Crash takes life of Notre Dame senior

By DAVE TYLER

A one car accident claimed the life of a Notre Dame student in early morning hours of October 13 in Mishawaka.

Robert Adams, a senior who lived of Notre Dame, lost control of the vehicle he was driving and crashed into a tree in the 1300 block of South Union St., police said. Alcohol may have played a role in the accident.

Adams died of massive head, chest and internal injuries according to Deputy Coronor Michael O'Connell. He was 21.

Adams was involved with several campus organizations, including the Student Union Board, which he served as Day Chief and Music Editor of The Observer and was the Student Union Board's Music Commissioner.

He was enrolled in the College of Business as a Marketing major.

Police said Adams was driving at a high speed northbound on Union St. when the car hit a tree in the front yard of the Board of South Union St. Adams was wearing a safety belt at the time, according to the police report.

Three mishawaka fire department units spent more than an hour trying to retrieve Adams' body from the wreckage.

The father said he became suspicious last summer of a Father said he similar behavior with the boy not tell his father anything until fronted Herro, who denied the Tribune.

Thursday and charged him with three counts of child sexual fondling and other offenses.

Three months later in the home in June, Herro is also accused of molesting and two counts of sexual molestation with a minor.

Police said Herro was released Friday after posting $2,000 bond.

Details of yesterday's hearing were not yet available as of last night, according to the St. Joseph County Superior Court clerk.

From January 1994 to May 1994, Herro allegedly molested the boy, then 12, by fondling him in the sauna of the Bend Barquet Club. Herro was a friend of the boy's family, authorities told the South Bend Tribune.

Herro also is accused of fondling and engaging in other sexual acts with the boy at the professor's Notre Dame office between July 1994 and May 1995.

Herro allegedly continued similar behavior with the boy at his home in June.

The boy's father informed the county police last week of the alleged conduct after starting his son in counseling, according to police reports.

First, the father said he became suspicious last summer of a computer message sent from Herro to the boy, and the father said he later found a letter, a letter written by Herro.

The father told police he confronted Herro, who denied the allegations.

The boy apparently would not tell his father anything until 2002. Presently in his eighth year as president of the University, Malloy said the University's success is evident as well as the University's new provost in preparation for the upcoming 1996 capital campaign.

For a third term concurrent with Father Edward Malloy's, Father William Beauchamp will retain his position as executive vice-president through 2002, as voted by the Board of Trustees.

Since Malloy and Beauchamp took office in 1987, the University has undergone many face-lifts and has accomplished numerous milestones. In addition to enrolling the most selective classes in the University's history, increasing the female population to 45 percent, the University has decided to become more "women-friendly, selfless and dedicated Monday as word spread of his October 13 in a car one car accident in Mishawaka.

The senior who spent a good portion of his life traveling in a military family, was the only person in the car, police said.

"It was the longest extraction I've ever seen," said police Capt. William Schwartz.

A blood alcohol test revealed that Adams had a blood alcohol content (BAC) of 0.18 percent. Under Indiana law a person is considered intoxicated with a BAC of 0.10 percent or more.

Gone, but not forgotten

If you didn’t know Rob Adams, you knew of him. And if you didn’t know of him, he was still somewhere in your life, whether you knew it or not. He was everywhere at Notre Dame involved in everything.

Maybe he was the guy sitting next to you in one of your marketing classes or brushing you off on the front steps of LaFortune every so often. Maybe you saw his name in all funk shows on WVFI on Wednesdays.

Nicknames: Co-Founder of the oracles, raconteur of the riddles, or even just the one who would stop you after class and say, “That was one of those things that you could never explain.”

Rob’s best friend was probably his family, and the only word you can use to describe those last few days is “unreal.”

Without a doubt, Rob Adams came into our lives for a reason.

Many people have had over a week to come to terms with the fact that Rob worked his ass off 24/7 to try and get someone to like him.

Rob was your best friend, maybe even your best friend, and the only word you can use to describe the last few days is “unreal.”

Children object to healthy Halloween

North Portland, Md. — Ghosts and goblins may not frighten trick-or-treaters the way they do as youngsters, but a new candy called nutritious candy will find itself inside their goody bags: healthful snacks instead of sugary candy.

Nutranced snacks — including cream of wheat and instant oatmeal — are being talked up this year as healthier alternatives to candy for that ghostly holiday, but don’t be looking to the candy companies to get involved. They should give candy, not breakfast, said 11-year-old Michael Joyce of St. Michael, who shook his head in disgust. “Everyone likes candy. Not cream of wheat or oatmeal or raisins.”

But the candy makers are becoming a new Halloween tradition, says the Snack Food Association, which has joined the National Potato Promotion Board to push back faddish alternative sweet treats. “The popularity of pretzels, in particular, with their excellent nutrition profile, has made them an excellent choice for handing out at Halloween,” said association spokeswoman Kate Schultz. “We promote snacks as fun foods, and Halloween is a fun holiday so we feel like snacks fit very well with the Halloween tradition.”

Gang graffiti tells of feuds and deaths

In the stinking hallways of the Orchard Park projects, crude drawings of a marijuana leaf, five tontobones and a stick figure firing a gun show how the P.O. Trailblazers live and how they die. “Like the hieroglyphics and the pyramids, this is their tomb,” says officer Ricky Rah, a member of the police department’s gang unit. For the detectives who have cracked the code, graffiti can be a good source of intelligence, but gang tags, the wares, their drugs, what they sell, or who controls them. “They can fool the walls with the same as try to inform us,” says officer Greg Brabah, Rah’s partner. Gang graffiti, unlike the colorful bubble letters and murals put up by so-called “taggers,” is really artistic. It is function; it marks boundaries, communicates to the gang’s own members, and issues challenges and warnings to rival gang members. The translations of graffiti at Orchard Park: "Hate," "St. Blazer Town 95." There are a lot of guns (heat) in the projects this year.

Man kidnaps two young brothers

Benton Harbor, Mich. — A man already facing a charge of fondling a young girl is being sought on charges he kidnapped and brothers missing for more than a week. He may be heading for Mexico.

A warrant was issued Saturday for Boyd Dean Weekley, 24. “Our primary goal is the safe return of these kids. ... We just want his to go back to his family,” said Detective Dave Goodwin. “I’m convinced he’s not going to hurt them if he talks to them.” The boy, 12-year-old Barry Hurkavu, was kidnapped by a prison chauffeur at Sioux Falls, S.D., said today. “He needs a lot of help. He’s really a sick guy.”

I pray they get him as soon as possible,” Harkvavu posted bail to get Weekley released from a jail in Sioux Falls, S.D., and Weekley also is accused of stealing his car. Goodwin refused to say why authorities accused Weekley or what connection he has to the Benton Harbor area, in Michigan. The National Guard was requested Monday to search the surrounding area whereWeekley made a telephone call Wednesday and Thursday.

New map details the ocean floor

WASHINGTON — Scientists using declassified military data have produced a detailed map of the ocean floor that could benefit fishermen, oil and mineral prospectors and climate researchers. “This is a day of celebration,” David T. Sandwell of the Scripps Institution of Oceanography said Monday. “We’re having a data bonanza.” Sandwell and Walter H.F. Smith of the National Oceanic and Atmospheric Administration have produced a high-resolution map using data collected by Navy and European Space Agancy satellites. The map finally begins to pull away the shroud of mystery from the sea floor, Sandwell said. In 1982, for example, Elliot Hurwitz said in unveiling the new chart at the National Press Club. Smith said that the map is 10 times better at showing sea floor detail than earlier studies.

The complex data that form the basis of the map are being provided to scientists through the Oceanographic Explorer system and also are available on a set of compact discs. This is important in oil and mineral exploration and in commercial fishing and also has applications in the study of global climate change, he said.

Mansfield tackles unconscious

By MAUREEN HURLEY

The Observer/Mike Ruma

PHYSICS, PSYCHOLOGY, PHILOSOPHY AND ASTROPHYSICS

and astronomy combined as Victor Mansfield, professor of physics and astronomy at Colgate University, spoke about synchronicity and soul-making at Saint Mary's last night.

The Saint Mary's College Center for Academic Innovation and The Scientific Research Society, Sigma Xi, sponsored the lecture, which focused on "healing the split between mind and matter," according to Mansfield.

Mansfield used the analogy that "99 percent of the universe is invisible" to make the point that "only one percent of our consciousness is visible." Mansfield used C.G. Jung's theories to illustrate how one can be in touch with their individual meaning in life through discovering that 99 percent of unconsciousness.

"Just as each individual has a unique fingerprint and unique DNA, we have a unique wholeness and meaning in life," Mansfield said.

"Our unconsciousness guides us, providing new growth, ideas, and development. Deep wisdom exists in our unconsciousness." Mansfield used dream interpretation as one means of discovering this unity between "the inner and outer world." Psychology senior Molly Sweeney said, "Discussions like this, focusing on one psyche (Jung) and discussing his points and ideas thoroughly really make it easier to understand the theories rather than reading it from a book.

