Disgruntled employee kills 7, injures 13 in KY

Associated Press

LOUISVILLE—A man with an assault rifle mowed down co-workers as he went from floor to floor "looking for bosses" at a printing plant Thursday, killing seven people and wounding 13 before taking his own life.

Police said Joseph Winsbeker, 47, had been on permanent disability, was being treated for mental disorders, and reportedly threatened the company. He carried several semi-automatic weapons and thousands of rounds of ammunition.

"I told them I'd be back. Get out of my way. John, I told them I'd be back," the gunman told fellow Standard-Gravure Co. employee John Tingle, who approached him before the 30-minute shooting rampage began.

"I said, 'How are you, Rock?" Tingle recalled. "He said, 'Fine, John. Back off and get out of the way ... all the way to the wall.'"

Tingle and other employees nearby then ran into a bathroom and locked the door.

Police searched every floor of the three-story Standard-Gravure building for victims.

Alumni get preference for away game tickets

By JANICE O'LEARY

Many students have questioned the number of University of Michigan tickets allocated to the student body.

According to Jim Bell, associate ticket manager, the University is given 5,000 tickets for any away game against University of Michigan, Michigan State, or Purdue. As students have ticket preference for home games, "first priority is given to alumni for away games," Bell said.

Two hundred tickets are held aside for students for these games. "Students are not guaranteed tickets," stated Bell.

Out of the 200 tickets allotted to the students, 50 tickets were made available to those who purchased the roadtrip package through SUB, said Kara Lenahan, services commissioner for SUB. The hotel reservations for the roadtrip were cancelled due to reasons not disclosed at this time, but those students who had purchased the package were still given their tickets and offered the bus ride and a $20 refund, said Lenahan.

So, in effect, only 150 tickets were put into the lottery, said Lenahan. The 75 winners were announced Monday, and each winner was given the opportunity to purchase two tickets, said Lenahan.

Only 5,000 tickets are given to Notre Dame for away games, those held at either the Orange Bowl or the Meadowlands, said Bell.

Car thefts threaten safety of cars at ND

By KELLEY TUTHILL

Notre Dame has had several stolen car incidents on campus in the past week.

According to Phil Johnson, assistant director of security, Security officers were investigating a car in the D-2 parking lot when they discovered wires hanging from the broken steering column.

Upon an initial check of the plates the car did not register as stolen, said Johnson. "However, the officers were confident the vehicle was stolen as it looked stolen," said Johnson.

Notre Dame Security worked with the Michigan and Niles Police as the owner resides in Niles. The owner was contacted and stated that the car was indeed stolen, said Johnson. The car is being held by Security until the South Bend Police Department takes custody of the vehicle for evidence.

Between September 1 at 6 p.m. and September 7 at 2:15 p.m. a 1987 silver and black Pontiac 6000 LE was stolen from campus, said Johnson. He said the vehicle was recovered later on September 2 by the South Bend Police Department.

On September 7, a 1989 silver Chevrolet Celebrity was stolen from Corby Hall and has yet to be recovered, said Johnson.

Between September 7 at 6:15 p.m. and September 10 at 6 p.m. a 1987 Pontiac SE was stolen from the D-2 lot. The car was recovered when the South Bend Fire Department found the car engulfed in flames at 500 N. Cleveland. The police had no stolen car report as the...
** Answers to most commonly asked Observer questions  

After three-plus years at Notre Dame and an equal amount of time working on this page, I have encountered a number of questions, comments, and complaints concerning this newspaper.  

In an attempt to answer some of the more common questions, I have decided to dedicate this inside column to that cause. I have chosen the five most common questions I hear, and I have tried to give a brief answer to each. Hopefully some of the following will answer your questions.  

Why did you run that cartoon?  

Example: The Observer ran a rather controversial political cartoon on the viewpoint page of the paper concerning working mothers and their children. Many of our readers were outraged and asked how we could publish such a piece. The answer is simply that The Observer respects the right of everyone to have an opinion. Steve Beeson, the nationally syndicated cartoonist who drew the cartoon, is entitled to make such a comment about society whether you believe it in or not.  

At an educational institution like Notre Dame we should all be open to various viewpoints on any issue. The Viewpoint page of The Observer is to serve as a forum for the exchange of ideas. The mere fact that a cartoon, letter, or column appears on the Viewpoint page does not necessarily mean that is that is the belief of The Observer’s staff. It is an expression of opinion, and if one disagrees they are encouraged to respond via a letter to the editor.  

What is an editorial?  

An editorial is The Observer’s opinion on an issue of campus, national, or international importance. The editorial represents the opinion of the majority of the editorial board of the paper, and it appears clearly labeled on the Viewpoint page. Although the editorial is written by a rotating member of the editorial board it is the result of a lengthy discussion among the editorial board members.  

**OF INTEREST**  

**Friday Forum at the CSC will begin its annual series today with Father Richard McCormick, O.Bri, professor of Christian Ethics, and Blasi. The theme for the evening will be “The Church and Humanism,” from 12:15 - 1 p.m., Room 124. Brown bag lunch or soup and bread for $1.**  

**Notre Dame Encounter past participants are invited to a special service at 4 p.m. today in the Log Chapel to pray for this weekend’s retreat.**  

**The International Student Organization is having its first annual picnic today at 4:30 p.m. at Holy Cross Field.**  

**Political Democratization and the Economic Crisis in Poland, panel discussion will take place 7:30 p.m. at Holy Cross Junior College.**  

**Michigan game all campus picnic will take place Saturday at Stagg Center Field, 4 p.m. to 6 p.m. Both dining halls will be closed for dinner unless it rains.**  

**Juggling Club will meet Sunday at 2 p.m. on the Fieldhouse Mall. For more information call Shawn at 283-4561.**  

**An amnesty International will hold its first general meeting of the year at 7 p.m. on Sunday in the CSC.**  

**Any undergraduate waiting list for on-campus housing and who is interested in moving on campus this year only, please contact the Office of Student Residents, 311 Administrations Building, by Monday, Sept. 18.**
South Africa elects new president
Associated Press
CAPE TOWN, South Africa — National Party leader F.W. de Klerk was elected Thursday to a five-year term as president and was criticized immediately by conservative opponents for allowing a protest that drew an estimated 20,000 people.

Police allowed two smaller protests to go on Thursday, even giving flowers to leaders of one march. Anti-apartheid leaders announced plans for more activity Friday.

The Electoral Party, according to Wells, "had inadequate space for as many people as we needed."

De Klerk, 53, has been acting president since Aug. 15, a day after he and other Cabinet ministers pressured Botha to resign. De Klerk is to be inaugurated Wednesday in Pretoria church.

De Klerk, whose party was elected by white voters, declared himself the leader of all South Africans, "not only those represented in Parliament."

