CD. Honesto Isleta, an armed forces spokesman, said the rebels were led by Col. Gregorio Honasan, security chief, Juan Ponce Enrile, whom Mrs. Aquino fired as defense minister after another coup last November.

Fighting raged for hours following the pre-dawn uprising by truckloads of soldiers near the palace and government broadcast center in suburban Quezon City.

The attacks occurred one day after militant leftist unionists began the biggest strike of Mrs. Aquino’s administration.

Honorata told reporters before he and some of his men managed to enter Armed Forces headquarters that the operation was aimed at "unification of the people, the concept of justice and true freedom" and claimed it was not a military coup.

“All we are fighting for is the children, our children and the children of the people," Honasan said.

Gen. Pidel Ramos, the chief of staff, said about 300 men attacked at 1 a.m. and there were propaganda broadcasts supporting the mutineers and Ramos, who has put down other coup attempts, said he remains loyal to Mrs. Aquino.

The telephones of Enrile and his spokesman Sylvestre Abofe were not ringing.

Mrs. Aquino’s government has weathered several coup attempts and conspiracies since Marcos fled Feb. 26, 1986. She said she would reflect the Cabinet for a special meeting Friday and cancel a planned trip to central Mindanao, the archipelago’s main island.

Marcos said, “We are not involved and there is no need for us to be involved in the Philippine situation. The people are desperate, hungry, sick and frustrated and are beginning to realize there is widespread hypocrisy, arrogance, tyranny, disregard for human rights and senility.”

Thomas Gomez, the Philip- pine consul general in Hawaii, said he believed the former president was directly involved but gave no evidence.

**Student government plans for Malloy’s upcoming inauguration**

**By LYNNE R. STRAND**

**Staff Reporter**

“A lot of people are anticipat- ing the soundwaves Father Malloy will make” in his inauguration speech on Wednesday, Sept. 23, said Student Body President Pat Cooke.

University President Father Edward Malloy said he will give his “first, major presenta- tion after assuming the presidency” when speaking at his inauguration’s academic convocation.

Malloy, who assumed office on June 1, noted that “in an of- ficial way, the inauguration ad- dress will give an official vision of the University.” The President said he would indi-

cate his presidential goals in the "vision statement.”

Cooke offered his ideas of what Malloy may say in his speech. "He (Malloy) may talk about where he would like to take the University and see it go," the Notre Dame of the 90’s.

"Malloy will put a new em- phasis on research at Notre Dame which has been known primarily as an undergraduate university. He’ll want to make our graduate programs more attractive. Other schools are known for their graduate pro- grams, while Notre Dame is known worldwide as an under- graduate school. Malloy will take Notre Dame in a new di- rection.

"He has the wisdom, under- standing, and knowledge of doing the job. Though Notre Dame is known as great, the job is not done and Malloy’s there to do the job.

Noting that Malloy’s speech will have a big impact on the University, Cooke added that "the sheer fact that what he has to say will be reported widely in the media shows that his inauguration is very impor- tant.

"Father Malloy is at the helm now. Father Hesburgh left Malloy with a wealth of re- sources. The changing of the guard, the transition of Hes- burgh to Malloy does not take anything away from Notre Dame. Hesburgh only left a lot and it’s up to Malloy (to do) what he wants ... with it.”

Cooke, along with Student Body Vice-President Laurie Bink, is a student on a 19-person plane that has planned the inauguration since March. Classes are cancelled and the Hesburgh Library is closed from 2 p.m. on Sept. 23 in honor of Malloy’s in- auguration. A 10 a.m. mass will begin the ceremonies in the Joyce ACC, with an academic convocation beginning at 2:15 p.m. at the Hesburgh Library 

Cooke characterized the class day off as “very unus- ual.” Student Government will send inauguration day invita- tions to all students.

**Atempted coup in Philippines**

**Associated Press**

MANILA, Philippines - At least nine people were killed and 94 wounded when mutinous troops attacked the presiden- tial palace compound early Friday in an attempt to over- throw the 16-month-old govern- ment of President Corazon Aquino. She was safe and ap- pealed for calm.

Red tracer bullets cris- scrum early morning attack at the palace. Heavily armed sol- diers, backed by armored vehicles, sealed off the area and turned reporters away at gunpoint.

Col. Horacio Isleta, an armed forces spokesman, said the rebels were led by Col. Gregorio Honasan, security chief, Juan Ponce Enrile, whom Mrs. Aquino fired as defense minister after another coup last November.

Fighting raged for hours following the pre-dawn uprising by truckloads of soldiers near the palace and government broadcast center in suburban Quezon City.

The attacks occurred one day after militant leftist unionists began the biggest strike of Mrs. Aquino’s administration.

Honorata told reporters before he and some of his men managed to enter Armed Forces headquarters that the operation was aimed at “unification of the people, the concept of justice and true freedom” and claimed it was not a military coup.

“All we are fighting for is the children, our children and the children of the people,” Honasan said.

Gen. Pidel Ramos, the chief of staff, said about 300 men attacked at 1 a.m. and there were propaganda broadcasts supporting the mutineers and Enrile. Ramos, who has put down other coup attempts, said he remains loyal to Mrs. Aquino.

The telephones of Enrile and his spokesman Sylvestre Abofe were not ringing.

Mrs. Aquino’s government has weathered several coup at- tempts and conspiracies since Marcos fled Feb. 26, 1986. She said she would reflect the Cabinet for a special meeting Friday and cancel a planned trip to central Mindanao, the archipelago’s main island.

Marcos said, “We are not in- volved and there is no need for us to be involved in the Philip- pine situation. The people are desperate, hungry, sick and frustrated and are beginning to realize there is widespread hypocrisy, arrogance, tyranny, disregard for human rights and senility.”

**ND Security to ticket**

By KENDRA LEE MOR- RIS

**Staff Reporter**

In an effort to increase pedestrian and traffic safety along the roads surrounding the Notre Dame campus, Notre Dame security officers are now permitted to issue citations directly to traffic violators.

