25 years later, the famed Supreme Court decision still sparks heated debate.

BY KRISTI KLETSCH Assistant News Editor

In 1973, a woman named Norma McCorvey decided to challenge a Texas law which outlawed abortion, provided that the woman's life was not at stake. What ensued was a court struggle which eventually arrived in front of the Supreme Court. In a 7-2 decision, Justice Harry Blackmun delivered the majority opinion in the case.

ND prof will speak to Senate subcommittee on 'Roe v. Wade: The Test of Time'

By MELANIE GARMAN Assistant Saint Mary's News Editor

Twenty-five years has elapsed since the Supreme Court officially declared abortion constitutional, but much debate and controversy still surround the landmark decision. In memory of the Roe v. Wade decision, the United States Senate subcommittee on the Constitution, Federalism and Property Rights is holding a hearing entitled "The 25th Anniversary of Roe v. Wade: The Test of Time." Gerald Bradley, professor of law at Notre Dame and life-supporter, is one of several professors, senators and other speakers delivering testimony at the hearing today.

The Hyde Amendment was passed by Congress which bans the use of Medicaid & federal funds for abortions.

2000

1997 - Abortion debate moves towards "partial-birth abortions."

1989 - In Webster v. Reproductive Health Services, Supreme Court upholds a Washington state law declaring that "life begins at conception" and barring the use of public facilities for abortions.

1976 - The Hyde Amendment is passed by Congress which bars the use of Medicaid & federal funds for abortions.

1970

1974 - The National Science Foundation Authorization Act prohibits federally funded research using fetal tissue.

1973 - The Supreme Court, in a case entitled Roe v. Wade, granted women the right to have an abortion.

Saint Mary’s conference to focus on leadership

By MELANIE GARMAN Assistant Saint Mary’s News Editor

Tomorrow will mark the beginning of the eighth annual Play of the Mind conference at Saint Mary’s College. Students and faculty from 12 different Catholic women's colleges across the nation will be present this weekend to discuss issues of intellectual growth, responsibility, and leadership.

The idea for the conference began in 1991 with a group of Saint Mary’s students and faculty working on a campus college project with the same interest in developing and strengthening the intellectual community. A focus group discussion of professors sparked the idea, and the Play of the Mind was eventually developed.

The conference is funded by the Student Government Association and the U.S. Department of Education Fund for the Improvement of Postsecondary Education.

Each year Saint Mary's College hosts the Play of the Mind conference with a unique theme which describes the direction the weekend will take. "Borders to Bridges — The Women’s College Challenge" is this year's theme of the conference and encompasses every aspect of women as leaders both inside and outside of the classroom.

"We want the women to feel the wellness and excitement for life both inside and outside of the classroom," said Patrick White, associate dean of faculty and project director. "Students sometimes feel that they must be everything to themselves and everyone around them. That is when we created the Play of the Mind conference."

Over the years, as the focus and direction of the conference have changed and grown, two factors have remained constant. First, all voices have equal weight, and second, real change and innovation have always occurred.

We are never exactly sure what the conference will have in store for us, however there is always an abundant amount of talk and planning on both the students and faculty behalves," White said. "Some exciting discoveries that originated during the Play of the Mind conferences were Clarissa Dalloway's Coffeehouse, The Community Leadership Team (COLTs), student involvement in last year's presidential search, the Women's Center and the Student Academic Council newsletter."
BLOOMINGTON, Ind.

Eric Earl Sidney died Thursday doing what he loved most in life. He was sketching in an art studio in Morgan Hall.

When a friend discovered the 24-year-old student lying face down on the floor around 8 p.m., a pencil was still tightly clasped in his hand. His family and friends, including 16 Indiana University art students, gathered in Independence Mall, Sunday to mourn Sidney.

"It didn't seem real; it still doesn't," said his mother, Shirlie Sidney, Monday before the funeral.

Monroe County Coroner George Harrison said: "He's not real; he's just lying there."... ight to his last live show. The tall and short athletes who attended were allowed to sit in the front of the crowd, while those who weren't as tall might be pushed back. During the event, those sitting in the front were treated to lollipops and soda, while those in the back sipped from cups of water. Michigan football player Terrence Quinn, who helped produce yesterday's program, said the event aimed to remind students of the adversity black people have faced. "I am sure the experiment will change some minds about what really went on during Martin Luther King's struggle," Quinn said.

As the rally began just after 2 p.m. on the mall in front of the Union, honked and waved as protesters' cries of "Freedom!" resounded off the downtown buildings.

Bloomington: 37

After a brief statement, Lombardi has agreed to resign as president, following the public disclosure of a slur he made toward were calling for terrorist charges while Copnland's "Old American" echoed off the downtown buildings.

More than 200 people of all ages, races and backgrounds marched almost two miles in the streets of downtown Minneapolis Monday afternoon to protest police brutality. The rally began just after 2 p.m. on the mall in front of the Hennepin County Government Center. After a brief statement from organizers, the procession set out for St. Michael's Church in South Minneapolis. More than 15 people from the University, including members of the Progressive Student Alliance, the Latin American and Black Student Alliance, the Women and University faculty joined the protest. Onlookers honked and waved as protesters' cries of "If we don't get justice, they don't get no peace," and "The people, united, will never be defeated," echoed off the downtown buildings.

Peterson's northwest Tennessee sound inspired a whole generation of blues and rock and roll artists, from John Lee Hooker and the Beales. His song, "Blue Suede Shoes," got audiences up and dancing till, more than 30 years after he first recorded it. He had a cheery demeanor at all times and, in an interview included in that CNN tribute, asked that he be remembered for his more emotional, popular songs like, "Daddy Sang Bass," a hit for Johnny Cash years ago.

His death adds to the pallor over the blues, soul and rock and roll fields fueled by the deaths of Johnny Copeland, Luther Allison and "The Godfather of the Blues" junior Wells.

While Copeland and Allison were little known bluesmen who had just recently begun to gain prominence, Wells' death last week in a Memphis hospital, silenced that so many great musicians had just recently begun. His "moving with the Muddy Waters Club" that Muddy Waters was playing in during a tour of the country together. Watch for the news you brought to our lives.

Junior Wells and his friend Buddy Guy performed at the club that Muddy Waters was playing in during a 1951 tour of the country together. While Copeland and Allison were little known bluesmen who had just recently begun to gain prominence, Wells' death last week in a Memphis hospital, silenced that so many great musicians had just recently begun. His "moving with the Muddy Waters Club" that Muddy Waters was playing in during a tour of the country together. Watch for the news you brought to our lives.
Ellis establishes fund for hometown students

By CHRISTINE KRALY
News Writer

In the tradition of a growing group of former Notre Dame athletes which includes Chris Zorich, Johnny LaFajrk, and Jerome Bettis, LaPhonso Ellis has established a scholarship endowment at the University of Notre Dame. Ellis, a 1992 graduate of the University and member of the NBA's Denver Nuggets, has created an opportunity for aspiring Notre Dame students in his hometown of East St. Louis, Ill. The scholarship will be implemented at the beginning of the 1998-99 academic year and will be offered to students who attend either East St. Louis Senior High School or East St. Louis Lincoln High School, from which Ellis graduated in 1988.

