to act in a certain way. We also believe some forms of religious language are hurtful and lead to damnation, but we believe this language should be free to worship according to her own conscience. Of course, people who are convinced of the ineludible obligations to act in a certain way and are quite unsure.

I do not claim that this argument should persuade Smith on this issue, but only that there is a reasonable case for contraception.

But a more serious problem with Smith's columns is that it falls flat on its face. We also believe some forms of religious language are hurtful and lead to damnation, but we believe this language should be free to worship according to her own conscience. Of course, people who are convinced of the ineludible obligations to act in a certain way and are quite unsure.

Finally, I find it interesting that half of Smith's columns is devoted to utilitarian arguments to the effect that use of contraception is in fact to lead to abortions and unwanted children. While her brief arguments are not persuasive, I am a sobering the point is that people are not convinced of the ineludible obligations to act in a certain way and are quite unsure.

Steven Horst
Notre Dame graduate student

University cannot be senior's scapegoat

Dear Editor:

This is the first time to some comments made by Peter Horvath on Monday, Sept. 16. I will start by questioning, isn't it a tragedy this cynical mentality prevails among Notre Dame students, particularly seniors? The other side of the spectrum also must be considered.

In May 1984, I received a letter from the dean of the College of Arts and Letters stating I was not to return to Notre Dame. At first I was extremely angry. Unfortunately this anger was misdirected. Much like Horvath's, my anger should not have been directed towards the University and its hierarchy, but instead towards both the University and its hierarchy, and I have realized that if Notre Dame was not the place for him at this time, we both used the University for the same purpose, as a scapegoat for both of us being no red-headed married commitment to the reforms of birth control and still open to the possibility that God will bring it about that they conceive a child in spite of their use of birth control devices. It may be ineligible to decide what comes matters, but God is just as capable of producing a leaky condom as he is of causing a couple to misjudge when the woman will ovulate. Nothing we might do would prevent a conception upon which God would consider to be immoral, for the morality of an act and the right of an action are two different issues. We are convinced that God has a great interest in whether a person is sincere or is just trying to sidestep moral issues in many cases simply leaves this up to our own sense of responsibility and to the power of prayer. The last sentence seems clear that in so many cases we have an obligation to practice non-abortifactive forms of birth control if we live in an overpopulated area of the world or if we are unable to support a child.

I do not claim that this argument should persuade Smith on this issue, but only that there is a reasonable case for contraception.

But a more serious problem with Smith's columns is that it falls flat on its face. We also believe some forms of religious language are hurtful and lead to damnation, but we believe this language should be free to worship according to her own conscience. Of course, people who are convinced of the ineludible obligations to act in a certain way and are quite unsure.

Mets roll, 7-1

Reds 7, Braves 5

CINCINNATI - Eddie Milner's two-run homer helped rookie left-hander Tom Browning pitch his 10th victory of the season as the Cincinnati Reds beat the Atlanta Braves 7-5 last night.

Milner's third homer of the season highlighted a four-run second inning off Braves starting pitcher John Candelaria that put the Reds ahead 4-1 in the second inning. Browning, who finished with two-run homer to cap a four-run rally, while Dave Dravecky combined with Roy Lee Jackson and Rich Gossage, the third San Diego reliever to win 19 games this season, struck out four, for his 19th save of the season.

Tunell, who pitched the ninth inning, kept the game tied 2-2. Lamp, who relieved rookie left-hander Steve Davis with one out and the bases loaded in the fourth, got Jackie Guittierrez to ground into a double play to end the threat and keep the game tied 2-2. Lamp, who gave up three hits, gave way to Bill Gollid in the ninth.

The victory, combined with New York's 9-1 loss to New York, gave the Blue Jays a seven-game lead over the Yankees and lowered Toronto's magic number to six.

Auburn Tigers remain atop AP
Oklahoma stays in second spot

Associated Press

AUBURN, Ala. - The fact that Auburn has been the nation's No. 1-ranked college football team for three straight weeks doesn't have Coach Pat Dye turning car wheels.

"Right now, it's just an advantage if we go undefeated and (runner-up) Oklahoma goes undefeated," Dye said yesterday at his weekly news conference. "If I knew that would happen, I'd say it was great. But I don't see us going undefeated.

"In fact, the best-looking team I've seen has already lost a game," continued Dye. "..."

"Maryland (No. 17 and winner of two straight after losing to Penn State) is a powerful, powerful football team. They looked awfully strong the way they manhandled West Virginia (28-0 Saturday night)."

Auburn and Oklahoma were both idle last weekend but remained 1-2 in The Associated Press poll for the third week in a row, while Southern California was upset by Baylor and idle last weekend but remained 1-2 plummeted from third to 18th.

"We are strong the way they manhandled West Virginia (28-0 Saturday)." Dye said.

