Drinking and driving hits home with collision

By HEATHER COCKS
Assistant News Editor

Four Notre Dame students narrowly avoided severe injury in a two-car collision with a drunk driver on Nov. 23.

Following the victory over Rutgers, Mike Schultz, a Fisher Hall freshman, was looking for Scottsdale from concerns in the advances of the school's technology to school dances with his three friends, his younger brother, and another passenger. "We decided to see a movie, and we were looking for Scottsdale Mall," said Gabriel Cassel, who was riding in the backseat.

Schultz turned off of Ireland Road, in the downtown South Bend area, only to realize he was headed in the wrong direction. After correcting his course, the car was en route to Ireland Road when the accident occurred. "Suddenly, we saw headlights drift into our lane from the oncoming lane," Cassel recalled. "Mike tried to swerve left into the other lane to avoid getting hit."

Cassel stated that the other driver, suddenly cognizant of his lane position, swerved back into his proper lane, at which point he collided with the front right side of Schultz's vehicle.

Meghan Marcus, a Freshman resident who was in the front seat, remembers little about the actual accident.

"The pickup truck hit my side of the car, and it skidded along the road," she said. "I was in the backseat, but I was not really affected by the accident."

Mike Egan, an Accounting senior turned off of Ireland Road, an orphanage for boys, while Brian Banmer, a Freshman, was riding in the car, and it skidded along the road. Suddenly cognizant of his lane position, he corrected his course, the car was en route to Ireland Road when the accident occurred.

Student government looks for SMC opinions

By SHANNON RYAN
News Writer

Students' voices count at Saint Mary's. That seemed to be the theme of last night's Student Government Open Forum in Carroll Auditorium. The purpose of a Student Forum is to allow students the opportunity to bring their concerns to the Student Government Board.

Issues arose ranging from overcrowding to advances of the school's technology to school dances with the student audience actively participating.

Members of the class boards, leaders of the Board of Governance, Student Activities Board, Student Academic Council, and Saint Mary's students' voice council were free to speak.

The Observer/Shannon Dunne

George Howard detailed the information of his recent research involving drinking habits of freshmen during yesterday's CLC meeting.

George Howard, a psychology student, compared freshman drinking habits to those of upperclassmen. He measured the average amount of alcohol consumed by students in the School of Science, the School of Business, the School of Arts and Letters, and the School of Engineering.

"One could argue that no freshmen should be drinking, but let's call it problem drinking," Howard told the CLC.

In the first two sections, there were control groups with standard curricula and a "students and alumni " group featured informal Friday night suppers at the professor's house. Figures seem to indicate that most freshmen were drinking at levels that did not depend entirely on their socialization practices.

"Why does it work? Well, it's important to get the weekend off on the right foot," he said. "It's the people who start drinking at two or three in the afternoon that are the problem."

Howard was reserved in his endorsement of the experimental learning curriculum, noting, "From one perspective, it looks like a great success," but then adding that because of methodological uncertainties he could not make complete confidence claims success.

Howard felt more conclusive in noting that the class structure of the psychology department's approach led to its apparent effectiveness.

"That's the key. People here are overworked, so getting course credit is the key," he said.

"Meeting in a professor's home reminds students that there's life off of campus, and it also brings the class closer together," Deborah Hellmuth, HPL co-chair, added.

Lectures focus on Irish famine

By BRIDGET O'CONNOR
Assistant News Editor

Many sources combined to provide relief to Ireland during the long years of famine, according to Christine Kinealy, a fellow of the University of Liverpool and professor of Irish and British History.

Kinealy claimed private charities were essential because the public sources of relief fell far short of what was needed to ease the struggle. With contributions coming from both Irish and British sources, the majority of the aid Ireland received was donated by individuals. The British government gave 10 million pounds in loans, most of which were given by a private British relief organization and the Society of Friends contributed $300,000. The Quakers distributed that relief via soup kitchens while Kinealy pointed out that documentation alone cannot describe the disaster of the 1840s. In addition, he said, the Irish emigrated to the United States and Irish Catholics in the United States raised $600,000 in additional clothes and blankets.

Kevin Whelan spoke yesterday about the Irish diaspora and that documentation alone cannot describe the disaster of the 1840s. In addition, he said, the Irish emigrated to the United States and Irish Catholics in the United States raised $600,000 in additional clothes and blankets.

Erase the lines between "us" and "them"

{align}

Kelly Brooks

Assistant News Editor

The situation in former East Berlin, once a left pondering how neighbors could be induced to kill one another. There is no simple explanation for such a disastrous war that has ripped apart the state. Force nationalism prevails. Precedent—reconciliation and forgiveness between peoples. In its basic form nationalism can be explained psychologically as "us" versus "them." This "us" versus "them" distinctly reminds one of situations that exist on the Notre Dame campus.

It's much easier to dehumanize those who are so completely different, those who are not like "us." The "them" become a target of the group's anger and zeitgeist.

What really seems to be lacking is tolerance, tolerance of others, of differences, of religion, of language. When people are reduced to simple categorizations they lose their humanity.

Tolerance is something we here at Notre Dame need to do more. The University was ranked the 13th worst school in the nation for relations between races, according to a study on "everything other than white, Catholic, and heterosexual under the Dome."

Some students have said that they do not see a problem between races on the campus. Are these students right?

Don't they see dining halls where tables are filtered by ethnicity, where white students or tables filled exclusively with multicultural students?

Don't they see events sponsored by the Office of Multicultural Affairs and multicultural student groups that go unattended by white students?

Don't they see frustrated multicultural students and white students who are completely oblivious to the events on this campus?

Very few white students and multicultural students know and understand each other. Socialization is the best way for people to realize similarities and break down stereotypes.

White students seem to think that OMSA sponsored events are for "them." Many feel uninterested in these events because they will be in the minority. It's maybe that the white students on this campus were the minority for a change.

The events that the multicultural groups bring to the campus give those students an opportunity to learn that there is more than what is taught in the classroom. It is time to expose one's self and also to learn about others. This is one of the few times in our lives that we will have the opportunity to learn from others, to sit around and exchange and express ourselves.

If the Notre Dame community is to truly be a family, we must welcome all members of our family. Our family will only be strengthened by diversity. Unfortunately until the whole family realizes this we will remain divided, and more than ever, it will continue to be ranked as one of the most intolerant learning institutions in the nation.

It's time we all learned that there is no "us" and "them."

MONTGOMERY, Ala. — A Navy plane practicing touch-and-go landings crashed near a runway Monday, and a witness said the engine was "making all kinds of noise" before the accident. Both crew members were killed.

The single-engine, turboprop T-34 went down about 300 yards from a runway at Maxwell Air Force Base during clear weather, base officials said.

It was conducting a training exercise in which the plane touches down briefly on the runway and takes off again. Capt. Robert Gonzales said.

An Air Force civil engineer, Joe Madison, said the plane was about 100 feet above the runway when its loud engine noise attracted his attention.

"It was spitting and sputtering and making all kinds of noise. It sounded like the engine wasn't right. It turned on its side, backed to the right, and then nose went down," Madison said.

It ended up with its front end crouched on an abandoned taxi strip overgrown with grass.

The plane had come from the Pensacola Naval Air Station in Florida, 150 miles southwest of Montgomery. The two victims' names were not immediately released.

It was the third military crash in 1 1/2 weeks. On Nov. 22, an Air Force Reserve KC-135 dropping supplies over the ocean off California, killing 10 people; one man survived. On Nov. 27, a National Guard C-130 en route to the Persian Gulf for a summit, also told reporters the prognosis was "very radical."

"The prognosis should be good," he said. Pallo said Havel, 60, probably would remain hospitalized for at least a week and should recover fully in about six weeks. He did not speculate what treatment Havel would undergo after surgery. Presidential spokesman Ladislav Sapek told the state-run CKY news agency that the president's condition after the operation "depends on how the surgery will be undertaken." Premier Vaclav Klaus, in Lisbon, Portugal, for an EU summit, also told reporters the prognosis was "positive" and that Havel likely would be back at work within weeks.

Havel stopped smoking in front of television cameras but "the habit seemed to come back," he said. "There are moments when I want a cigarette." He was hospitalized with a bronchial infection. He was hospitalized in 1983 for a bad case of pneumonia contracted while in jail under communist rule.

It's much easier to dehumanize those who are so completely different, those who are not like "us." The "them" become a target of the group's anger and zeitgeist.

What really seems to be lacking is tolerance, tolerance of others, of differences, of religion, of language. When people are reduced to simple categorizations they lose their humanity.

Hispanic feast to be celebrated next week

The Office of Campus Ministry at the University of Notre Dame will host its annual Mass for the Feast of Our Lady of Guadalupe at the Basilica of the Sacred Heart on Thurs., Dec. 12, at 5 p.m. Members of Mariachi ND, a local Aztec Indian music group, will perform at the Mass, and Father David Scheidler will be the presider and homilist.

This feast commemorates the appearance of Our Lady of Guadalupe to Juan Diego, an Aztec Indian who converted to Christianity shortly after the Spanish conquest. The Virgin had Mexican features and appeared near the revered sight of a female Aztec deity.

David Scheidler will be the host of the Mass. Members of Mariachi ND, under the direction of Father Scheidler, will provide the music for the Mass and the Notre Dame Folk Choir will provide music for the Mass.

Boelman joins SMC drama

BY ANN KEARNS
Assistant Saint Mary's Editor

Boelman joins the office of Special Events in August when he became the scenographer and technical director for the school.