"We are deeply appreciative that 'Phonz' is helping in this area (financial aid) while also assisting young people from his hometown," said Father William Beauchamp, the University's executive vice president.

"It was an opportunity to give back," said Jeffrey Pethick, scholarship coordinator for the Office of Financial Aid. "It's rare that you hear about some of the great things that the graduates have done to help out either here at the University or in their communities. "With this new scholarship, Ellis seems to be doing both."

"I think it was a way for LaPhonso to do something for the University and for the kids at East St. Louis High School," said Notre Dame basketball coach John MacLeod, who has also created a scholarship for the University.

Ellis joins many Notre Dame student athletes in establishing financial aid for aspiring students. "Athletes tend to have pretty positive experiences at whatever college they go to," said assistant director of Sports Information Michael Enright. "They (athletes) feel a bit of debt to the University for what the University and what college sports have done for them. They also feel a great warmness for their alma mater."
service and challenged in infringement of a constitutional provision. Although Bradley would like to see a challenge in Roe v. Wade, he believes that "the Supreme Court is not going to reverse its decision any time soon ... at least for a decade." Bradley recognizes that change is still in the future, although he also believes that a judicial trend to be more sympathetic to arguments of abortion regulation currently exists.

### Decision

which became one of the most controversial decisions in judicial history.

Roe v. Wade officially declared that a woman has a right to privacy that is protected by the 14th amendment, which allows her the choice to abort a fetus. Although the court recognized the importance of a woman's right to her body, it also sympathized with a state's interest in preserving life.

In the second and third trimesters, Blackmun recognized the state's interest in protecting the woman's health and outlined a new judicial philosophy on abortion regulation. The result was subsequent attempts at abortion legislation, some which failed, but others which were successful. In 1976 Congress passed the Hyde Amendment, which banned the use of federal funds for abortions. This legislation was upheld by the Supreme Court four years later. Yet from 1976 to 1981 a judicial policy based on the "right to privacy" received little encouragement for the pro-life cause. The courts struck down numerous state laws during this time which individual states had attempted to make a decision to have an abortion.

In 1989, a countervailing opinion on the Supreme Court provided the perfect backdrop for the legal issues which would be discussed in the Roe v. Wade decision. The case came in the form of a case entitled Webster v. Reproductive Health Services. In this case, reproductive health services challenged an Missouri abortion statute which stated that life begins at conception, and that unborn children have interests that need to be protected. The law also prohibited the use of public employees and facilities to perform abortions not necessary to save a woman's life.

Many hoped that the Supreme Court would rule in Missouri's defense and inadvertently reverse the Roe v. Wade decision. The decision did support the Missouri statute, yet the Supreme Court did not have the majority to overturn the earlier decision. Rather, the Webster decision narrowed the scope of the Roe v. Wade decision and prof­file supporters with hope.

More hope arrived in 1992, when the Supreme Court heard the case Planned Parenthood v. Casey. In this case, the Supreme Court upheld numerous provisions of the Pennsylvania Abortion Control Act of 1982. The court upheld a 24-hour waiting period law, a parental consent law and a provision which imposed certain reporting requirements on facilities providing abortion services.

Although this case did not alter the basic premise of Roe v. Wade, it did demonstrate the court's tolerance of abortion regulation.

In 1994, despite her position over two decades earlier, Norma McCorvey, alias Jane Roe, was befriended by Flip Benham, the national director of Operation Rescue, and declared to the world her pro­life position. In 1995, McCorvey was baptized as a Christian.

As the world celebrates the 25th anniversary of Roe v. Wade this Tuesday, thousands of people will gather to protest the annual "March for Life" held in Washington D.C. The decision still stands sound on its original constitutional principle, yet many regulations and subsequent cases have chipped away at the scope of the Roe v. Wade case. The debate over abortion still consumes much public interest, and the future consistency of the court is unknown.
Cloned cows may produce medicine for humans

BRISTOL

On a ranch in Texas, a herd of cows is about to give birth to what may be the future of the pharmaceutical industry. Scientists said Tuesday they have developed a technique for cloning genetically customized calves that will be able to produce medicine for humans in their milk.

The first cloned calves -- George and Charlie -- were born last year, giving hope that cloned cows could become living pharmaceutical factories. "The applications for this in combating malnutrition are enormous," said Dr. Steven Stice of Advanced Cell Technology Inc., one of the collaborators in the project. Stice and other researchers, said they will next try to use their technique to have cows make human serum albumin, a blood protein that regulates the transfer of fluids in the body, is crucial in people suffering from burns, and other conditions. Cows that could produce human serum albumin would be a huge boon to hospitals, which are forced to rely on donated blood for the 480 tons of albumin needed every year.

Two bombs kill 11 in Algeria

Associated Press

The head of a European delegation called on Algerian authorities Tuesday to be more open about the violence as the body of a woman was found in a US embassy car bomb attack on Monday.

The European Union would reopen its office in Algiers shortly -- a sign that such dialogue might continue. He also said the European Union would plan an "exchange" of parliamentary delegations to Algeria.

In the latest attacks to beset the country, hospital sources said Tuesday that four people were killed and 24 injured -- two critically -- in a bus explosion in Ben Arous, in the hills above this Mediterranean port city. It was the first such bombing inside the capital since the start of the Muslim holy month of Ramadan on Dec. 30, which has seen a new wave of violence.

As the 24-hour visit wound down, three ens were reminded of the urgency of their mission when two bombs exploded, one inside an Alig's bus and another at a market in the town of Zeralda, killing up to 11 people.

The visit by envoys from Britain, Austria and Luxembourg was the first joint Western effort to help end violence that has killed an estimated 75,000 people since 1992. The delegations announced they will use their influence at the European Union office here, but at the same time urged the military-backed government to be less distrustful of the West in recent years.

The government has consistently refused to allow independent groups to undertake an investigation into the chronic violence. They have blocked human rights inquiries and have severely restricted journalists' access to the country.

Algeria's minister for cooperation, Lahbene Mounaoua, on Tuesday reiterated the government's refusal of humanitarian aid or an investigation into human rights.

The government has often characterized such efforts as "unacceptable." But it had appeared to be a break, however glancing, at the time, between the government and the West in recent years.

The visit Monday and Tuesday appeared to be a break, however glancing as their mission was characterized Algerian dealings with the West in recent years.

The second explosion, which killed 24 people and wounded two critically, was followed by an exchange of rockets, mortar fire and gunfire near the capital and a US embassy car bomb attack on Monday.

The incidents appeared to be linked to the insurgency, which was triggered by the army's cancellation of 1992 legislative elections.

New evidence may identify unknown soldier

Associated Press

“In view of the unknown soldier's constituents, we have been able to identify a number of persons, family members of individuals who should be included in the list,” said Maj. Gen. Michael不知道姓氏, the press secretary of the National Cemetery.

