The Class of '98 will have a class council that is "more productive" than councils of the past, according to Katie Beirne, the 1994-95 Katie Beirne, a resident of "more productive" than councils of the past, according to Katie Beirne, the 1994-95 President Paul Beirne of Fisher Hall, Secretary Matt Griffin of Stanford Hall, and Treasurer Amy Crawford of Pasquerella West. According to Beirne, she wants this year's council to be "new and different" from other councils. Beirne said she understands that past class councils have not received much recognition from their classmates, and she wants to change that.

"I think we need to make the Freshman Class Council more effective," Beirne said. "We need to show the freshmen what our council can do for them.

The Freshman Class Council is expected to make inroads on this year's freshmen. Beirne said that the council will be more involved in freshmen's lives, and that they will be more approachable.

In addition, the Freshman Class Council will have a fresher "in the know" that may include the names and photographs of all 22 members of the Freshman Class Council. The fresher may be used to improve communication among the freshmen, according to Beirne. He said his purpose will be "to increase awareness and involvement of freshmen in social class activities and services.

Beirne said that she wants the Class of '98 "to have some notability with the service projects." "What better way to get involved," Beirne said, "than in the first year?"

The Freshman Class Council officers will encourage members of their class to continue with a service project for the next four years once they begin their freshman project in their freshman year.

In order to organize a service project that freshmen can be involved in for four years, the Freshman Class Council will be working together with the Center for Social Concerns. The council will allocate its money to projects being planned by the Freshman Class Council, including the sale of class apparel as a fund-raiser, a freshmen snack tray at the Alumni Senior Center, a class trip to an area at a freshmen's house during Junior Parents Weekend.

Beirne spoke of organizing a freshmen class mixer at the Student Center, where freshmen would buy tickets and dress in semi-formal attire, as with an SYR. But they could go with or without tickets. The freshmen can be involved in for four years, the Freshman Class Council will be working together with the Center for Social Concerns.

STOCKHOLM, Sweden
It's three down and one to go in the European Union's 1994 sweepstakes.

Sweden voted Sunday to join the union, following Britain's lead in June and Finland's last month. Norway votes Nov. 28. If voters in the Yes, Sen. David Brower, R-California, which for months had been my favorite zine's guest book. That's how I met an official netter, making a really good friend in the process.

Instead of a Writer, I tried to avoid making a fool out of myself, but I couldn't help but wonder if that was why computers were so important to everyone. The courses I took, like Introduction to Programming and Introduction to Computer Ethics, were the most difficult I had ever taken. I struggled to understand the concepts and struggled to debug my code. But as I sat there, coding and debugging, I couldn't help but feel a sense of nervous excitement.

I sent a reply. Back and forth we went the proverbial ball, until finally I became naive decision, and walked over to DeBartolo at the North Dining Hall? I mean, waiting for Bibby, a computer geek from the CCMB. I, who could never have an answer for me. And I must content myself to use Eudora as I know how, wondering which other positions on campus that I assumed required experience and qualifications, have been so randomly assigned to people. And more importantly, how many others like myself rot in food services? Perhaps the people who sit at the computers in the labs were capable of, so

The views expressed in the Inside Column are those of the author and not necessarily those of The Observer.

The love-hate relationship of computing

As a first year domer, the technology that I find at my fingertips is overwhelming more advanced than anything my pathetic Mississippi high school and upgrady Hewlett Packard could provide. I sit in awe as my roommate, a Chemical Engineering major, chucks 105 homework into a garbage can with Mathmatica. I, who could never understand a slide rule, can push a few hostile command buttons and make equations dance on the screen! Now that the lovely Macintosh Centris 610 is in use, I have finished the last definitive, I have time to exploit the computer to its fullest, and make every freshman's first love, trust me!

The CC at the time had no idea what I was talking about. Where does the University find these people? Why do they give them such easy classes? I could have slave in the North Dining Hall? I mean, waiting for the little, high tech girl and the high tech guy. This is what I was doing. I mean, waiting for Bibby, a computer geek from the CCMB. I, who could never

The North American Free Trade Agreement, by the way, encompassed 363 million people in Mexico, the United States and Canada and a combined gross domestic product of $6.3 trillion. Swedish financial traders were buoyed by Sunday's vote, pushing the Stockholm stock market up 2.74 percent over Friday's close. The Swedish krona was up 1.5 percent against the German mark.

Some 52 percent of voters favored union membership.

Dole challenged in aim for presidency

Energized by their party's midterm elections triumph, more and more Republicans are training their sights on ousting a vulnerable President Clinton. One high-flying political star is the Oregon senator, who has said his state's image was unfairly marred by the crimes of Oklahoma City bomber Timothy McVeigh and a dollar counterfeit case.

Guamian killed in shootout with police

A drifter who died in a forced, 25-minute gun battle that also claimed the life of a police officer had warned his family in the days before the rampage: "You're going to be surprised at what I'm going to do." Wearing fatigue and a bulletproof vest, 37-year-old Vic Lee Boullieu hijacked three cars and sprayed a quiet neighborhood with more than 400 rounds from four weapons Sunday night. Holding off scores of officers, he shot out restaurant windows, pierced a gas line and hit a seventh-floor window in a hotel blocks away. Boullieu was eventually shot to death by police. A police officer was killed, and a paramedic and a bystander were wounded. "One of the family members said he was possibly suicidal," police Inspector Tom Walsh said Monday.

