**SECURITY BEAT**

**Local teen kills cop near O-C apartment complex**

A South Bend police officer was killed Sunday night near the Lafayette Square apartment complex, shot four times in the head by a 16-year-old local boy.

Officer Paul Deguch was driving on Talbot Street, just off S.R. 23, when he stopped to investigate "the out of the ordinary behavior" of a young boy, said Sergeant John Williams of the South Bend Police Department.

When Deguch approached him, police said, the youth shot Deguch, then fled down a nearby alley. The 30-year-old officer was pronounced dead just after 8:30 p.m. at St. Joseph's Hospital.

Police conducted a comprehensive three-hour search of the area in an attempt to apprehend the suspect, later identified as Gregory Dickens Jr., a neighborhood resident.

John Menghini, a Notre Dame senior, was driving toward Lafayette Square at approximately 11:15 p.m. when he saw the police preparing to arrest Dickens.

"We were on the way to Lafayette when the cops stopped a car near S.R. 23," Menghini said. "An officer shined a flashlight into our car to see who was inside."

He said he was stopped again on S.R. 23, when several police cars and more than 20 officers swarmed around one of the houses. Menghini said there was screaming moments before the police rushed to the front door and dragged the suspect from the house.

"They were yelling. Get your hands away from there, don't reach down there! I think he must have been reaching for a gun or something," Menghini said. "It felt like an episode of 'Cops.'"

Other witnesses confirmed that the shooting and subsequent arrest occurred just a few blocks from Lafayette, which houses a number of off-campus Notre Dame and Saint Mary's students.

"Everyone there was pretty freaked, since it happened so close to home," see POLICE / page 6

---

**Ticket prices stay at $96, $128**

Observer Staff Report

Breaking a three-year trend of $6 increases, the Notre Dame Ticket Office said general admission and student football ticket prices have not risen this year.

Notre Dame students, buying each ticket for half the price of a GA, will again pay $96 for their book of six tickets. Saint Mary's students will pay $128, two-thirds of the regular price, and each GA will still cost $32.

Jim Fraleigh of the athletics department said the decision was not connected with the increased stadium capacity and corresponding high ticket revenues.

"We just sat down and went over the office's budget and finances, and we're doing really well at this point," Fraleigh said. "We prefer not to raise prices if we can avoid it, so this year, we held them at $96.""Seniors will begin lining up on Wednesday at the Joyce Center, armed with checkbooks and student ID cards. Each student can purchase four ticket books - their own, and three of their friends', provided the buyer shows all four student ID cards. Juniors, law students, and graduate students can buy tickets on Thursday; sophomores and freshmen lining up on Friday.

**Eldred prepares to lead SMC community**

By SARAH CORKREAN

Saint Mary's News Editor

As attendance at women's colleges continues to decline, many challenges face their advocates, including the new president of Saint Mary's College, Marilou Eldred.

As she assumes the leadership of one of the top-rated midwestern women's colleges, she is stressing her role as a lay leader, something she believes women need to see more often in today's society.

"Women's colleges are critical because women need to be able to identify themselves and assume a role in society," Eldred said. "Saint Mary's College prepares women well for that role."

In April, the Board of Trustees presented Eldred as the 10th president of Saint Mary's. Eldred, who was then the vice president and academic dean of the College of St. Catherine, a Catholic women's college in St. Paul, Minn., assumed the post in June.

She stated her eagerness to meet with present students and alumnae. She plans on implementing informal receptions with groups of students and hosting alumnae reunions to acquaint students with the networking opportunities available within the Saint Mary's community. "I am eager to meet with students and would really love for students to initiate conversation," said Eldred. "I'm here to provide students a mentor, to lead them to a degree."

Already, Eldred has planned to host picnics with student body leaders and was seen this weekend greeting incoming freshmen as they unloaded their cars. The door of Eldred's office has been open for students drop in and say hello.

Mary Lou Gorno, chair of the College's Board of Trustees, introduced Eldred as "the best person to lead Saint Mary's into the next century."

She described Eldred's accomplishments as a tribute to the president's long-held goals, which are in accord with those of the Saint Mary's mission statement.

Revealing her hopes and intentions for the College, Eldred said that she plans to continue to increase the endowment, make available more financial aid, make diversity more of a campus goal and expand both academic programs and enrollment.

According to Eldred, only 2-3 percent of graduating high school women consider attending women's colleges.

"Because women's colleges are only able to recruit half of the female population, they will always struggle academically," she said.

One way to increase enrollment at Saint Mary's would be to recruit by word of mouth through alumnae, noted Eldred. In this year's incoming freshman class, 19 percent were recruited through alumnae clubs.

According to Eldred, contact-
Playing God with God Quad

Another summer, another slew of changes around campus.

Forget the impressive stadium or the addition of women to Golf Quad. And who cares about God Quad, with God Quad another slew of changes around campus. The circle has been repaved; fresh sidewalks radiate from the statue of Jesus, which has a ground thaws.

Larger shop replaces The Huddle's Little Store

By MICHELLE KREPUA
Associate News Editor

The days of piling quarters- dogs onto a tray moments after midnight, squished in between the cappuccino machine and a grocery aisle in The Huddle's dimly lit Little Store, have come to an end.

On Aug. 18, a completely renovated Huddle Mart opened in the southeast corner of LaFortune's first floor. The $200,000 project has more than doubled the size of the store to 1,900 sq. ft. and will allow for amenities impossible in the old location.

