Dukakis: Victory is in sight

Associated Press

Michael Dukakis said Wednesday that victory in the Democratic nomination battle is "visible, but not inevitable" after his impressive New York win. Rival Jesse Jackson promised the presidential contest will get "even more exciting" as it moves to Pennsylvania minus Albert Gore.

"When I look back at Iowa now, there were many of us in this, but now there are three. Bush, Dukakis, and me," Jackson said after finishing second in New York.

Democratic leaders across the country talked of Dukakis as the party's likely standard-bearer in the fall, while Republican nominee-apparent George Bush said he looked forward to battling the Massachusetts governor, calling him "an old-world liberal Democrat."

"New York...almost locks it up for me or comes close to it," said Sen. John Glenn of Ohio, who won the 1984 nomination.

"It won't be a brokered convention. It'll be a first-ballot victory for Dukakis," said Democratic National Committee member Fred Brown from Coffeyville, Ohio. The focus of the Democratic campaign turned to Pennsylvania, with 178 delegates at stake next Tuesday.

Democratic National Committee chairman Paul Kirk cautioned that Dukakis had not locked up the nomination yet. Quoting a baseball maxim, Kirk said, "It ain't over 'til it's over."

But in contrast to earlier worries about a rigidly brokered convention in Atlanta in July, Kirk talked of "a very wholesome, positive unified convention." He lauded both candidates, saying "there are two who are going to be contending for the nomination down to the end, present a real opportunity for forging a coalition to win in the fall."

"These two" that Kirk referred to did not include Gore, the big loser in New York.

Hijackers given safe passage out of Algeria

Associated Press

ALGIERS, Algeria - Hijackers with "eyes of sharks" slipped away Wednesday after ripping their fingerprints from a Kuwaiti jet, and 31 hostages stumbled from the aircraft that was a prison of fear, brutality and death for 15 days.

The dynamic duo of "Batman and Robin" head for the hoop in the annual slam dunk contest, part of the An Tostal festivities.

The Shi'ite Moslem gunmen had murdered two passengers since hijacking Kuwait Airways Flight 421 on April 5 on a flight from Bangkok to the Persian Gulf, with 112 people aboard.

They agreed to free their remaining hostages after arranging safe passage with Algerian officials who mediated a settlement. The hijackers had demanded that Kuwait free 17 pre-Independence convicts and imprisoned for bombing the U.S. and French embassies in December 1983.

Among the passengers on the Boeing 727 were three cousins of the Kuwaiti ruler, Sheikh Jaber Al-Ahmed Al-Sabah. Kuwait's official news agency KUNA, citing Algerian sources, did not identify, said "five hijackers left the plane, then about 10 minutes later, four pirates left the plane. Following that the hostages came out" at 6 a.m., three hours into the 16th day of the hijacking. The number of passengers, 112, were estimated at seven or eight.

According to the agency, the hijackers were assured safe passage to either Beirut or Tehran.

A Soviet-built transport plane belonging to the Algerian government was seen in Algiers.

"probably the most important thing he said to (the students) was telling them a story about the academic problems he experienced his freshman year, now being the president of a university," said Gandy.

"I think the one that really hit home was when they were addressed by Monk Malloy," said Derek Gandy, admissions counselor. "They were really impressed with how down to earth he is as a priest and as a university president."

Iran mobilizes to face U.S.

**Associated Press**

NICOSIA, Cyprus - Iran began full mobilization Wednesday to confront the United States and Iraq, and it fired a missile into Kuwait that reportedly fell near a U.S.-run oil field. Iraq fired missiles into three Iranian cities.

The official Islamic Republic News Agency said Iranian forces killed or wounded 300 Iraqis and captured more than 250 in the Shemiran mountain region of Kurdistan in northern Iraq.

Iraq claimed its forces were mopping up Iranian pockets of resistance in Iraq's southern Faw peninsula after recapturing the region two years after the Iran-Iraq war began.

Iranian TV showed a ceremony in the gulf port of Bushehr, where senior military officials lauded the bravery of the crew of the patrol boat Joshan, which was sunk by the U.S. navy. Iran has said 15 of the Joshan's crew were killed and 29 wounded.

The clashes prompted Lloyd's of London insurers to double their rates on ships traveling to the gulf.

Admissions and Financial Aid Departments

"The students' reaction seemed to be really positive," said Rodgers. "There were some students who weren't actually considering Notre Dame who are considering Notre Dame now.

Although academic life was emphasized during the weekend, there were several social events, including a mixer, bowling night, and a mixer bowling night. An inter-denominational prayer service was offered in addition to Saturday evening Mass.

All of the visiting students stayed on campus with other minority students currently enrolled at Notre Dame. "I really believe the perceptions of the students about the professors and the school are the things that are really important," said Ken Durgans, director of minority student affairs.

Rodgers described the students as, "very good students (and) very intelligent. They had well-prepared questions. It was obvious they were good thinkers."

"I think the main concern was probably where exactly a minority student fits in at Notre Dame, and what are the support groups and networks available to minority students for both academics and non-academics," said Rodgers.

