Bush will strike without hesitancy if provoked

'Just doing my job,' says Bush

OKLAHOMA CITY, Okla. (AP) — President Bush said Monday that he "would have hesitancy at all" to use military force in the Persian Gulf if provoked by Iraq and indicated he feels no obligation to get Congress' approval.

"History is replete with examples of what we have to do," Bush said in a sharply political attack eight days before Election Day.

Meanwhile, Secretary of State James Baker was echoing Bush's tough statements in a speech in Los Angeles.

"We're using every diplomatic avenue to achieve a peaceful solution without further bloodshed," Baker said. But he added, "Let no one doubt. We will not rule out a possible use of force if Iraq continues to occupy Kuwait."

The White House policy in the Persian Gulf has won strong bipartisan support in Congress, although there is a growing feeling that Bush should consult lawmakers before sending troops into any combat. More than 200,000 American forces have been deployed to the gulf after Iraq's Aug. 2 invasion of Kuwait.

Defense Secretary Dick Cheney said last week that as many as 100,000 more troops may be dispatched. The Gulf crisis will be at the top of the agenda when Bush meets with congressional leaders at the White House on Tuesday. The president also is to consult with Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, who just returned from the Middle East.

Bush appeared unmoved by demands that Congress should be asked in advance before he sends troops into action.

"I know the authorities that a president has," Bush said. "I'm working to try to get this matter resolved peacefully. We have a lot of force there and they're well-trained, they're highly motivated and that alone is a tremendous signal to Saddam Hussein."

Bush also said the Soviet Union remains aligned with the United States against Iraq. He said Soviet President Mikhail Gorbachev "is holding just as firm as he can. And that's good, you see, because that sends a very, very strong signal that the free world is united against this dictator."

Iraq and Oklahoma state both concluded a five-day campaign trip that took Bush as far west as Hawaii while Congress was wrapping up a $490 billion deficit-reduction agreement. Bush said he had felt politically restrained while the agreement was being put together but now is taking off the gloves.

"I don't like being on the defense," he said. "I like being on the offense."

The president will hit Democrats again in a speech in Washington on Tuesday and then hit the road Thursday for nonstop campaigning until the election.

O'Hara reinstates last year's advertising policy for bands

By JOHN O'BRIEN
Managing Editor

Patricia O'Hara, vice president for Student Affairs, reinstated on Thursday last year's policy concerning the posting of advertisements for student band performances off-campus.

Her acceptance of an appeal to the policy concerning the posting of advertisements for student band performances off-campus.

Collective responsibility should replace the current policy of collective punishment, according to a unanimous resolution made by the Campus Life Council.

"The actions of a few should not result in the punishment of many," Raja Singh, executive coordinator of the Student Government Legal Department.

Collective punishment involves actions against the innocent as well as the guilty, he added.

The resolution encourages incidents involving the entire student body which might result in collective responsibility. Avoidance of such situations is sought through discussions between the appropriate administrative office and proper student officers.

"This is not just a response to the snowball fight of last year," said Singh. Because this is one of the few incidents in which the University would not form funds as a campus-wide collective punishment, it is closed off as an example in discussions of the new resolution, he added.

Collective punishment did not work in this particular situation, according to Singh. People who damaged the University's property did not care if money for hall improvements was withheld, he continued.

In the event of an incident such as this, "the Office of Student Affairs will contact appropriate student leaders," according to the resolution. This coalition will work toward the adoption of action which stresses collective responsibility.

The resolution will be sent to Patricia O'Hara, vice president of Student Affairs, for approval within seven days, citing her rationale for either action, according to Rob Pasin, assistant vice presidents for Student Affairs, to reevaluate the decision.

"We decided that the previous policy sufficiently satisfies the spirit of the provision and is consistent with advertising cur

Panelists talk about women in business

By CLAIRE ROBINSON
News Writer

There is a "glass ceiling" in the business world that prevents women from gaining access to upper level positions, according to panelists at a recent discussion about women in the business world.

The panelists discussed a survey in the Wall Street Journal indicating that many women, as well as men, have no desire to break through this glass ceiling. Individuals are either perfectly content with their position or their jobs are not a priority in their lives, according panelist Judith Hennessey.

"The ceilings are starting to crack," said panelist Thomas Nessinger. "We cannot see that individual group and say we won't count on them."

Seventy-one percent of the women surveyed believed that a glass ceiling did, in fact, exist, while 73 percent of the men surveyed said it did not, according to Phyllis Washington Stone, another panelist.

"For many decades, women have been in the work force playing second fiddle, creating the harmony that makes work possible," said Christine Ohlson. "The ceiling begins to leak around the edges, and we're hearing more women expressing their anger and frustration about the workplace situation."

Women who are successful are the ones who will jump up and go after what they want like men do," said Nessinger. However, he said that while women are aware that they can achieve high positions in business, women are often not the ones to do it.

Closing comments were delivered by Mary Cunningham Agee, president of Semper Enterprises and executive director of the Nurturing Network.

Agee focused on the three stages of change necessary to incorporate women into the work force.

First, legislative change is required. As a result, behavioral changes in the workplace ensue. These two steps are external.

The most difficult change, she said, is internal change in the attitude of both men and women.

She said that the most important thing for female newcomers in the business place to do is to try to empathize with co-workers, who have never worked with a woman before. Women should be aware that the doing so may manifest itself as prejudice.

"Winning means making sure your (corporate) ladder is leaning up against the right wall," she said.

The discussion was sponsored by the Advisory Council to the College of Business Administration, held in conjunction with the "Year of Women."
Cyanide spills into Lynches River

JEFFERSON, S.C. (AP) — Millions of gallons of a dilute cyanide solution spilled from a gold refinery and biologists Monday searched along the Lynches River to see if it had harmed livestock or wildlife.

