HPC sends proposal for senate disbanding to students for vote

By KAREN WEBB

HPC President Kevin Howard said the CLC is the more effective body for discussing and making decisions on matters of students and members of the administration as well as students. It is also recognized by the Board of Trustees, while the senate is not, he said.

He also said he believes the reason for the senate’s ineffectiveness lies in its leadership, not in its structure. "If there is real leadership and real issues, then the senate has a purpose," he said.

Lawrence said if disbandment should occur, it would not be the first time the South Bend or Indiana University history.

In 1972, three years after its establishment, the Student Senate was abolished because it was considered ineffective. It was reinstated, however, in 1981.

Howard clarified the point that if the disbandment would occur, senate students would become members of the CLC.

Simple meal served; recalls world hunger

By DAN MURPHY

Students can participate in a "day of solidarity" today by eating a simple meal at the dining hall in awareness of world hunger, said World Hunger Coalition President Kevin Moser.

The simple meal, consisting of rice, bread, soup, water and tea, is part of an observance of World Food Day sponsored on the Notre Dame campus by the World Hunger Coalition.

Moser said the three-year-old program has a dual purpose. "It will show there are still a lot of hungry people in the world, and remind us of the world's capacity to grow food."

The simple meal will be served today on the east side of South Dining Hall and in sections A through C in North Dining hall.

World Food Day, which was declared by the United Nations, also marks the birth of the UN, movie and teleconference.

Moser noted that each year students allocate one dollar to the lines for a regular meal and write letters to the President.

Today at 5:15 p.m. a Mass will be held at Sacred Heart Church to celebrate World Food Day. "Five Minutes to Midnight," a documentary about the world hunger situation, will be shown at 7:30 p.m. in the Center for Social Concerns.

Following the hour-long documentary, taped footage of a nationwide teleconference televised earlier will be shown. The teleconference, broadcast from Washington, D.C., will feature Peter McPherson, administrator of USA Aid and the Agency for International Development.

Also speaking will be Barbara Hurst, food and nutrition administrator from the United Nations.

This will be the second annual teleconference aires at more than 150 universities nationwide. The program will include questions from phone callers.

Another hunger aid program sponsored by the WHC is the semester-long Wednesday lunch fast. At the beginning of each semester students sign up and agree to give up lunch on Wednesdays.

For each lunch not eaten the student contributes one dollar to the WHC. Once a student breaks the fast, no more money will be donated for lunches missed.

This semester the fast has made approximately $800, which goes directly to aid programs revolvedu by the WHC each year.

REYNOLDS, said, explaining the group's decision to focus on hunger awareness problems on campus, rather than reach out to students.

"The trend on this campus has been, in the past, to focus on hunger awareness problems on campus, rather than reach out to students," he said. "We're using our education to do something more concrete. We are old enough to make a difference."

Yesterday, a level RASTA's efforts demonstrate that people on campus are concerned about the hunger crisis and are willing to take action.

"Notre Dame and Saint Mary's students can accomplish something if they set their minds to it," O'Donnell said.

The Bluegrass group "The New Age Mothers and the American Dream" entertained the sizable lunchtime crowd at the rally.

Grotto statue to honor Tom Dooley

By TERRY DEMPESEY

Notre Dame graduate Dr. Tom Dooley, a hero who devoted his short life to aiding Southeast Asian villages, will be honored today with a statue placed just west of the Grotto.

The statue shows Dooley posed with two Laos children. By the time Dooley died of cancer in 1961 at the age of 34, he had saved literally thousands of Southeast Asians.

The Grotto was a favorite meditating place for Dooley. "If I could go to the Grotto now, then I think I could sing inside," he said in the famous letter written from his deathbed to University President Father Theodore Hesburgh.

Father Daniel Jenky, rector of Sacred Heart Church, said the statue was donated to Notre Dame, and see DOOLEY, page 3

Stanley Kaplan reveals testing hints

By BOB MUSSELMAN

Stanley Kaplan had three suggestions for the dozens prospective graduate students who attended his presentation last night at the Library Auditorium."Practice, practice, and more practice," Kaplan, 66, guest of the Notre Dame Preprofessional Society and the South Bend Kaplan Center, also spoke yesterday afternoon to the Indiana University students studying here about the National Medical Boards and their relationship to residences.