"I've had some phone calls from those students expressing their appreciation," said Rodgers. "I've actually had some students who returned home crying - they actually didn't want to leave."
ND nets grants of more than $1M

Special to The Observer
Notre Dame received $1,061,695 in grants during March for the support of research and various programs. Research fund totaled $703,664, including:
• $132,275 from the National Institutes of Health for research by Morton Fuchs, chairman and professor of biological sciences, on the reproductive physiology of Aedes mosquitoes.
• $123,500 from Upjohn Co. for unrestricted research by J. Kerry Thomas, associate professor of chemistry, and Thomas Feltner, professor of chemistry.
• $95,000 from the U.S. Department of Energy for research by John Loeasco, associate professor of physics, in non-accelerator high energy physics.
• $61,650 from the National Science Foundation for studies of the theory of several complex variables by Wilhelm Stoll, professor of mathematics, and Pit-Mann Wong, professor of mathematics.
• $55,000 from International Business Machines for research by J. Kerry Thomas, Newswald professor of science in the chemistry department, on photochemical mechanisms of photolithographic imaging systems.
• $50,000 from the National Science Foundation for research by Frederick Goetz, associate professor of biological sciences, on ovulation in fish.
• $44,400 from Sandia National Labs for research SHN technology in biodegradation of wastes by Robert Irvine, professor of civil engineering, Lloyd Ketchum, associate professor of civil engineering, and Charles Kulpa, associate professor of biological sciences.
• $40,000 from the National Science Foundation for research on complete surfaces in three-space by Brian Smyth, professor of mathematics, and Willy Jemielity, associate professor of mathematics, on eigenvalues of complex Laplacians.
• $22,500 from the Occidental Chemical Corp. for research by Charles Kulpa, associate professor of biological sciences, on biodegradative activities of bacteria in liquid-solid phase.
• $17,402 from Little City Foundation for research by David Cole, assistant professor of psychology, on the social integration of handicapped children.
• $9,069 from J. M. Mold Inc. for research by D. Chris Anderson, professor of psychology, on OB application to J. M. Mold.
• $4,000 from the Association of Theology Schools for research by Jean Laporte, associate professor of theology, on Origen's sacramental theology.
• $4,000 from the Indiana Commission on the Humanities for research by Thomas Jemielity, associate professor of English, on the Hebrew prophet in the satirist's mask.
• $1,500 from the University of Oklahoma for research by David Lodge, assistant professor of biological sciences, or predator prey interactions. Awards from instructional programs totaled $10,000, including:
• $5,000 from the Lilly Endowment Inc., for Lilly course development by Theresa Krier, assistant professor of English.
• $5,000 from the Lilly Endowment Inc. for research by Charlene Avalone, assistant professor of English, on division in 19th century literature of the United States. Awards for service programs totaled $34,007 from private benefactors for programs of the Institute for Pastoral and Social Ministry.
• $300,000 from the National Endowment for the Humanities for faculty development in the humanities, administered by Nathan Hatch, associate dean of the College of Arts and Letters and director of the Institute for Scholarship in the Liberal Arts.
• $34,024 from the National Endowment for the Humanities for work by Karl Americks, professor of philosophy, on Kant's lectures on metaphysics. Awards for other programs totaled $234,024.

Stealth bomber is now visible to the public eye

Associated Press

WASHINGTON - The Air Force, lifting a decade-long veil of secrecy, released pictures of its Stealth bomber on Wednesday and said the plane would make its first test flight this fall.

As disclosed in 1985 by then-Sen. Barry Goldwater, R-Ariz., the new long-range strategic bomber resembles a big "flying wing," with no fuselage in the middle.

The Stealth bomber, officially designated the B-2, takes advantage of the plane's unique characteristics, including its stealth, which was designed to fly without showing up on radar.

Sen. Sam Nunn, D-Ga., chairman of the Senate Armed Services Committee, predicted the plane will be a "game changer." He noted that the B-2 will render obsolete the Soviet bomber it was designed to replace.

"Dad was right. You get what you pay for."

The company flew a propeller-driven version of such a plane, known as the XB-35, in 1946. A jet-powered version, the YB-49, flew in late 1947 and was tested by the Air Force. But the service never purchased any of the planes and experimentation with the prototypes ended by the early 1950s.

At&T over any other long distance service. Because, with AT&T, it costs less than you think to get the service you expect, like clearer connections, 24-hour AT&T operator assistance, instant credit on wrong numbers. And the assurance that we can put virtually every one of your calls through the first time. That's the genius of the AT&T World Wide Intelligent Network. So when it's time to make a choice, remember, it pays to choose AT&T.

If you'd like to know more about our products or services, like the AT&T Card, call us at 1 800 222-0300.

The possessions of the late artist will be auctioned over ten days starting Saturday.

Hijack

continued from page 1

The air force took off shortly before dawn. It is rare for military aircraft to use the civilian Houari Boumediene airport and there was speculation that some or all the hijackers were aboard.

