Better relations between campus, community equal more involvement

By MATTHEW LOUGHRAN

Welcome to South Bend reads the sign at the city limits. This sign marks the boundary between South Bend and the rest of St. Joseph County, and it is a full mile from Notre Dame, Ind., which houses the campuses of the University of Notre Dame, Saint Mary's College and Holy Cross College.

Constant expansion of both communities has resulted in almost no physical distance between them. Even though, in the eyes of some students, proximity has done little to bridge the psychological gap between the residents of the two areas, both have always had close administrative ties.

"We have always had a good relationship with the governing people of the area," said Father Edward Malloy, current president of Notre Dame. "There is a cooperative spirit in our dealings with the county commissioners and city councils. We have also been fortunate to have good mayors in both South Bend and Mishawaka for a long time."

Both use these ties to try to bind themselves together in other ways for the mutual benefit of both entities.

"We have played an instrumental role in the community," said Malloy, who was appointed to the post upon Father Theodore Hesburgh's resignation in 1987. "Many of our officers have served on the St. Joseph Hospital Board, the Mishawaka Hospital Board and the board of directors for the Chapin Street Health Center [the St. Joseph's Medical Center]."

"It was during Hesburgh's 35 year term as president that the Studebaker plant, which provided a large portion of the employment for the community, went under. Hesburgh sees the resulting economic shift towards the University as evidence that South Bend has equally benefited from the support of Notre Dame's administration."

"Ever since the exit of Studebaker, we have been the largest employer in the area," he said. "We have worked for economic development within the community. A broad base of small businesses has replaced and even surpassed the large business that disappeared."

Notre Dame employs 3,901 people, while the next largest employer, the South Bend Community School Corporation, has a staff of 3,200 local residents. "That is the single most important relationship that we have with the community," said Malloy. "The community members get stable wages and good employment. It gives them a chance to work and be remunerated in a more meaningful way."

Members of the community have also played a role in the financial situation of Notre Dame University. "Our first drive to build the original wing of the Studebaker Museum (in 1953) brought in $20,000 from the community of the $1 million needed to complete the project," Hesburgh said. The Joyce Athletic and Convocation Center, built in 1968 and named for Father Edmund Joyce, executive vice-president during the Hesburgh administration, cost $8.6 million to build, more than $1.8 million of which was raised from the St. Joseph Valley Alumni Club and from the areas around the University.

Notre Dame, with its network television exposure and its nationally-ranked sports teams being a large amount of tourist money to the South Bend community. The Notre Dame ranks as the number one tourist attraction in South Bend, followed by the College Football Hall of Fame and the Studebaker Museum.

"Our relationship with the leaders in the business community has always been good, especially with the amount of visitors that come for the football games," said Malloy.

Notre Dame loses law student to heart failure

By HEATHER COCKS

A third-year Notre Dame law student died yesterday afternoon following his collapse in LaFortune Student Center.

Joseph Ciraolo, 25, went into cardiac arrest while seated in a corner of The Huddle. Witnesses reported that he slumped out of his motorized wheelchair and seemed to stop breathing as he lay on the floor.

A nearby student called for medical help at approximately 5:00 p.m. and two fire trucks responded shortly thereafter. Paramedics treated Ciraolo on site, administering CPR for 20 to 25 minutes before an ambulance carried him to St. Joseph's Medical Center, where he was pronounced dead.

"It's real sad," murmured a Huddle employee as Ciraolo was carried out. "He was a real sweet kid."

David Link, Dean of the Notre Dame Law School, knew Ciraolo well, having taught him over the three years of study.

"He was a great guy. He loved studying law, and he loved being at Notre Dame," Link said. "It was kind of his dream to be here."

Ciraolo suffered from soft-tissue disease, which was a catalyst for his continuous diac difficulties. Link confirmed that medical problems were a frequent occurrence throughout Ciraolo's life.

"His heart gave him problems a year ago," Link reported, "and he took a short leave of absence. But he came back and kept fighting hard, kept working."

A resident of Fischer Graduate Residences, he earned an undergraduate English degree from Canisius College and belonged to the Sigma Phi Epsilon fraternity.

Professor Patricia O'Hara, vice president of Student Affairs, and assistant vice president for Residence Life, Bill Kirk chose to accompany Ciraolo to the hospital and assisted in notifying his family.

"Joe really fit the spirit of this place," Link said. "He was at some disadvantages, but he never let things get in his way.

"He taught us a lot. Joe added a lot to the Law School," he continued.

**COMMENCEMENT TICKET REQUEST RESULTS**

As of April 18, students who will participate in the May 1997 Commencement Ceremony, and who have indicated the number of tickets requested (up to a maximum of four) on the Commencement Ticket Request form, will have those requests honored. Because of the high demand for the maximum number of tickets, any requests turned in after April 18 cannot be guaranteed.

Commencement tickets are given to each graduate by the university, but may not be transferred for a consideration (including, but not limited to money, gifts, property). Violation of this regulation may mean you will not be allowed to receive or retain any commencement tickets.

**TICKET DISTRIBUTION**

Tickets will be distributed in Room 117, Cushing Hall Auditorium, on Thursday and Friday, May 15 and 16, 8:30 a.m. to 4:00 p.m. You MUST bring your cap and gown receipt and your ID with you to pick up your tickets.

**COMMENCEMENT INFORMATION ON THE WORLD WIDE WEB**

Please note that graduation information, including ticket request results, is available on the World Wide Web at http://www.nd.edu/~nereg/gradinfo.html

**STUDENT SENATE**

Despite cuts, Student Union gets sizeable budget

By DEBRA BETCHER

As of April 18, students who will participate in the May 1997 Commencement Ceremony have indicated $42,000 less than last year largely because of diminished sales of The Shirt. Half of the proceeds from The Shirt sales combine with student activity fees to fund the Student Union, senators were told.

Budge5 for the Office of the Student President, the Student Union Board, Hall Presidents' Council and other programming organizations were significantly lower than last year.

After submitting the budget for approval, Arrien fielded questions from the floor on ways to handle the projected budget deficit. Arrien noted that only the general clubs and organizations fund had received a greater sum than last year. And nonetheless, the total allotment was $751,000 in requests it had received.

"The money is tight," assistant treasurer Ryan Harding admitted. This year, there was $43,000 less than last year largely because of diminished sales of The Shirt. Half of the proceeds from The Shirt sales combine with student activity fees to fund the Student Union, senators were told.

Budgets for the Office of the Student President, the Student Union Board, Hall Presidents' Council and other programming organizations were significantly lower than last year.

After submitting the budget for approval, Arrien fielded questions from the floor on the procedures and reasoning the financial management board had used to divide up the money.

In discussion, the senators noted that only the general

the clause would be a key step in reducing the level of homophobia at Notre Dame.

"The atmosphere for gays, lesbians and bisexuals on this campus is slowly improving; but still has a long way to go," Griffin said. "An important step in this process is for the offices of the University to make a stand and say, 'It is wrong for students, faculty or staff to discriminate against any individual simply because of their sexual orientation.'"

Nass said his decision to take a stand on the issue resulted from hearing the concerns of the students.

"It [homophobia] is a real problem on campus," he said. "We're interested in taking steps to alleviate the problem."

Nass also pointed to the nature of the campus community as a reason to endorse the clause.

"The Notre Dame family is about inclusion, not exclusion," he said. "Not including sexual orientation in the clause alienates certain members of our community."