Dole suspended his campaign for the first time, only to announce a few days later that he would allow him to return to the campaign trail. He said his family in the days before the rampage: "You're going to be surprised at what I'm going to do." New York

The cockpit emergency hatch fell off an American Eagle commuter plane Monday on takeoff from Newark Airport, but the aircraft landed safely and none of the 16 passengers aboard was hurt. The 53-year-old twin turboprop, with two engines, was forced to make an emergency landing just 200 feet after the plane took off for Albany, said Joe Foy, spokesman for the Port Authority of New York and New Jersey, which runs the airport.

The loss of the hatch caused the noise in the cabin and probably let more air in, had it not been shut by a gur- doger suction because the aircraft flies too low to be pressurized, Captain Francis Costello said.

The plane was a Shorts 360, manufactured by Shorts of Belfast. The model, with a capacity of about 36 passengers, has been flying since 1981.

Students given voice in Haggar renovation

By EMILY RUPPNER News Writer

Another step toward the renovation of Haggar College Center will be taken by Board of Governance (BOG) members this week.

A follow-up survey will be circulated among students to get more specific information about the rooms of the College Center.

The BOG members are concerned with how students are not considering Haggar more of a social space.

The survey will give students the chance to voice their ideas about the reservation process as well as any physical changes needed in the College Center's rooms.

Other BOG updates:

• BOG members voted to dedicate $50 toward the building of two sand volleyball courts near Angela Athletic Facility.

• The proposal of $30 to send 21 students to the N.A.S.C.C.U. conference December 1-3 was also passed.

• The Sophomore Class is promoting David Harris at Dalloway's this Wednesday night. They will offer coupons for their drinks at this SAB event. Offering a coupon for both SNC and ND sophomores, Laura Lefi, sophomore class president, hopes that the event will serve as a chance to get the class together in a casual atmosphere.

• The Junior Class Dance is scheduled for December 3 with a theme of "Dunes in Toyland." Jen Tafaznik, junior class president, has a pre-Sophomore weekend "class bonding time" planned on December 3 as well as a class retreat January 4.

If students have any questions, BOG will have its Open Forum on November 29 at 6:45 p.m. in Stapleton Lecture Hall. All are encouraged to attend.

The November 21 BOG meeting has been cancelled.

Acoustic guitarist slated for Dalloway's

By BECKY MAYERNIK News Writer

At last night's meeting, the Saint Mary's Student Activities Board (SAB) stated its funded events are going well financially.

"As a result of our revenue for the semester, we're right on target," stated SAB advisor Marlene Johnson.

This week's Guatemalan Sale will also help out largely, stated Johnson.

The sale is running through Friday in the LeMans lobby from 10 a.m. to 5 p.m. each day.

Appearing at Dalloway's this Wednesday, November 16, will be singer/songwriter David Harris. His performance, sponsored by SAB, will start at 5 p.m., and there is no charge to attend.

Saint Mary's will be among the fifty different schools at which the acoustic guitarist has performed this semester, according to Hunt.

The sophomore class is also sponsoring "Sophomore Sip" which are coupons redeemable for beverages that night at Dalloway's to coordinate with the SAB activity, stated Hunt.

The hypnotist scheduled for February may have to be postponed until later in the semester, due to a scheduling conflict, according to Johnson. The Blizzard of Bucks may have to be postponed as a consequence.

Finally, the Giving Tree sponsored by SAB through the Madison Center for Treatment Program should be up after Thanksgiving break, according to chairperson Kelly Kilmer. Students will have the opportunity to help those less fortunate.

Madison Center is also trying to get local businesses to help out with the event, said Kilmer.

**AIDS leading cause of death**

By DARIA AKIE TOM
Associated Press

SAN FRANCISCO

Richard has seen it countess times — the anger, the sorrow, the bravery of critically ill AIDS patients.

All too soon, he says, he'll know exactly how they feel.

"Not everybody is courageous in the face of AIDS. Some go kicking and screaming and are horrible to everyone around them," says the former heroin addict-turned-counselor. "I'm not sure how I'm going to handle that."" "I'm not sure how I'm going to handle that."  

Over the past few years, AIDS has been the leading cause of death among men aged 25-44, but 1992 marked the first time AIDS deaths crossed all age lines. Of the 8,143 total deaths in San Francisco in 1992, 1,195 men died of AIDS, while 1,094 died of heart-related disease. In 1991, of the total 8,345 deaths, heart-related disease killed 1,189 men and AIDS killed 1,152. "AIDS had been inching up as the leading cause of death. It didn't go from being No. 12 to 1 overnight," said Mitch Katz, director of the city's AIDS office.

"Between 1981 and 1984, there were 8,000 new infections each year. Those were entirely among gay men," he said. "And now we're seeing, 10 to 12 years later, the consequences — the high rate of death."

The bright news: The number of new AIDS cases reported in 1992, was 3,025, but that dropped 25 percent to 2,264 in 1993 — and the health department estimated the rate of new cases would decrease to 1,204 in 1997.

But the department also warned the disease could show a resurgence because of the growing number of cases among young people and intravenous drug users.

Fritz Desir doesn't know how he contracted HIV, but said it could have been the unprotected sex he had with a number of women. Here's what he does know: He can no longer play guitar and sleeping at his home, police said.

"I just can't imagine someone performing a criminal act like this and being able to go to sleep," Deputy Police Chief Paul Luoma said.

Steppert was scheduled to appear in court Tuesday after charges are filed, court records show.

Steppert told police he had recently discovered thousands of dollars missing from his home and blamed the caretakers of the group homes, Luoma said.

The gunman forced his way in to the Washington House on the city's East Side around 11 p.m., and shot employee James Wallace, 52, and resident Stefan Schooler, 24, Luoma said.

The gunman then went to the Homestead House on the city's West Side, where he shot Wallace's daughter, Cathy, 25, her granddaughter, Allison, 7, and Cathy's boyfriend, Thomas Dalbec, 51.

