POPE visits sick; raps abortion

Associated Press

PHOENIX, Ariz. - Pope John Paul II held a tiny premature baby in his arms Monday, then denounced the "great evil of abortion and euthanasia" and reiterated his condemnation of any form of test-tube fertilization.

He also reserved time during his one-day stop in this southwestern state for a talk with the tribal owners, American Indians.

The meeting with the Indians was the first of its kind - a gathering of 16,000 from 195 tribes and officials of dioceses that minister to them.

There are 280,000 Indians among the nation's 52.9 million Catholics.

The pontiff's first stop after arriving from San Antonio, Texas, was at St. Joseph's Hospital, where he visited three children in their rooms and stopped in a playroom to see others.

"Johnny, can you wake up and open your eyes for a minute? There's someone here to see you," said Hope Adrian, whose 15-year-old son, Johnny, was in the first room to be visited by the pope. There was no response from the boy, who has been diagnosed as having an inoperable brain tumor.

In the second room, the pope took 2-month-old Brooke Johnson from her mother and held her briefly. Brooke weighed one pound, 5 ounces when she was born three months premature on June 29 and, according to her mother, Debby Johnson, now weighs 5 pounds, 10 ounces.

When the pope inquired about the child's health, her mother responded, "She's doing very well. She's healthy."

Innie "Lottie" Velaques was the third child visited by the pope. She has been hospitalized since April when she was paralyzed from the neck down as the result of a traffic accident.

In the playroom, John Paul picked up a drawing by one child, examined it briefly, exclaiming, "Oh, she's an artist." Then he handed it to Phoenix Bishop Thomas J. O'Brien, who was at his side. He chatted with the other children and staff and accepted a bouquet from a small girl.

Outside the hospital, the con- gratulated employees on their "beautiful work," calling it an "evangelical mission to heal the sick and the suffering."

New equipment to rid area of ethanol smell

By CAHI MARTINEZ

Ethanol. The familiar odor of ethanol around Notre Dame will soon subside, said Nathan Kimpel, general manager at the local ethanol plant.

The New Energy Company of Indiana is in the process of installing odor abatement equipment which will be in operation by the end of October.

Kimpel said the equipment is like "no other system that we have seen anywhere" and will cost less than $400,000.

Although the system will not eliminate all of the odor, "probable elimination ex-
In Brief

Violent behavior will be the topic for discussion Sept. 21 when some of the nation's top analysts convene in Indianapolis to participate in a conference to help public health officials prevent and cope with violence. The conference, titled "Violence: From Fear To Action," will be held at the Indiana University Lincoln Hotel and Conference Center. Featured speakers will include: Dr. Mark Rosenberg of the Division of Injury Epidemiology and Control at the Centers for Disease Control, and Dr. Deborah Prothrow-Stith of Boston University Medical School. -Associated Press

In romance at college, 'Nice Guys' finish last

"Thank you for the flowers," she called on Friday to say. "Ohhh, Mark. You're such a Goob.

The woman of my dreams wasn't calling me a chocolate-covered peanut. Nor was she referring to me as a character on the old "Andy Griffith Show."

So, it was much worse than that. She was referring to me as a "Nice Guy.

I knew my chances for her were over. As all Nice Guys know, when it comes to love and romance in college, Nice Guys finish last.

There are exceptions, of course. But for the most part, college women don't want Nice Guys.

Just who is a Nice Guy? It's not hard to tell. A Nice Guy doesn't get drunk on the weekends, dance on the pooltables at Bridgett's and throw up. No, a Nice Guy stays sober and drives the pooltable dancers home - with the women they picked up.

Around Christmas time, a Nice Guy takes a woman shopping. She has him try on men's sweaters to see how they look. The sweaters aren't for him, though. They're for another guy - the guy she loves.

A Nice Guy is a good listener, and he's understanding. He'll sometimes talk to a woman until 2 a.m. about her problems.

Unfortunately for the Nice Guy, her problems usually have to do with another guy - the guy she loves.

A Nice Guy makes a good brother. A Nice Guy has a woman pass out in his arms. He doesn't take advantage of her. He doesn't even consider it. A Nice Guy is "good friends" with a lot of women, as in "Oh, him...we're just good friends.

A Nice Guy is the "old reliable" SYR date. If all else fails, a woman can always call a Nice Guy. She won't have the best time. But at least the Nice Guy is available. And he won't bite. A Nice Guy, in fact, is always around to do a favor. He'll carry a refrigerator, provide a ride to the mall, or pick up someone from the airport. He will never say no. He'll feel too guilty.

A Nice Guy, in other words, resembles Charlie Brown. He's pleasant, agreeable, and selfless. And he's unsuccessful with the little red-haired girl.

So why aren't Nice Guys successful with women in college?

Perhaps it's because college is supposed to be fun and exciting, so women want fun and exciting men. Nice Guys aren't as exciting as pooltable dancers.

Or perhaps Nice Guys don't chase after Nice Girls, who probably have similar complaints about romance in college as Nice Guys.

Or perhaps, as a Sept. 4 Chicago Tribune article said, "being a Nice Guy brings one close to falling over the edge into wimpdom. Nice is safe. Nice is aimless, formless."