"Statements by the University that it doesn't condone homophobia really don't mean much unless it takes concrete and visible actions to attack the problem," Nass continued. "The clause is the perfect example of where the University can take such action."

At the Campus Life Council meeting April 14, Morrissy Hall senator Matt Seaborn introduced a resolution that called for the office of Student Affairs to establish a timeline to make a decision on the clause.

"I'm not sure the University's decision to approve the non-discrimination clause is the perfect atmosphere for gays, as a traditionally oppressed yet culturally rich people. Many of the history classes I have taken are concerned with the history of Eastern Europe.

"I'm not Polish, but I took a Polish history course, and it really interested me," Buckley explained.

Buckley's decision to apply to study in Poland was also a practical one. He figured that applying to a more popular program, like Mexico or France, would have involved stiffer competition.

"Poland is obscure enough that I have a shot at it," Buckley said. Only 24 Notre Dame students applied for Fulbright grants this year.

Information on the Fulbright Scholarship is available at the Institute for Scholarship in the Liberal Arts, 102B O'Shaughnessy Hall.

Nationwide student group supports rally

Special to The Observer

In light of recent controversy over Notre Dame's non-discrimination clause, the National Association of Students at Catholic Colleges (NASCU) has announced its support for the efforts of students organizing Thursday's rally on the steps of the Main Building.

NASCU was formed at The University of Notre Dame in 1983 and has spread nationwide to over 200 schools, maintaining its headquarters at Notre Dame.

The group cites its main objective as being "preserving the rights of students to..."

Sociology 101: The Internet?

Norris outlines impact of Web on interactions

By SARAH CORKREAN

Gone are the days of writing pen pals and sending photos back and forth to one another. With the advancement of communications and the Internet, Jim Norris, an adjunct professor of sociology at RSB, noted communicating with pen pals in the future will be done via live computer screen while conversing with one another.

Noting the implications of the Internet has not only sociological but also economic and political implications, Norris believes these implications are due to the fact that nobody governs the Internet. With no guidelines to abide by, Americans must use their own discretion in deciding what to allow their children to view on the net.

Speaking to the Saint Mary’s Sociology Club, Norris reviewed the historical landmarks that have advanced the world of communications and the social implications the Internet has introduced to society.

Reviewing the history of the Internet, Norris noted that in 1964 the Internet was in its infant stage. As computer companies uncovered more technology, more information was made available to users. Norris noted the most important sociological advancement was the 1992 presidential ticket of Clinton and Gore. In their campaign they emphasized their goal of getting everyone connected to the information highway. The presidential ticket made aware the potential communication power of the Internet.

"People began buying modern computers in '95 like they were going out of style," said Norris. "Taking into consideration the surge in computer sales, it is easy to understand why the year two-hundred-twenty million households use the Internet and by the year 2000, forty million households will be active users." Addressing the larger question of what social implications the Internet will have on society, Norris noted if used for the right educational, entertainment, and business functions, there is an enormous world of information from other parts of the world that we have only just begun to uncover.

"You literally can find anything on the net," said Norris. "The danger of working with the Internet is that young children have access to pornography. But with proper proposed legislation that would ban pornography, the Internet will not hinder, but benefit society."

"If used properly, the Internet will benefit the lives of many people in ways we cannot even yet imagine," said sophomore Johna Indricho.

In a few years, Norris believes random polls will not be taken by communication companies to ask how many people are using the net. Rather, the Internet will be considered an equal to the telephone, a communication device that everyone uses.

"In this day and age, people have to know what is going on in the world of communications," said Norris. "If one does not keep up with the latest technology, they may find themselves jobless and struggling to do daily tasks such as grocery shop and order food on the net, which will be considered a normal daily activity in American lives."

Overall, Norris noted the Internet will pull the world closer together with live picture communication screens.

"By being able to see each other on the same TV screen, we have access to pornography. But used properly, the Internet will pull the world closer together with live picture communication screens."

The Observer/Megan Welsh

Mental illness has warning signs, too.

Withdrawal from social activities. Excessive anger. These could be the first warning signs of a mental illness. Unfortunately, most of us don’t recognize the signs. Which is tragic. Because mental illnesses can be treated. In fact, 2 out of 3 people who get help, get better.

For a free booklet about mental illnesses and its warning signs, write or call National Mental Health Association P.O. Box 17389, Washington, D.C. 20041 1-800-969-NMHA.

Police arrest Texan terrorists

FBI surveillance teams nab Fort Worth bombers

By CHRIS NEWTON
Associated Press Writer

DALLAS

Four people plotted to bomb a natural gas plant to kill police and divers attention while they robbed an armored car outside a bank, federal authorities said Wednesday.

Three men and a woman were arrested Tuesday in Fort Worth and in Boyd, 41 miles northwest in rural Wise County. U.S. Attorney Paul Coggins declined to say whether more arrests were anticipated.

The FBI refused to discuss the suspects’ ultimate aims or comment on reports that they had ties to white supremacist groups.

FBI agent Robert Garrity said the suspects had been under surveillance for about six weeks after officials received a tip from an informant.

According to an FBI affidavit, the group planned to blow up Mitchell Energy & Development Corp.’s natural gas processing plant, about 15 miles from Boyd.

The suspects also planned “four or five” secondary explosions timed to kill law enforcement officials responding to the initial blast, Garrity said.

The targeted tanks contain hydrogen sulfide, a substance commonly referred to as sour gas, and is fatal in significant concentrations, Garrity said.

“We know they believed that if their plan was successful, they anticipated they might wipe out half of Wise County,” he said.

As the bombs went off, the group planned to rob an armored car as it pulled up to a bank in Bridgeport. The plot was to unfold May 1, when the suspects believed the armored car would be carrying the most money, Garrity said.

“The purpose of the armored car robbery was to gain funds that they could use to continue in their terrorist activities,” he said.

Agents arrested the suspects when the informant reported that the group was going to rob a drug dealer first, he said.

The suspects were identified as Shawn Dee Adams, 37; his 35-year-old wife, Catherine Dee Adams; 34-year-old Edward Taylor Jr.; and Carl Dwayne Pate, 34.

They are charged with conspiracy to commit robbery affecting interstate commerce. More charges were possible.

Among the items seized during an FBI search of three properties on Tuesday were SKS assault rifles, bomb fuses, grenades, gas masks, photographs and diagrams of the Mitchell gas storage tanks, and pictures of the targeted Loomis armored car and two banks.

The informant told the FBI that the suspects had exploded trial bombs at the 20,000-acre Lyndon B. Johnson National Grassland in Wise County.

Dallas television station WFAA reported that the suspects might have ties to the Ku Klux Klan. A picket owned by one of the suspects bore a bumper sticker supporting the presidential bid of former KKK grand wizard David Duke.

Brian Engel, a spokesman for Mitchell Energy, a private company based in The Woodlands near Houston, said the plant produces gas liquids from natural gas and processes 165 million cubic feet of natural gas per day.

“As soon as we heard the story, we took measures to increase security,” Engel said, referring further questions to the FBI.

**Cat hair contributes to conviction**

By MALCOLM RITTER
Associated Press Writer

NEW YORK

The police had an old leather jacket stained with a murder victim’s blood. They thought it belonged to their suspect. But how to show it? They did it with cat hair.