The National Consortium of Graduate Degrees for Minorities (GEM) expands and offers new doctorate programs

By Paul Millen

The Observer

The National Consortium of Graduate Degrees for Minorities in Engineering, or GEM (Graduate Education for Minorities) has recently instituted two new programs for minority students interested in earning a doctorate degree in engineering or science.

Previously, the organization offered fellowships only to those who wanted to earn master's degrees in engineering or science.

As a result of the growth of GEM into a national center, the organization moved into a new building, located at 1118 N. Eddy St. said Linda Wells, associate director. The building will provide the space necessary for their expanding staff. Their previous Cushing Hall office, according to Wells, "had inadequate space for as many people as we needed."

The Ph.D. fellowship program is scheduled to begin in the fall of 1990, according to a GEM release. Twenty-five students will be admitted to each program next year and forty are projected for every year thereafter.

Howard Adams, executive director of GEM, believes that the new building will serve as a "National center which will better help us serve a wider range of students and serve them at the Ph. D. level." The fellowship offers tuition, paid summer research, mentors on campus, and an annual stipend.

To qualify for eligibility students must be a U.S. citizen, a junior or senior in the engineering or science field, a member of an underrepresented ethnic minority group (Black, American Indian, Mexican American, and Puerto Rican) and have an academic record reflecting the ability to complete a doctoral degree, according to the GEM release.

GEM, whose headquarters are at Notre Dame, seeks to diversify the underrepresentation of minority groups in graduate programs for science and engineering. The organization, established in 1976, hopes to bring minorities earning graduate degrees to a level more representative of their numbers in the population.

GEM is a not-for-profit organization jointly sponsored by 55 accredited science and engineering schools as well as 70 corporations and research laboratories throughout the United States.

According to Adams, "Our three main areas of focus are: one, meeting the challenge of recruiting and assisting minority students nationwide and providing them with the financial resources necessary for graduate and doctorate studies; two, initiating and fostering faculty involvement on the importance of graduate study; and three, producing current and reliable materials that demystify the graduate school application processes.

A student has been accepted as a GEM fellow, the initial phase of the program involves working as a summer intern for one of the employer members, according to the organization's annual report.

After this 10-14 week salaried period, the student enters the GEM member school where he has been accepted to begin his studies.

Salvagers find sunken treasure

Associated Press

CHARLESTON, S.C.—Salvagers working off South Carolina have begun recovering a golden bounty of bars and coins valued at up to $1 billion from a shipwreck that sank in a hurricane 132 years ago, a spokeswoman said Thursday.

"It’s certainly the largest American treasure found at one time," said Barry Schatz, a director of the group, told The Washington Post in a story published Thursday.

The paddle-wheel steamer was traveling from Panama to New York on Sept. 12, 1857, when it was slammed by a 200 miles per hour wind and a wall of water that swept it to the bottom. About 100 people died.

The ship was the America, valued at about $5 million dollars, a regular monthly shipment of gold from the California gold rush, said historian Judy Conrad of the Columbus America Discovery Group.

"I never dreamed it would be like this," Thomas Thompson, a director of the group, told The Washington Post.

The salvagers began bringing up the first artifacts last month, recovering about 200 pounds of gold so far, Schatz said.

In recent weeks, gold bars, including one weighing 62 pounds, rare "double eagle" coins valued at up to $20,000 each, and gold coins made by private California mints and valued at up to $15,000 have been recovered, said Pamela Akins, a spokeswoman for the expedition.

The salvagers began bringing up the first artifacts last month, recovering about 200 pounds of gold so far, Schatz said.

Thompson, a specialist in underwater mining and robotics, was on the expedition ship Arctic Discoverer on Thursday and could not be reached for comment.

Schatz said much depends on how much personal gold from the passengers was recovered.

"We don’t know the extent of the cargo of valuables," he said, adding it could be sizeable because passage on the steamer was so expensive.

Tank barge runs aground in NY

NEW YORK— A tank barge carrying 3.8 million gallons of gasoline ran aground in the East River Wednesday night, causing what the U.S. Coast Guard termed a "major gasoline spill." Authorities closed parts of the East River and the Triborough Bridge as a precaution.

The barge, the Marania 440, was being towed by the tugboat East Coast when the barge struck bottom and ran aground about 9:45 p.m., said Petty Officer Jeff Crawley, of the Coast Guard public affairs at Governor's Island.

An undetermined amount of gasoline was leaking into the river, Crawley said. "We're talking like a major gasoline spill, but I don't know any amount at this time," Crawley said.

Crawley said Coast Guard pollution personnel were on the scene, working with the fire and police departments, the city Office of Emergency Management and Department of Environmental Protection and the state Department of Environmental Conservation.

In answer to your question...

Athletic Director Richard Rosenthal spoke at the St. Edward's Hall Forum Thursday, addressing the issue. "Has Notre Dame reached the summit of collegiate athletics."
A chronicle of mass murderers

Associated Press

JULY 18, 1984 — Twenty-one people are fatally shot in a McDonald's restaurant in San Ysidro, Calif., by James Oliver Huberty, an out-of-work security guard. Thirty shots under his belt is Huberty himself is killed by a police sharpshooter.

DECEMBER 1987 Sixteen people, including 14 members of one family, are killed. The mass slaying is discovered after R. Gene Simmons Sr. is arrested Dec. 25 in the killings of two people in Russellville, Ark. A search of his home near Dover uncovers the remains of 14 family members, who authorities say were killed by Simmons just before Christmas. Simmons was convicted of capital murder on two charges May 12, 1988, and sentenced to death.

MARCH 30, 1975 — Eleven people, including eight children, are killed at a family gathering in Hamilton, Ohio, on Easter Sunday. A relative, James Ruppert, is convicted of two killings, for which he pleads not guilty by reason of insanity in nine others.

APRIL 15, 1984 — Ten people, including eight children, are killed in a Brooklyn, N.Y., apartment building. Richard Thomas is convicted of first-degree manslaughter, the judge citing "extreme emotional disturbance."

SEPTEMBER 5, 1949 — Thirteen people are fatally shot in 12 minutes in Camden, N.J., by Howard Unruh, who told police, "I'll have killed a thousand if I'd had enough bullets," was found insane and committed to a mental institution.

SEPT. 25, 1982 — Twelve people, including five children, are killed in a Wilkes-Barre and Jenkins Township, Pa. George Banks, 43, is later convicted on 12 counts of murder and sentenced to death.

JULY 14, 1966 — Eight student nurses are stabbed or strangled in a Chicago dormitory. Richard Speck, 24, is convicted of murder.

FEB. 15, 1988 — Seven people are killed and five others are wounded at ESU Corp., a Silicon Valley defense contractor. A former employee, Richard Wade Farley, 39, of San Jose, Calif., is arrested and held at the Santa Clara County Jail. Authorities said he was fired for harassing a woman employee. The woman was among those injured.