"If Nice Guys were food on the table of life, they'd be soft, crunchless and malleable."

"Today, when the question is asked, 'What's so nice about being a Nice Guy?' the answer is, 'Not much.'"

"So is there hope for Nice Guys?"

Fortunately, there is. Word has it that after college, Nice Guys do pretty well in the romance department. In fact, Nice Guys are in demand. For now, however, most collegiate Nice Guys will have to remain pleasant, understanding, selfless - and alone.

Given the choice, I'd rather be a chocolate-covered peanut.

WASHINGTON—President Reagan said Monday the superpowers still face “difficult issues” before reaching an arms agreement, and the White House cautioned that the U.S. missile accord or summit declaration would not ensure an INF treaty.

Blount was questioned by the Senate Foreign Relations Committee and the Senate Armed Services Committee. He was the first witness to testify before the Senate panel after the Hering appointment.

The new figure of 38, and the new figure of 38 tickets were preferentially reserved tickets for away games with board members, said the Senate director, told the Student Association of Notre Dame board members for the Michigan game.

Jim Hering, SBA services commuter, was able to retrieve all but a few of the tickets that he had reserved for friends and most of the tickets that had been reserved for board members were never picked up, said Tim Salmon, SBA steering committee chairman.

Blount was questioned by other Senate members about the discrepancy between the originally quoted figure of 20 preferentially reserved tickets and the new figure of 38. “There was a lack of information at the start. I don’t want to say deception,” said Blount.

Laurie Bink, student body president, said he felt that too much emphasis was being placed on Hering’s role in the incident. “The responsibility for what happened shouldn’t fall just on Jim (Hering),” when clearly the vice president, said of Hering’s role in the incident.

Brian Holst, student senator, said he felt that too much emphasis was being placed on Hering’s role in the incident. “The responsibility for what happened shouldn’t fall just on Jim (Hering),” when clearly the vice president, said of Hering’s role in the incident.

It’s a kind of magic

A magician displays his skills at LaFortune with help from a student yesterday.

The study said the space agency’s plans to build a space station by the mid-1990s “rank as the most ambitious and lengthy task NASA has ever undertaken,” and that to be successful it cannot be constructed “on the cheap.”

Using the space shuttle to build the station, said the report, would pose about a 60 percent probability of the loss of another orbiter. It said the National Aeronautics and Space Administration should prepare for that loss by planning to build still another shuttle.

“We should expect to lose an orbiter—not necessarily with the shuttle—about once every five to eight years,” said the report.

In a reply to the report, NASA disagreed that use of the shuttle to build the station would be risky. NASA said it has recently redesigned the development plan for the space station and has “a high degree of confidence that the space station can be successfully deployed with the current shuttle system.”

The report, the result of a four-month study commissioned by the White House, the National Security Council and NASA, generally supported NASA’s current space station design plan.
"At J.P. Morgan, systems professionals are part business person, theoretician, and technician."

As a leading global financial institution, J.P. Morgan is among the most sophisticated users of the most advanced information and communications systems. And as a firm at the forefront of a rapidly changing industry, we are continuously involved in the design and implementation of innovative systems for complex worldwide financial applications. If your goal is a career in systems, J.P. Morgan has rewarding opportunities to offer both technical and non-technical majors. They begin with comprehensive classroom and on-the-job instruction and lead to a choice of options ranging from technical specializations to management. If you'd like to know more about J.P. Students get chance to meet Soviet officials in D.C.

By GINA CAMARENA

For students interested in politics, the Washington Seminars scheduled for the fall and spring breaks provide a chance to discuss arms negotiations, welfare reform and meet with the staff of the Soviet embassy.

The seminars, sponsored by the Center for Social Concerns, will give students a chance to discuss political issues and "to reflect on dimensions from (their) own faith," said Project Coordinator Steve Newton.

Application deadline is Monday, Sept. 21, and an organizational meeting will be held the following night at 6:30 p.m. in the CSC.

The approximate cost is $200 which includes transportation and housing.

The first of the two Seminars is during fall break from Oct. 17 to Oct. 23, and the second will be held the week of spring break. Students who travel to Washington will have the opportunity to meet with top political and religious leaders as well as tour the city.

Charges

Theft charges continued from page 1

Felony counts are punishable by up to 14 years in prison, Harmon said.

Lopez remained held Monday, the Mecosta County Jail, sheriff's dispatcher Donna Biller said.

Lopez on Thursday allegedly cashed two checks at a grocery store in Morley in Mecosta County, Lt. Tom Powers said.

Smell

continued from page 1

estimates range from 75 to 85 percent.

The odor given off by the plant is a common characteristic of any corn refinery plant, Kimpel said. He said that across the U.S. ethanol is being produced giving off the same odor and that there have been no complaints in addressing the odor problem.

Kimpel said that the plant has been receiving complaints since 1984, when the company first started and that they have been addressing the issue ever since.

Until the present, there has not been a system applicable to the problem said Kimpel. However, he said that the company has found a system that will work in the environment.