It was not immediately clear which house James was, 17, at. The Wallace and Dalbec were in critical condition Monday. Schooler suffered a grazed wound to the head and was in fair condition, Luoma said.

"We've lost so many friends," said Richard Chavez, former program coordinator for activi­ties at the Shanti Project, which provides a wide range of ser­vices for people with AIDS.

"It's frightening to think that nobody is surprised by it. Maybe some people who have been hiding in the sand might say, 'Oh, my god.'"

While the numbers for 1993 were still being compiled, AIDS was expected to remain the leading cause of death. The death rate isn't likely to de­crease until the late 1990s, Katz said.

The group homes involved in the shootings had 11 residents, with emotional disorders and other with physical handi­caps, said Peter DeSantis, ad­ministrator of North Central Health Care Facilities. The homes are privately owned and licensed by the state. Hundreds of volunteers, including Steppert, drive home residents to church, social events or programs and ser­vices at North Central's main campus, DeSantis said.

Steppert volunteered in 1989 after his wife died. He worked one afternoon each week, re­ceiving 26 cents per mile reim­bursement. "He was very de­pendable," DeSantis said.

Steppert's neighbors in subur­ban Weston said that for years he sold junk piled up in his yard. He was friendly but he mostly kept to himself, they said.

"He just had a little strange way of dressing and I was never fearful of him," Radke said.

Deputy Police Chief Paul Luoma said.

"We're hit with a little strange way of dressing and I was never fearful of him," Radke said.

Deputy Police Chief Paul Luoma said.

"He was a strange sort of fellow. But he always treated us nice when we talked to him," she said.

A couple of years ago, Jirovec said. "People were stealing from him and we is not worth it anymore," she said.

For some of his minor sales, he relied on the honor system, advising buyers to leave their money in a cup if he was gone.

**Gunman shoots six people in group homes**

By RICHARD COLE
Associated Press

WAUSAU, Wis.

A junk dealer who thought people were stealing from him shot six people at two group homes where he volunteered as a driver, killing a 7-year-old girl, police said Monday.

Four of the wounded, includ­ing the girl who died Monday, were related and a fifth person was a family friend.

Carl Steppert Jr., 46, de­scribed by a neighbor as a "strange sort of fellow," was ar­rested Tuesday after the Sunday night shootings, sleeping at his own home, police said.

"He just had a little strange way of dressing and I was never fearful of him," Radke said.

They are also being compiled, Katz said. "We've lost so many friends," said Richard Chavez, former program coordinator for activi­ties at the Shanti Project, which provides a wide range of ser­vices for people with AIDS.

Eurostar rolls underneath Channel with passengers

Less hassles and less money to travel between Paris and London

By DAVID CRARY
Associated Press

PARIS

Shaking off most of the glitches that plagued trial runs, all but one high-speed train rolled on schedule Monday on the first day of regular passenger service linking Paris, London and Brussels via the Channel Tunnel.

The Eurostar trains unloaded passengers delighted by the comfort and convenience of a trip slashed to scarcely three hours. One of the inaugural trains came in four minutes ahead of schedule.

"I'm afraid in the, so this is great," said Mara Roth, 34, of New York, who took the train from Paris to London. "The fewer times I have to go up and down the better.

The precision performances, after years of cost overruns and delays for the $16 billion project, had immediate benefits for passengers who would be reimbursed for their tickets.

First-class passengers pay equivalent of $308 for round-trip passage, while those in second class pay $248, or $150 with advance reservations. Children younger than 12 ride half price, and children younger than 4 ride free.

The prices are comparable to the airfare between Paris and London.

Round-trip ferry prices at this time of year range from $29 per car and up to five people for 24-hour stay, to $240 per car and up to nine people, valid for a year. The ferry takes about an hour longer to cross the channel.

The first train to depart, the Paris-London Eurostar, arrived on time at London's Waterloo Station after a three-hour, six-minute ride. The London-Brussels train ran on schedule in three hours, 15 minutes, and the London-Paris train arrived four minutes early.

But the second and last London-Brussels train of the day experienced a 50-minute delay in the tunnel, for unspecified technical reasons. Railway officials said passengers would be reimbursed for their tickets.

Cabin attendants in yellow and blue uniforms designed by Pierre Balmain staffed the trains. Meals were served to first-class passengers, with Monday morning's fare a Franco-British mix of croissants, bread, ham, cheese and orange marmalade.

The 794 passengers on the Paris-London train left the Gare du Nord for London's Waterloo Station. Ten minutes after departure, the $40 million, 18-car train hit its top speed of 187 mph.

It slowed to 100 mph for the 20 minutes it took to pass through the twin 31.4-mile tunnels, one in each direction, bored 132 feet under the English Channel's chalk seabed from near Calais to Folkestone, England. A third tunnel is for maintenance and emergencies.

First-class passengers pay the equivalent of $308 for round-trip passage, while those in second class pay $248, or $150 with advance reservations. Children younger than 12 ride half price, and children younger than 4 ride free.

The prices are comparable to the airfare between Paris and London.

Round-trip ferry prices at this time of year range from $29 per car and up to five people for 24-hour stay, to $240 per car and up to nine people, valid for a year. The ferry takes about an hour longer to cross the channel.

Commercial service on the Channel Tunnel is beginning with four round trips daily — two each on the London-Paris and Brussels-London routes. Hourly departures are expected in the second half of 1995.

"Le Shuttle," which ferries trucks through the tunnel, has been in service for several months and will eventually also ferry passenger cars.

Construction began on the Channel tunnel, as the tunnel is known, in 1987. It was originally scheduled to open in March 1993, but was repeatedly delayed. Three test runs for VIPs and journalists last month met with embarrassing technical problems and delays.

