ND postpones Israel program

By CATHY STACY
Assistant News Editor

The Jerusalem foreign study program planned for this spring has been cancelled because of the violence and tensions in the area, according to Isabel Charles, associate provost and director of the foreign study program.

Charles felt that the situation was just too tense to send a group of young people (to Jerusalem)," said Charles. Notre Dame's Ecumenical Institute at Tantur is located between the Israeli and Palestinian factions on the West Bank, she said.

"There has always been a concern about terrorism since the program began in 1985, but this string of violence is really a new isolation," said Charles. The last few weeks before Christmas seemed to indicate, however, that the violence would be prolonged.

"Tantur is very safe itself," she said, "(and) has very high walls around it." The tensions in the occupied territories, however, would restrict the young people (to Jerusalem)," Charles said. Notre Dame's provost and director of the Ecumenical Institute at Tantur is Mike Dunn.

The program planned for this spring has been cancelled because of the violence and tensions described their reactions as "shocked" and "disappointed." They generally agreed, however, that Notre Dame had made the right decision.

Stevenson gives plea of innocent in misdemeanor

By ERIC M. BERGAMO
Senior Staff Reporter

Notre Dame basketball player Mark Stevenson pleaded innocent Dec. 30 to a criminal conviction for mugging a female student, in connection with an incident last month at University Park Mall, according to County Prosecutor Michael Barnes.

Stevenson, 23, of Mishawaka, appeared April 1 in Mishawaka Traffic and Municipal Court and said he was not present when the incident occurred. He said he did not want to comment further, according to police reports.

Stevenson and Ramona Phillips, 20, an employee of L.S. Ayres & Co., were apprehended around 4 p.m. Dec. 13 by Mishawaka Police after Stevenson was allegedly leaving the store with merchandise that had not been fully paid for, police said.

Phillips, a cashier, was under surveillance by security officers after the store received information that she had not rung up the full price on other transactions, police said.

Stevenson had paid for a pair of socks and a turtleneck shirt, but another shirt and sweater were allegedly in the bag and not paid for, according to police reports.

Stevenson was arrested on a preliminary charge of theft by deception and released on his own recognizance. Phillips was arrested on a preliminary charge of criminal conversion and released on $250 bond.

The prosecutor's office reviewed the case and decided to proceed with a criminal conversion charge, Barnes said.

The case is expected to play the remainder of the season, Sports Information Director John Heisler said.

No joy in Domeriville

Dedicated Notre Dame fans who made the trek to Dallas brave the cold and watch in dismay as things don't go well for the Fighting Irish in the Cotton Bowl. The Irish were defeated by Texas A & M 35-10. Sports has complete coverage of the Cotton Bowl on page 16.

South Bend man arrested for threatening phone calls

By JIM RILEY
News Editor

Notre Dame Security has arrested a South Bend man in connection with threatening phone calls made to students at Notre Dame and Indiana University at Bloomington.

Security made the arrest last Friday in its office on campus after questioning the suspect about several complaints received from female students at Notre Dame, according to Phil Johnson, assistant director of Notre Dame Security.

The man, Donald Jackley of 4023 York Road, was charged with five counts of intimidation and two counts of criminal confinement, Johnson said. The arrest warrants were issued in Monroe County in connection with the calls made to Indiana University students.

"The case has also been referred to the St. Joseph County prosecutor to see if it will be appropriate to issue charges in this jurisdiction," Johnson said.

He said Security began investigating the calls in October. "We worked this case with eight victims," he said. Sometimes the caller would phone the student's residence and tell the female student that he was watching her or keeping an eye on her.

U.S., Japan vow to ease tension

Associated Press

WASHINGTON - President Reagan and Japanese Prime Minister Noboru Takeshita vowed Wednesday to continue to work toward easing trade friction, but they apparently failed to nail down an agreement on the thorny issue of U.S. work on Japanese construction projects.

At the same time, the two leaders also sought to reassure shaky financial markets with a joint statement hinting that fresh resources would be made available for the Federal Reserve System to intervene in currency markets in support of the battered U.S. dollar.

The statement, issued as the dollar was again declining in foreign exchange markets worldwide, declared that the United States and Japan "have developed arrangements to assure the adequacy of resources for their cooperative efforts" in the markets.

Meanwhile, Takeshita said his government was taking steps to stimulate economic growth and hoped to be able to reduce Japan's trade surplus by $10 billion this year.

Takeshita, in remarks in the East Room after the summit session, said he was hopeful for a "mutually satisfactory solution on the pending issue of access to major Japanese public works."

However, administration officials were less optimistic about a new Japanese plan to spend $40 billion on public works projects.
President Reagan said he felt "pretty good" on Wednesday afternoon after being up much of the night with an upset stomach and nausea. In what was called a coincidence, he will enter the hospital Friday for a six-month checkup to guard against a recurrence of colon cancer. In addition, he will have a chest X-ray, a stress test and a CAT scan, which is akin to a three-dimension X-ray. "It's all part of his routine examination," said a White House aide. Reagan cut back his schedule Wednesday but went ahead with a late-morning meeting with Japanese Prime Minister NoborU Takeshita. -Associated Press

Arthur Pearis, Director of Notre Dame Security from 1965 to 1978, died after an illness. Pearis was chief of police in Niles, Michigan before serving at Notre Dame. Pearis was 73 when he died. -The Observer

Bookbag thefts have started again at South Dining Hall, said Phil Johnson, assistant director of Notre Dame Security. He said students are allowed and encouraged to carry their books into the seating areas. Johnson said he encouraged students to write their names on an inside page of their books so they can identify them if they are recovered. -The Observer