The Pentagon spokesman said Tuesday, “We certainly have an obligation to family members of those individuals who are still missing and we will do that.”

The American military has long been criticized for its handling of remains of American servicemen. The remains of unknown soldiers date back to World War I. The Vietnam veterans who have been identified were among the most recent to be identified.

Media reports in 1994 stemming from the effort to document prisoners of war and missing in action from Vietnam examined the Blaisio case. The U.S. Vietnam Disarmament, a veterans' publication, reported in July 1996 that the clothing, parachute fragments and other circumstances surrounding the discovery of the remains pointed to Blaisio. CBS News reported in January that the body of the remains was identified to the remains of the unknown soldier.

The incident appeared to be linked to the insurgency, which was triggered by the army's cancellation of 1992 legislative elections.
The 1998 summer session will begin on Monday, June 22 (enrollment), and end on Wednesday, August 5 (final exams). Some courses — primarily in science, mathematics and languages — will begin and end before or after these dates. The summer session Bulletin will contain complete schedule information. The Bulletin will be available at the Summer Session Office (207 Hurley Building) beginning on Friday, February 6. Information on summer courses, as it appears in the Bulletin, is also available at the summer session Web site (http://www.nd.edu/~sumsess/).

Late tycoon pays parental debts

SCHENECTADY In life, Larry Hillblom fit the "11" in DHI, Worldwide Express: even for money-making zest. But his death revealed a private passion: an alleged penchant for boddng young virgins.

In the two years since Hillblom's body was lost at sea, several women from the Far East who say they bore his children have come forward to demand a share of his millions.

Now, the lurid court battle appears to be nearing an end. Last month, a court on the tropical island of Saipan approved a tentative settlement granting 13-year-old Larry "Junior" Hillblom and three other children up to $90 millions each, pending more DNA testing.

A much-squashed-over scrap of skin from Hillblom could prove decisive.

Hillblom was a majority shareholder in closely held delivery company he co-founded in 1969 with Arthur Andersen, now known as KPMG Peat, and traveled more than a million miles in three years, delivering packages for the Southern California Company. He wore old jeans, a T-shirt and sneakers, and traveled to the Far East, fishing, golfing, and carousing.

In 1993, Hillblom's body was lost at sea, several women from the Far East who say they bore his children have come forward to demand a share of his millions.

The Observer  

Play

continued from page 1

According to director of Student Activities, Georgeanna Rosenhau, a main focus of the conference is to break down the barrier between school and the experience the real world brings.

"We want the students to realize that they are leaders now, and that they have the same rights as professors to initiate and influence change in community," Rosenhau added.

The Play of the Mind conference sparks not only student interest in leadership and growth as women, but also stimulates creativity which not only benefits themselves but indirectly benefits the college as well.

"It is always surprising to see the ideas that come out of the weekend," White said. "It is a whirl of thinking energy which can become firing after wrestling with new ideas. However, it is both playful and serious play which unite the participants."

In its first year of existence, the Play of the Mind consisted of close to 100 people. Eight years later, this weekend's conference will be made up of over 270 Saint Mary's students.

"It is going to be interesting to share ideas with other women to see the differences and similarities that make our colleges so unique," said participant Melissa Wheeler.

"As a current participant in the Play of the Mind, I have had the opportunity to watch students grow and take steps to expand their diversity," said history professor Kelly Hamilton.

"I look forward to another rewarding experience which will enable me to meet new people with unique backgrounds and experiences to share."

Beaten woman escapes from abusive boyfriend

PHILADELPHIA A woman says she was held prisoner in her own home for three months by a boy who beat her, raped her and threatened to hurt her children if she did anything about it.

The 24-year-old woman did something about it Monday, running from her home to a police van she spotted parked nearby.

The boyfriend also took off, and police believe he may have taken a hostage with him.

Glenn to fly again with NASA

CAPE CANAVERAL, Fla. - NASA's newest and oldest astronaut - John Glenn - arrived amid fanfare Tuesday to watch a shuttle launch and start brushing up on his space-flying skills.

"Haven't been here for a while," he said, grinning. "I want to start getting up to speed on everything."

It was Glenn's first official duty as a space shuttle crew member.

NASA announced last Friday that the senator - the first American to orbit Earth back in 1962 - would be launched in October aboard Discovery as part of a study on aging. He'll be 77 by then, 16 years older than anyone ever to fly in space.

"Physically, I feel great," Glenn told reporters. "I think the things that I have to get up to speed on are just things that every crew person has to do, like emergency training and suit use and all those things."

He said he has no firm schedule yet for training.

As soon as his plane landed, Glenn was greeted by Roy Bridges, director of Kennedy Space Center and a former shuttle pilot.

Several other NASA employees waited eagerly to shake Glenn's hand.

'Yuppie thief' found guilty, not insane

BRENTWOOD, N.H. - A jury Tuesday convicted a former assistant attorney general of possessing hundreds of books, furniture, computers and art stolen from colleges and museums around New England.

William McCallum admitted to stealing the items, including a George Inness landscape worth $70,000, but pleaded innocent by reason of insanity to 65 misdemeanor and felony charges of possession of stolen property.

The jury rejected the insanity defense and found McCallum guilty on all counts. McCallum, 34, faces up to life in prison when he is sentenced March 20. His lawyers said they won't appeal.

Defense experts testified that McCallum suffers from kleptomania - a neurotic compulsion to steal - bipolar disorder and severe depression.

McCallum's lawyer, Stephen Jeffco, said many of the things he stole - doorknobs and used underwear - had little value and demonstrated his uncontrollable compulsion to steal.

"He is getting help," Jeffco said. "Let him become healthy."

Prosecutors argued that McCallum was nothing but a yuppie thief who got caught.

Assistant Hillsborough County Attorney Simon Brown said McCallum planned his thefts and proudly showed off the valuables from prep schools, museums and the state Supreme Court library, displaying them in his home and office.

McCallum attended Yale University and got his law degree at Boston College. He landed a clerkship with then-state Supreme Court Justice David Souter.

Soon afterward, Souter was appointed to the U.S. Supreme Court. McCallum worked for his successor, Justice Sherman Horner, then went on to a career in the attorney general's office, defending state agencies in civil cases.

Welfare Lost in Corporate Grubbery

The Observer, GM appropriated an additional $6.5 billion this sum of over $1 by dodging taxes. I am suggesting that Yet does not injustice "Burger King" job within four weeks, but if her aspirations are higher, this period is usually inadequate. We want to secure a program director at the Fraternity and Children, reports that in Indiana a single mother looking for a job receives a maximum of four weeks of free child day care. Barret's experience suggests that when the market is good, a woman might be able to find a "Burger King" job within four weeks, but if her aspirations are higher, this period is usually inadequate. We notice, then, that sharp contradictions do exist in our society.