Boelman became interested in drama and more specifically, stage sets when he attended the play "She Stoops to Conquer." He remembers how impressed he was with that particular set and how he first discovered his desire to work in drama productions at that point.

Several years after receiving his bachelor of arts degree in theater of the Xerox Foundation, a nonprofit organization which annually contributes $10,000 gift from the Xerox Foundation to its sister campus at the Rochester, N.Y. Xerox Foundation is a nonprofit organization which annually contributes $10,000 gift from the Xerox Foundation to its sister campus at the Rochester, N.Y.

The Xerox Foundation is a nonprofit organization which annually contributes $10,000 gift from the Xerox Foundation to its sister campus at the Rochester, N.Y.

The University of Notre Dame has recently added a new member to its family. Thomas Boelman joined the School of Business in August when he became the scenographer and technical director for the school.

SMC continued from page 1
Counsel, and Residence Housing Associations opened the forum by presenting details of their funds, this semester's accomplishments, and future plans for fundraising and student events. The panel was pleased to announce the financial and social successes of the Date Auction, Senior Dad's Weekend, and ball dances. A sleigh ride, service projects, and a lecture by the author of "Chicken Soup for the Soul" are a few of the activities the Student Activities Board scheduled as upcoming events. Students actively participated in a discussion of issues ranging from the efforts to reduce the use of sidewalk chalk to the school's search for a future president.

In searching for the replacement of current Saint Mary's president William Hickey, the forum reminded the students that they have a voice in the final decision.

Brandee Carlson, student representative of the Board of Trustees, has a unique opportunity because her vote is equal to any trustee's. Carlson commented, "I place a high regard on students' voice and am open to any student input."

Carlson went on to say that she has been involved in the decision-making process.

From the solid pool of over 100 candidates, the committee is working on gathering possible replacements. Although there is no definite deadline, the decision should be made by the end of spring.

Despite the success of the recent Senior Dad's Weekend, a friendly debate arose as the panel pondered various ways to cut down on expenses. In attempting to create the most accommodating type of entertainment, audience members and the board suggested alternative possibilities.

Ideas such as holding a Family Weekend seemed to have the most positive feedback. Student leaders confirmed that no decision would be made without consultation of the student body through the use of surveys. Student body president Jen Turbiak also discussed the possibility of uniting with students of Saint Mary's, Notre Dame, and Holy Cross student leaders to form the foundation for monthly rotating meetings.

Turbiak stated she would like to "establish dialogue with leaders to handle communication in general." The first of the proposed informal forums will be held at Saint Mary's in January. Turbiak and other members are taking a pro-active stance while looking to improve student relations, communication, and shared ideas.

"Yes, we are separate schools," she stated, "but we do share common bonds. The morning consultation between Saint Mary's, Notre Dame, and Holy Cross student leaders is important to Notre Dame students, as well."

The receptiveness of board members was evidently appreciated by students in attendance.

Sophomore audience member Adrienne Sharp's comment to the group sparked applause as she complimented the program. "It's great to be able to say we have positive feedback from each other." Sharp's input was evidently appreciated by the board members.

health care services are also provided; all participants have been successful in receiving and maintaining their student loans until the completion of the program.

The arts, cold showers, and heat waves were a sharp contrast to the familiar environment of South Bend, and proved necessary adjustments for many volunteers.

"It's really taken about a year to get used to this place. At first I heard comments like 'Whitey,' but the people have grown accustomed to us and I've learned to appreciate aspects of the Jamaican culture that for so long bothered me, such as their laid back style," said Sutchliffe.

With five spaces opening up for next year, a large number of applicants are expected. A new position available to next year's applicants has been created to promote the sport of basketball throughout Jamaica.

A prospective candidate should have experience in coordinating athletic events and an interest—though not necessarily skills—in basketball. Information about the program is available can be found at the Center for Social Concerns.

"The program is definitely worth the sacrifices. I miss home and my friends and family very much, but as I get to know people better down there, and get more accustomed to the culture and the demands of my job, I realize how important this experience is for me," Murdy stated.

"I am gaining in self-confidence in ways I never could among the comforts of the states."

Accident continued from page 1

A volunteer firefighter was driving behind the pickup when he was driving. Cassel said, used his radio to get help. In addition, another witness with nursing skills pulled over and offered aid.

Marcus was trapped in the vehicle, possibly suffering sharp back pains. "No one wanted to move me because my back hurt so much," she explained, "but Mike sat with me until help came."

Half an hour later, after unsuccessful attempts to open her door, the Jaws of Life finally arrived. The top of the car was removed and Marcus was lifted out on a board. "I have no clear memory of anything between the actual crash and the moment when three firefighters surrounded me and lifted me out," Marcus said. "It was really scary." She was transported to Memorial Hospital for treatment, having pulled all the muscles in her upper back.

Cassel and the other three backseat passengers were helped out of the car by the Antigua emergency medical team.

CLC continued from page 1

"Obviously, the course is great; but you can't teach 50 of those seminars a semester."

The seminars were only two hours and 15 minutes long, and Howard explained of his meetings, noting that attendance had been high.

"Sometimes we had all 19, sometimes they even brought friends. I haven't seen the course evaluations, but I'll be surprised if the reception wasn't real positive," Howard said.

As for continuing the program, Howard told of a larger healthy lifestyles class created for the spring semester. Designed to include upperclassmen as well, he said that 75 of the class's 80 slots had already been filled.

"We decided to tackle issues important to Notre Dame students," Howard said, noting that two of the sections have specifically targeted alcohol abuse, eating disorders, perfectionism, and communication skills, but are among the issues they examine.

My adrenaline was pumping, so I didn't notice any pain until about five minutes had passed," Cassel said. He was later taken to St. Joseph's Hospital and diagnosed with a bruised kidney.

Freshman Pat Cosgrove received stitches for lacerations on the right side of his face, and Schultz's brother suffered temporary amnesia. Both were escorted to Mercy Medical Center.

The sixth passenger did not sustain any injuries. Despite the fact that none of us in the back were not wearing seatbelts because we were so cramped," Cassel stated. "Thankfully, we weren't seriously hurt." We were really lucky," he added.
Vampire cult breeds murder
By DAVID ROYSE
Associated Press Writer

MURRAY, Ky.
The five teen-age murder suspects were just lonely, some say, and their vampire role-playing games strictly innocuous.

"You had a group of kids that just wanted to be a part of something, wanted to belong," said Greg Duncan, sipping coffee at the Hungry Bear restaurant. "Some people are afraid." And they were later driven to kill, police say.

"People are talking about it," said Greg Duncan, sipping coffee at the Hungry Bear restaurant. "Some people are afraid." And they were later driven to kill, police say. Ferrell, Ms. Wendorf, Dana Ferrell, Dana Cooper, 19, of Murray and Scott Anderson, 16, of Mayfield are all accused of murder. Charity Keese, 16, of Murray was charged with being an accessory to murder.

The teens were part of a group that sucked blood from each other and believed they were vampires, police say.

Police say Rod Ferrell met the Wendorfs' 15-year-old daughter, Heather, when he lived in Eustis with his father. Ferrell, 16, moved back to Murray last year to live with his mother.

U.N. addresses WWW: Copyright protection
By ALEXANDER HIGGINS
Associated Press Writer

GENEVA
People surfing the World Wide Web, downloading songs and novels, could cost the music and publishing industries billions of dollars, say officials meeting here to see that doesn't occur.

The U.N. body that oversees the lucrative world of copyright and patent protection opened a three-week conference Monday, hoping to catch up with the sweeping changes caused by computers and the Internet.

The event was organized after it became obvious that something had to be done to protect authors' and performers' rights in a world where the latest song or computer program can be downloaded in seconds.

Delegates to the conference, organized by the 160-nation U.N. World Intellectual Property Organization, are working on the first major revision of international copyright law in 25 years.

They have three treaties to protect:
• Literary and artistic works.
• The rights of performers and producers of "phonograms," now most commonly Grand audio cassettes.
• Producers of data bases.

The biggest question to resolve is how to protect rights in an era when national borders have been made irrelevant by the Internet.

The conference is being closely watched by the music and publishing industries, who see fortunes at stake in an area that is difficult to regulate.

The negotiations "will have a critical impact on the future growth of the $40 billion global music business," according to IFPI, the International Federation of the Phonographic Industry.

Music delivery is still in its infancy on the Internet, but IFPI expects within five years it could take away 15 percent of the business from traditional record stores.

In Europe alone, that could amount to a $2 billion loss if the industry is unable to share in the proceeds, IFPI said.

The music industry is playing a leading role in the negotiations because its main audience — young people — are the ones surfing the World Wide Web and listening to or downloading songs.

Cuban parade honors Castro

By JOHN RICE
Associated Press Writer

HAVANA

Cuba staged its first military parade in a decade on Monday, celebrating the 40th anniversary of a guerrilla landing in Cuba that launched the victorious revolution led by Fidel Castro.

Weaving his olive-green military uniform, the 70-year-old Castro stood with other heroes of the 1959 revolution as hundreds of horsemen, soldiers and veterans of the uprising marched past a backdrop of anti-aircraft missiles, tanks and jet planes parked in Revolution Plaza.

Three MIG-29 jets soared overhead and revolutionary slogans howled from loudspeakers beneath a huge, outdoor portrait of revolutionary icon Ernesto "Che" Guevara: "Long live a free Cuba! Long live our commander in chief! Socialism or death! We will triumph!"