Algerian officials would not discuss the flight or its occupants. KUNA quoted Mohammed Taher, a member of the Algerian negotiating team, as saying without elaboration that the hijackers were "still here."

Interior Minister Hedi Khediri, who led the Algerian mediators, announced the drama's end without giving details and said the fate of the hijackers was the "concern of Algeria" alone.

Floodlights had bathed the blue and white jet nightly since it landed in the North African capital on April 13, but were extinguished at 9 p.m. Tuesday.

The Northrop Corp., which is building the plane for the Air Force, is known to have suffered some overruns and schedule delays, having written off more than $200 million on the project in recent years.

More people choose AT&T over any other long distance service. Because, with AT&T, it costs less than you think to get the service you expect, like clearer connections, 24-hour AT&T operator assistance, instant credit on wrong numbers. And the assurance that we can put virtually every one of your calls through the first time. That's the genius of the AT&T World Wide Intelligent Network. So when it's time to make a choice, remember, it pays to choose AT&T.

The possessions of the late artist will be auctioned over ten days starting Saturday.

The right choice.

Japanese-Americans may receive payments

Associated Press

WASHINGTON - The Senate voted Wednesday to give $20,000 tax-free payments to thousands of Japanese-Americans who were forced from their homes and sent to internment camps during World War II.

Final passage came on a 69-27 vote after an emotional debate in which senators recalled the sometimes-harsh treatment and financial losses suffered by about 120,000 Japanese-Americans who were interned after Japan attacked Pearl Harbor, Hawaii, on Dec. 7, 1941.

The bill would require the United States government to apologize for the mass roundups and would make each of the estimated 60,000 survivors eligible for $20,000 payments. A similar bill already has passed the House.

On votes of 67-30 and 61-35, the Senate defeated attempts to strip the bill of the payments, while retaining the apology. It then voted 91-4 to kill an amendment proposed by Sen. Jesse Helms, R-N.C., to withhold payments until Japan compensated American families for losses suffered at Pearl Harbor.

At one point, Sen. Spark Matsumaga, D-Hawaii, was brought to tears as he told of an elderly Japanese-American internee being killed by machine-gun fire when he strayed too close to a camp fence.

But Sen. Malcolm Wallop, R-Wyo., argued that the internment "was not a dishonorable act, it was the option of a nation in the first days of a war."

Sen. Daniel Inouye, D-Hawaii, a Japanese-American who lost his right arm in combat with the Army in Italy, said: "These payments acknowledge the unconstitutional deprivation of liberty...and the stigma of being deemed unloyal." 

Opponents, in addition to objections over the payments, complained about a statement in the bill that the internment "was caused by racial prejudice, war hysteria and a failure of political leadership."

ND, area researchers work on medical diagnostic tools

Special to The Observer

Researchers from the University of Notre Dame have joined colleagues from two Chicago-area universities in an interdisciplinary engineering research center that will work to develop healthier and far less expensive medical diagnostic tools with equal or superior capabilities.

Participating engineers from Notre Dame, the University of Illinois at Chicago, and Northwestern University will work together with faculty from several Chicago-area medical schools and teaching hospitals to advance the field of signal and image processing in medicine, according to Robert Gordon, vice president of advanced studies at Notre Dame.

The Engineering Research Center on Signal and Image Processing and Medical Applications (SIPMA) will have its primary facilities at UIC, he said.

The multi-institutional organization of the center will provide its researchers with access to costly MRI (magnetic resonance imaging), CAT, holography and other signal and image processing (SIP) equipment never available within a single institution.

According to Anthony Michel, dean-elect of Notre Dame's College of Engineering and Freimann professor of electrical engineering, Notre Dame's engineers bring to the effort strengths in signal and image processing and systems control.

"These components very well the particular strengths of the other institutions," he said. Michel is among the team of engineers from Notre Dame participating in the research center.

The main goal of the center is to develop equipment that will provide physicians and surgeons the clearest and cleanest possible view or image of a section of the body. In three dimensions, with the ability to rotate to and change the viewing angle. It's also conceivable, Michel said, that the dosages of radiation or of dyes used with certain equipment may be reduced for otherwise comparable results, which will benefit the patient's well-being.

An example of SIPMA's goals can be seen in the research of Notre Dame's Ruey-Lien Liu, professor of electrical engineering. Liu is studying how the processing of ultrasound images might be improved to provide a clear image. If ultrasound images could be improved, Liu said, this diagnostic tool might be used in place of more expensive and less portable CAT Scan equipment, which in the end will make diagnosis more accessible and affordable for the patient.

Other SIPMA research projects by Notre Dame engineers include studies to improve the sharing of medical information through computer networking by David Cohn, professor of electrical engineering; investigations into the satellite transmission of medical images by Daniel Costello, professor of electrical engineering; and research in discriminating between relevant and irrelevant information in medical signals and image data reduction.

SBP responds to criticism

Dear Editor:
Under normal circumstances, we would not respond to criticisms rooted in ignorance. However, because the Student Senate for the 1988-89 school year is composed of new, energetic, intelligent and concerned students, we shall make a special exception by addressing a letter written by Mr. Murphy on April 13 criticizing the Student Senate.

