Congresswoman speaks at SMU graduation

Special to the Observer

Rep. Barbara Kennelly will be the 1986 St. Mary’s graduate of the arts degree. Kennelly has served on the House Ways and Means Committee and its subcommittees on Select Revenue Measures and Public Assistance and Unemployment Compensation.

In addition to her responsibilities on the Ways and Means Committee, Kennelly is also a member of the House Democratic Steering and Policy Committee. She serves on the Executive Committee of the Arts and Culture, and Foreign Policy Caucus, the Caucus for Women’s Issues and the Democratic Study Group. The selection of the commencement speaker began as early as January of the preceding year, said the secretary of the commencement committee, who asked to remain unnamed.

First, all juniors, faculty members and various contingents of the College are sent a letter asking their opinion on who the commencement speaker should be for the following year. After the list is compiled, it is presented to the Academic Affairs Council, which is made up of students, faculty and administration members.

The council sifts through the nominees and decides on approximately 12 candidates whom they will recommend to the Board of Regents. At their spring meeting, the board discusses the commencement speaker candidates and decides on the top candidates to be chosen.

The board then approves a slate of nominees larger than what is necessary to leave room for those persons who have previous commitments, the secretary said. The persons are listed in order of preference and are contacted towards the end of the summer.

Kennelly’s background includes serving as secretary of the state of Connecticut, and she was a member of the Hartford County Court of Common Council. St. Mary’s will reward Kennelly with an honorary doctor of laws degree. Kennelly has previously received honorary degrees from Sacred Heart University in 1981, Mount Holyoke College in 1984, and the University of Hartford in 1985.

Kennelly received a bachelor of arts degree in economics from Trinity College in Washington, D.C., and completed the Harvard-Radcliffe program in business administration. She then earned her master’s degree in government from Trinity and a law degree.

At the graduation ceremonies, the College will also present honorary degrees to Samuel Adler, conductor, and to Geoffrey Geyer, Adair, composer, conductor and educator, who will receive an honorary of fine arts degree. Geyer, a syndicated column, author, foreign correspondent, and educator, will receive an honorary, a doctor of letters degree.

Commencement exercises are scheduled for Saturday, May 17 at noon in the court of Lemmon Hall.

By MARK PANKOWSKI

"I’m not looking for glory or to be a hero," said Joseph Araman last night. Yet the Notre Dame Security officer might just be a hero.

Araman, a six-year veteran of the Notre Dame force, is credited in part with saving the life of an elderly heart attack victim yesterday morning, according to Security Director Rex Rakow.

The 75-year-old victim, John McNamara, was in serious condition last night in the cardiac care unit at St. Joseph’s Medical Center, a nurse said. McNamara was visiting from California, said Rakow.

Araman helped bring McNamara back to life by administering cardiopulmonary resuscitation to the elderly man, who had collapsed and was showing no vital signs, Araman said.

"I’m not a doctor but I had to use the best skills I had," said Araman, who learned CPR in a police academy and takes a refresher course every two years at the University. "It was very pleasing to see that my training (as an officer) may have lengthened his life."

After receiving a call from the dispatch at approximately 9 a.m., Araman said he found McNamara collapsed in front of the Morris Inn.

Because the elderly man was not breathing and had no pulse, Araman immediately began CPR, he said. "The initial minutes were the most important," recalled Araman.

As Araman continued vigorously blowing air into the man’s lungs and compressing his chest, the 30-year-old officer spotted a maintenance man standing nearby. Araman said he told the maintenance man to check for any doctors in the dining room at the time. "He got the jackpot."

There were three doctors there, Araman said. The first of the three unidentified doctors arrived at Araman’s aid. He immediately began to feel a pulse and saw the

United States attacks Libya to pre-empt ‘terrorist actions

SMC fire damages art studio

By MARGE KERSTEN

An early-morning fire in Moreau Hall at St. Mary’s caused between $3,000 and $5,000 in damage. No injuries were reported; said Richard Chelock, St. Mary’s safety and security director.

St. Mary’s housekeeping director said the fire was extinguished by 7:23 a.m. according to security director Rex Rakow.

Other than the art studio, several rooms were damaged in the fire. The art studio was not damaged; however, the first floor of the building was damaged. The fire was caused by a smoking cigarette that was left on a couch, a light fixture, the couch, some shelves and two paintings were damaged in the fire.

The cause of the fire is deemed to be an unknown person.

The fire occurred in room 326 Moreau and was contained to that room, according to Chelock.

The room is an art studio used by four painting students, according to student assistant professor of art and art studio coordinator.