It was a modest display compared with those staged in earlier decades, when Cuba put on Soviet-style parades of machinery as well as men in motion. There were no speeches by Castro or other Cuban leaders Monday.

But the celebration was another message to Cuba's people that the country is slowly overcoming the economic crisis brought on by the collapse of its socialist allies. As Cuba's economy declined in recent years, parades and celebrations were cut back dramatically to save money.

Near the front of the parade were aging veterans from the 1956 landing of the Granma, a boat carrying 82 revolutionaries who trained for more than a year in Mexico to try to topple dictator Fulgencio Batista. The effort to oust Batista at first seemed a debacle. Security forces were tipped off and most guerrillas were captured or killed after the landing in eastern Cuba.

But 17 avoided death or capture, including Castro, his brother Raul and the Argentine Guevara. Within a month, a dozen rebels regrouped in the Sierra Maestra mountains, and by early 1957, they began attacking Batista's army. Aided by popular discontent with the dictator, the revolution culminated in triumph in Havana's streets in 1959.

Russian fears of NATO persist at OSCE summit

By ANDREW SELSKY
Associated Press Writer

LESBON, Portugal

Echoes of the Cold War reverberated through a cavernous meeting hall Monday as leaders from 54 nations opened a summit to build a new security arrangement for Europe in the post-Soviet era.

NATO expansion into Eastern European nations most likely will be part of the "security model" being created by members of the Organization for Security and Cooperation in Europe.

Russian Prime Minister Viktor Chernomyrdin said Moscow is "firmly opposed" to NATO expansion, and indicated Russia would consider itself threatened if neighboring countries join the North Atlantic Treaty Organization.

"If one common purpose is a single and peaceful Europe, can that really be achieved by the expansion of military alliances?" Chernomyrdin asked the OSCE delegates.

Chernomyrdin acknowledged that Russia could not prevent the Soviet Union's former Warsaw Pact allies from joining NATO. Moscow's old nemesis, but added that Russia retains its "right to defend our national interests." He did not elaborate.

Vice President Al Gore dismissed Russia's fears, saying NATO is "a defensive alliance of like-minded democratic states."

"As such, of course, it poses no threat to any other state," Gore said, adding that NATO wants "to build a strong cooperative relationship with Russia."

The OSCE, little known outside diplomatic circles, is a continent-wide organization that focuses on security issues, monitors human rights and tries to foster free-market democracy. It also is the only group that includes all countries concerned with European security, east and west.

German Chancellor Helmut Kohl said Russia must have a role in whatever European security agreement emerges.

Hey Mikey-This Bud's For You!

Meeting for Notre Dame Lesbian and Gay Students Group

Today, Tuesday, December 3

For time and location of meeting, call: 1-804

NDLGS Group Advisors: Fr. Tom Gaughan, C.S.C.
Sr. Mary Louise Gude, C.S.C.

All Meetings are private and confidential.
The Franklin Street synagogue series of reports that appeared excess in tributed to the relief effort. range of religious groups con­ said.encyclical for assistance contribution and issued an three days of prayer for the victims of the famine would be it would break protocol for him attempted to make a large serve to give a view as some of the most controversial donations surrounded Queen Victoria. Her donation of approximately $3,000 was viewed as insufficient but did serve to give a "royal seal of approval" to the practice of making contributions to relieve the Irish. When the Sultan of Turkey attempted to make a large donation, the limitations of the "seal" became apparent. The Sultan was convinced by British officials to hold back on such a large donation because it would break protocol for him to donate more than the queen. Pope Pius IX made a $1,000 contribution and issued an encyclical for assistance including the provision that three days of prayer for the victims of the famine would be worth a seven-year indul­gence. "Raising money for the Irish poor became a favorite leisure for the well-to-do," Kinealy said. Private groups in the United States donated in excess of $1 million following a string of requests for monies appeared in the American press. As a result of the media blitz surrounding the famine, a range of religious groups con­tributed to the relief effort. The Franklin Street synagogue in New York City and a slave church in Richmond, Va., were among the many religiously­ aligned groups donating. The "liberal donation from the slave church in Richmond was used by the American press to contrast the well-oppressed as slaves just ten years earlier. Another sharp contrast involved the $22 mil­lion that was awarded by the British government to the for­mer slave owners of the West Indians while they could only provide an interest bearing loan to the victims of the famine. The second lecture, delivered yesterday, was a three-part presentation. It was the first of six stops on the lecture tour sponsored by the Irish govern­ment to recall the calamity of 1845-50 that left almost a mil­lion Irish dead and to consider the enormous impact of the famine on the U.S. Minister of State of the Government of Ireland Avril Doyle introduced the speakers and served as a mediator for the afternoon presentation. "Half of the people born in Ireland today are emi­ grated," Doyle said. "While there are currently five million people in Ireland, there are 44.4 million of Irish descent in the U.S. Today 70 million in the Irish global Diaspora. The umbilical cord which ties us together has never been entirely severed," she con­ tinued. Kevin Whelan, visiting pro­fessor of history at Notre Dame and author of "The Tree of Life," pointed out that despite the fact that the Irish famine was "so well­documented" famine, its impact on the people cannot be deter­mined from that documenta­tion alone. Instead, Whelan suggested that an examination of the literature, art and folk­lore of the period is necessary. Whelan suggested that the famine could be compared to the Holocaus or the Middle Passage of the slaves because it too "Survived with nothing but their own primal existence." It was that conceived similar or apalling quality of the Irish people that seemed to exacer­bate the effects of the potato blight. Doyle said, the famine was an obstacle to the British goal of agrarianiza­tion. Luke Gibbons, professor of communications at Dublin City University and author of "Transformations in Irish Culture," spoke on the rela­tion ship between memory, his­ tory and politics. Concentrating on the laissez­faire principles of Anglo­American law systems imple­mented during the famine, Gibbons explained that this was one factor which allowed the devastation in Ireland to continue. He also noted that on the same day that The Nation newspaper called attention to the discovery of the blight, Frederick Douglas presented a lecture in Dublin. Douglas expressed his feel­ings that the famine could be com­pared to the situation of the slaves and drew a connect­ion between the huts of the rondale claches and the slave­ houses in which he once lived. "Famine is not an event, famine is a process," he said pointing out that a famine is not a natural disaster, but the result of human actions. So as such, political and economic practices of the British govern­ment should be seen as at least part of the cause of the disas­ter. All four speakers enhanced an understanding of the famine and the role played by the Keough Center for Irish Studies at Notre Dame was the final speaker, presenting an abbreviated version of his idea that the famine can be con­ nected to the hunger strikes of the 1980s. Deane said, "When they refused food they are not com­mitting an act of suicide, they are committing an act of insur­rection." Avril Doyle introduced the speakers and served as a mediator for the afternoon presentation. The final speaker, presenting an abbreviated version of his idea that the famine can be con­ nected to the hunger strikes of the 1980s is a political and economic practice of the British govern­ment. "Famine is not an event, famine is a process," he said pointing out that a famine is not a natural disaster, but the result of human actions. As such, political and economic practices of the British govern­ment should be seen as at least part of the cause of the disas­ter. All four speakers enhanced an understanding of the famine and the role played by the Keough Center for Irish Studies. Doyle extended an official thanks from the Irish government to Deane for his work in the field.

CASTING CALL
SATURDAY, DEC. 7TH, 12:00 P.M. TO 4:00 P.M. IUSB CAMPUS
Open Auditions for 15-minute independent film to be shot Dec, 20th-Dec. 22nd. Prior acting experience helpful but not necessary. Male and female roles age 18 and older. For more information contact Black Mantle Films, Inc. (219) 292-1716 or email slandry@indiana.edu

resnet & clusters update
Several major changes are on the horizon for campus computing. We in the OIT know that lines are long in the computer clusters and that students without access to ResNet have found it difficult to connect to the network via modem. We have tried to answer the challenge of providing productive resources for all stu­dents, which prompts us to make the following improvements. Please give us your feedback by sending email to cnetinfo@indiana.edu
Sorin and Walsh halls will be connected to ResNet early! Sorin and Walsh halls are being brought online earlier than scheduled. On December 3, 1996, these halls will be connected to ResNet. The ResNet connection was finalized after a great deal of hard work by the ResNet staff. Nonnetworked residence halls receive computers in the spring. In an effort to provide ResNet access to stu­dents in non-networked residence halls, com­puters will be placed in public areas in Flanner, Mortonay, and Howard halls. Macintosh and Windows computers will be available at the following times beginning in the Spring 1997 semester. Software on these computers will be limited to network software (e.g., email, Web browser, Usenet news­reader, FTP, and other), and a few other software (e.g., word processor, spreadsheet) will be available on these computers, so that they can be used primarily for Internet access.
Architecture reopen with Windows computers The Architecture computer cluster is scheduled to open in January, when the building renova­tion is complete. The cluster, which featured Macintosh computers when it closed in May of 1995, will reopen with 28 new IBM Pentium computers. The change from Macintosh to Windows computers was prompted by findings in the Architecture school's market research. The cluster is now located in the basement. The hours for the Architectural cluster will be similar to Hayes-Healy hours.
Hays-Healy cluster closing At the end of the Fall semester, the Hayes­Healy cluster will be permanently closed due to the building's renovation. The cluster cur­rently houses 42 Power Macintosh 7200 com­puters, which will be redistributed to other public access areas.
New cluster in Riley Hall A newly remodeled fine arts graphics lab in Riley Hall, room 211 opens in January and will contain 16 of the Hayes-Healy Power Mac. The Riley cluster, which is open to all students, will also contain a Sun SPARCstation and printer.
Existing clusters expand Macintosh count Several Macintosh computers that currently reside in Hayes-Healy will be added to the existing Macs of CCMR GR5 and Fitzpatrick clusters.
IBM computers upgraded All IBM computers in the campus computer clusters will be upgraded over Christmas Break. All classrooms and DeBarulu podia are included in the upgrade. The new computers feature 186 MHz processor, 32 MB RAM, 1.8 GB of hard disk space, 6x speed CDROM drives, 17-inch color monitors (first time ever).
I'd like to thank Buffalo Bills backup quarterback Todd Collins for giving the Colts the chance to stay in the wildcard hunt.