In one of the oddest tales of DNA evidence in the courtroom, the suspect was convicted after hairs in the jacket were genetically matched to a cat that lived with him.

The case of Snowball, the white American shorthair cat, was reported today in the journal Nature.

It was one of the few times that nonhuman DNA has been used in this way in a murder trial.

The woman was 32 when she disappeared from her home on Canada’s Prince Edward Island in 1994. Her body was found in a shallow grave a few months later, and police suspected her former common-law husband.

By then, the brown leather jacket had been discovered, stuffed in a plastic bag and left in the woods. Tests showed the bloodstains belonged to the woman.

The cat hairs were found in the lining. Police recalled seeing Snowball at the man’s home during their investigation.

So they sent a blood sample from Snowball and hair from the jacket to Stephen J. O’Brien of the National Cancer Institute in Frederick, Md. O’Brien has studied cat genetics for 20 years.

**A Better Choice to Make**
Terror stalks rural towns nightly

Citizens live in fear of violence from militants

By RACHID KHIARI
Associated Press Writer

ALGIERS, Algeria

The knock on the door was supposed to be from security forces protecting the sleeping village. Instead, there stood men with long beards and long knives.

Their predawn slaughter Tuesday ended with 93 villagers dead, including 43 women and young girls and three small children. The victims were mutilated and decapitated with knives, hatchets, pitchforks and hoes in one of the most savage massacres in Algeria's five years of violence.

The attack came six weeks before June 5 legislative elections, the first since the army canceled January 1992 voting to thwart a likely victory by a Muslim fundamentalist party.

The move triggered the rebel insurgency against the military government. The violence has so far killed 60,000 people.

"They knocked on the door and said they were members of the security forces," said 34-year-old Fadela M. "My husband refused to open the door. So they threw a bomb on the roof. Then they entered through the ceiling."

Radia B. said he climbed into a tree and helplessly watched the massacre unfold.

"When they left, I turned over on my back. There was blood, bloody bodies everywhere," he said. "I fainted and woke up in the hospital."

According to various accounts, about 100 men invaded Haouch Mokhti Khemisti, 12 miles south of Algiers in the Mitidja Plain. The carnage lasted three hours.

Villagers described the men as Islamic extremists. One of those who escaped, Salah H., 63, said the leader of the group was on horseback and "had a list of people to be killed."

The Mitidja is a fertile expanse around Algiers where insurgents and government-armed militias have been stalking each other. Villages suspected of contributing to the militias are thought to be targets for massacres, blamed mainly on the Armed Islamic Group, the most radical of the rebel groups.

The government said Tuesday that security forces were alerted and sent in troops who managed to kill several attackers.

President Liamine Zeroual has claimed that only "residual terrorism" still threatened the country and that such attacks showed armed groups were on their way out. In a Tuesday night television address, Prime Minister Ahmed Ouyahia echoed those comments and called on citizens to aid in the fight.

It remained to be seen how effective the militants would be in scaring voters away from the polls, but the attacks have persuaded many villagers in the region to leave their homes for Algiers.

President Liamine Zeroual has claimed that only "residual terrorism" still threatened the country and that such attacks showed armed groups were on their way out. In a Tuesday night television address, Prime Minister Ahmed Ouyahia echoed those comments and called on citizens to aid in the fight.

It remained to be seen how effective the militants would be in scaring voters away from the polls, but the attacks have persuaded many villagers in the region to leave their homes for Algiers.

The Mitidja is a fertile expanse around Algiers where insurgents and government-armed militias have been stalking each other. Villages suspected of contributing to the militias are thought to be targets for massacres, blamed mainly on the Armed Islamic Group, the most radical of the rebel groups.

The government said Tuesday that security forces were alerted and sent in troops who managed to kill several attackers.

Community
continued from page 1
"Surveys have been taken that show us as being an economic engine. With the steady flow through the city, the investment that they have made in us will come back to benefit them for many years."

Notre Dame football has an effect on the South Bend economy with close to $51 million over the course of one year from out-of-town fans. With the recent expansion of Notre Dame Stadium to seat approximately 80,000 fans, the impact is expected to reach $91.8 million. That figure does not even take into account the University's nationally ranked soccer, baseball, women's basketball programs, as well as other teams that draw many fans to South Bend.

"Every once in a while you will hear a complaint or concern from the community about students, or from the students about the community," Hesburgh said. "But mostly they got along much better than that."

One aspect of Notre Dame life that impedes interaction between students and residents of the surrounding communities is the isolation of the University's mostly residential campus.

"Notre Dame is an enclave of its own at times," said Malloy. "Part of this is driven by the weather and part by the residential nature of the campus."

"You will always find people who are afraid to come to campus, and students who are afraid to leave it," he continued. "But that is something that we are working on. We have interacted with the local police departments to increase student security."

"There have been some major bridges built," said Stephen Lueke, mayor of South Bend. "The relationship between the neighborhood and the students who live in the off-campus housing is much more positive now than it was seven years ago. Even seven years ago, no residents wanted to hang out in their neighborhoods. But off-campus housing complexes have gotten better and now it is not as dangerous."

"I think that a lot of the complaints (about security) result from the neighborhoods that the students live in," he added. "The areas around the University have always been frepy areas, and the students just decide that they are going to live there. All that the city and University can do to help is to provide increased police patrols. They cannot change the neighborhood."

"But the University and the city are working together to make those areas less dangerous. The University has done a good job to work with city services to prevent break-ins and muggings in the areas around student housing and in the bar zone in the Northeast section of town," Lueke commented.

Outside of economic impact and off-campus students, the University of Notre Dame is an obvious and dramatic example of how the University can get involved," Malloy said. "It was a response to an immediate community need. We went to the Board of Trustees in order to get approval for the purchase of the clothing store on South Michigan Street and it was a major success.

While the Center relied heavily on interest-free funding from the University at its beginnings in 1988, recently it has received a lot of funding from private institutions and individuals at both a local and national level. "About 80 percent of our funding now comes from those private sources," said Matt Towey, director of volunteer services for the Center. "That is something that draws many fans to South Bend.

Towey estimates the number of student volunteers that serve the Center in various capacities to be in the hundreds every year.

"We get individual students as well as student groups," he said. "They work at everything from the front desk to tutoring, anywhere that we need them." The radio and television stations that are run by Notre Dame also serve to tie the University to the South Bend community.

"The South Bend/Elkhart market NBC affiliated station in WNDU Channel 16. This channel, while owned and operated by the University deals directly with the community and community issues."

"Being owned by the University we are asked to affect the community in positive ways," said Lou Pierce, director of audio development and television programming at WNDU. "We do this by pouring a lot of time and effort and money into public service and news programming. It is what the University expects from them that they own and we feel very fortunate to be able to play this role."

"Pierce described television as the most powerful medium in the history of communication. It is what the University expects from the students and we are a positive experience for both entities."

"The Center for the Homeless is an obvious and dramatic example of how the University can get involved," Malloy said. "It was a response to an immediate community need. We went to the Board of Trustees in order to get approval for the purchase of the clothing store on South Michigan Street and it was a major success."

With a broadcast radius of 30 to 40 miles, the radio station reaches deep into Indiana in all directions and even into Michigan. WNDU gears its programming towards the community and must run during academic breaks, when most of the rest of the campus shuts down.