"We just needed to have a bigger store," said Jim Labella, operations manager for the project. "The concept was to keep the store uncluttered with a clean, crisp look to it. We have a lot of room to expand for the future, too."

LaBella, who lobbied for the project over the past four years, noted that more space has allowed for a hot deli counter, walk-in freezers, a candy wall, another ice cream shoppe, another ice cream freezer, and 25-cent hot dogs and 50-cent tacos from 10 p.m. until 3 a.m.

An expanded line of school supplies and personal care items will also be available.

Vendors anticipate benefits as well because more of their products will be visibly available to customers, according to Michael Thomas, Coca-Cola's district sales manager.

"The more you have on display, the more you're going to sell," he said. "With the new Huddle Mart, we have three times as much stuff on the floor. Shopability is what people look for, and this place definitely has that."

The 600 sq. ft. of seating eliminated by the Huddle Mart's construction will be relocated to the Little Store's former location. It is presently being painted and carpeted. LaBella said that discussions have begun with SUB regarding the relocation of Acoustic Cafe but no decision has been reached.

The Food Services-funded project was a creative conglomeration of University officials. According to LaBella, a large amount of money was saved since no outside contracting was necessary for the store's design.

"We saved at least $40,000 by not hiring a designing consultant for the project," he said. "It was a real fun project to put together and we hope students and faculty will like it."

The new store will be open from 7 a.m. - 3 a.m. daily during the academic year.

A student takes her pick of the numerous candies packed into The Huddle Mart's Wall of Candy, one of several new amenities available in LaFortune's recently expanded convenient store.

Summer revisions change cover, contents of du Lac

By MATTHEW LOUGHRAN
Associate News Editor

This summer's revisions have given du Lac new proportions, new information and a whole new look.

"Probably the biggest changes we made are the addition of the academic code of honor, some changes to the chapter on student behavior and the section that we included about student services," said Bill Kirk, assistant vice president of Residence Life.

The Campus Life Council, a body composed of students, faculty, rectors and staff, made recommendations for changes during its final meeting last year. The senior staff of the Office of Student Affairs, including Professor Patricia O'Hara, Kirk, Sister Jean Lenz, Father Peter Rocca and Ann Firth, then spent the summer months revising the book.

"They made a lot of positive changes to it," said Jeff Shoup, director of Residence Life, whose office distributes the book. "A lot of the ideas from the CLC were incorporated. They made a lot more user-friendly with some nice extras about residence halls and disciplinary hearings."

The new du Lac contains pictures, chapter separations and quick reference sections that were absent in previous editions.

"We made it more coherent and clear," Kirk said. "We have clearly identified chapters for each topic. University standards of conduct and discipline are in one chapter, student government another."

This summer's revisions added 63 pages to the book. Among the new sections are complete printings of the alcohol policy and academic code of honor and a student handbook.

"We also added a section to the chapter about all-hall semi-formals," Kirk said. "It allows for dorms to hold events that might not look like the traditional semi-formal and not need the two-thirds support that a semi-formal requires. It allows the people in the dorms to exercise creativity in planning events."

Last year the CLC sent three resolutions to O'Hara requesting her consideration of changes to the content and presentation of du Lac. The only resolution that O'Hara initially accepted requested that the book include a section on student services.

The second resolution, which first came with resistance, asked O'Hara to include a written series of rights in disciplinary proceedings.

O'Hara's response to the resolution indicated that she wanted to avoid the legalistic tone of the word "rights."

However, the current copy of the book now says any student charged with violations of University policy is entitled to the following rights in an Administrative Hearing setting."

William Kirk explained that the changes would make students' ease in understanding.

"We wanted to keep du Lac an educational as opposed to legal," said Kirk. "But what we did was give a list of what the students are entitled to."

The second resolution asked that the senior staff include students, rectors and faculty in the revision process.

In her letter of response, O'Hara said, "I found myself unable to accept this resolution."

"New language was added to page four of du Lac last year that calls upon the assistant vice president of Residence Life to identify to the campus Life Council in the coming weeks those policies in du Lac under consideration for revision this summer," O'Hara explained in her letter.

"This allows the Campus Life Council to spend time during the spring semester if it wishes to develop whatever input, perspective or recommendations the council would like Residence Life and Student Affairs to consider in the du Lac revision process."

During the debate over whether the resolution should pass the CLC, Kirk asked that the council give the present process a chance to work before initiating a new one.

According to the same letter, Kirk will review the changes in du Lac for the CLC at its first meeting of the year on Monday.

The non-discrimination clause on the fourth page of du Lac, the subject of a student rally in April, was one of the aspects of du Lac that was not changed over the summer.

"That is a matter for the officers of the University," Kirk said. "It is being reviewed by them and was not in our power to change."

The rally, held by the College Democrats, asked that the officers add sexual orientation to the clause.

Profs. officials take on new positions

Father Edward Malloy, University president, has been elected to a fifth three-year term on the Board of Regents of the University of Notre Dame and to a five-year term on the board of the University of St. Thomas.

Portland was founded in 1901 by the Congregation of the Holy Cross, which founded Notre Dame in 1842. Portland’s president, Father David Tyson, is a Notre Dame alumnus and a fellow of the University.

St. Thomas is a Catholic liberal arts university with a main campus in St. Paul, Minn., and a secondary campus for graduate business studies in Minneapolis. It was founded in 1885 and enrolls some 10,400 students.

Malloy is in his 10th year as Notre Dame’s president.

Douglas Kmiec, professor of law at Notre Dame, will take a leave of absence from the University during the 1997-98 academic year to accept the Dorothy and Leonard Strauss Distinguished Chair in Law at Pepperdine University in Malibu, Calif.