The Eurostar is a modified version of the French TGV high-speed train, built with a complex power system to adapt to French, British and Belgian electrical currents.

Eleven giant satellite-guided boring machines dug the undersea tunnels, which were completed in mid-1991.

The great race

Bon voyage, indeed! Two Associated Press reporters traveled from Paris to London Monday, Patrick McDowell on an Air France flight and Christopher Burns on the new Eurostar train, which zips through the Channel Tunnel. Who turned up first in Trafalgar Square?

The Eurostar trains unloaded passengers delighted by the comfort and convenience of a trip slashed to scarcely three hours. One of the inaugural trains came in four minutes ahead of schedule.

"I'm afraid in the, so this is great," said Mara Roth, 34, of New York, who took the train from Paris to London. "The fewer times I have to go up and down the better.

The precision performances, after years of cost overruns and delays for the $16 billion project, had immediate benefits for passengers who would be reimbursed for their tickets.

Watch for the upcoming Air Force pullout in Friday’s Observer
It's not as if I'm alone on some uncharted desert isle, with Gilligan, the Skipper too...

It's just that, as a child of CNN and cable TV, I'm used to having information from all around the world available at a moment's notice. Why wait for the news when we can pay the basic subscriber's fee and have it all in our living room (right down to the number of times various classes are doing now). For my means are, by necessity, those of a Ginger or a Mary Ann to keep me company.

The problem is compounded by the fact that I live in a part of the country where the newsletter of the Notre Dame Alumni Association is printed three times a year and contains announcements from various alumni clubs as well as the fund raisers, programs and other events the Alumni Association is sponsoring, as well as a column from my former professor, Father Bill Sneath, who also happens to be the Alumni Association's chaplain.

Again, great for keeping abreast of alumni info, but not what I'm looking for when I want to know what the current students are doing. Finally, there's The Observer, the rag that I once called home. This is much better for keeping up with campus news, but even this has a drawback for a Notre Dame graduate who lives 1,000 miles away—the mail. Yesterday, I read about the poor graduate student who dropped his classes. The reason? That is, and I wanted to write a column about it. However, my Observers get to me about a week to 10 days after they are published, so by the time I get them, the news already is old. Fortunately, there is hope for me. I recently purchased a new computer and subscribed to America Online, which allows me to speak to computers all over the country through the Internet. I can read newspapers, chat with other online subscribers and send instant messages on the information superhighway.

That is, once I get the Professor to show me how it works.

Paul Pearson '93 is a former Observer news writer. He can be reached through e-mail at paulp74115@aol.com.

**LETTERS TO THE EDITOR**

**WVFI claims University fails to fulfill promises**

Dear Editor:

We at WVFI-AM 640 are great believers in the potential of the Notre Dame community. We feel that all students should be supportive of the efforts of others.

Being a service to Notre Dame students, WVFI affords the opportunity to experience music of artistic integrity, multicultural leanings, and educational value. In return for our effort and work, we would specifically like to have more effort and work on the part of the Dining Hall, LaFortune and the students in general, to expand the listenerhip and arena of music that WVFI aims for.

When attempting expansion, our station has run into certain obstacles which at times seem insurmountable. We would like to see WVFI become more accessible and this requires steps. Promises have been made by both North Dining Hall and LaFortune, and promises have not been kept. This raises the interesting question of whether certain services of the University are supportive of student interests, or whether they choose to fear change and educational expansion.

**Gays in the military make sense**

Dear Editor:

Watching the news recently, I learned that the Navy is again under fire for sexual assault. In the current incident, a number of women stationed in San Diego are accusing their male instructors of attempting to demand sex in exchange for passing grades in their courses. One cannot help but recall the Tailhook incident in Las Vegas where over 80 women were sexually assaulted by their male counterparts in the Navy.

But do not think that the Navy is alone in being able to neither control the men nor protect the women serving our country. The Army is currently facing a situation at West Point where three female cadets have accused a group of male students of groping and otherwise improperly touching them.

Clearly, this all reinforces a long-standing maxim: Heterosexuality is not the only prize of heaven—of all the prizes of heaven, of all the prizes of heaven, of all the prizes...—Euripides
O

t fall break I visited my friend at the University of Colorado in Boulder. In fact, one of the few places you could actually find him was at the student union. He stared blankly at the ceiling, his hat and tattered clothing specially tailored to reveal your soul. The only color to be seen was a few scattered pieces of jewelry and a body piercing, and no one would have blamed you for thinking that he had invited me to visit his meditation class. I’ve never been to one up an interest in meditation, but I did. Here’s the story.

I entered the “classroom” and a waft of incense hit me. The place was quiet, and there was a brass image of a man holding a large ring. I sat down on the floor and started to meditate. I had to look up, but that’s another story.

The meditation class is a lot like a calculus class, except in calculus we have to do homework. In med class, we have to sit around and listen to the teacher. When I got back to Notre Dame, I eagerly anticipated taking the meditation class.

First of all, Notre Dame should establish a College of Roadie-slogy, so that aspiring concert roadies have a chance to pursue their dream career. Roadie-ology is a program in which students would nurture their passion for roadies and become professional roadies.

People who are interested in teaching elementary students in underserved communities should apply to the Catholic Conference of Bishops Department of Education, and the National Catholic Education Association. ACE operates according to the theory that Jesus is a central figure in education.

Last year when ACE first began, the program successfully placed forty Notre Dame graduates as teachers in both rural and urban communities. It presently places enthusiastic Notre Dame graduates in Oklahoma, Louisiana, Florida, and Alabama, although the popularity of this organization is beginning to spread into North and South Carolina, Georgia, Mississippi, and beyond. An average of five participants live together in a community, which is something that senior Kirsten Bence, found particularly appealing about ACE. “It’s nice to know that I would be so close to other people going through the same situation,” Bence said.

