Smith: Next summer to be busiest for construction

By MATTHEW LOUGHRAN
Assistant News Editor

Director of Facilities Engineering Mike Smith, discussed, among other things, plans for a new bookstore, more parking, basic outlines of construction planned to fulfill the Colloquy for the Year 2000. He indicated that many of the projects that University President Father Edward Hesburgh outlined in the Colloquy are either in the planning stages or are in the midst of construction. Smith evidenced construction on Notre Dame Stadium, renovation of the South Dining Hall and the erection of the new dorms south of the South Quad.

The council asked about Holy Cross Drive and the new main circle. "Why is that road so winding and narrow?" asked Father Pat Sullivan, an ex officio member. Smith answered that the road was constructed with the intention of keeping people from speeding around the area surrounding the new dorms.

"When people hit a straight section of the road, they speed up," he said. "The speed limit on that section of road is 20 mph but that seems slow on a wide, straight street."

Smith also addressed concerns about the width of the road. "We do not design the campus for the two days a year that everyone is moving in or out. If we did that, we would have to pave over the whole campus," he said.

The council expressed concern over the lack of funding for a performing arts center planned for construction just south of DeBartolo Hall. "A hotel is nice, and a new bookstore is nice. But we have those already and we have no performing arts center of any kind, and I think that is kind of embarrassing," said Father George Rozum, rector of Alumni Hall.

Smith explained that the funding for the center has not materialized but that it is still high on Malloy's list of priorities.

Election ‘96 discussion works to educate voters

By APRIL MONAHAN
Student News Editor

With Election ‘96 being the first opportunity for most students to vote, the Student Academic Council’s forum, entitled, "Be an Educated Voter," gave students at Saint Mary's College an opportunity to focus on the issues surrounding this year's presidential and Indiana congressional races, as Nov. 5 quickly approaches.

Throughout the forum, which took place last night in Stapleton Lounge, most audience members realized that their political awareness was not as keen as they thought. Individuals who spent time behind the scenes in Republican and Democratic campaign offices spoke on the respective ideologies and platforms.

Two panels were selected from each political party to present contrasting views of the parties. Scott Pelach, Democratic; and Steve Schmidt, Republican, are campaign managers from opposing tickets running for Congressional seats in Indiana.

Swaying from the expected discussion of the ideological differences between Republicans and Democrats, as the congressional race took center stage at the night’s forum, "friendly mudslinging" between the panelists ensued.

Breast cancer focus of October

Special to The Observer

This month, distinguished alumni, students, faculty and staff at Notre Dame will promote breast cancer awareness through a comprehensive array of campus-wide programs and activities.

Regis Philbin, a 1953 Notre Dame graduate and host of "Live with Regis and Kathie Lee," former Notre Dame football coach Ara Parseghian, and others who have contributed recipes to the cookbook, "Just for You: Cooking Up a Cure," will take part in a book signing from Oct. 10 to 12 at the Notre Dame Bookstore in recognition of Breast Cancer Awareness Month.

All proceeds from the book sales support breast cancer research at Indiana University. Kim Wagner, a registered nurse at the Indiana University Breast Care and Research Center, will deliver a talk titled "This Is Not Just Your Mother’s Disease" during a brown-bag lunch today at 11:30 a.m. in the LaFortune Ballroom. Herself a breast cancer survivor, Wagner will provide information on early detection and self-exams.

Tomorrow night at 7 p.m., Father Theodore T. Hesburgh will be the first of several University and community groups including The Catherine Peachey Fund, based in Warsaw, Ind., to fundraise for breast cancer awareness.

This is Not Just Your Mother’s Disease

A talk delivered by Kim Wagner, a nurse at the IU Breast Care and Research Center, will be held on Oct. 8 at 11:30 a.m. in the Hesburgh Library.

Collaborating for a Cure

Seminar with opening address by Rev. Theodore M. Hesburgh, C.S.C., will begin at 7 p.m. on Oct. 9 in the Hesburgh Library Seminar Room.

Candlelight Vigil

A Grotto service after the seminar will honor the memory of those who have battled breast cancer.

Notre Dame women’s athletic teams will recognize Breast Cancer Awareness Month by wearing t-shirts promoting breast cancer awareness during pre-game warm-ups and in practice sessions throughout October.

Notre Dame’s breast cancer awareness campaign is a joint effort of several University and community groups, including The Catherine Peachey Fund, based in Warsaw, Ind., the fund

The Observer/James DiSalvo
Relearning to look up

In my last column, I was harping upon the differences between school and college — the drastic, yet welcome changes experienced by all my fellow freshmen. I spoke of parties, homework, literature, and my newfound enjoyment at juggling all these new responsibilities. I mentioned the drastic, yet welcome changes of my sleep schedule, keeping up with my classwork, and the occasional existential crises that come along with it. I spoke of everyone calling college Life.

I was wrong — not because they were kidding me, but because I seriously didn't know! The first few weeks of abandonment have flown by like a one-way freight train, and I have only just started settling into what everyone calls the New Normal.

It wasn't till this past weekend that I realized I hadn't seen the sky for days. During my stupor, the earth could have shifted its axis and I wouldn't have noticed. When my friends started asking, "Where is the Golden Dome?" I began to realize that something was wrong — not because they were kidding, but because I seriously didn't know! Well, you ask, what made me raise my eyes again? Who gave me such an upbeat attitude, after such a serious topic? Well, freshmen, you may kill me, but yes... it was my parents.

Just the other day, I had communicated myself from the family of my youth. I had renounced my dependency and vowed that, no matter what happened, I would be homesick. Ahh... foolish pride.