The discussion leading up to a decision whether or not to include seniors’ responses in the survey questionnaire for the task force reports on “The Whole Health Use and Abuse of Alcohol” and “Residentiality” was not made in spite of Dr. Murphy’s recommendations but rather in light of them. His suggestion was that seniors not be included in the statistical tabulation for fear they may skew the results. Acknowledging this fact, we decided to include them in the survey, yet tabulate their results separately. Thus, we do not consider it “unintelligent, foolish, unreasonable, irrational or lacking in foresight” to make special efforts to collect the most experience and insight into two “unintelligent, foolish, unreasonable, irrational or lacking in foresight” to make special efforts to collect the most experience and insight into two important issues that students should be aware of.

We would like to invite you, as well as any member of the Notre Dame community, to attend the Senate meetings which are held on Mondays at 6:30 p.m. in the Notre Dame room of LaFortune, to discover that those people who you elected “truly do represent the people they say they do.”

Tom Doyle

SMC election quirks addressed

Dear Editor:
We are writing in response to Miss Rucker’s viewpoint article concerning Saint Mary’s elections. As it is true in any situation, there are two sides to every story. We as members of the 1987-88 student government would like to respond to the questions and statements submitted by Miss Rucker on Tuesday, April 12.

The 1987-88 student government has faced many challenging issues over the past year including the ND/SMC Gay and Lesbian Society, increased student involvement, library hours, AIDS, the Chili Project, date rape and the election procedures. Anyone could have followed our progress by reading the paper or even asking a representative of the student government.

As for the election in February 1988, the Reilly ticket submitted petitions for a recount and a revote using the correct procedures. Student government accepted these petitions and addressed them immediately. The discrepancy found during the recount did not affect the end result. After careful consideration and much debate, a typed full page petition from the Election Committee was submitted to the candidates and The Observer as a response to the issue. It should be noted that the Election Commissioner cannot consider conducting a recount or a revote purely upon a candidate’s request until the proper petitions have been officially submitted. The potential for a revote did not occur until 5:40 p.m. on Friday, February 26, just as the polls for the run-off election were about to close.

Members of student government do not believe that making an issue out of the election procedures was an embarrassment to the school or would make student government a “mockery.” We believe that we dealt with the issue in an appropriate manner and handled it in such a way that it would not have affected the other remaining candidates in a negative way.

The other problems that occurred due to the written form of the election procedures were brought to our attention and have been addressed. We have been discussing rewriting the Saint Mary’s Student Government constitution since January. Members of the Board of Governance, Programming Board and hall and class boards have been aware of this and had the opportunity to submit and voice their opinions as the representatives of the student body. This is their job, is it not?

On March 22, 1988, the Board of Governance, as outlined in the constitution, unanimously adopted the amended constitution which includes over 20 amendments strictly concerning the electoral process. The fact that the 1987-88 student government promptly addressed and rectified the existing flaws in the system shows a desire to uphold the integrity and ideals of Saint Mary’s College. We encourage all students to read the new constitution. It is not locked away in a box: It is open to all; it is YOUR constitution because ALL students are members of student government.

Miss Rucker, as a senior Government major, should recognize the democracy of her student government. It is realistic to think that the President of the United States would call every citizen to ask his opinion on all issues. Does she believe this should be the case at Saint Mary’s? As a student worker in the Student Activities office, Miss Rucker is well aware of who represents the student body and how the student government system works. Why did she wait until one month before her graduation to voice her words of wisdom?

Miss Rucker was also aware of and involved in the electoral process in the spring of 1987. If she felt the election procedures were such a great injustice to the members of the Saint Mary’s student body, why didn’t she attempt to discuss this with a representative on student government earlier? Why didn’t she ever attend a Board of Governance meeting to voice her opinions? Why didn’t she write a Viewpoint in The Observer prior to the elections so that we could have addressed the issue sooner and made fewer changes? This is a “curious” thing.

During the upcoming hall elections, we hope students will see evidence of the changes made in the electoral process. The balloting and counting procedures have been corrected and will be efficient.

We also hope students will see how important their input is. We in student government cannot see all flaws; we need others to help us look at the current system, evaluate it and make improvements.

Finally, we stand by all the decisions made by the 1987-88 student government. Because we believe we have accepted challenges and upheld the ideals of our fine institution.

Eileen Hetterich, 1987-88 Student Body President
Mike Paese
1987-88 Student Body Vice President

The Observer welcomes your letters as columns. Please address them to The Observer, PO Box Q, Notre Dame IN 46556.

Quote of the Day

“It is the height of absurdity to sow little weeds in the middle of the cornfield, to think that the harvest of the whole cornfield will be efficient. We need others to help us look at the current system, evaluate it and make improvements.”

Percy Johnston
Alumnus produces ‘Two Moon Junction’

ZACK RUDGIES

accent writer

‘Two Moon Junction’ is a new movie due for release in 500 theaters, in 25 ‘cites on Friday, May 29. This makes this movie a little different from the others in the genre. It is produced by a Notre Dame graduate, Donald P. Borchers. Borchers' sixth production. It is not a sequel but it helps if you know what an f-stop is,” he said.