Security apprehended two people for allegedly breaking into student vehicles parked in campus lots during break. Johnson said six or seven vehicles were broken into as of Wednesday afternoon, Johnson said. -The Observer

Proffiteers and a smaller stadium have combined to drive up the market price of Super Bowl tickets, effectively putting them out of reach of the average fan. An end zone seat is going for about $600 and a seat on the 50-yard line costs up to $2,000 at Murray's Tickets in Anaheim, Calif., said the firm's Mike Crowley. Super Bowl tickets have a face value of $100, up from the $75 charged the past two years, but they are extremely difficult to acquire at the set price because public sale is virtually nonexistent. About 2,000 tickets are sold to fans who write in to participate in an annual Super Bowl ticket lottery. Those whose names are picked can buy two tickets. The Jan. 31 game is being played at San Diego Jack Murphy Stadium, which will seat about 73,000 people, well below the capacity of the 100,000-seat Rose Bowl, site of last year's Super Bowl. -Associated Press

Bink: 'Queen for a day'

By CHRIS BEDNARSKI
News Editor

They called her Miss Notre Dame, but Student Body Vice President Laurie Bink was really queen for a day.

Dressed in the gown she wore to her junior prom, the Breen-Phillips Hall senior represented Notre Dame on a float Jan. 1 in the nationally televised Cotton Bowl parade in Dallas, Texas.

She also shared a float with female representatives from seven Southwest Conference schools during halftime of the game.

Most of the other women, however, were homecoming queens, Bink said.

In late November, Cotton Bowl officials sent a letter to Executive Vice President Father William Beauchamp asking for a female representative to act as Miss Notre Dame during the week of the Cotton Bowl, Bink said.

According to Bink, Vice President for Student Affairs Father David Tyson said that since she was elected by the students, it was the fairest thing to do.

Bink said she initially thought she would represent Notre Dame only at cocktail parties and luncheons. She said it wasn't until the early part of December that she found out about the float and parade.

Flying to Dallas on Dec. 29, Bink attended a brunch, luncheon, cocktail party, and New Year's Eve Ball with the homecoming queens as well as Notre Dame, Texas A&M and Cotton Bowl officials.

"Down there they called you Miss Notre Dame," she said. "I call myself a representative."

Bink said she felt a little silly. "I wondered what people would think," she said. "It's not something I'm accustomed to doing. I felt a little uncomfortable."

It would, however, "have been an insult to the Cotton Bowl Committee if we didn't send anybody," she said. "It's part of their southern tradition. To them, it wasn't silly."

High school drug use declines

Associated Press

WASHINGTON - Cocaine use by high school seniors fell 20 percent last year, the first time in more than a decade there has been a significant decrease, federal health officials said Wednesday.

Marijuana smoking and other illicit drug use continued a seven-year slide, according to an annual survey conducted for the Department of Health and Human Services.

"Despite the long-term downward trend for most illicit drugs, cocaine use in each of the past 13 years has either increased or remained essentially stable," HHS Secretary Otis Bowen said at a news conference. "For the class of 1987, however, we finally see a significant downturn in cocaine use."

There have been slight decreases in cocaine use in three other years, but nothing approaching the magnitude of the 1986-87 drop. "Attitudes toward cocaine and other illicit drugs now reflect a greater awareness among our young people of the dangers of drug use," said Bowen, citing the highly publicized deaths of college basketball star Len Bias and professional football player Don Rogers as one probable reason.

"It is indeed a shame that the deaths of many talented young people took place before the danger of cocaine use was widely believed by our youth," said Bowen.

At the White House, spokesman Marlin Fitzwater said President Reagan and the first lady "welcome these trends. "The president has often said we have to stop the demand for drugs first, and these results are just saying no. It is welcome news indeed."

CHAMPION INTERNATIONAL CORP.

will hold a presentation for its

Sales Training Program on

January 14th at 7:00 pm
in the
Alumni Room of the Morris Inn

All Senior Business and Arts and Letters Majors are invited to attend.

Moderately informal attire.
Light refreshments will be served.
Why has Macintosh become the most popular computer among faculty and students in academia?

Well, maybe it's because:

You can get started right away since Macintosh™ is the easiest personal computer to use.

You can use the most productive software for word processing, publishing, business, graphics, science, and much more.

You can also communicate with other systems like DEC®, IBM® and Cyber®.

Although it comes with everything you need, you can expand your Macintosh even further without giving up true portability.

And as a fulltime student, faculty or staff member, you can buy one before January 15 at a price you won't want to miss.

Macintosh
The power to be your best.™

give U.S. construction companies more access to Japanese projects after the Reagan-Takeshita session than they had been Tuesday.

A senior official, who briefed reporters on condition of anonymity, said the Japanese overture was only "a framework. It doesn't itself resolve all the problems that are involved."

The projects involved are expected to total up to $60 billion over the next 10 years. U.S. officials said the plan includes joint ventures between American and Japanese companies. It was the first meeting between the two leaders since Takeshita took office in November.

Standing alongside the new Japanese leader at a departure ceremony, Reagan said, "I found that our views on international questions coincide to a remarkable degree."

"We discussed the vital issues of the day and established an excellent personal rapport," he said.

Administration officials had expressed hope before the meeting that the president would develop the same warm relationship with the 63-year-old Takeshita that he had with former Prime Minister Yasuhiro Nakasone.

Takeshita called the meeting "cordial and candid."

Politics
rage on
in 1988

Associated Press

Pat Robertson defended his plan to eliminate tobacco in the face of Southern outrage on Wednesday, declaring "I'm on the side of the angels on this one." while in Michigan the first test of the 1988 presidential season appeared headed for confusion rather than a clear winner.