So, another Turkey Day has come and gone — another holiday of giving thanks to legendary ancestors of proportionally no one in the United States, celebrating an event which most likely did not occur, on a date deliberately chosen to create a Christmas shopping season — complete with all the Turkey Day traditions, such as: turkey (of course); potatoes, and more potatoes; cranberry sauce (of course); fruit cake (the best for last, watching two NFL games in television coverage of even more lame tradition despite the fact that nobody is interested); turkey (of course); potatoes, and more potatoes; cranberry sauce (which, like fruit cake, is a tradition made from squash); eggnog (the spice that makes baking holidays a total waste of time interrupted by the Senior Tour, but to have Yin Scully — a Dodger broadcaster who, despite the complete lack of both brains and personality, managed to get himself elected into the Baseball Hall of Fame — was a lengthy, televised golf tournament as an "exciting match-up" is simply silly. This comes complete with questions of "golf strategy," as if there's some sort of actually physical competition going on here. "Uhhhh...I'm going to hit the ball into the hole, Yin." For as yet unknown reasons, NBC loves to bombard its football viewers with melodramatic five-minute lead-ins of upcoming golf "matches," displaying a boring montage of slow motion "action shots" of various golf swings and puts, which aren't exactly in fast-motion to begin with."

"As yet unknown reasons, NBC loves to bombard its football viewers with melodramatic five-minute lead-ins of upcoming golf "matches," displaying a boring montage of slow motion "action shots" of various golf swings and puts, which aren't exactly in fast-motion to begin with."
Notre Dame Football: The Legends, The List
The Fighting Irish Football Encyclopedia

By DAN CICHALKS
Football Access Editor

It looks like you will not be able to get Dad those Firsta bowl tickets this year. Now what? Fathers can often be the toughest family member to buy for because many of them do not know what they want. If any research were done in this area, it would probably reveal that dads are harder to buy for than Bill Gates who, if he doesn’t already have everything, surely can afford to buy it all.

It’s time to find something else for Dad or any other Notre Dame football fanatic. An adequate substitute is "The Fighting Irish Football Encyclopedia." The second edition of the book was published this year by Sagamore Publishing in Illinois. Author Michael R. Steele is an English professor at Pacific University in Oregon and a 1967 Notre Dame graduate. In 1983, he published a biography of Knute Rockne and helped with the script for a Rockne documentary on PBS.

The 514-page tome contains every morsel of information about Notre Dame football from its "humble beginnings" in 1887 right up to the end of the 1995 season. There is more information here than any one person can know, except maybe Steele. "The Fighting Irish Football Encyclopedia" has the standard features of a sports reference book: season reviews, all-time rosters, statistics and records. But it presents these standards in a different manner and it has so much more that sets it apart from other sports and Notre Dame encyclopedias.

Another introduction by Ara Parseghian, Ed "Moon" Krause's foreword from the First Edition and Rocky Bleier's foreword for the Second Edition, the first chapter is entitled "The Place." While there are so many people across America and around the world who know about Notre Dame football, there are many who do not understand what "Notre Dame is all about," as we are fond of saying.

Peppered with a bit of Hillary Clinton's own political ideology, the book proves valuable not only for its realistic and knowledgeable approach to modern American problems, but also for the engaging personal anecdotes that Hillary Clinton has to tell about her own family, both the one she was born into as well as the one she shares now with the President. Though one might initially be interested in this book for the First Lady's ideas about family values, for these are so very important, she is more than an advocate for the importance of family for American children, or he, she might want to hear more personal anecdotes from the Clinton's own lives.

One of the funny stories that the First Lady tells about her family illustrates children's needs for undivided attention. Once, while Bill Clinton spent an afternoon with old daughter Chelsea, he was inoculated with phone calls. Holding Chelsea, the then governor of Arkansas juggled her arm to arm as he picked up call after call. Up through the years, Hillary Clinton herself grew up in a family with a stable middle-class home. Her family was one that "looked like it was straight out of the 1950s television sitcom "Father Knows Best.," and most of the people she "knew growing up had families remarkably like hers!" However, the knowledge Hillary Clinton has drawn from her research, as well as knowing and living with those who grew up in less stable lives (such as Bill Clinton himself, given his solid integrity, has to tell about her own marriage, but about nationwide issues such as separation of church and state, and what is being done or should be done to ensure it, it is more informative (than prescriptive, and expresses more reassurance than moral indignation. In the chapter about divorce, Hillary Clinton expresses her ideal wish that "every child has an intact, dependable family," but realizes that this wish will likely remain only a wish. She is realistic, however, when she talks about her own need to "like her own every once in a while to get through her marriage, but about nations that strengthen marriages and more important problems.

And with the ways Netscape and Internet Explorer keep advancing, chances are that soon enough you won’t have to touch URLs at all, with either your keyboard or a top pop. Even now, if you are smart, you rarely have to get your hands dirty with the actual typing of long URLs if you use a good browser.

There are some shortcuts you can take to make finding that elusive treasure of valuable information less daunting. If, after conducting a search for yellow polka-dot bikini, you come up with a URL like http://www.somesite.com/bikinis/yellow_polka_dot/bikini.html- and then find yourself with a "file not found" message—try this trick; try typing everything after the last slash (http://www.somesite.com/bikinis/yellow_polka_dot/) into your browser and you will find yourself on a page that actually exists. If not, you can keep deleting the file name and slash, working your way backward, until you hit something exciting.

As Web browsers become more sophisticated, the manner in which they are able find addresses becomes simpler and requires less typing. In Netscape, for instance, after you find the Apple Web site, try typing in just "Apple." Not only will the browser open the site on the desktop, it is also looking for any "http://www.apple.com" on your hard drive. If you are looking for the latest release of Netscape, for instance, you need to type only "http://www.apple.com/download/" and then you can pick from various versions release.

A more interesting group is the Best First Edition and Rocky Bleier's foreword for the Second Edition. There is more information here than any one person can know, except maybe Steele. "The Fighting Irish Football Encyclopedia" has the standard features of a sports reference book: season reviews, all-time rosters, statistics and records. But it presents these standards in a different manner and it has so much more that sets it apart from other sports and Notre Dame encyclopedias.

One of the funny stories that the First Lady tells about her family illustrates children's needs for undivided attention. Once, while Bill Clinton spent an afternoon with old daughter Chelsea, he was inoculated with phone calls. Holding Chelsea, the then governor of Arkansas juggled her arm to arm as he picked up call after call. Up through the years, Hillary Clinton herself grew up in a family with a stable middle-class home. Her family was one that "looked like it was straight out of the 1950s television sitcom "Father Knows Best.," and most of the people she "knew growing up had families remarkably like hers!" However, the knowledge Hillary Clinton has drawn from her research, as well as knowing and living with those who grew up in less stable lives (such as Bill Clinton himself, given his solid integrity, has to tell about her own marriage, but about nationwide issues such as separation of church and state, and what is being done or should be done to ensure it, it is more informative (than prescriptive, and expresses more reassurance than moral indignation. She is realistic, however, when she talks about her own need to "like her own every once in a while to get through her marriage, but about nations that strengthen marriages and more important problems.
Brad Otton leads second half rally as Trojans end era of dominance

By DAVE TREACY
Assistant Sports Editor

LOS ANGELES

After 13 years, the reign of terror is over.

Behind battered quarterback Brad Otton, the University of Southern California battled back from an eight-point deficit and zero offensive yardage in the third quarter to beat 10th-ranked Notre Dame 27-20 in overtime. Otton, knocked out of play in the first series of the game, returned to the field in the third quarter to tally 183 total yards and two touchdowns on 13-of-25 passing.

Last week against UCLA, Otton was forced to watch his team suffer its second overtime loss of the year.

It was not going to be that way Saturday night.

"I definitely knew I was hurt and where I got hurt," said Otton, who was suffering from bruised ribs. "But the worst I felt was last week when I had to come out and watch my team play without me in overtime. I wasn't going to let that happen tonight."

Otton engineered the final USC (6-6) overtime drive, completing all three of his passes, including a 5-yard toss to Rodney Sermons for the game-winning score.

"Brad Otton was courageous," Trojan coach John Robinson said. "A lot of things went against him this year. He never blinked, never gave up."

Notre Dame failed to reach the end zone with its ensuing overtime possession, with the game ending when USC linebacker Mark Casano knocked down Ron Powlus' pass on fourth down.

"This is an awful way to end the season," admitted Powlus.

"This is an awful way to end my career if we don't go to a bowl game. We wanted to send coach Holtz out right, but we didn't.