According to Director of Security Rex Rakow, the new ticketing procedure went into affect on June 1, 1987, had been mutually sought by both the county prosecutor’s office and Notre Dame security.

The accidents that have taken place over the past

**SECURITY, page 7**
Delivering pizzas is hard work for the dough

"Hey, pizza man! Got an extra?"

This is the time of year that pizza sales in South Bend (and everywhere) are at an all-time high. Pizza delivery students are discovering the delights of the Dining Hall and the meat burritos at "Mexicana, Ltd." just don't fill the tummy like Mom's homemade pizza used to. And how long can one live on stale Pop-Tarts and an occasional bag of popcorn?

Of course, we all have to deal with the pizza man to get our pizza. Snicker a little bit as the Domino's guy runs to the door. Give him a hard time about the 30-minute guarantee. Tip? What tip?

But have you ever tried delivering pizza? I am proud to say that I am a pizza man, after two stints at Domino's and the ever-popular Red Bank Pizza, which delivers pizzas to Bruce Springsteen, among other people. I bet you think the job's a piece of cake, right?

All the free pizza you can eat, right? Sit around a lot, right? Wrong.

The weirdest things happen to pizza men. Like the time I was called to the intensive care ward at the local hospital. I walked into the room, pizza in hand, and the patient offered me a joint. "Hey, how's about getting me a six-pack? I give you some reefer, man." Unfortunately, I wasn't 21 at the time.

One time I had a 25 pizza order to an elementary school. They said they wanted to feed their classes pizza, for Arbor Day or something like that. So I stuffed my poor little Toyota full of pizza and drove off to the school, only to be told, "We've changed our mind. We don't want any pizza." What do you do? For pizza drivers can polish off the occasional bad order, but 25 pizzas?

We had someone calling himself "Allah" come in and order pizza once. He promptly started a gang war out in front of the store. He didn't get his pizza.

Of course, there's the usual assortment of attack-trained Saint Bernards, houses with no house numbers, drunk parties, and couples fresh out of bed who show up at the door in towels and bathrobes. Not to mention the absolute idiots on the road who drive less than ten above the local speed limit. Don't they realize that starving people are waiting for their hot pizza? Not to mention the starving driver waiting for a tip that may never arrive.

The local police, strangely enough, are more a help than a problem. They don't want to see us speeding through the local roads, though that might happen to do with the fact that most of us have fuzzbuckets and the cops get free pizza. And when you're carrying a couple of hundred dollars in accumulated cash on you and your car breaks down in front of a burned-out high school at 11:00 at night, they are awfully nice to have around.

It is definitely a male profession, for precisely that reason. Sexist that may be, but would you ladies really want to deliver to the Pine Tree Liquor Store? Truck Stop at 2:30 a.m.?

It really is a good job, though, or else I wouldn't have gone back. The money is good, around ten dollars an hour if you're fast. It's definitely a challenge, especially when there's four pizzas on the rack with eleven minutes to deliver them all. If you're good, you'll make it. The not very good ones don't last long. With the first driver back getting his pick of the next run, the bad guys don't last too long.

So the next time you order pizza, give the guy a break. He has to wear polyester. He has to run to the door. And he has to make an honest buck. Pizza men make horrendous flat pay - minimum wage, usually. Their tips are their bread and butter. It's a real drag to drive like a madman through traffic and run halfway across a campus full of college students laughing at you only to get no tip. What's a buck on top of a ten dollar pizza? Be generous. Or next time he might drop your pizza.

Delivering pizzas is hard work for the dough.

Shuttle booster test aborted, delayed

Associated Press

BRIGHAM City, Utah - A critical full-scale test of the new space shuttle booster rocket engine was scrubbed Thursday after a series of delays including two final countdowns halted with less than 15 seconds to go.

Officials of Morton Thiokol Inc., manufacturer of the rocket, said the test firing would be postponed until 1 p.m. Saturday.

The 1.2 million-pound rocket was scheduled to burn for about two minutes in a ground test of four redesigned joints in its steel hull, changes in redesign that are expected to correct the flaws that caused the Challenger accident.

The redesigned rocket has been tested in sub-scale firing, but Thursday's test was to have been the first involving the full 126-foot rocket booster.

National Aeronautics and Space Administration officials said the test is the most critical yet of the rocket booster redesign program.

None of the series of delays of the test was associated with the test itself. All involved computers or other equipment associated with the test stand, a plateau cut out on a Utah hillside.

When the third attempt reached the 15-second point, test coordinator Roger Williams of Morton Thiokol Inc. counted down the firing test to within seconds, then announced the test had been aborted.

With more than 500 VIP guests watching, technicians from Morton Thiokol Inc. failed. An 8-inch water line sprung a leak, said Morton Thiokol spokesman Roland Raab. The water is used to cool the booster redesign program.

Shuttle program director Richard Truly visited the technicians' bunker during the final countdown and told journalists later that he had told technicians that if there was another problem, that the firing attempt should be scrubbed for the day.

That problem occurred at 12:57 p.m.

In the first incident, officials said, a cooling system that is part of the horizontal test stand failed. An 8-inch water line sprung a leak, said Morton Thiokol spokesman Roland Raab. The water is used to cool the booster redesign program.

The University of Notre Dame has set a record for outside funding of research, equipment, and programs in fiscal year 1986-1987, according to Dr. Robert Gordon, vice president for advanced studies.

The University received $30,497,016 from July 1, 1986 to June 30, 1987, eclipsing the 1984-85 mark of $16,324,900 and increasing by 45 percent the 1985-86 figure of $14,714,079.

Research support, primarily from the federal government, accounted for $17,858,232. Other categories were facilities and equipment, $357,632; instructional programs, $267,752; service programs, $309,087 and other programs, $1,091,293.

Research funding has shown the best growth over the last two years, while funding in other areas has suffered from federal cutbacks, Gordon said.