Elsewhere, oil from a coke plant's discharge pipe spilled into the Monongahela River Monday at Pittsburgh, creating a shimmering, 4-mile-long slick, authorities said.

Health and wildlife officials in South Carolina reported no fish kills or problems with animals that might drink from the river.

Spokesman for the Department of Health and Environmental Services Division, Thorn Berry, a spokesman for the Department of Health and Environmental Services Division, said recent heavy rain created only a minimal health risk to people and animals because it would be significantly diluted after mixing with river water, said Thom Berry, a spokesman for the Department of Health and Environmental Services Division.

However, the cyanide wasn’t the only threat from the spill.

"Our concern right now is not so much the cyanide but levels of copper we’re seeing in the discharge,” Berry said. Some copper compounds also can kill aquatic life, he said.

The cyanide wasn’t the only threat from the spill.

The liquid contained only parts of sodium cyanide per million, said Richard Carnes, director of the Chesterfield County Emergency Preparedness Division.

Undiluted sodium cyanide would be fatal, but the spill created only a minimal health risk to people and animals because it would be significantly diluted after mixing with river water, said Thom Berry. A spokesman for the Department of Health and Environmental Services Division.

Campus Ministry and You

It's a scary thought. First Semester's half over. Where has it gone? To Stanford, some might argue. Or to many split beers and good intentions to study and pray and deal with those growth issues and help at the Homeless Center.

No matter, it's now gone. That's not a time to feel badly, but rather to make some manageable goals for the remainder of the semester. Here are a few categories:

1. Studies. They come first. If you find yourself just staring out the window or thinking about love's labors lost, study with others, maybe once a week per subject. That's manageable.

2. Alcohol. Policies aside, it still plays a dominant role in the social life of Notre Dame students. Maybe a new sort of drinking game could be devised for the remainder of the semester: count the drinks. Be acutely aware of how much you drink, and reflect on how you feel about that. Talk it over with someone you trust who won't lecture you, but will be honest. A minor step, but a beginning.

3. Socializing. Think of one new way to have fun, that isn't in any way even potentially destructive. You have six weeks to come up with one!

4. Sex. Find a safe person with whom to reflect on your emerging sexuality. Get just a bit more honest about it. Take your time.

5. Prayer. Add three minutes a week to whatever time you currently spend praying: the time spent listening to God's groanings within you. Just listen. Don't analyze. Just listen. Maybe that'll bring you to a total of three minutes a week of prayer. That's ok.

6. Service. Volunteer one more time than you did the first quarter, to help someone who will increase your image of who God is.

7. You. Be it!

Happy New Quarter!
Scientists find new danger in cocaine

NEW YORK (AP) — People who drink alcohol while using cocaine create a third brain-targeting substance that may help boost their euphoria and may contribute to a puzzling form of overdose death, researchers say.

The research may help explain a preliminary finding that adding alcohol to cocaine use produced 21.5 times the risk of an overdose death for people with severe coronary heart disease, scientists said.

Drinking is frequently combined with cocaine, according to the National Institute on Drug Abuse. New studies show that a substance called cocaineethylene, formed in the liver from alcohol and cocaine, reaches the brain and mimics some actions of cocaine there.

Further studies of cocaineethylene may give leads for medications to treat cocaine addiction by blocking cocaine's effects, said study co-author Deborah Mash, a neuropharmacologist at the University of Miami School of Medicine.

She and other researchers spoke in telephone interviews about the work, which was presented Monday at the annual meeting of the Society for Neuroscience in St. Louis.

Scientists found that cocaineethylene affects a brain-cell communication system thought to produce the euphoria that leads to cocaine addiction, she said.

Prior research suggests that cocaine produces its "high" by intervening in this system, in which brain cells signal each other with a chemical called dopamine. After a dose of dopamine reaches its target cell, it is supposed to be brought back to its original home by molecules called transporters. But cocaine blocks this mechanism by binding to transporters, keeping the signal turned "on" and producing a sense of pleasure, scientists said.

The new work shows that cocaineethylene also binds to the transporters, suggesting it may boost cocaine's effect, Mash said. In addition, she said, it appears less able than cocaine to moderate the euphoria through a second brain communication system.

Another possible role of cocaineethylene deals with cocaine overdose deaths in people with severe coronary artery disease.

Tight Security

Harvard will sponsor conference on AIDS

CAMBRIDGE, Mass. (AP) — Harvard University said Monday it will sponsor the annual international AIDS conference in 1992, four months after threatening to cancel the forum unless the United States removed travel restrictions on people infected with AIDS.

The conference, the principle forum for presenting scientific information on the fight against the disease, will go ahead in the last week of May 1992, school officials said.

In June, the Harvard AIDS Institute threatened to withdraw as sponsor and cancel the conference to protest a U.S. policy making AIDS infection one of several contagious diseases for which foreigners could be barred from the country.

But under a revised immigration bill passed by Congress over the weekend, Health Secretary Louis Sullivan would have the authority to remove AIDS and other diseases from the medical list for which a person may be denied entry.

Sullivan has repeatedly said there is no reason to exclude people with AIDS, because the disease is not passed casually, but only by exchanges of blood or body fluids or by sexual contact.

The measure went to President Bush, who has indicated he will sign it as early as this week.

The conference is expected to attract about 15,000 researchers, policy makers, community organizers and AIDS patients, Harvard officials said.

What a long strange trip it's been

Surgeon General warns not to mix Halloween with hops

WASHINGTON (AP) — The Surgeon General on Monday issued a pre-Halloween warning to the beer industry, saying it should avoid advertising practices that encourage drinking among minors.

"The beer industry should not capitalize on a season that youngsters look forward to with great anticipation to push their products," Dr. Antonia Novello said. "Halloween and hops do not mix."