For this reason, Associate Director, Terry McGraw, wishes that people applying to the ACE program not look at the application process as extremely competitive. “We are looking for well-balanced, enthusiastic people of all academic disciplines and majors who have a strong interest in teaching,” he said. The application process is as follows:

• All candidates must have received, or be expecting, a bachelor’s degree by the summer following their last year of high school. 
• Although it may be helpful, no previous education coursework is required or expected.
• Those with strong aptitudes in mathematics, foreign language and those of varying cultural and ethnic backgrounds are especially encouraged to apply.

In addition to the application form, candidates are asked to submit typed responses to two essay topics. Relevant information for these essays might include family background, religious motivations and experience, volunteer work and organized service not apparent in other parts of the application.

• Applicants are required to include: three recommendations, official transcripts, a list of extracurricular activities and work experience, and an official copy of the candidates’ most recent physical.

• Candidates should submit an application form and accompanying materials by February 1, 1995.

During June 4-3, chosen participants will take part in an intensive summer teacher training program at Notre Dame, and on August 6 the participants will arrive at the select- ed dioceses. The participants are required to do at least 1700 hours of service in the classroom, and are given $9000 to live in their community. The participants will serve wherever there is a need and high demand for teachers.

Scully is elated with the success of this program during its first year. Last year, more than two-hundred people applied. Thaddeus, who received forty applicants. Forty applicants began and finished the program. All forty are currently teachers. The program continues to grow, and the supply and demand feels that the demonstrated interest is due to people’s understanding of the value of teaching.

“Teaching is both an art and a science. We believe that everyone can recognize this. They are well-chosen and well-prepared. They will be challenged, but these special people are a sign of hope and inspiration to everyone.”

O

Now last but not least I’ll say so they will believe that there will be no more Shouts of sorrow tears of sadness those are the voices of black people.

What’s Hot and What’s Not

When it comes to tanning, protection is key for skin

By JOANNE PANVIN Columnist

There is a month and a half away until Christmas vacation and whether your plans include a trip to the Rockies or a super voyage to sunny Florida, take note you require protection, skin protection that is.

Many people forget that their skin is an organ, the largest organ in the body, and it needs to be well treated, not treated, with care. A sun tan may be sexy and somewhat healthy, but excessive exposure to ultra violet(UV) light can cause irreversible damage and possibly cancer. It is over exposure to UV rays that can turn a gorgeous face into a grotesque ugly face.

There are two forms of ultra violet radiation: UV-A and UV-B. Ultraviolet violet A rays were to be risk free or “safe rays”, but these rays have more potential to turn the skin deeper than ultra violet B rays. Ultra violet B rays are more considered more harmful. UV-A rays may cause health problems including premature damage to the eye, an increased risk of skin cancer, and harm to the cornea and lens of the eye. Repeated exposure may even cause cataract. UV - B rays will cause similar damage or worse. Warning signs of possible damage are more apparent because the skin is more visible. UV - A ray damage goes deeper down to the skin where it is beneath the surface of the skin and the burn is not apparent.

The sun is strongest on the summer days however, burning UV rays can penetrate through haze and even fog. Whatever the forecast, you are going to be exposed to some UV rays even situally between the hours of 11 a.m. and 3 p.m., when the sun is most direct. The UV rays get more intense the closer you are to the equator, when unobstructed by the earth most directly. UV rays are strong at higher altitudes where the earth’s atmosphere is thinner. The closer you go, the less capable that planet’s atmosphere to absorb the sun’s rays.

Tanning beds may be popular and readily available to supply quick satisfaction. Tanning beds do not cause more harm to your skin than natural sunlight. The UV-A rays are 100 times stronger in tanning beds than in natural sunlight. Beds also radiate up to 5% of UV-B rays, which account for less than 1% of sunlight.

Tanning beds’ high intensity of both UV-A and UV-B radiation can alter the body’s immunological systems and can activate up to 40 diseases. Some medications mixed with UV light exposure can cause a photosensitization reaction, increasing skin sensitivity, causing severe sunburn or allergic reactions. Doctors may use UV light to treat some diseases, but only after investigating the risks of such treatment as radiation therapy against UV rays.

Contrary to popular belief, there is no such thing as tanning without injury to the skin. If you must tan, two very effective weapons are sunscreen and common sense. Dermatologists suggest that sunscreen should be worn all year round. Because your skin is exposed to UV light every time you go outside. It is also important to use a more powerful sunscreen when your skin is exposed to the sun more often.

When planning a vacation plan your tan as well. Melanin is the dark pigment of the skin. It is the body’s defense against the rays of ultraviolet light. These products are called tanning accelerators. Tanning accelerators supply the skin, face and body with tyrosine, a amino acid present in the skin, the precursor of melanin. The sun’s UV rays activate the tyrosine in the skin and convert it to melanin. It is known, for instance, that fair-skinned people are low in melanin producing capabilities because they do not have high tyrosine levels. 

Tanning accelerators should be used daily for one to two weeks prior to sun exposure. Some sun care products contain both tyrosine and dihydroxyacetone(DHA), a chemical derivative of glucose that acts on the surface of the skin and on the dead cells to lend a golden color. It is considered safe because the DHA does not penetrate the skin. This product is perfect to use a few hours before sun exposure since the color is perfect as protection against UV rays.