Kmiec held the Strauss chair from 1995-96, and is the first law professor to be awarded Pepperdine’s highest faculty honor twice.

While on a previous leave from Notre Dame, Kmiec was assistant attorney general in the Reagan and Bush administrations. He is a graduate of Northwestern University and the University of Southern California Law Center.

Bishop Donald Trautman of Erie, Penn., has received the 1997 Michael Mathis Award from Notre Dame’s Center for Pastoral and Liturgical Studies. The Mathis award, named for the Holy Cross priest who established Notre Dame’s liturgical studies program, is annually conferred on the center on people who have made “a significant contribution to the ongoing renewal of pastoral liturgy and life in the spirit of Vatican Council II.”

Trautman, the 15th recipient of the Mathis award, chaired the U.S. Catholic Bishops’ committee on the liturgy from 1993-96. During his tenure the committee considered revisions of the lectionary and sacramentary, the principle texts used in all Catholic liturgies and submitted them for a vote by the bishops’ conference later this month.

Sister Eleanor Bernstein, director of the center, praised Trautman for the “keen insight, courage, persistence and dedication” of his chairmanship. “The U.S. church owes him an enormous debt of gratitude,” she said.

Trautman was awarded at a ceremony concluding the center’s annual Pastoral Liturgy Conference at Notre Dame.

University provost Nathan Hatch announced two additions to his staff: Mary Pugel and Collin Meisner.

Pugel, a communications and planning specialist from Seattle, was the University’s most recent administrative assistant to the provost at Notre Dame. Pugel graduated from the University of Washington.

Pugel most recently was a senior consultant for development, enrollment management, strategic planning, and special projects for the Madison, Conn.-based Catholic School Management Inc. She began work at Notre Dame on July 1.

Pugel previously served as the first lay director of development for the West Coast Province of the Sisters of St. Joseph of Carondelet in Los Angeles from 1987-90, and also served as a consultant to diocesan offices with the Seattle Catholic Children’s Hope from 1985-87.

She has spoken nationally, regionally and locally for the National Catholic Educational Association, and has had articles published by the NCEA, the Council for the Advancement and Support of Education and the National Association of Secondary School Principals.

Meisner, most recently a visiting assistant professor in the Program of Liberal Studies (PLS) at Notre Dame, has been appointed assistant provost of the University.

Pugel is a native of Canada, Meisner holds a bachelor’s degree in English and philosophy from the University of British Columbia. He earned a doctorate in English literature from Notre Dame in 1995 and served on the University’s PLS faculty from 1995-97.

Meisner is a graduate of Carondelet High School in Portland and of the University of Washington. He has been active in several Church and community organizations in the Seattle area and along the West Coast, including service on the boards of Holy Names Academy and the Seattle Emergency Housing Service and St. Mary’s Academy in Los Angeles.

Meisner, most recently a visiting assistant professor in the Program of Liberal Studies (PLS) at Notre Dame, has been appointed assistant provost of the University.

A native of Canada, Meisner holds a bachelor’s degree in English and philosophy from the University of British Columbia. He earned a doctorate in English literature from Notre Dame in 1995 and served on the University’s PLS faculty from 1995-97.

He is the author of “Henry James and the Language of Experience,” which is under contract for publication next year with the Cambridge University Press, and has two other works in progress.

While working on his doctorate, Meisner was selected as a 1994-95 Humanities Seminar Fellow at Notre Dame and also earned a graduate teaching fellowship and a dissertation year fellowship.

His appointment was effective July 1.

Failed power systems leave ship unable to generate more oxygen

By MARCIA DUNN
Associated Press Writer

The three men aboard Russia's rundown Mir space station were left without any way to generate oxygen Monday after both their primary and backup systems failed, at least temporarily, NASA reported.

U.S. space officials said they wouldn't know whether the two Russian cosmonauts and one American astronaut on board were able to fix either of the oxygen-producing devices until the next scheduled communication with the station on Tuesday morning.

Nonetheless, one NASA official called it a potentially serious problem - one that could force an evacuation.

"It could be that tomorrow it could be no problem, or it could be a fairly significant problem," said NASA spokesman Ed Campion.

"If you can't get either of the two systems back up, then you're facing a serious situation."

At the time of the cosmonauts' last communication Monday with Russia's Mission Control outside Moscow, they were struggling to fix the secondary fuel-burning system.

The primary Elektron generator, which had been turned off since last week to conserve power, had shut itself down Monday after it began overheating, Campion said.

"Before they went to bed, they may have gotten things fixed. We just don't know," Campion said.

In Russia, calls to Mission Control for comments were left unanswered after NASA disclosed the problem.

CNN reported that a Russian Mission Control official said a cosmonaut radiated that the primary oxygen system had been fixed before the crew apparently went to sleep. Even if both systems remain broken, Mir has enough oxygen to last several days, Campion said from the Johnson Space Center in Houston.

What's more, NASA astronaut Michael Foale and his two Russian crewmates could stretch their air supply by using oxygen tanks set aside for upcoming spacewalks, NASA officials said they did not know how much oxygen those tanks held.

If neither oxygen-producing system can be restarted over the next several days, Foale and his two Russian crewmates would have to abandon ship in the attached Soyuz capsule.

There have been repeated problems with the new Elektron generator, carried up by space shuttle Atlantis in May. But this is the first time since February that a crew has had serious trouble with the backup system, in which solid-fuel canisters are ignited to produce oxygen.