"We depend 100 percent on volunteers from the community to keep us running during the breaks." Reckieiwicz said.""The rest of the year it is entirely managed by students and agents make up nearly 70 percent of the broadcasters. The other 30 percent are community volunteers."

""I don't know any but for profit organization that more directly links the students and members of the community on a daily basis than WNDU," said Nate Rackiewicz, station manager of WNDU. "We get the volunteers from the community up there to work side by side with the students."

Military finds parts of missing plane

By ROBERT WELLER
Associated Press Writer

EAGLE, Colo. — Two pieces of wreckage found in a remote Rocky Mountain peak are from the Air Force warplane that vanished on a training mission over Arizona three weeks ago, the military confirmed Wednesday. The search for the plane’s missing pilots continued.

"I can tell you now that through the efforts of maintenance personnel at Davis-Monthan Air Force Base — we have made a positive identification that these are pieces of the A-10 Thunderbolt II aircraft," Air Force Maj. Gen. Neil Running told reporters Wednesday night. But he said there was no sign of the plane’s pilot, Capt. Craig Butler.

"I don’t know if Captain Butler was in the aircraft or in another aircraft," Butler said. "I cannot talk about that." Running said. "The search continues."

Col. Denver Fletcher said two Army National Guard helicopters made trips up to the mountain’s 11,500-foot level on Wednesday and tripod four members of a search team: "They plan to spend the night on the mountain," Fletcher said. "Their mission is to go up and see if they can find any remains."

The weather on the mountain is better than anticipated, Fletcher said, and the searchers should have no trouble staying there overnight.

Earlier Wednesday, Tech. Sgt. Jeff Himmelstoss, trained in rescue downed pilots behind enemy lines, was lowered by cabin from a helicopter to retrieve the two pieces from near Gold Dust Peak in the Holy Cross Wilderness Area, 15 miles southwest of Vail. Running said. One piece is plastic-insulated tubing and wires, described as part of a device used to control flaps, and the other is metal with the markings of turbine parts made by General Electric.

"I have tried to pick up the largest piece of wreckage, but it was bigger than him and he couldn’t fly it from the snow," Running said.

Floods ravage Northern country

By JULIA PRODIS
Associated Press Writer

GRAND FORKS, N.D. — Town officials and flood-affected residents complained Wednesday that Grand Forks could have been saved if forecasters had been right about how high the Red River would rise.

"I don’t like to be critical, but we were told absolutely 49 feet," Mayor Pat Owens said two days after the river crested at more than 54 feet.

"I’m not pointing fingers," she said, "but our engineers said it would have been preventable."

Others say there’s little that could have been done to resist the power of a 500-year flood.

Back in February, the National Weather Service was already predicting record flooding in the Grand Forks area. The previous record was 48.8 feet set in 1979.

The February forecast of 49 feet remained the same through the early April blizzard. Not until April 14 was it increased to 50 feet.

Sandbagging had already been going on for weeks. And as the river rose, schools and businesses closed to send their students and employees to the front lines piling bags atop the 49-foot earthen dike.

On April 16th, as the first of the residents along the river began to flee, the weather service increased the crest forecast to 50 1/2 feet. Predictions three times over the next two days to 54 feet.

"We were dealing with an unprecedented flood and you’re dealing with Mother Nature and you just have to roll with the punches," said Dean Braatz, hydrologist in charge of the weather service’s North Central River Forecast Center in Minneapolis. "It’s extremely complex and under the circumstances I think we did a very credible job."

Grand Forks Assistant Engineer Al Grasser said the city could have done more to stem the floodwaters if they had accurate crest numbers, but he isn’t sure how effective extra dike-building and sandbagging would have been.

"You could have added the sandbags and the dikes and kept it off for a day, but the problem would be to build a dike or sandbags that would hold up for several weeks," he said. "It’s not just a question of elevation, but duration."

Heavy fall rains followed by a freeze made for a soft, muddy platform for the sandbags that have begun to sink.

When the flood hit, the city was in the midst of analyzing an Army Corps of Engineers study recommending Grand Forks ring itself with a system of dikes and flood walls. The cost: $40 million.

"It probably would have worked, just barely," Grasser said. "I wish it was built."

Downstream, with the crest moving north toward Canada, crews rushed to top off dikes protecting deserted towns and farms in the Red River Valley. At least 17,000 people have fled their homes in Canada alone.

Second Reading: 1 John 3:18-24
Gospel: John 15:1-8

One Last Consideration...

Well, this is it... the end draws nigh... for all of us. This ending means different things for different people. For the seniors it obviously means something quite different than it does to the younger folks among us. For the faculty and staff and administrators it has meaning, too. All of us are affected by it in some way. But just what do we take away with us? There was a message conveyed on the Senior Class Retreat this past weekend which is apt for us all as we end the year and move in different directions for a time... maybe forever. It's a message that has been stabbed at in this column throughout the year. It's really the question of what really matters in the end?... what's the constant that will hold us together in our separation and in our distance from one another?

I'd like to think that those of you who take the time to read this column already know. I'd like to think, actually, that it is so ingrained in the hearts and minds of every one of us in this community that it need not even be said. And yet, it would be wrong not to say it... not to proclaim it! Please God, it won't be a shock to anyone that the one constant, the one thing that matters, the one thing that will hold us all together is Jesus, and the love that God revealed in sending him to be among us as one of us. Oh, I know it sounds pious, and maybe a bit ethereal, but it doesn't make it any less true.

For those who call themselves Christian, there is nothing more... nothing else we need to cling to than that. It isn't money, or an accumulation of friends, or even "good times" that will ultimately sustain us in our search for meaning and for happiness. It is only Jesus. Our leave taking of this place has us separated for a while, for some longer than others. But in the Lord, we are not really separated. Just as we gather united around the table now, we will again. Every time we gather to celebrate the Lord's supper, wherever we are, we gather together as one family. We are forever bound in Jesus and in Notre Dame.

So whoever you are, whatever the circumstances around your departure, whether it be for a few weeks before the summer session, or the summer months or until the first home football game, Notre Dame will always be home. It is not, for you seniors, an ending, but a beginning of a wonderful and more blessed than you can now even ask for or imagine. Trust in the Lord's love for you and pursue God with the same fervor and hope with which you engage every pursuit. Have faith in the God who has brought you this far, and who will never leave you. As gift and prayer, we leave you with the words of Mrs. Charles Cowman and Mary Gorges:

So now... we sail and something of what we may expect as we continue our voyage we may infer from the past. Without doubt storms will come as they came in the bygone days. But we will give them firm and courageous welcome, for we have already weathered so many storms that we are unafraid of the wind and the tide, the lightning and the snow.

And so we shall - when the Voyage is completed drop anchor where no storms come, but where the green swell is at last in the haven dumb, and we are forever out of the swing of the sea.

We have come very safely hitherto;
And sometimes seas were calm, and skies were blue;
Sometimes the wild waves rose - the tempest roared;
But never barque went down with Christ on board.

And so it shall be to the very end -
Through ebb and flow, the one unchanging friend,
Ruling the waves which sink at his command,
Holding them in the hollow of his hand.

There comes an hour, when, every tempest o'er
The harbour lights are reached, the golden shores:
Never, oh nevermore to fret or fear -
Christ, give us faith to praise thee even here!

From the staff of the Office of Campus Ministry, good luck on final exams, have a donut hole (or several!) on us. Godspeed in the days ahead.