A big NO, NO to try tanning all at once, your body simply can not accelerate its produc- tion of melanin in time to pro- tect your skin. Sunburn is the result of this hasty and irre- sponsible behavior. Sunburn is the worst injury to the skin and it only lasts half an hour to burn unprotected skin. Acute sunburn is caused by the sun’s electromagnetic radiation which produces a photochemi- cal reaction affecting DNA cellular protein. This results in blood vessel injury, causing redness, swelling, and blister formation. If sun burn is gone the damage still remains. Eventually it will cause the break down of colla- gen and elastic fibers in the skin, leaving behind wrinkles and an aged rugged look.

Sunburn prevention can be achieved through the use of longer or 7.5 hours without burning. It is wise to choose a higher SPF the more fair skinned you are.

Since no one ingredient can offer full protection from UV-A and UV-B rays, the best sunscreens combine para- amino benzenic acid(PABA) its esters (glycerol, padimate A, padimate O), and Benzophenones (oxybenzone, methox benzene, and sul- fobenzone).

PAFA sunscreens with high percentages of PABA in an alcohol base proves to irritate the skin. Many people who are allergic to PABA may not be al- lergic to PABA esters, and those who have reactions to PABA sunscreens may be al- lergic to another ingredient such as a fragrance or alcohol. It is best to examine the con- tent of the sunscreen product before applying it to the skin and if you are unaware of skin allergies you possibly may have, test the product on a small skin patch.

Moderate sun exposure with proper precaution can be

If left untreated, skin cancer leas to skin cancer in organs, and may become life threatening.

People most vulnerable to the skin cancer are those whose jobs require them to work in the sun and those who have fair skin.

Some experts believe that the most common skin cancers, basal cell carcinoma and squamous cell carcinomas, are caused by reg- ular sun exposure. Sun- exposure causes damage to the skin and also affords the skin some protection from skin cancer.

Basal cell carcinoma is the least severe and the most common skin cancer. It starts as an open sore that has not healed after several weeks or as a smooth bump that may bleed. It may occur on the face and other sun exposed areas. This type of skin cancer is rarely fatal, but a sore or a bump on any part of the body should be removed by a dermatologist to ascertain that it is not cancerous at an early stage.

Squamous cell carcinoma is less common than basal cell. Squamous cell carcinoma is usually a mole that bleeds easily, and is not cancerous at an early stage. It appears on sun exposed skin.

Squamous cell carcinoma will spread to the lymph nodes and more vital organs such as the lungs and brain.

Melanoma is the deadliest form of skin cancer and is becoming more common. Early signs of melanoma include changes in pre-existing moles or the appearance of a blue or multico- lored patch on one never existed be- fore. These changes are commonly described by dermatol- ogists as the ABCD’s of melanoma: asymmetry, border, color. It is upon exposure.

  Foreman meets the press

  By JOHN NELSON

  Associated Press

  NEW YORK

  Twenty years past, he lost his heavyweight title to Muhammad Ali, George Foreman remembers how he said he's finally ready for THE REMATCH.

  "It's time for Muhammad Ali. I want him now. I didn't want him in the '70s, but I want him now," Foreman said.

  Foreman was being his silky self on CNN's "谤想" with dispensing advice for the aged and waxing eloquent on the virtues of tennis, according to a New York City newspaper at which he has absolutely announced, not even his current weight.

  Anyway, Foreman said, he did hear by 52-year-old former nemesis after he knocked out his brother in the 10th round for the IBA and WBA versions of the heavyweight championship on Nov. 5, in Las Vegas.

  Foreman said Ali sent him a poster which read:

  "Congratulations champ, you had the courage and guts to go out and do it."

  "He signed it with a big 'A' on the bottom," Foreman said. "When he says you've got guts, that's something.

  As for his future, Foreman talked about a battle with Mooker because he gave me a lot of opportunities.

  He spoke of a possible re-match for Mooker "because he gave me a lot of opportunities."

  He said a fight with fellow 43-year-old Larry Holmes should be made, but couldn't prove a problem for ringsters.

  "The smell of long-faced people would be overwhelming and people would be fighting to get into the ring," Foreman said. "There would be bones cracking and joints cracking.

  He would love to fight Mike Tyson when he gets out of prison in two years, probably next spring, "because he wouldn't run from me. That's the only way to have a guy attacking me. I might as well do the All shuf." "

  Miracle quarterback revives Bengals

  JOE KAY

  Associated Press

  CINCINNATI

  What can Jeff Blake possibly for an encore? 

  Throw for 350 yards? The Cincinnati Bengals quarterback had done it twice in a row now.

  Throw four touchdowns in a game? He did that Sunday in a 34-31 victory over the Houston Oilers.

  Lead the downtrodden Bengals to a win? He's done it now.

  Get an entire city giddy? He's done that, too.

  The NFL's most surprising quarterback is running out of heights to reach after just three starts. Perhaps the only one not overwhelmed by the show is Blake, who wants to think of it all as a beginning.

  "I'm not stopping now," Blake said.

  "This is the time that nobody doubts him. The 166th pick in the 1992 draft has now parted the league's best defenses and gotten everyone around him — except incumbent starter Klavon Klinger — caught up in the moment.

  There hasn't been this much excitement around here since the days when Boomer threw deep and leery shuffled in the Buffalo Bills.

  "He's the magic man," running back Denver Foster said. "I told him he's got a good arm and magical working.

  "He's been quite a surprise," said his third NFL start was only magic. Blake played the second half Sunday on a mangled left ankle that made him limp between plays and change his throwing style.

  "In the second half, I had to throw off my back foot," he said.

  The pain got so bad that he had to be held off the field after throwing a 35-yard touchdown pass to Carl Pickens. Blake threw him off the X-ray room as fans gave a standing ovation. No fracture was found, so Blake rode back to the reserve — call it Hollywood on the road.