SEPT. 25, 1987 — Seven family members, four of them children, are shot to death on two Elkhond, Mo., farms. Accused killer James Schulte, who police say tried to divert blame for the killings to his 14-year-old nephew, one of the victims, was convicted of three counts of first degree murder and sentenced to death.

JAN. 17, 1989 — Patrick Purdy, a troubled 24-year-old drifter, opens fire on a Stockton, Calif., schoolyard with an AK-47 semi-automatic rifle and other weapons. Five children are killed and 29 others and one teacher are wounded. Purdy then turned a pistol on himself.
Exxon effort may not have helped

A future Freshman?  

Irish fan Michael Shearer told excited ears Thursday that he will be "free" in December.

associated Press

VALDEZ, Alaska— Exxon's infusion of thousands of oil-spill cleanup workers and millions of dollars into Prince William Sound did as much harm as good, fishermen charged Thursday as the six-month cleanup ground to a halt.

"It's time that everyone realizes that no amount of money in the world is going to restore Prince William Sound to a pristine condition," said Riki Ott of Cordova District Fishermen United.

While about a third of the sound's fishing fleet worked for Exxon this summer, and in some cases profited handsomely, fishermen who opted to fish suffered from a restricted salmon season and a poor catch.

With most of the sound closed for fishing, fishermen were forced to compete in a small area for a few fish. "This year we were like rats penned inside a cage," said Dave Clarke of the Prince William Sound Seiners Association.

Exxon officials said they expect to declare the summer cleanup over Friday, 25 weeks after the tanker Exxon Valdez cracked open on a reef and spilled nearly 11 million gallons of crude oil.

While the fishermen did not criticize their colleagues for accepting Exxon's cash, they said the money has caused an emotional division between those who accepted and those who did not. Fishermen scraping by this season fear they may be at a competitive disadvantage next year because they can't afford better boats and gear.

The money has become "just another stress factor" from the spill, Clarke said.

Ott said the cleanup effort stemmed more from public relations needs than environmental concerns. Once the Friday cleanup deadline was set, Exxon began using warmer water and higher pressure to hose down the oiled shorelines faster, doing more harm than good, she said.

"The beach cleanup should not be evaluated on the amount spent, the amount of equipment and people working on it. It should be evaluated on its effectiveness," Ott said.

Ott said her group favors a "permanent scaleback" of the cleanup, with smaller "strike forces" set up to respond to sensitive areas threatened by oil washing off the shorelines. "We don't want thousands of people on the beaches again," she said. "It was about as bad as the oil spill itself."

At the height of the cleanup, Exxon had about 12,000 people working on the effort, about 3,000 of them on the shorelines.

Caribbean to get rain from Hurricane Hugo

Associated Press

MIAMI— Steadily growing Hurricane Hugo slowed its march Thursday to the Caribbean, but hurricane forecasters said islanders should get ready for wind and heavy rain. “They could start feeling the effects in 48 hours,” said Jim Gross at the National Hurricane Center in suburban Coral Gables.

Hugo was moving slowly, an indication of a potential change in direction, Gross said. For now, people on the northern and central Leeward Islands should watch Hugo carefully, he said. “It’s a storm that’s been steadily increasing every day,” Gross said, adding that conditions are favorable for more strengthening.

At noon EDT, Hugo’s center was located near 13.3 north latitude and 48.7 west longitude, or about 815 miles east of the Lesser Antilles. The storm was moving west at 15 mph, down from 20 mph Wednesday night.

Its highest sustained winds were 85 mph, up 10 mph from the center’s advisory six hours earlier.

Kroger Co. sells nine food plants

Associated Press

CINCINNATI— Grocery store chain Kroger Co. said Thursday it has agreed in principle to sell nine of its food manufacturing plants, including an Indiana operation, as part of a $4.6 billion corporate restructuring begun last fall.

The nine plants are among 11 Kroger is selling as part of the restructuring, which was launched in part to stave off two unsuccessful takeover bids for the company.

Negotiations are under way to sell the remaining two plants, the company said. The grocery chain said it expects to reap after-tax proceeds of $260 million from the sale of all 11 units.

Cincinnati-based Kroger owns and operates supermarkets, convenience stores and food processing plants in 32 states.

Company officials said Thursday they had signed a letter of intent to sell eight food manufacturing plants to a corporation to be formed by New York City businessman Eli Jacobs of New York and Engle Capital Corp., of Dallas, Texas.

The eight plants are North Coast Bakery, of Cleveland; Delight Products, of Springfield, Texas; Koke Foods, Murray, Ky.; Pontiac Foods, Pontiac, S.C.; State Avenue plant, Cincinnati; Tara Foods, Albany, Ga.; K.B. Specialty Foods, Greensburg, Ind.; and Pace Dairy, Rochester, Minn.

The eight plants’ new owner will offer jobs to the plants’ current employees and also may employ some manufacturing personnel now working in Kroger’s Cincinnati headquarters offices, Kroger said.

The transaction includes an agreement to continue offering Kroger’s private-label products, company officials said. Kroger said the deal should be concluded by mid-November.

In a separate transaction, Kroger said it has agreed to sell its Meadowland Creamery in Conroe, Texas, to Borden Inc.

The remaining two plants, Kroger’s Gateway Bakery and Heartland Farms Dairy, both in St. Louis, are under consideration by separate buyers, Kroger said.

Negotiations are under way for the bakery with Alpha Baking Co. of Chicago, while an unnamed party is bargaining for the dairy, Kroger said.
Editor:
I am writing regarding a matter of concern in all of us in the University community. In recent months, there has been a noticeable increase in violent crimes in the neighborhood directly adjacent to the University. Notre Dame and Saint Mary's students have been included among the victims. These crimes have included assault, armed robbery, and in one case, a shooting.

Dear Editor:
Dave Bruner's recent spewing forth on the subject of drugs (The Observer, Sept. 13) leads me to make two comments. First, it always amazes me when people go on and on about the evils of drugs without realizing that alcohol is the dominant drug in our society. We regard it as a part of our life, and an especially significant part of college life. This is as true at Notre Dame as it is elsewhere.

My father targets the casual user. However, it is not the casual user who is committing criminal acts in order to finance their habit. In fact, more people have died from the abuse of alcohol—physical effects such as liver or heart disease which can be caused by social drinking, as well as from drunk driving accidents—than from an occasional take on a joint. Yet, these latter miscreants are the ones who he and others of his ilk see as the cause of the breakdown of the fabric of society. It is not the casual user who is engaged in violent drug activity; the serious crime is caused by social drinking, as well as from drunk driving accidents.