Jim Lies, C.S.C.
Math and mundanity at Notre Dame

Wake up! It's finals time again. To be brutally honest, I went to bed with a book in my hand last night. I don't live in a real world. I'm sure real people have lives, too, but mine is a world of imaginary friends, who are all more interesting than the real people I meet. Now, at the close of my sophomore year at Notre Dame, I understand the importance of social contact. I understand the social norms which govern behavior at a decentralized academic institution, and I trust me, I don't say hi to anyone I don't know.

Each day I sit in the dining hall and watch thousands of faces swirl past me, each one presenting a mystery waiting to be solved:

Who am I? What's my story?

Flip through the student directory sometime and maybe you'll see what I mean - thousands of names, each one with a face, a narrative, a history. Each one is full to the brim with life and consciousness. Each page is a mosaic of countless identifiable infinite scope of personalities and memories walking the quad, roaming the halls, the libraries, the classroom, the gym. I am an idealist and zeal for life is the simple fear of making contact. Writing about it is easy - putting it into practice and thereby risking disapproval, embarrassment and humiliation is another thing altogether. I admit it - I'm afraid to act out of social context and violate a few norms. And chances are, I'm not the only one.

Let's face it - making it to Notre Dame is no easy feat. You've got to be smart, you've got to work hard, you've got to really struggle at times. Who are we kidding? It's tough to be smart. It's tough to work hard and take school seriously when many of those around us don't. Getting to Notre Dame can be a long, rough road, and it's pretty much impossible to make it here without a few hard knocks along the way. Most of us have received some schooling in the ways of the outside world and the repercussions for violating its norms. Most of us have been burned.

The result? We're afraid to stick our necks out, we're afraid to step out of line. We're afraid to break social convention and make unwarranted contact with each other. But we may be running out of time - in three weeks approximately one quarter of the 10,261 will be gone, ejected into the outside world and out of our little community forever. And we will never have known more than a fraction of them.

The moral? Stop hiding in social convention. These members of the community are our brothers and sisters; we better our own experience by reaching out to them instead of waiting for them to come to us. We sold romance and adventure to life in South Bend, Ind., by breaking social rules, violating cultural provisions. We need to break out, and we need it badly.

So let's do it - I will if you will. Oh, yeah... and maybe you'd better brush up on your math major.

Mick Swiney is a sophomore Arts and Letters major.

**Quote of the Day**

"To be natural is such a very difficult pose to keep up." - Oscar Wilde
concert review

Veruca Salt proves that the little things matter...while Bush is swallowed by its antics

Despite these slight pitfalls, the music was fairly entertaining (if not uniform), highlighted by the short but energetic "x-girlfriend," and the guitar powered 3:AM machine gun...Riff.

Bush is a somewhat entertaining band, but by far lack any artistic merit whatsoever. Veruca Salt, the opening band, offers a strong contrast to Bush. Veruca Salt came out on stage without a pretentious attitude and put on a great show. It was quite clear that they were out there to have a good time by the way the two lead singers, the beautiful Louise Post and the lovely Nina Gordon, interacted with the crowd. For those of you who are familiar with the quintessential grunge band, Sonic Youth, Nina's sister Kim is the lead singer, so clearly talent is inherent in this band. They talked to the crowd and even flirted with the crowd, as their quirky pop music put a hop in the crowds' step without the violence induced by Bush's overpowering riffs.

Veruca Salt played such MTV favorites as "Seether," and their newest single, "Volcano," or at least mixed it up with even more known songs which still have the same, shall I say pizzazz. Veruca Salt fans recognized their favorites such as the amnestic "Awesome," or their tribute to spider man. They manage to create meaningful yet fun music without sounding pompous or pretentious.

Nina and Louise have a very mature stage presence unlike their looks. They can deftly hold their own, whether playing complex guitar lines or laying down a strong base. It is hard to manage to do this and are still able to dance around the stage with as much enthusiasm as the crowd.

Veruca Salt proves that you do not need violent music or whiny lyrics (swallowed) to maintain a following. No deal of melody. Veruca Salt one, Bush zero.

Whatever and Ever Amen

If anything that can be said for this trio from Chapel Hill, N.C. is this: they swing. The unique style and bitter, funny lyrics that made them popular to begin with...What's in a Name?

Folds is a jazz pianist. There is no argument. He has a mastery of complex time and dynamics. Every song is injected with an infectious groove that makes you want to get up off of your seat and dance. Even though the piano is a harmony instrument, the trio is rounded out by a rhythm section that adds an extra bounce to the songs and drives them along.

"One angry dwarf and two hundred solemn faces" is a great introduction to the band's sound. It features a very solid groove on the bass, supplemented by Folds' extensive soloing over top. It also features Folds' signature perfect chord changing skills about a little kid who was picked on all his life and is now back for revenge.

Another great song is "The Bridge," which contains lyrics that could not be reprinted in this publication. The whole thing is done complete with tongue-in-cheek from the angle of someone that doesn't relate to the repetition inherent in modern instrumental pop music.

Most songs deal with shattered relationships — or at least unrequited love. Folds even expresses this from the angle of someone that doesn't relate to anyone in "Battle of Who Could Care Less." This song relates to the apathy of the generation-x crowd and gives the album its title in the third song, "Wow!"

The opening band, offers a strong contrast to Bush. For those of you who are familiar with the quintessential grunge band, Sonic Youth, Nina's sister Kim is the lead singer, so clearly talent is inherent in this band. They talked to the crowd and even flirted with the crowd, as their quirky pop music put a hop in the crowds' step without the violence induced by Bush's overpowering riffs.

Veruca Salt proves that you do not need violent music or whiny lyrics (swallowed) to maintain a following. No deal of melody. Veruca Salt one, Bush zero.

Am I Your World?

Lyrically, the Cuba Five pump a much needed voice into Notre Dame ears, as Doug sinks his teeth into rock pop music from MTV to lead. "Your careful style stolen from 25 years ago! Your spontaneous poses and press releases passing as liner notes! Little weight next to our cheap cassettes and photocopies! Crowded basemenUA handful of smiles and a bottle of liquor!" This song relates to the apathy of the generation-x crowd and gives the album its title in the third song, "Wow!"

Altogether, this album gives the audience what they are looking for in a fun time with good music. For a closer look at what they can do, you might want to catch them at the Metro in Chicago tonight at 7 p.m.

The Cuba Five

Whatever and Ever Amen

(foot of five stars)

(foot of five stars)
It's come to the point when most Domers don't even know or remember Chisel. This is sad. Let me fix that.

Chisel, AKA Ted Lou, Chris Norberg and John Bugano, were the hallmarks of the band of the early 90s. Up until 1994 NAZ, they graced us with their presence. I'm guessing no one probably voted the "lousy boys" as "most likely to Succeed." Ha! Look who's rockin' now! Not XYZ Affair, that's who.

What I'm about to say is not for school loyalty, campus music pride or promotional reasons — Chisel can rock out, or at least rock with, any band that I can think of. Their sound keeps getting catchier and catchier like growing fields of bypapuer and tighter and tighter like a screw on a teakwood screwdriver. Set You Free is the best of the album as a Free Trade Agreement between the Beatles, the Jam, Fugazi, Chisel, etc. I have basically the best of the bands that can raise the roof and sweeten the tooth. Set You Free is a continuous connecting flight between D.C. and England.