One of these canisters bursts into flames in February in filling the station with smoke and almost causing the crew to evacuate.

The cosmonauts were trying to ignite a canister, or candle, Monday when the system failed. They replaced the igniter mechanism but the canister still would not burn.

"This may be nothing more complicated than putting a new candle into the mechanism and they're back in business," said another NASA spokesman, Rob Navias.

If they take about 1 1/2 hours to circle the Earth, and Russia only has tracking stations in Ukraine and Russia.

Therefore, Russian ground controllers could communicate with the station only for about 20 minutes each orbit, when the station passes over its territory.

There was a bit of good news Monday aboard Mir. Commander Anatoly Solovyov reported that power was flowing through the makeshift hatch that he and Pavel Vinogradov installed during an internal spacewalk Friday to restore power.

Indeed, Russian flight controllers verified that an additional 40 amps of electricity were flowing into the station. But commands sent to move three of the four solar panels mounted on the outside of the ruptured lab module were unsuccessful.

"There's definitely power coming from the arrays," Campion said. "But much and what the total capability is is going to take a while to become defined."

Until Monday, the station had been flying at half-power as a result of the June 25 collision with an unmanned cargo ship.

Russian space officials, meanwhile, disclosed Monday that the collision may have left as many as seven tiny holes in the sealed-off Spektr lab module.

The head of the Russian Space Agency, Yuri Koptev, said the cargo ship bounced off Mir seven times.

Space officials also said they believed only one or two holes were punched in the Spektr module.

Study: Despair can cause heart problems

By MELISSA WILLIAMS
Associated Press Writer

DALLAS

Middle-aged men who feel hopeless or think of themselves as failures may develop atherosclerosis, the narrowing of the arteries that leads to heart attacks and strokes, faster than their more optimistic counterparts, researchers report.

People who expressed high levels of despair had a 20 percent greater increase in atherosclerosis over four years, according to a report in the Aug. issue of the American Heart Association journal Arteriosclerosis, Thrombosis and Vascular Biology.

"This is the same magnitude of increased risk that one sees in comparing a pack-a-day smoker to a nonsmoker," said lead author Susan Everson on Monday.

"People need to recognize that this sense of giving up that many people feel has strong cardiovascular consequences."

Steps should be taken to try to change their situation so they gain hope or become more optimistic, said Everson, an associate research scientist at the Human Population Center of the Public Health Institute in Berkeley, Calif.

Earlier studies have associated hopelessness with heart disease, heart attack and death from heart disease.

This latest study, however, sought to examine the influence of hopelessness earlier in the disease process, while the arteries were in the process of narrowing.

The findings, while not unexpected, are still noteworthy, said Dr. Marty Sullivan, a cardiologist and associate professor of medicine at Duke University Medical Center.

"This is one of the first studies of humans that has looked at the actual atherosclerosis process and has shown a strong relationship," he said. "I am not surprised that we have now demonstrated that psychosocial factors may play a role."

Atherosclerosis is a progressive disease in which fat, cholesterol, cellular waste products and calcium collect in the blood vessel walls and reduce the ability to deliver oxygen and nutrients.

Exactly how hopelessness speeds up arteries growing isn't yet clear, Everson said. She noted that depression, anxiety and other types of psychological stress can affect the body's central nervous system, influencing the production of stress hormones.

For Everson's project, men participating in a larger heart disease study in Finland were questioned about their outlook.

Ultrasound scans were used to measure plaque formation in the arteries and ways of narrowing at the start of the study and four years later.

The 20 percent greater increase in atherosclerosis levels in the most despondent group persisted even when researchers accounted for traditional coronary risk factors such as smoking and alcohol consumption, as well as the use of cholesterol-lowering and high blood pressure medications, Everson said.

The rate of increase was particularly marked among men with early evidence of atherosclerosis and those with clinically high levels of despair.

"This indicates that hopelessness is probably an exacerbating mechanism," Everson said.

Execs use Clinton photo to aid $40 million scam

By WILL LESTER
Associated Press Writer

MIAMI

A jewelry company used photos of its executives posing with President Clinton to help defraud 15,000 investors of almost $40 million in a pyramid scheme using cheap necklace kits, investigators say.

The executives fled overseas before the collapse of the fraud, one of the costliest credit card scams in U.S. history, according to authorities.

Losses for banks and financial service institutions could run higher than $20 million after many investors tried to issue "charge-backs" to stop credit card payments to Unique Gems.

"We say Unique Gems was a well-intentioned business, not a fraud," Sharpstein said Monday. "The attorney general jumped in far too quickly to shut it down."

A court-appointed investigator, Lewis Freeman, said about 30 Unique Gems executives and workers attended a Democratic National Committee fund raiser at the Biltmore Hotel in Coral Gables last fall, buying their seats to the Miami dinner with $55,000 that was contributed to the DNC by others. Investigators were trying to determine whether such donations by third parties may be a violation of federal law.

During the event, Freeman said, the executives posed for photos with Clinton, and later reproduced the pictures in newsletters mailed out to potential investors.

"The former first lady, Billie Jean King, was actually seated next to President Clinton," he said. "He was quite enthusiastic about the event." The DNC has no record of contributions from Unique Gems and "in the best of our ability, we'll be assisting the receiver (Freeman) to determine whose names are connected with the donations.

"The DNC will refund the appropriate amount of money," Will Dwyer, spokesman for the House Reform and Oversight Committee, said the information about the Unique Gems' contributions is being circu-

lated among committee mem-
bers, who have focused their investigation on improper contribu-
tions to the political parties and to Clinton.