"You have to warm up if you're going to take a test like the MCAT or the GRE, Kaplan, founder of Stanley Kaplan Educational Centers, told the mostly crowded room last night.

The talk, titled "The Role of Standardized Testing in the Admissions Process," pertained mainly to the nature and composition of standardized admissions tests. He spent little time talking about his test preparation program.

"I don't come here as a used car salesman," Kaplan said before the presentation. He explained that standardized tests are used to compare students with other students. But he added that since they are relatively precise, grade point average also is factored heavily into admission decisions.

Until recently, Kaplan said, most organizations administering the tests claimed that preparation courses could not prepare students for the examinations since they measure "aptitude," or innate ability.

But during the 1970s, after the Federal Trade Commission investigated and confirmed Kaplan claims that preparation is effective, and that the knowledge tested is learnable, the test-administering companies began placing advertisements in education magazines. Kaplan claims were vindicated.

Kaplan stressed, however, that "I'm not saying everybody should take these preparation courses, just everybody should prepare." "Familiarity doesn't breed contempt," he said. "It breeds confidence.

The independent student newspaper serving Notre Dame and Saint Mary's
The 1985 Nobel Prize in economics was awarded to Franco Modigliani, a Massachusetts Institute of Technology professor, it was announced yesterday in Stockholm, Sweden. "I am surprised, and pleased," the 67-year-old economist said in Belmont, Mass. "It's always nice to hear that the work I've done is appreciated." Modigliani, who emigrated from his native Italy to the United States at the beginning of World War II, was cited for theories on how people save for their old age and for refining economic thinking on how to determine the market value of businesses. Modigliani's savings theories, worked out in the 1950s, have been widely used to explain why people reduce their savings when they are in a low in the upper 60s. Clear and cool tonight with a high in the mid 60s. Things are cool today with a high in the low 60s. Clear and cool tonight with a low in the upper 30s. Mostly sunny tomorrow. High in the mid 60s. Two more hijacker arrests were made yesterday, bringing to seven the number of Palestinians who have been charged in the hijacking of the Achille Lauro during a Mediterranean cruise that began in the northern port of Genoa, Italy. Giannou Calabrese of Teaneck, N.J., a former student of Gennaro, would identify the two Palestinians, reveal the charges against them, or say if they were in custody. - The Observer

The Notre Dame Pre-Law Society is sponsoring an informal Information Day tomorrow from 11 a.m. until 3 p.m. and Saturday, Oct. 19 at 6 p.m. The event is open to all area college students considering law school, and is a free of charge. - The Observer

The Notre Dame chapter of Pax Christi will meet today at noon in the Center for Social Concerns. Members are asked to bring a brown bag lunch. - The Observer

Brush fires raged out of control in southern California yesterday in an area dotted with fire stations and firefighters fought flames that had burned at least 20,000 acres and 14 houses. As hot and dry Santa Ana winds lowered the humidity to 10 percent, 100 firefighters were on hand. - The Observer

Weather

Things are cool today with a high in the low 60s. Clear and cool tonight with a low in the upper 30s. Mostly sunny tomorrow. High in the mid 60s. - The Observer
**Simon asks for student creativity**

**By JOHN GORLA**

Students were urged to unearth their creativity in solving the problems of the poor last night by William Simon, former secretary of the U.S. Treasury.

Simon, who served as secretary during the Nixon and Ford administrations, lectured as part of the new AUPDRE Lecture Series on Religion and Politics.

Simon portrayed his idea of the need for a creative economic policy. "The issue is not what would you have; we have domestic welfare programs, but what kind of programs" he urged students "to abandon the current system of economic rights and begin focusing our attention on what will really solve the problem: the creation and expansion of wealth, which happens when the creativity of human beings is uncensored."