Expecting a woman to search 25 hours a week for a job without supplying daily care for her children beyond the initial month, is but one example. Another contradiction comes to light when one realizes that a single mother finds a job, the salary she receives is usually insufficient to sustain even a very small family. These contradictions reflect only one part of the problem: "Many of the people on welfare have a profound fear of doing things that to you and me seem simple," Barret points out. Contemplating job interviews or completing GEDs is often accompanied by deep anxiety, which has a paralyzing effect. Though TANF strives to assist single mothers, it cannot offer them the basics such as a proper education.

The ramifications of cutting the social safety net reveal that, in its effort to reform welfare, the government has chosen to chaste the poor. This approach is not unlike the one beheld by King David in the middle of the 19th century. Poor Laws, namely sanctions, instead of justice. Looking behind the decision to abandon those living on the margins of society, is our society's political will — heavily conditioned by powerful lobbyists and their vested interests. This will has chosen to sacrifice the poor man's lamb to the glutinous corporations.

Diversity key to millennium

Several such costs are mentioned in Robert Golombiewski’s book, “Managing Diversity in Organizations” (9). For example, a successful diversity initiative can reduce the high costs of organizational turnover and absenteeism, as well as costly recruitment and training of substitute labor when recruiting scarce labor. It can also reduce intergroup conflict and communication barriers, and increase the likelihood that employees will confront difficul-

ties. These means employees work efficiently and share ideas instead of the often-valuable effort and energy on the aforementioned problems.

Other benefits include a tangible increase in sales to people of color, and the intangible goodwill a positive solution (which, in itself, should mean something as a Catholic university) but not ignoring the strategic implications of changing demographics, our University will never aspire to anything greater than mediocrity to toleration. I would like to demonstrate the strategic value we place upon diversity by having a coordinated plan in place (i.e. not just piecemeal). Included in that plan should be benchmarks and outcomes, outlining Notre Dame’s vision of its contribution to this strategic imperative of the 21st century.

Conversely, the lack of such a diversity plan, by any office or any depart-

Cultural diversity can bring to this great institution a wonderful new beginning to our mission and to the vision of our University.

How can ND benefit from such a diversity initiative? How about a

improved retention of students of color (and others desiring a more diverse environment), reduced recruitment costs, more involvement and donations by alumni of color, as well as from corporations sensitive to the lack of diversity at ND. Moreover, there is evidence that diverse student groups tend to outperform homoge-

neous groups when creative problem-solving is needed, hence, diversity can enhance our learning environment.

Eventually, as alumni, today’s students will inherit the rededicated social and ethical environment, and the lack of a competent workforce to compete globally. We are the ones to lay the strategic groundwork for the future. We are the future of Notre Dame, and the future of humanity. In many respects we are now the last of our kind on earth.

Yankee Rethinks America’s Individualism

London

The most striking difference between Great Britain and the U.S., besides that of

time, is that of size and attitudes. Americans, for the most part, everything here is smaller and less in-your-face than back home. You may think this is a bit too minor, virtually unno-

ticeable difference. Believe me though — after less than two weeks in London, the difference has smacked me and most

of my friends across the face.

For starters, there are the elevators (they refer to them as “lifts” here), stairwells, hallways, and doorways. Wherever you can squeeze upwards of 20 people into a Flanner elevator (believe me, I did), maybe three can shuffle their way into a British lift. Moreover, it’s virtually impossible to walk up and down most stairwells, through most hallways, or into any doorways without turning sideways and brushing the incoming person.

Even the tube, London’s version of the subway, requires any six-foot to duck on their way in and perhaps crouch down depending where they stand. In addition, since arriving I’ve yet to see a single station wagon, mini-van, or sports utility vehi-

cle — every car is compact and most people’s heads seem pressed against the windows.

Then there’s the toilets, showers, and sinks. The toilets are barely big enough to sit on, the showers and tubs seem designed for someone four feet tall and skinnier than a super model, and the sinks require you to wash one hand at a time.

Moreover, whether you’re in your flat, across town in a pub off Piccadilly Circus, or as a public restroom at J. S. Park, the water pressure never exceeds that of the milk dispenser in NIH when it’s down to its last two glasses.

By now you must think of America as a vast empty country — both

couldn’t be further from the truth. A little extra elbow room, better water pressure, and a bit more personal space are all things you don’t think about and even the most spoiled of Americans, and even the most spoiled of Americans, I think, would probably be proud of our space speaks volumes about the way Americans are社会化 and how it influences our perspectives, as opposed to those of the British.

America is the “I” society — the closest Americans come to collectivism is cheer-

ing for the Stars and Stripes at the Olympics. We define everything from property to politics in terms of the individual. Americans, for the most part, don’t like to be bur-

dened with things outside our personal sphere; whether it be welfare reform or simply not being bumped when walking down the halls, we prefer to keep it to ourselves. Great Britain is vastly different in that sense.

Like America, Great Britain’s policies are transforming and perhaps the ripest issue is the resolution of the welfare state. However, the context of the debate is starkly different. The New Labour Government has proposed stricter means testing and hikes in the personal income tax. Labour’s proposals are controvers-

etal because they call for a reduction in aggregate benefits by cutting off those who really don’t need government subsidization and focusing on those who do. Great Britain’s welfare state is more expansive than that of the U.S., there is a little means testing and nearly everyone collects benefits of some sort. It is not surprising that people in Great Britain, or anywhere else, would find a proposal which might reduce even unnecessary benefits unappealing. What is shocking is that, from my reading of British newspapers and discussions with a Member of Parliament, the British citizens fear reform to be a deep slope which will ulti-

mately penalize the disadvantaged.

Great Britain is not a socialist state, and the British no more or less ethical, per se, than Americans — but it is striking how differently they view these issues. To be honest, I think it may be simply because they’re more used to sharing — including everything from space to welfare. Perhaps if we Americans can stop looking to ourselves and weren’t obsessed with size and grandeur, if we just learned to share a little more, the context of our welfare debate and similar socio-political issues might be a tad different.

One of the wonders of this technological age is the Internet, and the vast resources it makes available to the general public. The Internet is a very quick and convenient way to research papers, find texts of poems and stories, and research famous people in history.

But more importantly, aside from the intellectual factor, the Internet is FUN. The following sites are very entertaining, and will suck up quite a lot of your time if you're not careful.

http://members.aol.com/ChiChH/club411/index.html
You have no doubt heard of the infamous dancing baby. Still, in case you haven't, this is a site that you cannot miss. The 3-D dancing baby dances to such songs as the "Macarena," "Barbie Girl," and "Wannabe." If you do not mind the horrible background music of this page, it is quite entertaining.

Along the same lines, a site which the familiar dancing baby dances to a classic Notre Dame SYR theme is found at, http://studentwww.uchicago.edu/smhenry/tang/baby.html.

http://www.amused.com
This site, the homepage of the Center of the Easily Amused (the C*E*A*) has quite a lot of entertaining features. It boasts a "short attention span" site of the week, joke of the day, Internet greeting cards and chatrooms. You can participate in an Internet soap opera and read the "skew news." However, the most interesting feature of this site is a daily pool entitled the daily spew, although it's rather self explanatory.

http://www.moviesounds.com/
The address of this site is self-explanatory, but it boasts the largest library of movie quotes on the Internet. If you are a movie fanatic, you can download quotes from such movies as "Austin Powers," "The Blues Brothers," "Blazing Saddles," "The Godfather," and "Airplane" to name a few. This site is worth time, especially if you are looking for an interesting start-up sound for your computer.

