University considers integrated card system

By AMY SCHMIDT
Assistant News Editor

Plans are underway for an integrated card system which will be available for use across campus as early as fall of 1996, according to Mike Ball, system coordinator for university food services.

Ball addressed the Campus Life Council (CLC) yesterday, explaining the implementation of an all-campus card system.

The new card could be used at both dining halls, vending machines, and the bookstore. Ideally, the card would grant access to parking lots on campus as well as replace current ID cards.

"The limits to this kind of technology are the limits of our own imagination," said Ball. Calling current card methods antiquated and difficult, Ball said that the integrated card system would be a flexible one, using an integrated corporate data base as its foundation.

Ball said that the integrated data base would make it easier for a student to locate a lost card because he or she could go to a number of places to get the card "turned off" quickly.

Ball also discussed the possibility of a debit card which would allow students to deposit money in an account, and then use the new card in place of cash for purchases across campus.

"The beauty of it is that you wouldn't have to carry cash," Ball said. "Notre Dame would become a cashless campus."

Ball did stress, however, that a meal equivalency system will be produced for cash operations such as the Huddle only after normal meal hours.

"The University is committed to the idea of the $2 meal plan for residential undergraduates," Ball said.

Ball is hopeful that the new card system will successfully address campus-wide needs.

"This is one of the last universities to move in this (technological) direction," he said. with 26% of the students of the security building will be turned off quickly.

A New Home

Dorm construction continues on the new gold quad with Kegough and O'Neill halls. The buildings will be completed and ready for students by the fall of 1996.

ND among top 50 best buys

University deemed a good value

By BILL CONNOLLY
News Writer

After being rejected by Money magazine as one of their top 100 buys, Notre Dame was ranked 40 and 45 in two different categories for affordability in education by U.S. News and World Report.

In its Sept. 25 issue, U.S. News ranks various national universities on the basis of "sticker" and "discount" prices. These rankings are collectively called the best value rankings and appear in a special section on financing for colleges.

This is the first year the best values are ranked from 1 to 50 national universities. Based on discounted tuition, for the second year in a row, California Institute of Technology, with an average discounted cost of $13,772, was ranked the best value among national universities.

Considering only sticker price, Brigham Young University at Provo offers the best value among national universities.

The best values are calculated in relation to both the stated or "sticker" price (tuition, room, board and fees) and to the discounted price (tuition, room, board, fees, books, and estimated personal expenses, minus the average of need-based grants). The discounted price is more relevant for most private schools such as Notre Dame.

Notre Dame ranked 40 in the discount price category. The average need-based grant at Notre Dame for the 1994-1995 academic year was $7,065, with 26% of the students receiving such grants.

The average non-need award at Notre Dame was $1,745, and 27% of the students received this award.

Notre Dame also ranked 45 in the "sticker" category, which compared the total cost of the university ($22,267) with the quality of the university according to U.S. News. "America's Best Colleges"

Notre Dame ranked 18 in that review of America's best colleges.

Notre Dame needs to improve in the amount of grants and awards it gives out in order to rise in these polls.

Universities with much higher tuition than Notre Dame, such as Yale University, finished higher in the discount poll because they supplied 45% of their students with need-based grants.

"We're not the most generous university," said Barrett. "But we're very active in government in high school, and we are both political science major," said Konishi.
SARAJEVO

Allied Bosnian and Croatian forces squatted a key strip of Sarajevo, Monday, a sign that major new fighting could be brewing even as diplomats from across former Yugoslavia try once more to smooth the way for peace talks.

The Croatian army in the north and Bosnian army and government forces to the south secured the caddie devour Sun- day in response to Serb troop and military equipment movement through western Bosnia. "We had convinced everyone that he was to Democrats what Ronald Reagan was to Republicans: the next great American presi dent." Clinton, however, was not that convincing.

Without the help of billionaire Texas Ross Perot, who, as delivered by Clinton to defeat George Bush and therefore threw not only his hat but his money as well into the race, Clinton would have never won. Perot stole vital votes from Bush and gave Clinton the lead he needed to capture the presidency. "This, my friends, in 1993, is history. However, although it is still amazing that the event actually happened, Clinton, who pondered away at Bush for breaking a campaign promise to raise taxes, con vinced Americans to vote for him even though his platform contained enormous tax increases. Despite this and many other apparent flaws, America did vote for Clinton, Good morning, America!"

Americans soon learned that they had been tricked, fooled, and deceived. Most Americans that is. First of all, 38% of us were never tricked in the first place. As most of us did not graduated from our fantastic dream and realized the nightmare at hand, they hopped onto the Republican band wagon. Many Clinton loyalists soon fol lowed and wanted exactly what their presiden t promised them - an earlier change.

November of 1994 reeled around and evict ed the Democrats from Congressional power in Washington. Republicans seized the helm, promising change and delivering it. Now most of America is ready for the next step. Many vote for a smaller, and less intrusive government, and the opportunity to pursue the American Dream and succeed without fear of being financially punished by the government. Few, who would be the ones to blame, are "rich." Americans are tired of the rich "bosses" and "bosses" of this country. He is talking about our parents, our friends, and even ourselves. We have not been taught that the very wealthy were very vague in the campaign concerning the definition of the word "rich." In the pledge, convinced Americans to vote for him even though his platform contained enormous tax increases. Despite this and many other apparent flaws, America did vote for Clinton, Good morning, America!"