"I don't know that this has come up before," Dwyer said Monday. "If this has substantial interest, they would look into it."

Sharpstein said the use of Clinton's photo on brochures was ill-advised, but "has been blown out of proportion."

Freeman said the DNC's involvement generated interest in the investigation, but the bigger story is "about people coming into this country, stealing the money and going to Spain to be insulated."
Burger King drops supplier amid bad beef worries

Associated Press

OMAHA, Neb. Embroidled in a bad-beef nightmare, Hudson Foods Inc. thought the worst was over. Then the company was hit with a Whopper-sized wallop.

In an attempt to restore public confidence in its burgers, Burger King yanked Hudson's beef off its grills Saturday. David Nixon, a spokesman at Burger King headquarters in Miami, said the move was permanent.

The restaurant chain also began advertising in newspapers around the country today in an attempt to assure customers that its beef is safe.

The fast-food giant was Hudson's largest beef client. It was unknown what would happen to the company's tidied plant in Columbus following Burger King's decision and a recall of 25 million pounds of Hudson beef, the nation's largest such recall ever.

Burger King competitors McDonald's and Wendy's don't use Hudson meat and weren't affected. Other mega-chains, including Boston Market restaurants and Wal-Mart and Sam's Club pulled the meat last week.

Some consumers, though, were not bothered.

Charlie Hurwitz, 65, ate two Whoppers last week at a McDonald's in midtown New York, as he does three or four times a week.

"I've been around a long time, and people have banned everything at some point. When I went a hamburger, I'm going to order it. I just don't let it bother me," said the retired banker from the Manhattan.

Burger King said it will try to keep the plant open, but the decision will be made only if the Department of Agriculture approves. The company has said the contamination likely came from a supplier.

The recall, forced by a federal probe into possible E. coli contamination, forced restaurants and supermarket chains to scramble for replacement beef Thursday night and Friday.

Burger King, the nation's second-largest fast-food chain, took a huge hit by the recall. Some 1,650 restaurants in 26 states -- or one of every four Burger Kings in the United States -- was reduced to serving chicken and fish for more than a day.

"There's no problem, said Michael Simmonds, president of Restaurant Management in Omaha, which owns 64 Burger King's in Nebraska and Iowa.

"I think Burger King is doing what they have to do. If the USDA is telling them to do it, they have to do it," he said.

Dow Corning offers deal to implant opponents

Company 'agrees to disagree' with foes about danger of breast implants

By BURT HERMAN
Associated Press Writer

DETROIT
Dow Corning Corp. on Monday offered to settle breast implant legal claims for up to $2.4 billion as part of a $3.7 billion plan to get out of bankruptcy, but refused to accept blame.

in making the offer, Dow Corning chief executive officer Richard Hazleton said the company, requires the approval of a bankruptcy court and a two-thirds majority of women suing the company.

The company's $2 billion share of the offering, which was almost $2 billion of the reorganization plan, requires the approval of a bankruptcy court and a two-thirds majority of women seeking reparation for a rupture. Many women will bear the burden of Dow's mistake.

The offer comes days after Dow Corning's half-owner, Dow Chemical, lost a key negligence case in Louisiana over breast implants.

The settlement came as part of the reorganization plan Dow Corning was required to file to recover from Chapter 11 bankruptcy.
The Necessary Evils of Moving In

I hate moving in. Why is it always such a traumatic experience? The first thing to do is to run up the stairs with the key to your new room, only to be greeted by a whole summer’s worth of stale, mildewed air. It will burn your nose and make your eyes water if you aren’t careful. This year, however, I was front of the elevator for about 15 minutes waiting for it. No, it wasn’t the abundance of people who made it so slow; it was us. We were slow. I heard pushing the button actually helps the elevator understand where to pick you up. Imagine that.

After we attended a brief crash course on elevator basics we headed into our room. Both of our mothers were sitting on the couch. Apparently my momma dearest had forgotten that mothering was a full-time job and gave rest first priority over helping her youngest daughter move in. I was a little insulted.

My roommate and I grabbed the cart and started to make a trip to the cars when all of a sudden the wheel blew off of the cart. It’s hard to act nonchalant and mature when a wheel has taken flight. Of course the day would not be complete without a game of king of the hill. A true day to remember.

We walked away the victor in the battle for use of both carts and elevators with only a few visible scars. But I have war stories to one day share with my children.

Back for more

By JOSEPH WEILER
Assistant Accent Editor

For the first 12 years of my education, going back to school at the end of summer vacation was detestable. When summer rolled around at the beginning of June the books were put away, the buses and the baseball gloves came out. The Eskimo Man truck began to once again grace the streets with such venerable favorites as Nutty Buddies, bomb pops and snowcones, accompanied by tunes such as "Pop Goes the Weasel" or "Greenleaves." Everything was right in the world.

But then, August would come crashing to an end along with what I considered the rest of my life. Once again my household was visited by the curse of the 10 o'clock bedtime, and Johnny Carson became my forbidden Juliet. Pop flies in the outfield were replaced with pop quizzes from left field and the endless summer turned against itself and came to a screeching halt.

Enter Notre Dame. Almost one whole year ago today I came to South Bend, Indiana, with a plethora of boxes that I was admittedly unwilling to unpack. I hesitantly ventured forth on my first day of classes and stepped gingerly into DeBartolo Hall, excited to be starting school but a little disappointed that I was not assigned to any sessions in the Golden Dome. Yes, I was a freshman, and the end of summer was never more sorely felt. The Eskimo Man was now completely buried under a frozen tundra that would make the fans at Lamborghini Field shudder. No longer was I afflicted by that irksome 10 o'clock bedtime — instead I was "blessed" with the privilege of staying up all night until class started the next morning if I so desired. But, over time, I learned to adjust, and the school year began to fly by at a speed that was almost intimidating.