A surprise visit from my dad and younger brother, Tomas, proved the instrument of my awakening. Flying in from a two-day trip, they popped in to good old Notre Dame for a short visit. I had dinner and showed them around campus and the tourist things for a couple hours. What I thought would be a ho-hum walk of campus photos ended up being one of the sweetest family-daughter bonding experiences. My dad, a '64 graduate of Notre Dame, navigated the campus like a pro, weaving around familiar buildings and marvelling at the works of Congress. Yes, we saw the Grotto, St. Mary's lake, the Dome, the Rock, and all the other familiar tourist attractions, but this time I was seeing it all for the first time.

I still see my dad prancing down the steps of Lyons Hall, like a young, bouncy goat — the freshman that I once was. Tomas and I were sitting at his desk of seeing a bored girl gliding out of his old dorm room. "Sorry, papa, it's a woman's dorm now," he said.

He reminished on his earlier years at Notre Dame — the stunts he pulled, the fun he had — and I reflected on my past few weeks. No, I'm not surmising about home-sickness. I'm just beginning to look up to the weather conditions, to probe the last blue sky for the first white snowflake, to marvel at the constant northern star — our Golden Dome.

I'm beginning to look at the world outside and relearn to look up at life again.

The views expressed in the Inside Column are those of the author and not necessarily those of The Observer.

World at a Glance

Two IRA car bombs strike British army headquarters

Army forensic scientists estimated that the two bombs contained a total of 500 to 1,000 pounds of homemade explosive. Each left a deep crater in the pavement.

The attack inside what, until now, had been Northern Ireland's most untouched suburb, dispelled any lingering doubts as to the British forces' capability to deal with it. Thiepval lies in Lisburn, a predominantly Protestant suburb of 28,000 that is just 5 miles south of Belfast, and is home to the army's senior commanders, the officers' families and its elite bomb squad.

Thiepval has a single entrance guarded by county officers with cameras, with every car requiring clearance — though most are not individually searched.

Among the army facilities damaged were a primary school, the nursery and the chapel. The blasts smashed windows surrounding civilian homes and at a nearby hospital.

The Dublin office of Irish Prime Minister John Bruton said that "the barbaric bomb attacks" were "deliberately calculated to provoke further violence and bloodshed and (are) aimed at undermining the multi-party talks in Belfast.

During a campaign stop in Portland, Maine, President Clinton called the explosions "another painful setback for peace.

The split between parties in the conflict started in June with the IRA-allied Sinn Fein party excluded because the IRA has not held to its cease-fire. The talks have made little progress.

Board to change harassment policy

LEXINGTON, N.C. — The board that punished a 6-year-old boy for kissing a girl on the cheek on Monday voted to reverse its suspension policy and allow school officials more leeway.

"No, I'm not satisfied," said an irate Jackie Prevette, mother of Johnathan Prevette, after the nine-member Lexington school board voted unanimously, without discussion, to allow school officials more leeway in implementing the policy. Her next move? "Legal action," she replied. Johnathan, a first-grader, was separated from his classmates at Southwest Elementary School for a day and banned from an ice cream party after kissing a classmate last month. "You need to change this policy that it is appropriate and so that the shaming fits the crime," Mrs. Prevette told board members before the vote. "Do not think to this day that a kiss on the cheek somehow the girl wanted it or not, had anything to do with sex. I think it was a friendly kiss," Mrs. Prevette said.

Snappeal summer siege falls short

CHICAGO — They came, they drank, they didn't buy. Quaker Oats Co. spent $20 million this summer giving away millions of bottles of its ailing Snapple fruit-juice and iced-tea line in hopes consumers would then turn around and buy millions of bottles of its ailing Snapple fruit-juice and iced-tea line in hopes consumers would then turn around and buy millions of bottles of its ailing Snapple fruit-juice and iced-tea line in hopes consumers would then turn around and buy.

The Chicago-based food-and-beverage maker now has some tough choices to make as it tries to stem an increasing tide of shareholder discontent, analysts say. "To state the obvious, Snapple is a disaster," Michael Mouboussin at First Boston said Monday. "It boils down to two things for Quaker to do now: Sell the business outright or attempt to run it next year with a more altered strategy." In July, he announced the giveaway campaign to learn where the soft-drink and juice beverage is liked best and to entice consumers into buying...
SAB plans spook fest

By ALLISON KOENIG

The Student Activities Board is bringing "Big Brother" to campus this week. The film will be shown inCourtesy Auditorium on Thursday at 7 p.m. followed by a reception in Haggar Parlor.

Dr. Joseph Incanarda, a professor of Religious Studies at SMU, will lead a discussion about the death penalty and its moral implications for Catholics.

SAB continues to expand its plans for the annual Halloween party and week-long activities. Entertainment Chairwomen Jen Ligda and Jeni Lenzyh, with the help of their committee, are scheduling a day-long murder-mystery game involving the whole campus.

Ligda and Lenzyh hope to use familiar faces around the SMC campus as suspects, such as President Hickey, bookstore staff members, or dining hall personnel.

Students who do not participate in the murder mystery game will not be left out of the Halloweentown festivities. A cookies and candy party will take place in Haggar Parlor on Halloween night.

The Board also addressed the importance of keeping committee members involved and interested. Rachel Tenyer, the temporary SAB adviser, submitted some pointers to the Board regarding its interaction with committees.

Tenyer, the former hall director of Holy Cross, is no stranger to the workings of committees. 'I've had this information for a long time, and it's been very useful," said Tenyer.

Much of SAB's work could not be completed without the involvement of the committee members, according to SAB Coordinator Lori McKenough.

McCartan named chair of Saint Thomas More

Special to The Observer

Patrick McCartan, managing partner of the law firm of Jones, Day, Reavis & Pogue and a trustee of the University of Notre Dame, has been appointed chairperson of the Order of Saint Thomas More, an organization comprised of alumni and other benefactors who contribute $1000 or more annually to the Notre Dame Law School.