Perhaps Mr. Bruner should take it up to another level. Whether casual drug use is such a major crime against society, it seems to me that violating a person's constitutional as well as innate right to privacy or the concept of being innocent until proven guilty. According to his logic, people should be tested, whether or not there is any suspicion of drug use, in order to prove to the powers that be that they are not guilty of the perceived heinous act. Laying aside whether casual drug use is such a major crime against society, it seems to me that violating a person's constitutional as well as innate right to privacy except, possibly, in the most extreme of circumstances, is a great blow to a truly democratic society.

Perhaps Mr. Bruner should reexamine his support for some of the most fundamental tenets of our society.

According to the Michigan Daily, the following establishments are a few of the hottest spots in town.

But first, some basic things you need to know: Even though the drinking age is 21, many bars legally admit people over 18, but trying to use a fake ID is usually not a good idea; in some places this applies more than others. Also, Michigan laws provide that liquor cannot be sold after 2 a.m. and bars close accordingly.

An Irish victory always makes a roadtrip worthwhile, but the game is only part of the overall roadtrip experience. Before and after the game, fans will be all over Ann Arbor checking out the bars and restaurants. According to the Michigan Daily, the following establishments are a few of the hottest spots in town.

Watters returns home to tailback spot

By STEVE MEGARGE
Associate Sports Editor

As far as he's concerned, Ricky Watters is back where he belongs. "I loved playing flanker because of the experience I got, but there's no place like home," said Watters, after moving back to his original position of tailback. "That's where I've played all my life. Even when I watch football games, I always look at the tailbacks."

Watters rushed for 80 yards on 12 carries against Virginia, in his first game back at tailback. The junior from Harrisburg, Pa., also caught two passes for 42 yards and had 67 yards on punt returns.

That game marked a successful recovery from the adversity that hit Watters his sophomore season.

Near the end of spring drills his freshman year, Irish coach Lou Holtz announced that Watters would move from tailback to Tim Brown's vacated position of flanker.

During his sophomore season, Watters was feeling the pressure of replacing a Heisman Trophy winner and studying in a demanding architecture program. Though he had some impressive outings, catching four passes for 108 yards and two touchdowns against Air Force, many thought Watters' was never really happy at flanker.

"The only reason I moved to flanker is because I needed to move there; it was necessary for us to become a great team," said Watters. "I'm much more at peace now. I always wanted to be a starting tailback at a major college."

Watters switched his major later in the season, but the worst news was yet to come. That happened during the team's trip to California. The day before the top-ranked Irish were preparing to face second-ranked Southern Cal, Watters and fellow tailback Tony Brooks arrived 40 minutes late for a team dinner meeting. The two players were suspended for the game and sent back to Notre Dame because of repeated irresponsible tardiness for team meetings and functions.

"It was terrible, the lowest point of my life," said Watters. "We went out and got lost, and Coach Holtz did what he had to do. I guess all things happen for a reason."

Watters returned in the SunBowl Fiesta Bowl and set up a touchdown with a 57-yard pass play, as Notre Dame wrapped up the national title over West Virginia 34-21.

Knowing he would return to tailback, Watters performed impressively in spring drills then bulked himself up over the off-season.

Now Watters, who used to rely on his 4.45 speed in the 40 to elude defenders, can simply run over would-be tacklers.

Watters celebrates his touchdown return against the Wolverines in '88.

"It's given me an edge," said Watters, who has two touchdown punt returns at Notre Dame. "It's made me think nobody can stop me. I can run through some people instead of making 20,000 fakes to try to run around them.

That's just what the coaches want to see from Watters.

The Observer/File Photo

Not even the Irish can catch Watters during spring scrimmage.

The Game...

By GREG GUFFEY
Assistant Sports Editor

This year, the battle for No. 1 will be played in September.

With the hope for Saturday's Michigan-Notre Dame game, one might think it was late December with a national title hanging in the balance. Reality shows that it is mid-September, the first game for the hosts and the second contest for the Irish.

But even in this early season, no one can deny the importance that this game carries. A win would be just a small step in a long road to a national title for either team, but a loss could, for all practical purposes, end a team's shot at that mythical crown.

"It has seemed to be a turning point the four years I've been here," Irish fullback Anthony Johnson said. "It seems to be the point of the season where you realize whether the season is going to go well or bad. Things started to turn around here when we won there two years ago."

Michigan split end Greg McMurtry sprints for the end zone.

Coaches Lou Holtz and Bo Schembechler, who served at the same time as Ohio State assistants in the late 1960s, have built one of the top rivalries in the country during the past three years, games with heroes, goats and many surprises.

In 1986, Notre Dame lost 24-23 at home in Holtz's debut as head coach. The following year at Michigan Stadium, Notre Dame handed Schembechler his first opening game loss as the Wolverine coach, 26-7. Last year at Notre Dame Stadium, Irish kicker Reggie Ho provided the heroes, kicking a 27-yard field goal late in the game to give the hosts a 19-17 victory.

"The game always has a storybook ending," Irish guard Tim Grunhard said. "I just hope it's a storybook ending for us this year."

One streak must end in this game. Notre Dame has won 13 consecutive games, while Michigan has a streak of 10 straight games without a loss which includes a 17-17 tie to Iowa in 1988, Notre Dame has won two straight games against the Wolverines and no team has ever handed Schembechler three consecutive losses.

This will be the 25th time the top-ranked team in the country has battled the second-ranked squad. Notre Dame has been involved in seven of those games, with a record of 3-0-1 as the top team and 0-2-1 as the second-ranked team. Michigan has been involved in two such games, a 35-12 loss to No. 1 Notre Dame in 1943 and a 12-10 loss to No. 1 Iowa in 1985.

The last time Michigan held the pre-season No. 1 ranking was in 1982. The Wolverines lost to Wisconsin 21-14 in their first game. Notre Dame then assumed the top spot and dropped a 25-7 contest at Michigan.

Irish offense vs. Wolverine defense

The key for both the Irish offense and the Wolverine defense will be Notre Dame quarterback Tony Rice. When Rice goes, so go the Irish, evidenced by a record of 15-10-1 under the guidance of head coach Schembechler. If Michigan is to have any chance, it must control Rice.

Rice passed and ran as will in the season-opener against Virginia in the Kickoff Classic. He completed 7-of-11 passes for 147 yards and carried eight times for 70 yards.

Last year against Michigan, Rice ran seven times for 52 yards and orchestrated drives that set up four Irish field goals. This year, the Michigan defense is ready.

The front three of tackles Brent White, Warde Manuel and nose guard T.J. Skrepenak form a solid base for the Wolverine defense. Said White, "Last year, I saw Tony Rice running that option for the Irish. This year, I see him running the option, but I don't see him running it into the end zone for a touchdown. I don't see that at all."

Michigan is stronger at the linebacker spots with all four starters returning from a season ago. Inside linebackers J.J. Grant, one of Michigan's two captains, and Erick Anderson recorded 77 tackles each last season, while Alex Marshall and Bobby Abram combined for a total of 106 tackles in 1988.