The Irish (8-3) controlled the game entering the fourth quarter. The Trojans offense did not ask for a chance to do so.

The Coliseum scoreboard (top left) tells the whole story, as USC quarterback Brad Otton is mobbed on the field after he did show the Trojans the way to go. Otton also grabbed the game ball for coach John Robinson.

The Irish offensive line did not ask for a chance to do so.

The Irish running game pounded its way down the field, as Robert Farrar and Audy Desson brought Notre Dame back into USC territory. 

The Los Angeles Times reported the morning after the loss that Athletic Director and king of Notre Dame's glass castle Michael Rossum would take over as Athletic Director and king of Notre Dame's glass castle Michael Rossum would take over.

And what did the Irish do? Just what you'd expect them to. They turned them down.

The Coliseum scoreboard (top left) tells the whole story, as USC quarterback Brad Otton is mobbed on the field after he did show the Trojans the way to go. Otton also grabbed the game ball for coach John Robinson.

The Irish running game pounded its way down the field, as Robert Farrar and Audy Desson brought Notre Dame back into USC territory.

The $1.3 million Fiesta Bowl bid with their devastating 27-20 overtime loss to hated rival USC on Saturday, the Irish were certainly downtrodden, and probably felt as if they would rather not play another game this season.

With virtually all but the three Alliance bowl games locked up by conference tie-ins this season and the Irish's 8-3 mark marring their appearance, it looked as if the last battle for the Irish was in fact put an end to a rather disappointing season.

But the Irish and their fans had forgotten about another loss less attractive suitor than the wealthy Fiesta or the equally rich Orange.

The $1.3 million Poulan Weedeater Independence Bowl.

The folks in charge of the Shreveport, Louisiana-based bowl game jumped at the chance the Irish didn't make the catch."

Otton's 5-yard TD pass to Chris Muller came four plays later, but the failed two-point conversion attempt kept Notre Dame in the lead, 14-12.

The Irish running game pounded its way down the field, as Robert Farrar and Audy Desson brought Notre Dame back into USC territory. 

see UNTIED/ page 2
UNosed from the history of this rivalry, Otton saw first-hand three winless years himself and heard plenty more about the other ten.

Now, Otton can tell others how he fought through his pain to ease the pain at his alma mater.

"It's been a frustrating year for all of us," Otton said.

"We wanted to be remembered as a Rose Bowl team, a national championship team, but we fell short of that. But we'll always remember the guys who beat Notre Dame and broke the curse. And that means a lot."
Fumbling and bumbling it all away

Bowl bid, Holtz's final game slips through Irish hands

By JOE VILLINSKI
Associated Press Writer

LOS ANGELES

Maybe Notre Dame's 27-20 loss to USC Saturday night wouldn't seem so bad if it wasn't the last regular season game of the year.

If a major Alliance bowl bid wasn't on the line.

If it wasn't head coach Lou Holtz's last game at Notre Dame.

If the Irish didn't proceed to humble the game away and render the season null and void.

But the loss was bad. Real bad.

The Irish were on course to end the year with a five-game winning streak, a perfect home record and a share of the Big East title.

But just like those fumbles, it all turned out to be his swan song at the Irish helm.

"It's like life," he said. "It's one you'll remember, one you'll carry with you for a long time."

If that's the case, it may explain why Holtz appeared to be in total despair as the USC sideline exploded in victory.

The game will not overshadow his career, but as Holtz admits, it will be a stigma.

The realization that he had just seen his last Notre Dame game as head coach appeared to be setting in at the post-game press conference.

"My guts feel like someone cut out my complete insides," Holtz said. "I never felt this low."

It seemed as if that was the consensus feeling.

To have the streak broken with me being a senior is the worst possible feeling I could ever feel," linebacker Bert Berry said in reference to the Trojans ending Notre Dame's game-winless string against the Irish.

Berry and the rest of the defense were put in bad situations the entire game due to turnovers.

By game's end, logging constant minutes on the field had taken its toll on the defense.

"Any time you have a turnover, it hurts the team," Berry said. "I've never seen a good team never have a good day to have one. A lot of the time, we were able to bounce back, but you can only bounce back so many times."

Receiver Malcolm Johnson's fumble en route to a score that had the Irish ahead two touchdowns may have been the biggest mistake.

After having coughed it up once, when he bobbed another punt at his own 12 in an attempt to make a fair catch.

Four plays later the Trojans trailed 14-12.

"I just lost concentration once, called for the fair catch," Rossum said.

"No concentration means no win."

"We should have won the game," Yard added. "We were an inferior team that made too many mistakes. I made too many myself."

The Irish could have sealed the victory had freshman Jim Sansson converted an extra point, potentially putting the Irish ahead by two scores with 4:39 left in the game.

With Powlus holding, the laces were upstairs and Sansson missed wide left.

"I know I let the fifth-year seniors down," Sansson said. "I need to grow up."

"I got the snap, put it down, and the guy with the facing side was Powlus," Sansson said. "Snap was fine. I think the kicker was fine."

Notre Dame will be less than fine now.

But does it have to be that way? Does the season have to end by two scores?

Powlus admitted later that the laces were sideways.

Notre Dame fans and possibly players as well to would have to grow used to the Trojans owning the Coliseum in the end.

It is exactly this kind of Notre Dame arrogance which nauvius turned to be setting ballclub viewers around the country violently against the Irish, and which led Notre Dame fans and possibly players as well to assume that in order to continue Notre Dame's miraculous hold over USC, all they had to do was show up against a 5-6 Trojan squad which had lost three straight games.

How far does this arrogance go? Consider the following example.

The Notre Dame club of Orange County decide to print up shirts for the game. The shirts didn't salute Lou Holtz in his last regular season game with the Irish, didn't pay respect to a storied rivalry. Instead, they sent an obnoxious message, loud and clear.

"We Own You," screamed the front of the shirt in black letters about as large as the lump in Holtz's throat following the game, which, ironically enough, the Trojans owned in the end.

One that would change theColiseum would be enough to humble Notre Dame, but to listen to Comments.......

"We're the Irish," screamed the front of the shirt.

"We're the Irish," screamed the front of the shirt.

"We're the Irish," screamed the front of the shirt.

It has that Holtz even told the players in the week prior to the game that it was either the Fieship, Fieship, or nothing for the Irish in the end.

So it looks as if it will be nothing.

But does it have to be that way? Does the season have to end without a bowl game?

It doesn't, and it shouldn't.

At the very least, this team still has something left to do this season.

Prove themselves.

So why not suck it up, swallow some pride, and take what you can.

Take what you deserve.

Break out the Weedesters, Irish fans, we're headin' down south.

Don't touch the Oranges on the way there, though. They're Forbidden Fruit, and tempting them may be, you have no right to them.
Tommy Trojan could finally ride off gloriously into the sunset, as USC snapped its 13-game winless streak against Notre Dame.

Wide receiver Emmett Mosley loses the ball in the first quarter after catching a 17-yard pass from Ron Powlus. USC linebacker Sammy Knight eventually recovered.

Sophomore Autry Denson celebrates after one of his many successful runs on Saturday night. Denson ran for a career high of 160 yards on 33 carries.

Irish defensive lineman Renaldo Wynn, shown here sacking USC quarterback Brad Otton, played a strong final game in an Irish uniform, recording 10 tackles.

GAME NOTES

Holder problem haunts Irish, Bowl prospects appear dim

By TIM SHERMAN
Sports Editor

QUESTION MARKS

Among the many question marks surrounding Notre Dame's shocking 27-20 loss to USC was the mysterious insertion of Ron Powlus as holder on extra points. Though Hunter Smith has held for Jim Sanson all season long and was perfectly healthy Saturday night, Lou Holtz opted mid-way through the game to insert Powlus as holder.

"He really kicked well with Ron," Holtz said.

He didn't after Notre Dame's third touchdown, as Sanson missed a vital extra point that turned out to be the game's deciding factor. Powlus admitted that the hold was bad, as the laces were pointing the wrong way. Sanson, though, was not offering any excuses. He could only blurt out in a very emotional state, "I let the fifth-year seniors down."

BOWLED OVER

The Irish lost out on a virtual lock as a Fiesta Bowl selection in Los Angeles. In the process, they cost the school upwards of $8 million dollars.

Though the Irish were eliminated from Alliance bowl contention on Monday during the Alliance's weekly conference call, they are still eligible for bowls such as the Aloha, Independence, and Copper Bowl.

Holtz, Irish players and Athletic Director Mike Wadsworth have all indicated that Notre Dame will not accept such an invitation. A representative for the Independence Bowl made it clear that the Irish are wanted, however.

"A Notre Dame-Auburn match-up would be great for our bowl."

EXCUSE ME

At his post-game press conference, Lou Holtz reminded those assembled that the team had no excuses.

He proceeded to give a few, though. The main excuse dealt with the inability of the Irish to practice outside in South Bend due to the frigid weather. The Irish, instead, practiced inside.

"I think not being able to do a lot of punting hurt us," said Rossum of the fumble that set up the tying touchdown.

STREAK SNAPPED

The loss snapped Notre Dame's 13-game unbeaten streak (12-0-1) against Southern Cal. It was also the first loss to the Trojans under Lou Holtz. "This game will go down as a classic in the rivalry," said Holtz. But the Irish were on the wrong end.

"I've never felt this low," admitted Holtz, who may have coached his last game for Notre Dame.

"I think not being able to do a lot of punting hurt us," said Rossum of the fumble that set up the tying touchdown.