McCartan received his bachelor's degree from the University in 1956, graduating from the Notre Dame Law School in 1959. He subsequently served as law clerk to U.S. Supreme Court Justice Charles Whittaker. He was elected to the University's Board of Trustees in 1989 after serving for 10 years on the law school's advisory council.

One of the nation's prominent trial lawyers, McCartan directs the 20 worldwide offices of Jones, Day, Reavis & Pogue from the firm's headquarters in Cleveland. He is a fellow of the American College of Trial Lawyers and the International Academy of Trial Lawyers, as well as an honorary overseas member of the English Commercial Bar.

McCartan is a member of the Council on Foreign Relations and the U.S.-Japan Business Council. He also serves as a trustee of the Cleveland Clinic Foundation, the Kulas Foundation, Ursuline College and Gilmour Academy. In 1994, he received the Archbishop Edward F. Hoban Award for Distinguished Service to the Diocese of Cleveland.

Founded in 1869, the Notre Dame Law School is the nation's oldest under Catholic auspices and consistently ranks among the top five nationally in surveys of student satisfaction.

Pope awaits surgery
By FRANCES D'EMILIO
Associated Press Writer

ROME — Pope John Paul II had a battery of hospital tests Monday — including heart checks and a CT scan — as part of a scheduled appendectomy.

Doctors said the removal of his appendix, scheduled for Tuesday morning, is aimed at resolving what the Vatican says are recurring bouts of intestinal inflammation and fever that have forced the 76-year-old pontiff to cancel several engagements this year.

John Paul, who had a bowel tumor removed in 1992, was admitted to Gemelli Polyclinic on Sunday night.

On the eve of his latest surgery, John Paul's doctors pronounced both his spirits and his heart in good form. After checking in on him early Monday morning, Dr. Francesco Crucitti, the pope's anesthesiologist, told RAI state radio that he was in good shape.

After another CT scan in August, the medical team said there was no sign of any abdominal tumor. The orange-size tumor removed in 1992 was described by the Vatican as benign.

The CT scan was repeated "to be scrupulous," said Colagrande. "Everything is reassuring," he said.

Dr. Cerrado Mami, the pope's anesthesiologist, told RAI state radio that all operations presented risks, especially for a patient like John Paul, because adhesions, or scar tissue from previous surgeries, could complicate the operation.

Election
continued from page 1

One student said she was "surprised by the campaign managers' passionate support of their candidates." Others agreed that the panels "presented their parties' platforms with an air of confidence." But while the two panels did provide general information about the political parties, neither answered specific questions on the presidential candidates in length, even following national discussion sparked by Sunday night's debates.

In addition, Adrienne Sharp and Megan McHugh spoke on their experiences working at the Republican and Democratic National Conventions in San Diego and Chicago, respectively.

One student said she was "surprised by the campaign managers' passionate support of their candidates." Others agreed that the panels "presented their parties' platforms with an air of confidence." But while the two panels did provide general information about the political parties, neither answered specific questions on the presidential candidates in length, even following national discussion sparked by Sunday night's debates.

In addition, Adrienne Sharp and Megan McHugh spoke on their experiences working at the Republican and Democratic National Conventions in San Diego and Chicago, respectively.

Sharp said she was "moved by the political rally" in San Diego, while McHugh spoke of the extensive renovations Chicago went through in honor of the convention.

The evening ended with questions posed to the two panels. Each was asked to give their parties' view on what Schmidt called the "four basic issues" — taxes, spending, crime, and Medicare.

The Student Academic Council, which sponsored last night's forum, felt that it would provide interested students with information needed to cast an intelligent vote. Genevieve Morrill, who helped organize the forum, was pleased. "I thought the panels did a good job. And they tried to address all of the questions asked."

Avalanche hits Nepal, two Americans dead

By BINAYA GURUACHARYA
Associated Press Writer

KATMANDU, Nepal — Two American climbers missing after an avalanche hit a Himalayan peak died of suffocation after being buried under heavy snow, the leader of the expedition said Monday.

Debbie Marshall, 31, of Glenwood Springs, Colo., and Rich Davidson, 46, of Los Alamitos, N.M., were killed Friday while climbing Mount Annapurna IV in northwest Nepal, said Cleve Armstrong, the leader of the expedition.

Armstrong, 54, survived a harrowing night of heavy snow to be rescued Sunday by a Nepalese army helicopter and taken to Katmandu for treatment. He was badly dehydrated and had internal bleeding after trying to scale the 24,715-foot mountain.

He said the avalanche struck between 4:30 a.m. and 9 a.m. as the team rested after working on the most technically difficult portion of the climb, between camps at 14,500 feet and 21,000 feet.

"They had suffocated in their sleep ... the heavy snow collapsed their tent," said Armstrong.

Armstrong said he tried to dig through the snow around the tents to reach the two climbers, but it was too deep.

"Hoping to hear any sign of life, I dug out the snow frictionally," he said. "I reached Rich's body and felt that he had no pulse and saw black blood coming out of his mouth."

Nearby, he said he found Marshall's body in the same state and called the base camp by radio to give the bad news.

Armstrong said he survived by continuously digging out the snow that was falling around his tent. When the rescue helicopter came, they left "the bodies buried there," he said.

On a separate expedition, a Japanese climber was reported missing Monday. Nepalese officials said Matsasugo Konishi, 58, had climbed the world's seventh highest peak, 26,775-foot Mount Manaslu, but did not return to base camp.

Marshall last spoke to her husband and 1 1/2-year-old child on Sept. 16, the day the team left for Nepal.