"There have been no legal actions taken against the company, only a citizens group with a legal action lending, but nothing has been done for a year. They are still in the recovery stage, where the plant and the group are questioning each other," said Kimpel.

Kimpel said, "If the conditions are exactly right, the odor is present 20-30 miles from the plant."

Pope

continued from page 1

know that Jesus Christ was especially near to all the suffering and the sick.

In his greeting to the people of Phoenix from the balcony of St. Mary's Basilica, the pope said Arizona and the United States had been "richly blessed. As you look with gratitude upon the high standard of living that many of you enjoy, at least in comparison to the rest of the world, may your hearts go out to the less fortunate."

Then, in a speech before the Catholic Health Association, the 87-year-old pontiff spoke of "the great evil of abortion and euthanasia."

He also referred to the church's stated opposition to the use of biomedical technology to achieve artificial fertilization -- a position which has drawn strong criticism from some health care professionals and from couples who have been unable to conceive.

The church has not taken its stand, the pope said, "in order to discourage scientific progress or to judge harshly those who seek to extend the frontiers of human knowledge and skill, but in order to affirm the moral truths which must guide the application of this knowledge and skill."

"The Church encourages genuine advances in knowledge," he said, "but she also insists on the sacredness of human life at every stage and in every condition. The cause she serves is the cause of human life and human dignity."

The pope called on health care workers to show "the love and compassion of Christ and his church" in treating patients with AIDS.

"As you courageously affirm and implement your moral obligation and social responsibility to help those who suffer, you are, individually and collectively, living out the parable of the Good Samaritan," he added.

Phoenix was the fifth of the nine cities on the pope's agenda during his 10-day swing through the United States.

**Franglais' gets into French dictionary via Wall Street**

Associated Press

PARIS—Straight from Wall Street, "raider" has elbowed its way into the 1988 edition of Petit Larousse, a French dictionary that acts as a mirror of contemporary life and language.

No walker of perfect French, Petit Larousse documents the rise and fall of personalities and words. Less weighty than the more staid Petit Robert dictionary, it is perused for the peculiarities of the past year.

The just-published edition includes 73 new words, 20 new meanings to words, nine new expressions and 27 new proper nouns, including Philippine President Corazon Aquino, tennis star Ivan Lendl, and Chernobyl, site of the world's worst commercial nuclear accident.

Some have compared the rival of the Petit Larousse to the annual uncorking of the nouveau Beaujolais. There are usually about 100 new entries, including names, words, expressions and meanings. This year's 77,000 entries include 129 new contributions, Ouvrard said. "The difficulty is in trying not to make mistakes, taking only words that are in style now," she said. "We try not to take words that are too a la mode," because they will soon disappear.

Many new words this year are of a technical nature. Among them: "seropositif," or seropositive, most commonly used to denote a positive test for acquired immune deficiency syndrome, and "procreatique," referring to the study of artificial procreation.

"Raider" and "finaliser" (to make final) are among this year's new English words or derivatives. They join such standards as "OK" and "weekend."

But language purists might consider Petit Larousse "ralant," a homegrown word meaning bothersome and a new entry in this year's edition, right next to "raider," defined as one who takes over another person's company.

With its healthy dose of English entries, Petit Larousse could never be called "francofrancais," defined as that which is exclusively French.

Among the words rejected was the American term "zappping," to describe switching from TV channel to channel, especially during commercials. "IGF," the French tax on large fortunes that was done away with after the conservatives came to power last year, is gone from this year's Petit Larousse, joining "scoubidou" in the trash heap of outmoded verbiage.

Each year, an editorial committee studies lists of potential new words offered by about 20 people who are assigned to follow various sectors of society.

There are usually about 100 new entries, including names, words, expressions and meanings. This year's 77,000 entries include 129 new contributions, Ouvrard said. "The difficulty is in trying not to make mistakes, taking only words that are in style now," she said. "We try not to take words that are too a la mode," because they will soon disappear.

Many new words this year are of a technical nature. Among them: "seropositif," or seropositive, most commonly used to denote a positive test for acquired immune deficiency syndrome, and "procreatique," referring to the study of artificial procreation.

"Raider" and "finaliser" (to make final) are among this year's new English words or derivatives. They join such standards as "OK" and "weekend."

guest column

I am very proud of this policy, not only in its final results, but also in the stated purpose of the ad hoc committee and in the method the committee used in formulating the policy. The problems which The Observer sees in the policy are understandable and well thought out. However, these problems arise from a lack of understanding regarding the purpose of the committee and a cynicism regarding its method. The Observer's main point, I believe, is that driving policy approved by the Notre Dame community and the students for the Notre Dame community stands up for the Notre Dame community and the students for the Notre Dame community. The sanctions exist to ensure that the student receives adequate attention from the University, that the Notre Dame community stands up for the Notre Dame community and the students for the Notre Dame community. The sanctions exist to ensure that the student receives adequate attention from the University, that the Notre Dame community stands up for the Notre Dame community and the students for the Notre Dame community.