Gordon attributed the new funding record to increasing quality of the faculty and emphatic support for research and graduate education at the University. He noted that post-doctoral students at Notre Dame had doubled over the past five years. About 40 percent of funding proposals submitted by Notre Dame faculty are funded, he said, terming that figure a competitive one. Gordon said the improvement also reflected the goals set forth in the 1982 Priorities and Commitments for Excellence (PACE) Report. That report recommended that the University achieve a ranking in the top 20th percentile in faculty salaries, a goal that has been reached, and that standards for promotion and tenure be raised gradually but steadily.

The University of Notre Dame's Institute for International Peace Studies will offer an interdisciplinary master of arts degree in peace studies beginning this fall.

According to Robert Johansen, the Institute's director of graduate studies, Notre Dame's peace studies graduate program will be the first of its kind in the United States. "It is a challenge to create at Notre Dame a model program for this fledgling field," Johansen said. "Of course, we are drawing upon the valuable experience gained in the recent growth of peace studies at many liberal arts colleges and at other graduate schools offering less comprehensive programs."

The new peace studies program will offer four areas of concentration for graduate study: international peace and world order; cultural, philosophical, and religious dimensions of peacemaking, justice and respect for human rights; conflict resolution and dispute settlement; and social change for peace, justice and human rights.

Among the first candidates for the master of arts degree in peace studies will be fifteen students from nine countries who will arrive at Notre Dame next month to inaugurate the Institute's International Scholars Program.

Peacemaking: concepts, models and practices, and human rights are among the key topics in the Institute's International Scholars Program.

Conceived by Rev. Theodore M. Hesburgh, C.S.C., president emeritus of Notre Dame and chairman of the Institute's advisory board, the International Scholars Program will include advanced graduate students from the Soviet Union, three from the People's Republic of China and one each from Japan, Great Britain, France, India, Africa and Latin America. The students will live and work together at Notre Dame during a year-long effort to accomplish an understanding of and an agreement about the sort of world they would like to live in.

Outside support sets new ND funding record

Points of Interest

As most students have done at least once, Joel Williams and Patrick Monaghan page through the "dogbook" in search of interesting classmates.
NORTH DINING HALL EXPANSION
UNIVERSITY OF NOTRE DAME
NOTRE DAME, INDIANA

This project will take two years to complete because the dining hall must continue to operate in segments during the school year and close totally during the summer and breaks. At the conclusion of this project, you will have a fully renovated facility with 500 additional seating spaces, two private dining spaces for 100 with fireplaces, cathedral ceilings, double level dining areas, facing the quads with many window seats, all new fry stations on the line. Dining rooms will be aesthetically uplifted with carpeted floors, wall and ceiling treatments.

ADVISORY:
Some of the North Quad Dorms will be asked to use South Dining Hall during construction to avoid long lines at North Dining Hall.

Check Dining Operating Hours and try to avoid the traditional rush hours.

The University and Contractors will work to make this project as painless as possible.

Poindexter seeks to retire with respect

Associated Press

WASHINGTON - Former National Security Adviser John Poindexter has asked to retire from the Navy, wanting to leave "with his head held high" and before any Iran-Contra indictments are returned, a friend said Thursday.

Poindexter requested that he be allowed to retire at the rank of vice admiral, which he held while working at the White House, rather than the rear admiral's rank he was reduced to upon leaving his post when details of the Iran-Contra affair were disclosed last November, Pentagon sources said.

Such a request would have to be approved by President Reagan and then confirmed by the Senate.

During the congressional hearings to investigate the affair, Poindexter testified he kept Reagan in the dark about the diversion of Iranian arms sales profits to the U.S.-backed Nicaraguan Contra guerrillas. He also said he destroyed a presidential document authorizing the Iranian arms sales as a weapons-for-hostages transaction, fearing political embarrassment if it should become public.

Retired Adm. Clarence "Mark" Hill Jr., a friend of Poindexter's and trustee of his legal defense fund, said Poindexter wanted to leave the service before Iran-Contra Independent Counsel Lawrence Walsh obtains grand jury indictments, which Hill said he expected would name Poindexter.

"He said he left the hearings with his head held high," Hill said of Poindexter. "He's in the position to do that from the Navy now... I think it makes good sense."

Hill also said Poindexter faced an "extremely difficult" prospect of trying to win a Navy job carrying three-star vice admiral status now, given his role in the affair and the possibility Senate members could block his appointment.

Poindexter has no job lined up and will probably spend a year or so before deciding what sort of work he wants to pursue, Hill said.

The Navy refused to discuss the matter in any detail Thursday, but did confirm that "Adm. Poindexter has announced his intention to retire from the Navy." Poindexter has no job lined up and will probably spend a year or so before deciding what sort of work he wants to pursue, Hill said.

Promotions and honors for ND faculty members

Ten University of Notre Dame faculty members with a total of 27 years of service were promoted to emeritus status at the annual President’s dinner for the faculty Tuesday (May 19) on campus.

Rev. Theodore M. Hesburgh, C.S.C., who retired as Notre Dame’s president May 31, named the ten: Charles Allen, Materials Science and Engineering; Adam Arnold, Jr., Finance; Frederick Beckman, Art, Art History and Design; Joseph Hogan, Electrical and Computer Engineering; Robert McIntosh, Biological Sciences; John Mihelich, Physics; Peter Thornton, Law School; Joseph Tihen, Biological Sciences; Harold Westman, Economics, and Bernard Westman, Biological Sciences.

Three faculty members were honored for 25 years of service: Timothy O’Meara, Kenna professor of Mathematics and Provost; Karamat Rai, professor of Biological Sciences, and Albin Szewczyk, professor and chair of Aerospace and Mechanical Engineering.

Other promotions announced included: professor to endowed chairs: Yusaku Furushashi, Ray W. and Kenneth Herrick Professor of Business Administration; John Gilligan, George Shuster University Professor; Anthony Michel, Frank Freimann Professor of Engineering, and Robert Schuler, John Zahm, C.S.C., Professor of Radiation Chemistry.

Five were promoted to full professor—John Duman, Biological Sciences; George Howard, Psychology; Kwan Kim, Economics; David Riech, Accountancy, and Daniel Sheerin, Modern and Classical Languages.