Robertson, the former television preacher, said there was no question that smoking causes cancer, birth defects and heart disease as he campaigned for the GOP presidential nomination in tobacco-producing South Carolina.

The state has been considered one of his Southern strongholds, with its GOP primary scheduled three days before the Super Tuesday primaries in the rest of the South. Robertson insisted he was not worried by the brushfire that erupted over his call for phasing out the tobacco industry in seven to 10 years.

"I defy anybody to defend giving anybody else lung cancer," Robertson said, adding that he is a reformed 1-pack-a-day smoker.

Robertson was in an uneasy alliance with Michigan supporters of Rep. Jack Kemp as they prepared to do battle with Vice President George Bush's forces at county conventions Thursday night.

Bush's chief rival, Bob Dole, who has bypassed the Michigan contest, campaigned in Iowa and called for more affordable health care for the elderly and tried to put aside his feud with Bush.

Among the Democrats, Rep. Richard Gephardt renewed his calls for tougher trade policies as he said most new jobs in the country pay poverty-level wages.

"A lot of people say the unemployment rate is down and that's great, (but) you'd better take another look," he told high school students in Manchester, N.H. "The unemployment rate is down, but all the new jobs, about two-thirds of them, are poverty level or below jobs. And I don't think anybody in this room wants to work for $3 or $4 an hour."

Massachusetts Gov. Michael Dukakis also was campaigning in New Hampshire, site of the nation's first primary Feb. 16, while Sen. Albert Gore, Jr., visited a homeless shelter in New York. Jesse Jackson campaigned in Alabama, and Bruce Babbitt went looking for money in Los Angeles.

Voicing dissatisfaction with the field of Democratic contenders, Senate Majority Leader Robert Byrd of West Virginia said in an interview published Wednesday that he hopes no candidate emerges from the primaries and that a brokered national convention would look to others than the near.

Byrd mentioned as possible alternatives Sens. Bill Bradley and Sam Nunn, Gov. Mario Cuomo--and himself. "I know I could do as good a job," he told the Charleston Daily Mail.

In Michigan, Bush won a legal battle Tuesday when a federal judge rejected a Kemp and Robertson challenge to state laws governing the meetings.
Israel expels Palestinians, ignoring protests

Associated Press

JERUSALEM - Israel expelled four Palestinian activists from the occupied territories yesterday, igniting international protests, and its soldiers killed two Arabs in the riot-torn West Bank and Gaza Strip.

A cabinet meeting ended with no announcement of new measures to deal with the violence that began Dec. 8 in the

Threat

continued from page 1

tive, Johnson said. "In other calls, they called not the student but the student's parents or the boyfriend of the student" and said that the student was being held, said Johnson.

Johnson said Security noticed a similarity between some of the cases. "Four of the students had come in on the same flight or the same day, out Michiana Regional Airport, he said.

Jackley, who worked at the airport at the time, came under suspicion in the course of the investigation.

Johnson said Security subpoenaed the suspect's telephone records. Security noticed a number of calls to

lands Israel captured from Jordan and Egypt in the 1967 Middle East war. More than 30 people have been killed, hundreds wounded and thousands arrested.

In Washington, State Department spokesman Charles Hiedeman said of the deportations: "That's an action we deeply regret."

A U.N. doctor, speaking on condition of anonymity, said the body of a 12-year-old boy killed by gunfire was taken to the Jabaalya refugee camp clinic in Gaza. Shifa Hospital in Gaza City said a 10-year-old boy was in serious condition with bullet wounds in the chest.

Military officials said they could not confirm the Gaza deaths, but said soldiers near the West Bank town of Ramallah opened fire on Arabs who threw stones and iron bars, killing a 19-year-old man.

The confirmed number of deaths, not including the one reported by the U.N. doctor, stood at 63 on Wednesday.

Palestine Press Service, an Arab-run agency, said three more people died of injuries suffered previously: a 4-month-old girl and 12-year-old girl suffocated by tear gas, and a 40-year-old man shot 10 days ago.

The report could not be confirmed independently.

According to the Israeli military officials, a young man and another aged 65 were wounded in separate shooting incidents in the Ramallah area.

Hospitals in Gaza reported four people wounded by gunfire Wednesday and 10 women treated for injuries caused by rubber bullets.

A report by Israeli army radio said a soldier and a border policeman were wounded.

The Israeli military command said the four, among the leaders of the investigators and organizers of the disturbances in the occupied West Bank.

Others mentioned financial difficulties with shipping their belongings home and then back to school. They also regretted having to cut their vacations short and coming back to school a week earlier than they expected to leave for Israel.

Johnson said he had just bought a Hebrew scrabble game and learned the Hebrew alphabet the day before he was told the trip was cancelled.

This was the first Jerusalem trip for Evangeline Judd, who is considering reapplying next year.

"This is the biggest thing I ever looked forward to in my life. I'm going to try going again...I realized how ill-prepared I was with the language and I have a whole year now to prepare," said Dunn.

Israel expelled Jabril Mahmoud Rujibi, Jamal Mohammed Jihara, Bashir Ahmed Al Kheiri and Hussam Abdul Rahman Khader despite a U.S. warning that the action might cause further unrest and violate the Geneva Conventions on the rights of civilians in occupied areas.

A statement from the military command said the four, who have served prison terms as Palestine Liberation Organization activists, were among the leaders of the disturbances in the occupied West Bank.

Good Grief.

Whether you're into business, science or engineering, a TI calculator can make your courses easier to take.

Every year, thousands of hapless students watch their course load become an overload. And every year, the smart ones among them pick up a TI calculator and take a load off.