In response to the recent publication of the Bishop's Pastoral Letter on the Economy, Simon said, "The idea of economic rights is a pipe dream. I can tell you is a serious mistake, both for the sake of human rights and for the sake of the poor.

Instead of creating freedom, a theory of economic rights creates citizens who become wards of the state, Simon stated.

He told students to look at what happens in the countries where economic rights are proclaimed, and cited the Soviet Union as an example of an economic system gone sour.

Simon said the problems facing socialism and communism are "that they do not have with too few human beings, too little exercised to learn their God-given creativity and initiative."

On the issue of government officials, Simon asked, "Do our welfare programs encourage people to exercise in

**Alumni asked to return for series**

**By KATIE CRONIN**

You apply to Notre Dame, you're accepted, you come, you work, study, work, learn, and grow. Finally you graduate. You've become an alumnus, and until now, you've done candidates who were only your excuse to return to Notre Dame right? Not quite.

This year distinguished Notre Dame alumnus will be returning to campus to speak to present Notre Dame and Saint Mary's students in the new Distinguished Alumni Lecture Series.

The purpose of the series "is to give Notre Dame, as they do," give an alumna who have met with much success in their respective fields, and a professional chance to share their knowledge and experience with both faculty, said John O'Brien, a member of the Student Alumni Relations Board. To select speakers, donors of the University's different colleges were

not known until the beginning of the semester.

Place of the statue in the Grotto is fitting, Jenky said, because of how Dewey cherished the place and affirmed this in his letter to Heberh.

The establishment of the memorial to Dewey coincides with the 25th anniversary of his death in one of his own clinics established for war

refugee.

The year before his death, Dewey shared a commencement platform with President Eisenhower, who said of "Dewey," "They are few, if any, men who equalled his exhibition of courage, achieved so much for his God and his readiness to serve his fellow man."

**Career Exposure Program**

This Christmas Break: several Notre Dame Alumni Clubs will sponsor a Career Break Exposure Program for one week of the vacation.

The Career Exposure Program is intended for juniors only, since they have had the necessary preparation. It involves courses to spend a week working and understanding their prospective careerchoice. The number and type of volunteer employment spots is determined by the availability of local firms. Therefore, all career options may not be available for the week of volunteer exposure. Initially, important to realize that professional firms participating in a professional enterprise. Each group is presented to them and it important that time and effort be put into presenting the applicant, and the University, in the best manner possible.

The following clubs have volunteered spots in the designated areas:

- Albany, NY: Aurora Medical, Mechanical Engineering, Law, Physics, Psychology, Social Work, Education
- Pittsburgh: Accounting, Banking/Finance, Law, Sports Writing
- Orange County, CA: Agriculture, Law, Business, Government, Economics, Engineering
- Tampa Bay: Agriculture, Law, Business, Government, Economics

All fields will be considered.

If Elizabeth Barrett and Robert Browning had AT&T's 60% and 40% discounts, it would have been a terrible loss for English literature.

And of course, she wouldn't have had to restrict her feelings to a mere sonnet's length, either. After all, you can always think of one more way to tell someone you love them when you're on the phone.

Let us count the ways you can save. Just call weekends till 5pm Sundays, or from 11pm to 8am, Sunday through Friday, and you'll save 60% off AT&T's Day Rate on your state-to-state calls.

Call between 5pm and 11pm, Sunday through Friday, and you'll save 40% on your state-to-state calls.

So when you're asked to choose a long distance company, choose AT&T. Because with AT&T's 60% and 40% discounts, you can satisfy your heart's desire without exhausting your means. Reach out and touch someone.
Much has been seen in recent months and even more said about starvation in various parts of Africa. Graphic and soul-wrenching film footage, brought to us via the ubiquitous video-window on world events, tug at our emotions. We view enraged civilians chanting and piling glassed black faced mothers huddled in camps hastily constructed on barren plains. They are there in the thousands and we “see” them. They stare at us from the covers of the latest news magazines. We wonder at what horrible imolation in nature has caused such human suffering, such environmental collapse. We pause and then another headline appears, sweeping our focus before us like a swift, unplanned falling leaves which visit our campus at this season. And we eat. We eat because we are hungry. We eat because food is there on counters, in machines.