Tom Parisi, professor of psychology, who invited Mansfield to speak at Saint Mary's after hearing him talk at a conference stated: "He talked of a world view, constituted by the material world to a world of deep unity," he said. "This is important for college students to think about.

"Discussion on the topic continues as an informal discussion with Mansfield takes place today from 11:15 to 2:30 p.m. in the Mother Pauline room on the second floor of the Cushwa-Leighton Library.

GRADUATING SENIORS & RECENT ALUMNI:

Are you looking for a concrete way to implement your ideas for social change? The echoing green Public Service Fellowship may be able to help.

ECHOING GREEN is a private foundation that funds energetic, talented and committed social entrepreneurs who design innovative and sustainable solutions to social issues. Any social issue area is eligible for consideration.

You are invited to attend a presentation by echoing green’s executive director, Peri Arnold, Hesburgh Program in Public Service Fellowships, at 5:30 p.m. Tuesday, Oct. 24, in the LaFortune Box Office.

TODAY (October 24th) at 5:00 p.m.
Room 124, Center for Social Concerns

Interested but can't attend? Call David Hay, Urban Institute (631-9015), Maureen Skurski, Center for Social Concerns (631-5779), or Peri Arnold, Hesburgh Program in Public Service (631-5016).

Fears of Quebec split rock Canada's economy

By DAVID CRARY

Associated Press

TORONTO - Fears that Quebec will vote for independence next week rocked Canadian financial markets Monday.

One federalist leader said the province would plunge into "a black hole" if it voted to secede.

The Canadian dollar, which traded last week at nearly 75 U.S. cents, took a large one-day tumble to slightly above 73 cents Monday as traders fretted over the possibility of a "Yes" victory in the Oct. 30 referendum. The Toronto Stock Exchange also quavered. Its composite index lost about 2 percent of its value in trading Monday. Nationwide banks and the Montreal-based conglomerate Imasco Ltd. were especially hard hit.

"Referendum fears dominate the financial markets," Sherry Cooper, chief economist at investment dealer Nesbitt Burns, told a conference call of clients. More than 4,000 people waved flags, sang nationalist songs, and chanted, "We want a country.

"That's what you call political instability," said Prime Minister Jean Chretien, in New York for the United Nations 50th anniversary ceremonies. "It will be a lousy week.

Chretien, a native Quebecker who staunchly opposes secession, said he remained optimistic despite recent polls showing a tight race.

One of the leaders of the federalist campaign, Progressive Conservative Party chief Jean Charest, urged his fellow Quebeckers to weigh their vote carefully.

"We want a choice and the consequences are overwhelming for people and are irreversible," Charest said in Ottawa.

"We're in a black hole. Where would it go from there?"

In Quebec City, capital of the mostly French-speaking province, separatists were buoyant after one of their biggest,liveliest rallies of the campaign Sunday night.

More than 4,000 people waved flags, sang nationalist songs and chanted, "We need a country.

At one point, the mayor of Quebec, Jean-Paul L'Allier, asked the crowd for silence.

"Listen to your heart beat," he said.

"And you can hear, at the same time, the beat of your new country.

Many financial analysts predict major economic upheaval if Quebec votes to secede, including a further plunge for the Canadian dollar, higher interest rates, and a possible exodus of businesses from Quebec.

The head of a leading Quebec polling firm, Jean-Marc Leger, said the dollar's weakness may persuade some Quebeckers that a "Yes" victory would be too costly.

"I am sure people will think twice when they see the dollar go down," Leger told the teleconference organized by Nesbitt Burns. Lucien Bouchard, one of the two top leaders of the separatist campaign, said the financial markets would be reassured if Chretien publicly pledged to negotiate an economic partnership with an independent Quebec.

So far, Chretien has refused to discuss the possibility of a "Yes" victory.
Malloy continued from page 1

blending the minority student population, both Malloy and Beauchamp have overseen the creation of the South Bend Center for the Homeless, the planning and building of the campus infrastructure and they have brought the Alliance for Catholic Education program to fruition.

Malloy and Beauchamp eagerly anticipate their upcoming terms and the agenda to which they will attend. According to Beauchamp, the top priorities for the next term will be those outlined in the Colloquy for the Year 2000.

“Our goals and aspirations can be found in the blueprint in the Colloquy for the Year 2000. The main thing we are directed to is the fulfilling of the specifics in it.”

With respect to his forthcoming term with Malloy, Beauchamp expressed his excitement at serving another five years with the president.

“It has been a wonderful eight going on nine years. Father Malloy is a great leader and person to share responsibility with. The new opportunities facing us over the next seven years will provide us new challenges to deal with and I look forward to it,” stated Beauchamp.

In addition to the re-election of Malloy and Beauchamp, the Board of Trustees appointed Andrew McKenna, of Winnetka, IL, to a two-year term as chairman of the board.

Mullins receives promotion

Special to The Observer

Roger Mullins, director of human resources at the University of Notre Dame since 1985, has been promoted to associate vice president for human resources, according to Fr. William Beauchamp, the University's executive vice president.

Mullins, who as director has reported to Thomas Mason, the University's vice president for business affairs, will retain that reporting relationship until Mason's retirement as vice president in August 1996.

When Mason retires, Mullins will report directly to Fr. Beauchamp.

As the chief administrator of human resources for the University, Mullins directs all activities relating to employment, compensation and benefits, affirmative action in employee hiring, employee relations, and employee training and development, as well as the University's wellness programs.

He was the architect of recent major changes in Notre Dame's benefits programs, notably the adoption of a preferred provider health care option.

Mullins also was a prime mover in the development of the University's on-campus child care facility and last week announced a major review of the job classification system to address issues such as mobility, advancement and equity of pay among various job categories.

Prior to his appointment with the University, Mullins was vice president for human resources at Ikard General Hospital.

A 1991 graduate of Notre Dame's executive MBA program, he earned his bachelor's degree in 1969 from Ball State University. He is a native of Anderson, IN.

Residence Hall Association

Alcohol awareness tops discussion

By HEATHER CROSS
News Writer

The Saint Mary's Residence Hall Association (RHA) met to discuss Alcohol Awareness Week and to decide on a policy that would override the infamous "ten o'clock rule" at their last meeting.

A majority of the discussion focused on the current Alcohol Awareness Week. An estimated 300 students took a pledge yesterday to not use alcohol for the entire week. On Friday, those students will be treated to a movie at the University Park East Cinema courtesy of the RHA.

Today's activities include a lunch discussion and an evening lecture. The discussion about Saint Mary's alcohol issues will be held from noon to 1 p.m. today in the Wedge Room of the dining hall.

Tonight Saint Mary's senior Laura Richter will be "Speaking from Experience" about the effects of alcohol. Richter's speech will begin at 7 p.m. in Stapleton Lounge.

Tomorrow's events include a study break, which will be held from 8-9 p.m. in the LeMans lobby. Pumpkin bread and apple cider will be served. Students are then invited to work off the snack with aerobics to the music of Linebacker, which starts at 9:30 p.m. in the Angela Athletic Facility.

On Thursday, the RHA and the Saint Mary's Board of Governors (B OG) invited students to celebrate with "Friends" which will be shown in the renovated Haggar snack bar and the festivities begin at 6-45 p.m.

Game day will begin with a doughnuts and juice breakfast in the biddies of all the residence halls at 10 a.m. To conclude Alcohol Awareness Week, the RHA invites students to Regina Hall Chapel for mass at 9 a.m.

In other RHA news:

The members of RHA passed a trial plan that will change the mandatory arrival time of hall dances from 10 p.m. to 11 p.m. The conditions of this policy are that all purses and jackets will be searched by ticket takers upon entering the gym for the remainder of the academic year.

The Mandingo Club will begin their "African Music From Africa's Past" tour of the music of Africa's Past into the music of the world's future.

The Notre Dame African Students' Association proudly presents:

A Giant African Modern Music Concert & Dancing

Foraying: Foday Musa Suso and the Mandingo Griot Society from The Gambia (West Africa)

Date: Thursday October 26, 1995
Time: 7:00 PM
Venue: Stepan Center
Admission: General.....$5.00
Students.....$3.00

Come enjoy yourself and dance to the rhythms of Suso & The Mandingo as they daringly project the music of Africa's Past into the music of the world's future.

Do Not Miss This Unique Opportunity to Hear The Finest Music from Africa!

Sponsored by the Notre Dame African Students' Association & Various Campus Institutions

Check it out on our Web page: http://www.nd.edu/800/ndausosu.html

Campus Brief

The University of Notre Dame has received a $2,500 scholarship from the J. Edgar Hoover Memorial Scholarship program of the Society of Former Special Agents of the Federal Bureau of Investigation, Indianapolis, Ind.

The scholarship is a gift from John Miller, an FBI agent from 1951-75. Miller's grandson, Kelly Puzio, is a Notre Dame junior from Dearborn, MI.

Notre Dame's president, Rev. Edward Malloy, accepted a check for the scholarship from Miller and Cal Black, a regional vice president for the society, at a ceremony on campus.