TI calculators have all the right functions you need. We offer everything from advanced scientifics that clock your performance to programmables that speak your language to a solar-powered calculator that highlights your answers, even in lowlight conditions.

And the large, color-coded keys and simple keyboard layouts make TI calculators easier to use than any other. Maybe that's why more students rely on TI calculators than any other brand.

Cheered up

The Notre Dame cheerleaders get fans psyched up at the Cotton Bowl pre-game pep rally in Dallas. The fans probably could have used some post-game cheering up as well.

Associated Press

ELIZABETHTOWN, Ky.-It has been a long road back for Kathy Lynch since she was kidnaped in Indianapolis and critically injured in a fiery car accident that left her in a coma for three weeks.

"It could have been worse," said Lynch, 25. "I could easily have been paralyzed. I could have lost an arm. I wouldn't wish what happened to me on my worst enemy, but it could have been worse." Following the three weeks of unconsciousness, Lynch spent months of surgery and recovery during which she re-created her memory by reading newspapers and books and talking about old times with her family.

Now she's attending classes full time at the University of Louisville and waiting to move into a dormitory.

Lynch said her parents suffered while wondering if she would survive. "My right side of my face was shattered. I've got scars everywhere except my toes," she said. "But I don't even remember being in the hospital. They were there the whole time wondering if I was going to die."

Lynch met Robert Dean, 27, in 1986 at an Indianapolis restaurant where she worked after moving to the city to find a job several times in the past. He was convicted on charges of burglarly and fleeing police, said Indianapolis police detective Albert Alford, Jr., who investigated the case.

"I am coming more to the opinion that Type A behavior may not have much to do with coronary heart disease in the final analysis," said Dr. David Ragland, who directed the latest study.

In the 1960s, a large research project called the Western Collaborative Group Study concluded that men with Type A personalities were twice as likely as less aggressive people to survive heart disease, according to a study that challenges the advice that heart attack victims should slow down and relax.

The research also casts new doubt on the theory that Type A behavior puts people at higher risk of getting heart disease in the first place. That idea has already been questioned by several other researchers in recent years.

According to the theory, Type A's are ambitious, irritable, competitive people, always in a hurry. Type B's are more self-secure and patient and don't let small aggravations bother them.

Accident victim almost recovered from coma, injuries

Innsbruck: a foreign study experience

Hello from the middle of Europe, at Innsbruck, Austria. Those of us in Notre Dame's Study Program here thought we'd let you all know a little about life at Innsbruck, even if it did take a little time to get there. Of course we, though inept we may be, are at last, can actually survive on our own. Some of us even remembered Evelyn's formula for converting Fahrenheit to Celsius degrees, and I never thought that Chem 115-116 would do anything like cooking anything good.

Not only do we speak German, make many great new friends, and try to survive, but also we travel around a lot. So far this year many of us have visited Germany, Greece, Czechoslovakia, Hungary, and Italy, to name a few countries, and we still have more than enough time to continue our travels. From sleeping on beaches in Sylt, to discovering what a youth hostel really is, to seeing more of the Koblenz train station than the city itself, to meeting really friendly bartenders and hotel owners in Liezen, and of course to pilfering pieces of the Berlin Wall, travel plays an important role in our lives here.

Perhaps I ought to mention that we actually take classes here at Innsbruck, too. Each of us has at least five classes that are Notre Dame credits taught mostly in German. Many of us also take courses through the University of Innsbruck, for transfer credit, straight to Notre Dame. This is a very brief overview of life in Innsbruck, from the language, the friendships, the survival, the travel and the actual classes. I would like, however, to extend a special note to all of you considering study abroad next year, especially those of you thinking about Innsbruck. All of us here now remember the difficulties there are in deciding to go, but now we also know what everybody meant when they said "It's great! Go for it!" This year has been good for all of us and we think you would be able to find nowhere else in the world. And for those of you thinking about coming to Innsbruck, remember that if your soft-boiled eggs explode, you can always tell the Austrians about this wonderful new American specialty that you just happened to cook for them!

Greg Scheckler is a sophomore enrolled in the 87/88 Innsbruck Program.

P.O. Box Q

D2 needs to be made safer

Dear Editor:

Student murdered in D-2 after parking car.

The campus itself, off-campus that is, is a relatively safe area as most would agree. One can freely wander the campus at day or night in most areas and not have to worry about being robbed, raped, or molested in any manner. We can congratulate the security department for that fact because of the fine job they have done within the confines of campus.

Turning to "off-campus," however, we see the state of security to be a different story. First, let me define off-campus as I refer to it in this letter: areas outside the confines of north and south quads, namely the parking lots that surround campus. How many times a week do we read in Security Beat that a car was vandalized or a radio was stolen? Plenty. It is a common occurrence here. Off-campus is not safe. The lots are dark, under patrolled—both day and night—and open for anyone to freely enter at any time of day. We have seen many results of this lack of security already in the Security Beat. How long will it be before a student or faculty member returns to Security Beat? How long will it be before a student or faculty member returning to his or her car is robbed, raped, beaten or even murdered? I think that at the rate we are going, it is just a matter of time.

"So where is Security," you ask yourself. Aren't there a few cars and foot patrols patrolling the area? The answer is yes, but they are busy doing important things like raising money by distributing tickets or using their new toy, the speed gun. Now I'm not one to say that these things aren't important, but I think they're not as important as striving to get these things stopped. These forms of enforcement should be continued, but let's think about off-campus now, before it is too late.