Novello said breweries and their advertising agencies were sending the wrong message to minors, that alcohol consumption was acceptable for children under the legal drinking age. She said they should put larger warning labels on containers and revise advertising practices.

"We would like the industry to share in the responsibility," she said. "Children can either consciously or unconsciously be affected by both print and electronic ads that for the most part never show the harmful effects of alcohol consumption."

Alcohol abuse was "the number one substance abuse problem among American youth," and indications were that the situation was getting worse. Children were being enticed by advertisements for so-called "soft liquors," including beer, wine and wine coolers, she added.

The alcohol industry annually conducts its most intensive advertising campaign between October and January. The National Coalition on Television Violence estimated that before the average American child turns 16, he would see 75,000 television scenes where alcohol is consumed or its use encouraged.

A Focus on Human Sexuality

To promote a better understanding of the psycho-social, religious, cultural, philosophical, and historical aspects of homosexuality and lesbian and gay people.

Computer classes to be offered

Special to The Observer

The Office of University Computing will be offering computer training classes for students who have never used a computer for word processing.

The classes begin today and will run through mid-November. They will give free instruction to Notre Dame, St. Mary's and Holy Cross students.

The classes focus on the basics of using a computer for writing a paper. The instruction includes use of Microsoft Word 4.0 on the Macintosh computers and Word Perfect 5.1 on the IBM/Zeith (DOS) computers.

The classes will be conducted Oct. 30, Nov. 1, 6, 7, 8, 13, 14, 15. If students are interested in attending one of the classes they should register in person at the Information Resource Center (IRC), Room 111, Computing Center/Math Building, or by calling 239-8111. All classes are taught in Room 248 of the Hesburgh Library from 7 to 9 p.m.

Students must pre-register because classes with less than five students registered the morning of the class will be canceled, said David Mastic, training specialist of the Office of University Computing.

Information regarding spring semester offerings will be available in the IRC after the Christmas Break.

WASHINGTON (AP) — Savings and loan whistleblowers could get rich under legislation passed by Congress that provides rewards for information leading to fraud prosecutions and the recovery of ill-gotten gains.

The provisions, enacted as part of the crime bill passed over the weekend, offer rewards of up to $30,000 for information leading to prosecution of S&L crooks.

Whistleblowers who help Justice Department investigators trace ill-gotten gains would share a percentage of the seized money if the attorney general declared the information was crucial to its recovery.

The bounty provisions would only apply to people who are not participants in S&L crimes, said Laurence Urgenson, head of the Justice Department's fraud section.

But "there's a category of individuals on the periphery, who know about it, never have been knowing participants, but could point the way," Urgenson said.

"The potential awards are ample and certainly adequate to provide incentive for someone to come forth," Urgenson said. "It could be millions of dollars in certain kinds of instances, certainly tens of thousands in many," he said.

A person who helps the government recover S&L money would share 20 percent to 30 percent of the first $1 million, 10 percent to 20 percent of the next $4 million and 5 percent to 10 percent of the next $5 million, according to the bill.

The bill also creates a so-called S&L kingpin crime that carries a sentence of 10 years to life and fines up to $10 million for individuals and $20 million for corporations.

The "continuing financial crimes enterprise" is defined as a fraud continuing over a two-year period by three or more people in which at least one person gains $5 million.

S&L legislation passed before Congress adjourned for the year may not include extra money to bail out failing thrifts.

But the crime bill raises from $50 million to $162.5 million the Justice Department's annual appropriation for fraud investigations.

Last week, Congress appropriated slightly less — $160 million — for the current fiscal year.

The legislation also creates an eight-member commission to study the cause of the S&L crisis. Six of the members would be appointed by Congress and two by the president.

The panel would have the power to subpoena testimony and evidence. The attorney general or the heads of the Office of Thrift Resolution and the Resolution Trust Corp. could veto commission attempts to take evidence or testify to protect an on-going investigation.

Five members of the commission could vote to override such vetoes.

The Bush administration had opposed creation of the commission, saying it would interfere with investigations and that it is agreed to compromise language.

The bill also:

• autorizes court-approved wiretapping of S&L officials suspected of wrongdoing
• expands the list of crimes under which ill-gotten gains would be subject to civil forfeiture.

S&L 'whistleblowers' might be getting rich

Soviets make friendship pact

AMBOUTIET, France (AP) — Presidents Mikhail Gorbachev of the Soviet Union and Francois Mitterrand of France signed a friendship pact Monday providing for immediate consultations if either country feels threatened by conflict.

The two leaders signed the Treaty of Friendship and Cooperation after an overnight visit to Paris by the Soviet leader.

"In the case of situations which, in the view of one of the parties, create a threat to peace, a breach of peace or provoke international tension, the governments of France and the Soviet Union will enter into contact without delay to coordinate all aspects of such situations," the treaty said.

The treaty fell short of a non-aggression pact, similar to the friendship pact in 1944, and France's first bilateral treaty in 27 years. It was signed at the chateau of Rambouillet, 33 miles southwest of Paris.

"We have done a great deal of work in a short time," Gorbachev said at a joint news conference with Mitterrand. "This reflects the new level of cooperation and understanding between the leadership of our two countries which enables us to obtain results."

The broad agreement calls for regular political consultations. It also provides for cooperation in energy, non-military nuclear science, transportation, high-definition television and telecommunications.

France and the Soviet Union pledge to "reinforce European solidarity" and seek the creation of a European confederation.

The treaty promised French assistance as the Soviet Union shifts to a market economy, and French help in arranging accords between Moscow and the 12-nation European Community.