Again, the address of this site is self-explanatory. If you have a few hours to kill, and don't mind typing your address into about a million forms, you can get oodles of free stuff from this site.

A few months ago, I used this site as an experiment and started sending my roommate some very interesting, yet very random and absolutely free things.

http://www.concentrallibrary.com/
This, the homepage of the Comedy Central Network, is a center for those hilarious, small entertainers from South Park. Besides South Park, clips, quotes, and characters of the other Comedy Central shows are featured. Also contained is a daily horoscope page, with links to the "ask the magic eyeball" page. If you want a good laugh, this is the place to go.

http://www.ESPN.Sports-zone.com/
This site is for you sports fans out there. It includes statistics, scores and schedules of the teams you like to keep track of.

http://www.theLatetshowa.com/
This site contains an incredible archive of Dave Letterman's Top Ten Lists over the last several years. Updated daily, it is sure to be amusing each new time you visit.

http://www.webpagesthat suck.com/
This is a good page to visit when you want to know what NOT to put on your personal web page. Images that take too long to load and other just plain annoying web page items are highlighted. It's fun to laugh at other people's mistakes rather than repeating your own.

http://bluemountain-greetings.com
This site is one of many virtual greetings the net offers. You can send virtual cards, flowers, and gifts. The person you want to receive the virtual gift is notified via e-mail and most of the virtual greetings are free.

These sites are only the tip of the iceberg for a day of fun on the Internet. The best thing about the Internet is that if you are looking for something, it is probably there. So, if you have interests in poison dart frogs, Beanie Babies, G.I. Joe or swordfish, just go http://www.yahoo.com, the best search engine on the net. But be selective of the sites that you browse because the Internet is truly like a box of chocolates, you never know what you're gonna get. You may just be surprised.

Other Sites Worth Checking Out:

- http://www.sony.com—Play Jeopardy online
- http://www.nd.edu/~ahosinsk
The controversy has been on everybody's mind lately. The struggle is not merely a matter of time before other restaurants will jump on the "spicy" bandwagon to boost sales. However, although the improvement is noted by many as being favorable, some still cling to the traditions held dear from childhood. "I don't know if I would say that the Burger King fries are better than McDonald's," pondered Meghan McMahon, an off-campus senior from Saint Mary's. "After all, I grew up with McDonalds. But they are a definite improvement over the fries they used to serve." 

Lizzie Brady, a junior from Howard, pointed out the inadequacies of the poll's favoritism for only McDonald's and Burger King, when there are so many other choices given to the '90s consumer market. "I haven't sampled them across the country, but I'll have to go with the tradition of McDonald's," she stated, in a more reluctant agreement.

However, some were not as kind. Mike Thelen from Morrissey compared his hatred for the fries with violent acts. He stated, "I'd rather be kicked in the head with another Burger King fry. And I mean that." "I think that the new B.K. fries taste artificial!" said Paul Kedzie of "It's almost as if they were created in a test tube surrounded by men in smocks and white lab coats." 

In a new sentiment, a science major from Saint Mary's named Amanda Howerton pondered the composition of the new fries. "I don't know what they put in their fries to make them taste better," she said. "This is reminiscent of the tobacco companies slipping in fillers to make their products more appealing to the consumer. It's just a matter of time before we are forced to eat that fiber in the guise of fried potatoes. Unethically, this new change scares me." 

The conclusion of my informal poll was a dead tie between the two brands. It seems that McDonald's holds it's own with brand loyalty, while Burger King gained new ground with the introduction of its new product.

So, who's better? Arguably, both claim that they are America's favorite fries, and both are right. Traditionally, while Burger King (or McDonald's for that matter) did win in a national taste test over McDonald's innumerable times in sales, it does not conduct the volume of business that McDonalds does. This is attributed to the fact that the McDonald's chain owns more restaurants worldwide than the Burger King chain, and thus sells more fries by default. So this becomes a matter of quantity over quality.

Is there a winner? The sales in both chains have risen in the past few weeks. It seems that people are not as critical in their fast food consumption. The foes only succeeded to promote each other. The only losers seem to be the hardening arterios that are feeling the pinch.

In this age of capitalist debate, yo quiero Taco Bell.
Storin-Ryu Karate SIX STUDENTS were instructed according to Okinawan tech­ niques. This semester-long course teaches students and new and advanced class for those with 0-4 years experience and advanced class is for dancers with 5+ years experience. Both classes are semester-long classes with a fee of $35. The beginner class meets class Friday from 10:15-11:45 a.m. and Tuesdays from 6:45-7:45 p.m. The advanced class meets from 7:45-8:45 p.m. on Wednesdays. All classes will be held in Rockne Rm. 301. There will be no class on Monday, Jan. 25, at 1:30 p.m. in Rockne Rm. 301. Advanced class begins on Tuesday, Jan. 9 at 10 a.m. on Monday, Jan. 26, in Rockne Rm. 301 space is limited. Classes will begin on Saturday, Jan. 11.

Jazz Dance — A Jazz Dance class will be offered Saturday mornings from 12 p.m. to 1:30 p.m. (Sat. and 8:30 p.m. (Sun. 8:30 p.m. is 10 p.m. due to the time change.) All levels are welcome, but space is limited. There will be an information meeting on Sunday, Jan. 25, at 2 p.m. in Rockne Rm. 301.

The fee is $25 for the semester and sign-ups will begin at 8 a.m. on Monday, Jan. 26, in the RecSports office. Classes begin on Saturday, Jan. 31.

Downhill Ski Trip — RecSports will be sponsoring a downhill ski trip to Swain Valley on Friday, Jan. 30. The buses will leave the library Circle at 5 p.m. and return to campus at approx­ imately 5:30 a.m. The fee for those needing to rent skis is $5 and for those who will bring their own skis, the cost is $19. All participants finish the race in advance at RecSports on or before Tuesday, Jan. 27. Beginner lessons will be offered free of charge.

Cross Country Ski Clinics — RecSports will be sponsoring three clinics this winter. The first clinic will be on Saturday, Jan. 31, at 11 a.m. and will be two hours long. On Tuesday, Feb. 7, one at 10 a.m. and the sec­ ond at 2 p.m. for two hours. The fee for the clinic is $5 with an additional $4 rental fee if you need to rent equipment. Registration in advance is required for all three cross country ski clinics.

Basketball Tickets — Notre Dame basketball students for the next three weekends have tickets available at the Joyce Center tickets office from 8 a.m. to 5 p.m. today and at the arena before the game. Student tickets are $5 for all students and one student ID card is required for each ticket purchased. The game begins at 9 p.m. and will be televised nation­ ally by ESPN.