To sum it all up, I have a short list of the many things would improve the situation. Put a guard at the entrance of D-2 and get some barbed-wire on the fences. Improve the poor lighting. Patrol D-6 and other areas that are too small to warrant a full-time guard but are not used as much at night (off-campus student and faculty parking) is somewhat nearby. So how do we pay for it? Well at $35 per semester we can think that off-campus cars, I think there is plenty of money. The money we spend on parking just needs to be pulled out of the "black hole" it goes into. With a little push from student government and the faculty, the changes can take place in almost no time at all. That's a result of the inherent beauty of them: they're simple and easy to implement.

Brown, others unhurt after auto accident

By DENNIS CORRIGAN
Sports Editor

DALLAS - Surprisingly, the hardest hit Irish Heisman Trophy winner Tim Brown took in Dallas didn’t occur in the Jan. 15-20 Cotton Bowl loss to Texas A&M. The hardest hit took was on Dec. 29, 1987.

After attending a Dallas Mavericks game, Brown was returning when he was involved in an automobile accident.

According to Brown, he and a friend, Debbie Young, left the game near the end of the third quarter. He was driving through an intersection when another car ran a red light and struck the 1967 Grand Am that Brown was driving.

“I was driving on Field Street getting ready to continue Main when the auto accident happened,” Brown said the following day. “If I hadn’t seen the other car it would have hit our car around the door, and that might have been the end of it for me this week.

“I was wearing my seat belt, and it was the first time I had been hit that hard all year, on or off the field.”

The driver of the other car was identified as Kristi Coker, a 17-year-old student at Dallas’ Woodrow Wilson High, which, ironically, is Brown’s alma mater. Brown, who wrote a daily column for the Dallas Morning News, said that when Coker realized who she had hit, she said that she would probably be kicked out of Woodrow.

In the column, Brown reported that the Notre Dame cheerleaders were in the car behind Coker. At first they checked on Coker’s condition before realizing who she had hit.

None of the people involved in the accident were injured.

Andrysiak comes out throwing

By MARTY STRASSEN
Assistant Sports Editor

DALLAS - Terry Andrysiak was the last person to think that moving the Notre Dame offense after a three-month absence would be easy. But it was, until the senior quarterback’s second-quarter interception inspired Texas A&M and contributed to a 35-25 victory in the Cotton Bowl on New Year’s Day.

“As far as passing is concerned, I thought everything was still there,” said Andrysiak, who rebounded from a broken collarbone suffered in the fourth game of the season to start in Dallas. “I still had confidence that we could move the ball.

“I thought the passing game would open up the run a little bit more, but it didn’t. We weren’t hitting the holes fast enough.

The Notre Dame rushing attack, which gained 252 yards per game during the regular season, its best average since 1974, was dammed against the Aggies. But while the backs were missing the holes and picking up just 74 yards, Andrysiak was hitting the receivers consistently.

The senior came out and led the Irish to a touchdown on the game’s opening drive, completed a 10-yard pass before missing. Andrysiak finished with 303 passing yards, connecting on 15-of-25 with one touchdown and one interception.

“I wasn’t sure what would happen (after the Pittsburgh game),” Andrysiak said of the game in which everyone wrote him off for the remainder of the season. “I hoped to come back, but it was a longshot at that point.

But Andrysiak, who is applying to return to Notre Dame for a fifth year, began practicing with the team just before Christmas and took hits for the first time on Dec. 26.

Irish coach Lou Holtz liked what he saw and named Andrysiak the starter in place of sophomore Tony Rice, who called the signals for most of the year. Holtz said both Rice and Andrysiak would see time, but Rice didn’t take the field until the fourth quarter.

“It felt fine physically,” Andrysiak said. “I was a bit rusty in some of the decision-making and in reading coverages.

Andrysiak attributed Alex Morris’ second-quarter interception in the endzone to a poor decision on his part.

“The place was supposed to go to the tight end side, but I rolled out to the split end side. He was covered by the defender Andy Heck was covered.”

“I should have run it myself or thrown it away. That was something that the quarterback has to deal with. That’s my fault and I shouldn’t have thrown it up for grabs.”

The Aggies took the ball 80 yards and scored to tie the game, 10-10. They then capitalized on a Braxton Banks fumble on the next Irish play from scrimmage and took an 18-10 halftime lead.

What started out as easy became impossible for the Irish after that.

“Yes, it was easy,” said Holtz. “We didn’t have to worry about it.”

“And it should have been easy the whole game. But we let them control the momentum. Everything that could go wrong, did go wrong.”

Andrysiak expects to hear from Notre Dame’s academic administrators in the next few months concerning his request to return to the University next year.
Crafter starts new trends in egg art

Associated Press

EVANSVILLE, Ind. An ostrich egg is only a shell to Don Ulrich, but in time Ulrich will turn it into a piece of art. The projects he has hatched so far include a piece commemorating the Statue of Liberty, complete with doors that open to reveal a miniature Lady Liberty inside the egg. Ulrich crafted another of the grapefruit-size eggs for the anniversary of the U.S. Constitution, and a third has a working rhinestone-studded clock.

Ulrich, a music store owner, piano tuner and former tool and die maker, decorates his pieces elaborately with gems and scrollwork, and the doors open to reveal the lighted displays inside. The eggs are mounted on elegant metal holders which Ulrich said rest on hand-carved wooden stands.

"It took me over two years to build that first one (the clock)," said Ulrich, whose inspiration came from the shells came from the work of Peter Carl Faberge, a Russian goldsmith and jeweler. But Ulrich's eggs are not reproductions of Faberge's work. The eggs are mounted on the bottoms of Faberge's egg frames. Ulrich said he found many of the eggs in antique stores.

"The hardest part was figuring out how to mount an egg and clock movement in an egg without breaking the egg," he said. "Once I had the clock movement, I knew the parameters I had. You can suspend it or mount it rigidly on top. After a few tries I figured that suspending it was the better of the two choices."