During the summer of his sophomore year, Borchers got a job as a tour guide in Haiti and Canada. He did not just show people around. In stead, he would take complete care of the entire tour. He was responsible for every aspect of every tour. According to Borchers, "It was as a tour guide that I first realized that I had a knack for getting difficult or impossible jobs done—like when a tour group would arrive and no rooms would be ready for them. That's a producer, the guy who gets it done.

With the knowledge that he could get things done, Borchers attended USC's film school for awhile, and then took a job at ABC/Embassy Pictures. He was on hands-on experience. At ABC, he worked on 17 feature films for three years as executive overseer of expenses. Borchers then became an associate producer at Sandy Howard Productions. He also worked with Senior Vice President of production and creative affairs at New World Pictures. He formed his own company, Planet Productions. With his new company, Borchers put together the deals that made the movies: "Vax," "Tuff Turf," "Children of the Corn," and the controversial "Crime of Passion." The last movie almost received an X-rating.

As producer, Borchers oversee s everything involved in a movie. Directors, salaries, investors, and distribution are only a few of the many aspects with which Borchers must deal on each of his pictures. He does not have a real favorite aspect of all this work, but said, "They're all about even in my book. You do what you have to do for good points and bad points."

"Two Moon Junction" is Borchers' sixth production. It is written and directed by Zalman King and released in May 10 and 21 weeks. "We got an X-rating for this movie, which is good," said Borchers. "Other movies will contain very steamy sex scenes as did both "9 1/2 Weeks" and " Crimes of Passion." The plot of the movie is pretty basic. A beautiful Sher, born as April, the bethrothed southern belle, is caught in a love affair with Richard Tyson, a carnival ride operator. The relationship is complex and compelling. Despite warnings against their liaison, they cannot keep their passions for each other at bay. Although it has a relatively simple story, the movie will be brought to life under the direction of King and the director of photography. Plummer. Plummer made Robbie Nevil's movie, "C'est La Vie" which cast him as the star and Borchers had to get a green card for Plummer to work in this country. Borchers convinced Plummer to do the movie. "I don't know what love for the camera," said Borchers. With such a motivator behind "Two Moon Junction," as Borchers, the movie is bound to be a hit.

I watched as people scurried across the street, laden with groceries or briefcases, seemingly anxious to get home and get rid of those things. Even though I lost quite a few valuable hours this year, I have no idea what I had spent them on the government paper I ended up writing in the wee hours of Monday morning, my trip to Chicago renewed me. Variety is the spice of life, or so they say, and it’s truly amazing what a pinch or two of this piece can do for your outlook.

ANN SEIPERT

accent writer

A new album has recently been released by The Mighty Lemon Drops. The group, originally called the Sherbet Monsters, hails from Chicago. In 1986, they created huge waves on the British underground scene. The album, "Two Moon Junction," is a national underground charts are crowded weekly, and it is a big deal to make the charts, especially if the group does not have an album out. In 1986, their single, "Like An Angel" pushed The Mighty Lemon Drops to number one. Their sound back then was harder and inevitably more raw than their current sound. Now they sound like a slightly weaker version of Echo & the Bunnymen. If I had to pick one adjective to describe this album it would be this boring. The redeeming factor of this World Without End LP is the first cut and first released single "Inside Out." It’s a very good song, catchy, with a good drum beat. Paul Mania’s vocals come through well in this bright pop song. It’s too bad The Mighty Lemon Drops can’t reach this height again on their new LP. World Without End is the group's third release. In 1986, Happy Head hit the

"Remembering the spice of life"
Junior Mohan more than just par for the course

By CHRIS FILLIO
Sports Writer

The Notre Dame golf team will travel to East Lansing, Mich., this weekend to participate in the Spartan Invitational tournament at Forest Ackera West Golf Course.

After a less than satisfying performance under adverse weather conditions at the Scarlet Course in Columbus, Ohio, this past weekend, the Irish linksters will seek to rebound.

Setting the pace for the Irish will be junior Pat Mohan. In his second year as a member of the Gold Team, the California native leads the team with a 77.8 stroke average.

"Pat has been a very consistent player this year for the team," said Irish head coach Noel O'Sullivan. "His course management and mental approach to the game is outstanding.

In the combined fall-spring season to date, Mohan has scored below 80 in fourteen out of twenty-five rounds. He has also garnered the low round of the season, a 71 to open the Purdue Invitational in helping the Irish to a third-place finish.

"At Purdue, it was the first time in a while that it all came together for us," said Mohan. "We're certainly capable of playing like that.

However, things did not always run so smoothly for Mohan. As a beginner at around age ten, Mohan had family support although he was the first in the family to really take a serious interest in the game. Upon entering high school, Mohan was forced to make an important decision.

"I had already started playing in golf tournaments at about age thirteen," said Mohan. "But when I got to high school, I had to choose between golf and baseball because in California they are both in the same season.