Fighting Irish

That seven-one

At the end is two paragraphs explaining the weight training routine the team goes through and a list of miscellaneous, some of which have only a slight relation to football at Notre Dame.

The book concludes with every record imaginable in Notre Dame football history. Well, at least it was supposed to be football game history, for example, there are no figures that most sane people wouldn't consider.

The Encyclopedia is a valuable resource for anyone who wants to know the history of Notre Dame football. In four hours — and the other days in the sun of the southwest clockwork — the encyclopedia can be opened again and again to revive those feelings and memories that many who have witnessed a football event and experience that it is and that only we can truly know.

— Jason Huggins is a junior MIS major from Thousand Oaks, CA.

would go to one of their FTP sites: ftp://ftp20.etscape.com. Both Netscape and Internet Explorer make it possible for you to download files directly from their browsers, so you shouldn't have to deal with FTP too often, but it can be incredibly handy when downloading files from sites such as Purple Pages.

Another useful prefix is "gopher," developed at the University of Minnesota. (The Gopher is the school's mascot.) Gopher uses a menu-based system to tunnel through the Internet. The World Wide Web has made Gopher virtually obsolete, but there are times where you will run into a Gopher-like finding your grades and schedules at Notre Dame. A Gopher URL would look like this: gopher://gopher.edu, and usually will lead to a text-only site. Here's a look at the anatomy of a fictional URL: http://www. and.edu/~bolz/photovolume.html

http: = HyperText Transfer Protocol (the set of procedures that allow your computer to view documents with links and graphics)

//gopherservers folder and file names, just like in Windows or DOS)

www.: World Wide Web. Most of the time, this is the name of the computer you are connected to, while every Web site has "/" in its address.

nds.: Notre Dame (the folks to whom we pay $25,000 a year for free Internet access).

edu. = Universities and schools. Other common suffixes are: .gov (government), .com (commercial), .net (network), .org (organization).

-Boltz/:— is called a tilde, these usually represent a personal home page. "Boltz is zap!"

-Holtz/:— is called a slash, this site usually is the main home page. (http://www. and.edu/~bolz/photovolume.html

Encyclopedia

Life, liberty, and the pursuit of happiness. These are all promised to Americans in our Constitution. However, as everyone can attest to, happiness is not always easily attainable. Recently, scientists and researchers have found that the elated feeling that we have whenever we are on vacation or achieve our life's status is fleeting. Similarly, the pain and anguish that one suffers after a particularly devastating time in his life is also only temporary.

Psychologists are concluding that happiness is determined by an individual's genetic code rather than by external influences affecting a person. Thus, psychologists believe that no matter what uplifting experiences one goes through or what horrific hardships one endures, their predictable return to whatever happiness level is preset in his genes.

This so-called "happiness gene" is similar to the set-point concept in control of the body's weight. For years, scientists have claimed that the human brain seems to be wired to adjust itself to maintain a level of body fat up or down accordingly to maintain a certain preset weight accounted for by the human genetic code.

In the same fashion, researchers have recently made the claim that there is a set-point for happiness which is genetically controlled.

Thus, external factors have an individual's temporarily happy or sad, therefore, those who are genetically set to be gloomy will return to such a state even after such an uplifting experience as winning the lottery. Similarly, those who have a happiness set-point which adjusts them to a happy state will eventually become happy even after such a horrible experience as a divorce.

Psychologists think of the idea of a happiness set-point is a brilliant idea. In fact, Dr. Jerome Kagan, a developmental psychologist from Harvard University, claims, "It's clear that P.S. Blut is as nature born and Jay Jenno is congenitally upbeat."

Long standing research studies claim that money makes little difference in people's perception of their own happiness. Moreover, education, marriage, and a family also only have a minor impact on an individual's happiness.

Thus, psychologists argue that the effect on an individual's mood a few weeks after a job promotion or a break up with a boyfriend/girlfriend is only temporary. Studies show that the effect of people's moods by such events is very little after three months and is pretty much non-existent after six months.

The most common way to estimate how much of any treat is based on genetics is to study sets of identical twins. Such twins share their genetic code 100%.

Dr. Auke Tellegen, a psychologist from the University of Minnesota, claims, "There is a lot of interesting research on happiness, and there are studies that show that happiness can be easily dismissed as a political ploy to ensure future votes for future presidents."

Despite the seeming commercial and manipulative timing of the publication, "It Takes a Village" is strong enough to stand up on its own, against political attack, and the story is for the most part, written in a rosy light, they are never held up as a model for all of America to follow.

Hillary Clinton gracefully and humbly acknowledges that the stories she grew up with and experiences now. Though this book may be easily dismissed as a political ploy to ensure the Democrats also hold a platform on the successes and failures of the American family from a woman who has been living it and working for it.

Mavs outlast Orlando, 108-102

By FRED GOODALL
Associated Press Writer

ORLANDO, Fla.

Once the Orlando Magic really
lacked, there was no stopping
this team.

The Mavs rallied from a nine­
point deficit with 1:23 of regula­
tion remaining, then got seven
of their final 10 points from the
Miller to beat the Magic 108­
102 Monday night.

In the first quarter alone, the
buzzer capped an 11-2 run that
forced the Mavs to the bench.

The backup center, who signed
with an offer to sign with the Magic
season, made all three of his shots
in overtime and finished 6-for-6
with 13 points.

"Two minutes is an eternity
in the NBA," Mavs guard Jim
Jackson said. "You have a 24­
second clock and anything can
happen if you play defense and
that's what we did.

"Coming off a career-high 35­point
performance in a loss to Chicago, I
didn't think the Mavs had a chance
against Minnesota at halftime.

At that time, we immedi­
ately went to Methodist Hospital,
where he remained for two days
while undergoing precautionary
tests.

The problem occurred Satu­rday afternoon, in which he scored 34 points, his
second-best total this season.

"I was in good health and has a
very good heart," said the heart;
but his return to play was not
immediate.

I had the heart surgery on Bulla

Healthy Young leads Niners past Falcons, 34-10

By PAUL NEWBERRY
Associated Press Writer

ATLANTA
Steve Young flashed that look, and the San Francisco 49ers knew all was right with the world.

Young, fully recovered from two concussions and a groin strain that hampered him most of the season, ran and passed his way to a romp over the Atlanta Falcons Monday night, setting up an NFC West showdown with Carolina next weekend.

Young showed off his trademark running ability, sprinting for a couple of vicious hits for a few extra yards.

"I kept telling him, 'Man, why don't you slide sometimes?'" fullback William Floyd said.

The 49ers cruised to a 10-yard touchdown throw to Terry Kirby.

"He looked at me like, 'I'm Steve Young. This is the way I play.' When he gives you that look, you know everything is going to be OK," Young said.

Young had touchdown runs of 26 and 5 yards in the first half, threw a scoring pass on the 49ers' first possession of the third quarter and then spent the rest of the night on the bench. His final numbers were 23-of-30 for 254 yards passing and six carries for 43 yards.

"When I suit up now, I'm able to play the way I want to play and throw the way I want to throw," said Young, who has missed all or parts of eight games this season.

The 49ers cruised to a 25-3 lead at halftime on Young's two touchdown runs and four field goals by Jeff Wilkins. Young connected on five straight passes for 62 yards on the 49ers' first possession of the second half, capped off by a 10-yard touchdown throw to Terry Kirby.

After that, Elvis Grbac took over at quarterback, but Kirby returned to get the first 100-yard rushing game for the 49ers in nearly two years.

San Francisco (10-3) remained a game ahead of Carolina in the NFC West heading into next Sunday's game at 3Com Park. The 49ers are tied with Green Bay for the best record in the conference, though the Packers have the tie-breaker advantage by virtue of an early-season victory.

The 49ers scored on all six of their first-half possessions, running up and down the field for 342 yards. San Francisco averaged a staggering 7.4 yards per play before the break.

The 49ers have beaten the Falcons in nearly two years. He passed for 254 yards passing and six carries for 43 yards before Young sprinted in from the 5 on a quarterback draw with 41 seconds remaining in the half.

The 49ers missed the 2-point conversion, but they weren't through scoring. Bobby Hebert's pass was picked off by Dedrick Dodge at the Atlanta 39. Young completed two passes for 28 yards and scrambled for another 6 yards to set up Wilkins' 23-yard field goal as time ran out.

Wilkins also connected from 39, 26 and 43 yards in the first half, giving him 27-of-30 for the season.

Kirby went over 100 yards late in the third quarter — the first San Francisco player to reach that mark since Ricky Watters gained 105 yards against New Orleans on Nov. 28, 1994.

"He wasn't going to play anymore," Floyd said. "But when we found out he had 91 yards, we were like, 'Coach, let him go back in.'

Hebert, who had been completing more than 60 percent of his passes, was 10-of-25 for 113 yards with two interceptions. His low point came in the third quarter when he slammed into Jamal Anderson attempting a handoff, causing a fumble that San Francisco recovered.

Robinson remains head coach after dramatic win

By KEN PETERS  
Associated Press Writer

LOS ANGELES  
John Robinson’s month in coaching purgatory came to a happy end Monday with the word that he would remain as Southern California’s coach.

The announcement came two days after USC’s first win over Notre Dame in 14 years, and less than 24 hours after Robinson, university president Steven Sample and athletic director Mike Garrett met to talk about the football program.

“Our crisis ended last night. We decided, ‘Hey, we’re going to have some big-time years here,” Robinson said at press conference on the USC campus.