The art studio was warmed by a student, said the four art students who stood for the fire. All four had keys to the room. The fire did not spread.
Separation of work and pleasure is key to successful relationships

Do working relationships work? According to Time magazine, "Women make up nearly half of the U.S. Labor Force." Because a high percentage of women work, conditions that allow on-the-job romance to prosper are close to today's. Either directly or indirectly, the office relationship is an issue that all who are employed may face, from those with a part-time job to partners in a law firm. But how will you get involved?

Those who get involved will find it safe to say no. After all, dating someone at work creates a host of new problems for which few answers are based on experience.

According to the March issue of The Wall Street Journal, office relationships affect “productivity, turnover, promotions and morale.” Whether the relationship is common knowledge around the water cooler, any promotion in which an employee's partner is involved can be seen as a result of a show of favoritism. Promotions or terminations can be seen as the result of a romance gone awry.

For an affair at work are another drawback. People don't always respect those who let business and personal pleasures mix, and partners could lose credibility and be seen as unprofessional.

Ambitious co-workers are also a problem. Always ready to take advantage of the partner of the boss, these people would do anything to better their position, even if it means manipulating others to get to the top.

The relationship itself may suffer due to its work orientation. The couple is in constant competition, and dating often proves difficult to keep private and work lives separate. Competition between partners can cause conflict, and bringing office-related problems home, such as promotions, firings and differences over how projects should be handled can cause lines and easily end the liaison. Even when the relationship is over, the couple is still stuck together for regular occasions which can make working together very uncomfortable.

Yet, Fortune magazine says "office romances are on the rise. Everyone knows they don't seem to stop

Everyone knows they don't seem to stop dating someone at work. To everyone, an office romance may be worth the bother.

The sexes work together on projects as a team, complement each other's performances, and attend office events and parties, thus putting men and women in constant contact, and giving employees a chance to get to know each other. Teamwork improves special bonds, and appreciation of a fellow employee's expertise creates respect. All of these factors, as well as the fact that co-workers already have a lot in common—education, interests, abilities— increase the likelihood of a relationship developing.

The “office romance” may be a matter of convenience,” says the Wall Street Journal, especially for those who work 60 or 70 hours a week. Working long hours doesn't allow much time for a social life outside the office. This, along with the close contact in a working environment, and the natural desire for a romantic relationship, can make dating a fellow employee an ideal situation for some people.

A practice called "cloaking" by Psychology Today helps avoid the heavy bargaining and escalating expectations that attend office romances,” making it even easier to date a co-worker. Away from judgmental families, friends, and fellow employees, the "cloaking" or "sham" relationship behind what appears to be a regular business meeting allows for all to escape the usual routine, they can see each other fairly frequently and openly before unsuspecting eyes. This secrecy contributes to a feeling that the pair share something special—something that isn’t just between the two of them. This "specialness" can increase the intensity of the relationship, making it more important and possibly leading to something permanent.

Professionalism is the key to maintaining the office relationship. "Dating a co-worker has its disadvantages, but a very promising relationship can come of it. The couple need to separate their office and personal lives. They must maintain a friendship that copes before all else, agree to make office-related decisions independent of their personal feelings. If they can keep the affair out of the office, then they should go for it. If they can't, maybe they should find other positions. Jobs can be found elsewhere, but a good relationship is hard to find.”
Symposium keys on social teaching

By TIM CLARK

Authorities on Catholic social teaching are discussing the United States Catholic Bishops' letter on the economy as a symposium continuing today in the Center for Continuing Education. The symposium, "Catholic Social Teaching and the Common Good," is sponsored by the Notre Dame Center for Ethics and Religious Values in Business.

The conference stresses particularly the idea of the common good, according to Father Oliver Williams, co-convener of the symposium. Williams said while the common good is an ancient biblical notion, the bishops suggest a revival of the idea.

Following the introductory discussion yesterday, the speakers investigated the concerns of religious people and the ramifications of the common good in today's capitalistic business world.

"We tend to be very individualistic in today's business world, which isn't necessarily bad," said Williams. "However, we must begin to move toward more community-oriented values.

The bishops' "preferential option for the poor" will receive particular attention as an aspect of the common good, for as the gap between the poor and the rest of the nation widens, morality in business practices takes on increasing importance, according to co-convener Professor John Holuck.

"We must begin to consider issues such as the level of employment with regard to the young, disabled, and poor," Holuck said.

"The convention takes on particular importance now, at a time when the fundamentalist and neo-conservative positions seem well defined," he said. "Now we as the middle ground must establish the issues that we must belong on the social agenda, define the common good as a challenge and ask tough questions."

The results of the conference should affect the bishops' upcoming letter on the economy as well as stimulate thinking among the members of the business world, according to Williams.

"We have assembled a respected group of experts with a very wide range of influence who will have an impact on day-to-day religious and social thought," Williams said.