I hope this clears up two of The Observer's three reasons for the "failure" of the policy: that "the committee's recommended action is presented in a negative way," and that "the committee has failed to offer positive ways to prevent students from drinking and driving." The Observer's editorial cites the University from its responsibility to attempt to prevent DUI incidents. It is the responsibility of the University to take action and prevent DUI incidents. It is the responsibility of the University to take action and prevent DUI incidents. The observer is absolutely correct in this observation. The interaction of driving and drinking, as is pointed out, must be dealt with, whenever and wherever possible, before it occurs. However, it would be incorrect to maintain that the University should not have a policy directing the administration when cases of DUI do in fact occur, for it is said to occur, for, as The Observer itself states: "Despite last year's tragic statistics continuing to drive and drive." Therefore, one must understand the purposes of the policy and take it for what it is. It is not an end all to the University's drinking, or even its drinking and driving, problems. The stated purpose of the committee was "to recommend a policy, including sanctions to be implemented immediately, for the prevention of DUI involving Notre Dame students." Plain and simple. Our charge was to develop an administration guidelines to act consistently, fairly and correctly with students involved in DUI incidents. This is because, as the committee report states: "the absence of a policy to guide University officials in these situations results arbitrary and inconsistent decision making which in the long run could ill serve both the Notre Dame community and the students for the Notre Dame community." Whether or not we would be made to see, we were, as The Observer editorial states: "all the committee's recommendations...". The sanctions exist to ensure that the student receives adequate attention from the University, that the Notre Dame community stands up for the Notre Dame community and the students for the Notre Dame community. The sanctions exist to ensure that the student receives adequate attention from the University, that the Notre Dame community stands up for the Notre Dame community and the students for the Notre Dame community. The sanctions exist to ensure that the student receives adequate attention from the University, that the Notre Dame community stands up for the Notre Dame community and the students for the Notre Dame community.

Concern for students key to policy

The Observer is the independent newspaper published by the students of the University of Notre Dame du Lac and Saint Mary's College. It does not necessarily reflect the policies of the university or the students. The Observer is published as accurately and objectively as possible. Unsigned editors represent the opinion of the majority of the Editorial Board. Comments, letters and the inside Column present the views of their authors. Column space is available to all members of the community and the free expression of varying opinions on campus, through letters, is encouraged.
Cathy White of Saint Mary's reads to Eric Libert (left) and Mark Trembath (center) as part of her Development Psychology Course at the Early Childhood Development Center.

LISA COLEMAN
accent writer

The Early Childhood Development Center (ECDC) on the Saint Mary's campus is not just a day care center. It is a center for child growth and development funded by Notre Dame and Saint Mary's.

Due to the program's popularity and the limited spaces available, the ECDC conducts a lottery in order to offer all eligible families an opportunity to enroll their child. Children of Notre Dame and Saint Mary's administration, faculty, staff and students have first priority. In addition, families from Holy Cross Junior College and St. Joseph Medical Center participate in the drawing.

Of the 125 students currently enrolled, 75 percent come from Notre Dame families. 18 percent from Saint Mary's families and 7 percent from Holy Cross Junior College and St. Joseph Medical Center families. Morning, afternoon or full-day sessions are available to meet the needs of the parents.

Why is this program so popular? According to director Terri Kosik, it is the center's educational philosophy which excites parents, "not only seeks to accelerate the child's development, but to identify the stage the child is in and encourage self-confidence."

Throughout the day the child takes part in a variety of activities that are geared towards complete development. Field trips, outdoor playtime and "show-and-tell" are just a few of the ways the students learn about themselves and others. Both the teachers and the teaching techniques provide the children with a unique, well-balanced environment in which to grow. The ECDC budget gives the teachers the chance to use the most recent approaches of psychology, education and sociology to integrate art, music, and drama into the educational process.

Teachers employ the discipline theories of Psychiatrist Rudolf Dreikus. These theories discourage using punishment, rewards and threats in order to discipline. Instead the child is taught to take responsibility for his or her actions. In this way each student has the choice of behaving or accepting the logical consequences if he or she misbehaves. By encouraging the child to be independent and using discipline as a learning situation, the teachers instill the students with "4Rs": Respect, Responsibility, Resourcefulness and Resilience.

Parents, such as Saint Mary's Professor Rebecca Stoddart, offer words of praise for ECDC. "They provide an excellent preschool foundation," says Stoddard, "as well as fostering self-concept and self-esteem."

By funding the Early Childhood Development Center, Notre Dame and Saint Mary's offer the community an alternative to day care or babysitting. In addition to offering their students a Teachers Assistants Program. During the school year students taking Saint Mary's education or developmental psychology courses participate in the ECDC classes.

The children are so well behaved," said Lisa Cellini, a Saint Mary's sophomore. "It's an experience you can't get from the book." According to Debbie Helman, also a sophomore, "When you watch the children you really understand what cognitive development is all about."

The Early Childhood Development Center is truly a golden opportunity for the children. The privately funded center has space available, the ECDC classes provide "hands on" experience for their classes and offer the children a greater support system.

Notre Dame with 15 kills, including seven in the pivotal third game, while sopho-
more Kathryn Cunningham, Sims 13, and senior outside hitter Kim Hathaway, 17, each added a career-high five service aces.

The Irish played their final home match at the Joyce Center at 7 p.m. Wednesday night, then head to the Eastern Kentucky Invita-
tional over the weekend.