I'm not going to go into how great it was last year and how Notre Dame completely changed my life. It didn't. I did have a good time though — in fact I probably had too good of a time. That's probably why, for the first time in my life, I was eager to get the summer over with and pick up where I left off.

Enter this year. Three days ago I moved onto campus and was greeted by the familiar smell of ethanol and freshly cut grass.

She said...

By ASHLEIGH THOMPSON

Summer, for me, represents independence. After nine months of fulfilling the academic cannon that our nation's educators feel compelled to require, we as students are left with three glorious months of sunshine to spend as we please.

For some of my classmates, these months were filled with suit-and-tie internships, while others earned paychecks or endured yet another semester of classes. I, however, enjoyed the opportunity for intellectual and emotional renewal, and maintained a state of complete denial concerning the future that awaits me after my May graduation.

This contented relaxation did nothing to prepare me for the overwhelming pace of the academic year. But after receiving my class schedule in the mail two weeks ago, I regretfully dusted off my planner and bade adieu to my summer tan, and set my alarm clock in an attempt to reprogram my undisciplined body. I resigned myself to the impending insanity that only academia can cause.

This Saturday, nausea replaced the usually gentle feeling that usually accompanies pulling onto campus; instead of thinking of the year ahead, I was more preoccu-...
Duchesne heads back to the States after stint with Ottawa

Steve is an experienced defenseman who provides us with an element of offense with his speed and quickness," Blues general manager Larry Pleau said. "He's a good skater and has the ability to play on the power play.

Duchesne, 32, who joined the Senators in an August 1995 trade with the Illini, had 19 goals and 28 assists in 78 games last season. The three-time All-Star game participant has 188 goals and 394 assists in 11 seasons with Los Angeles, Philadelphia, Quebec, St. Louis and Ottawa.

Kravchuk, 30, a member of the former Soviet Union’s 1988 Olympic champion team, had four goals and 24 assists in 82 games last season.

Comeback is brewing for Milwaukee

Phil Garner is happy his Brewers are back at .500, not that Milwaukee is just 3 games behind first-place Cleveland in the AL Central.

"It's been an objective for us since the start of spring training," he said after Milwaukee beat the Texas Rangers 7-2 Monday night behind Julio Franco's two-run homer.

"We've been there. We've been in the fringe," the Milwaukee manager said. "It seems like we keep stubbing our toes on this hurdle.

Milwaukee (65-65), at .500 for the first time since Aug. 5, has won three straight and eight of 11 to close on the Indians.

"We're not paying any attention to that right now," Garner said. "We'll address that at the end of the season. Right now we've got to continue doing what we're doing, and that's playing some pretty good ball." 

Joel Adamson (4-2), who started in place of injured Brian Hunter's RBI single in the fifth and Juan Franco's 31st homer one inning later.

Thermin hit another RBI double in the seventh, and Franco hit his fifth homer of the season.

"It was a nice clean, quick game for us," Loretta said. "We got a lot of first-pitch outs. We put up some runs on the board. It was a confidence builder all around." 

Tigers 7, Twins 6
Brian Hunter's RBI single in the 12th inning off Rick Aguilera gave the Detroit Tigers a 7-6 win Monday night over Minnesota, the Twins' 14th loss in 15 games.

Minnesota's Paul Molitor went 2-for-5 and moved into 14th place on the career hits list with 3,144. Molitor, who passed Robin Yount (3,142) is just behind Paul Waner (3,152) and George Brett (3,154).

Brad Radke, attempting to become the second 18-game winner in the major leagues, didn't get a decision for the first time in 23 starts since April 27. Radke allowed six runs — his highest total since Aug. 14 against Boston — and six hits in five-plus innings.

Minnesota dropped its fourth straight.

Matt Walbeck opened the 12th with a single off Aguilera (4-4), advanced to second on a sacrifice by Dave Cruz before scoring on Hunter's bloop single to left. Before Walbeck's single, Minnesota relievers had retired 13 consecutive batters.

A.J. Sager (3-4) pitched two hitless innings for the victory.

Rookie Brent Brode drove in three runs for the Twins, going 3-for-3 with his first career homer, a two-run shot.

Melvin Nieves and Walbeck homered for Detroit. Tigers starter Scott Sanders gave up three runs and six hits in five innings.

Trailing 6-3, Minnesota tied it with a two-run second and took the lead with three runs and six hits in five innings.

Steinbrenner is interested in buying the NHL's New Islanders, according to an intermediary, about purchasing the Islanders, according to several persons close to the NHL and major league baseball, the Newark Star-Ledger said Tuesday.

Steinbrenner was traveling Monday and was unavailable for comment.

The Islanders are up for sale for the second time in less than a year after John Spano's purchase for $165 million was nullified by the league last month. Spano failed to make several scheduled payments and faces federal fraud charges in several jurisdictions, including New York, Texas and Boston.

Brett Pickett, the son of Islanders owner John Pickett, refused to divulge the identity of any suitors for the team, indicating there were due diligence negotiations, and several are close to talking numbers," he told the Star-Ledger.