For you see, when Bill Clinton was running for the President of the United States in 1992, he shared his "rich" definition of the word "rich.", the Athenaes, bubble topped Mercedes — a legacy of a 1981 assassination attempt, — was shipped by the Vatican to the United States on Sept. 9. Divulging the vehicle's exact location to the authorities would have several promise for the Pope's U.S. visit Oct. 4. 8. "We don't even know where it is," said Bill Ryan, spokesman for the U.S. Catholic Congress. "Shouting many details in secrecy, law enforcement officials have launched an unprecedented effort this summer to John Paul II, during his trip to New York, New Jersey and Maryland. During his last visit to the New York area, in 1975, the pontiff sometimes traveled in an open limousine and freely mixed with wor shipers. No more. The risk of terrorism on U.S. soil now dictates much tighter security. In New York City, a jury is deliberating the fate of Sheikh Omar Abdel-Rahman and nine other Muslims accused of plotting to bomb city landmark s. The defendants are among the leaders of the federal prison in maximum security for their office building. "I'm not sure what their status is," said artist Mary Fisher, who held the 1992 Republican convention spellbound with a speech about being a mother with the AIDS virus. "I consider my art controversial, nor do I consider myself a controversial person." Three senators had invited Fisher to speak at their 26-piece postcard campaign "Messages," in the origi nally defined "rich" as people making over $50,000 and then reduced that amount to $32,500, to $38,500 next year. A recent statistic released from this nationally ranked and respected university stated that recent graduates made on average in the low to mid $30,000 range their first year after gradua tion (some made thousands more). Congratulations, you're already "rich!" And, for the next time, the people of this country are not going to let the Independent presidential hopefuls have lined up to occupy the White House. In order to do so they must beat Clinton and his deceptiveness in November of 1996. These presidential hopefuls want people to suc ceed, to become "rich" and employ and inspire the working people of this great country to do the same, and yet, even to pay their taxes, albeit reduced. Being Americans for fourteen months the choice will be ours, and the choice is as easy as ABC. Anybody But Clinton. Either of them.

Programming contest highlights student talent

By JAKE MOONEY
News Writer

Some of Notre Dame's best and brightest computer programmers got a chance to show their stuff on Sunday, in a programming contest organized by the Notre Dame chapter of the Association of Computing Machinery and sponsored by the Department of Computer Science and Engineering.

The sixteen entrants in the competition were asked to write programs to solve problems dealing with everything from math to "brain-teasers."

In keeping with the event's "trick-or-treat" theme, correct solutions were rewarded with candy bars and other goodies.

The Computer Club holds two contests each year, with the fall contest used to select teams for the regional event.

The winners of the spring competition do not advance to any other event, but should be consolod by the cash prizes offered.

Sunday's contest was judged by Jeff Squyres and Brian McCandless, graduate students in the field of Computer Science and Engineering.

The club's faculty advisors are Dr. Sepeta, a mathematics professor, and Dr. Bass, a professor in Computer Science.

Jeanne White, Ryan White’s mother who would speak on AIDS. There is a list of speakers to be looked into, all of which are still in consideration.

SMT/CM has been scheduled to begin on April 18 with events such as Starstruck video making, booking a band and "dis-" events such as palm readers, tye-dyeing, and much more.

SAB has decided to have SMT/CM on the Thursday before Antostal at Saint Mary’s.

Mary Udivich, President of SAB, stated, “there was a lot of confusion last year, so we thought it would be really fun to have our own day and then students can have the opportunity to participate in two celebrations.” The entire board is excited to bring this event to Saint Mary’s and plans to work with Notre Dame on helping each other with publicity.

Other events which were discussed were booking a Notre Dame band which plays Latin music at Halloween. The band recently played at a dance at Notre Dame and SAB is interested in bringing them to campus with hopes of having some Notre Dame stidents over to hear them again.

The bulletin boards in the LeMans basement which had been previously discussed have now been given to the branches of student government.

Each branch has two boards and will be posting board members photos as well as publicity for upcoming events.

Food-stamping Friday is still in the making for this year. Back by popular demand, “As You Wish Imports” will be returning to Saint Mary’s on October 25.

Boler praises monastic lifestyle

By KARYA PAVLIK and PATTI CASKON
News Writers

Reverend Martin Boler, the Prior of Mount Savor Monastery in New York, stepped out of the monastery and into a Saint Mary’s classroom to talk yesterday about monastic life in the 20th century.

His lecture entitled “Benedict’s Rule in the Modern World” was sponsored by the college’s Humanistic Studies Department and was the first in the department’s lecture series.

One of Boler’s main intentions was to offset some negative stereotypes about monastic life. For example, many people don’t understand the monks’ restraint of speech, according to Boler.

“T he first action of God in the first book of Genesis in the Bible is to speak. And since God’s first action was to speak, our first reaction should be to listen. Listening is to give full attention to another person with no evaluation. It’s not silence,” Boler said.

Boler also discussed misconceptions about humility. In today’s vocabulary, humility means being a doormat or a wimp. This happens a lot of times with our language.

Time goes on and the meaning of words change in a society. Benedict’s seven steps of humility can seem dangerous today because many people in today’s society hate such a poor self-image, Boler said.

Boler also highlighted the fact that we tend to take things from God instead of receiving them in gratitude. For example, we “take” a nap. In Genesis, God invites us to respond to the gift of life.