“We’ve been through hell, but we’ve come out the other side. And we’ve come out together,” Garrett admitted that he and Robinson had not talked enough over the past month, a period in which the Trojans lost three straight and speculation surfaced about the coach’s future. A upset victory over Notre Dame on Saturday night quieted Robinson’s critics and left USC with a 6-6 record.

“It’s often true in college football that one big victory can mean the difference between a coach keeping his job and losing it. Whether it was true in Robinson’s case, Garrett wouldn’t say directly.

“That game gave us a medium to talk,” he said. “If we had lost, that would have given us a medium to talk.”

Sample backed Garrett’s decision to retain Robinson, in part due to a much improved graduation rate of Trojan football players — 75 percent in 1996 compared to a national average of 56 percent.

“John Robinson’s overall record during the 11 years he has served as head coach at USC is remarkable,” Sample said. “The win-loss record will always be a factor in the post-season evaluation of a coach, but should never be the basis for precipitating a midseason termination.”

Whether the win over Notre Dame saved Robinson’s job or not, it did a lot for the Trojans, who had lost their sixth in a row, and the team expected to contend for a national title.

However, Robinson’s young squad, was overpowered 24-7 by Penn State in the season opener, and went on to develop a disturbing habit of fading in the fourth quarter. The Trojans blew a 17-point lead against UCLA.

When Brad Otton, the senior quarterback who was the heart of the offense, suffered rib and sternum injuries against the Bruins, that chance to save the season was effectively lost. And when Otton was carted from the stadium after a hard hit Saturday, it appeared Robinson’s job might be riding with him.

out to point guard Admore White at the top of the key. Though White had struggled from the field all night (11-11), he chose to try the desperation shot missed, bouncing high off the rim. Lalazarian thought the block was a bitch of a goal-tending violation and he let the officials know about it.

"Our guards provided a lot of offense tonight," Knight assessed. "Our Notre Dame's did not, and it proved to be the difference. Miller had six of just 10 Irish back-court points. The offensive load was just too much for Garrity to shoulder."

"I thought the turning point came at the 7:27 mark, with the score still 64-53. Garrity went up for a lay-up off a fast break, only to be blocked by Patterson. MacLeod, like most everybody else, thought the block was a goal-tending violation and he let the officials know about it. A technical foul was called, and IU converted both the free throws and a basket to trim the lead to 7."

"I just wasn't enough last night," MacLeod said. "He's a kid who has obviously worked like hell to be a good basketball player," Knight said of Garrity. "He is a bitch of a player. Right from the start, he was ready to play."

The Irish proceeded to add on to the six-point bulge, as Lalazarian provided a much-needed dose of instant offense. The 6-foot-10 kid who Notre Dame recruited hard, then took over, nailing two three-pointers in as many minutes as he almost redeemed himself in Garrity's stead, but the Irish didn't have a surprise (Lalazarian) working like hell to be a good basketball player. We're definitely making progress."

"Our offensive load was just too much for Garrity to shoulder. Though he finished the game 12 for 20 from the field and nine of 12 from the charity stripe, he was clearly fatigued at the end. "He was awesome in the first half (23 points) and tremendous in the early part of the second. He just got a little bit tired.""

In the end, no one stepped up in Garrity's stead, but the contest gave proof that the Irish are tougher than people gave them credit for, and maybe have a surprise (Lalazarian) waiting to blossom. "We're discouraged, but not discouraged," MacLeod said. "Our young players are proving they are capable of playing solid basketball. We're definitely making progress." It just wasn't enough last night.

"We're waiting to blossom. We're definitely making progress," MacLeod said. "Our young players are proving they are capable of playing solid basketball. We're definitely making progress."

Berticelli echoed Woods’ sentiments. “Maybe (the team’s) greatest accomplishment was the fact that they set a new standard,” said Berticelli. “Next year there will be higher goals and higher expectations.

The seniors, who have now played their final game in a Notre Dame uniform, have plenty to be proud of themselves.

“The seniors have accomplished things that no class had done before them,” said Berticelli.

Among many other accolades, they have won three conference championships in two different conferences and qualified for the NCAA tournament in three of their four years.

The 1996 squad erased the disappointment of 1995, and boosted the Irish into everyone’s list of teams to be reckoned with in the years to come.

So while all good things must come to an end, that sentiment may only be temporary for Notre Dame soccer.

Happy 20th Birthday, Tricia!

Love,
Your Best Friends - EVER!

This ad was designed and submitted by Scott Falvey of The University of Notre Dame.

Freshman Alan Woods just missed a second half goal, but his header was cleared off the goal line and Charlotte went on to win the game 1-0.
Final Four continued from page 24

Benola had a spectacular shutout performance, registering three saves for the team. Notre Dame outshot Maryland 19-7. "The outstanding performance came from the defense," said Petrucci. "Benola did good for us. It is nice to win a game with our defense. You need defense to win a championship."

"It was an overall team defense," said Sobrero. "We worked really hard individually, and played as a team."

Two Irish players have received honors. Senior Cindy Daws and Manthei were named finalists for the 1996 Hermann Trophy. This award recognizes the top player in collegiate soccer. Both Daws and Manthei were finalists in 1995.

Daws can boast being Notre Dame's all-time leading scorer. She is a two-time All-American, first team all-Big East selection, and Big East tournament MVP. Manthei broke the women's college soccer record for assists in a season with 43 so far. She, too, is a first team all-Big East selection and currently holds Notre Dame's all-time assists lead with 94.

With this victory over Maryland, the Irish watched their record soar to 23-1-0. "It was an overall team performance," said Sobrero. "We need defense to win a game, but that left Rosanne or Beth open. The defense is very strong outside and we're such a good team."

"We have to take over the game from the beginning," said Gaither. "Opposing teams see our No. 9 ranking and they are motivated more by that. Luckily against Georgia Tech, our defense carried the look of the game. Our defense wins at the rest of the season for us." Once again, it was Morgan who led in with a double-double and the Yellow Jackets with a fabulous 7-7 from three-point land that led to her a 29-point game. Bohman had 10 of her own.

"It seemed like they did double-team me a lot, even triple-team me," said Gaither. "But that left Rosanne or Beth open. Beth is a very strong outside shooter."

Notre Dame freshman Neile St. Mary's was led offensively by sophomore Clara Morgan, who scored a school-record and single-season high 40 points against Ohio, on 17-for-22 shooting, has been particularly strong. Ohio was no easy foe, however. The Bobcats knocked down eight of 10 three-pointers in the first half alone, shooting 62 percent from the field. "He's a very strong outside shooter..."

Senior All-American Clara Morgan beat Jackets last week, the Notre Dame native outscored Ohio, 10-3, in the first half alone, shooting 62 percent from the field. "While Gaither was the star, it was Morgan who kept the Irish in the game when the Bobcats threatened to blow it wide open. Morgan had 17 first-half points that included a jumper which finished a late 11-5 Irish run."

The ninth-ranked Irish (6-1) appear indomitable at this stage of the season. Gaither who scored a school-record and career-high 40 points against Ohio, on 17-for-22 shooting, has been particularly strong. Ohio was no easy foe, however. The Bobcats knocked down eight of 10 three-pointers in the first half alone, shooting 62 percent from the field. "While Gaither was the star, it was Morgan who kept the Irish in the game when the Bobcats threatened to blow it wide open. Morgan had 17 first-half points that included a jumper which finished a late 11-5 Irish run."

The senior All-American picked up where she left off in the next game against the Lady Yellow Jackets. Georgia Tech was hammering the Irish early on and took a 42-28 lead into the locker room. "We have to take over the game from the beginning," said Gaither.

The Belles face Beloit tonight at 7:30 p.m. at the Bultman Classic. The Belles have won five straight and are motivated by that. Luckily against Georgia Tech, our defense carried the look of the game. Our defense wins at the rest of the season for us." Once again, it was Morgan who led in with a double-double and the Yellow Jackets with a fabulous 7-7 from three-point land that led to her a 29-point game. Bohman had 10 of her own.

"It seemed like they did double-team me a lot, even triple-team me," said Gaither. "But that left Rosanne or Beth open. Beth is a very strong outside shooter."

Notre Dame freshman Neile St. Mary's was led offensively by sophomore Clara Morgan, who scored a school-record and single-season high 40 points against Ohio, on 17-for-22 shooting, has been particularly strong. Ohio was no easy foe, however. The Bobcats knocked down eight of 10 three-pointers in the first half alone, shooting 62 percent from the field. "While Gaither was the star, it was Morgan who kept the Irish in the game when the Bobcats threatened to blow it wide open. Morgan had 17 first-half points that included a jumper which finished a late 11-5 Irish run."

The senior All-American picked up where she left off in the next game against the Lady Yellow Jackets. Georgia Tech was hammering the Irish early on and took a 42-28 lead into the locker room. "We have to take over the game from the beginning," said Gaither.

Injuries plague Belles

By ANGELA OLSEN
Saint Mary's Sports Editor

A healthy team roster is the number one thing on the Saint Mary's basketball team's Christmas wish list this year. With nearly the entire team suffering from injuries, the Belles are in need of help.

The lack of healthy players contributed to the Belles 72-46 loss to Hope on Tuesday and the 81-58 loss to Beloit on Saturday.

"We could play with these people, but we were so short handed," said sophomore Charlotte Albrecht.

The ailments plaguing the Belles include tendinitis, torn knee cartilage, shin splints, bronchitis, and strep throat.