The Islanders more than two months, "have not followed up over the past 10 months," Steinbrenner's group purchased the Islanders in 1973 from CBS for $10 million. Steinbrenner's family owns 53 percent of the shares in the New York Yankees Partnership, and the team is worth at least $250 million, possibly much more.

In 1981, Steinbrenner seriously weighed a bid to buy the NHL's Colorado Rockies, but was beaten out by rival and former Islanders limited partner John McMullen, who moved the team, now the New Jersey Devils, to the Meadowlands.

In the late 1980s, Steinbrenner also made preliminary inquiries about the availability of the NHL's New Jersey Nets.

Between September 1991 and May 1992, Steinbrenner owned a single-digit minority in the NHL's Tampa Bay Lightning.

His interest was bought out by a Japanese corporation, Kokusai Green Co. Ltd., which owns the team.

Four major league baseball teams — Anaheim (Walt Disney Co.), Atlanta (Time Warner Inc.), the Chicago White Sox (Jerry Reinsdorf) and Florida (H. Wayne Huizenga) — have controlling owners who also control a major league team in another professional sport.

But Pickett, whose law firm — Blackwell, O'Neill — is representing his father in sale negotiations, indicated there is no shortage of potential purchasers for the team.

McMullen, Spano's interest was bought out by rival and former Islanders limited partner John McMullen, who moved the team, now the New Jersey Devils, to the Meadowlands.

In the late 1980s, Steinbrenner also made preliminary inquiries about the availability of the NHL's New Jersey Nets.

Cubs finally catch fish, snap Fernandez’s streak

Dannir Fletcher hit a solo homer and Mike Lansing had an RBI single off St. Louis starter Manny Aybar (0-3). The Cubs followed five hits and two runs in eight innings.

Through the first eight innings, Fernandez allowed only five back-to-back singles in the fifth to Lankamp and France. Then he lasted 3 2-3 innings, giving up six runs and six hits in seven innings, Chicago's manager Dave Chalk said after his game-ending 1-0 loss.

The Pirates rallied to score runs with two outs in the seventh double play. It was Martinez’s second consecutive loss.

It is the first time in a decade that the Pirates played the Cardinals and the Cubs scored six runs in eight innings.

Like Johnson, Estes (17-4) has also found success against the Mets. The left-hander improved to 4-0 in his career against New York, including six wins in all since this series started. He allowed seven baserunners in seven innings and six runs in 2-3 innings.

Estes left after consecutive infield singles with two outs in the seventh.

Fernandez relieved and Rod Beck pitched hitless relief over the final 2 1-3 innings.

The Pirates rallied to score runs with two outs in the seventh double play. It was Martinez’s second consecutive loss.

The Cardinals catcher Tom Lankamp, who got St. Louis’ first hit in the fifth inning, said it was encouraging to see Martinez’s totals.

"It’s a good game to have as a coefficient," Martinez said. "I’m not sure if that’s the right word.

"I’m not sure if that’s the right word.

He worked hard tonight." Martinez said.

He’s good at it and hit it into right field. It just didn’t work for me or the whole team.

"He’s good at it and hit it into right field. It just didn’t work for me or the whole team.

"It was one of those days when its real tough to say the offense had much to hit," La Russa said.

He’s good at it and hit it into right field. It just didn’t work for me or the whole team.

"It’s been better than that," Alou said. "That’s just a normal presentation. Every five days is the highlight of our life. Martinez is going through a career’s worth of memorable home runs ahead of everybody early. That’s my only 28 runs in Martinez’s last 11 starts.

"It feels really good about it," Martinez said. "I thought I could get that last batter.

"I’m so exhausted, I almost don’t have words to describe it," Ramirez said. "It was another storybook finish in a storybook game.

Edgardo Alfonzo and Bernard Gilkey started the game after getting out of the ninth and went to third on a groundout. The game started winding up and out to the play to end the inning.

"It feels really good about it," Martinez said. "I thought I could get that last batter.

"It’s been better than that," Alou said. "That’s just a normal presentation. Every five days is the highlight of our life. Martinez is going through a career’s worth of memorable home runs ahead of everybody early. That’s my only 28 runs in Martinez’s last 11 starts."

Junior Lindsay Treadwell and her teammates are the favorites to win the Big East championship this season.

Setters atop Big East again

Since joining the Big East conference the Notre Dame volleyball team's play in the conference has been nothing short of dominant, and things look to continue that way this year.

Head coach Debbie Brown again finds her team atop the Big East coaches' poll as they will be aiming for their third conference championship.

Notre Dame, ranked No. 17 in the 1997 AVCA USA Today pre-season poll, has yet to be defeated by a Big East opponent since joining the conference though the stiffest competition will come from the Pittsburgh Panthers.

The Panthers find themselves in a familiar spot looking up at the Irish, finishing second in the Big East the past two seasons.

Last season, Notre Dame finished with a mark of 22-11 overall and an 11-0 record in the Big East. Despite the graduation of four players, the Irish are poised for another Big East title with the return of last season's Big East Player of the Year Jaimie Lee along with her classmates Carey May and Angie Harris.

The Irish will begin the season when they host the Shamrock Classic this weekend, and conference play opens Oct. 3 when they host St. John's.
Head coach Chris Petrucelli liked what he saw of his team in their exhibition victory over Missouri.

W. Soccer
continued from page 28

Her debut, Makinen competed in 40 international games for Finland.

"Even though I'm a freshman, I have a lot of experience and am older than most of the players on the team," said Makinen. "I think that has helped me a lot so far. Now I just hope to keep working hard and get better."

Petrucelli hopes that Makinen and the rest of the freshman can get better in a hurry as the squad will be tested early and often.