He gives us the ability to respond—hence, “response ability.” Responsibility: it is a gift, not a burden, according to Boler.

He also said that God is referred to as Abba in Scripture not to give him a male identity, but to convey the idea that we have a relationship with God—our Father.

Boler talked briefly on the concept of celibacy, saying that it is the response of love out of having been touched by God.

After clearing up some common misconceptions about monastic life as viewed by today’s society, Boler said that to truly get a taste of what monastic life is like, one must actually visit a monastery.

Boler said that “a Monk out of his monastery is like a fish out of water,” insisting that a monk can only be known in the context of his monastery.

Boler said that a monk’s mind must be summed up simply.

“That in all things God may be glorified,” he said.

Leo Burnett didn’t major in advertising either.

The Leo Burnett Company is the largest agency in Chicago. And the man who created it graduated with a Bachelor of Arts. So don’t let the fact that you’ve a History major or even a Chemical Engineering major keep you away from our presentation about a career in Client Service. At Leo Burnett, we’re interested in people. Not majors.

Election continued from page 1

"We will ask the questions to find answers the freshman class wants to know, and plan events to bring about an involved, unified class."

Mary Liz Tully-Christina Bartle ticket: "We have a diverse background between us, and those things make us more open to the needs of our class," said Tully. "During our campaign, we are meeting with students and sending out surveys to get feedback from the class. We hope to use the students' ideas, along with our own ideas, to represent our class."

Katie Wehby-Tysus Jackson ticket: "We are a really unique pair. We're outgoing, and willing to work for our class," said Wehby. "We want our class to be unified, and will work and make improvements to make it the best four years of our life."

Elections will be held Wednesday in the LeMans entrance of the Dining Hall from 7 a.m. to 3 p.m. and 4:30 p.m. to 7 p.m. In the event that a ticket does not earn the majority vote, run-offs will take place Friday.

Rankings continued from page 1

priority is to provide a top rate education."

Unlike Money magazine's national poll earlier this month, U.S. News' poll placed Notre Dame against its peers. This is because the magazine only polled the best values for the better schools; namely, the top 50% of national universities according to U.S. News' poll of America's best colleges. University officials have the long-term goal of meeting 100% of all demonstrated need, according to Joe Russo, director of financial aid.

"The University recognizes, as its most significant need, that which relates to improving the school's resources in order to meet the full demonstrated need of its students," Russo said. Resources have doubled since 1990, according to Russo.

Guillen continued from page 1

which is currently under discussion in Congress, will greatly effect the federal grants and loans. The plan suggests a higher interest rate for subsidized Stafford Loans and less available funding for college students. Addressing the students of Notre Dame and Saint Mary's, "I encourage the students to contact their home state senators and congresspersons in order to make them aware of the importance of the federal funds," Guillen said.

Clinton finds success in foreign endeavors

By TERENCE HUNT

WASHINGTON

Constantly criticized on foreign policy, President Clinton is savoring a rare moment of success as American diplomats brokered Bosnian peace talks and the White House prepares for another Middle East signing ceremony. It's welcome news for an administration battered by the Republican revolution on Capitol Hill. But, sadly for Clinton, foreign-policy achievements usually play better in the history books than in the voting booth.

Ask George Bush, the political hero of Desert Storm. Or Jimmy Carter, the architect of the first major peace agreement in the Middle East.

"Clinton will find that his foreign-policy record and 60 cents will get him a cup of coffee and two votes," said University of Virginia political scientist Larry Sabato.

"Except in times of war, Americans don't care a lot about foreign policy," Sabato said. "The only time they vote on foreign policy is when there is a direct domestic interest."

Foreign policy has never been Clinton's strong suit.

For most of his presidency, his approval rating in that area has been under 40 percent. Yet, there were never great expectations on that score.

After all, Clinton was elected to fix health care and other domestic problems, replacing a president who, many Americans felt, spent too much time looking overseas.

"The biggest beef about Bill Clinton is that he hasn't achieved much," in domestic policy, said pollster Andrew Kohut of the Times-Mirror Center for the People and the Press.

Still, Kohut said, "for Clinton, success in foreign policy can potentially translate into a sense that he is achieving things and accomplishing things, which is not unimportant to his public image."

Clinton will be able to showcase his foreign policy skills Thursday when PLO chief Yasir Arafat and Israeli Prime Minister Yitzhak Rabin come to the White House to sign an agreement ending Israeli occupation of West Bank cities.

It will be a high-profile follow up to the historic handshake of Arafat and Rabin on the White House lawn in 1993.

Aggressive U.S. diplomacy, backed by NATO air strikes, helped bring about Bosnian peace negotiations in New York.

While nothing is predictable in the Balkans, the administration says the talks present the "most promising opportunity to date for peace."

Despite recent successes, Clinton's record remains under attack.

"U.S. foreign policy under this administration has been marked by a lack of assertiveness, a lack of credibility and a lack of resolve — in sum, a lack of leadership," Senate Majority Leader Bob Dodd, who is seeking the Republican presidential nomination, said last week.

Not surprisingly, Clinton has a different perspective.
Perot embraces third party

By JOHN KING
Associated Press

WASHINGTON

In a turnabout that could re-
shape the 1996 elections, Ross
Perot has decided to embrace ef-
forts by supporters in Cali-
forinia to form a new political
party, leaders of his organiza-
tion said Monday.