One setback happened when Ulrich finished a precision cut on the shell for the clock egg shortly before midnight. Ulrich was carefully lifting a cut section about the size of a large bracelet when it fell from the shell. Ulrich said the bracelet shattered on the concrete floor of his basement workshop. Ulrich said he was "frustrating," he said. "Because I just picked up the pieces, set them aside and went to bed. You can scream and cry when that happens, you just have to go on." Ulrich built a wooden form to match the exact dimensions of the broken section and carefully glued the pieces back together.

There is no substitute for patience in such detail work, even without setbacks, but the rewards are familiar to all hobbyists. "It's relaxing in that you concentrate totally on what you're doing," said Ulrich. "This built a wooden form to match the exact dimensions of the broken section and carefully glued the pieces back together.

"The time I put into it makes the stress of everyday living." Ulrich said, adding that each element of the project presents its own special difficulties. "The hardest problem is getting the egg, I carve a wooden stand, and the wooden stand takes more time than the actual carving," Ulrich said.

According to Ulrich, his most time-consuming egg was a clock because he had to carefully cut out the shell's middle section, affix stones to it to form Roman numerals and mount it on a timekeeping mechanism so that it would rotate at the proper speed around the egg's long axis.

Traditions battle at Cotton Bowl

By PETE GEGEN

Like the battle on the field, Irish and Aggie fans squared off in the stands in a show of support for their teams. Because the game was played in Texas, Irish faithful shaking yellow pom-poms were outnumbered by crimson-clad fans waving towels in support of the 12th Man. Traditions also clashed, as an A&M pregame ritual involving players and fans outlasted Notre Dame's fight song by at least 10 minutes.

Irish fans got a chance to show their spirit in the first quarter as their team took a 10-3 lead. But as the game dragged on, and the Notre Dame fans mattered to themselves—"Alright, here we go"—over and over, the Aggie fans continued to wave towels and cheer on cue.

While the fans were basically segregated by color, a few fans decked out in Notre Dame sweatshirts or hats could be spotted sprinkled among the A&M fans. In section three, for example, a Subway alumnus was surrounded by Aggie faithful.

"I knew I was sitting in the A&M bleachers," said Mike Cabet of Plano, Texas. "But that's one thing you have to put up with when you come to the Cotton Bowl!"

Cotton

boom we had three mistakes in a row." Holtz said. We were driving and had a pass intercepted in the end zone. Then they came back with the ball, out of bounds, and scored on us. The next thing that happened was the screen pass that was called a fumble. "We were to be ahead 17-3 and in a two-minute span, they're ahead 18-10." The Aggies opened the second quarter with a drive that put them to the goal line, but then the turnover plague hit them. Matt Gurley dove for the endzone, but Wes Pritchett met him at the two yard line and forced a fumble.

"That's what I was looking for," Gurley said. "I fumbled the ball away to Dana Battiste. Once again, the Aggies put the ball in the endzone, the time on a Bucky Richardson (who split time with Pavlis at quarterback) sneak which increased the lead to 15 at 25-10. A field goal and a Richardson 8-yard scamper (following an interception of Tony Rice) rounded out the scoring.

All afternoon the Aggies seemed to pound the Irish up front, defensively and offensively. They hanged out 349 rushing yards (96 by Richardson) while holding Notre Dame to 74 rushing yards of its own.

"Before the first snap, (guard) Jerry Fontenot patted me on the butt and said ‘let’s go for it,’" said Aggie guard Matt McCalt. "That helped me. The entire offensive line is a close knit group."

"The offensive line did a great job," Gurley said. "They controlled the line of scrimmages and opened the holes. All the running backs had to do was run hard and hit the holes. The line really took control when we needed it early in the third quarter."

"Sherrill, whose squad finished at 10-2, said afterward that this game should give the Aggies some respect. "We will be a Top 10 football team, but this team has been awesome the last three seasons," Sherrill said. "Our two quarterbacks next year will give us a dimension a lot of teams don’t have. With another spring Bucky Richardson can turn into an outstanding thrower."

"I thought we could dominate the line of scrimmage. Before the game, of course, I was one of my players, he would have been on the sidelines."

"But when faced with those comments and some pressing questions from the media, Brown refused to cry on the towel for what he did to recover it." "The way I went about it probably wasn’t the right way," Brown noted. "But it was my bowl and he didn’t have any right to take it. I didn’t intend to tackle him. But when I grabbed him that’s what happened."

Referee Dick Burleson also defended his call on the play. "It was not a striking foul or a flagrant foul," Burleson said. "There are certain fouls that require automatic disqualification, and that was not one of them."

Brown had a good day before the incident for which the 52nd Cotton Bowl Classic will probably always be remembered. He caught six passes for 105 yards and a touchdown, all in the first half, and returned six kicks and one punt for a total of 133 yards in the 35-10 Aggie rout.
Upset loss to Lafayette tarnishes ND's break action

By RICK RIEETROCK and BRIAN O'GARA
Assistant Sports Editors

MILWAUKEE - Notre Dame ended its road swing last Saturday with a laugh over fellow Great Independent Marquette, 62-54.

The Irish and Warriors crawled out of the starting blocks, with the Warriors holding a 2-1 after five minutes of play. Notre Dame slowly heated up from the field, but Marquette never did. The Irish put the game away early in building a 32-12 halftime lead.

Marquette hit just five shots in 20 attempts and was 2 of 16 from three-point range. The Irish were 12 of 26 from the field, 5 of 11 from the line and connected on 15 of 26 (58 per cent).

"We wanted to stop their penetration," said Marquette coach Bob Dukiet. "We took the shots we wanted them to take, and they hit them."