The treaty was the first between the countries since a friendship pact in 1944, and the two leaders met last month will conduct a summit service in Sofia, Russia as a special bishop council decided to give independence to the Ukrainian Orthodox Church.

Man praises ‘Fountain of Youth’

WAUKEGAN, Ill. (AP) — Robert Bensing doesn’t feel cheated by his brief flirtation with an age-reversing hormone that some may find to be a doorway to a futuristic Fountain of Youth.

In fact, the 72-year-old retired chemist has found his joints no longer ache constantly with arthritis and his skin is firmer, giving him the appearance and vitality of a man 20 or 30 years younger.

“I feel a little more energetic,” said Bensing, who retains his interest in chemistry and talks about his age as a “mere” 72. “I was more willing to go places and do things than before.”

The growth hormone taken by Bensing and 19 other older male volunteers in a synthetic version of one produced naturally in humans. As one ages, the natural production of the hormone fades and eventually stops, researchers have learned.

Daniel Rudman, an endocrinologist at the Medical College of Wisconsin in suburban Milwaukee and director of the experiment, said researchers have determined the hormone injections reversed aging in the body composition of elderly men by as much as 20 years.

Rudman and his fellow researchers reported this summer in the New England Journal of Medicine that the hormone increased lean body mass in patients by 9 percent, decreased fat tissue by 14 percent and thickened skin by 7 percent.

It does not, however, affect failing eyesight, hearing loss or degeneration of brain cells. The improvements strictly involved the patient’s body mass.

Rudman, 62, was among a group of physicians in the 1960s who used human growth hormone to treat abnormally short children. He decided to experiment with the hormone on the elderly after watching his parents grow old and frail in a nursing home.

The hormone, once only available by extraction from human corpses, now is produced through genetic engineering. But regular treatment costs $14,000 a year for adults.

Experts warn it is too soon to determine the severity of side-effects or whether the hormone could be produced cheaper and more readily.

Most of the men in the experiment have declined to talk publicly since the study was published, some at the advice of the Medical College of Wisconsin.

Bensing, one of the first volunteers for the study, said the hormone lessened the crippling effects of arthritis, prompted a quicker recovery from a cataract operation and appeared to make a crushed spinal disk a bit sturdier.

“There’s a guy my age starting to call me ‘son,’” Bensing said. “They said, ‘You look great.’”

When he began treatment, Bensing was told the possible side-effects included an increase in blood pressure or blood sugar. But his only complaint was a number of his in his wrists, which he attributed to pressure from skin and muscle growth. It stopped once the therapy ceased, he said.

Tests revealed the hormone treatments helped shrink body fat, restore lean body mass lost through aging and increase the thickness of Bensing’s skin.

“I noticed right off he was doing things much faster,” said Bensing’s wife, Alice. 57. “He was more willing to go places and do things than before.”

Cuba still bitter about 28-year-old withdrawal

MEXICO CITY (AP) — The Cuban government Monday released a document on the 1962 missile crisis and reiterated its bitterness over the Soviet decision 28 years ago to remove the missiles without consulting with Cuba.

The government's news agency Presa Latina, in a dispatch monitored in Mexico City, ran a description of the event it said was culled from a 200-page secret document that Fidel Castro's government just released.

"Twenty-eight years after the October Crisis that pushed the world to the brink of nuclear war, the Cubans maintain their claims from the era and reproach Nikita Khrushchev for having excluded them from secret conversations," the article begins.

There appeared to be little new in the document, and its release seemed to be in the nature of nursing an old grudge at a time when relations between the Soviet Union and Cuba have hit a post-revelation low.

Although the Soviet Union is still in Cuba, the new dispatch suggests that the relationship has suffered. "Cuba, which has published a series of revealing, unflattering reports, including a rare portrait of Castro's personal life that said he has 32 houses, a security contingent of 9,700 and five children by five women," the dispatch states.

Cuba has dedicated a new monument on the launch site for the rocket that shot down an American spy plane during the crisis. Fama Latina reported in a separate dispatch that the monument contains a palm tree surrounded by palm trees, symbolizing the decision of Cubans to defend their territory.

In the summer of 1962, the Soviet Union began installing 42 medium-range nuclear missiles in Cuba. U.S. spy planes detected the missiles, and the United States began a naval blockade of Cuba. Tensions peaked when Cuba shot down a U-2 spy plane on Oct. 27; Khrushchev submitted to President Kennedy's demand the missiles be withdrawn.

In newly released excerpts of his memoirs, Khrushchev called Castro a "bushhead" who wanted the Soviet Union to attack the United States during the crisis. Castro denied that story.

The document released Monday said the Soviet Union had sent a delegation to Havana in May 1962 to discuss installing the weapons as a means of discouraging the United States from attacking Cuba.

Cuba accepted the plan in June after a meeting of the political leadership including Castro, his brother Raul Castro, Ernesto "Che" Guevara, revolutionary heros, Black River and Emilio Aaragones, it said.

The weapons, medium-range R-12 missiles, began arriving after Raul Castro visited Moscow in July and signed a secret agreement, according to the report.

About 43,000 Soviet soldiers, officers and specialists were sent to Cuba in connection with the deployment, it said.

The Soviet general in charge and had visited the site and had ordered to use the missiles "only in case of aggression by the United States and only under orders from Moscow," the report said.

AYODHYA, India (AP) — Hindu holy men clashed with police Monday and set a bus on fire in this curfew-bound city, the eye of a violent religious dispute between the country's Hindus and Muslims.

It was the first report of violence in Ayodhya in connection with the plan of fundamentalist Hindus to start building a temple over a 12th-century mosque on Tuesday.

The dispute has killed at least 104 people nationwide in the past week and brought Prime Minister V.P. Singh's government to the brink of collapse.