If successful, the effort is
expected to quickly spread to
other states.

Leaders of Perot's United We
Stand America organization
said they did not view the effort
as a sign that Perot hoped to run
as the new party's candi-
date in 1996.

Indeed, some took it as a sign
he would not run, noting that it
was far easier and less expen-
se to qualify as an indepen-
dent candidate, as Perot did in

"If he wanted to run for pres-
ident, there is a lot easier route
available," said Platt
Thompson, the United We
Stand executive director in
California.

"This is not a vehicle for a
Perot campaign," said Joan
Vinson, the Maryland executive
director. Still, both said they
would support Perot if he did
decide to run.

If the effort is successful na-
tionally, Vinson said, this new
party, United We Stand, could
be able to do "a lot more than
the Perot campaign," said Joan
Vinson, the Maryland executive
director.

During the spring, Perot sent
each United We Stand chapter
a detailed questionnaire on
state ballot laws, and most chapters had
informed it by June 24.

"I do believe that we will be
able to do this," said Richard Winger, edi-
tor of the newsletter Ballot Access News.

Many of these very indepen-
dent-minded people who are in
United We Stand may not want
to," said Vinson.

Perot and Russ Verney,
United We Stand's national ex-
ecutive director, said this
"is what the grass-
roots leaders in California
wanted, as part of the
GOP drive to cut spend-
ing by $650 billion and to bal-
ce the budget by the year
2002, politicians no longer shy
away from mentioning means
testing for Social Security bene-
fits.

"The issue is out there. It has
been the unmentionable. It is
being mentioned," he said.

Perot said he would support
means testing — lowering ben-
efits for wealthier seniors — if
it were included in the com-
promise to balance the budget.

Lugar commented before the
Statehouse chapter of the Con-
cord Coalition, a group that ad-
voce eliminating deficit
spending.

Lugar answered four stock
questions that will be put to all
major presidential candidates,
who have been asked to ad-
dress the coalition established
by former U.S. Sens. Paul
Townes of Massachusetts
and Warren Rudman of New
Hampshire.

A coalition spokesman said
no other candidate has set a
date to speak to the group.

Lugar said he would increase
defense spending slightly and
keep current levels of expendi-
tures in scholarships, school
lunches and the Women,
Infants and Children programs.

Defense cuts, he said, are a
dilemma "because they mean
jobs.

Lugar's largest cuts in the
seven-year zero-deficit pro-
gram include $270 billion in
Medicare, $170 billion in Medi-
caid, $48 billion in farm aid
and $32 billion in food stamps.

He said he opposes new
taxes, adding that he would
not allow all federal income taxes
with a 17-percent national sales
tax.

Is Notre Dame merely a football fun factory?

Enough of my hedging. Let me introduce you properly. I am a graduate student at Notre Dame, and I can only afford to give thanks to a scholarship whose funding is provided by people there come from millions of acres of the U.S. Besides the Syracuse football game, there are lots of parties at Bard, and not

Matt Apple

“Dorm family.” I’m originally from New York — not, Buffalo. Most people apparently don’t realize that there is something between Buffalo and New York City besides the Syracuse football game. There are millions of acres of rural land dotted with small towns, not unlike many parts of the Midwest.

I got my B.S. from a small liberal arts college called Bard in Upstate New York. It’s not surprising that not many of you have heard of it. Most of the one thousand students there come from New York City, Connecticut, and Jersey, no, as you might imagine, it’s much different than Notre Dame. This is one reason why it’s been a little difficult for me to adjust to the “Dormers” way of life. Let me explain.

Bard does not have a football team. Whereas Notre Dame seems to be known only for football, Bard is known for being radical and intellectual. There are sports teams there, but Bard does not offer sports scholarships, and supposedly sports are not very important or popular (or played well, for that matter). How is it possible for college students to live through an academic year without a football game that there is quite simple: Parties. There are lots and lots and lots of them. This, Bard, and not many of them are related to what at Notre Dame is evidently called “the dorms.”

While Bard freshmen are housed collectively, everyone else enters a “room.” Based on seniority. Despite this, dorms often acquire peculiar characteristics from the various personalities who live there, thus retaining some semblance of a familial unit. However, interpersonal relationships are chosen, not enforced.

This difference between dorm settings strikes me as crucial. At Bard the student quickly learns how to meet people he or she has never encountered before, whether of different race, religion, ethnicity, or sexual preference. Unlike Notre Dame, which seems to demand that its students obey it as a surrogate parent, Bard insists that its students learn how to deal with problems themselves with minimal outside guidance.

This is not to say that Bard doesn’t care about its students. But there is a difference between a family-oriented dorm more than as a safe haven from life at Notre Dame. Students here seem to have never experienced life outside this oppressive Catholic atmosphere, and I find that really sad, actually. College should be a time of experimentation and discovery, not indoctrination and intellectual cowardice. Heightened social awareness, consciousness-raising, if you will.

Yes, I’m a self-professed egotistical anarchist. Who likes beer. B-E-E-B. It’s good for the body, good for the soul. G-O-O-D.

That said, I can now turn to the topic at hand (“I told you that to tell you this...”), namely interhall football. Now, I like sports: there’s nothing wrong with sports, per se, provided the goal is to have fun, pleasure, personal achievement, or entertainment. Me, I like to win, but if I don’t it’s no big deal. It’s just a game. They’re all just games.