  Naturally, he led the Bengals two big scores that won the game with any other play.

  In other weeks, we would have found eight different ways to lose," said Doug Pedrey, who kicked a game-winning 40-yard field goal for Indianapolis last "This week we found a way to win."

  Pedrey ended the afternoon rolling in the field with teammates. A nearby poster proclaimed Blake for president. Fanatics and jerseys in loud chorus as they drove away from Riverfront Stadium.

  And what of Blake? He was perhaps the only one not impressed by a performance that inspired it.

  "This was one of the worst games of the year," Blake said. "I mentally I made a lot of mistakes, but people don't seem to notice. I made a few mistakes and that's something you can't do. I got away with them because of my athletic ability."

  His luck was holding out Monday. The ankle injury turned out to be not as serious as the show initially thought. Doctors thought he might have broken the ankle or damaged ligaments when a pass runner knocked him to the ground.

  Trainer Paul Sparling said Blake "will be fine by Monday" and no severe change occurred.

  Blake is the best thing that has ever happened in Bengals history. He is the man they all expected — or least hoped for — when the team initially thought.

  Perhaps the only one not im­

  pressed by a performance that inspired it.

Irish swimmers win at Annapolis

By GARRETT KERN
Sports Writer

The Notre Dame men's and women's swim teams traveled to Annapolis this weekend to take on the Naval Academy for the first time in school history.

"It was a battle," Head Coach Tim Welsh stated, "of two schools which are known for their tradition, discipline, and spirit." In the end, though, the Notre Dame women triumphed to maintain their undefeated season while the men fell to a vastly improved Navy team.

Both Navy's and Notre Dame's women's teams entered the meet without a blemish on their respective records. Coach Welsh adjusted the line-up so that he could get his swimmers some experience in events they do not usually compete in.

Senior captain Jenni Dahl finds that this approach will help the team prepare for their upcoming meet with the Air Force Academy. "We have had a lot of big meets in the past weeks and it was nice to be able to relax and swim some different events before facing a tough Air Force team."

To Notre Dame's credit, they were able to amass nine wins out of the eleven individual events with nine different swimmers. "Our ability to win that many events with different people," says coach Welsh, "is a tribute to the depth on our team."

Unfortunately, the Irish men did not fare as well as the women. Navy was able to win both relay events and all but one individual event, that being the 200 butterfly which was won by junior Ry Beville. "I felt that I needed to redeem myself after a disappointing swim in the 200 free. Winning the fly was something I felt I needed to do." As a whole, the team was overpowered by the fierce determination that most teams have when they are at home versus any Notre Dame team.

"We raced very well and were right in the middle of the pack in just about every event," said senior captain Andy Kiley. This being the first meet for the Navy men, they were excited and they showed it. It was a meet which featured an NCAA qualifier in diving from Navy and a heavily recruited freshman class.

At the Virginia Slims Championships on Monday night, Navratilova teamed with Mandy Kollegred of the Netherlands in a doubles match against Jill Hetherington of Canada and Shaw Stafford.

"I just hope I can still pick up the racket and hit the ball over the net through all the emotion that I am sure I will be feeling," Navratilova said. "It will be an even more emotional Tuesday night at Madison Square Garden when Navratilova's vast singles crown with a tough, opening-round match against Gabriela Sabatini."

The $3.5 million tournament started with eighth-seeded Kimiko Date of Japan making her Grand Slam debut against Germany's Sabine Hack, who replaced Magdalena Maleeva in the $50,000 winner. Maleeva pulled out with a rib injury."
Women
continued from page 16

Before Drury played hero again, the Slammers had a chance to score as Marce McNeill pitched the ball to Sue Gallo as she rounded end in the open field.

With nothing, but the end zone in front of her, Gallo dropped the ball. On the following play Drury made the interception to end the game.

Off Campus running back Sarah Donnelly said that both offenses struggled while the defenses played outstanding. "We're pretty confident. We work well together. We have a lot of good talent," Donnelly added.

Drury said that with the offensive struggle, the defense won the game for Off Campus. "Our offense had a pretty tough time, but we pulled it off in the end."

Sing We Merrily Unto God
Sacred Songs of Praise by
William Byrd, William Lawes,
Henry Purcell, Johann Sebastian Bach,
Johannes Brahms & Olivier Messiaen

Wednesday, November 16, 1994
8:00 p.m.
Basilica of the Sacred Heart
The concert is free and open to the public.

The Notre Dame Science Quarterly
is interested in publishing student papers dealing with topics of current scientific interest. We are looking for well-documented research presentations that contain some visual aids. If you think you would like to contribute a piece, be advised that the deadline for submissions for this semester's issue is Friday, November 18. Papers should be in Microsoft Word format. A disk and a hard copy may be left in the NSQ mailbox in the Physics Department office (225 NSH) or at the NSQ office, 238 NSH.

A Notre Dame Science Quarterly staff is being formed. All students interested in working closely with our journal should leave their name and number with the current editor - William Lorité, 631-5757. Also, Juniors in the College of Science who wish to put their managerial skills and creativity to work as editors of the NSQ should submit a letter demonstrating their interest and qualifications for this position to either of the addresses above no later than Tuesday, November 22.

Please speak to or leave a message for William at the NSQ office if you have any questions about either matter.

The rabid Bats of Zahm 16, Flanner 7
It was almost over before it started. In a game that never really was, the Rabid Bats of Zahm got an early lead on the Flanner Gamecocks and rode it to a 16-7 victory.