Mohan achieved numerous honors and distinctions throughout his golf career at Mission Viejo High School. He earned all-league honors for all four years, lettering each year and in his senior year. As a junior he was voted league MVP and subsequently followed that up by guiding the team to a league title his senior year with a 74 stroke average.

When it came time for choosing a college, Mohan was somewhat unsure.

"I had plans to play golf at Colorado, but I was also on the waiting list at Notre Dame," stated Mohan. "I finally got in here and fulfilled my lifelong dream.

For head coach O'Sullivan, it has been a dream come true as well. Freshman year was unkind to Mohan as he struggled on the links and failed to make the cut on the Irish squad. But that only served as a motive to work harder for Mohan. Last year he made the cut shot a season-low 73 on four separate occasions. In addition to this, Mohan added three medalist or runner-up performances in his first year with the Irish Gold Team.

"Pat's coolness and emotional stability makes him the player that he is," commented O'Sullivan. "He's a pure player, and definitely one of the best players skillwise that I've had on the team. The greatest part of his game is that he is able to visualize the shot beforehand, and he will hit the good shot under pressure. This is what makes him a step above the regular players.

Mohan has continued his consistent play this spring, turning in three medalist performances and finishing 13th overall at the Eastern Kentucky Invitational. Along with these honors, both Mohan and senior captain Dick Connelly are serious contenders for Academic All-Americans this year.

Lately Connelly and juniors Mohan and Doug Giorgio have provided solid play at the top three positions, while freshman Paul Nolta holds on to the fourth spot. This weekend for the Spartan Invitational, the call to travel as the fifth man went to sophomore Bobby Kloska. The Elkhart, Ind., native will hope to contribute from the fifth spot which has been a problem area all year for the relatively young Irish team.

"Because of his perseverance and loyalty, he's a welcome addition to the Gold Team," said O'Sullivan. "Bobby Kloska has an excellent golfing background. He is very excited about this weekend. There will be a whole new chemistry this weekend at the Spartan."
 landlords are looking for less than $600.

hang in there...we're bound to win one before the year is
over.

Saint Mary's went into the
tournament.

By HEATHER ATKINSON
Sports Writer

After taking first place in a
weekend tournament and win-
ing over Hillsdale College on
Tuesday, the Saint Mary's ten-
nis team boosted their spring
season record to 6-2.

The Belles charged from be-
hind near the end of the tour-
ament to win the DePauw In-
vitational held last weekend.

In the first round, Saint
Mary's defeated the University
of Cincinnati 6-4.

Next, the Belles topped
Washington University, 7-2, to
advance to the finals, facing
DePauw University.

Saint Mary's went into the
doubles competition of the final
tied with DePauw 3-3. Then the
duo of Charlene Stajano and
Hines defeated their competi-
tion 6-2, 6-3, but Michelle
Chaney and Schnell fell 6-2, 6-4.

At this point, Mayer and Mary
Turk were thrust into the spot-
light. They were defeated 6-2 in
the first set and were down 3-
love in the second when they
railed and made an outstand-
ing comeback to take the set in
a tiebreaker and then won the
third, 6-3, to give the Belles the
tournament.

At home against Hillsdale on
Tuesday, St. Mary's won
quite easily, 7-2.

A prediction of the winners of the women's basketball tournament

As the Women's Bookstore Basketball tournament narrows down to the Sweet 16, speculation on who will win the coveted title begins to tease the fan's mind. Tournament play continued all week in the cold April weather at Saint Mary's. The teams who have made it to the Sweet 16 have both a combination of talent and luck. Kukla, Fran and Ollie has made it all the way to the Sweet 16 without playing one game. All the teams they were to play forfeited to them. Other teams have had to struggle a little more to reach their positions. We Won Interhall looks to me like the team who will make it to the final four and has a good chance of winning the title.

The team from Pasquerilla West won the interhall basketball tournament at Notre Dame this year and works well as a team since they have already played together in a tournament. Another team who looks promising is Just Can't Get Enough. The team has the experience of Notre Dame basketball coach Muffet McGraw and other veteran players. Stubbie Shooters, who are all under 5'8, has been having strong wins and have the advantage of two varsity athletes. Tammye Radke and Julie Radke both play on the Saint Mary's basketball team and have helped the team pull together and brush-up on their technical skills.

Give Me Your Address There could pull out a victory since the squad has a member of last year's championship team and two members from the runner-up team. Kara England from last year's championship team joined Rochelle Holder and Carolyn Burke who won the championship in 1986 besides coming in second place last year. Almond Joy has had some decisive victories. Their fast-break have given them the advantage over many of their teams. The Supreme Court, Five Lymites and Turtles advanced by forfeits and might be a little slow in today's games. Whatnots Schotch had a tough game against This is Why We Chose Ya Run Track but their victory proved they had the endurance to beat a tough team. The Sweet 16 field is a competitive bunch, and the final victor is usually as unpredictable as the South Bend weather.

We Won Interhall and This Too is my favorite since they have the confidence and the skill to come out ahead of a close race.