One person was killed Monday in Lucknow, 75 miles west of Ayodhya, when Hindu mobs surged through a Moslem neighborhood throwing bricks, according to police officials who spoke on condition of anonymity.

One person committed suicide by swallowing poison Sunday night in Howrahpur in Punjab state to protest government efforts to halt the temple project. United News of India said.

In Ayodhya, a town of about 40,000 people, a group of about 80 Hindu holy men threw stones at police and set a bus on fire. When authorities attempted to arrest a local Hindu priest, a police inspector said.

The inspector, who spoke on condition of anonymity, said it was an isolated incident and did not cause any lasting tension.

But within an hour of the skirmish, authorities banned entry into Ayodhya and canceled passes issued to reporters.

By Tuesday afternoon, an indefinite curfew was in force in the town, which has remained peaceful despite the raging controversy over the religious site.

At least 80,000 Hindus who were planning to participate in the construction program have been arrested and roadblocks set up on all routes leading to Ayodhya.

Hindu fundamentalists, however, claimed they had infiltrated thousands of supporters into areas near Ayodhya and would start the temple construction program as scheduled.

In a hand-written communiqué, the World Hindu Council vowed to start building the temple despite the presence of 20,000 police and paramilitary troops in the town.

Residents of Ayodhya said 5,000 Hindu activists were hiding in fields and villages around the town and planned to converge on the disputed holy site Tuesday morning to start constructing the temple.

In New Delhi, the World Hindu Council claimed 10,000 supporters had slipped through police cordons and roadblocks around Ayodhya.

Police in Ayodhya and the neighboring town of Faizabad said the claims were inflated. They said a maximum of 1,000 to 2,000 temple activists might have reached the area. "We are in a position to control them," said a police official, speaking on condition of anonymity.

A two-paragraph statement claiming to come from a top leader of the World Hindu Council was covertly distributed to reporters in Faizabad on Tuesday afternoon. It urged residents to defy a round-the-clock curfew and come out of their houses Tuesday morning.

"This curfew is murder of democracy. I appeal to all citizens of Faizabad and Ayodhya to come out in large numbers tomorrow (Tuesday) and march with us," the statement which carried the name of Ashok Singhal, general secretary of the World Hindu Council.

HEART ATTACK. Fight it with a Memorial gift to the American Heart Association.

American Heart Association.
Dear Editor:

Doonesbury

Recent events in the performance of "Camelot" are far from our minds. Our main concern this time of year is surviving the snowball fight. Last year, snowballs were too expensive. Tickets for "Dracula" were a whopping $14. Outside the campus community, the price for such an event like "Dracula" would exceed the Saint Mary's price tremendously. We would be paid a lot more than $14 socializing in less than the time spent at any performance. In addition, many students said they were too busy with school work to go. Since we are, first and foremost, students, I understand the difficulty of ignoring school work to see a production. Still, we can't close ourselves into our little college world and ignore everything else. We should take advantage of what the campus offers us. The chances of finding performances of this quality, at such a low price and convenient location, are slim. I'm searching for answers as to why there is such low student attendance at these productions. Is it a lack of interest in the performances? Saint Mary's tries to offer a wide variety of cultural events. The Performing Arts Series presents music concerts from classical to modern, dance presentations of all sorts, and many theatrical events each year. I also heard the complaint that students didn't even know how to duck. No, I would like to discuss the snowball fight. While it is still October and we are enjoying the sights of fall—leaves falling off the trees, squirrels gathering acorns and alum walking around in plaid, I would like to discuss winter. Not the whole season, of course, since such discussions would inevitably lead to complaints about sub-zero January temperatures. No, I would like to discuss the opening event of winter, which occurs shortly after the first snowfall: the interquad North-South snowball fight. Last year, during the fight, I was standing by a third-floor window when it was broken. I had to go to the hospital to get my right ear stitched, and I received minor cuts on my face as well. The window was a complete loss.
I experience storm food out of his hands. In his Greensburg, which is in glorious Midwest.

Daum's pet bass. Internationally known for the trees that exist was publication, a map of Indiana

A must-see is the "largest tree in the nation east of the Yosemite Valley," or at least a remnant of it, in Kokomo. And you thought the trees in Greensburg were good. More than 100 feet tall and with a girth of 31 feet in circumference, it was once used to house a telephone booth.

On second and goal at the ND 3, George Williams throws Gene McGuire for a three-yard loss.

In the final confrontation between the two teams, Mike Heldt confronts Miami's Shane Curry.

Craig Hentrich kicks one of his Notre Dame-record five field goals versus Miami.

Leonard Conley, hit by Greg Davis, fumbles at the Notre Dame three with 4:44 left in the game.

Miami quarterback Craig Erickson is pressured by Demetrius DuBose. Erickson picked apart the Irish secondary for 355 passing yards.

Raghib Ismail slashes for a gain around the Miami line as Russell Maryland (67) tries to escape a block.

George Williams recovers Gene McGuire’s (30) fumble, forced by Scott Kowalkowski, at the Miami 25.

The Final Confrontation
Photos by Patrick Kusek, Andrew McCloskey and John Studebaker

Rodney Culver takes the wraparound handoff and gains eight yards.

Culver gains seven on a pass over the middle from Mirer.
Raghib Ismail, on getting a block from Tony Brooks (40), returns a kickoff versus Pittsburgh for 24 yards. Tony Brooks sprints through a wide gap and sprints to the end zone in the first quarter to make the score 7-0 Notre Dame.

Alex Van Pelt completed a record 37 passes against Notre Dame for a 384 yard tally.

Chris Zorich (50) makes a diving tackle on Curvin Richards near the Notre Dame sideline.

Todd Lyght intercepts a Van Pelt pass in the second quarter for a touchdown, stopping a Pittsburgh drive.