In the second half, the Irish kept the lead above 20 points until the eight-minute mark. Marquette, starting three freshmen, shot 32 per cent for the game. The Irish controlled the boards, with 30 rebounds, and harassed the Irish backcourt, committing 14 turnovers.

"They've got some good young talent, but it's hard to pull together when the people in the seats give up on you," Phelps said. "If you're not professionals. College athletes don't deserve booping."

David Rivers led Lafayette with 35 points, 10 rebounds, and Rivers had 22, while Simmons led LaSalle with 36.

ND 88, Valparaiso 49

Notre Dame took control of Valpo early and never let up, running away with its fourth win of the season in a December 12 at the Joyce ACC. While Valparaiso tried to control the ball to keep the Irish off balance, the game, with the Notre Dame controlled the score and the game, outrebounding the visitors 43-18.

DePaul 73, ND 69

Despite holding a six-point lead with only 96 seconds left in regulation, the Irish fell to DePaul in overtime on December 12 at the Rosemont Horizon. The teams traded leads seven times during the game, but Notre Dame held the lead through most of the second half before the Blue Demons rallied to tie the score at the end of regulation. With the Irish ahead 63-57, DePaul scored six straight points thanks to a full court, trapping defense to tie the game. Then sophomore guard Bob Stiles found its fourth throw attempts to put Notre Dame up, but Edwards combined with the game, missed both to send the game to overtime.

Senior Kevin Edwards scored seven of the Blue Demons' nine points in overtime to give DePaul an early lead. The Irish tied the game at 67 with two minutes remaining, but Edwards combined with senior point guard Rod Strickland to put the game away and ice the win for the Blue Demons. Strickland finished with 22 points and nine assists, while Edwards added 17 points to lead the Blue Demons. David Rivers led all scorers with 36 points, playing all 45 minutes of the game.

Stevenson returned in the second half to play for three minutes, and should start in Saturday's game with DePaul. Senior center Gary Voice, who sprained his right ankle against Marquette last Saturday, and sophomore guard Joe Fredrick, who is suffering from tendinitis in the knee, did not play in last night's game. Both should be available Saturday.

Sophomore Scott Paddock, filling in for Voice at center, came alive in the second half to score 13 points as the Irish kept Yale at bay during the late comeback. Paddock, who did not attempt a shot in the first half, finished 6-of-8 from the field and pulled down a team-high 10 rebounds.

"Paddock played very physical tonight," said Phelps. "I thought he was an enforcer inside. He's up there dunking the ball. I don't want him shooting layups. Dunk it. You can't lay it up against guys like (DePaul's Stanley) Brundy."

Yale continued from page 16

Irish hockey meets Cadets after four easy wins

By STEVE MEGARGEE
Sports Writer

Having managed four easy wins over vastly inferior competition during the last month, the Notre Dame hockey team enters the hardest part of its schedule this weekend with two road games at Army. Irish coach Ric Schafer knows the Cadets will provide much stronger opposition than Dayton or Arizona. The Irish whipped Dayton, 13-3 and 11-1, on Dec. 11-12, and tamed the Wildcats, 9-5 and 10-0, on Jan. 8-9. Notre Dame cocolides with Army on Friday and Saturday night at 7:30 p.m.

"Army's one of the better teams on our schedule," said Schafer. "They're not a powerhouse in the East Coast, but they're respected. They've beaten some good teams.

"We're going to be challenged a whole lot the next four weekends with Army, then North Dakota State, Kent State and Air Force coming in."

The Cadets come into the weekend with a deceiving 5-2 record. As a member of the ECAC (Eastern College Athletic Conference), Army regularly faces national powers in conference foes Harvard and Cornell, and have a perfect 4-0 record against non-conference opponents. The Irish have faced Army four times in the last two years, and the Cadets hold a 3-1 advantage.

Notre Dame also will have to adjust to Army's larger ice rink. While the Irish regularly play on the JACC's 200-by-85 di­mensions, Army plays its home games on an Olympic-sized 210-by-100 rink at West Point, N.Y.

"Army's probably on a par with Dearborn," said Schafer. Notre Dame has split two games this season with conference rival Michigan-Dearborn, the current leaders of the American Collegiate Hockey Association.

The Irish prepared for this weekend's games by returning from winter break a week early and playing the University of Arizona last weekend. Notre Dame had no trouble winning 9-5 victory was the only time in the last four games that the Irish were held to under 10 goals.

On the weekend before final exams, the Irish had two home games with Dayton. The games proved to be the two easiest the Notre Dame hockey players had all week. Notre Dame showed it had no business competing with Dayton's team, currently on club status, as the Irish waxed the Flyers, 13-3 and 11-1. In the 13-3 win, South Bend native and St. Joseph's High School graduate Chris Klewa pulled a hat trick for Notre Dame.

Schafer was particularly impressed with the play of the line that features Matt Hanzel, Brian Montgomery and Tim Kuehl in the last four games.

"They're really clicked and put together some impressive passing plays," said Schafer. "They're really coming on."

In the second game, sophomore goalie Lance Madson helped the Irish record their first shutout in 128 games, a 10-0 rout of the Wildcats.

"We'd set a goal to play sound defensive hockey, and we held them," said Schafer. "We knew we'd score goals, and we didn't want to get careless."

In the first game, another Irish feast, the Wildcats at least managed to hold Notre Dame to under 10 goals. The 9-5 victory was the only time in the last four games that the Irish were held to under 10 goals.
Irish face N. Illinois tonight

BY THERESA KELLY
Sports Writer

Before tonight's game against Northern Illinois, the last time the Notre Dame women's basketball team had the home court advantage was Dec. 19, when it beat Valparaiso. Since then, the team took to the road over break, winning two of five games and finishing second in the Wildcat Classic.