"The only ones I've heard mention it are the media," Dye said. "I don't see any way bringing No. 1 helps us. It just helps the people we play depending on this week's performance."

AP Poll above

"The only ones I've heard mention it are the media," Dye said. "I don't see any way bringing No. 1 helps us. It just helps the people we play depending on this week's performance."

"Auburn and Oklahoma were both idle last weekend but remained 1-2 in The Associated Press poll for the third week in a row, while Southern California was upset by Baylor and idle last weekend but remained 1-2 plummeted from third to 18th."

Auburn, 2-0, received 26 of 57 first-place votes and 1,089 of a possible 1,140 points from a nationwide panel of sports writers and sportscasters. The Tigers visit Ten­nessie Saturday.

Oklahoma, which will become the last major college team to play a game when the Sooners visit Min­nesota Saturday night, received 21 first-place votes and 1,070 points. Last week, with all 60 voters par­ticipating, Auburn and Oklahoma were tied 23-23 in first-place ballots, but the Tigers led in points, 1,157- 1,125.

Dye said the Auburn players aren't hung up on their No. 1 ranking.

"We are strong the way they manhandled West Virginia (28-0 Saturday night)."

Auburn's ByJackson, who ended up at the top of this pile in a game last season, currently finds himself in style at the

"The only ones I've heard mention it are the media," Dye said. "I don't see any way bringing No. 1 helps us. It just helps the people we play get ready, and I don't think anyone needs any added incentive when they play us."
Baseball

Johnson, the Commissioner of Baseball, is currently being faced with allegations and apparent facts of various drug dealings in baseball. His current actions on the subject are detailed at right.

Associated Press

NEW YORK - Baseball Commissioner Peter Ueberroth asked major league players yesterday, to voluntarily submit to drug testing. The players' union responded that the action may be unlawful and indicated it would tell players to ignore the request.

At a news conference, Ueberroth said he had designated a representative from each club's management to deliver letters to every major league player. The letters ask players to submit to urinalysis three times a year beginning in 1986. Ueberroth said he had asked for responses to the letters by Friday.

At the same time, Ueberroth said he had decided to postpone any punitive action against seven players who testified in the federal drug trial in Pittsburgh, of Philadelphia career attorney-manager.

"Baseball is on trial," Ueberroth said, "and it has suffered public humiliation in the last few weeks, not to anybody's surprise, least of all to mine. I've wrestled with what to do as commissioner."

Ueberroth said the program would be similar to one already being used to test minor leaguers and non-playing major league personnel. Tests would be done without notice, but would always be conducted in the player's clubhouse. They would be conducted by medical people, and he said there would be no punitive steps taken against players who tested positively.

"Anyone with a positive test would receive immediate, con- tinued testing and treatment," the commissioner said. "We would get counseling and help appropriate to the individual."

He said baseball's winter leagues, with the exception of Venezuela, have joined the program. Venezuela was excluded because "they have severe penalties, and we will have no penalties," Ueberroth said.

The acting executive director of the players union, Don Fehr, called Ueberroth's action "a plain, old-fashioned attempt not to bargain... but to bypass the union."

The early indication was that players were favoring Ueberroth's proposal, with a hitch. The New York Mets voted unanimously.

Indianapolis News yesterday. "We have one offer so far to fight Prince Muhammad in California in November. But I don't think that's the direction we're going to take right now. It would be up to Marvin."

Johnson is considered the prime contender for a light heavyweight title bout. Peltz said Spinks, who upset Holmes last Saturday, would have to vacate his light heavyweight crown to keep the newly won heavyweight championship.

"He can't keep both titles," Peltz said. "The only legitimate light heavyweight title bout now would involve Marvin."

Johnson, 39-5 in his pro career, is scheduled to fight James Williams of Portland, Ore., in Atlantic City on Saturday night. Williams, 30, has a record of 26-26-3.

Johnson won his first world championship on Dec. 2, 1978, when he knocked out Mase Parpov for the WBC crown. He lost the title the following spring in Indianapolis to Matthew Franklin (Saaid Muhammad), but later won the WBA championship by knocking out Victor Galindo in New Orleans. Johnson lost the WBA crown to Eddie Gregory in Knoxville, Tenn.

He won the North American Boxing Federation light heavyweight title last April against Eddie Davis in Atlantic City.

Indianapolis promoter Fred Berns said that he's had an offer for Johnson to fight Leslie Seward of Trinidad for $50,000.

"They said the government of Trinidad could help underwrite the fight for more money," said Berns.

"We had that $50,000 offer before Spinks fought Holmes," said Clarence Doninger, Johnson's attorney-manager.

"If we can do it here (in Indianapolis), we'll go in Market Square Arena," said Berns. "I think we could do it here for $105,000, but there would have to be a guarantee of $75,000. I think we could break even here with 6,000 fans."