Donn Grimm (36) tackles Panther tailback Curvin Richards as Tom Carter (13) looks on.

Rocket runs behind center Heldt in the third quarter for 12 yards and a first down.

Rodney Culver plunges up the center for a 16-yard gain to set up a Rick Mirer touchdown to give the Irish a 31-15 lead.

Tony Brooks (40) breaks into the open field in the second quarter for a 28-yard touchdown run to give Notre Dame a 14-0 lead.

Winning Ugly in the City of Steel
Photos by Andrew McCloskey and John Studebaker
Steelers’ special teams shine as Pittsburgh crushes Los Angeles

PITTSBURGH (AP) — The Pittsburgh Steelers special teams overcame its own bumblings and came up big something special Monday night.

Empossessed a week ago at San Francisco when they allowed the 49ers to recover a kickoff as their own 5, and victimized Monday night by Gaston Green’s 100-yard return of the opening kickoff, the Pittsburgh special teams made a 180-degree turn in helping the Steelers over the Los Angeles Rams 41-10.

The offense and defense certainly helped. Bobby Brister had four touchdown passes, two following interceptions, and Merril Hoge had three touchdowns and Pittsburgh’s league-leading pass defense limited Jim Everett to 15 completions in 34 attempts for 176 yards. But it was the special teams that set the tone.

Rod Woodson returned kickoff 44 and 49 yards to set up two of the Steelers’ goals by Gary Anderson. And Larry Griffin and Dwight Stone combined to stuff Rams punter Keith English, setting up a one-yard TD run by Hope that opened up a 27-10 lead in the third quarter.

The victory improved Pittsburgh’s record to 4-4. The Rams are 2-5 and in serious jeopardy of missing the playoff spot that had been virtually conceded to them in the season.

The Steelers’ special teams were anything but special early. Looking as bad as on Green’s 100-yard romp up the sideline as they did in Week 1, when Barry Foster let a San Francisco kickoff drop untouched, contributing to a 49ers’ touchdown.

Foster contributed Monday night with a 38-yard run that set up Pittsburgh’s final score, a two-yard pass to Hoge from Brister, who completed 15 of 24 for 161 yards.

The Steelers bounced back from Green’s kickoff return to tie the score on a 75-yard, eight-play drive, capped by a sixth-yard Brister-to-Hoge TD pass. Brister was 6-for-6 for 61 yards on the drive.

Late in the first period, David Johnson intercepted a pass by Everett and returned it 34 yards to the Rams’ 17. On the next play, Brister hit Eric Green all alone in the end zone for the 275-pound rookie’s sixth touchdown this season, a team record for a tight end.

Mike Lansford’s 32-yard field goal 45 seconds into the second period cut it to 14-10. But Woodson returned the kickoff 49 yards to the Rams’ 39, setting up a 42-yarder by Anderson that made it 17-10 at halftime.

Woodson did it again on the second-half kickoff, which he brought back 45 yards to the Los Angeles 45. That set up another field goal, this one from 30 yards.

Then came the key play in Pittsburgh’s biggest win since the opening game of 1985 season, a 43-3 victory over the Indianapolis Colts.

Dolphins’ defense keys strong start

MIAMI (AP) — The last time the Miami Dolphins had a decent defense was the last time they made the playoffs.

Now, five years later, they’ve given up the fewest yards in the NFL and — voila! — they’re again a first-place team.

Miami allowed 356 yards per game a year ago, fifth-worst in the league, but the average is 230 this season. Indianapolis managed just 132 yards, the lowest in the NFL, against the Dolphins since 1979, in Miami’s 27-7 victory Sunday.

“We’ve pretty much stayed with the same defensive philosophy,” coach Don Shula said Monday. “It was just a question of guys making the push upfield and getting rid of the worker and staying in their lanes and pursuing.”

With five new starters on defense this season, Miami has allowed only a league-low 90 points. That’s an average of 13 a game, compared with 23 a year ago.

Rodney Culver scores the final touchdown of the game versus Miami in
the fourth quarter with 6:16 left, crossing the endzone after a fullback
dump over the middle from Rick Mirer.

The example Rodney Culver has set is an
inspiration to us all. And as a leader in its own field,
Toyota recognizes the discipline and unrelenting effort
to set the standard. So next time you watch a college
football game, look a little closer. There's a lot more
talent on the field than you realize.

"I love what you do for me." TOYOTA

IF THEY LOOK LIKE COLLEGE FOOTBALL PLAYERS, YOU'RE ONLY SEEING
PART OF THE PICTURE.

RODNEY CULVER of the NOTRE DAME FIGHTING IRISH

Rodney Culver, fullback of the Notre Dame Fighting Irish, as a recipient of the
Toyota Leadership Award for demonstrating
outstanding leadership in the fields of academics, athletics, and community.
Rodney Culver will receive the Toyota Leadership Plaque, and the University of Notre Dame will receive a
$1,000 contribution to its general scholarship fund.

Pitt
continued from page 24

tory that stopped a powerful
Panther drive.

"I was happy with the inter-
ception," said Grimm, a Penn-
sylvania native, "since I had
been frustrated with them run-
ning routes around me."
Holtz explained that while Van
Pel's performance against the
Irish defense disturbed him,
Notre Dame's zone coverage,
which allowed Pitt receivers to
catch short patterns in front of
the Irish defenders, protected a
l40-year-old secondary from re-
linquishing the middle or long
yardage passes.

We need to be able to play
some man and play it a little
bit better," said Holtz.

Notre Dame played much of
the second half without
Zorich, who was injured mid-
way through the third
quarter. Double- teamed most
of the game and the cause of a
number of Pitt holding
denials, Zorich had forced a
fumble and contributed to five
tackles (two for losses) when
his right knee cap slipped out of
and back into place, sidelining
him for the rest of the game.
The injury, which is similar to
the one that kept Zorich out of
spring practice his freshman
year, will probably prevent the
senior nose tackle from playing
in this week's game against
Navy.