"We're glad to be home," said Head Coach Muffet McGraw, "real glad to be home."

ND 93, Valpo 60
Way back on Dec. 19, the Irish defense held Valparaiso to a 27% shooting clip while the offense tallied its second highest point total of the season to win 93-60.

Indiana 62, ND 59
The Irish faced the Indiana Hoosiers on Dec. 21. After building up a 39-34 halftime lead, Notre Dame's game fell apart while the Hoosiers got theirs together to come from behind and win 62-59. Forward Heidi Bunek scored 16 points and brought down 11 rebounds to lead the Irish against a tough Big Ten opponent.

ND 83, Miami 68
The southern trip continued as the Irish faced the Hurricanes of Miami. As usual, Bunek and Botham led the team in scoring (24 and 14 points, respectively) and rebounding (9 and 10), as the Irish outscored Miami 44-28 in the second half to earn 83-68 victory.

Finally, the Irish will return home to the Joyce ACC tonight playing a second home game against N. Illinois in the first of two home contests.

"They're very good," said McGraw. "They played Iowa, the number-one team in the country, and they were down by 10 with 30 seconds to go. They had a chance to win."

McCraw was pleased with the outcome of the trip and says the road games and tougher competition have helped the Irish, along with the fact that many players are really performing well.

"The team is playing well together," she said. "Sandy and Heidi are both playing well. Mary Gavin is doing well, too.

OPPORTUNITIES FOR ENGINEERS -
Join BP America at the start of a new era.

Exciting opportunities for career growth are developing at BP America. We are seeking Engineers for major divisions of the company: Refining, Transportation, Marketing, and Chemicals.

BP AMERICA was formed recently by the combination of Standard Oil and BP North America.

Standard Oil, founded by John D. Rockefeller in 1870, is recognized as an outstanding refiner and marketer as well as a major holder of petroleum reserves. British Petroleum, one of the most active oil producing companies in the North Sea, the Middle East and Asia, is known as a great explorer and producer. Now, building on more than 100 years of experience, BP America is preparing for a new era of growth.

We start from a sound base — $24 billion in assets, 43,000 people worldwide, and sales volume that ranks us 13th among American industrial companies. We are expanding our operations in the growth areas of the world: chemicals, coal, minerals and precious metals, computer software, structural ceramics, carbon fibers, and more.

We encourage students who are receiving a Bachelor's degree in CHEMICAL, MECHANICAL, CIVIL, or ELECTRICAL ENGINEERING to consider opportunities with us. We will be interviewing on campus soon — schedule an interview NOW with your placement office. If you are unable to meet with us on campus, send your resume to: University Relations; BP America; P.O. Box 94949; Cleveland, OH 44101-4949.

WINTERFEST '88

Friday, January 15
Skating at the J.A.C.C. 10:30 pm - 1:00 am
- free rentals
- free hot chocolate & donuts
sponsored by SUB

Saturday, January 16
LUAU - Stepan Center 9 pm
- slip-n-slide
- music
- leis
- volleyball
- food
- dunk tank
- D.J.
Aggies roll over Notre Dame in Cotton Bowl

Turnovers doom Irish

By DENNIS CORRIGAN
Sports Editor

DALLAS - Notre Dame got its holidays confused. On New Year's Day, the Irish played Santa Clara in turnovers to Texas A&M, leading to four scores, as the Aggies went on to dominate the Irish in the 52nd Cotton Bowl Classic, 35-19.

The Irish were up 10-3 and driving for more with 4:06 left in the first half when the giving began. Notre Dame quarterback Terry Andrysiak, seeing his first action since breaking his collar bone at Pitt Oct. 10, rolled left and threw in the direction of tight end Andy Heck in the back of the end zone. Aggie cornerback Alex Morris made a diving interception, landing only with his feet inbounds.

"It was supposed to be a play-action pass, but we ran it to the wrong side," Andrysiak said. "We were misaligned and just tried to make something happen when we shouldn't have.

"I just dropped back and fired. I should have gone outside or over the top, but he made a great catch." Banks turned, back from his own 29 and fell on it. The officials ruled him down in the backfield. Morris was penalized for jumping, and the Irish were given a first down on the Texas A&M 28.

Suddenly, the Irish, who had looked impressive early, found themselves suffering from their mistakes.

"It looks like we were about to be up 17-3, and boom, boom, boom," said抑え COTTON, page 11.

Fans, traditions square off in the stands

Festive in the back of the end zone, Irish flanker Tim Brown bobbles the ball and is brought down by the Aggies' defense. The junior forward converted the dunk but was challenged on the basket. French forward converted the dunk but was challenged on the basket. At the Joyce ACC. But if anyone thought the Notre Dame would look past Yale to the Blue Demons, they were wrong.

The Eli battled the Irish point-for-point early in the game, tying the score at 13 on a Paul Maloney tip-in. Notre Dame's sophomore point guard Jameere Jackson countered with a three-pointer to give the Irish a lead they would never relinquish. Yale kept it close until the 9:31 mark, when a David Rivers' feed to forward Tony Jackson set off a 12-0 run.

"It wasn't planned," Barhorst said. "I just took it. In all the excitement of tackling a Heisman Trophy winner like Tim Brown, I had a hand on his towel and I took it. I didn't steal their 12th Man towels, and that the attempted theft was not premeditated.

The 12th Man is a kick coverage team started by Texas A&M head coach Jackie Sherrill five years ago. The team consists of 10 walk-ons and a kicker, and is chosen to uphold the Aggie tradition of the student summonsed from the stands to wear an injured player's uniform in a 1902 game.