Combining sports, namely football, isn’t just “big brother attitude the American Way, you might say, is based on rivalry and competition, pitting families and alliances, false enemies and rivals against one another in the modern, free market capitalist state. Maybe it’s wrong. Maybe there are already too many robots and zombies out there, and maybe there are already too many university factories churning out more. Maybe Notre Dame doesn’t have to be a factory.

And maybe it’s just okay to want to play football for the hell of it and damn the consequences. Or does everyone think football is the most important thing in this life? NEXT WEEK: Loons, Beer, and You.

Matthew Apple is a creative writing grad student at Notre Dame currently researching his next column. Contact him at matthea.t.apple.1@nd.edu for snide and witty banter.

Quote of the Day

“Going to Church doesn’t make you a Christian anymore than going to the garage makes you a car.”

—Dr. Laurence J. Peter
Police signal threat for many African-Americans

As I stood outside the restaurant, waiting for my friend who was to meet me for dinner, a police car drove by. The lights flashed, the siren sounded, and I resisted the urge to run. I became all the more distressed. Growing up, my favorite shows were always police dramas, like "The Rockford Files," "Hill Street Blues," and "The Mod Squad." Balmy, summer afternoons would turn to cold, rainy nights with cops, rounding up bad guys until dusk.

Indeed, one of my first books was about a young cop named Dan. What a treasure that book was! Somehow, the anxiety of speeding police car triggered my long-lost memory of him with his happy smile and sparkling gold buttons on a blue uniform. As I stood there, I realized that my friend, Dan's smile made me remember the way things used to be.

When I see police, I try to feel at peace, but I yearn for smiling Dan the police officer. When police appear, I immediately begin to check myself to see if I am making any reason my suspect of me and the police. I yearn for a world of positive interaction between police and the public.

Over the years, the public's perception of police has changed. When I was a child, we often saw police as guardian angels, our heroes. We waved and smiled at them as they drove by. But as I grew older, police became more of a nuisance, and I began to have negative feelings toward them. For example, I was once stopped and briefly interrogated by police after I forgot to lock my dorm room.

Even news media seem more apt to focus on the negative aspects of police work, such as the shooting of an African-American man or the beating of an Asian American. These events have been the subject of much debate and discussion, especially in the African-American community.

Suggested solutions involved increasing the number of patrol cops, recruiting more African-Americans to the police force, changing training methods, and encouraging positive interactions between police and the public. I hope that these solutions can help to improve the relationship between police and the public.

Melvin Tardy, Jr., ND '86, works in the Office of Admissions. He can be reached over e-mail at: melvin.tardy@nd.edu

Flying the friendly skies over campus

Campus pop quiz: How many planes fly over Saint Mary's? A thousand or 1,200. To encounter one plane every six seconds or around 720 times per hour. How many 747's fly over our campus in one hour? Around 120. How many 747's fly over our campus in a day? Around 4,800. How many 747's fly over our campus in a year? Around 1,700.

I remember days when the sun shone and we could clearly see the dome of Admissions. It is now almost impossible to see the dome without the help of a telescope or a binocular. The number of planes flying over our campus has increased dramatically in recent years, and it has become a source of frustration and concern for many students.

Why do so many planes fly over Saint Mary's? A few reasons include:

1. Air traffic at O'Hare and Midway airports
2. Military training flights
3. Commercial flights
4. Student flights

According to Jefferies, 75 percent of all planes that fly over Saint Mary's do so for training purposes. These flights are part of the Air National Guard's training program, and they are conducted at high altitudes and speeds to simulate real-world conditions.

As planes fly over our campus, they can be seen as a symbol of progress and advancement. However, they can also be seen as a source of noise and disturbance. The noise created by planes can be disruptive to students and staff, and it can also be a safety concern for those who are flying.

According to Jefferies, the number of planes flying over Saint Mary's has increased significantly in recent years. In the past, there were only a few flights per day, but today, there are hundreds of flights per day. This increase in flight activity has caused a number of problems for students and staff, including noise pollution, safety concerns, and the potential for accidents.

Ideally, planes are expected to make a beeline over the campus, without the need for any flight paths or directions. However, this is not always possible due to the complexity of air traffic management and the need to accommodate multiple flights at once.

Kara Pavlik is a senior at Saint Mary's. She can be reached via e-mail at karapavlik@jade.saintmarys.edu

Viewpoint

 Different Perspectives

Kara Pavlik

Saint Mary's is in the middle of the action when it comes to aircraft noise. The noise from airplanes can be disruptive, but the university has taken steps to mitigate the impact.

The two main sources of aircraft noise on campus are the main flight path and the main runway. The main flight path runs directly over the center of campus, and the main runway runs parallel to the flight path.

The university has taken a number of steps to reduce aircraft noise on campus. These include:

1. Working with the Federal Aviation Administration to reduce noise levels from flights over campus
2. Encouraging students and staff to use noise-reduction techniques
3. Providing information about aircraft noise management

Despite these efforts, aircraft noise remains a significant problem on campus. The university is working to address this issue, and it hopes to find solutions that will reduce the impact of aircraft noise on the campus community.

The wine is chilled, the table set, the candles lit. Soft light emanates from the house plant in the corner. The room is ready for a romantic dinner for two...