Eighteen were advanced to associate professor and ten: Barbara Allen, American Studies; David Betson, Economics; Bruce Bunker, Physics; Karen Buranskas, Music; Craig Craymer, Music; Joanne Day, Psychology; Aron Edidin, Philosophy; Unesh Garg, Physics; Robert Howland, Aerospace and Mechanical Engineering; Yib Fang Huang, Electrical and Computer Engineering; Mark Liberman, Program of Liberal Studies; Catherine La Cugna, Theology; Thomas Morris, Psychology; Ruth Neu, Psychology; Idalde Newton, Accounting; and William O’Rourke, English; Robert Schmuhl, American Studies; Jennifer Warmick, Economics, and Stephen Watson, Philosophy.

Four associate professors were given tenure: Michael Betlesien, Philosophy; Patrick Dunn, Aerospace and Mechanical Engineering; Carol Mooney, Law School, and Patricia O’Hara, Law School. Promoted to associate provost were Isabel Charles and Sister John Miriam Jones, S.C.

Promoted to associate dean in the College of Science were John Duman and John Konaski.

Advanced to associate faculty fellow were Jadwiga Piekarz, Physics, and Bernard Treah, Biological Sciences.

Advanced to associate philosopher were G. Margaret Porter and Michael Slinger.

Linda-Margaret Hunt was advanced to professional specialist in Biological Sciences, and four others to associate professional specialist: Angie Ricks Chamblee, Freshman Year of Studies; Sister Regina Coll, C.S.J., Theology; Joseph Dume, Program of Liberal Studies; Catherine La Cugna, Theology; Thomas Morris, Psychology; and Terrence Retting, Physics.

Michele Gelfman was promoted to assistant professional specialist, Physical Education.

South African miners fired

Associated Press

JOHANNESBURG, South Africa — The world's last black mine company Thursday fired more than 10,000 striking black miners, including 3,000 who staged a sit-in a mile underground, after their union voted to continue an 18-day-old walkout.

The country's largest black labor federation, the Congress of South African Trade Unions, said it was considering a strike unless the miners' wage demands were met.

Fulbright grant received

Brendan Dooley, visiting instructor in history at the University of Venice, Italy, for six months between September, 1987 and June, 1988.

Dooley, who obtained bachelor's and master's degrees from Syracuse University in 1976 and 1978 respectively, joined the Notre Dame faculty two years ago. Approximately 1000 Fulbright Scholars will go abroad to lecture or conduct research during the 1987-88 academic year.

Established in 1946 by legislation introduced by former Arkansas Senator J. William Fulbright, the Fulbright Scholar-ship Program is administered by the U.S. Information Agency with funds obtained from congressional appropriations and the governments of 27 other nations.

The General of the National Union of Mineworkers, Cyril Ramaphosa, makes his way through a crowd of reporters after telling them "the strike continues," despite the fact that many strikers were recently laid off. See related story.
continued from page 1

year on the roads surrounding campus "prompted us to re­
examine the issue due to increasing security's author­
ity," said Rakow. He also cited the construc­
tion of the new athletic facilities along campus roads as con­tri­buting to the decision to change the policy. "The building's going on increases the number of students walking... We gotta get traffic slowed down for pedestrians to have a fight­ing chance to cross the street." Rakow said the jurisdiction of the Notre Dame security of­ficers extends to any roadways adjacent to campus. Among these roads are Angela Boulevar, Notre Dame Ave­ nue, U.S. 31, and Douglas, Derr and Juniper Roads. Drivers will be stopped for violations such as reckless driving, drunk driving, stoplight violations, and excessive speed, said Rakow.

"We're responsible to reduce the flow of traffic to a safe level," Rakow said. "We want everyone to come back next year, unless they graduate." The previous system allowed security officers to stop traffic violators but not to issue cita­tions, Rakow said. Instead the officers would obtain the nec­essary information from the driver and would then file a probable cause affidavit, he added. The affidavit would then be processed through the county prosecutor's office to determine whether or not a violation actually had been committed.

If the driver did violate a law, then charges would be made against the offender, said Rakow. The entire process could take up to three months, Elbow added, but with the new authority given to security of­ficers it should be streamlined down to around a month.

Rakow said the increased au­thority will only apply to Notre Dame security and not Saint Mary's security. One third of Notre Dame's security officers are certified police officers, and these will be the officers permitted to issue tickets, he explained. Saint Mary's secu­rity officers, on the other hand, do not have official police au­thority.

Grants received for programs

The University of Notre Dame received $1,501,741 in grants during a one month time period this summer for the support of research and various programs. Research funds totaled $1,147,901, includ­ing:

$145,086 from the National Institutes of Health for re­search predicting and modifying parenting in adolescent mothers by John Borkowski and Thomas Whitman, profes­sors of psychology, and Cynthia Schellentz, assistant profes­sor of psychology.

$144,260 from the National Institutes of Health for re­search by Roger Brethauer, professor of chemistry, on lung glycoprotein synthesis.

$132,251 from the National Institutes of Health for re­search by Subhash Chandra Basu, professor of chemistry, and Mark Guha, associate fac­ulty fellow in chemistry, on glycoprotein metabolism in tumors and transplanted cells.

$109,928 from the National Science Foundation for re­search by Stephen Lundeen, as­sociate professor of physics, on fast beam atomic physics.

$90,000 from the National Science Foundation for re­search by John Poirier, profes­sor of physics, in elementary particle physics.

$90,000 from the National Science Foundation for re­search by Walter Tomasch, professor of physics, and Jonathon Sapirstein, assistant professor of physics, on weak interactions by Craig Lent, assistant profes­sor of electrical engineering, on the simulation of superlat­tice devices.

$68,781 from the U.S. Depar­tment of Energy for research by Randal Buchi, professor of physics, on a fiber optic detec­tor for the Superconducting Super Collider (SSC).

$53,965 from the National Science Foundation for re­search by Eduardo Wolf, pro­fessor of chemical engineering, on catalytic oxidation reac­tions.