While the Irish defense shone
for most of the game, the Notre
Dame offense was largely un-
productive, due in part in some
Panther defense antics.

They kept us off-balance," said Holtz of the Pitt defense.

They never had a reason for what they did. We
couldn't get anything estab-
lished."

Irish quarterback Rick Mirer
had his first less-than-
spectacular game for Notre Dame, completing only 5 of
the second half without
16 passes for 85 yards and one
interception, his third of the
season.

Rutter-fingered receivers, who
dropped a number of catchable
balls, contributed to the poor show,
as did the lehens of the Irish
defensive line, which after an
impressive game against Miami,
did not give Mirer adequate
time to set up for the pass.
Miler was sacked three times for
a loss of 16 yards.

Ismail and tailback Tony
Brooks accounted for most of
the Irish offensive highlights.
Brooks, who ran for 91 yards
on the day, took advantage of
Lyght's interception and Mc-
Donald's fumble recovery to
score both of Notre Dame's
first-half touchdowns. Ismail
took over in the final two
quarters, running for 110 yards
on 10 attempts while compiling
214 all-purpose yards.

Both teams hurt themselves
with a total of 18 penalties
that accounted for 182 lost yards,
including four 15-yard
penalties for the Panthers.
The first of those, a roughing-the-
kicker call on Hentrich's only
punt, dislocated the kicker's
left thumb.

Hentrich continued his place-
kicking duties but could not
catch the long snaps on punts
and was replaced by back-up
Jim Sexton. The thumb has
been flint with a cast and may
prevent him from punting next
week.
Rocket
continued from page 24

up 14 points and 171 yards to secure a back.

The week, Pitt went on to win the game.

Women's soccer finishes 16-3-1, captures MCC title

By DAVE DIETEMAN
Sports Writer

The Notre Dame women's soccer team wrapped up its 1990 season in style this past week, winning the MCC Tournament and two other games to finish at 16-3-1.

The Irish dumped Calvin College 2-0 on Oct. 20 behind unsung second-half goals by freshmen Stephanie Porter and Andrea Kurek.

Notre Dame's next victory was a 3-2 cliffhanger in overtime at Florida International on Oct. 24. The Irish, who had brought 20 players down to Florida, suffered the loss of several players.

Standout sophomore goalkeeper Michelle Lodges splashed her knee trying to save a goal with 10:00 remaining in the first half. Midfielders Margaret Jarc and Marta Roemer, who were replacing the already-injured Brenda Gorski, were also knocked out of the game in the first half.

Typically, sophomore Cara Lewis will step in for Lodges. However, since Notre Dame was only playing one game, normal procedures did not dictate the necessity of carrying two goalkeepers on our trip.

Enter Molly Lennon. Lennon had never played goalkeeper before. In addition to her paucity of goalkeeping experience, Lennon, who has played most of her games in the midfield, had been saddled with injuries this season.

In 79:00 of goalkeeping that could air on rebirths of "That's Incredible," "Ripley's Believe It or Not," Lennon made seven saves and allowed only one goal, as the Irish held on for a tremendous road win.

"I tried to play with four fullbacks and four midfielders after Margaret and Marta went down," said Irish head coach Chris Petrucelli. "Molly went in to play goal, and the rest of the game we just refused to lose. We fought, we played hard and we scrapped the whole way.

"Really, you have to figure that a player that has never played goalie will make more than one mistake, but Molly really only had one. She was very, very good back there. Everyone raving around her playing."

Alison Lester accounted for two goals and one assist, while Susie Zilvitis nabbed the game-winning goal in overtime. Mimi Suba assisted on the first of Lester's goals.

"Without a lot of players and with the injuries, everyone picked up their level of play," noted Petrucelli. "I didn't expect the game to be close, but after the injuries I thought that we would be lucky to come out with a tie."

... The Irish returned home in time to host and win the Midwest Collegiate Conference (MCC) Tournament over October 27 and 28.

In the first day of action, Xavier clouted Marquette 3-0, while Notre Dame ran their winning streak to six games, trouncing Dayton 1-0.

Early in the Dayton game, Marianne Giulitti, who did not start, was waiting at the scorer's table to substitute for Denise Chabot. Yet as Giulitti waited to enter the game, Chabot scored the only goal of the day for the Irish. As Notre Dame moved out to a 1-0 lead, they would never relinquish it.

On the second day of the tournament, Dayton thumped Chabot 3-0, while the Irish ended their season with a seven-game winning streak, second only to Xavier 4-0.

Xavier, who had been ranked 21st in the nation in Division I, in addition to being the fourth-ranked team in the central region, proved unable to shut down the potent Irish squad.

"We won a game against a quality opponent," said Petrucelli. "They had a forward who probably the best player we have faced all year. But Andrea Kurek hit her down. We have always put Andrea on the opponent's best player all year long and she did a great job as usual."

"We took advantage of our opportunities. It was a great day for the team and for individual players. We won the conference tournament, finished the season with 16 wins and beat a Top 20 team—those are three great accomplishments for this team."

Susie Zilvitis had a hat trick against Xavier, while Alison Lester added her 15th goal of the season. Marianne Giulitti, Stephanie Porter and Denise Chabot each added one assist.

Lester's goal set a new record for most goals in a season by an individual player. Susie Zilvitis set the old record of 14 in 1988.

Mimi Suba, playing in the last game of her Notre Dame career, also turned in a splendid performance.

... In the last couple of games and last couple of weeks, Mimi has been outstanding," observed Petrucelli. "She has picked up her level of play and played like a senior who is ending her season and her career."