The society has made 108 awards to American colleges and universities since the Hoover Memorial Scholarship began in 1978. The scholarship will be administered by the University's office of financial aid and will be awarded to a deserving undergraduate student in need of financial assistance.

Security Brief

- FRIDAY OCT. 20
11:55 p.m. Security responded to a two car accident on Notre Dame Ave. There were no injuries reported.

4:49 p.m. Security responded to a car accident on Edison Pl. There were minor injuries reported.

7:15 p.m. A visitor reported the theft of her purse from the Joyce Center during the pop rally.

8:00 p.m. A visitor reported the theft of her wallet from the Joyce Center during the pop rally.

- SAT. OCT. 21
2:55 p.m. A University employee discovered a broken glass door at the Hesburgh Library.

2:15 p.m. Security stopped two males inside the construction area off of Donn Rd. They were involved inFFF and harassed offf-campus.

10:44 p.m. A visitor was transported to St. Mary's Hospital via ambulance.

Security is to Saint Joseph Medical Center for treatment of a laceration.

11:44 a.m. A Carroll Hall resident reported the theft of his license plate from his vehicle parked in 106 parking lot.

2:40 p.m. Two students were removed from the stadium for drinking alcoholic beverages inside the stadium.

2:52 p.m. An off-campus student and two visitors were removed from the stadium for drinking alcoholic beverages inside the stadium.

5:00 p.m. An intoxicated person was removed from the stadium by Security.

SUN. OCT. 22
10:57 a.m. A University employee was transported to Saint Joseph Medical Center for treatment of an illness.

10:57 p.m. A University Village resident reported the theft of her license plate from her vehicle while parked at University Village.

Yeltsin pledges cooperation

By BARRY SCHWEID
Associated Press

HYDE PARK

In the sunny splendor of the Hudson Valley, President Clinton and Russian President Boris Yeltsin today set out to revive the "spirit of cooperation" that carried their nations to victory in World War II. But differences over Bosnia and NATO expansion limited expectations of success.

Meeting at the home of wartime President Franklin D. Roosevelt, the two leaders gazed toward the Catskill Mountains while Yeltsin, mar­veling at the scenery, assured: "We are planning here peace not war."

"Can we do it?" Yeltsin said in Russian. But there was no reply from Clinton, who entertained his guest with a brief history of how the young FDR went sledding down into the valley.

"It is a beautiful place," Yeltsin said.

"I am sure in a place like this there will be nothing we can't remove."

Clinton greeted Yeltsin as the Russian leader stepped from a helicopter onto a football-field­size lawn circled by majestic red maples.

They shook hands and hugged. And together, Yeltsin walking stiffly, they chatted their way to the Roosevelt home for their talks.

"I don't know how at this landscape there could be plans of war," the Russian leader said as he sat alongside Clinton on wooden­twig chairs set at an angle to catch the best view of the valley below. "Do you come here often?" Yeltsin asked politely.

"No," Clinton replied.

TOP TEN REASONS TO APPLY

FOR THE SAINT MARY's COLLEGE
ACCELERATED PROGRAM IN NURSING:

#10 Graduates holding baccalaureate degrees from institutions other than Saint Mary's are eligible.

#9 Students receive individualized attention.

#8 The faculty is dedicated and professional.

#7 If you are a woman with a baccalaureate degree in Nursing you are eligible for the program.

#6 The classes are small, with an 8:1 student to professor ratio.

#5 The focus of all classes is nursing.

#4 There are on-site clinical instructors.

#3 Through this program, you will earn a B.S. degree in Nursing from the #1 ranked Saint Mary's College.

#2 This is the only program of its type in the region.

#1 You will receive your B.S. degree in Nursing in only 13 months. (Program begins May 28, 1996, and ends in July of 1997.)

APPLICATION DEADLINE: JANUARY 15, 1996

FOR MORE INFORMATION, CONTACT HEATHER MORCIONI

IN THE ADMISSION OFFICE AT 219/284-4587

Gary Payton gets a lesson in basketball etiquette from Chicago Bulls superstar Michael Jordan. The Bulls lost to the Seattle SuperSonics in an exhibition game last night at the JACC.

U.S. criticized for not paying United Nations

By ROBERT REID
Associated Press

UNITED NATIONS

The leaders of Britain and France criticized the United States today for the failure to pay its U.N. bills, but they backed Washington's calls for a leaner, more efficient United Nations.

The United Nations' financial crisis and the U.S. debts have emerged as major themes as leaders of nations large and small wrestle with the challenges facing the world organization on its 50th anniversary.

"The temptation to disengage threatens the very existence of the United Nations," President Jacques Chirac of France said on the second day of a seven­country meeting marking the anniversary.

"It is not acceptable that many countries, including the foremost among them, should let their arrears pile up."
Homicides down in NEWS

By CHRISTOPHER CONELL
Associated Press

WASHINGTON

Homicides declined last year while suicides increased, but both still exist at a heavy toll among young men, a federal health agency reported Monday.

The 8 percent drop in the homicide rate marked the third straight year it has fallen, the National Center for Health Statistics said.

Vice President Al Gore, opening a three-day conference in Des Moines, Iowa, on preventing violence, called that "encouraging news."

But the 23,730 homicides in 1994 — down from 24,270 in 1993 — "are still far too many," he said. Of those victims, 29 percent were young males.

Gore noted that homicide remains the second leading killer for young Americans, ages 15 to 24, and the third for young children, ages 5 to 14.

The number of suicides, meanwhile, rose last year to 32,410, up 3.2 percent from 1993. The rate was 12.4 per 100,000 people, up from 12.1 the previous year.

For young males, ages 15 to 24, the suicide rate was 29.6 per 100,000 people, more than double the overall rate and triple the rate for young males in the 1950s. The rate for females in that age group was 12.9 per 100,000 in 1994.

The overall homicide rate fell from 10.3 to 10.0 per 100,000 people in 1993 to 9.7 in 1994, the report said. Almost all of the decrease in the number of killings declined by 6.8 percent, the rate dropped by 7.6 percent because the general population increased over the year.

The homicide rate was far more grim for 24-year-old males, 6,790 of whom were slain last year.

That translates to a rate of 37 per 100,000.

The combined suicide and homicide rate for young males was 63 per 100,000.

The figures came from the center's annual summary of births, deaths and other vital statistics. They are provisional, meaning they are based on a sample of death certificates.

Several major cities, including New York, Detroit, Chicago and Los Angeles, have reported a sharp decline in their number of murders. New York has said it will curb this year could be 48 percent below its worst year, 1990, when 2,245 people were killed there.

The national center didn't speculate as to the cause of the falling homicide rate. Some police departments say that putting more officers on the streets in high-crime neighbor hoods has paid off.

But James Alan Fox, a Northeastern University criminal justice expert, argues it was due mostly to the baby boom generation, the youngest of whom are now in their 30s.

He cautioned that the numbers hide "a tremendous growth in the rate of killing among young adults and teenagers ... Right now, 4,000 teen-age commit murders each year. Ten or 15 years ago, it was less than 1,000.".

And the homicide problem could worsen, Fox said, as the number of teen-agers jumps 23 percent over the next decade as the baby boomers' children grow up.

Fox urged that programs to deter violence, enacted in last year's crime bill, be preserved against Republican budget-cutting efforts, saying, "If we are going to make progress, we are going to have to be willing stay the course. These solutions work.

Homicide fell from 10th to 13th place on the list of leading causes of U.S. deaths, accounting for 1 percent of the 2.3 million deaths in 1994.

The leading killer was heart disease, which claimed 734,000 lives or 32 percent. The other top 10 causes were: cancers 570,000, 24 percent; strokes 154,000, 7 percent; pulmonary diseases 143,000, 5 percent; accidents 90,000, 4 percent; pneumonia and influenza 82,000, 4 percent; diabetes mellitus 55,000, 2 percent; HIV infections 42,000, 2 percent; suicide 32,400, 1 percent; and liver disease 26,000, 1 percent.

The University of Notre Dame Department of Music presents

DAVID CARTER, cello

with

NANCY PADDOCK, piano

7:00 p.m.

Thurday, 26 October

Annenberg Auditorium, the Snite Museum of Art

Tree and open to the public.

Let your educated mind and heart be alight in the darkness of the world. Be bridge builders over the chasms that separate people, the young and old, the rich and poor, the black and white, the ignorant and the learned. Go out from here as one who knows and loves, one who has cherished wisdom and built character, and, above all, one who has learned to give of self.

— Theodore M. Hesburgh, C.S.C.
President Emeritus, University of Notre Dame

Congratulations and thanks to the over 180 participants in

The Appalachia Seminar
The Washington Seminar
The Cultural Diversity Seminar
who represented The University of Notre Dame and Saint Mary's College during Fall Break in service and experiential learning at fourteen sites across the nation.

The West Quad residence halls will cost approximately the same amount for construction, according to Brown. (It Welsh Hall) will be right in the same ballpark as Keough and O'Nell which is about ten million dollars per dorm," he stated.

"But this does not necessarily mean that the gift from the Welsh family is ten million dollars."