"We drew 8,400 for Marvin's title fight with Matthew Franklin in 1979 and the top ticket was only $25," continued Berns. "There are no TV dates available now, but if we can't do it here without TV, we may have to go to Trinidad."

"If the government (Trinidad) comes up with something like $200,000, we'd have to go down there. But I'd rather have it here for Marvin's sake."

B erns said Johnson is in the driver's seat for the next world light heavyweight title bout.

"He's rated No. 1 in all three ratings. Prince Muhammad is No. 2 in the WBC, Seward is No. 2 in the WBA and J.B. Williamson is No. 2 in the IBF. Marvin will have his pick of any bout he wants."

Arthur Andersen & Co.
Invites You to Discuss Management Information Consulting Career Opportunities
Consulting Management Information Systems

We want to answer your questions about management information consulting. To meet future management needs, you'll be expected to expand your basic skills through our Management Information Consultant Program. In St. Charles, Illinois.

To answer your questions, it will be necessary for us to conduct an informal presentation. To register, please contact:

John Meier, Partner
Arthur Andersen & Co.
21 East Monroe Street
Chicago, Illinois 60603
(312) 260-0033

We will have the answer to your questions, because we've been talking with North Dame Students for years.
Luther may go to Colts from the U.S.F.L.

Associated Press

JACKSONVILLE, Fla. — Jacksonville Bulls quarterback Ed Luther says he'd be interested in playing for the Indianapolis Colts of the National Football League, although a deal hasn't yet been worked out.

NBC TV reported Sunday that Luther, the Bulls starting quarterback for 12 of 18 games last season, was going to become a member of the Colts.

Although the team has two quarterbacks — Mike Pagel and Art Schlichter — both are struggling.

"I wanted to play for the Colts," said Luther, directed at the media personnel for the Browns. "I tell Ed Luther he had to sign a contract before joining the Browns. We've got three unearned runs in a 3-2 loss to the Cubs. It wasn't a matter of the money he was making. I'll be damned if I was going to pay what Mike Roster wanted. We don't need two high-priced quarterbacks."

"We have plenty of time to rebuild a team. We're all trying to do is clean up our act," said Luther. But Luther said he would be interested in playing for the Colts. He said he first heard about that possibility when he saw sportscaster Larry King's report on television Sunday.

"I think a lot of people are getting involved in the fast-paced excitement of newspaper production. Positions are available on any day of the week — from Thursday through Sunday."

Yankees lose to Tigers, Nieksa fails in bid

Tigers 9, Yankees 1

NEW YORK — Phil Nieksa lost his third try at winning his 500th game last night, as the New York Yankees won 9-1 in the fast-paced excitement of newspaper production. Positions are available on any day of the week — from Thursday through Sunday.

Expos 17, Cubs 15

CHICAGO — Andre Dawson hit three home runs, including two in a 12-run, fifth inning, and drove in a club record-tying eight runs yesterday as the Montreal Expos held on to beat the Cubs 17-15 in a game that saw the two Cubs hit home runs and get 117 hits.

Dawson's three homers gave him 21 on the season and seven in his last five games. Tim Wallach and Gary Matthews homered for the Expos. The Cubs had a season-high 20 hits in the game, the Expos had 17.

Bryns Smith, 17-5, allowed five hits in six innings. Jeff Bronson got his 36th save, stemming a five-run Chicago ninth inning. Cubs starter Ray Fontenot, 6-10, took the loss.

Dawson followed his 19th homer, a three-run shot in the fifth inning, with a three-run blast that started the Expo's big inning. Butera also drove in two runs with a bases-loaded single, Webster hit a two-run double, Dawson hit another three-run homer and Wallace hit a two-run homer in the inning.

The Observer is now accepting applications for Assistant Production Manager

This is a salaried position and duties include:

Supervising the Accent and Viewpoint layout staff

Coordinating layout of the Irish Extra

Assisting in special design projects

For more information contact John Mennell at The Observer, 239-5303, by midnight Wednesday September 25.

Interhall football slate opens; upsets and defense dominate

By FRANK HUEMMER
Sports Writer

Call it a chance to fulfill one's dreams and goals.

Interhall football allows many tough competitors the opportunity to put on their equipment and battle it out on a campus where many legends have shown their stuff in one of the oldest football traditions in the country. Often, it is the last opportunity for players to supply a crushing blow, to make a game-saving tackle, or to loft a winning touchdown spiral. As interhall football action gets underway on Sunday, there were already many surprises, and the five-team divisions seem to be up for grabs.