In addition to being the fourth-ranked team in the central region, observers have noted that Notre Dame has indeed garnered a great deal of regional recognition and taken a giant step toward national prominence.

SEMINAR ON BUSINESS FACULTY CAREERS
FOR MBA STUDENTS
AND SENIORS AND JUNIORS
IN ALL COLLEGES AND MAJORS

ARE YOU SHORTCHANGING YOUR CAREER OPTIONS?

-- What's involved in becoming a business professor?
-- What are the academic qualifications and requirements?
-- How long does it take? How much does it cost?
-- Are scholarships available? Other financial help?
-- What are the starting salaries and trends?
-- What are the career satisfaction from teaching, research, and service?
-- How much control over your life do you have?
-- If I am interested, what are the next steps to take?

I invite you to join many of the College's faculty and other interested students for brief faculty presentations and a panel discussion. I hope to see you there. This meeting just might make you consider an entirely different career! Please join us.

ROOM 120 HAYES-HEALY

How to start your law career before you start law school.

Start with the Kaplan LSAT prep course. After taking Kaplan, thousands of LSAT students score over 40. That's the top 10% nationwide! And candidates who score over 40 on the new LSAT enjoy the best chance of being accepted to the law school of their choice and going on to practice with top law firms or corporations.

So call any of our 120 centers for information and class starting dates. The Kaplan LSAT prep course could be the one pre-law course that determines the course of your law career.

scheme crafted by defensive coordinator Gary Darnell. Instead, he worked with Darnell during the week and focused on turning up the intensity at practice.

"We worked very hard the last two weeks," Holtz said, "and the players responded. I thought we made a lot more progress than people envisioned, and our pass defense wasn't far away from being very good than what people would be led to believe.

"With Coach Holtz coming to practice (on the defensive side of the field), it definitely helped us get motivated more," said outside linebacker Scott Kowalkowski, who forced a third-quarter fumble by Hurricane fullback Steve McGuire at the Miami 25.

One of the biggest defensive plays of the game was Chris Zorich's hit on Miami quarterback Vinny Test A. Chris Zorich dove to bring him down at the Miami 20. The ball slipped out of Test A's hand.

Field corner Todd Lyght made perhaps the biggest defensive play of the game when he intercepted Erickson's pass for Lumare Thomas at the Irish eight-yard line with ten minutes remaining in the game and Notre Dame clinging to a 22-20 lead. Nose tackle Mike Conley chased Erickson out of the pocket, and he forced a three-down field where Thomas had slipped at the 15.

"Our front three got good pressure on Erickson," Lyght said, "and he was looking for the open zone. We put in coverage that they hadn't seen before and that kept them off balance."

"We score there and kick a field goal, we're right back in it again," Dennis Erickson said. "Instead, we throw an interception and they take the ball down and score. That's obviously the turning point in the game."

It was also something Holtz planned for in preparing his pass defense for Miami's aerial attack. Erickson completed 20 of 36 attempts for 355 yards in the game, but his two interceptions proved costly.

"We took Todd Lyght and moved him on the inside guy and played a lot of man-to-man on Todd," Holtz said. "We put a lot of pressure on Todd, and we put a lot of pressure on short cornerback Greg Lane. I thought they responded very well."

Lyght led all Irish defenders with eight total tackles, including six unassisted. Backfield mates Greg Davis and Reggie Brooks added five apiece.

"We played the run very well up front," Holtz said. "Our secondary played well, but we felt we had to stop the run with the six-man front. We have played well up front. That's what I said all along. We just have to take this to another level."

Here's Why The Smart Money at University of Notre Dame is Going with TIAA-CREF

As if the Future Depended on It.

B ecause it does. Smart investors know that your future depends on how well your retirement system performs. TIAA-CREF has been the premier retirement system for people in education and research for over 70 years. We have enabled over 200,000 people like you to enjoy a comfortable retirement. And over 1,000,000 more are now planning for the future with TIAA-CREF:

SMART MONEY LOOKS FOR SECURITY, GROWTH AND DIVERSITY FOR RETIREMENT SAVINGS

Security—to the resources are there when it is time to retire. Growth—so you'll have enough income for the kind of retirement you want. And diversity—to help protect you against whatever volatile changes you may benefit from several types of investments.

THAT'S EXACTLY WHAT YOU GET WITH TIAA-CREF.

TIAA offers you the safety of a traditional annuity that guarantees your principal plus a specified rate of interest, and provides for additional growth through dividends. CREF's variable annuity offers opportunities for growth through four different investment accounts, each managed with the long-term perspective essential to sound retirement planning:

The CREF Stock Account
The CREF Money Market Account
The CREF Bond Market Account
The CREF Social Choice Account

CALL 1-800-842-2786 TO FIND OUT MORE

Our experienced retirement counselors will be happy to answer your questions and tell you more about retirement annuities from TIAA-CREF.

Experience. Performance. Strength. Your future is protected by the largest private retirement system in the world. We have done so well, for so many, for so long, that we currently manage some $85 billion in assets.

For more complete information, including charges and expenses, call 1 800-842-2733, ext 5500 for a prospectus. Read the prospectus carefully before you invest or send money.

Jay Hosler
ND, in 'classic,' defeats Miami

By GREG GUFFEY

Sports Editor

It was the final battle in the long war between Notre Dame and Miami. The teams fought this battle on the field, and it was often a classic.

The Irish edged the Hurricanes 29-20 before the usual crowd of 39,075 in Notre Dame Stadium to mark the conclusion of college football's most heated rivalry.

The Irish improved to 5-1 and moved a step closer to winning the national championship on New Year's Day. The game, a great series. It's why you come to Notre Dame, why you come to Miami, to play this type of game.