"The strength of our defense is our linebacking," Schembechler said. "We've got more depth and better linebacker then we have had in ohh jees, I can't remember when."

If the strength of the front and linebackers is not enough, the Sporting News rated Michigan's secondary as the top unit in the country. Safeties Tripp Wilder and Vitommas Zorich, cornerback David Key and strong safety Tripp Miller, form a solid base for the Wolverine defense.

Tony Boles (TB)

This quick backfield was an All-Big Ten pick by the Associated Press last season after placing fourth in the nation in rushing and all-purpose yardage.

Michigan has a 184-46-5 (794) record with the Wolverines.

Bo Schembechler (Coach)

The renowned head coach, now in his 21st season at Michigan has an 184-46-5 (.794) record with the Wolverines.

J.J. Grant (LB)

Co-captain Grant led the team in tackles in 1988 with 77, despite missing the Wolverines final three games with a knee injury.

Michael Taylor (QB)

This quick backfield was an All-Big Ten pick by the Associated Press last season after placing fourth in the nation in rushing and all-purpose yardage.

Michigan has a 184-46-5 (794) record with the Wolverines.

Michigan has a 184-46-5 (794) record with the Wolverines.

Michigan has a 184-46-5 (794) record with the Wolverines.

Murray, a senior safety, is in the starting lineup again this year after sitting out action his first two seasons.

The line hopes to give quarterback Michael Taylor plenty of protection. In 1988, Taylor completed 76-of-122 passes for 957 yards and rushed 80 times for 116 yards. Taylor's then-experienced quarterback for Michigan after senior Demetrious Brown was declared academically ineligible. The performance of Taylor, an explosive quarterback compared by many to Major Harris of West Virginia and Shawn Moore of Virginia, could determine Michigan's fortunes in the game.

"He's a very competitive and elusive quarterback," Notre Dame nose guard Chris Zorich said. "We have to treat him exactly the same way we treated Major Harris in 1986.

In the Fiesta Bowl, Notre Dame held Harris to 13-26 passing for 140 yards and an interception. The Irish defense held Moore to 83 yards on 10-of-26 passing with four interceptions, two touchdowns, with them. You have to remember when.

Smith off his crunches and on the field

By MARTY STRASEN
Sports Editor Emeritus

Brent White grits his teeth when you ask him about opening the season against Notre Dame on Sept. 16.

But the expression soon turns into a relieved smile, because this year when the defending national champions visit Michigan Stadium, White will throw around his 6-foot-5, 248-pound frame, instead of hurling a pair of crunches.

"Every time someone brings up Notre Dame I have to grit my teeth, thinking of those last two losses (in 1987 and 1988)." he says. "But the car accident sent those tackles in the remaining five games in 1987, and when here was no 248-pound frame - instead of a 220-pound body."

Brent White two losses (in 1987 and 1988). Brent White was an instant hero after connecting from 31, 38 and 26 yards respectively.

"I think of (former Irish Heisman winner) Tim Brown," he says. "I want to back to the drawing board. I felt like I was getting nowhere."

Brent White was 1, 1.35-135 Hawaiian native. "But I have the best holder in the world in Tom Grambard, the best snapper in the world in Tim Grambard and 280-pound guys on the line."

White worked harder. Run. Lift weights. Practice pass-rushing and going back to football was the only thing on my mind.

After stifling two Michigan drives, the Tony-Rice and Flowers each scrambled for 18-yard runs to set up Ho's 31-yarder with 29 seconds left in the first period.

When his return was not as anticipated. Here was a former All-American player holding his knee injury kept him from a 1987 automobile accident.

"Nobody said 'didn't want to be a geek,'" Brent White said.

"I have the best helper in the world in Tim Grambard, the best snapper in the world in Tim Grambard and 280-pound guys on the line."

White was an instant hero after connecting from 31, 38 and 26 yards respectively.

Smith continued from page 3

calls. "Our high school uniforns were the same colors (scarlet and gray), and my coach had some concerns about the practices over there. I knew all of the assistant coaches there, the trainers, everybody."

But White also expressed interest in Michigan and Michigan State. In any case, it looked as though the big Ten was a sure bet.

Throughout the recruiting process, White had agreed to participate in the NCAA's "Big Inroads" program. A NCAA representative would make regular telephone calls to his home, monitoring the recruiting process for any suspected violations.

"He called me every couple of weeks and asked me if anything irregular was going on any of these visits," White explained. "It was no big thing there really wasn't anything to tell."

That is, until White himself threw the NCAA a curve.

Pittsburgh, specifically then-Panther Coach Joe Fazin, made an impression on White as signing day approached. So much so, in fact, that White returned from a visit there with a signed letter-of-intent, thus shutting off the big Ten in favor of the Panthers.

"It was a no-brainer," White says. "I had just such a rush from that. I came back and decided to go to Pitt. When the NCAA found out about that, they thought something peculiar was going on. All that work just three Ten school in mind, and now I was talking about Pitt."

"No need to worry, however." White assured the NCAA that Pitt made no illegal offers. And Mother Nature, obviously a Big Ten fan, gave him time to change his mind before announcing his decision in a press conference.

"I was always running east-west trying to look for a hole all the time," said Watters. "The coaches told me just to get what's necessary. If you need two yards, why go side?"

Rodney Culver, who shares the backfield position with Watters, has noticed the change in his teammate's running style and physique. Culver repeatedly has heard the comparisons of the two backs that call Culver the physical back and Watters the quick back.

"People say that, but Ricky's improved a lot as far as being more physical," said the sophomore from Detroit. "He's quick in making his moves, but people will know who's both physical runners."

One major difference in the offensive backfield that may or may not have affected Watters' role on the team is the absence of Brooks. The team's leading rusher last season, Brook's missed spring practice for academic reasons and was not reintegrated into the University this fall.

"I really don't know if it would have affected anything or not," said Watters. "After the spring, I was the starting tailback anyway. I'd like to have him here, but whether he's here or not, I'll do my job."

Instead, Watters has been raising the talents of Culver and helping the younger runner along in his progress.

Watters has given Culver a few tips in making the switch from fullback to tailback. "It's helped me in adjusting to the different routes and in learning to take time and do things the right way," Culver said.

After all, Watters knows all about switching positions. But it looks like he's finally found a home.
all else fails and no place to stay in the vicinity, you can drive back to Southce the festivities have se of Michigan's close this weekend provides an ideal opportunity to weekend away from Ind. The roadtrip to or will be the first of ch excursions for Irish let the games begin!

of Douglas County, Wisconsin. The place to unwind.

THE BROWN JUG, 1024 S. University—Call it greasy, call the wait staff slow, insist it any away you want. But no other place better defines Michigan. The best grilled cheese in the world, and be sure to try the nachos. Open to 3 a.m. on weekends.