Accent

Stroke!

Kevin D. Walsh
features writer

The darkness of the morning is like India ink. Cold, opaque, and unyielding. The drizzle coming down doesn’t warm things. It isn’t raining hard, but it is raining steadily. The setting moon reflects off of the rain-marred surface of St. Joseph’s River. In the distance, over the autumn colored trees, the skyline of South Bend twirls and shimmers through the falling rain. It looks almost noble in the morning. The first dull rays of sunshine struggle through the rain until they come to rest on a group of determined, intrepid men and women.

Who is up at 5 in the morning to witness this beautiful spectacle? What sacred rite brings them to the muddy banks of St. Joseph’s River? Who is this resolute band of drowned rats?

“We are not the sailing club,” said Mike Songer, president of the Notre Dame Rowing Club.

Of course, these are the members of the club that claims to have the highest membership of any student organization at Notre Dame — The Notre Dame Rowing Club.

This year marks the 20th anniversary of the Crew Team at Notre Dame. The enthusiasm and optimism of its members is any indication, the Notre Dame Community will be hearing from the Crew Team for many years to come. When most people hear the phrase “Crew Team,” they generally think of one of the following things: Weirdos who are suspiciously alive at 5 in the morning; Harvard, Yale; Rob Lowe in “Oxford Blues”; or the sailing club. This last thought seems to bother the members of the crew team the most.

“We are not the sailing club,” said Mike Songer, president of the Notre Dame Rowing Club. The main problem that the crew team has may not involve any misconceptions held about it, but rather the lack of any conceptions. The crew team consists of 200 men and women from Notre Dame and Saint Mary’s. All first-year rowers are categorized as novices, but after that first year on the crew everyone is considered varsity. Consequently, the group ranges from 17-year-old freshmen all the way to a 30-year-old Notre Dame law student.

The varsity crew distance season begins in September and ends about two weeks into November. Winter workouts are held indoors while ice covers their practice field. After spring break, the spring season starts. Rowing, according to Songer, is the most demanding sport around, as it exercises every muscle. “Most people see rowing as keying in on the arms, but actually it is primarily a leg sport,” he said.

“Rowing is also the ultimate team sport, because if one guy decides not to row, the boat goes nowhere,” he added. This becomes evident whenever one watches the rowers closely.

The success of the entire boat relies on the competence of each person.

Rowing is also an incredibly expensive sport. The boats, which are made of fiberglass, cost between $7,000 and $9,000, and a single crew costs approximately $250. The team, because it is actually a “club” and not a varsity sport, is subsidized mainly by fund raisers and alumni support.

Coming up for the Rowing Club are several big meets. On Oct. 20, the women’s varsity team, coached by Mugs O’Hearn, will enter the Head of the Charles Race in Boston which is considered the single biggest fall race in rowing. On Nov. 9, both varsity squads will go down to Knoxville for the Head of the Tennessee Race where they expect to do well.

The club prides itself on the professionalism and smoothness with which it is run. Even though it is technically just a club, it competes with and defeats many varsity teams. It is not, however, quite up
to the level of Harvard or Yale, although Songer says he isn't the
least bit intimidated by the famous Ivy League competition. "We'll
be there soon," he says confidently.

As anybody who has watched crew knows, it is a beautiful spec-
cular sport. The people of South Bend come out in droves in the
summer to watch the races of St. Joseph's River with a picnic and
watch rowing all day long. The members of the crew team appreciate
that.

Rowing is the most demanding sport.

There is a certain element of risk in rowing. "Wherever water is
troubling would be an insult or a sign
of your ignorance to the members of the
Dr. Who Club.

As anyone who is club knows, the character of Dr. Who was "born" on
Nov. 23, 1963 as the main character
in a BBC science fantasy
series. The idea behind the character of the Doctor is this: one suited to a
soap opera, although the theme is pure fantasy. The Doctor is a rebel
in the universe, due to his theft of a
glassy river.