*Sigh*...soft lighting from a plant? It sounds completely crazy, but to a plant biologist, the idea isn't that far-fetched. In fact, a house plant that glows is quite feasible. Biotechnologists recently succeeded in introducing the gene for firefly luciferase into the tobacco plant. The botanical glow can only be seen with a machine that amplifies light. But imaginative scientists see the day in the not-too-distant future, when artificial plants that glow might actually light your way into the garage.

The genetic make-up and biochemical processes of bacteria, yeast, and plants can be altered and coerced into yielding new products for humans. Drugs and antibiotics produced through biotechnology are already on the market. The new science has made possible the production of the world's first genetically modified food—tomatoes!

...and the new science failed to get off the ground. The amount of antifreeze in the fishes' cells, allowing it to swim in very cold waters without its tissues freezing. Scientists have managed to get the firefly germ to express itself (that is, produce the antifreeze) in plant cells in a petri dish. The cells from at 1.8 degrees Celsius lower than the cells that did not receive the gene. The scientists are now working to achieve the same effect in a whole plant, and predict that they'll reach their goal of a frost-resistant plant within ten years.

Once they succeed, antifreeze genes will go into other crop species, especially those that are planted early in the season when frost threatens, such as broccoli and brussels sprouts. Giving crops frost tolerance would extend the growing season on either end. Farmers could plant earlier, and perhaps even grow two crops instead of one.

Chew On This...

Willow, the source of the active ingredient in aspirin, is probably the best-known example of a plant that yields a useful drug. Yet there are others, interesting examples of the uses Native Americans and Canadians have been chewing the root of this woodland flower for centuries. They chewed it with the teeth. The dentists from at 1.8 degrees Celsius lower than the cells that did not receive the gene. The scientists are now working to achieve the same effect in a whole plant, and predict that they'll reach their goal of a frost-resistant plant within ten years.

Castillo loses no-hitter in the ninth, Cubs win 7-0

By RICK GANO

The Chicago Cubs lost no-hitter in the ninth inning by Bernard Castillo, but they won, 7-0, in the next inning by Sammy Sosa.

The 26-year-old right-hander pitched his best game in 28 starts. He had two shutouts before the last one, and Castillo retired the next 16 hitters before walking Tripner with one out in the seventh.

The hardest ball the hit by Castillo before Gilkey was a liner by Lankford that short-hopped Jose Hernandez in the third. But Castillo ended the fourth for the Cardinals had come to a hit and was right. When, D. Marbury hit his right knee to third base. But Castillo hit back to fifth, and Castillo retired the next 16 batters before walking Tripner with one out in the seventh.

Castillo was in his fifth season with the Chicago team. As a minor league in 1990, he did not pitch for the Cubs.

Other pitchers losing no-hitters in the last inning this year were Eric Martinez of Montreal, Dan Conlin, with whom he is on loan from St. Louis and Paul Wagner of Pittsburgh.

Sosa, in his 19th year with the latest 101 game of the season, hit a single off Kevin-117, "But it was clearly no chance to make a play."

In 20-30 starts, Castillo retired the next 16 batters before walking Tripner with one out in the seventh.

The hardest ball the hit by Castillo before Gilkey was a liner by Lankford that short-hopped Jose Hernandez in the third. But Castillo ended the fourth for the Cardinals had come to a hit and was right. When, D. Marbury hit his right knee to third base. Details: Leave Stepan Center @ 7am, Depart for ND 45 min. after the game

No Tickets! No Problem! The ND Alumni Association Will have 3 Big Screen TV's In the Parking Lot!
Stanford defense tops Grace

By JAKE COOPER
Sports Writer

Stanford vs. Grace: this week's marquee game in the Blue Division. For Grace, this contest was an opportunity to prove that its opening win over Off Campus wasn't a fluke. For Stanford, it would be their first chance to stake a claim to the Interhall championship.

Despite the billing of this matchup, it proved to be a game filled with missed opportunities. In the end, however, the Stanford talent was too much for Grace, as they captured a 6-0 victory.

"Defensively, we played very well," said Stanford captain Chris Pollina. "We forced four sacks and three turnovers and only gave up 29 total yards. Offensively, however, we had very poor execution. The fact that we didn't play last week was very apparent." Pollina got Stanford off to a running start, with 19 yards on his first two carries. Then the rust began to show. Three false start penalties over the course of the next five snaps pushed Stanford back near their original line of scrimmage.

A quick pass from quarterback Mike Brown to Doug Pollina for 22 yards, however, brought Stanford back into scoring range. Five plays later, Kris Kazianuk kicked a 44-yard field goal to give Stanford a 3-0 lead.

The Grace offense was dominated from the very beginning. Stanford, led by freshman Mark Rule's three sacks, held Grace to a total of just 20 yards in the first half. Stanford moved the ball with ease against the Grace defense, gaining 93 yards on their first three possessions. Unfortunately for the Scots, their offense could not capitalize on their ball movement until the very end of the first half, adding only three points during their next three drives.

"It's going to take some time to get the offense going," Pollina said. "We can definitely improve our play there. The penalties are always a killer."

Dillon 13 Off-Campus 0

What has happened to Off-Campus? The defending men's champion, coming off a first week loss to Grace, was soundly beaten by Stanford.