Yesterday's events were high- lighted by a BBC broadcast of the nation's priest Betty Jean Bullert's talk on the role of the media in promoting the common good. This week's event was covered Perspectives on the Common Good, and included ten humanities professors, according to Father Ralph McInerney from Notre Dame and Gar Alperovitz of the Center for Economic and Interven- tives in Washington D.C.

The college will continue the conference on Tuesday, April 15, 1986, with a discussion on "Theology and the Common Good," the schedule for which is as follows:

- 8:45 AM J. Phillip Vogel of the University of California, Berkeley
- 9:00 AM Father Theodore Wogaman of the Wesley Theological Seminary, Washington D.C.
- 9:15 AM John Houck, co-convener
- 10:00 AM Fr. Oliver Williams, co-convener
- 10:30 AM Senior Class President-elect Tom Switek
- 11:00 AM Patricia Alarcon of the Center for Economics and Interven- tives
- 11:30 AM Father John Holuck, co-convener
- 12:00 PM Professor Miklos Miklos of the College of Business at Notre Dame

Tonight's session will deal with "The Common Good and Contem- porary Practice," the schedule fol- lows:

- 8:45 AM J. Phillip Vogel of the University of California, Berkeley
- 9:00 AM John Houck
- 9:15 AM Father Theodore Wogaman
- 9:30 AM J. Phillip Williams, co-convener
- 10:00 AM J. Phillip Vogel
- 10:30 AM John Houck
- 11:00 AM Father Theodore Wogaman
- 11:30 AM John Houck

The students said the conference's potential importance, it will receive fairly heavy, national media attention. The conference is open to the public.

Senate goals addressed at meeting

By CHRIS BEDNARSKI

The "crayon" administration of Student Body President Mike Switek and Student Body Vice President Don Montanaro addressed the goals of the Student Senate at the first meeting of its term last night.

"The senate, as a whole, will address the campus-wide things and the smaller issues will be handled in the (senate) districts," Switek said.

District Two Senator John Gar­ dner said the senate needs to gain visibility. "I think we should put the (campus-wide) issues aside for a while and get some visibility so that people can relate to us," said Gardner.

Gardner suggested getting the senate involved in social activities.

District One Senator Brian Hobo disagreed with Gardner. "I don't think it's important to become visible," Hobo said, "as long as we get the job done."

"The Student Senate, in the past, whether it was their fault or not, has had a really bad image on campus," said Switek. "What we would like to do is make a strong effort to improve the image of the senate on campus."

Switek said he would like to make the senate "more leisurely," not using such things as Robert's Rules of Order.

The previous senate used Robert's Rules of Order to guide their par­liamentary procedure.

Hobo, although not specifically advocating the use of Robert's Rules of Order, said the senate needs some procedural rules. "I think it would be an advantage to have a set of rules to fall back on in certain situations," he said.

He cited an example in which some senate members would want to end debate while others want to continue it. He said the senate would need rules to govern this.

"I think it will limit controversy, not limit controversy," Hobo said. "I think there's a stigma with Robert's Rules of Order. It's a simple set of guidelines that I don't see how it could ever hurt us..." he added. "I don't see why we would need to have a set of rules that cover every situation."

Senior Class President-elect Dave Miklos disagreed with Hobo. "The student body president was brought in on a different image. To go right back to Robert's Rules of Order would be ridiculous," he said.

Senator Brian Hobo disagreed with Gardner. "I don't think it's important to become visible," Hobo said, "as long as we get the job done."

Libya

continued from page 1

According to the Pentagon, the first three sites in the above list are located around Tripoli. The latter two are located on the other side of the Gulf of Sidra near Benghazi.

Weinberger indicated the Air Force F-111's had been assigned to hit the targets around Tripoli, while the Navy attack jets concentrated on Benghazi.

The president said “evidence is now conclusive” that recent terrorist incidents had occurred on “orders sent from Tripoli.” He said intelligence had blocked one “planned massacre” involving the use of grenades and small arms to attack Americans waiting in line for visas in France.

Speakes would not discuss casualties or damage. He said “we took every precaution” to ensure that no civilians would be injured or killed.

Khadafy’s headquarters near Tripoli was among the targets of the American strike, which occurred at 2 a.m. Wednesday, Tripoli time.

Speakes briefing was telecast live on network news shows at 7:20 p.m.

man was breathing slightly. The other two physicians in the dining room then appeared on the scene, and the three doctors took over until the ambulance arrived moments later, Araman said.

The elderly man was taken to St. Joseph’s Medical Center, where Araman visited him 45 minutes later. “I took a peek at him, and he seems to be okay,” said Araman.