Above: Three crew members, Patti Griffail, Joan DaNovice, and
John Ralph adjust their footstretchers in preparation for a race.

There are currently about 30
members, but Siyers says that he is
always looking for more to "come
out of the closet."

The show is filled with good
naturied misadventures, especially as
the Tardis and its master, the
doc-

tor, tend to land on Earth.

A light-hearted show with a low
budget that makes the special
effects, which have, at
times included characters
covered with tin foil, nearly
hilarious.

The actors who played this
popular cult figure, whose other
title is Time Lord, include John
Pertwee and Peter Davison,

The popular doctor, according
to club president Jim Siyers, is
Tom Baker, who is no relation to
the actor now playing the part.
Baker has become a myth both on

The most popular doctor, accord-
ing to club president Jim Siyers, is
Tom Baker, who is no relation to
the actor now playing the part.
Baker has become a myth both on
and off the screen for many Who

fans. He shocked the fan world a
few years ago when he married
then costar and companion
"Romana" before both of them left
the series. They are now separated,
note an amused Siyers.

This show has something for
everyone, not merely for fans of the
science fiction genre. It is a light-
heated show with a low-budget that makes the special effects
which at times have included
characters covered with tin foil,

open to any creature on either
campus who has an interest in

science fiction, heroic fantasy,

comic books, movies relating to
any of the above themes, and

anything out of the ordinary.

Alternate Realities' main

purpose is to provide communication between people whose interests include science-

fiction and fantasy. This is done

using a directory and a newsletter.
The directory, which will list all

members and their interests and

will be published soon after

October break. The newsletter,
which contains announcements,
columns, and articles by mem-

bers, is published on a fairly

regular basis.

The club was founded in late
1984 by four students who simply wanted to meet other

students who shared their
obsession with science fiction. As the
sun rose the next morning

through, the simple idea had
turned into a constitution.

The club's current major

activity is the publication of the

newsletter, but it also shows

movies and holds discussion

sessions. It is also working on
getting a few speakers for next

semester.

The club is run out of room
820 in Grace Hall. For further

information, call 4223.

Irish meet Akron today
Special to The Observer

The Notre Dame soccer team will take its 4-8-4 record to Akron, Ohio, today for the third of six consecutive games on the road. The Irish will meet the Zips in a game scheduled for 4 p.m. on Saturday at Lee Jackson Field. The Irish are 4-0 in all games against Notre Dame, including a 1-0 victory over the Irish last season on Alumni Field.

Notre Dame is coming off a win and a tie last weekend in the Redbird Beer Nut Invitational in Normal, Ill. The Irish beat Vanderbilt, 2-1, before playing host Illinois State to a 2-2 tie.

The first-year Irish players continued to lead the team, as Randy Morris, Bruce McCourt and Joe Sternberg tallied goals with two assists each from Tom Gerlacher and Kurt Roemer.

Gerlacher, McCourt and Morris were named to the tournament team. Notre Dame finished second in the four-team tournament.

After a trip to Florida and North Carolina during break, the Irish will meet the Zips in a game scheduled for 4 p.m. on Sunday at Lee Jackson Field.

Belles continued from page 12

Jury. Lambert noted that with Suth out of the rotation, some adjustments had to be made which may have caused the Belles some defensive problems.

Huntington took advantage of a slow Belles' start as game one, jumping to an early 5-1 advantage. Freshman standout Margaret Feldman had some nice hits along with some fine defensive plays as the Belles held off Huntington's game points before surrendering, 15-5.

In game two Feldman again went out of the rotation, some defensive problems have caused the Belles some difficulties. Some nice plays by Sallie Terrell, a newcomer to the team, aided the Belles as they took a 10-7 edge. Then with the score 11-9, Belles' Telrulve and Mary Reidy teamed up for some nice plays. But once again a missed Belle's serve allowed Huntington to regroup, and the visitors delivered two unreturnable serves. The Belles, unable to put any more points on the board, fell 15-11.