AMES, Iowa — Strawberry Fores and win and hit seven of Iowa's school-record 14 3-pointers Tuesday night, setting a Cyclone record to 82-73 victory over No. 5 Texas Tech. Freshman Megan Taylor added 20 points for Iowa (14-3, 3-0) which burned Texas Tech's defense with its outside shooting and shackled Tech star Altica Thompson in the second half with limited her to just 11 points on 4-for-14 shooting.

Thompson, surrounded by six Iowa players at times, touched the ball, was tacked off her 11 points in the second half after scor­ ing 17 points in the first half. Tech (12-2, 2-1) was the highest ranked team Iowa State has ever beaten and left the Cyclones as the only Big 12 team unbeaten in confer­ ence play. Iowa State finished 14-­ scoreless 3-pointers and shot win­ ning season-high 55 percent over.

The old Iowa record for 3-­pointers in a game was 13 against Missouri State and Truman State earlier this season. The highest ranked team Iowa State had beaten previously was No. 9 Texas Tech.

Fresher was 7-for-11 from 3-­point range and her last one was for a 3-pointer Iowa State was clinging to a 76-73 lead when she had her shot blocked by Angel Robinson.

Iowa State's Amanda Bartz ran down the loose ball and was able to pull in the 3-pointer from the left of the key as the Cyclones led 78-73 with 5.2 seconds left. The Cyclones made three of four free throws to wrap up its third victory in four games.

Texas Tech — The Tech had two players with reading and writing problems and a student with reading and writing problems. The Tech had two players with dyslexia and a student with reading and writing problems. The Tech had two players with dyslexia and a student with reading and writing problems.

The second-highest scoring team Iowa State had beat­ en previously was No. 9 Texas Tech.

Skeptics question Flutie's ability to play in NFL

Associated Press

ORCHARD PARK, N.Y. His hair is longer with a touch of gray, but his face is deeper. Other than that, not much has changed since Doug Flutie last played in the NFL. After signing a two-year contract with the BufTales Bills, Flutie wound up answering the same questions Tuesday that he and Billy Sullivan had followed him throughout his career.

"I'm well enough to play in the NFL?" he was asked.

"All I know is that I played the game at my height all my life. I know no different," Flutie said.

"This is a game. It's football. I know one way to play it." Over the last eight years in the Canadian Football League, Flutie was named the league's most valuable player six times and took the Toronto Argonauts to the Grey Cup title the last two years.

In the last two seasons, he completed 64 percent of his passes for 11,225 yards, 76 touchdowns and 41 interceptions as the CFL's marquee player. He was expected to make about $1.1 million in Canadian currency (about $700,000 U.S.) next year had he signed another contract with the Argos.

"Flutie became a folk hero after the Heisman Trophy with Buffalo College in 1984, but his NFL career never took off after stints with Chicago and New England. He played well at times with both teams, but the knock on him has been that he is too short to be effective. "Doug has been fighting the height problem his whole life, and he's always won," said Bills personnel director A.J. Smith, who scouted Flutie. "He's a better football player with the Buffalo Bills than when he left the NFL. Is he the exception to the rule? We're about to find out."

The Bills have not had a steady quarterback since Jim Kelly retired last February. Last season, Buffalo brought in Billy Joe Hobert to challenge first-year starter Todd Collins in an experiment that failed miserably. Collins was yanked twice from the starting role and replaced both times by Alex Van Pelt. Hobert was released during the season after admitting he didn't study his playbook before a game. The Bills were looking for a mobile quarterback in hopes of competing with fast, blizzing defenses that have been built around the league. They would probably need to install two offenses to suit Flutie and Collins, who went to rival high schools in Massachusetts but are nine years apart in age.

"The last time I talked to Todd Collins, he was in high school and I was with the New England Patriots," Flutie said. "We were talking about what colleges he was going to (at least). We're all professionals. When it comes to training camp, we'll line up and start competing."

Top two draft picks square off as Nets defeat Spurs

Associated Press

FAST RUTHERFORD, N.J. The Nets, one of the hopes of Michael Jordan and Charles Barkley meeting in a game of aging stars, got their chance at the game of Larry Bird returning to Boston as the Indiana Pacers' coach.

But the showdown Monday night between Tim Duncan and Keith Van Horn is the story of the top two draft picks, provided the NBA with a promising glimpse down the road.

Forget that Van Horn shot a dismal 7-of-30 in the New Jersey Nets' 95-84 victory or that Duncan committed a team-high seven turnovers. The Nets' 95-84 victory over the San Antonio Spurs' 19 turnovers.

The two rookies were the show at both ends of the court, overshadowing the likes of San Antonio's David Robinson and New Jersey's Jayson Williams.

Duncan, the No. 1 draft pick, had the better statistics with 24 points, 17 rebounds and three blocks. Van Horn, the second pick, had 21 points and 10 rebounds, but he also ignited a key run early in the second quarter by hitting three 3-pointers.

"This is the future of the league," said Williams, who grabbed 18 rebounds and limited Robinson to 13 points. "Two guys who stayed in college for four years, good guys who, whether they're on the floor play with high intensity."

Flight Attendants:

Requirements:

• Age 21 or older
• No tetanus in 5 years
• Minimum reach 77 inches
• 2 years college or previous customer service experience helpful
• Must relocate within 30 miles of Conn/NY airport upon hire

Fahani, in the University of Kansas, to P.O. Box 3032
Cleveland, OH 44101-3032
Fax: 216-789-0750
Attn: FA-SBN

"I'm taking a risk, no question about it," Flutie said. "Right now, my decision is not about money. It's about playing football and having fun. The CFL put the fun back in football for me. I'm not going to let anybody take the fun out of it for me ever again."

"Flutie is doing his part to defend the point," said Bills coach Marv Levy.

"It wasn't Jordan coming back to play, it was Duncan. Duncan was powerful inside, but he can't shoot inside like Jordan can. Duncan was able to hit 10 of 17 from the field and was masterful at the free throw line, hitting 10 of 12. Van Horn proved a difficult matchup although his shot just wasn't falling as the Nets ended the Spurs' five-game winning streak.

"I know this would be a big deal but I didn't think it would be this big of a deal," Duncan said. "I didn't think y'all would blow it up this much." Duncan was powerful inside, hitting 10 of 17 from the field and working well on the boards at both ends. Van Horn proved a difficult matchup although his shot just wasn't falling as the Nets ended the Spurs' five-game winning streak.

"I don't really consider Keith a big guy, not in the style Tim is. The differences gave both players an opportunity to show what they could and couldn't do. It also will fuel arguments about who deserves the rookie of the year prize, for sure I will go to one of them."

"I'm not going to let anybody take the fun out of it for me ever again," Flutie said. "Right now, my decision is not about money. It's about playing football and having fun. The CFL put the fun back in football for me. I'm not going to let anybody take the fun out of it for me ever again."

"Doug has been fighting the height problem his whole life, and he's always won," said Bills personnel director A.J. Smith, who scouted Flutie. "He's a better football player with the Buffalo Bills than when he left the NFL. Is he the exception to the rule? We're about to find out."