Residents of Flanner Hall will be moved to Siegfried and Knott Halls when the new women's dorms open on West Quad in 1997.
Walls and fences intrigue me. In our society, fences and walls are sacred. When someone puts up a fence, there is rarely a thought by others to cross it. The fence is there and that is that. Go through a fence and you get out through. Anyone who jumps a fence does so with hesitation. They check all around to make sure no one is watching. There is an inherent feeling that this is a wrong thing to do.

There is a common reason to construct a fence or wall, that sends the frozen-ground sentiment of the fence as a scene, and realize that, as Frost indirectly points out, it takes more energy to keep walls in place for so long, no one, let alone two, to pass through.

In the dining halls, you can see the walls are in place for so long, we forget they exist. Take, for example, the so-called "new racial divide" the media have discovered. This wall is not new. It originates from our country's incredible diversity and unique racial history. Unlike more homogeneous countries (ie. Japan), our country has an incredible mix of cultures and races, making it diverse.

Racial fences and walls are evident in our society, especially in schools. Take, for example, the recent $20 million investment in computers. ND could have put a grand statement in Du Lac saying: "We will not tolerate fear of computers!" complete with appropriate penalties for those horrible people found to be ignorant or fearful of computers. Instead, ND said "We will not tolerate computer illiteracy, because our students will not be prepared for tomorrow's work environment." Thus, ND spent money everywhere and make computer instruction a mandatory component of all freshmen English classes. If ND would only use the latter approach to deal with "rational illiteracy," we would have fewer problems with race relations.

The media have rediscovered the racial divide because there are gaps in it. My fear is that we will take it as a clarion call to meet our neighbor, as our parents before us, only to mend our racial and ethnic walls. As Christians, we must refuse to see that! Otherwise, after college, we go back into our respective communities no wiser to prevent our children from perpetuating the existing division, the existing hatred. It would be more than an opportunity lost. As Christians, I feel it would be a sin to live as though we didn’t know we were God’s image everywhere in our society.

Somehow there is that doesn’t love a wall. That sends the frozen-ground swell under it, and spills the upper fence: And spills the upper fence:

Robert Frost. in his famous essay "Bringing a Stone Grasped Firmly by a Stone," makes some interesting observations about the fence and wall, That sends the frozen-ground sentiment of the fence as a scene, and realize that, as Frost indirectly points out, it takes more energy to keep walls in place for so long, no one, let alone two, to pass through.

As Christians, we must refuse to see that! Otherwise, after college, we go back into our respective communities no wiser to prevent our children from perpetuating the existing division, the existing hatred. It would be more than an opportunity lost. As Christians, I feel it would be a sin to live as though we didn’t know we were God’s image everywhere in our society.

The Show-$1,000,000,000 and counting...

Matthew Apple

Dear Editor:

I am writing in response to some inaccuracies which appeared in the Oct. 12, 1995, issue of The Observer in an article regarding the Gerry Adams lecture.

Contrary to the statements in the article, Adams' lecture is co-sponsored by the Student Union Board, Student Activities Office, the Notre Dame Office of Student Government. These three organizations commonly sponsor lectures and debates which facilitate discussion of societal and political concerns across the campus. We often host political speakers of both national and international renown, but we do not shy away from controversial topics. In an effort to approach the offer to bring Gerry Adams to speak, we have had to educate ourselves on the significance and implications of his visit. We have great respect for those who adjudicate such matters and feel that our considerations have been both informed and careful.

Matthew Apple

Lecture sponsors clarify Adams misconceptions

No interview should go to Adams

Dear Editor:

I am writing regarding the Observer cover story of October by [author's name], in which the upcoming visit of Gerry Adams is recounted. I disagree with the article's portrayal of Adams. I am neither Catholic nor Protestant, and I have no desire to participate in the political debate on Northern Ireland. I have no interest in the affair. Gerry Adams is a good and decent man, but I would like very much to hear what he has to say. However, with regard to your story, I feel that [author's name] has left something out of the story.

In the story, it is implied that Adams is not the type of person to be interviewed, and that he is simply a ‘hired gun’ for the IRA. I would like to clarify that this is not the case. Adams is a committed and dedicated leader of the Republican movement in Ireland, and I believe that his views and ideas are important and worth hearing.

I am writing this letter to The Observer in the hopes that you will consider the following points:

1. Adams is not a ‘hired gun’ for the IRA. He is a committed leader of the Republican movement in Ireland, and his views and ideas are important and worth hearing.
2. Adams is not a threat to peace and stability in Ireland. He is committed to finding a peaceful resolution to the conflict and ending the violence.
3. Adams is not a ‘terrorist’. He is a committed leader of the Republican movement in Ireland, and his views and ideas are important and worth hearing.

I look forward to hearing from you regarding this matter.

Irish use overwhelming offense, dominating defense to keep Trojan winless curse to thirteen

By MIKE NORBUT
Sport Editor

As the final seconds ticked off the clock Saturday, Irish students symbolically flooded the rain-soaked field of Notre Dame Stadium. And for good reason. They had just watched the flood gates open on Southern Cal in the second half, as Notre Dame rolled to a convincing 38-10 victory over the fifth-ranked Trojans.

"This is our biggest win since Notre Dame's 31-24 win over the Seminoles in 1993 marked the last time Irish students touched grass after a game. Boston College and Michigan fans had enjoyed that privilege the past two years. "We knew coming in that this game is always a special one," Irish coach Lou Holtz said. "It's the biggest rivalry in the country."

Florida State," offensive guard Ryan Leahy said. "USC is USC. It's the biggest rivalry in the country."

Irish linebacker Lyron Cobbins (above) grabbed two interceptions as the Irish defense shut down the Trojans. Meanwhile fullback Marc Edwards (below) drove past USC's vaunted defense for three touchdowns and was involved in a pair of two-point conversions.

Poll positioning gives something to ponder

The poll is stupid. Warped, biased, and ignorant would probably fit as well, but just plain stupid says it well enough. Think of the concept for a moment. Having an educated opinion on the quality of 107 football teams is rather difficult. Sure, there are people out there in America who pore over all available newspapers, glue themselves to the various shows such as College GameDay, and even surf the hauntingly addictive Internet in search of more in-depth information about America's

continued from page 1

was a complete team effort and it cer-
tainly was a great win, I know how
downhearted Southern Cal must feel,
because this game means so much to
each side.

For the Irish, it means a distinct possi-
ble. If not probability, that they will
make an appearance in a major bowl
game this year.

For the Trojans, the loss means a sec-
son down the drain. National Cham-
pionship hopes faded as fast as USC's 7-6 first quarter lead. Emotions ran as low as their ten-point total indi-
cated.

"There's not much I can say," Southern Cal coach John Robinson said.
"It was obvious. We played a very
good game. Our defense played a very
good game.

It makes thirteen straight years
that the two teams have played without
a Trojan victory. They tied 17-17 last sea-
s, USC won last win came in 1992
against a 4-6-1 Jerry Faust-led team.
"You can flip a coin thirteen times
each game every time," Holtz said. "But
the 14th time you flip it, you'll still have
even a 50-50 chance of it being tails.

But for the Irish, it came up heads, but
not simply because of blind luck. A dom-
inating performance by Notre Dame on
both sides of the ball decided the out-
come.

"They overwhelmed us, there's no
question," Robinson said. "Ironically
they only gained one yard more on our
defense than us. That's not indicative of how
two teams turned out.

Four Trojan turnovers can probably
tell the story a little better. Two fumbles
inside the Irish ten-yard line and two in-
terceptions gave the Irish offense the
upper hand on both occasions.

Hard hitting linebackers stabilize Irish defense

By TIM SEYMOUR

The moniker 'Fearsome Fourosome' has historically been applied to defensive lines, but when it comes to Notre Dame's defense, it's been a bit of a misnomer. The 'backers' have been more of a key component of the defense, not just the line. Dame's linebacker corp. have historically been a key component of the team's success, and in this game, they were at their best.

The team's performance against Southern Cal, the team that had come out on top in the previous meeting, was impressive. The title is equally apt for Notre Dame, as they managed to shut down the Trojans and secure the victory.

Foursome' has historically been a key component of the team's defense, and in this game, they were at their best. The defense was able to shut down the Trojans, and the team managed to secure the victory.

The team's performance was a testament to the hard work and dedication of the players, and it was a great win for Notre Dame. The team's victory over Southern Cal was a testament to their hard work and dedication, and it was a great win for the team.

Marc Edwards was virtually unstoppable. The junior rushed, blocked, received, and even threw a bit en route to a career day.

With the Trojan defense focused on Marc Edwards, Ron Powlus and Autry Danzon (above) were able to run the option to perfection. Shawn Wooden questions a late-first half pass interference call (below).

Derrick Mayes gets a little help from Ryan Leahy on his second quarter reverse. The play went for five yards but served to loosen up the Trojan defense.

Notre Dame 38
USC 10

Notre Dame Stadium
October 21, 1995

Game Notes
By MIKE NORBUT
Sports Editor

It wasn't done with quite as much ease as Fran Tarkenton, but Marc Edwards scramble on Notre Dame's first two-point conversion attempt was certainly a sight to see.