"It was supposed to be an easy mountain, very low risk," her husband, Chuck Marshall, said in Denver. "Debbie's not one of those who go out and finds a dangerous mountain to climb."

Before setting off, Marshall trained hard in Colorado, where she had conquered 26 of the state's 54 mountains higher than 14,000 feet.

"I've always been outdoor-orientated and enjoy the thrill and adrenaline rush of climbing," she said before leaving.

During her 10 years of climbing, she had scaled Alaska's 20,300-foot Mount McKinley, and Mount Aconcagua in Argentina, the highest mountain in the Western Hemisphere at 22,800 feet.

The expedition to Annapurna IV was to raise money for programs to combat Alzheimer's disease. Marshall was one of three women on the expedition, which would have put the first American women on the summit.

Marshall was aware of the high death toll the Himalayas had taken this year.

"It's something that runs through my head a lot," she said earlier of the trip's dangers. "For me climbing is almost like an addiction. You have to do it every so often to get an adrenaline fix."

Scientists uncover AIDS strains

By LAURAN NEERGAARD
Associated Press Writer

WASHINGTON -- Scientists are discovering the AIDS epidemic is far more diverse in America than previously thought, and they are scouring the globe for AIDS strains to ensure that U.S. tests for the disease are able to detect every type.

Doctors here weren't too worried in 1994 when French scientists first sounded the alarm that an exotic, hard-to-diagnose strain of AIDS was spreading. Then doctors found the first U.S. case in July.

Then last month, scientists uncovered a second U.S. resident infected with this rare type of HIV, named Group O. Mean time, in interviews last week, researchers said they also are investigating a small cluster of New Yorkers with signs of still different AIDS strains never before seen in this country.

"We will now treat these problems as a global village: A case anywhere is a case here, and we will move more quickly to battle them," said Dr. Jay Epstein, the Food and Drug Administration's blood chief. AIDS symptoms appear similar worldwide even though the HIV virus is genetically different from country to country. Tests to detect HIV are designed to recognize a region's most common strains. The concern is whether they'll also catch any rare foreign strains.

Take the HIV type named Group O, thought to lurk only in West Africa until a woman in France was diagnosed in 1994. Doctors didn't find the first U.S. case until July, a Los Angeles woman. Her infection had gone undiagnosed by routine AIDS tests, which miss Group O once in every five cases.

Late last month, Abbott Laboratories filed an FDA application to sell the nation's first upgraded AIDS test designed to better catch Group O infections -- just as federal health officials discovered a second Group O case, this one in Maryland.

Both Group O patients found in the United States apparently were infected in their native West Africa, said Dr. Patrick Sullivan of the Centers for Disease Control and Prevention.

High court protects judges from taxation

By RICHARD CARELLI
Associated Press Writer

WASHINGTON -- The Supreme Court, saying hands were tied by potential conflicts of interest, shielded federal judges from having to pay certain taxes from having to pay certain taxes in 1983,contended that new taxes unlawfully diminished their salaries and thereby threatened judicial independence.

The impact of Monday's order may not be limited to those 16 federal judges, however. Justice Department lawyers argued that the lower court's rationale might prohibit Congress "from applying an increase in the rate of any tax, including the income tax, to sitting judges' salaries."

"His songs about the problems, triumphs, absurdities and deeper aspirations of common peoples' lives are distinguished by a rich humor and pathos," -- The Ann Arbor Observer

"With encouraging regularity, Charlie King reminds us of the happy resilience of the human spirit. His message songs vary between the funny and the frightening, but he pulls them off with unvarying taste, musical skill, and charm." -- Billboard Magazine

Holtz to play-calling what OSU fans are to class

Dear Editor:
The fans grumbled about another lost season. Ion Powlus graciously accepted defeat and the disappointment of an unfulfilled college career. The victimized Irish parted and taunted their hosts. And Lou Holtz tried to make excuses. The Buckeyes, Powlus said, the Irish played, blamed could be placed just anywhere—the defensive front, the secondary, the receivers.

For many Irish fans, perhaps the most startling revelation from the OSU debacle, though, is that the beloved Holtz was outcoached by John Cooper. Cooper is the former-Victor, the master Singaporean of college football. Cooper is a coach who has proven that no matter how much talent his team has, he can lose anywhere. Besides Notre Dame, he has only won one major game at Ohio State (against Michigan), and that saved his job. Cooper is a coach who kept Notre Dame in the game even though the Buckeyes dominated. He outcoached Holtz two years in a row.

Long back on the past few years, this fact should not shock anyone. We are talking about a coach who settled for a tie against Michigan by running a draw play. He could not win a national championship with Jimbo Bells, Reggie Brooks, Rick Mirer, a good offensive line and even a secondary. Holtz is in play-calling what Buckeye fans are to class. In the first three quarters, before the Irish were forced to pass, Holtz ran on first down 14 times (not including those two screens and three end zones). A perfect weapon inside.

Attention away from the receivers. Holtz said. But what can we expect from the inventor of the Blarney offense, an offense so truly Irish one would have to be drunk to conceive of it. Sure, let's split our tight end out wide, making it easier for defenses to blitz. Let's play football with five receivers, but two of them will be slow fullbacks or tight ends. Easier to defend, once again easier for defenses to blitz and sack Powlus at will.

But what can we expect from the inventor of the Blarney offense, an offense so truly Irish one would have to be drunk to conceive of it. Sure, let's split our tight end out wide, making it easier for defenses to blitz. Let's play football with five receivers, but two of them will be slow fullbacks or tight ends. Easier to defend, once again easier for defenses to blitz and sack Powlus at will.