Rangers skate past Blues with three power play goals

Associated Press

NEW YORK

A very well-rested Mike Richter dazzled, a rejuvenated Brian Leetch scored and New York made the most of the man-advantage as the Rangers defeated the St. Louis Blues 3-1 Tuesday night.

The underachieving Rangers, now 6-4 in their last 10 games, still looked shaky and defensively weak in the first two periods, giving up 28 shots to the Blues while getting only 17 themselves.

But they made the most of the latter to score on all three of their power plays, while Richter, sharp in his first start of the season, stopped almost all of the former.

And New York got three key players back from injuries — defensemen Jeff Beukeboom and Ulf Samuelsson and center Brian Skrudland.

Leetch, after an uncertain first period when he nearly scored on his own team but assisted on Niklas Sundstrom's goal, picked up his aggressive style as did the rest of the team to score in the second.

As Blues goalie Grant Fuhr dropped a slapshot from Bruce Driver and turned back two point-blank Ranger shots, Leetch dashed in and swatted one-handed at the loose puck, knocking it over the net.

Leetch is now tied with Walt Tkaczuk for fourth place on the Rangers' career scoring list with 678. He has five-game points streaks, with four goals and three assists.

St. Louis closed it to 2-1 less than four minutes later when Pierre Turgeon fed a 30-foot shot past Richter from the left circle.

But Richter stopped several close-call tying attempts in the ensuing minutes and Pat LaFontaine scored off Wayne Gretzky's feed with just over a minute left in the period to make it 3-1.

The Rangers started the scoring in a first period that saw them outshot 11-6.

Leetch and Sundstrom passed back and forth to get the puck to the Blues' zone, and Sundstrom took the last pass from Kevin Stevens at the front of the net to tip it past Fuhr at 3:43.

With 6:22 into the final period, Brian Skrudland passed back and forth to get the puck to the Blues' zone, and Sundstrom took the last pass from Kevin Stevens at the front of the net to tip it past Fuhr at 3:43.

New Jersey Devils to a

Scott Niedermayer set up late third period goals by Jason Arnott and Dave Andreychuk to lead the New Jersey Devils to a 3-1 victory over the Detroit Red Wings on Tuesday night.

Rookie defenseman Sheldon Souray also scored as New Jersey took advantage of seven power-play chances to outshoot the Red Wings 35-17 in a game that was scoreless until the third period.

The only reason the game was tied that long was Detroit goaltender Chris Osgood turned an outstanding performance in stopping 25 shots in the first two periods.

U.S. SOCCER

U.S. team prepares for World Cup

Associated Press

NEW YORK

The U.S. soccer team will leave for the World Cup on June 12, a maximum in Treviso, France, before its opener against Germany.

The U.S. team, which plays Scotland on May 30 at East Rutherford, N.J., in its final warmup, will arrive on June 5 and stay at Chateau de Pizay in Bellegarde, about 25 miles north of Lyon, under the tentative schedule approved by the U.S. Soccer Federation.

The Americans will train at nearby Treviso, near the River Saone, until leaving for Paris on June 13. The Americans open against European champion Germany at Parc des Princes on June 15, then return to Bellegarde the following day.

After a game in Paris on June 21, the Americans move to Pernice, 25 miles west of Nantes. They will train at the Terrain des Sports, near their hotel, until playing Yugoslavia at Nantes on June 25 in the final first-round game.

If the Americans advance to the second round, they will play Belgium, the Netherlands, Mexico or South Korea at a stadium in Lyon before leaving for the next tournament.

The U.S. team's goals are to finish first in its group and avoid the second-best third-place team in its group. The Americans will need to win both of their opening games to do that.

The team will train in France and England on its way to the tournament.

Our Sensational Outlook Centers Around Your Vision

We're the Information Technology Group (ITG) of NOVUS Services and it's our responsibility to provide the best possible support behind Discover, Private Issue, and Bravo credit cards. And with 48 million cardmembers and a large merchant network, this is no small task. But with strong corporate support, a state-of-the-art technical environment, and talented team-oriented professionals who love what they do, we accomplish some pretty amazing feats.

As we move forward, we're looking for you. Currently, we need help for Computer Science and MIS individuals with experience in any of the following areas:

Hot shooting leads Duke to 101-66 rout

Associated Press

GREENSBORO, N.C.

William Avery scored 11 points during a 2 1/2-minute span in the first half as Duke rolled over North Carolina A&T 101-66 Tuesday night in the Blue Devils' first game since regaining the No. 1 ranking.

Webber did not test his players for a brush with the law.

In November 1996, Juanaw Howard was playing in a game at Princeton when the officer went to open the car door. "The officer appeared startled to see him," Royce Holloway said. "He resisted, an alleged assault. The officer spray was deployed to the effect of the arrest."
Elway may be saving best for last

Associated Press

SAN DIEGO

John Elway pondered the question for a few seconds.

"Yeah," he finally answers, "my football money."

John Elway, quarterback and entrepreneur, is quite logical as he approaches what is likely to be his last shot at an NFL championship and perhaps his last game.

He is, after all, a 37-year-old multimillionaire, the result of a deal in which he sold his seven automobile agencies in the Denver area to Wayne Huizenga, who owns most of professional sports in South Florida. And he will, he says, consider retirement — win or lose — after Sunday's game with Green Bay.

So yes, he'd give up the $30 million or so he's made in 15 NFL seasons to win that elusive ring, but not $80 million or so in car cash. After all, he has a wife and four kids to support.

But car dealerships aren't on Elway's mind this week — nor are they on the minds of anyone else.

For this Super Bowl is John Elway IV — his first appearance back at the NFL's title game since 1990 when he and the Denver Broncos lost 55-10 to San Francisco, their third lost Super Bowl defeat in four seasons.

Those losses remain a stain on Elway's career — just as a Super Bowl victory had eluded the other illustrious members of the quarterback class of 1983: Buffalo's Jim Kelly 0-4 and Miami's Dan Marino 0-1.

Their rookie year was the last time an AFC team even won a Super Bowl.

So while Elway seems relaxed this week, he's also made his sense of urgency clear to his teammates.

"Flying back after beating Pittsburgh, John called us all together," wide receiver Rod Smith says. "He said, 'I've been here three times. We all have high and mighty goals, but if we lose, we right go back down to the bottom. You don't know the wrath that comes down on you if you don't win.'"

Elway certainly knows.

After the Broncos lost by a combined 136-40 to the Giants, Redskins and 49ers in 1987, 1988 and 1990, he got the blame because the quarterback always does.

"We were 29 after the third loss, just entering a quarterback's prime years. It looked like he might be back a fourth, fifth, sixth, seventh time."

But those three AFC titles were forged largely on Elway's strong arm and legs that could get him away from almost any trouble.

Many of his 44 game-saving drives came during those years, including the career-defining 99-yard march that tied the 1986 AFC title game in Cleveland where the Broncos won in overtime.

But the talent surrounding Elway was barely better than average and the 35-10 loss to the Giants started a downhill slide. The best defensive players were growing old and Elway's relations as with coach Dan Reeves were deteriorating — the over-tired Reeves was trying to keep a tight rein on his quarterback.