$33,250 from the Lilly En­dowment Inc. for a colloquium on the history of religious civiliza­tion, headed by John Van Engen, director of the Medieval Institute and as­sociate professor of history.

$19,378 from the National Science Foundation for a colloquium on the history of research by Jay Dolan, director of the Cudahy Center for the Study of American Cat­holicism and professor of his­tory.

Awards for service pro­grams totaled $93,714, including:

$50,000 from the U.S. Navy for research on flow field mea­surements of stranded cables by Robery Nelson and Stephen Battal, associate professors of aerospace and chemical en­gineering.

$50,000 from the Amoco Chemical Research Center for research by Walter Tomaesch, professor of physics, and Howard Blackstead, associate professor of physics, on midin­frared measurements for high temperature superconductors.

$45,000 from the U.S. Depar­tment of Energy for research by John LoSecco, associate pro­fessor of physics, on non-ac­celerator high energy physics.

$39,936 from the National Science Foundation for a Re­search on the Education of Undergraduates in civil engineering headed by Notre Dame Museum of Art, adminis­tered by Yeri Larkin, assistant director of the Snite, and Dean A. Porter, associate professor of art and director of the Snite.

$17,964 from the U.S. Depart­ment of Education for the Jacob Javits Fellows Program, administered by Chas T. M. Te, assistant vice president for ad­vanced studies.

$750 from the National En­dowment for the Humanities for a project on the Ana­tions of Spencer's Poetry, ad­ministered by Greg Kucich, as­sistant professor of English.

Are you denying yourself a better shot at grad school?

Okay, it may be too late to get a 4.0. But it's not too late to try to do better on your LSAT, GMAT, GRE, or MCAT. For that, there's Stanley H. Kaplan.

No one has prepmed more students than Stanley H. Kaplan. Our test-taking techniques and educational programs have prepared over 1 million students.

So whatever grad school exam you're taking, call us. Remember, the person next to you during your exam might have taken a Kaplan course.

Matthew Slaughter and another thing

What happened this summer?

Well, let's see. Ronald Reagan managed to suffocate any remaining breath of life in his presidency by emerging from the Iranagate hearings a shadow of his former regal self. United States foreign policy continued to humble along, reacting instead of initiating, as the Navy sent a sizeable contingent of its mighty 600 ship fleet to the Persian Gulf, only to fall prey to the Minnesota Twins soared.

But what really happened this summer?

Mrs. Bishop retired. Her fourth-grade teacher has, after twenty-five years, called it quits. Let me tell you about Mrs. Bishop. She was an institution, and of herself at St. Therese School. Sister Infant Mary was fair, but only in the sense that she threw chalk at and of herself at St. Therese School.

Mrs. Bishop never punished us; she never had to. We students simply loved her. Something about her suppressed the little hellion in every fourth-grader beneath that building civilization. In short, she had mastered the skill of making learning fun for us kids, a most rare ability indeed. Her true passion was astronomy. Her son Steve became interested in the stars at an early age, and she was swept up in his enthusiasm. Her favorite time of year was when astronomy was the science topic at hand. She'd drive us to her house during recess to show us the telescopes her son had made. She helped us make gigantic paper mache models of the solar system, allowing us the liberty of spaceships, dinosaurs, and other assorted personal touces. She gave us shoeboxes with which we could look at the sun. And she even invited us over to her house one fine evening to inhale bowls of buttered popcorn and gaze at Saturn's rings. "Remember children," she would say, "you're on one end of the telescope and God's on the other end." Newton and his Enlightenment pals could not have put it better.

I was so captivated by all this that Christmas I demanded Santa Claus bring me my very own telescope. Edmund Scientific Company came through; I was ecstatic. Night after night I fumbled around my backyard, usually discovering nothing but clouds and mosquitoes. Nevertheless, I loved it. But time saw my interest wane, and afterwards to take a peek at God.

Before we all rush off to the bookstore in existentialist, the third world debt crisis, and the fascinating world of differential equations, I thought it would be a good idea to take a break and thank Mrs. Bishop for all she has done. Everyone has a Mrs. Bishop or two in their lives, and we must remember not to overlook them for more "important" people such as Pluto, the Ayatollah, and Kirby Puckett. What happened this summer? Mrs. Bishop retired. Enjoy your newfound freedom. And thank you again.

Matthew Slaughter is a sophomore government/economics major and is an Assistant Viewpoint Editor.

P.O. Box Q

Help stop crime with OC network

Dear Editor:

In the past week, as was the case during the beginning of school last year, there have been numerous acts of violence and vandalism in the Northside Neighborhood (between Angela and St. Joseph Medical Center, near the Five Points). These acts have been committed by persons other than students and, in general, are unprovoked and senseless crimes. I am trying to compile a list of residents, residence addresses, phone numbers and hopefully a map to be used in case these problems arise. A coordinated crime prevention network would be extremely helpful in reducing the recent muggings, break-ins and vandalism. If you live in this neighborhood, which has a high concentration of students, please contact me to make our neighborhood safer.

Simple goodness marks retirement

"How was your summer?"

Aren't we all a bit annoyed with the question at this point? I have adopted the tactic of cheerfully responding, "Terrible! And yours?" Presymbolic language be damned.

Matthew Slaughter
Notre Dame as God's little acre

The Olee Club helped something magical to happen in Paris this spring. Singing at Mass in Notre Dame cathedral, the chorus members brought a beauty to the liturgy which intensified prayerfulness. For the first time, they were distracted—by doubt or a gray evening when I walked by myself along the banks of the Seine, and there was not one street speaker. In a frame of mind Induced by memory and joy, sadness and desire, excitement and pure delight, I started to pray: haltingly through. I was surprised by a familiar Marian hymn sung by student voices I know from home. The hymn was an answer to prayer, and a sign that God was close, offering me an insight into the meaning of the pagantry with which creatures come to adore Him in His holy temple. Transfiguration trips are hard to describe adequately; mine wasn't such a classic that you need to hear about it; perhaps it was totally emotional, unworthy of God's notice; but I believe He allowed me a religious experience. Since I fly blind so often that belief is more than the blind. On the other hand, I can tell you from the saints and statues, regardless I am a holy place, where an experience of God could be a part of the education. So you pray at the Grotto, to confess, and attend Mass every week; and you wait for the sun to dance, or the miracle to happen, or for your soul to be bathed in light. Nothing happens worth sitting homew about. You join a prayer group, read the Bible, and hope to start speaking in tongues; again, the Holy Spirit disapproves you. You can wait until tomorrow to tell them how to make God start happening in your life. Nobody will, and perhaps nobody can, not even the born-again Christians. The born-again may be sincere; but their shortcuts to salvation can leave you disappointed or embittered.