Despite his help in reviving McNamara, Araman seemed modest about his role in bringing a man back to life. “I’m not looking for glory or to be a hero,” he said. But, he admitted, “If I hadn’t done anything, he wouldn’t have lived.”

All Rise is hard core at its best

Music that is over done and watered down

Tom Ienney

The Toal Contrast's latest album, All Rise, is a record that pushes the American and British pop charts. This is a band that has been given much praise, and still provides more thrills per minute than any album released in the past six months. Take, for example, "Home of the Brave," the album's first cut. As soon as John Haggarty's opening power chords rip through the air and Eric Spicier's drums ignite this puppy, you can feel how exciting this album's music really is. But Pezzati, one of the coolest frontmen in the biz, sings a tale about people who may have suffered a little bit in the "Home of the Brave." Though lacking in lyrical complexity, the song is my favorite one here. With a tune as downright catchy as this, you can't argue.

Basically, All Rise is divided up into 1) the songs like "Home of the Brave," that snag your ear instantly and 2) the "bad-ass" songs like "Peacemaker" and "Mr. Geldrock," which threaten to kick your butt and then spit on you for good measure.

The first group of tunes, which includes the anti-trendy anthem "Backlash Jack," consists of the songs that cause Naked Raygun fans to go bookers, slamming into each other with much gusto. The second group lets the audience wallow knee-high in filth, down "The Strip" where there are "girls girls girls" and an "all-male revue," and finally to a visit with the "Peacemaker," who will unconventionally inform you, "I am the peacemaker ... you're scum, that is all." Naked Raygun's members actually are normal guys, even though some of their songs do depict the darker side of life. Many people find this message inspiring, in fact, because they show you how ridiculous that darker side can be - it's obvious that this peacemaker does not care about you.

In the LP's closing song, "New Dreams," Pezzati screams out "I got new dreams and I'm gonna make 'em real!" Naked Raygun generally doesn't go for any big political message or manifesto, but I guess you could take this to be their personal credo. Take it to heart, because this is one hell of an album.

Candy Apple Grey is golden indeed

Tom Brannigan

Husker Du has finally lived up to all its critical acclaim and put together a great album. Candy Apple Grey will only be the best album released this year. Lively, precise, it is the band's best work to date. In the past, Husker Du had always been a band of excess with too much distortion, too much speed and too much depression to achieve anything more than a cult following. The band had, however, established itself as dedicated musicians with plenty of potential. That was enough to get signed by Warner Bros., and although this album won't burn up the charts, it establishes Husker Du as one of the best American bands around today.

The first side opens with "Crystal" which never really gets on track, but from that point on the album is outstanding. Bob Mould and Grant Hart are the two creative forces behind the band and share the vocal responsibilities along with the production credit. Their lyrics deal with pain of some sort or another, whether it be broken relationships ("Don't Want to Know if You're Lonely"), difficulty in dealing with feelings ("I Don't Know for Sure"), depression ("Too Far Down"), death ("Hardly Getting Over It") and shallowness ("Tifflet Tower High").

The album is a regular compendium of the greater aspects of life, but it is the title points out, there is another side. The music, unlike some past Husker Du albums, is not a pain- ful grind of distortion. There is well crafted acoustic guitar, along with subtle keyboards and even papas vocals. The result is a musical mood that makes the graysness of the record not only listenable but meaningful.

The second side is a force in itself. The five songs are subtle and laid back in places, but always forceful and emotionally grabbing. On "No Promise Have I Made" Hart sings "If I could change my mind, what would it be for?" and "No promise have I made, Oh, but don't worry, Husker Du will work itself into a good scream, but it is well placed and not hurpered upon the listener. The result is a very even and consistent album with balanced highs and lows.

Obviously, a lot of time and thought went into the making of this album. Candy Apple Grey took four months to record. This comes from a group that recorded a double album in three days. Husker Du has definitely matured into a band to be reckoned with. This album is one of those that get better and better the more it is heard.
Students have duty to donate vital organs

The results of the 1985 survey of freshmen at private colleges show that Notre Dame students demonstrate a greater awareness of the death penalty than do first-year students at all private colleges across the nation (29.8 percent vs. 24.1 percent). These findings are consistent with previous surveys, which have indicated a deep-seated tradition of respect for life on the part of students at Notre Dame.

This week we will have another opportunity to demonstrate in dramatic fashion our concern for life, as the students for Organ Transplants conducts its first drive for signatures on organ donation pledge cards. Organized this year, the club is, to my knowledge, the first of its kind on any campus across the nation.