"We concentrated on defense all week," said Dillon captain Pete Meyer. "Last week we blew it during the last few minutes, but I think our improvement definitely showed this week." Dillon began the game with a picture perfect scoring drive, consuming the entire first quarter. A key late hit by penalty on O-C moved Dillon to the 14 yard line, where QB Andy Stro hit Greg Kuzma for a touchdown. In the second half, Dillon struck a fatal blow to O-C. The Crime squad had managed to drive down to Dillon's 20 yard line, but for the second time, Jake Bump's pass was intercepted. This time Sean Weigen took the pick and returned it down the sidelines 82 yards for a touchdown. The PAT failed, making it a 13-0 game.

Morrissey 15 Keenan 7

For the first time in the Blue division's 1995 season, a game was dominated by two offenses. Morrissey, led by junior captain Mark Tate's 16 total yards, proved to be the stronger team, defeating Keenan 15-7.

"I think we played great," stated Tate. "I was very impressed with our offense. All credit goes to our offensive line. Our quarterback John Polk really stepped up for us." Polk was seven of eight on the day for 135 yards and two touchdowns.

Morrissey's offense came into form on their second drive. After driving 24 yards in five plays, Polk connected with Tate for a 43 yard touchdown reception. Keenan came into the second half with their offense sputtering on all cylinders. Quarterback Chad Chevalier completed a 39 yard pass to wideout Matt Rechner, who had five receptions for 115 yards. Tim Ferrick then finished off the drive, pounding the ball in from the one yard line.

Morrissey opened their second half with another impressive drive. After a sack pushed Morrissey back to midfield, Polk once again threw a long touchdown, this time hitting a wide-open Brian Meehan for the 50 yard score. On the ensuing point after attempt, a bad snap forced the holder, Polk, to roll out and lose a 3 yard pass to running back Dave Madden, making the score 15-7.

Men's IH continued from page 16

yard drive which ended with four minutes left in the contest, and on the last play of the game Zahm's second stringers connected on a 54-yard touchdown drive to run the final to 34-0.

Alumni 19 Fisher 0

Alumni posted its second shutout in as many weeks as they beat Fisher 19-0. Alumni captain, Avery Johnson commented, "Our defense did a great job today and our offense came together when it needed to."

The Dawgs' offense came together with A.J. McGunigal at the helm. On third and 25, McGunigal hit tailback Matt Mammoleoni on a screen to the left side. Mammoleoni did the rest of the work as he made a fantastic 47 yard run after the catch. The PAT failed, making the score 6-0 at the half.

The offense connected in the second half when McGunigal found wideout Mark Turner for a 40 yard score to put Alumni up 13 with the clock ticking away on Fisher.

The final score of 19-0 was caused by Alumni defensive back Brian Perry scooping up a fumble returning it for a score.

Sorin 0 St. Ed's 0

Sorin ended its nine game losing streak, as the Screamin Otters broke into the third column of their record. The Sorin offense, led by quarterback Chris Bryant and the backfield combination of Tim Flattery and Seth Roy, began to mount drives, but whatever scoring chances they had were nullified by key turnovers.

Sorin's captain Pete Slean...
after three downs had reached Walsh's 18. But the defense dominated again, as Sara Merrill caught Walsh's second interception of the game at the 12-yard line to ensure a Walsh win, 6-0.

"I think the defense played an exceptional game," Yudt commented. "We have to fix some little things, but after a couple of practices, we're going to be unstoppable."

Badin 12 Cavanaugh 6
Badin and Cavanaugh experienced some gridlock in the beginning of the game, with Cavanaugh showing good coverage and run plays and Badin displaying nice passing.

On Cavanaugh's second possession, Badin got an interception at the Cavanaugh 35. With five minutes remaining, Badin passed into the end zone to senior Tina Fuoco to make it 6-0.

Cavanaugh came back in the second half with an interception by team captain Katie McCoid, who returned it 70 yards for a touchdown. Badin answered with a touchdown by Jill Sataneek on their next possession.

Cavanaugh rallied to bring the ball to the five-yard line, but the ensuing touchdown was ruled no good by the official as a result of an illegal offensive procedure call. Time did not give Cavanaugh another chance, and Badin held on to their lead to win it 12-6.

"Competition remains high as teams work through the regular season in hopes of making the playoffs, and for two of them, the championship."

Senior Julie Byrd lines up over center in Lyons' battle with Pangborn. Byrd was intercepted by Pangborn's Melissa Bailey in a crucial fourth-quarter drive.

JAZZMAN'S GRILL & BAR
525 N. Hill Street • 233-8505

URAEUS presents:
A FUNKY REGGAE LINCOLN TUESDAY
PRIVATE COLLEGE NIGHT PARTY

• Open only to ND, SMC, & HC Students, Staff, & guests
• Upper grill level 18 & over • lower bar level 21 & over
• Student ID & driver's license required for lower level.
• $5 admission before 11pm/$6 after 11pm
• No admittance to anyone under 21 after 11:30 pm
• Both dance floors open 'til close
• Bring your pennies for treats because on Tuesdays and Wednesdays we don't accept your paper money at the well!
• E=MC² if you figure out the admission - those that do have concluded that the well is better than the pitcher!

Featuring:
Mouth watering food•party with the band and DJ music
For information on giving your own private college party at Jazzman's call 233-8505 Mon-Sat 4pm - 1am

No admittance without Student/Staff ID!
Rutgers and Seton Hall both shut-out victims

By JOE VILLinski
Assistant Sports Editor

A disturbing trend seems to be developing in Notre Dame women's soccer games this year.