That we ran the ball in the fourth quarter to eat up the clock. I wouldn't want Holtz to give his team a chance to win. "The players played their hearts out," Holtz said. "But we just weren't good enough." Coaching duties are much more extensive than simply getting a team to play well on Saturday. Coaches have the responsibility to foster development of their players, on the field and off.

Coaching duties are much more extensive than simply getting a team to play well on Saturday. Coaches have the responsibility to foster development of their players, on the field and off.

And our [receivers] do a great job. "Powlus." Notre Dame epitomizes Holtz's poor coaching. Sports Illustrated featured a recent article on all the pressure the media has on Powlus. Yet, more back to remember camp back before his first game. Remember Holtz, not the media, rooting Powlus as the best quarterback ever. Holtz, not the media, created the pressure and left expectations. Like Mirer, Powlus was then forced into situations and plays which he could not handle. Powlus, a slow, immobile quarterback, needs to set his feet to throw well. Holtz, though, calls options and roll-outs which Powlus cannot handle. When Powlus injured his arm last season, everyone called Powlus fragile. But the injury was Holtz's fault, forcing Powlus to roll out and exposing him to unnecessary hits. Powlus could be a great NFL quarterback, but not with no help from Holtz.

The players' true feelings towards Holtz shined through last year. The players carried Bob Davie off the field after the Texas game, showing not only love and appreciation for one coach, but indirectly castigating an absent coach. Holtz's egomania drove him to return to roll out and exposing him to unnecessary hits. Powlus could be a great NFL quarterback, but not with no help from Holtz.

World Wide Web Correspondent

Digital entertainment is the next big thing. Right now, publishing on CD-ROM and the World Wide Web seems to be the next big thing. And Marinex Multimedia of New York, NY is one of the leaders in this hi-tech industry.

World Wide Web is part cyber-talk show, part entertainment resource, part broadcast network, and part entertainment news and information service. Integrating images and sound with text-only information, "The Biz," specializes in in-depth Q&A interviews with entertainment industry leaders.

"The Biz" also includes daily news updates, regular columns about entertainment, downloadable movie trailers and music videos, special week's feature stories, and full entertainment statistics including weekly box office ratings.

The defining feature of "The Biz" is the in-depth Q&A interviews. "The Biz" has connections with the top in the business. For example, "The Biz" has interviewed film makers Spike Lee, New Line Cinema Corporation Chairman and CEO Robert Shaye, Warner Books President and CEO Laurence Kirshbaum, PBS President Ervin Duggan, and Billboard Magazine Publisher Howard Lander. With images, full-text, and audio-clips, the interviews almost seem like a Web version of a talk show.

Knowing who's who in the entertainment industry is always important. "The Biz" has a separate section, the "Source," dedicated to this lists. There's the Biz 100 (world's top entertainment compa­nies), Top 10 Entertainment Lawyers, Top 10 Entertainment Agents, and the 15 most important independent film makers in New York. The "Source" also includes a resource guide to entertainment sites on the Web, and Editor's Choice Links—recommendations of the best entertainment-related sites on the Internet.

America has become the largest producer of entertainment in the world. And the entertainment business already has a number of established publications devoted to it.

But what's truly interesting about "The Biz" is that it looks to be the future of publishing. It originally was supposed to be a print publication, but Marinex Multimedia decided to move it to the Web instead to fully capi­talize on its audio, video, and graphics capabilities.

"The beauty of the Web is that it's not linear," says Charles Platkin, Co-president of Marinex Multimedia. "It's a sort of participatory journalism. But Platkin remembers an initial response to the format that was less than favorable. "In the beginning it was like talking to a wall," he remem­bers about publisher reactions to his requests for interviews. "Now they see it as a respectable wave of a future medium. This is the first medium that's global 24 hours a day."

Another source of Web entertainment is Marinex's popular cyber-soap, "The East Village." It's a 5 year-old editor, and her e/o Village of Manhattan.

The East Village incorporates from a single narrator, photo of the East Village, sound clips, a video, and other visual material. The site also includes import­ing video of the characters; a characters' lives are intertwined from the city's favorite alternative pet projects by the character the East Village and current even­ters' point of view.

According to Platkin, "The East Village" web late April, as we Co-producer Bob began to enter the k...
Dreaming of a Good Night's Sleep

By LARRY WARD
Medical Minute Correspondent

Sleep. The word brings immediate pleasure to the minds of most college students. Everyone knows that most students never get enough sleep. And obviously, this is problematic. Sleep is not merely a time away from our ordinary daily routines; it is rather essential to our physical and emotional health.

In a physical sense, sleep often aids the immune system in helping your body to recover from an injury or any particular climate. Moreover, the correct amount of sleep also helps you to be more alert and to properly react to your environment.

In addition, sleep has numerous emotional and mental benefits. A recent medical survey showed that people who suffered from chronic insomnia were much more likely than those who received adequate sleep to develop numerous forms of psychiatric problems. Furthermore, insomnia are also found to be more likely to require the use of professional medical services.

Most people would undoubtedly agree that even occasional sleeping problems can make daily life feel more stressful or cause people to be less productive. Sleep loss can also impair a person's ability to concentrate and accomplish required tasks. Moreover, a loss of sleep often results in failure in tasks involving memory, learning, logical reasoning, and mathematical calculation.

All in all, a loss of sleep can result in strained relationships with our family and Friends. Furthermore, loss of sleep can result in failures at our school or other daily activities.

The inevitable question is: How much sleep is enough? The answer to this question is that the amount of sleep needs vary from individual to individual. On average, most healthy adults need between 7 to nine hours of sleep a night. It is actually rare for someone to only require five hours of sleep a night; however, a few individuals do exist (it is these individuals that most of us envy).