"We are not 100 percent," said Albrecht. "Everyone is half of what they should be." Against Hope the Belles were led by a solid all-around effort by junior Darcy Nikes. Nikes was 8 of 16 from the field, 3 of 4 from three point range and 3 of 6 from the line. Nikes finished the day with 22 points. Defensively Nikes pulled down seven rebounds and led all players with six steals.

In Saturday's game against Beloit, the Belles found themselves trailing 47-24 after the first half. Saint Mary's came out stronger in the second half and scored the same amount of points (34) as Beloit. However, this did not help the Belles overcome the 12-point deficit. Beloit was also able to capitalize on the Belles' lack of height and out-rebounded them 42-31.

Saint Mary's was led offensively by senior captain Marianne Matho and sophomore Nikki Griffen with 14 and 13 points respectively.

The Belles face Calvin College tonight at 7:30 p.m. in their fifth consecutive road game.
Out-of-conference woes continue to plague Irish

By JOE CAVATO Sports Writer

The Notre Dame women’s volleyball team has had several Achilles heels this season as they remain winless against ranked foes and have come down with a seemingly endless rash of injuries. Both were in effect in California as head coach Debbie Brown, who must think her team is cursed, saw the team drop two matches in the Pac-12 during their trip out for the year and as May dislocated her pinkie finger before their trip out which obviously helps their hitting.

Some of their struggles have been due to injuries as Angie Harris and Jen Rouse are gone for the year and Carey May missed the first half of the season. Head coach Debbie Brown must think her squad is cursed as May dislocated her pinkie finger before their trip out West. In practice, May collided with sophomore Lindsay Treadwell as both attempted to fill in for May in Treadwell as both attempted to fill in for May in West. In practice, May collided with sophomore Lindsay Treadwell as both attempted to make a dig. Her status is day-to-day, but she was sidelined for both the Washington State and Pacific matches.

“We really struggled this weekend and didn’t play really well,” Brown expressed. “I think the mental toll of Carey’s injury was evident.”

Problems for the Irish cannot be pinpointed solely at the setter position, as Washington State and Pacific became the second and third teams to hit over .300 against Brown’s squad this season.

“I think that both Washington State and Pacific did things that we’ve wanted to do all year,” Brown stated. “They made us earn our points and didn’t hit the ball out which obviously helps their hitting.”

The team had to make adjustments to Stettin, which probably had an affect in the match. May missed the first three matches of the season with a dislocated shoulder. During that span, Lee filled in admirably and earned the Big East player of the year award for her ability to switch from hitter to setter and back to hitter. With hitter Angie Harris not expected to return this year, Coach Brown didn’t want to lose Lee’s hitting prowess on the outside.

“I played Lauren because we had gotten into a rhythm and I wanted to change as little as possible and moving Jaimie would have shaken thing up even more,” Brown explained. “I was surprised to get the chance to play even through Carey was injured. Usually Jaimie would play,” commented the freshman who was thrown into fierce competition against the 11th ranked Cougars and 12th ranked Tigers.

She got the team out of the gates quickly, as they jumped out to a 4-0 lead before State came back with vengeance to take the first set, 15-7. Lee took over for Stettin in game three but Stettin returned to start and finish the match against Pacific. In that consolation match, Stettin racked up 49 assists and just one ball-handling error.

“I was excited and fired up to help out the team the best way I could,” Stettin continued. “I always nerve racking playing a highly ranked opponent, but in any situation I think I would have been nervous because I haven’t had game-time experience at setter.”

“I think Lauren played very well for us. I think our passing broke down more than our set,” Brown stated.

Against the Cougars, senior Jen Briggs who has taken Harris’ shot on the outside, led the team with kills with nine on .179 hitting. Before moving to setter in game three, Lee tallied eight kills on .238 hitting. Against the Tigers, Lee turned in a terrific performance in a losing effort. She racked up 20 kills on .271 hitting as well as having 17 digs and a pair of aces. Since returning to her natural hitter position on October 5, Lee has led the team in kills with 201 over 18 matches, which is good for a .333 kills per game.

Senior captain Jenny Birker continued her assault on the Irish record books as she had 15 kills on .400 hitting. She now moved into second on the all-time dig list with 1,324.

Freshman Mary Leffers worked the net for five blocks which give her 147 on the year. She is now just four shy of becoming the fourth Domer to total more than 150 blocks on a season. Her average of 1.41 blocks per game ranks fifth best in Irish history just behind Mary Kay Walker (1985-88). Brown is hoping May will be back in action in the NCAA tournament this Wednesday against Hofstra.

Junior outside hitter Jaimie Lee turned in two solid performances over the weekend, but the Irish were unable to pull off a win.

Defending champs head to Final Four once again

Notre Dame shuts out Maryland, advances to face Portland in semifinals at Santa Clara

By KATHLEEN LOPEZ
Sports Writer

The unpredictable weather of South Bend has once again caused mayhem. The top ranked women's soccer team's post-season play has been plagued by wind, rain, sleet, and snow, but the games have still gone on. Unfortunately, the Irish had to make a change of plans this past weekend.

The rain left standing water on Alumni Field, forcing the Irish to change venues. They took on the No. 13 Maryland Terrapins at Saint Mary's soccer field, and despite the unfamiliar surroundings, came out victorious in the end, 2-0.

"When you are in a quarterfinal of the NCAA tournament, it is supposed to be a close game," said head coach Chris Petrucci about the low scoring game.

"No, definitely not," said junior Kate Sobrero about whether or not the low score will affect the team's mentality headed into the semifinals. "We were playing in harsh weather. It was mentally tough. The cold kind of got to us."

The majority of the action took place in the first half of the game, with both goals coming in the first twenty minutes. Sophomore Monica Gerardo netted the first goal for the Irish off of junior Holly Manthei's pass. Around four minutes later, Gerardo ignited another offensive strike. Looking for another goal, Gerardo drilled a shot, which Terrapin keeper Maxy Price deflected. Freshman Jenny Stroffer caught the rebound and drilled it straight at the post. Then she caught the her own rebound and secured the 2-0 victory.

"I really do not think that it does," said Gerardo about the game affecting their mentality. "I don't think that it will hurt our confidence at all. Our defense played really well, and we scored when we had our chances."

In every contest, outstanding performances are given. The defense really sparked the Irish, and boosted them to victory. Solidifying the back, were senior Kate Faber and Sobrero. Playing the crucial position of sweeper was freshman Jen Grubb. Calling the shots from the goal was senior Jen Renola.

The Irish were led by Pat Garrity, who scored 36 points, but dropped a close decision to IU, 76-75.

MEN'S SOCCER

Irish season ends in second round

By BRIAN REINTHALER
Sports Writer

All good things must come to an end.

A thrilling season for the men's soccer team, which saw the Irish finish the regular season with a record of 10-6-2, win the Big East Championship by knocking off Georgetown, Connecticut, and Rutgers, and upset the second-ranked UNC-Greensboro Spartans on the road in the first round of the NCAA's, they finally fell victim to the dreaded cliche on Sunday in Charlotte, as they dropped a 1-0 decision to the 49ers.

"I just told our guys how proud I am of them," said Notre Dame head coach Mike Berticelli of his post-game discussion with the team. "People counted us out and we continued to battle. We finished the season by playing four nationally ranked teams and won three — and could have very well won the fourth."

Despite allowing 11 shots in the first half and registering just two of their own, the Irish were able to hold UNC-Charlotte scoreless. The extremely wet field conditions apparently caused some early problems for the Irish:

"They (Charlotte) adjusted to the conditions better in the first half," explained Berticelli. "We were trying control the ball too much and when we played the ball on the ground, it kept getting stopped by puddles or mud. They were knocking long balls in behind our defense and taking advantage of defenders slipping to create opportunities."

Goalkeeper Greg Velbo was outstanding as usual in the opening period, making seven saves, two more than his career-high for an entire game (which he set last weekend against Greensboro). Velbo

MEN'S BASKETBALL

Hoosiers escape Irish scare

By TIM SHERMAN
Sports Editor

By now, no one doubts Notre Dame power forward Pat Garrity. He is very much a proven commodity. The question marks surrounding his supporting cast, though, are substantial.

The Irish answered a few of those questions in a positive fashion last night at the sold-out Joyce Center, but it wasn't enough, as Indiana prevailed in a heart-stopping 74-73 contest.

Coach Garrity answered those questions in a positive fashion last night at the sold-out Joyce Center, but it wasn't enough, as Indiana prevailed in a heart-stopping 74-73 contest.

"I really thought, coming in, that we'd be very lucky to escape," said Hoosier coach Bobby Knight. "I was right."

Knight admitted that Notre Dame outplayed his IU squad for much of the night, but the difference came in the final minute.

Hoosier guard Neil Reed, who finished with 21 points, nailed a three-pointer to put IU in front 74-73. It was their first lead since half-time.

Garrity answered by scoring two of his game-high 26 points from the free-throw line and regained the lead for the Irish.

But it was short-lived, as forward Andrae Patterson scored with 19 seconds left on a tough turn-around to give the Hoosiers a one-point edge.

Notre Dame would have their chances to win the game.

Coach John MacLeod designed a play where guard Peter Miller would get the ball with the option to shoot or go down low to Garrity. Miller, though, was defended well and kicked the ball out to Reed, who buried the three.

The Irish were led by Pat Garrity, who scored 36 points, but dropped a close decision to IU, 76-75.