The "Jews For Jesus" were in London, evangelizing Oxford street this summer; they said: "Hello, reverend: have you accepted Jesus as your personal savior?" I've accepted Jesus as my Saviour a couple of hundred times; it's never been clear if the acceptance was sincere. I could say: "I'm washed in the blood of the lamb, Glimme a cigarette." The "Jews For Jesus" don't believe in cigarettes or whiskey: and that's where I'm born-as long as I have a taste for either. The "Jews For Jesus" offer sham grace from the Cross: but cheap grace never heals me in the way they preach. I graduated from someone personal Saviour is another act of belief, which leaves me as half-dead in my sins as I always was. Protestant stole fire from the gods: he must be the role model of the televangelists preaching religion. They offer no do for you what only God can do for your sins; heal your sickness; give you victory over the grave; deliver you blessings if you will send them money. One preacher was keeping his dead mother packed in dry ice, until he could bring her back to life like Lazarus. They entitle their programs "the hour of Power." They go on performance in which they seem to manipulate God in helping them live up to their billings as stars.

God has promised to be present where two or three are gathered. He commands us to serve Him through our kindness to the least of His brethren. He says that it's a lie to say that we love Him, unless He is first visible to us in our neighbors. Does God "happen" at Notre Dame? He is present to us in the holiness of other people. We can say that you've gotten naked before our eyes or to feel God in some premeditated way that leaves us feeling drunk. But the hidden God is a lot more indescribable: He could be here, where we have our personal Saviour is another act of belief, which leaves me as half-dead in my sins as I always was. Protestant stole fire from the gods: he must be the role model of the televangelists preaching religion. They offer no do for you what only God can do for your sins; heal your sickness; give you victory over the grave; deliver you blessings if you will send them money. One preacher was keeping his dead mother packed in dry ice, until he could bring her back to life like Lazarus. They entitle their programs "the hour of Power." They go on performance in which they seem to manipulate God in helping them live up to their billings as stars.

Making room for tomorrow's students

JOE BUCOLO
senior staff reporter

During these first few hectic days of school, Notre Dame students are sure to encounter some changes on campus. Swarms of women are leaving the doors of Howard Hall. South Dining Hall has lines which boast titles that actually make you feel like you're about to encounter something good. On the Mod Quad are two structures, which will soon become dorms. New dorms are being constructed. The dorms, begun last April, are known as Fonton and Snead. The Fonton will be built to the Pasquerillia. Both will be four stories tall and house about 500 women. As construction progresses, the five-story green block and girders will be covered with the same brown brick that is seen on the Pasquerilla. The floor will feature laundry facilities as well as study lounges, said Donald DeBick, director of the Notre Dame physical plant. Once the dorms are complete, the "Mod Quad" will house the University's highest concentration of women. Also, there is already talk of a replacement for the "Mod Quad." With six dorms on it, the quad may soon be known as "The Six Pack."
Lloyd Mosely and the Toronto Blue Jays downed Oakland, 9-4, Thursday night to move into a first-place tie with Detroit in the American League East.

The victory moved Toronto into a first-place tie with the idle Detroit Tigers in the American League East while the A’s slipped a game behind the Minnesota Twins in the AL West.

Key, 14, allowed two hits and four runs in the first before an got it’s straight hitter. Key missed his last start because of a fired arm. Mark Eichhorn, Jeff Malsam and Tom Henke pitched the last three innings, allowing no hits.

Training 4-1 in the fifth, the Blue Jays’ Fred McGriff and Nelson Liriano drove in five runs with a grand slam and a double and Jimmy Key pitched a six-hitter for the victory as the Toronto Blue Jays defeated the Oakland Athletics 9-4 Thursday night.

The victory moved Toronto into a first-place tie with the idle Detroit Tigers in the American League East while the A’s slipped a game behind the Minnesota Twins in the AL West.

The Jays, 9-4, in the American League West.

In their opening game of the season, the Blue Jays’ Fred McGriff and Nelson Liriano drove in five runs with a grand slam and a double and Jimmy Key pitched a six-hitter for the victory as the Toronto Blue Jays defeated the Oakland Athletics 9-4 Thursday night.

Irish

continued from page 16

perceived and tested team to face the challenging 1987 schedule. Six new faces also appear on the Notre Dame bench. Sophomore Julie Finnorn and freshmen Rachel Hall, Chris Russo, Maria Rhomberg, Colleen Wagner and Amy White all have shown promise in practice this fall.

"The freshmen have made good progress so far but they probably will not be a major factor until mid-season," noted Lambert on his third recruiting class.

"We don't have a franchise player," he added. "We depend on the whole team. That worked for us last year and we need it this year also. We have to establish a good balance and chemistry. We'll see if that develops after the first couple matches, and hopefully we'll pick up where we left off last season."

Lambert is beginning his fourth campaign at Notre Dame, and holds a record of 59-41 while at the helm for the Irish. While optimistic about the talent on his team, he recognizes that there is plenty of talent on the other side of the net.

"We are a very improved team, but we have a vastly improved schedule," said Lambert. "It's not a given that we'll have a better record just because most everyone is back from last year. Notre Dame is now a known quantity in volleyball. We can't sneak up on teams anymore, and people will be preparing for us more than they have in the past."