In the Parseghian Division, Moraine is off to a fine form after rolling off Off-Campus, 19-0, at John Mundo scored three one of the oldest football traditions in the country. Often, it is the last opportunity for players to supply a crushing blow, to make a game-saving tackle, or to loft a winning touchdown spiral. As interhall football action gets underway on Sunday, there were already many surprises, and the five-team divisions seem to be up for grabs.

In the Parseghian Division, Moraine is off to a fine form after rolling off Off-Campus, 19-0, at John Mundo scored three touchdowns. Sunday, however, they will meet another undefeated team in Keenan on North Stepan Field at 2 p.m. Keenan will be fresh from a 7-0 upset of a perennially tough Dillon squad. On their match as team captain Rick Bliha raced 102 yards with an interception return to provide the margin of victory.

"I am sure the enthusiasm we showed Sunday against Dillon will carry over to our game with Morrissey," said Bliha. "The entire team is looking forward to playing once again this week." Another team which will be heard from is Grace as evidenced by their hard-fought, 2-0 victory over Planter. The two-point safety resulted after Tom Doyle blocked a punt deep in Planter territory.

"We'll be building from this game as we try to get momentum to battle Morrissey in a few weeks," said Grace captain Ed Boureman. "With the way we played last week we have an opportunity to go 4-1 or 5-0." This Sunday, Grace will battle Off-Campus at North Stepan at 4 p.m. While Planter outscored Dillon at South Stepan at 3 p.m. in the Leavy Division, last year's interhall football championship football team - Stanford - was upset in the closing minutes by an 8-7 score. Holy Cross pulled off the victory as Rich Bredna bullied in a touchdown with 17 seconds remaining in the contest. Then, Bryan Samoski scored on the two-point conversion attempt.

"Our game proved that a game is not over until the final whistle blows," exclaimed Holy Cross captain Chris Ryan. "We played with a lot of heart and our strong individual efforts allowed us to pull out the victory. This week's game with Alumni will be a real battle." This sets up an interesting confrontation Sunday in 2 p.m. on North Stepan Field as Holy Cross will tangle with a tough Alumni team. On Sunday, Alumni struggled with Cavanaugh and emerged as the victor with a 5-0 shutout.

"We are confident and have a lot of heart and our strong individual efforts allowed us to pull out the victory. This week's game with Alumni will be a real battle." This sets up an interesting confrontation Sunday in 2 p.m. on North Stepan Field as Holy Cross will tangle with a tough Alumni team. On Sunday, Alumni struggled with Cavanaugh and emerged as the victor with a 5-0 shutout.

SMC volleyball team wins two, improves season record to 4-10

By JILL SARBENOFF
Sports writer

The Saint Mary's volleyball team improved its record to 4-10 by defeating the Tata University at the Athletic Facility last night at the Angela Athletic Facility. The Belles won the first match against Tri-State in two games, 16-14 and 15-13. The leading server in game number one was Kara Tekulve. The sophomore, from South Bend and Feldman both contributed four spikes in the victory. Feldman also returned six serves.

Taylor looks forward to a more important role for Irish in '85

By GREG STOHR
Sports writer

Purnell Taylor isn't used to being a third string football player. At Bishop Amat High School in La Puente, California, Taylor started as running back and at linebacker. He gained 3,205 yards rushing and scoring during two prep careers. Now, however, the 5-11, 216-pound junior must wait in line for playing time at fullback on the Notre Dame football squad. Taylor is third on the Irish depth chart behind sophomore Frank Starns and senior Tom Monahan.

With outstanding physical abilities (a 405-pound bench-press and 4.6 speed in the 40-yard dash), however, Taylor seems destined for bigger things.

"I guess I'm a little upset, but I see why I'm third string," says Taylor. "I haven't had any game experience. I haven't had a chance to get with the coaches much." Taylor has no game experience because he missed both the 1983 and 1984 seasons due to torn knee ligaments suffered on the second day of full-pad practice this freshman year. He has now two long scars on his right knee as products of the surgery, which required 18 months of rehabilitation. And, he has yet to fully recover, says Irish running back coach Moore.

"He's lost a lot of speed and quickness," explained Moore, "but he's steadily gaining it back." Taylor agrees that he is not yet at full strength.

"I guess I'm about 90 percent," says Taylor. Though Taylor has only carried the ball twice this season, gaining 11 yards, Irish head coach Gerry Faust hopes he will be able to give the junior an increased role as the season progresses.

"We hope he can contribute," says SPORTS, page 10

There is still hope for couch potatoes

If you're like me, you probably feel that you have too much work to do and that you get too little sleep. You make it through life only by ingesting large quantities of caffeinated beverages. The last thing you need is any more caffeine. We can't make it through life only by ingesting large quantities of caffeinated beverages. If you're like me, you lack the motivation to do anything about it, anyway.

So what are we to do with ourselves? If we want to be real macho, we can take up jogging around the lake.