I regard it as entirely appropriate for such a movement to have its genesis here at Notre Dame. As students at a Roman Catholic university, we have a special duty to respect and cherish the sanctity of life. There can be no footprints under the Golden Dome. If we are involved in fatal accidents, we are more likely to become organ donors than are the population at large. The need for organ donors is greater than for the good of those of us who have come to Notre Dame to be, in the words of the late President Beskind, "fifth among the phalanx of great universities," we are prime candidates to become organ donors if we are involved in fatal accidents. The need for organ donors is greater than for the good of those of us who have come to Notre Dame to be, in the words of the late President Beskind, "fifth among the phalanx of great universities," we are prime candidates to become organ donors if we are involved in fatal accidents.

'Silliness' of protests need not occur at ND

Dear Editor:

I am writing in response to two articles which appeared on the front page of the April 11 Observer, which dealt with the senior Cut on the Senior Class. The article by Andrew Fena in the College of Arts and Letters.

The death rate for persons in our age group is low, but 56 percent of those deaths are caused by accidents. Realizing people from 24 to 24 age group have not lived long enough to be ravaged by the illnesses that afflict our elders, we are more likely to become organ donors if we are involved in fatal accidents.

The need for organs suitable for donation purposes is consequently high. Last summer I worked with the Transplant Foundation of New Jersey, one of the 120 organizations engaged in securing pledges of anatomical gifts and arranging the actual transplants. I will never forget the computer screen as it displayed the thousands of names of people awaiting organs throughout the United States. Awaiting was a bitter disappointment to those of us who have come to Notre Dame with the professed faith ideals with commensurate actions, or history will show that at a time when the University was challenged to respond in a Catholic manner to the grave injustices committed in South Africa, it chose for reason best known to itself, to support the kind of evil that Christ gave his life to eliminate.

Vandalism not solution to 'eyesore' memorial

Dear Editor:

If the War Memorial was not an eyesore, before it certainly is now. I guess we can blame the thoughtless individual(s) for doing us such a great favor. We can also thank them for the extra cost now involved in the clean-up of the structure.

I am not thrilled about "Stonehenge" either, but its vandalism is way out of line.

Quote of the day
Nonviolence: the best route to a peaceful society

As nonviolence a possible basis for the future of a nation, it is a question of a country like the United States? Or is it only a private escape route available to religious minorities who are protected by a majority willing to fight for their lives?

Michael Froning

Overseas

Not long ago, I had this question posed to me in CAMP course and gave the following response:

Not only is nonviolence a possible basis for foreign policy, it is the most logical route toward the peaceful society that all humans desire. It is only one logical route policies that the world will achieve peace. As long as violent men are used, we can only attain violent results.

Unfortunately, my defense of this position is already set back twice by the wording of the above question. To make an affirmative defense of my position difficult, the question is structured to do two things: to make nonviolent a practical issue rather than a moral one, and to imply that the reader is directly stating that believers in nonviolence need someone else to fight for them.

Fortunately, both setbacks are easily remedied. Nonviolence is not a practical issue, it is a moral one. The issue is whether we will choose violent or nonviolent ways of thinking. Obviously, violence is morally wrong, and the killing of human beings is morally evil. To demean this, I would like to present two quotations: the first by Leszek Pekala, the second by Maharishi.

"Violence is a habit, a conditioned response to aggression. It is not something that can be eradicated by elimination of the stimulus or the conditioned reflex. It is something that requires its own conditioned reflex. In the end, violence is not a solution to any problem."

"A nonviolent person is committed to a world that is fundamentally nonviolent. To a world that is fundamentally nonviolent is not a question of what we do, but a question of what we are."

Admittedly, nonviolent policies are difficult to adhere to in a violent world, but should we be practical we do not have to. Nonviolence is not a fact but an attitude. The intention of the fast is to make nonviolent policies not just feasible, but mandatory. If nonviolence is the most practical way to achieve peace, it is also the best.

The quotation also makes us believe that nonviolent people don't fight, and while this is true in the purely physical sense, this is not enough. For something to be nonviolent, it must be completely nonviolent. To be truly nonviolent people, they must fight for their lives and surrendering. As Freeman Dyson said, "Nonviolent resistance is not only a form of protest (they are at opposite poles). Nonviolent resistance implies fighting, but with nonviolent methods. The question is, does nonviolence work? It need not only give you three examples to show that not only nonviolent but that it sometimes works with astounding quickness.

The first example is that of Mohandas Gandhi. In only 30 years, he was able to do what no man before him could without violent means. Liberate a country from its foreign occupant. Gandhi, of course, was an extraordinary man. His ability to keep his followers on the nonviolent path was indeed remarkable, but it was not just his personality that freed India. It was his unwavering commitment to nonviolent resistance, no matter what failures and setbacks had first occurred, which saw his nonviolent through to its successful end.