"There were three options," Irish coach Lou Holtz said. "Run, throw to Derrick Mayes or stop and throw back to Ron Powlus.

"Ron tried to run a good route, but the guy stayed with him," he continued. "Marc did a heck of a job of dumping it off to him."

Edwards was a true triple threat to USC on Saturday, rushing for three touchdowns and a two-point conversion in addition to throwing the other two-point pass and making four catches for 30 yards. He finished with 17 carries for 82 yards on the ground.

"Our offense executed very well, except for the turnovers," Edwards said. "That was the way it's supposed to execute."

Edwards completed a two-point pass against Navy a year ago.

Conspicuous Characters:
They stood out like a sore thumb in the press box Saturday, but for good reasons.

Officials from the Fiesta, Orange and Sugar Bowls were decked out in their bright uniform jackets and in attendance Saturday to watch a possible New Year's Day team, if not two.

USC's non-conference loss does not take them out of the Rose Bowl picture.

But if Notre Dame had been on the losing end, their hopes of a major bowl would have gone by the wayside.

"I said after we got beat by Northwestern that we could be 10-1 or we could be 1-10," Holtz said. "But I felt that we were a pretty good football team. I talked to this team about the positive things."

The most positive of those nowadays is Notre Dame's legitimate shot to play in the Orange or Sugar Bowls.

"I've never been to the Orange Bowl," Irish offensive guard Ryan Leahy said. "I had a lot of fun at the Sugar Bowl a few years ago. But we'd be happy with anyone who takes us."

Celebs Central:
Along with the regulars such as Dick Vitale, the Notre Dame campus was a people-watchers' paradise this past weekend.

Among those taking in the action on Saturday were captain Scott O'Grady, the pilot made famous for his survival in Bosnia, Jim Leyland, manager of the Pittsburgh Pirates, and two Heisman trophy winners, Paul Hornung and Mike Garrett, USC's athletic director.

Planning on Pasadena:
Trojan wide receiver Keyshawn Johnson is quite the talker, even after his squad just was at the wrong end of a major spanking.

"I came back this year to beat Notre Dame and get to the Rose Bowl," Johnson said. "We'll still be able to accomplish one of our goals."

Talk about counting the chickens before they hatch. A 17th ranked Washington Husky squad is up next for USC. They are coming off a critical comeback win over Stanford last week.
Giving their all in Appalachia

By KRISTIN GROTHOFF
Acme Writer

I t was 7:45 a.m. on the first Sunday of Fall Break. Over 150 people, heading to 12 different sites in the Appalachian region stood in a gaze out­side the Center for Social Concerns with sleeping bags and pillows in one hand and overstuffed duffel bags in the other. The scene was quietly chaotic as the weary volunteers loaded a fleet of CSC vans in preparation for a week of service and adventure. At one cor­ner of the CSC building members of one group gathered—most probably wondering how they were going to spend an entire week with a group of people they knew from only three hours worth of orientation seminars.

Skepticism grew as one of the mem­bers of the Appalachian Task Force introduced the group to the vans which would carry 16 people and their bag­gage to Gary, West Virginia, some 12 hours away from South Bend. A comfort­able flight home and a predictable and relaxing week with the family probably sound incredibly attractive. Would the volunteers be able to handle a week long disruption in lifestyle? Would they return from Appalachia with a heightened awareness of another American culture? What had con­vinced them to sign up for the Appalachian Seminar in the first place?

From the Seminar description print­ed on the application, it is clear that the goals of the project are broad and ambitious. The Appalachian Seminar, which is offered in both the fall and the spring, is designed as a one-credit the­ology course involving two orientation sessions, two follow up sessions, and a final project in addition to the week long trip during the semester. The two orientation sessions before the break focus on short readings which describe the state of the Appalachian region socially and economically.

Two people at a time cluster around students for an encounter with a region that has been described as America's own Third World country—a region which has been plagued by unemployment and poverty following the decline of the coal mining industry. Further, the readings paint a picture of a people challenged to learn and maintain the spirit and ambition through decades of downturn and downturn.

Armed with a basic understanding of the environment, participants in the seminar then spend a week during the semester break performing acts of ser­vice at one of the program’s twelve sites. The sites, located in Kentucky, Ohio, Tennessee and West Virginia, allow students to work through com­munity or religious-based organiza­tions to make improvements in the health, education or environment of the local population.

Participants have the unique op­portunity to become painters, carpen­ters, tutors or ditch-diggers, depending on the needs of each community. At the same time, interaction with resi­dents of the region provide insight that no magazine article or classroom pre­sentation can convey. The follow-up classes give groups the opportunity to discuss their experiences and to pre­pare for the final projects, which take the form of individual reflection papers or group projects.

Not only does the Appalachian Seminar offer an opportunity for intellec­tual and spiritual growth, the price is right, as well. For just $90, the CSC covers transportation expenses (volun­teers become quite attached to their vans throughout the week) and arranges for lodging with the mission project. Depending on the site, meals are often the responsibility of the group. However, a frugal group of shoppers and a little culinary creativity can minimize grocery bills.

The group that headed to Gary, West Virginia, worked with the McMicha­well Mission Project. The Mission, which is in run-in affiliation with the United Methodist Church, was established in 1990 to serve Southern West Virginia. This group was introduced to the goals of McMich­well, which included a housing rehabilitation and revitalization pro­gram, a comprehensive education pro­gram, and a health advocacy program. The group was divided into teams, each with a specific tasks — construct­ing a garage, painting a clubhouse, instilling flooring in the youth center or organizing a thrift store for the community. Jim Nance, the Mission Director, made it clear before the group set out on their projects that the primary purpose was to interact with the Gary community. He encouraged the group to put down their hammers and paint brushes if they saw the opportunity to swap stories with one of the locals.

Some spent their days high on a lad­der, scraping and painting the Mi­tion’s 39-room clubhouse. Much more was gained than proper painting technique, however; the kindness of the people being served continually amazed the volunteers. They encoun­tered people such as Olga, who stopped by at lunchtime one day wearing a pot of chili because they looked hun­gry, and Laverno, who was so impressed with the team’s efforts that she left the group a beautiful leter and a very special collection of gifts. And, while many had felt awkward on Sunday morning about spending their break with virtual strangers, they real­ized by the end of the week in West Virginia that they were traveling with a fun-loving, open-minded group of Notre Dame and Saint Mary’s students all sharing the same feelings.

Although the aim of the Seminar was to spiritually and intellectually enhance the volunteers as they helped the community of Gary, everyone was pleasantly surprised that a week of service could be so much fun. Housing house painting can seem like light work with 4 or 5 people there to keep the laughter going, and an evening spent on a mountain top watching the stars can be worth a month lounging in front of the television.

Random Brain Facts

By LIZA NYKIEL
Acme Medical Correspondent

Last week, as it was fall break, I spent a great majority of my time in front of the TV. When I’m at school, I don’t have all that much time to watch even random channels cable has to offer me, but on fall break, I’m the channel-sipping mas­ter. Anyway, there I am with 57 glorious options for my viewing enjoyment and what do I stop on... the Nova special on the compli­xes of the brain (ah, the plague of this promted studies). Although I couldn’t possi­bly mention everything that was presented in the show, I thought I would devote this column to the quite interesting, yet rarely random facts I learned about... THE BRAIN.

First of all, let’s talk about memory, a fas­cinating yet not-really-understood function of the brain. Our memory is capable of retaining about 100 billion bits of informa­tion, or 500 times the information contained in the complete set of encyclopedic memory is due to the 100 billion neurons and 100 trillion connections of those neu­rons—46 ounces of memory in all, if you’re average, that is (I’m sure the typical Notre Dame student can store a little more). Studies on memory have shown that short-term memory is 15 percent more efficient in the morning, with long-term memory more accurate in the evening.

One interesting situation arises, though, very rarely, when people have eidetic or photographic memory. These people have the ability to recall volumes of information instantly and in complete detail. The world record for an eidetic memory is held by Bhandanta Vicitara of Rangoon, Burma, who on May of 1974 recit­ed from memory 16,000 pages of Buddhist canonical texts. (It warned you this would be random).

Another interesting little tidbit I learned was that, although this trait is used solely on statistical observations, left-hand­ers are not necessarily better at memorizing. Although one out of every ten people on earth are southpaws, the incidence of lefties is about 1 percent. And, you can’t put it down to left hand. Twins, who are often crowded inside the womb, are twice as likely to be left-handed than singletons. The largest population of lefties is found among South Americans (1 percent favor their left hand over their right). Surprisingly three times as powerful. This natural painkiller is often found in southpaws and inhibits the brain’s production of endorphin, which may explain why you feel so darn good after watching “Friends.”

Although one out of every ten people on earth are southpaws, the incidence of southpaws also share the likeability which may explain why you feel so darn good after watching “Friends.”

Dopamine, another drug produced by the brain, has been found to make psychoactive drugs, the brain can affect its own memory, intelligence, sedation and aggression.