Lambert commented on Terrell's performance based on the two weeks she has been a member of the team. "She has been a real asset attitude and playing wise. This was the first night she played a lot and she did well," said Lambert.

Bethel whose team consists of four Mishawaka Marian High School players and teammates of Suth, are a better team than their 3-14 record would indicate. Several long volleys and a good match up at the net between Reidy and Bethel's power hitter Lori Masing, proved for some exciting play, despite the final 15-1 score.

On Saturday, the Belles will try and improve on their record when they travel to Manchester, Ind., where they will take part in a four-team tournament with Manchester, Anderson and Goshen Colleges.
Linebacker overcomes injuries
Weissenhofer provides consistency

By DENNIS CORRIGAN
Sports Writer

Injuries. The word spreads fear through players and coaches alike. They can ruin a career and careers. Fourth-year junior linebacker Ron Weissenhofer knows too well the effect that injuries can have on a career. In 1983, Weissenhofer fractured his right wrist while taking part in autumn two-a-day practices.

"I thought I might never get back to 100 percent physically or mentally," says Weissenhofer of the injury. "I didn't think I'd be able to help the team again.

"I had confidence in myself, though, to come back. It's part of getting the job done and making a contribution."

Weissenhofer was red-shirted for his entire sophomore season and missed the first two games of last year's season. He finally returned to action with a start against Colorado, filling in for an injured Mike Kovaleski. Weissenhofer also started in place of Kovaleski against South Carolina and Navy. In the South Carolina game, he even led the team with 13 tackles.

Filling in for Kovaleski and performing well proved to be a bonus for the entire linebacking corps.

"(Ron's) reliability has made him invaluable," says Irish inside linebacker coach George Kelly. "I'm convinced he can be a contributor. He's consistent in his play at either position."

Weissenhofer agrees that his role of filling in for other players has had benefits.

"It makes (Kovaleski) and me work harder," he says. "It's competitive. It helps."

Still, though, the injury to his wrist and the brace he now wears on the wrist have hampered his play.

"Ron has progressed on schedule, if there is such a thing," says Kelly. "This spring was his first solid period of action because of the injury. He's very reliable, but still is inhibited by the wrist."

"A linebacker has to use his hands," says Weissenhofer. "I can't mine as much as I'd like because of the brace."

Through it all, however, Weissenhofer enjoys his position in the linebacking unit.

"I think we're really tough. It's the best position on the defensive unit and on the field because everything's in front of you," notes Weissenhofer. "You should be in on every play."

Weissenhofer is an athlete who both enjoys the game and has used it to further his life off the field.

"I like football. It's treated me well. I'm happy to play and do my part, and it has allowed me to get a good education."

"Growing up in Chicago, going to Notre Dame was always in the back of my mind," continues Weissenhofer. "I didn't think I'd make it, but here I am."

Although he is a junior in terms of eligibility, Weissenhofer is a senior marketing major. After graduation this spring, he hopes to get into a graduate program at Notre Dame in order to retain his final year of eligibility. While he is looking forward to next year, Weissenhofer still has expectations for this season.

"I'm still looking for a good season," he says. "This season's not over by any means. We're still a good team. I try to ignore the staff people say about us. They don't go to our meetings or our practices, and they don't know football. I still have confidence. We're not out of it."

Off the field, the 6-3, 221-pound Weissenhofer enjoys playing softball and pool.

"I really like pool," he adds. "It's relaxing to get away from the books and the physical contact."

Football, though, remains his game of choice. After overcoming severe injury, Weissenhofer is ready now to play a larger role.

Late goal brings Irish 1-1 tie in battle with Central Mich.

By KENT R. WELDON
Sports Writer

The Notre Dame field hockey team came from behind Friday afternoon at Central Michigan to tie the school's first-half, on a late score by senior halfback Melissa Sommer. The Irish then held tight for two overtime periods, before finally watching the game and the goal end deadlocked.

Although the outcome did not add to Notre Dame's record, Head Coach Jill Lindenfeld was satisfied with her team's performance.