Denny's, 330 E. Liberty—If you're homesick for South Bend, why not "get slammed" at Denny's—home of the "Grand Slam Breakfast." The hours are around the clock, the prices are very reasonable, and the food is typically Denny's. A great place to watch the sun rise over Ann Arbor.

Since Ann Arbor is such a large college town, there should be no shortage of places to go before and after the game, in fact, if there's going to be a shortage of anything, it will probably be the amount of money you have left in your wallet after a long weekend at the University of Michigan.

CALLING ALL ROADTRIPPERS!

Do you have a roadtrip story that is out-of-the-ordinary? Don't keep it to yourself, tell the whole campus about your experience through the Observer. The Accent department is looking for funny and bizarre roadtrip stories to run in the Sept. 29 issue of the Observer. To get your story in the paper, prepare a well-written, typed essay describing your journey and submit it to the Accent department at the Observer office on the third floor of the LaFortune Student Center. All entries must be submitted by 2 p.m. on Sept. 22, and the Observer reserves the right to edit any entries. If we chose to run your story, you will be contacted prior to publication. Call Robyn Simmons at 239-7471 if there are any questions.
Medjugorje apparitions versus Mater dolorosa

This is the feast of Our Lady of Seven Sorrows. The Congregation of Holy Cross (C.S.C.) throughout the world is celebrating its devotion to the Mother of Sorrows, chosen under that title by our founder.

Father Robert Griffin
Letters to a Lonely God

Father Moreau, to one of the principle patrons of our religious community. Remembering "Saint Mater dolorosa/Taxa crucem lactantes haud perdere/Butillus" ("There was standing the sorrowing Mother, besides the cross weeping while her Son hung upon it."). I’m reminded why I have such deep doubts about the alleged apparitions at Medjugorje.

Picture a simple country woman who has lost a young child. She complains of the agony imposed on her by the belief that whatever happens is the direct will of God. It is intolerable for her to see that perfect little body deprived of life; it is doubly tormenting for her to think God has played this dirty trick on her. She is tempted to deny God, rather than believe heavens can be so unkind.

A wise, wonderful Anglican priest points out that this unhappy mother has stood religion on its head! If she don’t begin, he says, with the assurance that everything is under the hand of almighty Providence. Religion begins from a work without, with glories, and shot up with agonies, and we call upon the God of glory to deliver us from the wicked fidel: "Religion begins with the God of Salvation; and we do not ask Him to save us from Him self. We ask Him to save us from our enemy and His; that is, from the forces of evil.

things that they may have to say about the spiritual life are thrown into limbo by the big mistake they are making. God is not the enemy from whom we need to be saved—for He is not acting like our enemy if He is waiting to zap the human race with punitive horrors? Satan is the enemy; we need to be saved from the devil and all his works; we need to be saved from our wayward selves if we have become tripped up by the devilish polls and snares. Why would we need to be saved from the God of Salvation? Medjugorje has Him confused with the God of wrath whom we meet early in the Bible. By the time Isaiah wrote, He had decided to lay aside His anger, and He had made up His mind that He would die for us as the Suffering Servant. The God whom Christians worship is a forgiving God Who wills not the death of a sinner, for it is His will that the sinner be converted and live.

How complicated the problem of suffering would become if Christians were back on square one, trying to placate an angry God, in contradiction to the revelation we have from Jesus, Who showed us the love in His Father’s face. Then the Christ will want the under-crosses, on the one hand, from the fallen angels; on the other hand, God, in this scenario, would be standing in the wings, waiting to box Christ up and distract, through some world-wide calamity that would, without doubt, bring undeserved punishment on the four-fifths of mankind to whom the Gospel has never been preached. If famines, earthquakes, and genocidal wars that could end in a nuclear holocaust are the Lord’s doing, and not those of mankind’s ancient enemy—or if He is going to allow these terrible things to happen, because life is dispersed with us, maybe we should all become atheists.

Then we’d only have half as much to worry about, because we’d only have one cruel enemy we’d need to be afraid of.

It does Mary no honor to say that it’s up to her to save us from the bad temper of the God of Salvation. If that’s the way that Medjugorje and the other private revelations picture her, then Catholics should distrust her as much as the fundamentalist Protestants do, because, as they say, she gets in the way of Christ. I’m not out to rain on anyone’s parade. Medjugorje may be beautiful; and that’s not surprising, because millions of beautiful people go there. Supernatural things happen to the Pentecostalists Every Jimmy Swaggart preaches to them. The lightning from on high strikes repeatedly wherever the faith-climate is right; even non-Christians have miracles to boast of.

The world is in terrible shape; I’m not too blind to see that. People need to be saved from the consequences of the mistakes they are making. Some of the mistakes could leave losers deprived of grace—ineptitude of loving and being loved, possibly forever; and the hell they have created for themselves. Yet God is on their side, yesterday, today, and forever. If isn’t, the New Testament is flawed by God’s promises. The Medjugorje message could be right; but if it is, the rest of

Satan is the enemy; we need to be saved from the devil and all his works ...

which we may personally as Satan; at least we should make sure that we do not identify those forces with God. As with disasters, so with temptations: "They are not the direct infirmities of a divine pastoral strategy, twisting our tails for the good of our souls\) For God does not need to invent temptations to try us. Our own wayward desires, the bad example of our neighbors, and the trials inevitable in a world of creatures colliding with each other, will provide us with temptations enough. We cry to the God of Salvation to rescue us from mischief. As far as I can see, the children of Medjugorje, bringing us warnings of God’s impending anger and the punishment of the world that lies ahead, are contradicting the hope offered by the Gospel. The helpful

"If you look at athletic
ticket prices in the big two, Michigan and

Miami, it's probably not a good year for
tickets. In the Kickoff Classic.

The youth factor emerges
to the fore as most Notre Dame players
are young," said Tony Eilers. Ismail was highly-
rated in recruiting.

The biggest example of
tickets was Stanford's conference game
against USC.

Schembechler has won everything except a national title

By GREG GUFFEY
Assistant Sports Editor

This is the second of a two-part feature on Michigan football coach Bo Schembechler.

Bo Schembechler made his in- testion clear when he arrived on the Michigan campus in 1969—he wanted a trip to the Rose Bowl in his first season. Bo inherited a Michigan team coming off of an 8-2 season, 6-1 in the Big Ten, but the Wolverines had posted losing seasons in two of the previous three years.

Michigan met Ohio State and Woody Hayes on the last Saturday of the season for the Big Ten championship. Hayes came into Ann Arbor with one of the best teams in his coaching history, but Bo and the Wolverines pulled the upset, 24-10, to earn a trip to the Rose Bowl. Hayes on the last game of the season, but Bo then made him the permanent coach. The attention and power that Schembechler has at Michigan is incredible, but Bo still insists he is not bigger than the program. He is just football coach and athletic director among a college with over 30,000 students, just a face in the crowd.