Chisel's sound has slowly evolved from Australalocopthes to Eismin. Ted used to wear a straight-edge buzz cut and play hardcore; now the boy has a mod haircut and dressing abilities out the wazoo. Heck, there's even

bors, acoustic guitars, and keyboards seamlessly mixed into the trademark kinetic "eh-when" punky jungle.

The tunes now range from the Beatles' "Oh Dear Friends" to arena bash-rumble of "Privileged & Impotent" to the very Built To Spill-ish guitar anthem "The Last Good Time" to the teasing riff-heavy "On Warmer Music."

After one listen of "Morley Timmons" I want to hijack one of those tiny orange Huddle trucks, lead it up with speakers, and drive around campus blasting the four-part masterpiece. The ending has more drama than Merchant Ivory, and makes the head tilt back, eyes roll up, and arms air guitar in full splendor.

Forget that money you were stashing for "The 90's. You Need this album.

by Brent DiCrescenzo

**Chisel**

**Set You Free**

( out of five stars)

**S**uede

**Coming Up**

( out of five stars)

**S**uede in America now requires the addition of "London," due to the complaints of an irreplaceable miomore who also uses the same name; a misfortune whose journey through the world of music will be as unnoticed as it will short.

In stark comparison, the proper Suede's third album stands out as perhaps their best yet, and the last two were both excellent. The only change in the lineup is new drummer Neil Codling, and thankfully vocalist Brett Anderson and guitarist/sylist Richard Oakes still remain, the former maintaining his habit of putting everything he has into every song, and it pays off handsomely.

As with their previous work, the first track is the best. "Trash," an immensely catchy and energetic anthem with enough cynicism to dispel any thoughts of blandness — "or maybe, maybe it's our nowhere towns, our nothing places and our cellophane sounds," warbles Brett, and he then adds by way of a chorus, "just trash, me and you, it's in everything we do." Brilliant. Following it comes "Most Likely," a slower, funkier track with crashing guitars and a lush set of edgy vocals. With "Lazy" we find another superbly produced tune, and the remainder of the album is of similar merit. The pace varies from time to time, precluding boredom, and throughout there is the sense that Suede are determined to be written off no matter what.

"Coming Up" is the album to do it. In the words of two well-known amateur music critics, this doesn't just rock, it rules.

A Double Dose of Opera

By JULIE BRUBAKER and MICHAEL ANDERSON

Many individuals around campus have wondered why Notre Dame doesn't put on Broadway musicals. Wouldn't it be wonderful to be able to skip the Cashing movie-of-the-week and go see your favorite act and sing in, say, Les Misérables or Joseph and the Amazing Technicolor Dreamcoat?

Although there continues to be no musicals at ND, we do have an annual opera, which historically brought forth what we now call musicals. Each year, the Opera Workshop performs a full-scale opera at Washington Hall, with a cast of very talented students. The past two years, the workshops have been Mozart operas. This year, the music department is branching out.

If you like the idea of musical theater but are just unwilling to go to New York's Lyric Opera, here's your chance to watch high quality opera productions right here under the Dome.

This Monday and Tuesday at 8 p.m., the Notre Dame Opera Workshop will put on a double-atarhopefully feature at Washington Hall: a 1991 David McVicar production of Mozart's "Cosi Fan Tutte," followed by Pergolesi's "La Serva Padrona."

We highly recommend that you see the second of these operas this year — the performers are highly talented, and there is tons of comedy built into both operas. What a fitting study break during that last week of school.

Junior Michelle Holden stars in the jazz opera "L'Enfant et les Sortilèges." Sources tell us that she is vocally robust, not too unfamiliar in her role. Judging from her roles in previous years' operas, we know what talent she has. This opera also features graduate students Salve Sagleheher and Eire Perez, as well as undergraduates Megan McCormick and Jeff Clontinger.

Ravel, an Impressionist composer, wrote this opera in 1924. It is a very atypical opera, according to diva Holden: "This is a good opera for people not familiar with operas to see — it is witty, entertaining, interesting ... nothing like a classical opera."

Ravel based the plot of "L'Enfant et les Sortilèges" on his understanding of youth and nature, as drawn from his own relationship with his mother. The cast of characters is highly unconventional: an 8-year-old and a topos (conjure up images of "Oh Our Guests..."), as well as cats, squirrels and inanimate objects.

The plot is a fairly common theme — the child refuses to do his wash as directed, so his mother confines him to his room and forces him to eat dry bread and drink sugarsweet tea. The child promptly rebels with a grand tamper tantrum, manically breaking and tearing anything in sight. He's about to settle into an armchair, he rebels against him and moves on. Presently, this side of the Atlantic, a man comes alive and sing of the torment that the child has put them through. In the end, a princess from a story book comes out and the child realizes that destructiveness will get him nowhere.

This opera is famous for its "meow" duet at the end of Act One, where two cats sing (meow) of the womans brought upon them by the child. Music is drawn from a variety of genres ("a numbers" opera) including jazz, ragtime, and 18th-century French dance.

The second opera on the program, Giambattista Pergolesi's "La Serva Padrona" is more of a typical opera than "L'Enfant et les Sortilèges." It features junior Laura Fortuna as the angelic soprano who has widely been acclaimed on campus.

"La Serva Padrona," a comic opera, was written in 1733, and is comprised of a cast of just two singing characters and one silent actor. This lighthearted work is generally considered to be the beginning of the opera buffa genre, which would later influence composers like Mozart. In one act with two parts, the plot revolves around two characters: Serpina, a clever servant and Urtiberto, her master. Through her sharp wit and ingenuity, Serpina is able to elevate her station in life and achieve equality with her master.

However, do not let the antique date, the simple plot or the unusual acting technique fool you. This opera is much like the latest development on Beverly Hills 90210 — A scandalous relationship full of deception, anxiety and games; two attractive individuals drawn to each other for all the right reasons but caught in two totally different worlds.

So whether you are starved for musicals, need a study break, interested in jazz, comedy or simply interested in the students performing, come to the Opera Workshop on Monday or Tuesday at Washington Hall.

**Mason, Johnson not talking to reporters**

By CHRIS SHERIDAN

**NEW YORK**

Those wanting to talk about the Larry Johnson for Anthony Mason trade will have to talk among themselves. The two are keeping their thoughts secret heading into Game 1 of the Hornets-Knicks series.

"Get away from me, you evil men of writing," Johnson told reporters in Charleston, S.C., where the Knicks wrapped up a three-day minicamp Wednesday before flying back to New York for Thursday night's opener of the best-of-5 series.

Some 180 miles away in Fort Mill, S.C., Mason was no more accommodating - although not quite as ornery - to reporters who waited for hours for him to leave the Hornets' practice facility.

"Hello and goodbye. Write what you want to write," Mason said before speeding away in his black Mercedes. "I told you I wasn't talking. I thought y'all were more educated than to wait around.

So much for any new comments or war of words between the players traded for each other last summer. Both seem to think that silence is the best approach before tip-off.

Mason, normally the talkative type, has been more or less mum over the past few months regarding the trade that ended his five-year run with the Knicks.

Back when he was speaking about it, Mason claimed the move was orchestrated by Patrick Ewing - with whom he didn't always get along.

Mason has been one of the main reasons the Hornets had the best record in franchise history. Averaging a league-best 43.2 minutes per game, Mason had four triple-doubles and averaged career-highs of 16.2 points, 11.4 rebounds and 5.7 assists while playing the power forward spot for Charlotte.