Early in September the Irish will head west to take on Washington and Portland and Notre Dame will play host to the Adidas/Lady Footlocker Classic September 19-21.

All eyes of the women's soccer world will be focused on South Bend when top-ranked North Carolina, Duke, and Portland will all be in town.

WASHINGTON HALL—Bruce Auerbach, Director of Theatre of Notre Dame Communication and Theatre, has announced that the annual reception for students interested in theatre will be held Wednesday, August 27, at 6:00 P.M. in Washington Hall.

Students interested in acting, directing, sets, costumes, lights, management, or theatre as a major are encouraged to attend.

Theatre at Notre Dame is open to all students—majors and non-majors—who wish to participate. A wide variety of activities is available including: acting, scenic design and construction, costume design and construction, lighting design and execution, marketing, directing and stage management. There are theatre opportunities to fit every schedule and level of talent. If you have a willingness to learn, you are qualified.

Becoming involved in theatre is an excellent way to meet new people, make new friends, and have a great time while involving yourself in the creation of something special on campus.

This season, the Department of Communication and Theatre (COTH) will present a mainstage season consisting of five plays as well as many other acting and directing projects. Mainstage productions this season will be:

Rosencrantz and Guildenstern Are Dead
The Complete Works of Wilm Shakespeare (abridged)
As You Like It

In addition, COTH will host a residency by Actors from the London stage sponsored by the Paul M. and Barbara Henke Visiting Scholars Series, and Father David Garrick will stage a reading of his new play The Escape of Knapkin. Acting and directing projects are showcased at the end of each semester. All of these projects will need a great amount of student support. There are positions for all who wish to participate.

Auditions for the first two plays of the season will be held Wednesday, August 27, and Thursday, August 28, at 7:00 P.M. If you cannot attend the reception, but wish to be involved or have questions about the program, please call Bruce Auerbach at (219) 631-5957.

hards polish off the last of the "floaters." Finally, 5 a.m. approaches, and sore-headed students stumble up and into a mad dash for the ticket window.

Unfortunately, getting to the camping grounds early doesn't guarantee one a good spot in line. The first person to set up camp may get lost in the shuffle or trampled on prior to the first ticket sale. Often times, the most physical students reap the rewards of the best tickets. Nevertheless, the adventure comes to a happy conclusion when the student, with ticket in hand, is free to go home and revel in his or her accomplishment.

The ticket itself stands as a symbol of the special aura or rare camaraderie among students that emerges over the course of this unforgettable evening. Maybe it's the stars in the sky or the smell of cheap beer that permeates the air, but there is something magical about an event where friends get together and create memories that will last forever.

So as the annual event approaches, it is important to make the most of this special occasion. There are only so many opportunities to experience the thrill of Ticket Night, and regret seems to go hand in hand with skipping out on the event.

Indeed, missing this tradition is like missing part of Notre Dame. The ticket itself stands as a symbol of the annual event.

PRESEASON POLL

1. St. John's 9-1-1 22-2-2

1997 BIG EAST MEN'S SOCCER

Big East coaches gave the Irish a three place ranking in the preseason poll. Last season the team finished fourth in the conference.

The strong defensive performance by the Irish appears to be a sign that the graduation of key seniors Brian Engesser and Peter Gandier will not be detrimental to the suffocating style of defense that propelled Notre Dame to success in last year's historic season.

The Big East coaches gave the Irish a third place ranking in the pre-season poll. Last season the team finished fourth in the regular season.

Only St. John's last season's NCAA champions and Rutgers stand above the Irish in the pre-season rankings.

The ticket itself stands as a symbol of the special aura or rare camaraderie among students that emerges over the course of this unforgettable evening. Maybe it's the stars in the sky or the smell of cheap beer that permeates the air, but there is something magical about an event where friends get together and create memories that will last forever.

So as the annual event approaches, it is important to make the most of this special occasion. There are only so many opportunities to experience the thrill of Ticket Night, and regret seems to go hand in hand with skipping out on the event.

Indeed, missing this tradition is like missing part of Notre Dame.

Lady Irish tame Tigers in pre-season contest

Notre Dame dominates in 1997 debut
By JOE CAVATO
Assistant Sports Editor

Chris Petruccelli’s squad was up to its old tricks of a year ago this past Sunday when they hosted the Missouri Tigers in an exhibition match.

Leading the way were junior Monica Gerardo and senior Holly Manthei. Gerardo nelted a hat trick and added two assists in the 11-0 thrashing. Manthei, who set a women’s school record for assists last season, had three in the contest.

“For a first game, I think we came out well and had a good evaluation, but they have helped pick up the slack. That has really been the key so far this year.”

The second-ranked Irish completely dominated the Tigers as the hosts amassed 47 shots on goal compared to just three for Missouri. Netminder LaKeysia Beene, who is looking to fill the shoes of all-world Jen Ienola, recorded two saves on her way to the shutout on a day in which her skills were not needed or tested frequently.

“LaKeysia didn’t get too many chances, but she made the plays when she had to,” said Gerardo. “Jen was a great player, and we will miss her, but LaKeysia will do a good job, and we’ll be fine at goal.”

Midfielder Ane Makinen, a midfielder from Kelsinki, Finland, made her first appearance in the Blue and Gold, notching five shots on goal in her debut.

“Petrucelli’s squad was up to its old tricks of a year ago this past Sunday when they hosted the Missouri Tigers in an exhibition match.”

“The freshmen had an impressive debut in an Irish uniform as she scored her first goal.