"People say 'You won the (Big Ten) championship. You went to the Rose Bowl. Hot damn, the national championship in basketball!' So everyone thinks we're gonna sit around on our buts and get marginal. That list is like a Who's Who of Michigan football and includes quarterbacks Rick Leach and Jim Harbaugh, halfbacks Butch Woolfolk and Dave Brown, receiver Anthony Carter, guard Mark Donahue and tackle Dan Dierdorf.

Schembechler also holds down the position of athletic director at Michigan. He took charge of the basketball program last fall and appointed assistant Steve Fisher to coach the team. Fisher guided the Wolverines to the national title, and Bo then made him the permanent coach.

In 1971, Michigan defeated the Buckeyes 10-7 to earn the trip to Pasadena. Ohio State won 14-11 in 1972 and 12-10 in 1974. The two teams tied 10-10 in 1973, and a vote by the conference athletic directors sent the Buckeyes to the Rose Bowl.

After Hayes lost his job for the first game to go ahead and call: 239-5955

When Saturday comes, you can bet Bo will have his team ready. No team has ever beaten Bo three consecutive years, and he doesn't want the Irish—the team he wanted to play for in high school—to be the first. The first he would rather see is Notre Dame, but a loss might end Michigan's chances for another year.

"We will be at a disadvantage against Notre Dame," Schembechler said. "Notre Dame played their first game two days after we practiced in pads for the first time. Your greatest improvement throughout a season is between your first and second games, and they have two weeks after their first game to go ahead and work toward us."

Clemson's future bright after beating Florida St.

By STEVE MEGARGEE  
Associated Press Sports Editor

It happens every autumn. An upstart team takes advantage of a lightweight schedule to put together an undefeated regular season. Syracuse did it in 1987; West Virginia followed suit last year.

An early contender this season: Clemson of the Atlantic Coast Conference.

Following a 34-23 thumping of Florida State last week, Clemson's only remaining non-ACC opponents are Virginia Tech on Saturday and archival South Carolina on Nov. 18. Clemson, the 1981 national champion, consistently dominates the ACC, nicknamed the "Always Clemson Conference." 

North Carolina State has been Clemson's main nemesis, upsetting the Tigers each of the last three seasons. The Wolfpack must play at Clemson's Memorial Stadium next month.

Clemson's other main competitor in the ACC -- Virginia -- never in its history has defeated the Tigers.

Pre-season prognostications had Clemson going through a rebuilding season. With star running back Terry Allen, who never lost a fumble during the 1988 regular season, leading the way, the Tigers should be favored in the rest of their schedule.

The ACC champions play in the Florida Citrus Bowl at Orlando. If Clemson avoids a letdown this weekend and wins at South Carolina's raucous William-Brice stadium in the season finale, whoever wins the Citrus Bowl may have just cause for heading to nearby Disney World.

•••

Remember Don James? The University of Washington coach was touted as a genius when the Huskies made regular New Year's Day bowl appearance earlier this decade.

After breaking a 10-year string of bowl bids last season, Washington may be ready to return to the elite. The Huskies dumped Texas A&M 19-6 last Saturday.

"They were awesome against Texas A&M," said Purdue coach Fred Akers, whose team heads to Washington this weekend. "That score could have been 40-6."

"When you lose at LSU, it's like a mirturyat around here," Tigers coach Mike Archer said earlier this week.

It'll be "The Dead Zone" at Baton Rouge this weekend, as Florida State and LSU each fight for their first wins of the season.

College Football

The matchup, expected to be the premier early-season game in the South this year, now is a contest between two desperate teams.

LSU, ranked seventh in the pre-season, has had a week to brood over is year-opening loss to Texas A&M. Florida State, ranked sixth in the pre-season, has allowed 30 points in each of its first two games.

"(Florida State) is a team that returns a lot of people from a defense that dominated people last year," said Anchor. "The biggest thing they miss is Deion Sanders. There's no question what he meant to that team."

•••

Air Force quarterback Dee Dowis, who has achieved minor celebrity status for his early-season exploits, could soon be heaped with some major hype.

The Falcons host Texas El Paso and travel to Northwestern, Colorado State and Navy for their next four games. With that schedule, Air Force could be undefeated when top-ranked Notre Dame arrives on campus Oct. 14.

The Air Force press guide calls Dowis the best option quarterback in the country. Against Tony Rice, he'd have a chance to prove it.

Aside from Notre Dame, the hottest team in the nation just might be Tennessee.

The Volunteers, who lost their first six games in 1988, came back to win their final five contests. They're now 2-0 after bouncing UCLA 24-6.

Tennessee's offense had no turnovers and no penalties against UCLA, as the Volunteers had three touchdown drives of over 80 yards. But it's the defense that has changed the Volunteers' fortunes. Tennessee coach Johnny Majors makes no secret of his displeasure with that unit's performance in the first half of the '88 season.

"That was the worst unit I've had in my coaching career, on either side of the ball," Majors says of that defense.

If you've ever dreamed of being behind the controls of an airplane, this is your chance to find out what it really is.

A Marine Corps pilot is coming to campus who can take you up for trial flights.

We're looking for a few college students who have the brains and skill---as well as the desire---to become Marine pilots.

If you're cut out for it, we'll give you free civilian flight training, maybe even $100 a month cash while you're in school. And someday you could be flying a Harrier, Cobra or F/A-18.

Get a taste of life at the top.

We're looking for a few good men.

White's volleyball abilities have Michiana alive with pride

BY MOLLY MAHONEY
Assistant Sports Editor

Who says nothing good comes out of the Michiana area?

Notre Dame students have made a science out of slamming the side hitter. And Lambert believes her freshman will be the key to a strong Irish performance this season.

"I've always tried to keep an open mind about my role on the team," White said. "I walked into practice one day and coach Lambert told me 'Amy you're going to learn to hit left-handed.' And I have to admit, after hitting righthanded for eight years, I was a little skeptical.

"But I worked at it, and now it's second nature. The same goes for setting—we needed someone to fill in that spot when Julie (Bremner) left, so I'm going to do what it takes to get the job done right.'

White has used her versatility to become a steady performer for the Irish, whether passing, setting, serving or hitting.

She already has amassed 63 assists and 18 digs in her first four collegiate matches as a setter, and Lambert believes that is a small sampling of things to come.

"Amos is a natural," Lambert said.

And fellow freshman Alecia Turner exhibited some of the skills that made her a first-team All-America selection by Volleyball Monthly and Reebok at the high school level, as she recorded 52 kills and eight service aces in her first four collegiate matches.

Two tandems—senior setter Taryn Collins and sophomore setter Amy White, and sophomore middle hitters Christine Choquette and Jennifer Slosar—will be the key to a strong Irish performance this weekend.