The next example is the one of Andre Trocme and the little French village of Le Chambon during World War II. Trocme was an ordinary priest in a little town about to be overrun by the German. Instead of supporting a violent resistance, he prepared his town for a nonviolent resistance. To make a long story short, this stance kept the village from being annihilation by the Germans. For the remainder of the war the vil-

ager were able to help the French Resistance and many Jews. The point being, it doesn't necessarily take a charismatic leader to make nonviolent work. Rather, if there is enough encouragement to the nonviolent path, peaceful achievement of goals is inevitable. William Friedl said it best, albeit negatively, "If mankind had wished for what is right, they might have had it long ago."

Finally, there is the obvious example of Mar-

tin Luther King Jr. Dealingly the most charac-

teristic and moving speaker in American history. King was one of the major forces in the Civil Rights movement in the 60s. His orga-
nization of nonviolent process and marches had probably had the single most profound impact on the development of Civil Rights legislation in the United States. In a single decade of nonviolent resistance, Martin Luther King ac-

complished what no other group, church or political party had done in the history of the world. He won legal equality for blacks, and all other minorities in a country where they had never been previously denied all civil rights.

It is clear that nonviolence can and does work. The question is, does the world have what it takes to adopt nonviolent methods as the status quo? I believe all human beings have the desire and capability to adopt nonviolent policies. If people want nonviolence to work, it will. But it won't just happen overnight. We, who have the choice between violence and nonviolence must choose the path of nonviolence and begin to set examples for others. The sooner someone takes that first step, the sooner the last step will be taken. As Shaw said, "Some men see things as they are and say why! But I see things that never were and say why not!"

Sculpture vandalism ruined hours of work

Dear Editor:

For weeks and weeks, we watched our friend Mike Holman enthusiastically work on a stolid porcelain ceramic sculpture, which was an extension of his fish motif year-long project.

On April 1, 1966, finally completed, the mosaic sculpture was installed on the front lawn of Athletic Hall. We were delighted to see Mike's ideas and hours of hard work actually materialize as we were now able to better admire the result of the enjoyment of all.

On April 5, 1966, the sculpture was found smashed to bits, 400 pounds of it having mysteriously been tipped over in the early hours of the morning.

Van Rensburg's fast not a 'hunger strike'

Dear Editor:

On behalf of the Anti-Apartheid Network, I would like to commend Trapp Baltz on his fine coverage of the Colorado Springs performance of the last unt-

er taken by Dr. Van Rensburg. Baltz, surpassed his colleagues from the national news services and city papers as the only reporter covering the event to glean the deep significance of Dr. Rensburg's statement. In his ar-

tle, Baltz clearly noted the divide-

ment by a majority willing to fight for their lives. The center of this division was the action of the sculpture itself.

Van Rensburg's fast not a 'hunger strike'

Guatemala more than 100,000 people were chosen to be denounced. To 30 years, the regime in Chile was just one long nightmare for the Chileans.

Was it really democracy we wanted to restore? Circumstances in these cases clearly indicate different motives. Economic inter-

ests and American hegemony in Latin America were the driving force in overthrowing these governments. Independent governments which could turn away from Big Brother U.S. we are perceived as a threat to our national security (whatever that is and whoever defines the enemy). We are more interested in having "friendly" governments and training their police and army forces in counterinsurgency. Never mind that these "friendly" governments are using death squads to silence any internal opposition or that they bomb their own civilians (as in the case of El Salvador) to clear the path for free fire zones.

Main concensus were democratic values it would also imply a freedom for these countries to decide whether they want the United States as a close ally or not - even if they are the independent of the United States. After all, for decades we have sup-

orted the worst human rights abusers and most anti-democratic forces in Latin America. Therefore, we should not be surprised if Latin American countries that got the support of the United States are not exactly in love with our govern-

ments.

Unfortunately it looks like we did not learn from the past. Our "Contrato" or "Freedom package" as some people prefer to call them are already well known for terrorizing, tortur-

ing and killing children, women and other in-

nocent civilians. (Obviously, I do not think much of Reagan's latest gimmick that it is the top 30 percent that are the criminals who do this. For years the human rights organizations have pointed out the atrocities committed by the Contrato.)

Poor Nicaragua - so far from God and so close to the U.S.

 sclerosis semifinals, and the Montreal Canadiens...
Sophomore steeplechaser Mulvey finds life in fast lane

By ED JORDANICH
Sports Writer

For Notre Dame steeplechaser Rick Mulvey, it is amazing how times have changed.

Going from a runner at a Wisconsin high school which graduated 92 seniors to the number one steeplechase distance, Mulvey earned a full ride scholarship to Notre Dame. Mulvey’s dedication to running has resulted in a progressive improvement of times in both the 3,000-meter steeplechase and the 1,500-meter, which he normally runs as part of a relay team for Joe Plane’s track unit.