You can measure the amount of sleep you need each night by determining if you have trouble staying awake and alert in boring, monotonous situations, such as lectures. If you have trouble staying awake in such a situation, it is more likely that you are not receiving enough sleep and you should adjust your sleep schedule accordingly.

Sleep occurs in several cycles. The average sleeper experiences a predictable pattern of rapid eye movements (REM) and non-REM sleep each night. The difference between the two forms of sleep is that REM sleep is a period of sleep in which you experience dreams and is characterized by a high level of activity. During REM sleep, the heart rate, blood pressure, and breathing rates are similar to those experienced when you are awake. On the other hand, non-REM sleep is a time period in which heart rate and respiratory rates are reduced.

It is believed that non-REM sleep is the most physically restorative time for our bodies.

Medical researchers believe that the best sleep is the appropriate blend of REM and non-REM sleep. Such sleep allows you to feel well-rested and enables you to function in your fullest capacity.

There are some factors which are common stealers of sleep. Most experts would agree that the number one cause of sleep difficulties is stress. Most often sleeping difficulties will go away whenever the stressful situation also exists the person's life.

Yet another cause of sleeping difficulty is shift work or irregular sleeping patterns. When a person works a night shift or two days a week, it is more likely that they will be more likely to become sleepy during the day.

In a physical sense, sleep often aids the immune system in helping your body to recover from an injury or any particular climate. Moreover, the correct amount of sleep also helps you to be more alert and to properly react to your environment.

EVANSTON, Ill. — Associated Wildcats' defense switched signals on Wolverines defensive signals and they knew when it was time.

"He was like the quarterback," Dailey said. "He'd let Fitz (linebacker) know he's in on it and he'd let his teammates know when he was making the call. They were diagnosing our defense."

Barnett said one "dummy call" in the fourth quarter — when the Wildcats fell behind and a defensive end stumped in on the line — led to defensive end Keith Lewis' tackle on Michigan running back Chris Howard. Northwestern jumped from No. 22 to No. 15 in the AP and Coaches polls after beating Michigan, a school the Wildcats have now beaten two years in a row.

"I couldn't believe it," Barnett said. "I couldn't believe it, ever since I was a kid."

Coach Joe Piano predicted it would be a two team race. He was correct. The results though did not favor Piano’s cross-country runners as the University of Michigan edged the Irish for first place at the Notre Dame Invitational. Michigan tallied 61 points, eight better than Notre Dame’s final score.

Notre Dame was in prime position to win the meet after fifteen runners had crossed the finish line. Four Irish runners finished in the top 15, and needed one more in the next ten to win the meet. Jason Rexing again performed well, being the first of the Fighting Irish to cross the finish line, as he came in fifth place. Matt Althoff was separated from Rexing by one runner, in seventh place. Derek Selling was the third Notre Dame runner in the top 10 at ninth, giving the Irish a good shot at winning the meet. Joe Dunlop crossed in 15th place, putting the Irish a few points ahead of the Wolverines with the crucial fifth finisher to be the deciding factor in the race. Michigan had four top 17 qualifiers, however the Wolverines’ last finisher came in 11 places before the Irish’s fifth finisher, Scott Grace, to seal the meet. The Irish needed Grace to finish in 24th place to secure a razor thin victory or 25th to tie Michigan. "Grace had a nerve problem (so he could not run as well),” explained Piano. "It (the meet) went fine," said Piano. "We had them beat through four runners. Mike Conway keeps improving but Ryan Maxwell didn’t have as good of a race as he should have. You can’t blame the loss on one runner, you may have to blame me. Maybe I didn’t have them prepared enough. However, each guy would say he could have run better. We’ll run better against Michigan the next time we face them.”

The Irish “B” team also came in second place in the Gold division race. Sophomores Tony Arle and Tim Englehardt finished seventh and eighth respectively, separated by one hundredth of a second. The Irish finished behind the University of Rochester.

Notre Dame has this weekend off to prepare for possibly it’s biggest test of the season at the Arizona Invitational. Notre Dame’s ninth place national ranking may be in jeopardy after this weekend’s close finish. The Irish will face tough competition in the next two meets, the upcoming Arizona Invitational and the Big East Championships.

**PETTITTE GETS CALL FOR GAME 1**

*By RONALD BLUM*

NEW YORK  
Andy Pettitte, 3-0 against Baltimore this year, was picked to start Tuesday's opener of the AL playoffs against Scott Erickson.

David Cone, who pitched Game 1 of the first round against Texas, will pitch the second game on Wednesday against Mike Mussina.

Pettitte, who walked six against Texas in Game 2 of the first round, had a 3.76 ERA this season in four starts against the Orioles that covered 26 1-3 innings, and he's 5-0 against them over the last two seasons.

"In the eighth and ninth, they've got some guys coming out there who are blowing cheese," the Rangers' Dean Palmer said Saturday after New York's series-clinching win.

New York's relievers allowed just two runs and nine hits against the Rangers. The performance allowed the Yankees to overcome a 4-1 deficit in Game 2, a 2-1 ninth-inning deficit in Game 3 and a 4-0 deficit in Game 4.

"The bullpen was the difference in this series," Pettitte manager Joe Torre said. "We won three close games and our relievers got them all."

As the Yankees slumped to a 6-0 loss in Game 6 Saturday, the second game of a doubleheader split.

Overall, the Yankees were 19-23 against Baltimore this season, was picked 5-0 against left-handed starters this season.

"We knew that if we could just get a couple of runs, our bullpen would shut them down and we would have a chance," Williams said.

Weathers, acquired from Florida on July 31, may have the best 1-2 combination since Rick Honeycutt and Dennis Eckersley with Oakland in the late 1980s or Ron Davis and Rich Gossage with the Yankees in the late 1970s and early '80s. Weathers had a 9.35 ERA in 11 games, Graeme Lloyd had a 17.47 in 13 appearances and Jeff Nelson wound up with a 4.36 in 73.