"Barbara maintained her very good level of consistency over the third game, and she just had the inability to deliver against us," Notre Dame head coach Brad Spence said. "Our younger players, including Mary Kate Waller, 6, also contributed to playing well together against them. We were able to control the game and keep them to under 26 kills.

The Irish defeated their classmates last Thursday in a quick three-game sweep, 15-3, 15-3, 15-6.

Irish continued from page 16 and fifth runners on Saturday was a very good one for us," Notre Dame coach Frank McGinnis said. "If Garrett stays up with O'Connor and Markenbach, that cuts our frontcourt offense down to two and two, which would be excellent.

Our Notre Dame's highly-touted Kearns, who finished fourth with a time of 26:46.

The Irish have a week and a half before they return to action at the National Catholic Invita-
tional.

"We say that we can be ready for that one yet," Piane said. "Our ef-
fort this weekend was excellent for this point in the season. However, we really want to be at that same level in two weeks. We want to get better, and that will mean more hard work."
Clubs drag through weekend action

While the varsity football, soccer, cross country and women’s tennis teams enjoyed highs of successful weekends, the Notre Dame club teams did not have quite as much luck.

At a tournament in Purdue, the Women’s Golf Club finished seventh out of a field of 11 teams. Indiana University and Purdue were the top two teams.

Despite being the only club team participating in the two-day tournament, the Irish managed to keep pace with the scholarship teams in the first day of the competition. The team slumped in the final day, although the team still finished ahead of four scholarship teams.

“We played well on Saturday, but we didn’t on Sunday,” said junior Carolyn Burke. “We did about as well as we thought we would, and we could have done better. Bowl MVP the same.

“All the other teams were varsity, and we were club, but we still beat four teams, so we did okay.”

Mary Huffman was the low Notre Dame scorer with rounds of 84 and 87 for a two-day score of 171. Amy Junius, Burke, Roberta Bryer, and Heidi Han- san round out the top five finishers for the Irish.

Notre Dame soccer players celebrate after the team’s first-ever win over Indiana Sunday. ND soccer reaches new heights

By PETE GEGEN Assistant Sports Editor

Just how big was the Irish soccer team’s 4-3 overtime vic­
of the Notre Dame Sports In­

N. O. M. football opener at the University of Illinois in its season-opening game two weekends

ago, the Women’s Soccer Club suffered a pair of defeats last weekend in the 7-1 rout of Detroit, tallied

By PETE GEGEN Assistant Sports Editor

Just how big was the Irish soccer team’s 4-3 overtime vic-
tory over Indiana? Jim Daves of the Notre Dame Sports In-
formation Department pro-

vides these measuring rods:

• Notre Dame’s four goals mark just the third time in the Hooseier’s 14-year history an oppo-

sition has scored four goals.

San Francisco downed Indiana 4-3 in overtime in the 1980 NCAA Championship game, and St. Louis whipped the Hoosiers 4-1 in 1975.

• Notre Dame moved into a fourth-place tie with Marquette in this week’s Great Lakes region coaches’ poll. Indiana is ranked fifth. The current ranking is the highest ever held by an Irish soccer team.

• Notre Dame’s 4-0 start is the program’s best since 1978 when the team opened 10-0 before fal-

iling to Goshen, 2-1.

• Midfielder Joe Sternberg scored five consecutive goals for the Irish over three games.

He scored the final two goals in the 7-1 rout of Detroit, tallied the only two goals against Western Michigan and headed home the first goal against In-

diana.

• Among the celebrities in at-

tendance at the Indiana match were Notre Dame Athletic Director Dick Rosenthal, former Irish soccer star Rich Herdegen, and Rich Hunter, the former coach of the Notre Dame soccer program.

Hunter coached the team from its upgrade to a varsity program in 1977 to 1983, com-

piling a 127-2-4 record. He laid the seeds that have blossomed into a rapidly-growing program.

“It’s the second stage of de-

gelopment,” says Hunter. “They have terrific players, players that can play with any team in the country. I think they have a great future.”

Hunter, a professor at Seton Hall University, was in South Bend to deliver a lecture in law Monday at the Center for Con-

tinuing Education. He sched-

uled the trip around the Indiana game.

“It’s a great day for the soccer program,” says Hunter. “It shows the extent to which the program has come under "We coached at Notre Dame for four years. I’m really proud to be a part of it.”

Notre Dame takes this weekend off before going to a tournament in Iowa on Sept. 24-26.

Following a scoreless tie with the University of Illinois in its season-opening game two weekends

ago, the Women’s Soccer Club suffered a pair of defeats last weekend in the 7-1 rout of Detroit, tallied

the only two goals against Western Michigan and headed home the first goal against Indiana.

Gradel is alive and kicking in fifth year

By THERESA KELLY
Sports Writer

As any athlete knows, sitting on the bench for four years is not the best way to spend a college career. As Ted Gradel knows, a fifth year can make all the difference. Gradel spent four years as the backup to Irish placekicker John Carney, but returned for a fifth year of eligibility.

"I've always felt it was an honor to be a part of Lou Holtz' team," says Gradel, who was not assured of the starting spot at the beginning of fall practice.