Endorphin, for example, is the brain’s ver­sion of the pain-killer morphine, but it’s sur­prisingly three times as powerful. This nat­ural painkiller is often found in southpaws and inhibits the brain’s production of endorphin, which may explain why you feel so darn good after watching “Friends.”

Cleveland

Is that a hint of smugness on Chief Wahoo's smiling face?

It's the same cheery smile the Cleveland Indians' logo has worn throughout all those seasons of embarrassingly bad baseball. It's the same game face Cleveland Indians' retro fans wore through some 20 years of punchlines.

It's the same frigid grump that greeted the infamous Cuyahoga River fires and the financial default, and the holy trinity of last-minute sporting debacles: The Drive, the Fumble and the Shot.

But if there are no more thrills as the Indians boast a 2-0 lead in the best-of-seven series and could take over a game to even the score in the World Series for the first time in 41 years.

And now the Indians, once baseball's laughstock, are playing in the World Series for the first time in 41 years.

If the Indians beat the Atlanta Braves 2-0 in the best-of-seven series, they'll move another step closer to bringing a World Series title to Cleveland and possibly delivering New York Times, Cleveland.com and The Plain Dealer a spiffy new ballpark where Cleveland Indians baseball eventually will be known as the "Comeback City."

Last month, the grand opening of the Rock and Roll Hall of Fame and Museum drew rave reviews.

And the Indians, once baseball's laughstock, are playing in the World Series for the first time in 41 years.

"No city's perfect, but I think that we've come a long way from days when people from outside of here used to laugh at us," said Paul Lion, who stood among thousands of people at a pep rally Friday outside Progressive Field.

"I think people love Cleveland now and are very proud of their city," Lion said. "I don't think the Indians — the Indians just add another button to pop.

"This is the year Cleveland pulls itself up the ladder," said Tony Long, who watched the Indians clinch the American League title in September of last season.

"The World Series with the Indians in the year, there can be no doubt about that."
Evans shines as replacement

By DENNIS GEORGTOS
Associated Press

OAKLAND

At 40, Vince Evans is still a football marvel.

And after watching him throw for more than 300 yards and two long-distance touchdowns against the same defense that knocked out Steve Young the week before, Raiders coach Mike White couldn’t help feeling the NFL’s oldest active player has never received his just due.

Playing for injured Jeff Hostetler, Evans threw for 335 yards, including touchdowns of 46 and 73 yards to Raghib Ismail in the Raiders’ 30-17 win Sunday over the Indianapolis Colts.

It was the fourth 300-yard game for Evans but first since 1983 when he was with Chicago and passed for a career-best 436 yards in a loss to Detroit.

“He’s an amazing guy,” White said of Evans, called “Pops” by some of his teammates.

What’s even more amazing to White is that Evans didn’t get more NFL playing opportunities when he was younger.

“Vince hasn’t been in the best situations,” White said. “I really believe, if given the chance, that he’d be one of the great quarterbacks to play this game.”

Evans, who entered the league 18 years ago when black quarterbacks were still a rarity in the NFL, said White could be right. At the same time, Evans said he would rather not dwell on missed opportunities but concentrate on trying to “make my last years greater than my former years.”

“I’ve always just tried to make the best of whatever circumstances I might have been in,” Evans said. “I feel blessed to be doing what I’m doing at this age.”

Evans headed into the NFL after leading Southern Cal to victory over Michigan in the 1977 Rose Bowl and winning game MVP honors.

Drafted by Chicago in the sixth-round, Evans didn’t throw a pass as a rookie, spending his first year returning kicks.

He didn’t see significant playing time at quarterback until 1979, and had his best season with the Bears in 1981, when he started all 16 games and threw for 2,329 yards and 11 touchdowns while leading an offense that revolved around running back Walter Payton.

Evans fell out of favor in Chicago over the course of the next couple of seasons and jumped to the USFL in 1984, spending a year each with the Chicago Blitz and Denver Gold.

He was out of football for nearly two years before joining the Raiders in 1987 as a replacement player and stuck with the team after the players strike ended.

Despite being released or granted free agency on a yearly basis, Evans has maintained a nine-year association with the Raiders, outlasting such other quarterbacks as former first-round pick Todd Marinovich, Steve Beuerlein and Jay Schroeder.

During the preseason, Evans had to prove himself all over again, beating out Billy Joe Hobert for the No. 2 job.

Evans began the season 10th on the Raiders’ all-time passing list and he’s climbing the chart.

His three touchdown passes this season all have been over 40 yards, and his penchant for the deep pass is reminiscent of the Raiders’ old style.

“It’s incredible, the physical things he still does, his arm strength, his mobility,” quarterback coach Jim Passel said.

“He’s probably the second- or third-best athlete at the quarterback position in the league,” added receiver Tim Brown. “He can still outrun most of the guys on this team.”

The bottom line to the Raiders is whether Evans can help win games.

There was that time he hit Brown in the final seconds of a 1992 game to rally the Raiders past Washington, a performance Evans ranks as his favorite.

“I like that comeback stuff,” he said.

In 1993, his average of 8.42 yards per completion led the NFL. Last year, he played in nine games as Hostetler’s back-up.

The Ad Hoc Committee On Gay And Lesbian Student Needs

Invites all gay, lesbian, and bisexual students to an open listening session

- Wednesday evening, October 25, 1995
- 7:00 p.m. to 8:30 p.m.
- Room 300 of the University Counseling Center.

A reception will follow.

Irish on top of Big East despite tough break

By MICHAEL THOMPSON
Sports Writer

Over the course of Fall break, the Notre Dame volleyball team dropped four matches. All four losses, however, came at the hands of ranked teams.

On October 12-14, Notre Dame participated in the Georgia Tech Invitational. Georgia Tech was Notre Dame's first opponent. The Yellow Jackets, ranked 22nd in the nation, won the match 12-15, 15-17, 15-11, 20-18.

On Sunday, the Irish had to face Texas once again. Four weeks ago, Texas handed the Irish their first loss of the season, and once again, the Longhorns' arsenal of kills was too much for the Irish defense.

The Irish lost to the now 8th ranked Longhorns, 15-11, 11-15, 15-12, and 11-15.

Despite tough breaks, the now 8th ranked Longhorns, 15-11, 11-15, 15-12, and 11-15, Notre Dame found themselves on top of Big East competition.

On Sunday afternoon, Notre Dame was back on the mark again. In their four game match, the Irish showed much enthusiasm and made few errors. Pittsburg showed up with a fired up and hungry team and made a run in game three, but the Irish finally put down the attack in the fourth.

"Syracuse and Pittsburg gave us opportunities to work on specifics," said coach Debbie Brown. "They got us back into the upswing." Syracuse presented no real threat, but Pittsburg put pressure on us. That gives us a little more experience to bring into the big games.

With wins over Syracuse and Pittsburg, Notre Dame improved their conference record to 5-5. The Irish remain undefeated and atop all of their Big East competition.

Men 6th in Iowa, women struggle

By B. J. HOOD
Sports Writer

The Notre Dame cross country team ranks among several of the nation's top ten teams at the Iowa State Cross Country Memorial Classic on Saturday October 14. The 12th-ranked men's squad earned a sixth place finish of 20 teams, while the women's team finished 17th of 22 teams.

For the second race in a row, senior Derek Selling led the Irish men. Selling posted a time of 26:58 en route to an 18th-place finish. Fellow seniors Derek Marrius and Joe Dunlop finished 23rd and 30th, respectively. Marrius finished in 27:06 and Dunlop in 27:10.

Third-ranked Stanford won the meet, followed by eighth-ranked Iowa State, 20th-ranked North Carolina State, 10th-ranked Tennessee and fourth-ranked Arizona finished ahead of the Irish.

Notre Dame finished ahead of the two Big East schools at the meet, Villanova and Boston College.

Maureen Kelly led the Irish women with a time of 18:12. Kelly earned a 21st-place finish overall. The senior has been the first Irish runner in every meet. "I've been pretty satisfied and I'd like to do better," Kelly said. "I've left a lot of room for improvement."

Senior Amy Siegel was the second Irish runner to finish and placed 37th overall in a time of 18:40. Senior Kristen Dudas was across the finish line in 19:03, and freshmen Mary Volk and Kathy Volk in 19:07.

"To improve we have to run together a lot better," Kelly said.

Soccer

continued from page 20

challenge the Duke keeper, who was out of position to field a Guerrero shot. The play between the teams began to even up as play progressed. After going up and down the field for several minutes, the ball was kicked out of bounds by an Irish defender to set up another Duke corner kick.

Again, Whelchel scored on Andi Mohl's kick by taking advantage of a mismatch against the Notre Dame defense. Whelchel took the ball out of the air and fired it past an outstretched Renola to the high left corner of the net. The score became 2-1 with less than ten minutes remaining.

The Irish kept the ball in the Duke half of the field as the clock ticked down, but couldn't put anything together to get the ball in the net until VanLaeke scored with less than a minute on the clock. The defender collected a loose ball 15 yards from the post and put it past Melissa Carr to tie the game at two.

"Amy is getting better and better every game," said Petrucelli. "It's gotten to the point where we can't take her off the field."