"I don't know where we would be without them," said Bernie Williams, who led the way against Texas with three homers. "They came in and got out tough hitters in key situations."

With Mariano Rivera and John Wetteland, the Yankees may have the best 1-2 combination since Rick Honeycutt and Dennis Eckersley with Oakland in the late 1980s or Ron Davis and Rich Gossage with the Yankees in the late 1970s and early '80s. Weathers relieved Brian Boehringer and faced Juan González, who already had five hits.

González struck out on a 3-2 pitch and Will Clark hit into a double play.

"It was probably the single most impressive outing in the bullpen we've had in the series," Wetteland said.

Major League Baseball

Veteran first baseman agrees to two-year extension

Associated Press

CHICAGO

After a career-year with the bat, Mark Grace agreed Monday to return to the Chicago Cubs for at least two more seasons, agreeing to a $9.35 million contract with a team option for 1999.

Grace, a two-time All-Star and three-time Gold Glove first baseman, finished in the NL's top 10 in hitting this year for the seventh time in his nine major league seasons, all with the Cubs.

Under the deal, the Cubs will increase Grace's 1996 salary from $4.15 million to $4.6 million, thus avoiding having a $450,000 signing bonus appear on their payroll in 1997, when there could be a luxury tax.

Grace will get $4.3 million in 1997 and $4 million in 1998. The Cubs have an option for 1999 at $4.1 million, which would increase to $4.6 million if he's in the top five of MVP voting or wins the Silver Slugger award. If the Cubs don't exercise the option, they would pay a $600,000 buyout.

Under his current contract, Grace could have exercised a $4.6 million player option for next season. If he had done that, the Cubs would have had a $5.25 million team option for 1998.

Grace, 32, batted a career-high .331 - fifth-highest in the league - with 39 doubles, nine homers and 75 RBIs. He lifted his lifetime hitting average to .309.

The Irish defend turf, continue to dominate competition

By MARIO ARCE
Sports Writer

The Irish women’s cross country team once again proved to be invincible as they found themselves undefeated and atop the medal stand after last Friday’s Notre Dame Invitational at the Burke Golf Course. The women were first with 58 points amongst the 18 teams field. The Irish won handily, with a 27 point lead over 20th-ranked Green.

“We incredibly once again led the squad and improved her undefeated streak to three races,” said senior Heidi Reichenbach. “Once she runs confidently and comfortably she’ll be able to compete with the nation’s best.”

Senior Heidi Reichenbach found herself as the team’s third finisher, improving 15 seconds from two weeks ago. Reichenbach’s improvement should not be measured from one meet to the next, but from her success this season to the disappointment of her last. Reichenbach has been on the team for four years, running only for herself and to hopefully someday make the varsity team. As a junior Reichenbach ran in only one meet, and on the junior varsity level, finishing with a time of 21:33. This year she has stepped it up for the Irish with a time of 17:33.

“This summer I got to the point where I was coming up to my last year, my senior year,” Reichenbach said. “I wanted to be remembered as a varsity runner and not just another runner on the team.”

Reichenbach was not the only other member on the team to step it up for the Irish as Kelly Peterson finished 28th in the race with a time of 17:30. Mieke Walsh also ran well for Notre Dame finishing 33rd with a time of 18:07.

Freshman Joanna Deeter once again led the squad and improved her undefeated streak to three races. Deeter broke the previous Burke Golf Course record two weeks ago at the National Catholic Invitational by 12 seconds. Deeter ran away from the field early in race to break her two-week-old record by 12 seconds.

“Joanna ran great,” said head coach Tim Connolly. “I really didn’t think anyone could possibly run any faster on our course, but then Joanna goes out there and runs 12 seconds faster. Joanna is faster on our course, but then anyone could possibly run any faster than her.”

“I feel like I could do anything,” Deeter said. “I’m going out there and running my fastest.”

The Irish women’s cross country are very important as far as that is concerned.”

A season hangs in the balance, and the Irish can’t afford to get pushed around right now. But after just one meet, Reichenbach feels she could do anything. She’s not sure why she stepped it up this year. She may get his chance. After all, right now is all that matters for the Irish. A season hangs in the balance, and the Irish can’t afford to get pushed around right now.

The Irish defend turf, continue to dominate competition

HAPPY BIRTHDAY! IN THE NEXT YEAR OF YOUR LIFE: Your efforts to get out of a set pattern over a new leaf will have delightful results. Expect the unexpected. Long-distance reaction is possible over the December holidays. Relationships will meet a set come home early in 1997. A new love relationship could produce your life most fulfilling. Pursue making a romantic commitment until the next spring. Property values could increase greatly by this time next year. Conclude a real estate deal as soon as possible.

CELEBRITIES BORN ON THIS DAY: actresses Sigourney Weaver, the Rev. Jesse Jackson, entertainment reporter Rose Barton, actress Mariette Hartley."

WEDNESDAY, AUGUST 21, 1996: ARES (Mar. 21-April 19): Do not be afraid of change. You are your own best representative. Consider your writing and what you do family news. An answering in- dian could lead to a disagreement with a neighbor.

TAURUS (April 20-May 20): An excellent day to try something totally different! Change your routine and do some shopping. Getting together with loving friends will make this the evening bonus special.

GEMINI (May 21-June 20): Lighten up! Taking yourself too seriously will prevent others from knowing the real you. If you need a man, approach a friend or family member for help.