"It would have been easy to hang it up after my fourth year," Gradel admits, "to go on and begin a career-start the next phase of my life.

"But once I made the decision to come back, I've put every ounce of energy into football." Gradel seems to have made the right choice. His eight points against Michigan were not what Gradel expected from Gerry Faust, however, were not what Gradel expected from Notre Dame.

"I grew up with Notre Dame football," Gradel says. "I've been coming to games since I was a little kid. I had really high expectations, as all fans do.

"I wasn't so much frustrated with my playing time but with the direction of the program. There just wasn't any enthusiasm.

"At the time, I could have been playing and still not be happy," Gradel says. But when Lou Holtz took over, Gradel says the whole team sat up and took notice.

"Right away, his presence was felt," Gradel says. "We gained respect for him and enthusiasm for Notre Dame football. We all worked hard again. There was a bigger time commitment, but people were happy to put that time in.

"When football became fun again, Gradel knew that his chance could come with another year of eligibility.

"You see so many more fifth year guys than before," he says. "That's because of the new enthusiasm. Football is fun again.

"Placekicking is an aspect of football that is overlooked until it becomes a problem. Gradel is not looking for a John Carney-like finish to his career. The Irish won their final game on Carney's last second field goal against USC.

"I don't want to focus on one game or one victory," he says. "My personal goals are to keep improving all the time and help the team on a weekly basis. Other teams can focus on us as the team to beat. Everyone is up for our game," Gradel continues. "But everyone on our schedule is a challenge to us. We have to take each game as it comes."

Gradel credits his snapper sophomore Tim Grunhard, and holder, senior quarterback Terry Andrysiak, for the work they have put into the kicking game this year.

"We've tried to get in as much work as possible as a unit," he says. "They've been real cooperative, staying the extra fifteen minutes or so when they're tired and sore after practice.

"I'm fortunate to have been working with Tim and Terry. I have a lot of confidence in them. They make my job a lot easier."

Another factor in Gradel's improvement this season stems from his work with recruiting coach Vinny Cerrato, who put together a program for the kickers to make the best use of their practice time.

"He's given us organization and direction in our workouts," says Gradel. "We work together so we can learn from each other.

"Ted's made great progress," says Cerrato. "It takes a different kind of person to keep up with the pressure and John Carney for so long. He'll make the most of his turn, as long as he keeps up his consistency." Gradel has kept a good attitude for four years and has finally gotten to where he wants to be. "I came back because I had the chance to be a part of an outstanding team with a challenging schedule," Gradel says. "It's exciting to be part of the 1987 year of Irish football."

We've given our brains to science.

Texas Instruments

T1 advanced scientifics have all the right engineering and science functions to help you function better in school.

When we set out to make our most advanced scientific calculators, we gave a lot of thought to what your science, math and engineering problems are. Then we designed our calculators around them. The result: T1-60 and the new T1-65 are both packed with built-in functions. Plus, there are programming steps to speed you through repetitive calculations. But even though both can handle the hardest problems, they're easy to use. Large, color-coded keys and simple keyboard layouts mean you spend less time figuring out the calculator and more time figuring out your problems.

So if you're the kind of student who's got science on the brain, get the calculators from the folks who've given their brains to science. The Advanced Scientifics from Texas Instruments. T1-60, T1-65.
U.S. Open final

Lendl wins third straight title

Associated Press

NEW YORK—Ivan Lendl won his third straight U.S. Open title Monday, rallying after losing his first set of the tournament to Mats Wilander in a lengthy baseline battle. Lendl, weakened by the flu, downed the 23-year-old Swede 6-7 (7-9), 6-7 (7-14), 7-6 in a four-hour, 47-minute match at the National Tennis Center.

Lendl thrust his fists upward in joy and covered his face with his hands after closing out the match with a backhand service return down the line. Both players had held serve in the final set until the 15th game.

Lendl, who also won three French Open titles, said his illness drained him during the match.

"I was out of juice for the last 3 1/2 sets," he said. "It was strength of mind and a little bit of luck. In this kind of match, there's such little difference between the players."

Lendl, 27, and John McEnroe are the only men to win three consecutive singles titles at the Open.

"It's something I never dreamed of," Lendl said. "It's unbelievable. If somebody told me three years ago, when I had lost my third straight final, I wouldn't have believed it. I would have said that person was crazy." Lendl, who has won two French and two Australian Open titles, was in his first U.S. Open final.

"I was surprised to be in the final," he said. "But after the way I played in the tournament, I thought I could win it."

It was Lendl's second victory over Wilander this year in a Grand Slam final, with the first coming on the slow red clay at the French Open. The U.S. Open is played on hardwoods, a faster surface.

Wilander, a classic baseliner, said he tried to be aggressive against Lendl, who has a more varied attack.

"I was the one who was attacking," Wilander said. "But you can't do it all the time. I can't attack any more for my style. I don't have that good a volley and he passes so well."

The match, postponed Sunday because of rain, started under sunny skies at 2:11 p.m. EDT. When it ended at 6:58 p.m., a sun had set and the stadium lights were on.