Sophomore outside hitter Tracy Shelton, who tallied 22 kills while adding 36 digs defensively, should make her presence felt in the lineup.

Senior captain Kathy Cunningham, who leads the team with 49 digs, will need to exert herself defensively to compete for an inexperienced front line.

The Notre Dame women’s golf team is looking to make an impact this weekend as it travels to the Illinois State Women’s Golf Invitational. Last year, the Irish finished ninth in the competition.

“I’m looking for improvement into the top 10,” said Irish coach Tom Hanlon.

The Irish opened their season by hosting the Irish Invitational at the University’s Burke Memorial Golf Course last weekend. After just one week of practice, the Irish placed seventh out of a field of 18 teams.

The Irish improved considerably from last year’s performance, shaving 25 points off last year’s total and turning in a score of 675.

“I was hopeful of finishing where we did,” said Hanlon. “I think that we could’ve done better, but overall, it wasn’t too bad of a performance.”

Hanlon cited freshman Kathy Phares, who finished with a score of 165, for her outstanding performance.

“She’s shown that she’s a good golfer, as we thought she would be when we recruited her,” Hanlon said of the East Moline, Ill., resident. “We hope that she provides this kind of spark in the rest of the season.”

In two years in a row, so I can guarantee that they will be prepared,” Piane said. “We can’t take them lightly.”

O’Connor agrees that the Irish have a much tougher field this year than in the two previous seasons.

“Tuition coach thinks he has one of the best teams ever at Georgetown, possibly national calfs,” said O’Connor. “We’re a pretty young team, and we have to be a bit too confident.

Piane noted that five of the top six runners in last year’s meet against Georgetown were from Notre Dame, but he admits that this is unlikely to happen again.

“We’ve beaten Georgetown twice in a row,” said Piane.

Women’s golf heads to Illinois St.

The Irish also credited Bert Breyer (score of 168), Allison Wujnas (171) and Heidi Hanson (174) and Pendora Frocks (174).

Overall, Iowa State took top honors at the Irish Invitational with a team total of 636, while Michigan earned second place with a combined score of 638.

Dawn Martin of Iowa State led the individual competition, turning in a final score of 151.

As for the Illinois Invitational this coming weekend, the Irish hope to continue their improvement.

“We’ll be more competitive this year,” says Hanlon. “We’re not where we want to be, but we’re trying to get there.”

**Volleyball team looking to rebound at ND Invitational**

By MOLLY MAHONEY
Assistant Sports Editor

After sputtering to a 1-3 start and fourth-place finish in last weekend’s Gonzaga Invitational, the Notre Dame volleyball team is hoping it won’t go from the frying pan into the fire.

Amy White profile / page 17

Inconsistency and inexperience burned the Irish in their first four matches. Pacific, Western Michigan and Pittsburgh have all journeyed to South Bend to help apply the heat this weekend, as the Irish open their home season tonight by hosting the Notre Dame Invitational.

But Irish head coach Art Lambert is confident that his young squad will ignite its own fire and turn it on the talented field of teams it will face this weekend.

“I like what I’ve seen in practice this week,” Lambert said. “I like the attitude, the effort, the enthusiasm, and I hope that can translate into a few wins on the floor.”

“The talent, the skill is there in those freshmen. We just have to work on our consistency and sustain a high level of play to start winning some matches.”

Notre Dame will try to get off on the right foot tonight at the Joyce ACC against an old rival—Western Michigan—and try to add to the two-match winning streak it started last year in a row.

Notre Dame finally regained vengeance on the longtime title-versey last season, tallying two victories over the Broncos. But Western Michigan, always a regional power, enters tonight’s game 2-1 and ready to even the score.

Senior Joanne Bingham and sophomore Jan Cottrill and Julie Young will defend the Western Michigan brown and gold against the Irish onslaught.

Notre Dame will face a 6-1 Pittsburgh team still linking its hopes to a dominating five of its seven opponents in quick, three-game matches, on Saturday morning.

The Panthers have pounced on all their opponents but one—falling to fourth-ranked Illinois—and will bring the talented trio of senior outside hitter Julie Shirls, junior setter Janelle Lantagne and sophomore Sue Zomnir to the JACC.

And, in case the young Irish squad hasn’t had enough, Notre Dame will face eighth-ranked Pacific in the final game of the tournament Saturday night.

ND cross country teams to face Georgetown at D.C.

Men look to continue mastery over Hoyas

By MARY GARRNO
Sports Writer

Notre Dame men’s cross country coach Joe Flane would like his team to have a case of amnesia before Saturday’s season-opening meet against Georgetown in Washington, D.C.

“But we’ve won the last two years, I hope the guys won’t get too confident,” Flane said. “If you talk to Lou Holtz, he would tell you that last year is history, it’s the same with us.”

Looking back at Notre Dame’s performance last year, it seems as though the Irish would have a right to be confident. Notre Dame finished in the top 10 at the NCAAs for the second year in a row.

Among the team’s victories was a 16-44 thrashing of Georgetown at the Burke Memorial Golf Course.

But the 1989 team has a different look. All-Americans Dan Garrett and Ron Markazich have graduated, leaving a young squad behind. Flane has good idea who his top runners will be, but the rest of the team is uncertain.

Senior captain Mike O’Connor should fill Garrett’s sneakers, as the leader of the pack followed by Tom O’Houke and Ryan Cahill. Pad Kearns, a junior who was injured much of last season, also is expected to contribute.

“These are probably the top four,” Flane said.

The Observer / File Photo

With Ron Markazich (right) and Dan Garrett lost to graduation, senior Mike O’Connor (left) becomes the leader of the Notre Dame men’s cross country team this season. The Irish open the year with a dual meet at Georgetown this weekend.

Women are optimistic against stronger foe

By BARBARA MORGAN
Sports Writer

The Notre Dame women’s cross country team will attempt to avenge last year’s loss to Georgetown when it travels to Washington, D.C. Saturday for its season-opening meet.

Notre Dame coach Tim Connelly predicts a challenging meet for the Irish.

“Georgetown is one of the top programs in the country,” said Connelly. “They have 14 girls on full scholarship, as opposed to our zero, and they’ve got one of last year’s top three high school runners in the country. We’re on two totally different levels.”

Despite Georgetown’s power, Connelly was optimistic about the meet, praising the efforts of his team.

“We’re looking to improve from last year, and we’ll try to improve with every meet we run,” said Connelly. “We have a pack of kids who do a heck of a job—we’ll give a real good effort.”

Connelly said that he expects strong performances from all his runners, particularly sophomores Lucy Musralla and junior Terese Tanamimiki.

“Lucy is definitely our top runner,” Connelly said. “She can run with anyone in the country. Terese has been running very well also. She trained her butt off over the summer and is in really good shape.”