Zahm's first points can be attributed to the Flanner long snapper. After Zahm shut down Flanner's offense on its first possession, the 'Cocks fell back into punt formation. But the snap soared over the head of the punter and out of the end zone, resulting in a safety. Not comfortable with a 2-0 lead, Zahm got the ball on the kick after the safety and drove the field with mixed offensive play calling. Swatland hauled in a big pass from Hammond which got Zahm to the Flanner three yard line. Two plays later running back Dan Glennon walked into the end zone to put the Rabid Bats up by nine, still in the first quarter. Flanner’s biggest moment came when sophomore defensive back Pat Collins intercepted a Hammond pass and returned it for a touchdown. The score sparked the Flanner band into an inspirational rendition of the fight song.

Collins' touchdown closed the gap to 9-7, but Zahm responded in the fourth quarter as Hammond hit his favorite target, Rick Rios, on a deep sideline pattern for a thirty-five yard score. "Benji was really accurate with his passing," Rios said. "Flanner was as tough as we expected, but we took it to them early."

The Observer/Jan Roland

Off-Campus defense
After having allowed only one touchdown all year, the Crime defense kept it up, holding the high-powered Stanford offense to a field goal in overtime.

Women’s Basketball

Women host Aussie Nationals

By K.C. GOYER
Sports Writer

The 1994-95 women’s basketball team has been studying hard. Tonight, the Irish will put their efforts to test as they start off the preseason against the Australian National Team.

As with most international teams, the Australians can pass and move very well, and like to shoot three pointers. Coach Muffet McGraw expects the opposition to run the floor, capitalize on transitions, and play a fast paced game.

The Irish will be ready how- ever, as the team has shown confidence as well as work on a fast paced game. "Our strengths are in rebounding and a good post game," Coach McGraw said, "and we have a lot of good intensity on defense.

With only one senior and three juniors, the women’s team is relatively young and will look to this game to build confidence as well as work on executing the offense. They also welcome the chance to play against someone other than themselves.

“We’re going to work on our man to man (defense) in this game,” McGraw said, “it will be a good test for us.”

Ski Team - There will be a mandatory meeting for everyone interested in trying out for the ND/SMC ski team on Tuesday, November 15 from 8-9 p.m. in the Dooley room of LaFortune. Optional dry land training begins today at 10:00 p.m. in Loftus.

Interhall team three point contest - The contest will be held on Monday, November 21 at 7:30 p.m. in the JACC. There will be men’s and women’s divisions with seven members per team. All team members must be from the same hall. Winning teams must be from the same hall. Winning teams are to choose one team member to face MCC pre-season player of the year Beth Morgan at halftime of the men’s IU vs. ND basketball game.

Rosters must be given to RecSports by Thursday, November 17. A captain’s meeting will be held on the 17th at 7:00 p.m. For more info. call 7-6100.

Men’s Soccer

Irish face Indiana in NCAAs

By THOMAS SCHLIDT
Sports Writer

While the coverage and fan- fare were not as large as that for the men’s basketball NCAAs pairings, there was a large con- tinuous in Coach’s eagerly awaiting news of the Notre Dame men’s soccer team’s fu- ture.

The future is Indiana.

The Irish will face the Hoosiers this Sunday at 2 p.m. in Bloomington, Indiana.

The news was not much of a surprise, yet many players were disappointed that they would not have a chance for re- venge on Wisconsin. "We’re ready to play." a fast paced game.

If you see news happening, call The Observer at 631-5723

Zahm, Off-Campus survive in mens’ bracket

By JACK MACLEOD
Sports Writer

Whoever said defense wins championships said it a week early. These were only the semi-finals, but the defense of the Off-Campus Crime hung tough in overtime to allow a dramatic 9-6 victory over the Stanford Studs.

The Off-Campus defense was ferocious against Stanford, laying hits on the famed Stud backfield that could have been heard up in the press box, if there was one.

But they were not just tough, they were also smart. When Stanford tried a fake field goal, a Crime defender was there to bat down the pass.

The Studs’ defense was also tough, forcing the Off-Campus offense to go three and out on at least three possessions. But despite the Crime’s offensive inconsistency, they made the plays they needed to make at crucial points in the game.

Toward the end of the first half, they got the ball on their own thirty yard line with less than two minutes left on the clock. Trailling by a field goal, quarterback Chris Hammond orchestrated a drive with successive passes that positioned the Crime in field goal range. Kicker Mike Marty came in and kicked an important thirty yard field goal which kept Off-Campus in the game.

Although neither team scored in the second half, the offenses played well. The fact that there was not one turnover all game speaks for the polished play of the offenses.

With the score tied at three at the end of regulation, the game went to overtime. Because interhall is played according to high school rules, each team was given four plays to score from the ten yard line.

Off Campus took over and on first down Off Campus quarterback Nikole Neidlinger completed a pass to Michelle Drury. After a running play, Neidlinger once again hit Drury for about four yards and the game winning touchdown.

Off-Campus, Lyons to battle for women’s title

By B.J. HOOD
Sports Writer

Lyons used a balanced offensive attack to convert their first two possessions into touchdowns, and the defense took it from there in Lyons’ 14-0 victory.

Lyons quarterback Julie Byrd carried the ball into the endzone for Lyons’ first touchdown, and passed to Jenny Layden for a touchdown on their second drive. Byrd ran in the conversion on both touchdowns.

Off Campus 6, Siegfried 0

The game was dominated by defense and went into overtime. Then it was dominated by Michelle Drury.

Once overtime begins, both teams get four plays to score from the ten yard line.

Off Campus took over and on first down Off Campus quarterback Nikole Neidlinger completed a pass to Drury. After a running play, Neidlinger once again hit Drury for about four yards and the game winning touchdown.

A meet with the Naval Academy in Annapolis had mixed results for Notre Dame’s athletes.