Through a combination of Plane’s interest in him and his own desire to come to Notre Dame, Mulvey arrived at Notre Dame in the fall of 1986. His expectations were modest, but when the cross-country and indoor seasons ended and the spring outdoor team began practice, he knew he was improving.

“The key was and is the really good runners I train with,” said Mulvey. “I always run better when the competition is better and I had all I could handle everyday in practice. I was doing new workouts, more distance and being exposed to a higher caliber of coaching than ever before.”

The first breakthrough for Mulvey came during last year’s Drake Relays in which his 4:12 mile split beat his personal best by nine seconds. A 3:51 time in the 1,500-meter at the season showed even more improvement and set the stage for an incredible summer.

After competing in the steeplechase a few times during his freshman outdoor season, Mulvey went to the University of Illinois where he qualified for the Junior National by finishing second with a time of 9:15 in the steeplechase.

As a member of the Junior National Team, he trained for two months before traveling to Washington State University and the University of British Columbia in Canada for two track meets against the best 19 and under runners from Canada, Japan, and Mexico.

Mulvey finished second to a Mexican runner at WSI and won the race at British Columbia, setting an American record for the 2000-meter steeplechase in the process. It was an effort that ranked him seventh in the world.

“This was one of the best experiences I’ve had in running,” said Mulvey. “Not just in regards to track, but the people, the level of competition, and the confidence it gave me in my relatively new event, has been invaluable to me.”

At Notre Dame, Mulvey runs the 3,000-meter steeplechase, which is the more popular steeplechase event in America. His success has continued this year with a recent win at Indiana University.

“Rick came here with mediocre credentials and has done the little things to produce outstanding improvement and results,” said Plane. “Some people have a surface desire to do well, but aren’t all that willing to pay the price. Rick’s desire is fanatical and his dedication to perform well is very sincere.”

“His still has to have better consistency and speed and I think he will because of his record of progress thus far. He’s really come from nowhere, and as he gains maturity and experience, we’ll see more good things from Rick.”

Mulvey, who attributes much of his improvement to being pushed by fellow runners like Zahn Hall roommate Dan Garrett, is eying the future and NCAA and NCAA qualifying times carefully.

“I still believe I can run much better,” he said. “9:12 is the NCAA time and the NCAA’s in 8:45. As long as I keep revelling in goals and gaining confidence on the track, I’d like to think these times are within my reach.”

While many boast about the last place times. I have become overwhelmed by the suddenness of their achievements, Rick plane’s dedication has raised him into a successful lane he can occupy for quite a while.

Thanks to you... it works... for ALL OF US

UNIVERSITY OF NOTRE DAME COLLEGE OF BUSINESS ADMINISTRATION THE O’NEILL LECTURE SERIES

SPEAKER: Dr. Koji Taira, Professor of Economics, Institute of Labor and Industrial relations, University of Illinois at Urbana-Champaign.

Topic: "Collective Bargaining Compared: Japan and The United States"

date: Thursday, April 17, 1986

time and place: 12:pm, faculty seminar board room, Hayes-Healy building. All members of the University of Notre Dame faculty are invited.

Professor Taira was formerly a member of the faculty at the University of Washington and Stanford University receiving his Ph.D from the latter. He has also worked as a Member of the Economic Division of the International Labor Office.

Irish

continued from page 12

Once again, Purdue and Indiana will provide the toughest competition for the Irish as they vie for a spot in the top three among the field of ten schools.

"Purdue won the Indiana inter-collegiate Indoor Championship so they would have to be our favorite," said Plane. "Indiana also finished ahead of us and we barely edged out Indiana State so it will be tough for us to reach our goal of finishing in the top three."
**Tough luck hurts Volleyball Club in MIVA tournament**

By MARY STRASEN

Tough luck hurt the Volleyball Club in the MIVA A tournament this past weekend. A combination of circumstances led to the club’s elimination in the semifinal round.

Notre Dame was forced to forfeit its first game to Michigan after arriving late as a result of hotel troubles. The team rebounded, however, to easily defeat Toledo (15-2, 15-10) and Northern Illinois (15-6, 15-6).

A foul-up in the pairings resulted in top three seeds having to play each other before the finals. In the quarterfinals, the Irish defeated number three seed Ohio University 15-5, 15-10. Then in the semifinals, they lost to Wisconsin, 15-11, 15-10.

But the most damaging news to emerge from this tournament, middle blocker Mark Trautmann and setter Geoff Westrich were both banned from the all-MIVA tournament team.

In his first season as coach of the Irish, Bill Anderson was named Coach of the Year. In the club’s last regular-season match last Tuesday, IUPU-Fort Wayne dumped Notre Dame in three straight.