CANCER (June 21-July 22): A need to develop greater care in dealing with strangers or authority figures. Some people to whom you have been less fortunate than you. Romance is more enjoyable in the event of an Enjoy!*

LEO (July 23-Aug. 22): Practical jokes have a way of backfiring. Keep your snare genie. Playing the field in romance may cost you better than setting down. Be honest, otherwise, someone who felt used by you could later.

VIRGO (Aug. 23-Sept. 22): Seek to be the first character to shock those who thrill you. Disappearance incites your creativity. Inventive endeavors attract favorable responses.

LIBRA (Sept. 23-Oct. 22): Your good fortune is continguous now. Look for ways to boost your productivity at place of employment. Deal tactfully with tired or overworked colleagues.

SCORPIO (Oct. 23-Nov. 21): Others that you lead today will avoid entailing everything you know, an air of mystery makes you more interesting! Delegate minor responsibilities to subordinates.

SAGITTARIUS (Nov. 22-Dec. 21): Your social circle wavers today. Contact a sibling and catch up on recent news. A personal inci- dent could lead to a disagreement with a neighbor.

CAPRICORN (Dec. 22-Jan. 19): Have a friend over for a chat of hoping to catch up on the latest news. You may have notable chang- ing between two advisors. Take your time. Disengaged family mem- bers advise.

AQUARIUS (Jan. 20-Feb. 18): You are at your written top. Give down your very observations for future use. Intellectual pursuits bring general satisfaction while increased activity boosts your energy level.

PISCES (Feb. 19-Mar. 20): You have more authority than the last year. You may make some demands in your relationships. New ways can be found to manage these. Guard your resources. Con- tact experts before making any new investments.

FOOTBALL

Questions abound for struggling offensive line

By DYLAN BARMMER
Assistant Sports Editor

As Lou Holtz tries to shake the bitter memories of the loss to Ohio State, there are many areas of his football team that remain seemingly shrouded in mystery, many questions which need to be addressed.

Can this team bounce back from the crushing blow they received at the hands of the Buckeyes?

Do the Irish have the speed and depth at the wide receiver position to keep them in the game against top-notch competition?

Can this team regain the form on the ground that led them to a 9-3 finish last season?

It is this last question mark which brings forth yet another mystery this season, a mystery which is as big as they come, both literally and figuratively.

The offensive line.

The behemoth unit which began the season for the Irish has been remarkably erratic this season.

The lack of satisfaction, coupled with injuries to several starters, has led to a good deal of shuffling along the line this season.

Injuries to Mike Doughty and Jeremy Akers have allowed for the increased playing time of newcomers such as Jerry Wisne, Tim Biddle and Luke Petitgout, and occasional unscripted play from Akers unit Chris Clevenger have left Moore and company looking for answers.

"The offensive tackle position is an area we need to look at," commented Holtz after the Ohio State game. "There is a possibility that Luke Petitgout or Tim Biddle could start at left tackle. We are going to find some answers in practice this week."

"We're just always looking for the five best kids," commented Moore, who is still uncertain as to who will man the tackles when the Irish take the field against the No. 16 Washington Huskies this Saturday. "We're just looking for the five kids who are going to go out and know their assignments, and function properly. All the linemen are giving a good effort, but we just have to get better."

The Irish offensive line will certainly have to get better if they are going to stop the likes of Huskies Jason Chorak and Ink Aleaga this weekend.

Junior strong-side linbacker Chorak, dubbed the "Creation sensation," picked up two sacks in the Huskies' 27-6 stifling of Stanford last Saturday, bringing his season total to six sacks in just four games.

Chorak has also collected 9.5 tackles for loss.

Junior strong-side linebacker Aleaga, in addition to being a deep pass receiving threat, is an area we need to look to under Holtz. But the success of the running game is contingent on the performance of the offensive line.

"Our offense has to perform well for us to win," commented Moore. "Our five interior linemen have become accustomed to under Holtz. But the success of the running game is contingent on the increased play of the offensive line."

The Irish offensive line, which allowed five sacks against Ohio State, will need to improve its overall performance on Saturday.

The offensive line will hope to contend with Washington's impressive defensive front on Saturday.

Mixed results in busy weekend

They played hard. They fought harder. They never gave up, but that just wasn't enough for the Saint Mary's volleyball team to emerge from the Kalamazoo Triangular on Saturday with a winning record.

The Belles compiled a 1-2 record on Saturday, defeating Defiance 15-12, 15-9, 15-4 in their first match, but losing their next two matches to Calvin College 13-15, 14-16, 11-15 and Kalamazoo 16-15, 15-11, 15-12, 11-15.

The scores speak for themselves.

Saint Mary's head coach Julie Schroeder-Link said, "We could have won any of those games. "All were heartbreakers," added assistant coach Jennie Joyce.

The first match of the day found the Belles facing what Joyce called "a scrappy" Defiance team.

"We started out slow, but we played really well," said junior outside attacker Meg Kelly.

The Belles had little time to savor their win because soon after the match ended, they found themselves back on the court playing regionally ranked Calvin College.

Joyce described the Calvin team as being extremely solid all around. After narrowly losing the first two sets, the Belles got themselves psyched up for the third and once again found themselves in a tough set which they just weren't able to win.

"Our hitting and passing was extremely solid," commented Joyce. "[Calvin] just didn't make mistakes."

After battling it out in back-to-back matches, the Belles found themselves on the court again. This final game was against a strong Kalamazoo squad and would become a tough five-set match.

The Belles lost the first two sets but regrouped for the third and fourth and evened the match. This set the stage for a fifth set which would be filled with rallies. The two teams battled it out, with the Belles showcasing a strong defense and solid hitting. Neither team wanted to give the other any free points, but in the end it was Kalamazoo who pulled out the win.

The Belles are now 13-10, and will be facing Lake Forest at 7 p.m. on Wednesday.