The game lasted two overtimes with each team unable to cash in on scoring opportunities. Sweeper Ashley Scharff thwarted a Blue Devil threat in the first overtime by clearing the ball with several Duke players surrounding Renola in the box.

Duke leaves this game happy, we leave the game feeling that we didn't play to our potential," Petrucelli said. "If you take away the first half, we played well. It says something that we have the ability to come back. But if we try to just survive, like we did in the first half, we're wasting our talent."

After the performance against Duke, the Irish entered the North Carolina game with nothing to lose. The pressure all fell on the Tarheels, who had to defend their undefeated season and top ranking against a hungry Irish team.

Apparently, coach Petrucelli did yell at the team before the game was even through the half, we're wasting our talent."

The pressure paid off when Tiffany Roberts foiled her teammate's national squad teammate Monica Gerardo. The Blue Devils started the game with inspired play. The game was even through the first several minutes as the two defenses prevented either offensive gameplay from taking off.

The Tarheels began to force the ball into Irish territory halfway through the period as the Heels defense came across the midfield line to put pressure on the Irish back line. Tournament MVP Staci Wilson was all over the field, marking Gerardo as well as aggressively pursuing head balls.

The pressure paid off when defender Tiffany Roberts stripped an Irish player of the ball and sent it up the wing to freshman attacker Cindy Parlow. Parlow took the ball into the box and blasted a shot past Renola to open the scoring with ten minutes to go in the half.

The Tarheels played aggressive soccer throughout the game, and kept the Irish in check by stopping the passing game. The Tarheels also tried to keep midfielder Holly Manthei out of the game, as Manthei's national squad teammate Tiffany Roberts fooled her repeatedly, often tripping Manthei from behind. Gerardo also had a tough time with Wilson, who also felt compelled to foul at will. The two exchanged words midway through the second half.

Another big factor in the contest was the Tarheel team speed. The squad was able to keep the ball from the Irish by kicking it deep into Irish territory and letting their forwards catch up to the ball. Beth Sheppard capped the scoring for the Tarheels on a cross from Robin Confer with fifteen minutes remaining.

Confer dribbled up the left side and saw Sheppard wide open outside of the box. Sheppard had plenty of time to collect the pass and put the ball in the upper left side of the net.

"I think that our team quickness and speed was a big factor in the game," said Tarheel head coach Anson Dorrance. "It's also our trademark to try hard. That makes us tough to match up against. But it was an end to end game, and each team had scoring chances. I'm just glad that we collected on a couple of them."

The Irish were not awed by North Carolina.

"I don't think that they lived up to my expectations," said captain Cindy Dawes. "Right now, we're not playing at our best. We don't have a set line up yet, and we have some players who are recovering from injuries. But they don't play very complicated soccer. They just kick and run."

"It's hard to play without the ball," Petrucelli said. "In the beginning we played on emotion, but we didn't maintain our motivation. They won the game because they had possession. I just hope the weekend doesn't affect our confidence."

Goals a priority on road trip

By JOE VILLINSKI
Associate Sports Editor

Before last Sunday’s game with Georgetown, the women’s soccer team decided to put some perspective on the season.

After a lackluster 2-0 win at Villanova three days earlier, they began to look at the goals they set at the beginning of the year.

“Before the game we re-evaluated both our team and individual goals,” senior sweeper Ashley Scharff said. “We completely started from scratch and re-evaluated why we were out there.”

Following this shift of focus, the Irish went out and put the game of soccer in perspective for Georgetown, trouncing the Hoyas 10-0 and outshooting them by an astounding 53-1 count. With the win, the 12-2-2 Irish assured itself of a berth in the Big East post-season tournament.

“I think the girls finally went out there and said they were going to have a lot of fun,” assistant coach Carla Chin added.

The party started with less than a minute gone by as senior Julie Vogel scored her first goal in over two seasons at the 27-second mark of the match on a cross from junior Amy VanLaecke.

For VanLaecke, it was one of many plays in which she was instrumental during the lengthy Irish road trip. She also tallied her third goal in four games in the second half, which VanLaecke thought was her fourth career hat-trick with two goals in the second half.

The difference against Georgetown was the quick Irish passing that kept the Hoyas defense off balance all day.

“We played very well on Sunday,” Chin said. “Our passes were good and we created a lot of dangerous opportunities.”

“We were doing a lot more passing and whenever we move the ball quickly, we play well,” Scharff added.

Against Villanova, another slow start plagued the Irish as head coach Chris Petruccelli took out the offensive starters for the second time this year.

Junior Amy VanLaecke registered an assist and a goal in the game against Georgetown. It was her third goal in four games.

As against Santa Clara, the reserves and starting defensive unit kept the game scoreless throughout the remainder of the half.

“We wanted to get some of the other players in the game and they provided a spark off the bench,” Chin noted. “In the second half, the starters went back in and did a much better job.”

After switching from fullback to forward, VanLaecke tallied the game winner on assists from midfielders Holly Manthei and Shannon Boxx.

However, after the two wins and many lineup changes, the Irish are still looking to find their stride.

“We’re still striving to hit the high point in our game,” Chin said.

For VanLaecke, it was one of many plays in which she was instrumental during the lengthy Irish road trip. She also tallied her third goal in four games in the second half, which VanLaecke thought was her fourth career hat-trick.

VanLaecke was awesome for us during the entire trip,” Chin commented. “She was definitely the most consistent.”

The Irish took control of the game with four more goals in the first half including a pair of Cindy Dawe’s penalty kicks within a three-minute span. Senior Rosella Guerrero also completed her fourth career hat-trick with two goals in the second half.

The Irish went out and said they were going to have a lot of fun, Chin said.

“We have a lot of fun on the road,” Chin said. “The team is very close and we have a lot of chemistry.”

After a lackluster 2-0 win at Villanova three days earlier, they began to look at the goals they set at the beginning of the year.

“Before the game we re-evaluated both our team and individual goals,” senior sweeper Ashley Scharff said. “We completely started from scratch and re-evaluated why we were out there.”

Tournament doubtful, Irish struggle in Big East

By DYLAN BARMER
Sports Writer

The Observer • SPORTS

It wasn't supposed to happen like this.

The outlook for the Notre Dame men's soccer team entering their inaugural campaign in the Big East was good. Roasting a young, talented team and boosted by the return of star forward Bill Lanza, the Irish were expected to finish in the top five in this competitive conference.

Right now, they will be lucky to make the top eight.

The top eight is what the Irish are left to shoot for, as only eight of twelve teams in the Big East will advance to the conference tournament. Following a 1-3 Big East skid over the fall break period, the Irish stand 3-6 in conference play. The team's 6 points leave them 6 in conference play. The team's 6 points leave them

The rest of the 7-8 Irish's season consists of just four games, two of which are Big East games. An October 29 game at Connecticut, who have 7 points with three games left, and a November 3 home match with Villanova (6 points, 3 games remaining) will decide the season. If the Irish can win both of those games, they may have an outside shot of making the journey to New Jersey for the Big East tournament.

In their three game road trip on the artificial surfaces of St. John's, West Virginia, and Pittsburgh, the Irish were outscored 11-1, continually confounded by the harsh turf. You couldn't do what you wanted to do out there," said Bocklage. "I'm just excited to be back on grass now. I've never appreciated it more now."

Certainly the adjustment to turf didn't aid the Irish, but it can't be deemed a total scapegoat either. The Irish had been practicing on the artificial surface of Loftus the entire week before the game, and head coach Mike Berticelli, while citing the difficulty of playing on turf, had insisted on the need for his players to make the necessary adjustments.

"We definitely had trouble adjusting out there," said Lanza. "It was definitely a factor." We probably would have beat all three of those teams on grass."

The three game skid, which included a 6-0 humiliation at the hands of #21 St. John's, continued a disturbing trend for the Irish. This team is a lowly 1-5 on the road this year, their only win coming over a dreadful Northwestern team.

The West Virginia loss was hard to swallow, as two Irish goals were negated due to offside calls, and the Mountaineers escaped with a 2-1 victory. Sunday's 3-0 loss came at the hands of Pittsburgh, on a surface which Lanza said "most resembled Loftus." Familiarity couldn't save the Irish, and the Panthers clawed their way to a fifth straight win.

"The turf" in question here is the ever-unfriendly astroturf, which three of the four Irish opponents insist on playing on.

“We just have to win our last two games, and then wait and see what happens,” said a somber Bill Lanza, who was able to manage just one assist in his first four games back from a groin injury. "I guess our fate is in other teams' hands now."

That is if the punchless Irish can manage any wins.

Their lagging offense was outscored 12-2 over the four game stretch, with both goals coming off the foot of freshman Ben Bocklage. The Notre Dame squad which had been averaging over 3 goals per game coming into their October 14 match-up with Providence seemed to disappear over the last four matches, reduced to a highly inefficient punching bag. "We couldn't even put three passes together," said Lanza. "We didn't really create too well. The turf was definitely a factor though."