Never in the school's history has this occurrence lasted so long. It appears that the large rectangular object Irish goalkeeper Jen Renola watches over each game has not been used at all.

Afer last weekend, Rutgers and Seton Hall joined the list of opponents who could not bypass the number zero on the scoreboard as the No. 2 ranked and undefeated Irish added to their record of consecutive shutouts with eight.

On Sunday, Notre Dame defeated Seton Hall 3-0, while disposing of Rutgers 3-0 on Friday night in a game that featured a downpour, which slowed the Irish style of play.

"We kept our composure in a difficult situation," head coach Chris Petrucelli said. "I think our maturity showed through in that game."

The conditions claimed one injury as senior defender Ashley Scharff suffered a sprained ankle and will be out for two to three weeks, according to Petrucelli.

Scharff said. "I think our maturity showed through in that game."

Despite Notre Dame's fatigue, Creative Pirates considered the prevent defense.

"We tried to spread out their defense with Holly and Stack (Masters) on the outside, which opens up space in the middle," forward Michelle McCarthy noted.

McCarthy proceeded to score two goals in the second half on assists from Rosella Guerrero and Monica Gerardo. Gerardo also registered an unassisted goal.

"We started off slow, but played better in the second half," Guerrero said.

"It was good to see us come out with the intensity we did in the second half even though the game was already won," McCarthy added. Petrucelli summed up the situation. "They didn't create much," Guerrero said. "They tried to capitalize on our mistakes."

Next Deadline: Nov. 1
Pangborn unseats Lyons, 7-6
By KRISTIN TRABUCCO
Sports Writer

Pangborn-Lyons pitted the two top-ranked teams against each other in a first-place showdown. Pangborn worked the ball steadily on their first possession. A third down play by Trish Sorenson made it first down and short. After Lyons held them for three downs, Sorenson scored the touchdown and quarterback MT Kraft capped the pass to the tailback for the extra point. The defenses held for the rest of the half.

In the second half, Pangborn showed nice run-pitch-run ball movement, but were kept from scoring. After consistent run and pass plays, Kelley Callahan caught a touchdown pass to put Lyons on the scoreboard. The extra point was no good, keeping Pangborn in the lead, 7-6. But on the ensuing drive, Pangborn's second play was intercepted, giving Lyons a chance to score and take the lead.

With 1:19 left in the game, Lyons was held to a fourth down at their own 22-yard line. A time-out was called, and the Lyons coaches called for "confidence" from their offense. Confidence was needed when the game resumed, Pangborn's Melissa Bailey intercepted the pass and unseats Lyons' hope for a score.

Even though their win solidified their number one position, Pangborn has not become overconfident. Bailey said, "Just because we beat Lyons, that doesn't mean the rest of the games will be easy."

Walsh 6 Breen-Phillips 0
Both Walsh and BP were scoreless in the first half. Each team's defense showed good coverage on both run and pass plays.

In the second half, the defenses went at each other. Walsh forced BP to punt on their first two possessions, and BP in turn stopped Walsh on a fourth down quarterback draw.

On Walsh's second possession, a fourth down incomplete pass made it BP's ball. However, on BP's first play, Walsh's Kristin Yoder intercepted the pass and ran it back for a touchdown. BP took the point at their own 30-yard line, and

Top-rated
Zahm whips Carroll
By JOE CAVATO
Sports Writer

Going into Sunday's Interhall action, the premier matchup seemed to be No.3 Zahm squaring off against then No. 3 Carroll. This was to be a matchup of Carroll's potent offense, lead by quarterback Tim Nelson and a solid backfield consisting of tailback Jeff Kloska and fullback Joe Schenner, against the "Red Swarm" defense of Zahm, anchored by last week's Player of the Week Lake Schaller. But it was the Zahm offense which dominated the action on the way to a 34-0 romping.

Zahm wasted no time as they opened with a high-speed scoring drive. The key play was when Zahm quarterback Chris Orr hooked up with fullback Matt Bundick for a 26-yard pickup. Zahm continued to march down the field, and nine plays later Bundick muscled it in from the five for the score.

On Carroll's initial drive the "Red Swarm" lived up to their name as they stifled the option combination of Nelson, Kloska, and Schenner. After one first down, the Zahm defense tightened up and forced a punt. On their second possession, Zahm threw in their little secret weapon, as tailback Dan Glennon scammed through the Carroll defense for 25 yards. Then Orr hit standout freshman wideout/defensive back Mike Bailey for a 35-yard strike to run the score to 14-0.

On the day, Bailey had two touchdowns and blanketed the Carroll receivers. "I was really impressed with him, you never know what you have with a freshman but he certainly proved that he is capable of big plays," Bundick said. "On Zahm's last possession of the first half, Orr threw one up for Bailey in the end zone, and the freshman came up with a 57-yard touchdown to make the score 21-0 at the break.

The Carroll offensive line could not sustain a drive as Schaller and company came up with big plays time and time again. Carroll captain Bob Fincutter commented, "Zahm is a much quicker team, and they took advantage of their strengths today."

Zahm's fourth score came courtesy of Bundick, who took it from three yards out for his second score of the game. Bundick's run capped a 62-yard scoring drive.