In New York, Mason played small forward because Charles Oakley was the power forward.

But in Charlotte, Mason has been able to utilize his low-post strengths and stay close enough to the basket to keep within range of his 10-to-12 foot jumper.

"When he's good, he's awful good," Charlotte coach Dave Cowens said Wednesday. "There's really not that many people that can deal with him at that position, especially when he takes the ball out on the floor."

Johnson, on the other hand, went from power forward to Mason's old small forward spot with the Knicks.

Jeff Van Gundy has averaged 20.5 in his final season with Charlotte to 12.8 in his first year with the Knicks.

Coach Jeff Van Gundy has often kept Johnson on the bench during the fourth quarter of close games, using a three-guard alignment instead.

SOFTBALL

Rolling Irish take two from lowly Bulldogs

By ALLISON KRILLA
Sports Writer

The Notre Dame softball team continued its winning ways yesterday, sweeping a double-header against the visiting Butler Bulldogs in decisive fashion. The 8-3 and 8-1 victories improved the team’s overall record to 30-19.

"Especially in the first game, we started focused, but once we knew it would be a blowout, we let up a little bit," said pitcher Kelly Nichols.

In game one, Notre Dame overcame sloppy defense with a strong offensive performance, pounding out 11 hits, including five singles in a six-run second inning. Third baseman Kara McMahon led the charge for the Irish, going 2-for-4 with two RBIs and one run scored. Pinch hitter Amy Laboe came through in the clutch again, securing the victory with a two-run single in the third to close out the scoring for the Irish.

"In the first game, we came out so strong in the beginning that it was easy to lose focus," said McMahon. "I think we played half the game with focus and the other half without." Nichols, recently plagued by tendinitis in her right arm, pitched four strong innings of one-hit ball to earn the win, her 10th of the season.

"I felt good today," said Nichols. "My arm’s feeling really good right now."

Angela Bessolo picked up her first save of 1997 and just the second of her career, allowing three runs on five hits after relieving Nichols to start the fifth. The Irish came out swinging in game two, scoring eight runs on 10 hits. McMahon again powered the Irish from the number two spot in the lineup, going 2-for-3 with two RBIs. Freshman Sarah Mathison went 2-for-2 with one RBI and one run scored. Four runners crossed the plate for Notre Dame in the fifth inning, highlighted by McMahon’s two-run single to left.

Joy Battersby looked strong in her seven innings of work, picking up her fourth straight win, to improve to 8-6 on the season.

"Joy’s come on really strong," said McMahon. "Having a small staff is hard, but (Bessolo) and (Battersby) have been stepping up to give (Nichols) some time off."

Despite the relatively easy wins, the Irish felt that they reaped the benefits of the double header.

"In the second game, we tried to stay focused the whole time," said Nichols. "These games were good because we need to get on the dirt as much as possible. Rutgers will probably be a team just like Butler, so it was good to have played them (yesterday)."

"Right now it’s important to be consistent," said McMahon. "We can’t afford even one bad inning against the teams we will be facing in the tournaments."

8:15 p.m.
Corby Hall
Reception for all present with an opportunity to meet Brother Roger

Brother Roger is the founder and prior of the ecumenical Taizé community in eastern France. For more than half a century, Brother Roger and his companions have borne witness to Christ in an increasingly secular society. Their joy, mercy and simplicity provide a tantalizing glimpse of what Christ's church, healed and reunified, is called to become. The liturgies at Taizé combine elements of the Catholic, Orthodox, and Protestant traditions. Their distinctive, meditative chants of Scriptural verses are popular throughout the world.
Story

continued from page 24

fresman defensive lineman's meteoric rise has caught more than a few off guard.

"He's the surprise of the spring, no question," said Irish head coach Bob Davie. "We knew we had a talented player with him, but we had no idea he'd develop like this. I think he's surprised pretty much everyone."

That's an understatement. Recruited as a 6-foot-1, 248-pound linebacker, Legree came to Notre Dame with little shot at earning a starting role. But a position switch and a stellar performance have earned Legree the No. 1 job at nose guard. Even with the increase in size, he has displayed the lateral movement necessary to contain the run.

"He can really be an asset up front because of his ability to clog the middle," said linebacker Kory Minor. "He is a younger guy playing a new position, but he looks like he's been playing there forever. He has really been there for us this spring."

What was once a deficiency has all of a sudden become a strength. When Melvin Dansby and Brad Williams return from injuries and with veterans Tony Rice and Craig Boren filling in, the defensive line should more than hold its own this fall. Legree is a guy who has really been there for us this spring."

Legree has bulked up near 25 pounds to his frame. Even with the increase in size, he has displayed the lateral movement necessary to contain the run.

"He steps up for the defensive line should more than hold its own this fall."

With the departure of Alton Maiden, it was anyone's guess who would wind up in the middle for the Irish. Sophomore Antwon Jones and freshman Jim Jones entered spring as the likely candidates, but Legree has come from nowhere to stake his claim as the starter.

"Legree has bulked up near 25 pounds to his frame."

"He's the surprise of the spring, no question."

Starks wins Sixth Man award

Associated Press

NEW YORK

John Starks of the New York Knicks won the NBA's Sixth Man award Wednesday.

The New York guard received 64 of a possible 115 first-place votes in voting among media members in the United States and Canada. Tani Kukoc of the Chicago Bulls, last year's winner, was second with seven first-place votes and Chris Gatling of the New Jersey Nets finished third with six.

Starks' winning margin was the biggest since Portland's Clifford Robinson got 89 of 98 votes in 1993.

Voting, administered by the league, is done by a 115-member panel. There are 28 national members of the panel and three media members from each of the league's 29 cities.

Martinez leads Yankee win

Associated Press

NEW YORK

Tino Martinez drove in five runs as the New York Yankees stretched a winning streak to three for the first time this season, beating the Milwaukee Brewers 10-5 Wednesday.

Martinez hit a three-run double in the sixth for New York, which began the day tied for last in the AL East.

Kenny Rogers won despite allowing five runs and nine hits in 5 1-3 innings, walked four, struck out two and hit two batters.

New York took a 3-0 lead in the first on Paul O'Neill's two-run single and Mariano Duncan's RBI single, and Williams and Martinez added run-scoring singles in the second.

Milwaukee pulled to 5-3 in the third on Jeff Grillo's two-run single and John Jaha's RBI single, and tied the score in the sixth on a two-run triple by Eddy Diaz.

Indians 11, Red Sox 7

CLEVELAND

Jack McDowell got a win in the first regular-season relief intentional walk to Bernie Wilson loaded the bases and Martinez doubled off the wall in right-center. Martinez added an sacrifice fly in the eighth.

McDowell allowed seven runs and nine hits in 5 1-3 innings, walked four, struck out two and hit two batters.

New York took a 3-0 lead in the first on Paul O'Neill's two-run single and Mariano Duncan's RBI single, and Williams and Martinez added run-scoring singles in the second.

Milwaukee pulled to 5-3 in the third on Jeff Grillo's two-run single and John Jaha's RBI single, and tied the score in the sixth on a two-run triple by Eddy Diaz.

Seemingly sparked by McDowell's performance, Cleveland cut the lead to 5-2 in the fourth on a two-run homer by Jim Thome. The Indians closed within a run in the sixth Manny Ramirez' run-scoring groundout and Brian Giles' RBI double.