The Irish had been practicing on the artificial surface of Loftus the entire week before the game, and head coach Mike Berticelli, while citing the difficulty of playing on turf, had insisted on the need for his players to make the necessary adjustments.

"We definitely had trouble adjusting out there," said Lanza. "It was definitely a factor." We probably would have beat all three of those teams on grass."

The three game skid, which included a 6-0 humiliation at the hands of #21 St. John's, continued a disturbing trend for the Irish. This team is a lowly 1-5 on the road this year, their only win coming over a dreadful Northwestern team.

The West Virginia loss was hard to swallow, as two Irish goals were negated due to offside calls, and the Mountaineers escaped with a 2-1 victory. Sunday's 3-0 loss came at the hands of Pittsburgh, on a surface which Lanza said "most resembled Loftus." Familiarity couldn't save the Irish, and the Panthers clawed their way to a fifth straight win.

"The turf" in question here is the ever-unfriendly astroturf, which three of the four Irish opponents insist on playing on.

“We just have to win our last two games, and then wait and see what happens,” said a somber Bill Lanza, who was able to manage just one assist in his first four games back from a groin injury. "I guess our fate is in other teams' hands now."

That is if the punchless Irish can manage any wins.

Their lagging offense was outscored 12-2 over the four game stretch, with both goals coming off the foot of freshman Ben Bocklage. The Notre Dame squad which had been averaging over 3 goals per game coming into their October 14 match-up with Providence seemed to disappear over the last four matches, reduced to a highly inefficient punching bag. "We couldn't even put three passes together," said Lanza. "We didn't really create too well. The turf was definitely a factor though."

"The turf” in question here is the ever-unfriendly astroturf, which three of the four Irish opponents insist on playing on.
Hockey

Icers optimistic despite 1-3 start

By MIKE DAY Special Writer

One mustn’t judge a book by its cover. Or a hockey team by a 1-3 record. The Dave Poulin era was officially ushered in over the weekend, and to say the results were undersatement.

On paper, losing to Guelph and two out of three to Alaska-Fairbanks is not exactly something to write home about. However, the Irish’s new, innovative style of play, along with the successful debut of a talented group of freshmen gives Notre Dame fans their first glimpse of what promises to be an impressive performance.

But it was good to get off to a pretty good start,” said Urick. “My line mates did a great job of setting me up. I was glad to get my first goal, but we’ve got a lot of work to do at this point in the year.”

After Thursday night’s impressive performance, their way to a sweep of Alaska Fairbanks. However, the Nanooks would have nothing of the sort, as they captured the final two games of the weekend, 6-4 and 7-4, to win the series and move into first place in the CCHA.

“They played pretty well, but we gave them too many opportunities,” said Urick. “We realized that we have to show up and play our game in order to beat a team like them.”

Urick was not the only freshman to make a name for himself in the first three games of the season. Defenseman Benoît Cotnoir recorded a goal and three assists, and left wing Aniket Dhadphale added three points (one goal, two assists) in the class of 1999’s coming out party.

Not to be upstaged, seniors Jamie Moreshead, Jay Matuszak, and Garry Gruber added one goal apiece in the three games against the Nanooks.

Although the team’s 1-3 record may not indicate it, the Irish seem to have made significant strides since the end of last season.

“We are playing with a lot more confidence and unity than we were at this time last season,” said junior defenseman Ben Nelsen. “Coach Poulin’s style of play emphasizes man-on-man defense and an up-tempo offense that may have been lacking the last two years.”

For the pessimist, it was the same old Irish. For the optimist, it was a sign of greater things to come.

YOUR HOROSCOPE

TUESDAY, OCTOBER 24, 1995

(For personalized horoscopes, call 900-983-7788. Your company phone will pay $9.00 per minute)

HAPPY BIRTHDAY! IN NEXT YEAR OF YOUR LIFE:

Take a long look at a situation that may be hanging you down; question circumstances. Self-discipline is the key to making significant headway where your career and finances are concerned. Romance issues are serious early in 1996. Settle down if convinced you have found your soulmate. Some business ventures look especially promising next summer. Focus on the details of a special arrangement in writing. Otherwise, you may have difficulty getting everything squared away.

CELEBRITIES BORN ON THIS DAY: poet Denise Levertov; Rolling Stones Bill Wyman; Canadian Kwesi Miyons (March 21), actor Murray Abraham.

ARIES (March 21-April 19):

Those connected with the arts, entertainment world or Wall Street can further their careers now. Travel is involved. Your physical and mental energy is exceptionally high. Taurus (April 20-May 20):

The impact of a new friend or support group on your life could be dramatic. You may find yourself contemplating big changes. Although overcoming obstacles will not be easy, it is necessary.

GEMINI (May 21-June 20):

The contacts you make now will be a factor to your cap tally. Don't let a marital disagreement get out of hand. Someone from your past reappears. Cancer (June 21-July 22):

Look before you plunge into new ventures. An investment mistake could prove costly. A casual relationship may become a closer acquaintance now.

LEO (July 23-Aug. 22):

Someone may try to turn a financial set-up to your advantage. Exercise caution with jointly-owned funds and shared assets. A romantic relationship needs to be defined.

VIRGO (Aug. 23-Sept. 22):

Take the slower but safer path in personal and work-related matters. Avoid deciding something without trying to elaborate on it right away. Piling up all of your eggs in one financial basket could lead to a mental. Libra (Sept. 23-Oct. 22):

Risky or expensive projects should be avoided, even if your intentions are the best. Patch up a faux pas immediately, then hurl oblique threats without further delay. Profiting from a publishing or advertising venture.

SCORPIO (Oct. 23-Nov. 21):

Tact and cooperation are essential at work. Do not provincialize your savings; easy gains will prove elusive. A romantic adventure may see your imagination. Be discreet.

SAGITTARIUS (Nov. 22-Dec. 21):

A project started in recent days is completed satisfactorily. A domestic murder requires immediate attention. Even routine tasks can be interesting if approached in the right spirit. A positive attitude is the key.

CAPRICORN (Dec. 22-Jan. 19):

This time is necessary to move ahead. Preture non-essential travel. Make good use of the phone, fax and e-mail. A new simmer will fill you with enthusiasm. Devote more time to developing your spiritual discipline.

AQUARIUS (Jan. 20-Feb. 18):

Unusual events may put extra money in your pocket. An expensive hobby will soon be lifted. A new social acquaintance will bring both personal and financial benefits for you. Avoid rushing into anything of a sexual nature.

PISCES (Feb. 19-March 20):

Differentiate between short-term and long-term answers before making an intricate decision. Protect your home and income. There is no reason to feel gloomy about your loved one's needs top priority. Family life must come first.

Irish thwarted by uninspired effort against Duke, UNC

By DAVE TREACY
Sports Writer

If the women's soccer team had thrived against their competition in Houston, a celebration definitely would have been in order.

Don't put the champagne on ice quite yet.

In a tournament highlighting the powers of collegiate women's soccer, Notre Dame offered an disappointing showing. The Irish tied a less talented Duke squad 2-2 and lost to top-ranked North Carolina 2-0 in the Houston Cup Challenge.

Fortunately for the Irish, the weekend's festivities shouldn't hurt them too badly. The Irish are the top team in the Midwest region and should receive an automatic NCAA tournament berth. But their performance over the weekend's festivities shouldn't worry them too much. The Irish came out flat to begin the Duke contest, which has become the norm for the team this season. The passing game, Notre Dame's trademark, was not established early, allowing Duke to play their own ball-control game.

"As long as we come out flat in the first half, we give the other team a chance to get going. It's something we really need to work on," stated defender Amy VanLaecke.

"Coming out slowly has a major effect on our game," agreed head coach Chris Petrucci. "If we don't get on them early, we lose that advantage. We need to come out and play strong and with emotion."

The Blue Devils took advantage of the team's sluggish play by putting pressure on the Irish defense, and scored early in the contest. Kristy Whelechi put in a header off of a corner kick by Mandy Lehr to open the scoring. Goalkeeper Jen Renola dove to attempt a save but had no chance to stop the shot. After the first goal, the Irish began to improve their play, and were able to keep the ball in Duke's half of the field for the remainder of the half. However, the squad was unable to convert on several scoring opportunities, negating the hard work.

Petrucelli was disappointed with the Irish effort in the first half. "In the first half, we couldn't put together a sentence, let alone a passing offense," Petrucci said. "I gave probably the most emotional speech I've ever given at halftime. I told them that if they want me to yell at them before the game starts, I'll do that if it'll get them going. I've never been so upset with my team as I was today."

"The Irish came out much stronger in the second half."

They began to maintain ball control, which resulted in a goal by senior Rossella Guerrero. Good team passing in the Duke half of the field led to an open situation for freshman attacker Monica Gerardo. Guerrero also registered an assist against the Blue Devils.

Petrucelli was displeased with the Duke effort in the second half. "Coming out flat has a major effect on our game," agreed head coach Chris Petrucci. "I gave probably the most emotional speech I've ever given at halftime. I told them that if they want me to yell at them before the game starts, I'll do that if it'll get them going. I've never been so upset with my team as I was today."