Favorites emerge from women's draw

By ANNE GALLAHER
Sports Writer

Victory was sweet yesterday for the 16 teams who emerged winners in Women's Bookstore competition at Saint Mary's Angela courts.

"We didn't have sun and it was a little cold but overall the weather was tolerable," said Bookstore Chairwoman Barbara Puhl.

For competitors the weather was the least concern. Just Can't Get Enough couldn't get enough playing time as they battled it out with Maybe In The Next World for an hour and 15 minutes.

The Next World led, 7-6, when the teams decided to play to 15. After 30 minutes The Next World had spread their lead to 18-6.

"I thought we could go all the way, but something happened," said sophomore Julie Courtney.

Apparently Enough had had enough. The team rallied hitting four jumpers from the top of the key to tie. The final score was 15-13.

In other action, Hoosier Mystics defeated Femme Fatal, 31-14. Shot at the Bar gave Afraid of Public Ridicule reason for fear by winning 21-5.

Penhouse Playmates outscored Five Chicks Who Score With Style 15-5, while Almond Joy blew out TNT 21-6.

Top-seeded Give Me Your Address There is one game closer to the championship after their win over Four Smcs and a Doner 21-3. We Won Interhall continued its winning streak by defeating Belles From Hell 21-18.

Return of the Euro-Fags failed to make it back and forfeited to Kukla Fran and Ollie. Yurtles and Turtles, Supreme Court and Sparky's Franchise also won by forfeit.

Today the competition continues as the field narrows to The Elite Eight. The Sweet 16 field is a competitive bunch, and the final victor is usually as unpredictable as the South Bend weather.

We Won Interhall and This Too is my favorite since they have the confidence and the skill to come out ahead of a close race.
Sophomores continue to bolster ND lax attack

By PETE LaFLEUR
Sports Writer

The Notre Dame lacrosse team takes their 9-2 record on the road today as they travel to Ohio Wesleyan Saturday, then travel to Granville for a game on Thursday, hopefully last season against Ohio Wesleyan. Notre Dame routed the Irish and are among the top four teams in the country. And O'Leary knows that the Irish will have to be at the top of their game to stay with the Bishops.

"The Wittenburg game will give us the opportunity to rebound after a shaky performance against Denison and we will likewise tune-up for the Ohio Wesleyan game," O'Leary said. "We hope to re-group from the Denison loss.

"The Wittenburg game will give us the opportunity to rebound after a shaky performance against Denison and we will likewise tune-up for the Ohio Wesleyan game," O'Leary said. "We hope to re-group from the Denison loss.

"Brian complements (team scoring leader) John Olmstead very well and, although he's not the star, he still contributes a great deal to the team concept," Dave Carey, classmate of Quigley and McHugh, has been relied on more following an injury to starting creaseman Jeff Shay. Carey has started the last three games and is sixth on the team with seven goals, three assists, and a .304 shooting percentage. He is also one of the team leaders in ground balls, with 35 for the season.

"Brian has been a real surprise considering that he had limited playing time last year. From the beginning he has showed a lot of maturity and confidence in working in the offense," O'Leary said.

"Brian has been a real surprise considering that he had limited playing time last year. From the beginning he has showed a lot of maturity and confidence in working in the offense," O'Leary said.

"Mike has contributed as much as any sophomore. He's been a threat on offense although his statistics don't show it," O'Leary said.

"McHugh, meanwhile, is a starting attacker and is the team's second leading scorer with 18 goals, 11 assists and a .327 shooting percentage. He just waiting for him to have a big game. He'll be one of the people we'll count on in the future.

"McHugh, meanwhile, is a starting attacker and is the team's second leading scorer with 18 goals, 11 assists and a .327 shooting percentage. He just waiting for him to have a big game. He'll be one of the people we'll count on in the future.

"Mike's a real stabilizing force in our midfield and we're just waiting for him to have a big game. He'll be one of the people we'll count on in the future.

**Brown not worried about draft**

Associated Press

SOUTH BEND, Ind. - Notre Dame's Tim Brown, the Heisman Trophy winner as the nation's top college football player last season, isn't overly concerned where he goes in Sunday's NFL draft.

Whatever team calls his name figures to make him a millionaire.

"No reason to be nervous," said Brown. "I don't know what's going to happen, but the way I approach the whole situation is whatever happens can't be bad.

"You've just got to roll with the punches and wherever you end up you end up, and you don't worry about it."

The 6-foot, 195-pound wide receiver and punt returner knows he will not be the first man picked. The Atlanta Falcons already have used the No. 1 pick to sign Auburn linebacker Aundray Bruce to a four-year contract reportedly worth $3.5 million.

The Detroit Lions own the second pick but Brown isn't holding his breath while waiting to hear from them. Detroit's needs may dictate a trade down or the selection of Miami's Bennie Blades, the highest-rated defensive back. Nor is Brown concerned that falling to No. 3 or even lower will diminish his market value.