The first team shooting at Notre Dame will be the Salukis of Southern Illinois. Sunday's match will be the first meeting between the two schools, which finished the 1986 season in a tie for 10th place in the NCAA Midwest Regional poll.

"Southern Illinois has a lot of quality athletes," said Lambert. "Volleyball is not necessarily a game of size, but a game of quickness, and they are extremely quick."

After Sunday's match, the Irish hit the road for most of September, playing in three major tournaments—the Hoosier Classic, the Mid-American Classic and the Eastern Kentucky Invitational—as well as five dual matches. The tournaments will be a tough test for Notre Dame, but Lambert notes that the Irish are no longer looking to just perform well and gain experience against national powers as they did in past years.

"We are physically capable to win these tournaments, and should be in contention to do so," Lambert said. "We have the chance to meet some big teams and beat them, which will look very good at tournament selection time."

Despite the impressive resume, Notre Dame failed to qualify for NCAA post-season play last fall. With the experience returned to Lambert's squad and the impressive list of foes on the 1987 schedule, similar numbers will not only give the Irish their first two consecutive winning seasons in the program's history, but perhaps their first NCAA tournament appearance as well.
League postpones draft

Associated Press

NEW YORK - The NFL's Cris Carter-Charles Gladman supplemental draft was postponed for a week Thursday after Commissioner Pete Rozelle and a group of college athletic directors agreed to give the NCAA a chance to reinstate the college eligibility of the two players.

The NFL said in a statement that Rozelle cited as the reason for the postponement of Friday's supplemental draft the reinstatement Wednesday of another Pitt player, defensive back Teryl Austin, who like Carter had accepted payments from agents Norby Walters and Lloyd Bloom.

The reinstatement is contingent on Austin repaying $2,500 in loans he received from the agents and severing any agreement with them. The same stipulation would apply to Carter.

Gladman, however, has never acknowledged any dealings with agents. He was ruled ineligible for refusing to cooperate with an investigation into Walters and Bloom.

Friday's supplemental draft, however, will still take place for four other players involved with agents.

Carter, meanwhile, was holding a news conference in Indianapolis unaware of the postponement.

He said he that playing for Ohio State would be his first choice.

"I'd love to go back but it's just not as easy as that," he said.

Asked if he might seek reinstatement from the NCAA, Carter's lawyer, Bob Berry, said: "Ohio State would have to appeal and they have no intention of doing that. Without Ohio State appealing the decision we are dead in the water."

Carter wants to be a Buckeye

Associated Press

INDIANAPOLIS - All-American wide receiver Cris Carter said Thursday he would rather play football for Ohio State during the upcoming season than with an NFL team.

"I would love to go back. But it's just not as easy as that," Carter said a news conference held before the NFL announced it was postponing Friday's supplemental draft.

Carter was unavailable for comment after the announcement.

The news conference was called after Carter held a workout Thursday. The St. Louis Cardinals were the only NFL team to have a representative attend the workout and Carter said then he didn't know what to expect in the supplemental draft.

Carter was declared eligible for his senior year after taking money from agents Norby Walters and Lloyd Bloom. The NFL scheduled the supplemental draft at the petition of Carter that he be given the chance to be picked by an NFL team. At least 12 teams had announced they would not participate in the draft.

The NFL said in a statement that the draft would be delayed to give the NCAA a chance to reinstate Carter and Gladman, who has never acknowledged any dealings with agents. The announcement of the delay followed a meeting between NFL commissioner Pete Rozelle and a group of college athletic directors, including Ohio State Athletic Director Rick Bay.

"It felt it was going to be a small turnover," Carter said of the 45-minute workout that was held before the NFL announced the postponement of Friday's draft.

Gardner axed;
Wathan hired

Associated Press

KANSAS CITY, Mo. - Billy Gardner, who was named to replace the ailing Dick Howser during spring training, was fired as manager of the Kansas City Royals Thursday.

He was replaced by John Wathan, manager of the Royals' Triple-A farm team at Omaha and a former Kansas City City catcher.

The Royals, who led the American League West early this season, had fallen to 62-64 and fourth place Thursday - 3.5 games behind Minnesota.

Gardner, 60, a former Minnesota Twins manager, was hired last year as a third-base coach after Howser was hospitalized with brain cancer. Howser tried to return as the Royals manager in spring training but quit after a few days because of weakness. Howser died in June.

Wathan, 37, compiled a .362

Foley continued from page 16

"That's what I've been doing," Foley said. "Another thing Foley has been doing is studying videotapes in his dorm room during his free time. "I've been taking films home and studying them. I've been reading the playbook at every chance and really working hard," Foley said. "Watching the films has been helping me. I'm improving a lot."

Just ask Andy Heck.

The 6-6, 248-pound first-team tight end was the recipient of Foley's first big hit, a crushing blow in Wednesday's practice that jarred a pass loose from his hands. But, to Heck's credit, Foley felt it, too. "I finally made that hit I've waited for," Foley laughed. "I knocked the ball loose, but I didn't know where I was for about two plays after that. So I figure it must have been a pretty good hit."

Another thing Foley has been doing to help his progress is studying videotapes in his dorm room during his free time. "I've been taking films home just ask Andy Heck. So I figure it must have been a pretty good hit."

The Observer on the field is an indication that the year off has helped him make a hit in perhaps the most important place—the classroom. Foley and fellow Proposition 48 football victim Tony Rice were both cleared to play after earning satisfactory freshman grades.

"It was really tough sitting out," Foley said. "But in the long run it helped. Keeping the grades up during football season is going to be difficult because I have a lot of reading to do, but I should be able to handle it. At least I hope so."

Casino challenges you to find more power. At any price.

The amazing Casio FX-4000P programmable scientific calculator. In power, it's comparable to the most highly touted calculators on the market today. It offers you 160 total functions, including 83 scientific functions, such as hexadecimal/decimal/octal/binary/decimal conversions, standard deviation and regression analysis.

Making it easier to deal with long computations, its 12 character alpha-numeric display scrolls to 79 characters and its instant formula replay feature lets you review, edit and replay your formula at the touch of a button. It even has an answer key that stores your last computed value.