At this point, the team is 9-5 and 1st in the MIVA.

The Sailing Club has been keeping everyone in the club busy lately. Before the break the newcomers saw action in the freshwater regatta hosted by Notre Dame. The Irish placed second out of six teams.

Two weekends ago the team took fifth place in the 15-team Miami (Ohio) regatta. Then last week part of the team took part in a clinic at Ohio State, while several others raced in the Michigan State regatta.

This weekend the team will return to Ohio State for a regatta.

The Women’s Track Club took ninth place in the Big-I state Invitational this past weekend. Julia Mertel placed second in the 1500 meter run and piled in the 3000 meter run with times of 4:47 and 10:44 respectively. Jeanné Lester placed fourth in the javelin with a toss of 93-11, and Laura Gidley finished sixth in the long jump with a 15-6.

Finally, the club sport to catch this weekend is the Women’s Soccer Club’s Fifth Annual Irish Invitational. The field is the biggest in the league featuring Indiana Marquette, and Purdue. The action starts at 10 a.m. behind Neper Center, and runs all afternoon.

Forbes keeps Db’s loose and ready

FORBES, one of the new additions to the Irish coaching staff under Lou Holtz, takes over the defensive backfield as defensive coordinator at the University of Notre Dame.

"As defensive coordinator you have to create an atmosphere in all positions in the defense," he says. "I enjoy being able to tune in to the defensive backs (at Notre Dame) and with them every day. It gives me a better appreciation for the work that is being done on the field.

"The most enjoyable experience of my new position is not hard to notice at a practice or scrimmage. He sees aggressiveness as a key ingredient for success in the 1986 campaign and in carrying forward his role to his best to bring an aggressive, enthusiastic attitude onto the field every day.

"I think you need a great base for what you’re going to teach and that’s what we are working on in the spring," says Forbes. "We started from the ground floor and we’re going to continue building. We definitely have some talented players to work with.

"We had to start from the bottom and build up. If you are going to work with the fundamentals, you are going to build on the fundamentals. Making the transition a little easier for Forbes is a squad of veteran defensive backs who have proven themselves last season. Returning starters for the Irish include senior Mike Haywood and juniors Steve Lawrence and Troy Wilson. With junior Marc Spence and sophomore Brandi Wells both looking for starting spots, there is sure to be some experience on the field in 1986."

Storms douse players in Bookstore Round 2

By MIKE CARDINALE
Sports Writer

Inclement weather conditions dominated action yesterday as Bookstore Basketball Round 2 was in its second round.

The downpour during the first of the 4:15 p.m. and 4:15 p.m. games flooded entrances, making scores difficult to keep. Most field-goal attempts, as Bookstore BBQ romped to a 1-10 victory. Yet he was quick to point out the impact of the weather.

"We had a few tricks up our sleeve that we couldn't use because of the weather," lamented Sullivan. "It was then that we realized we couldn't win." Sullivan could only score on two of his nine field-goal attempts, as Bookstore BBQ romped to a 1-10 victory. Yet he was quick to point out the impact of the weather.

"We had a few tricks up our sleeve that we couldn't use because of the weather," lamented Sullivan. "It was then that we realized we couldn't win.

Junior Jeff Van Wie qualified for the NCAA Championships in the 800-meter race with a time of 1:49.78. Several other Irish runners, however, also performed well in the same event. Junior Robert Nobles ran a time identical to Van Wie's, while senior co-captain John McNelis turned in a time of 1:50.70 and freshman Dave Warth was clocked at 1:52.50.

In other events senior Jim Tyler demonstrated a strong effort. The sprinter performed well in the 400-meter race. Dadamio turned in stellar performances for the winners.

Most notable was the performance of sophomore John Dadamio in the 800-meter race. Dadamio participated in his first event of the season after sitting out with an injury, and took fourth place with a time of 1:55.2.

The Irish javelin corps also demonstrated a strong effort. The freshman trio of Chuck Curley, John Eustermann and Mike Napier posted marks of 166.8 feet, 166.6 feet, and 159.9 feet respectively.

In both scoring margin at 150 and field-goal percentage at 50.2.

Senior forward Trena Keys was named the Outstanding Defensive Player. With 205 assists this season, Keys had the all-time high of 421. Garin also was named second team all-SJC, and ranked sixth in the nation in field goal percentage at 63.5. Botham scored in double figures in 19 straight games and averaged 15.4 points a game and 7.5 rebounds in that stretch.

The Irish jirden corps also demonstrated a strong effort. The freshman trio of Chuck Curley, John Eustermann and Mike Napier posted marks of 166.8 feet, 166.6 feet, and 159.9 feet respectively.