Hutson, Irish baseball now realizing their potential

It’s about that time again.
In just a couple of weeks, I will be returning to my hometown of Tallahassee, Fla., for another summer full of fun. For me, summer with my friends in good ol’ Tallytown means three things:

1) Mondays spent at the nearest sports bar - I don’t think I would see a bunch of ballplayers strive in vain to reach America’s Team... the Braves played on an Atlanta cable station named WTBS, and the Braves played on an Atlanta cable station named WTBS, and the Braves played on an Atlanta cable station named WTBS, and the Braves played on an Atlanta cable station named WTBS, and the Braves played on an Atlanta cable station named WTBS. We watched as the Pirates came into town and realized, indeed they could... wondering if we could watch a more boring team (San Diego) than the Braves lose. Texas, No, they lost, but at least they were interesting. Seattle, Bingos.

2) Wondering how we could possibly live in Florida when the nearest decent beach is almost 21⁄2 hours away.

3) And last, but certainly not least, is following Atlanta Braves baseball.

Yup, if it’s starting to warm up here in South Bend, you know the empty seats at Atlanta Fulton-County Stadium are getting hot. And while you may take a look at the current National League standings and think I’m in for a long summer, then you’re missing out on the real beauty of following my beloved Braves.

True Braves fans know their team is bad. Heck, the Atlanta Braves were bad. Horrible. Bad. And what I mean by that is that the Braves made some bad moves in the off-season that really hurt the team. But there is one silver lining to this whole thing: the Braves now realize they need to make some changes.

What has been the difference this season? Hutson credits this to a few things. First of all, the team is playing better defense. Second, the team has improved their hitting. Third, the team is playing better overall.

Hutson’s 12 home runs this season have been a mainstay in Hutson’s consistency. A .224 hitter last season, he has held his average around .300 this season. "I’ve been a mainstay for us," says Irish coach Pat Murphy. "The book on him is that he’s inconsistent, but he’s just been the opposite. He’s been so consistent. He has had a fantastic season."

Hutson came to Notre Dame as a freshman not knowing what to expect from the Irish program. He has been so consistent. He has had a fantastic season. Hutson will finish his career as the most prolific power-hitter in Irish history, with 12 home runs. "Coach Murphy made me realize my potential," says Hutson. "I’ve had a great year. It goes from here, but now I have a better idea of what I can do."

Hutson’s 12 home runs this season is just three short of the Irish career mark of 15. As a junior, Hutson hit a record-tying seven home runs and was named All-American. "I was doing pretty well in the Big Ten, but the changes that have improved his all-around performance did not come until this season, after a troubled fall."

"We had to suspend Tim from the team in November," Murphy says. "He saw that we were prepared to play without him, and he came back and made his mark on the season. I needed something different," Hutson says of his career this season. "I wasn’t getting the push that I needed, but Coach Murphy has changed a lot here, and he’s helped me in every part of my game." Hutson and the Irish will take to Covelski Stadium today to face IUPU-1 at 6 p.m. The Irish defense has let the team down lately, to say the least, and we are hoping for a win.

“Our defensive secondary is giving up too many touchdowns,” Murphy says, referring to the 25-10 loss to Western Michigan on the weekend. “We have to guard the three-point shooters a little better.”

See BOOKSTORE, page 13

Fond memories of America’s Team...the Braves

By THERESA KELLY
Assistant Sports Editor

Don’t try to cheat Tim Hutson.
"I’m a power hitter," the Irish first baseman says. "I’m not going to get cheated at the plate. I’ll strike out, I strike out, but I’m going to take my cuts."

Hutson has taken his cuts to the tune of a school-record 121 home runs, and he also leads the team in runs batted in. Hutson came through in last weekend’s series against Detroit with two homers, one a power-hitter’s consistency. A .224 hitter last season, he has held his average around .300 this season.

"I’ve been a mainstay for us," says Irish coach Pat Murphy. "The book on him is that he’s inconsistent, but he’s just been the opposite. He’s been so consistent. He has had a fantastic season."

Hutson came to Notre Dame as a freshman not knowing what to expect from the Irish program. He has been so consistent. He has had a fantastic season. Hutson will finish his career as the most prolific power-hitter in Irish history, with 12 home runs. "Coach Murphy made me realize my potential," says Hutson. "I’ve had a great year. It goes from here, but now I have a better idea of what I can do."

Hutson’s 12 home runs this season is just three short of the Irish career mark of 15. As a junior, Hutson hit a record-tying seven home runs and was named All-American. "I was doing pretty well in the Big Ten, but the changes that have improved his all-around performance did not come until this season, after a troubled fall."

"We had to suspend Tim from the team in November," Murphy says. "He saw that we were prepared to play without him, and he came back and made his mark on the season. I needed something different," Hutson says of his career this season. "I wasn’t getting the push that I needed, but Coach Murphy has changed a lot here, and he’s helped me in every part of my game." Hutson and the Irish will take to Covelski Stadium today to face IUPU-1 at 6 p.m. The Irish defense has let the team down lately, to say the least, and we are hoping for a win.

“Our defensive secondary is giving up too many touchdowns,” Murphy says, referring to the 25-10 loss to Western Michigan on the weekend. “We have to guard the three-point shooters a little better.”