Lendl, who was more emotional than usual during the match, won the first-set tiebreak after saving one set point with a forehand passing shot.

It was his first set, which lasted 1 1/2 hours, ended when Lendl hit a forehand that landed inches wide of the sideline. Lendl argued briefly with chair umpire Richard Kuhns, who declined to overrule the line official's call.

With Sunday's win, the Lendl's 25-set winning streak at the Open. He hadn't lost a set at the Open since losing the third set in his first-round defeat last year.

The last player to win the U.S. men's singles title without losing a set in his last title match was in 1960, eight years before the tournament was opened to professionals.

Elia signs to manage Phils in '88

Associated Press

PHILADELPHIA—In the midst of a September slump, the Philadelphia Phillies signed interim manager Lee Elia to a one-year contract Monday.

Elia, 39, was appointed manager June 18 in Chicago after John Felske was fired.

If only typewriters let you proofread your work before they printed it on the page.

What a mess! You've just proofread your term paper and it's got typos, spelling errors and misplaced paragraphs. Now, you can't hand in a paper like this. So no matter how tired you are, you've got to retype the entire thing.

That is, unless you typed it on a Videowriter.

The Videowriter solves all your typing problems.

Take the obvious ones: typos.

On an ordinary typewriter it would mean a bottle of white-out and frustrating interruption.

On a Videowriter it just means pressing the key marked "delete." That's all. Because you type your work on a screen before you print it on a page.

It edits.

And how about those bigger problems like wanting to rearrange paragraphs?

On an ordinary typewriter you have to 'cut and paste' them.

On a Videowriter you only have to press the key marked "move" and then indicate the area you want it moved to. It's that simple.

It spells.

What happens when you're typing and you come to a word you can't spell?

On an ordinary typewriter you have to stop typing, find a dictionary and look it up.

Not so on a Videowriter. Spelling problems can be corrected simply by pressing the key marked "spell."

It counts words.

If you've ever had a teacher tell you to write a thousand word essay, you know what a pain it is trying to count your words.

On an ordinary typewriter you have to do it with your fingers.

But a Videowriter you can press a mere two buttons and it does the counting for you.

It makes multiple copies.

From time to time you want a copy of what you've typed, right?

Well, if you use a Videowriter you won't have to go to the school library to look for a copier machine.

All you'll have to look for is the button marked "print." Press it and the Videowriter will make another original.

And because your work is automatically stored on a standard 3 1/2" floppy disk, you can make as many copies as you want.

It obviously does a lot more than type.

That's because the word processing features just go on and on.

What's more, we sell the Videowriter Word Processor for around the price of a good electronic typewriter.

And that's quite a bargain when you consider the amount of time it will save you. Time you can spend doing your other classes.

You would do that, wouldn't you?

Sports Briefs

Roberto Guerrero, the Indy-car driver who suffered head injuries in a crash Thursday at Indianapolis Motor Speedway, showed some signs of improvement Monday, but remained hospitalized in critical but stable condition, a hospital spokeswoman said. Guerrero, 29, was injured when his car hit the second-turn and a wheel came loose, striking his helmet. Associated Press

Shoryn-Ryu karate classes have begun in the Boxing Boom of the ACC and are open to all students and faculty. Shoryn-Ryu is a conservative fighting style emphasizing discipline and self-defense. Classes meet Tuesdays and Thursdays from 7-9 p.m. For more information, contact NVA or Mike Donovan at 283-1090. The Observer

Belles tennis takes first four

BY ANNE GALLAGHER
Sports Writer

The predictions of Saint Mary's tennis coach Debra Laverie came true as the team emerged from its first four contests undefeated.

"We went in expecting to win," said Laverie. "The Belles began the season Sept. 8 by shutting out Valparaiso University, 9-0. Number-one spotholder Jennifer Block showed resolve when she came back to win her match. After losing a close first set, 6-7, to Heidi Bussewitz, she handled the Crusader opponent, 6-2, 6-0.

Other singles victories included Sarah Mayer, Charlene Szajko, Elizabeth Heinz, Mary Turk and Jane Schnell.

Two days later the squad travelled to Chicago where it defeated NCAA power DePaul University, 6-3.

"We played on a clay surface here which is unusual to find now," said Laverie. "It really slows down the game."

The clay surface seemed to agree with freshman Sarah Mayer who won straight sets, 6-3, 7-5. Szajko and Schnell also helped the Belles' cause as they each lost their first sets but came back to win their respective matches.

In doubles play, Block and Heinz teamed up to win, 6-3, 6-4, as did Schnell and Turk, 6-3, 6-3.

The victory against Hillsdale College was sweet but not short. Halfway through play, heavy rain forced the teams to finish the match at the Jackson Raquetball Club, 65 minutes away.

Once again the doubles team of Block and Heinz won, 6-1, 6-4. Mayer and Szajko pulled out of a close first set, 7-6 and went on to win their second set, 6-4, as well as the match.

In singles competition five of the six Saint Mary's players won in straight sets.

"All the singles players were aggressive and dominant," said Laverie. The Belles hosted the University of Wisconsin-Milwaukee on Sept. 13. The team ended this series of four games almost as strong as they began by taming the Panthers, 8-1.