Boston starter John Wasdin allowed four runs and five hits in 5 1-3 innings.

single. After that, the Irish bats - and their .334 team batting average - stopped. Through the last eight innings of the game, only three Irish runners reached second base, and none made it any further.

"We've been hitting too many balls in the air the last two days," Mainieri said. "We're not forcing the other team to make plays. We haven't been able to force them to make any errors.

While the Notre Dame offense struggled, the defense shined. Starting pitcher Darin Schmalz and kept Northwestern scoreless through the fourth inning. But in the fifth, Alex Shilliday came in to give up four runs, taking the loss for Notre Dame.

With runners on first and third, Bob Dainton laid a squeeze bunt down the third base line. Patrick Thompson scored from third, Haan moved to second and Dainton was safe at first.

The Northwestern Wildcats slid past the Fighting Irish handing them their second consecutive loss.

The Irish offense couldn't produce much needed runs yesterday.
continued from page 24

It was a real physical game,” Brett Hartmann of the Bolivian Yaks said. “They were probably the first team to give us trouble inside.”

Hartmann’s teammate Peter Gansler commented on the solid fundamental philosophy of his team. “We just wanted to focus on good defense and rebounding,” Gansler added. “We think if we can continue to do that, we have a shot at the final four.”

In top five action, third seeded Malicious Prosecution continued to dominate with a 21-10 victory over No. 30 Burnin’ Shoot. Malicious is one of the teams most highly touted as being capable of detraining the top-seeded Corby’s and with the fast-paced offense it has displayed thus far, has the potential to do so.

“We might try to move around a little,” Neil Jakobe said of his team’s strategy going into the Sweet Sixteen. “We’re in the Sweet Sixteen for the very first time and we’re definitely going to try to make something of it.”

The fifth seed, SFR2: We Still Can’t Score, also walked away victorious, with a 21-16 defeat of Sweeter than Candy. Although SFR2 only led by one at the half, they were able to break the game open in the second half, led by solid shooting at the line by Keith Kurowski, who went two-for-two, and Steve Starck, who made a clutch free throw late in the game.

“We’re playing good basketball right now,” Chris Dotson of SFR2 commented. “We were able to mix up our defense tonight — both zone and man-to-man — and we found some success there. So we’re probably continue to do that and keep playing the way we have been.”

sions when commissioners had to intervene to prevent fights from breaking out. The frequency of the outbursts eventually subsided and the quality of basketball improved from that point on. For the Assassins, guard Raki Nelson and center Eric Chappeled proved that football is certainly not the only sport at which they excel. Nelson dazzled the crowd with impressive ball-handling skills, outside shooting range, and acrobatic dunking ability. Chappeled was sold in the paint from beginning to end.

When all was said and done, however, Tejada was clearly the game’s most valuable player. He may have also been the most talkative player on the blacktop, but he made the plays to back up his words. His control of the game’s tempo and ability to knock down the clutch jumper were the deciding factors in the contest.

“John Tejada played the most incredible game I have ever seen,” praised Brennan. “We were only because of him.”

The most outstanding feat by far, however, was the play of the Gimp team down the stretch in regulation. Down 20-16, Gimp averted elimination time and time again. They eventually clawed their way back to tie the score at 20, and it was then that the fun truly began.

Gimp and the Assassins took turns holding one-point leads for the next hour. It seemed that whenever one of the teams missed a chance to end the game, their opponents buried a shot on the following trip to even the score.

The most entertaining sequence of the game began with the squads knotted at 30. Nelson heat Tejada off the dribble and drained a leaping jumper to give the Assassins the 31-30. Tejada responded in kind, burying a bomb from beyond the arc, right in Nelson’s face.

At this, the hardy crowd was ready to concede the battle of egos to Tejada. But Nelson gave the fans reason to expect anything from that point out, as he responded to Tejada’s challenge by drilling another long-range jump shot of his own.

“Raki Nelson is one of the best basketball players I have ever guarded,” said Tejada. Following Nelson’s second consecutive bucket, with the score 32-31, all eyes were on Tejada to see if yet another response was in the works. However, as Tejada passed right by Nelson on the next trip up the court, the MVP coolly dislodged the ball to an open Brennan, who proceeded to submit his own response, by canning a shot from outside the NBA three-point range.

Despite the heroics from both sides, Tejada, Brennan, and company eventually extinguished the Assassins and earned the No. 11 seed for the round of 16.

“We as a team,” explained Tejada, “were able to stay together. It was all heart. Our fans were behind us, and we couldn’t let them down.”

If Tejada thought they had fans last night, he was not only to wait until this evening, when all of the underdog supporters are sure to be out in force as Bring Out the Gimp III takes on No. 3 Muddy Waters.

ASSASSINS SHOT DOWN IN HISTORICAL 41-39 GAME

By BRIAN REINTHALER
Assistant Sports Editor

In what may have been the game of the Bookstore Tournament, let alone the game of the decade, No. 22 Bring Out the Grim II upset No. 11 Downtown Assassins in front of 200 plus die hard fans.

When the game began around 10:30 p.m., quite a few other contests were still not even under way, but by the time Gimp point guard Pat Brennan lay in the final basket nearly two hours later, every other game was long since over. The last break bucket gave Gimp a 41-39 victory and advanced the squad to the Sweet 16 of Bookstore Basketball XXVI.

"I can't even describe it," gaped Grim shooting guard John Tajada immediately following Brennan's clincher. "It was really one heck of a game."

And that it was. The final count in the round of 32 featured all of the elements one would expect in a typical Bookstore class, and more. There were scraps, hard fouls, disputed calls, dunks, threats of technical fouls for fan interference, travelling calls which nullified game-clinching layups, and game-saving jump shots from well beyond the three-point arc.

Early on, there appeared to be more talk than game on Stepan Court No. 6. The two squads got right at one another from the opening play, and there were a number of occasions when it looked like this could be the end of it.

But there was more. Notre Dame

Primetime ready for the big show

By BETSY BAKER
Assistant Sports Editor

Up until the historical 41-39 No. 22 Bring Out the Grim II upset of No. 11 Downtown Assassins that tied the Bookstore Basketball record for highest scoring game, No. 27 Primetime had been the talk of the tournament.

And the team of three sophomores and two freshmen still might be the Sweet Sixteen team to beat in the courts tomorrow.

After their 21-15 upset of sixth-ranked Sexual Chocolate, what had previously been whispers about the team's ability turned into full fledged speculation about the team's potential to be a giant killer. From the mouths of fans to top-ranked veterans, Primetime was cited as the team to watch of the twenty-sixth Bookstore Tournament.

Many compare the team to last year's runner-up Showtime, and the comparison is uncanny - Five guys from Stanford Hall who don't boast a lot of size but overflow with pressure. Putting together three straight victories by any means. With the exception of top-seeded Corby's who relied on a 21-7 victory over 4 Inmates and a Loose End, no surviving team was easy.

In another close upset action, No. 13 The Sixth Man beat a 21-19 to No. 9 Vanilla Thunder II. Ross Hansen, of Vanilla Thunder, attributed his team's victory to good defense inside the paint.

"Our game plan was to zone 'em up and make them shoot out outside," Hansen commented. "That's what we did and fortunately they didn't shoot real well.

In another close game, BW3's Bolivian Yaks defeated a 12-17 in a hardfought physical match.