“We played a really good game considering (Central Michigan) is having its best season ever at 15-5,” said Lindenfeld. “They carry seven full scholarships.”

Those scholarships did not prove to be an advantage Friday as a makeshift Notre Dame lineup held its own for the entire game. The 15th-ranked Irish, who started the game without the services of sophomore Meshell DeBerry, lost a second regular player in the first half when senior defensive link Mary Struckoff went down with an injury. Still, the Notre Dame substitutes were able to do the job.

“I am very pleased with the play of my substitutes,” said Lindenfeld. “They did a great job. In particular, Mary Wagner at right inside and freshman Caroline Berceny, who replaced Mary (Struckoff) at right link.”

The second game of the weekend, which was scheduled for Saturday morning at Central Michigan, was cancelled and not rescheduled.

Before the Irish come home for their final game on Carter Field, October 30, they will play four games out East over the midsemester break.

It will not be much of a “break” for the team, however, as it will face off on Friday against the College of Wooster, a strong Division III team. Then on Monday the Irish will meet Trenton State, a team which Lindenfeld says will give her squad the toughest game of the vacation.

The following day Notre Dame travels to Lancaster, Pa., to face Franklin & Marshall College, a team from a strong field hockey area. After this doubleheader the Irish will take a day off and practice before squaring off against Lebanon University in Philaphia on Thursday.

This is a pivotal point in Notre Dame's season, and this short road trip could make or break the Irish. Lindenfeld says that it probably will not break them as the 7-4-2 record is very representative of her team's consistent and hard-working play.

“It will be tough because the games are all away,” notes Lindenfeld. “But if we play well I predict we will come home at 10-2-2, and possibly 11-4-2.”

Bret, Royals beat Toronto 5-3, to set up crucial seventh contest

Associated Press

TORONTO - George Brett's record 20th game-winning hit of the year broke a fifth-inning tie last evening, giving the Kansas City Royals a 5-3 victory over the Toronto Blue Jays and forcing the American League playoffs to a decisive seventh game.

The Royals, who trailed the series 5-1 at one point, will start 20-game winner Bret Saberhagen in the seventh game. Brett will answer with 11-game winner Dave Stieb, who won the opener.

Brett again gave Kansas City the spark it needed, and once again his victim was Blue Jays starter Doyle Alexander. Brett homered twice and doubled off Alexander during a four-for-four night that enabled the Royals to win their first game of this series and end a four-game winning streak.

This time, Brett homered far over the left field fence in the ninth inning to give the Royals one in the fifth to break a 2-2 tie. The homer, which moved him past Steve Garvey for the most home runs in a major league playoff history, came one pitch after he swung and awkwardly missed a 2-1 delivery from Alexander.

Unlike his one-man performance in Game 3, Brett had plenty of help in his championship effort. The Royals turned a 5-4, 5-hour, 58-minute night as Kansas City again frustrated Toronto's attempt to bring the first World Series to Canada.

Quisenberry, who gave up two game-winning hits earlier in the series, came on with two outs and two on in the ninth. Once again facing the winning run, Quisenberry struck out Toronto's George Bell to clinch his 19th save of the season.

It's back to the drawing board, however. "We just have to play better," said Manitoba. "We're all on the right wagon. We've got to finish the season hard the next few days and look forward to the Manchester tournament this weekend.

The Belles were without the services of outside hitter Tammy Bateman, who was sidelined with a knee injury.

Notre Dame Bandwagon needs riders now

Hi there. I am the leader of the band. Actually, I'm the driver of the wagon. Actually, we use Indiana Motor Buses more often than wagons these days. But I'm getting into these cliches, so we'll just say I drive the bandwagon. OK?

Now, I know you've heard about me. No, no, not that stuff. I'm talking about the bandwagon. The people who are always jumping on and off, which makes it pretty darn hard to drive the thing.

Anyway, today it's my day. Usually I don't get a day off because all of the passengers have to pick up and drop off all the time. And by the way, not too many people care about the bandwagon anymore. They're always jumping on and off, which makes it pretty darn hard to drive the thing.