"This was a really good yardstick to measure our improvement by," said Laverie. Last year the Belles defeated Wisconsin-Milwaukee, 5-4.

Streak ends; Jays set record

Associated Press

TORONTO—Ernie Whitt hit three of Toronto's major league record 16 home runs Monday night as the Blue Jays routed the Baltimore Orioles.

Baltimore shortstop Cal Ripken had his consecutive inning streak stopped at 8,243 when he was replaced defensively in the sixth, two in the seventh and another two in the third, one in the seventh and added two in the eighth inning by Ron Washington.

Baseball had never before kept records of consecutive innings played, but it is generally believed by historians of the game that Ripken's streak is the longest ever by a player. Ken had his consecutive inning streak stopped at 8,243 when he was replaced defensively in the sixth, two in the seventh and added two in the third, one in the seventh and added two in the eighth inning by Ron Washington.

The Irish battled the Trojans in the highest scoring game in Notre Dame history. The Irish pulled out the 21-15 victory to take a 2-1 advantage before clinching the match with a convincing 15-4 win in the fourth game. In that contest, Shea led the Irish with 10 kills and 5 blocks in another solid all-around performance.

"I thought we played very well against USC," said Notre Dame head coach Art Lambert, "but once again critical errors at critical times really hurt us and cost us a chance to win that match.

"We've proved that we can play with some of the top teams in the nation. Now we have to go out and beat some of them."

The Irish improved their record to 2-0 in the tournament with a round of the tournament. The Irish battled theTrojans for over two hours and outlasted them in kill percentage, 225 to 186, and service aces, 16 to 11.

After splitting the first two games, the Irish battled the Trojans in the highest scoring game in Notre Dame history. The Irish battled the Trojans to a 2-1 victory advantage before clinching the match with a convincing 15-4 win in the fourth game. In that contest, Shea led the Irish with 10 kills and five service aces, while junior Maureen Shea hit 12 kills and had six blocks in another solid all-around performance.

Irish motor past competition at Detroit Invite

By TIM SULLIVAN

For three weeks the Notre Dame women's cross-country team has trained hard, almost too hard.

On Saturday, the team's hard work finally paid off as the Irish virtually took the top placing at the Detroit Invitational and ran away with their first championship of the season.

Led by Notre Dame's Maureen Friel, the Irish placed seven runners in the top 15 for 26 points, edging out Saint Mary's 28 points, and keeping the Irish's number one ranking. The team turned in an impressive showing at the Mid-American Classic. The Irish volleyball team placed third, losing to USC and defeating Illinois State.

Male presence alters SMC flag football

By JEFF HEILET

Just one Georgetown runner kept the Notre Dame men's cross country team from recording a perfect weekend by taking opening meet victory Saturday.

The Irish occupied five of the top six positions in the dual meet at Washington D.C., with a lone Hoyas finishing third. The strong showing propelled Notre Dame to an 18-41 win over defending Big East champions to start the new season.

"Georgetown was supposed to be a good test for us early in the season," said Irish coach Joe Plano, now in his 13th season at the helm. "We were ready for that, and we came through in fine form."

Leading the way for Notre Dame and carrying Mike O'Connor (26.08) and junior Ron Marketech (26.18), finishing first and second, respectively.

"I have said since last spring that those two (O'Connor and Marketech) could finish at or near the top in each race, so they did just that," Plano said.

Another Irish star was senior Mike Sorial. Sorial, who finished with a time of 26.49. Sorial was injured over all of last year, but began light training only five months ago.

"Mike worked extremely hard over the summer and deserves to be where he is," Plano said. "Piane and Rice were with a lot of heart and is a real competitor - a nice surprise."

The Irish look to be one of the favorites in the upcoming Na-

For many players the co-ed teams will be intimidating because some of the male ball-hogs might control the games. The co-ed teams will bring in new players, or guys, in the snow. The Saint Mary's co-ed volleyball teams are one of the few teams that was changed to co-ed because the interest in the teams dwaned out, but it hasn't changed much, and the girls, or guys, in the snow.

Saint Mary's Sports Editor

Joe Piane, now in his 13th season at the helm. "We were ready for that, and we came through in fine form."

leading early in the race. At one point, in the first mile, five Detroit runners occupied six of the seven places behind Rice. The Irish, however, remained confident.

"We ran against them last year," said Kibistis, "and we knew that they to like to push out hard and take control of meets. We sat back in the first mile, and in the second mile we came alive and controlled the meet." According to Ryan, the Irish ran a distance of 1 mile and 20 seconds.

Scoring the victory, Irish guru Sean O'Reilly, who entered the track meet as the number one runner, finished within seven seconds of each other.

"Mike worked extremely hard over the summer and deserves to be where he is," Plano said. "Piane and Rice were the ones that worked harder than the others."

The Titans of Detroit finished close to the Irish and, in fact, were first and third place finisher.

By BILL HEGSTEDT

In Notre Dame's first meet last weekend, Rice placed third and in the second mile we came alive and controlled the meet. The Titans of Detroit finished close to the Irish and, in fact, were first and third place finisher.