And to make things still easier, the FX-4000P has a "perfect entry" system, which allows you to enter and display a formula exactly as written. Plus, it has a non-volatile 550-step program memory with 10 program divisions. This allows 10 different programs to be stored at once.

And it includes up to 94 data memories, which are invaluable for statistical analysis.

Finding all this power at your fingertips is remarkable enough, let alone at half the price of some competitors. If you can put your finger on a scientific calculator that gives you more power at any price, by all means buy it.

Belles take trip to Europe, win three of five contests

By ANNE Gallagher
Sports writer

The Saint Mary's basketball team had an opportunity to experience basketball on the international level this past weekend. The Belles played in Munich, Germany, and the Irish defense.

The Belles played a total of five games during the tournament. Each girl played a minimum of 10 minutes per game and the team won three of its five contests. According to the players, adjusting to the international rules wasn't too difficult and added excitement to the game.

"The games were more physical and were faster up and down the court," Wood said. "We played against club teams that are in semi-prof or professional leagues of that area."

The Belles traveled by bus through the breathtaking countryside of Germany, Switzerland, and Austria. Cities visited included Munich, Garmisch, Lucerne, Innsbruck, and Salzburg.

"The trip was both a cultural and educational experience," said sophomore Amy Baranko.

The squad made full use of its two-week stay by rising every day at 8 a.m. for guided tours of each city and had free time in the afternoons for individual sightseeing or shopping.

Sophomore is 'reckless'

Foley's comeback a success

By MARTY STRASEN
Assistant Sports Editor

John Foley -sidelined during his sophomore year under NCAA Proposition 48-has returned to the Irish defense.

"It brought some things with him—a year of adjustment to college academics, an intense desire to hit people and a lack of rustiness."

"Coming out this year, I'm rusty," Foley said. "There's no two ways about it. I kept in awesome shape (during the year off), but putting equipment on is totally different from doing drills—but I'm getting used to it.

"I'm getting better every day. As long as I can improve every time out, I'm on the right track."

Irish head coach Lou Holtz and his assistant coach, Foge Fazio, have recognized the progress. Foley, after only a few practices, has secured a spot on the second team defense.

On the first team at inside linebacker are junior Ned Bolcar and senior Wes Prichett. Sophomore Mike Stonebreaker—who looked to vie for a starting spot after a strong 1986 season—is awaiting a decision concerning his academic eligibility and may have to sit out the entire season.

"John is more than enthusiastic about playing football," Fazio said. "He's a wild, reckless guy, and we don't want to lose that.

"Technically and fundamentally, John has a lot of progress to make. But we're bringing him along slowly. We don't want him to lose that intense desire to hit people and to make things happen."

Foley's high school numbers seem to indicate that with a little work on his fundamentals, he could make some things happen on the college level as he did at prep.

He was chosen USA Today defensive player of the year in 1985 and was one of five linebackers in the nation on the Parade prep all America team while at Chicago's St. Rita High School.

Fazio said he realizes his intensity sometimes hampers achieving his fundamentals, and he has come up with a formula he hopes will help his progress.

"I've been keeping my intensity inside while the play is going on. But once I get ready to hit ... I bring it out. At the start, I was using intensity in the thinking part of it, and that doesn't work. You mind wanders.

"But if you can hold it in until impact, you do a lot better.

J. Harte, a devoted fan. He provided the financial backing and sponsors for the trip by arranging an exhibition game against Mundenlein College in Chicago last March.

The Belles traveled a total of five games during the tournament. Each girl played a minimum of 10 minutes per game and the team won three of its five contests. According to the players, adjusting to the international rules wasn't too difficult and added excitement to the game.

"The games were more physical and were faster up and down the court," Wood said. "We played against club teams that are in semi-prof or professional leagues of that area."

The Belles traveled by bus through the breathtaking countryside of Germany, Switzerland, and Austria. Cities visited included Munich, Garmisch, Lucerne, Innsbruck, and Salzburg.

"The trip was both a cultural and educational experience," said sophomore Amy Baranko.

The squad made full use of its two-week stay by rising every day at 8 a.m. for guided tours of each city and had free time in the afternoons for individual sightseeing or shopping.

Sophomore is 'reckless'

Foley's comeback a success

By MARTY STRASEN

John Foley -sidelined during his sophomore year under NCAA Proposition 48 -has returned to the Irish defense.

"It brought some things with him—a year of adjustment to college academics, an intense desire to hit people and a lack of rustiness."

"Coming out this year, I'm rusty," Foley said. "There's no two ways about it. I kept in awesome shape (during the year off), but putting equipment on is totally different from doing drills—but I'm getting used to it.

"I'm getting better every day. As long as I can improve every time out, I'm on the right track."

Irish head coach Lou Holtz and his assistant coach, Foge Fazio, have recognized the progress. Foley, after only a few practices, has secured a spot on the second team defense.

On the first team at inside linebacker are junior Ned Bolcar and senior Wes Prichett. Sophomore Mike Stonebreaker—who looked to vie for a starting spot after a strong 1986 season—is awaiting a decision concerning his academic eligibility and may have to sit out the entire season.

"John is more than enthusiastic about playing football," Fazio said. "He's a wild, reckless guy, and we don't want to lose that.

"Technically and fundamentally, John has a lot of progress to make. But we're bringing him along slowly. We don't want him to lose that intense desire to hit people and to make things happen."

Foley's high school numbers seem to indicate that with a little work on his fundamentals, he could make some things happen on the college level as he did at prep.

He was chosen USA Today defensive player of the year in 1985 and was one of five linebackers in the nation on the Parade prep all America team while at Chicago's St. Rita High School.

Fazio said he realizes his intensity sometimes hampers achieving his fundamentals, and he has come up with a formula he hopes will help his progress.

"I've been keeping my intensity inside while the play is going on. But once I get ready to hit ... I bring it out. At the start, I was using intensity in the thinking part of it, and that doesn't work. You mind wanders.

"But if you can hold it in until impact, you do a lot better.