The low point came in 1991 when Reeves hired Mike Shanahan.

Elway's longtime quarterback coach, offensive coordinator and confidante. Shanahan went on to throw the reign's 15th Super Bowl.

"I'm probably not as good a player, but I'm a better quarterback," he says. "My arm isn't as strong, but it's more accurate and I don't run as much. Experience makes up for a lot of things."

So if those early Super Bowls were the athletic Elway against more conventional quarterbacks — Phil Simms, Doug Williams, even Jim Montana — this one will be the conventional Elway against the athletic Brett Favre.

"He's my idol," says Favre, who was forged several years younger than Elway.

"He could do things I could only dream of doing. He was someone you wanted to watch because you always want to watch things in sports that are out of the ordinary."

"Now that I can do some of those things, it's not looking in a mirror."

Elway, a friend and golfing buddy of Favre's, finds all this amusing and a bit ironic as he eases his way through Super Bowl week, facing an onslaught of repetitive questions. He even has a few laughs at his own expense.

So he reflects on the ego he brought to the NFL — as the first pick in the 1983 draft, he refused to play for the then-Baltimore Colts. Instead, he used an offer to play baseball for the New York Yankees' organization as leverage to force a trade. He ended up in Denver.

He was reminded of that Tuesday when who should pop up with a microphone during media day but Rex Hudler, a journeyman major leaguer who was once my idol," says Favre, who was forged several years younger than Elway. The Broncos had to get here as a wild-card. They are only the fourth team that needed to win three games to make it to the Super Bowl.

So the focus is back on Elway, eight years older since his last Super Bowl, and — in his own words — a shadow of the athlete he once was.

"I'm probably not as good a player, but I'm a better quarterback," he says. "My arm isn't as strong, but it's more accurate and I don't run as much. Experience makes up for a lot of things."

So if those early Super Bowls were the athletic Elway against more conventional quarterbacks — Phil Simms, Doug Williams, even Jim Montana — this one is the conventional Elway against the athletic Brett Favre.

Tyson set to return to the ring as WWF wrestler

Associated Press

LAS VEGAS

One thing is certain about Mike Tyson's appearance in Wrestlemania: He will play a bad guy.

Tyson doesn't figure to play a wrestler, however, despite World Wrestling Federation owner Vince McMahon's attempts to sell him as one during a WWF show Monday night in Fresno, Calif.

"The chances of him wrestling are very slim," a source familiar with Tyson said. "These guys are professional wrestlers and they take falls for a living. Why would he risk a broken neck or something by doing that?"

Tyson was supposed to be only a guest referee at Wrestlemania on March 29 in Boston. But in the world of professional wrestling, things can turn as quickly as a good figure four move.

Just as McMahon was to announce Tyson's appearance, wrestler Steve Austin appeared from nowhere Monday night to enter the ring and question Tyson's manhood. An obscene gesture here and a push there, and suddenly had blood had developed.

With a straight face, McMahon suggested later that Tyson would wrestle Austin, the WWF's most popular wrestler, at Wrestlemania.

Tyson will be the bad guy, as evidenced by the booing he got Monday night and the "Tyson Bites" signs held aloft by several fans.

"Mike is refusing to guest referee. Austin embarrassed Mike Tyson and the WWF with his remarks. It was uncalled for and very unprofessional," McMahon said. "Mike is now saying he wants Stone Cold Steve Austin."

Nevada boxing regulators say they have no control over what Tyson does outside the boxing ring as long as he doesn't box while his license is still revoked for biting Ghanem, chairman of the Nevada State Athletic Commission.

Earlier, though, Tyson adviser Sig Rogich said the former heavyweight champion would only referee and would not wrestle because he "does not want to do anything to jeopardize his relationship with the Nevada boxing commission." Rogich could not be reached for comment Tuesday.

Tyson reportedly is being paid some $3 million for his wrestling show appearance, good money but far less than the $30 million he got to fight Holyfield last June.

"Tyson is the biggest pay-per-view draw in boxing history, though, and the WWF is evidently banking on him selling the pay-per-view show in Boston," said Marc Ratner, executive director of the commission.

Tyson's wrestling persona was set Monday when the former heavyweight champion shaved Austin on the WWF's "Raw Is War" program.

Irish
continued from page 24
boards per contest.
Syracuse also boasts the Big East's loading shot-blocker, Etan Thomas, who has turned away 3.2 shots per game, one block more than anyone else in the conference.
"They are very athletic and can score at every position," said Wyche of Syracuse's ability. "They have great outside shooters and their forwards can put the ball on the floor."
There is no doubt that the Irish could use some of the Orangemen's balance both tonight and in the stretch run of the conference schedule.
Wyche and fellow junior Phil Hickey will be expected to supplement Garrity's output as the jockeying for position in the Big East Tournament heats up. Hickey and senior Derek Manner have provided a formidable rebounding force to take some of the load off of last year's Big East Player of the Year, but it certainly would not hurt the Irish to get more than 10 points a game out of a couple of other players on a consistent basis.
To Hickey's credit, he has averaged 10.7 points and 7.9 rebounds per contest, but inconsistency and missed free throws continue to plague the 6-foot-10 center.
A win over Syracuse would do plenty to erase memories of a home loss to Pittsburgh and last weekend's debacle in New Jersey, especially in the eyes of the post-season tournament selection committees.
The importance of this two-game homestand was not lost on Wyche. "We've got two top teams in the conference in Syracuse and Villanova," stated the third-year guard, "so we have to take advantage of the opportunity at home."

ed very well. Everything was just clicking for them on Saturday."

"They're a great team," McRae remarked about the Eagles. "They don't beat themselves by making mistakes. They only had about 11 turnovers for the game. They're a very smart team as well."

The Irish offense has recently been led by two players, senior guard Mollie Peirick and freshman center Ruth Riley. Against Boston College, Peirick led three players in double figures with 26 points, topping her career high of 23 points which she set against West Virginia. Peirick currently leads the team in scoring, assists, and free throw percentage.

Riley was recently named Big East Rookie of the Week for the second straight week following her performances this week against the Mountaineers. Riley posted a career high of 27 points and 11 rebounds, shooting 11 of 14 from the field. Against the Eagles, she earned her fourth consecutive double-double with 18 points and 11 rebounds. Riley also currently leads the conference and ranks 12th in Division I players in blocks, averaging 2.44 a game.

The tip off between the Irish and the Orangemen is set for 7 p.m. tonight at the McDonough Field House.

Valentin to get four-year deal

Associated Press

John Valentin and the Boston Red Sox are close to agreement on a four-year contract worth between $25 million and $28 million, a source familiar with the negotiations said Tuesday. The source said only a few details needed to be worked out and an announcement may come Wednesday or Thursday. Valentin, who made $3.6 million last year, asked for $7 million Monday in salary arbitration and the Red Sox offered $5.5 million.

Valentin's agent, Dick Moss, declined comment on the status of talks but was encouraged by the progress. Red Sox spokesman Kevin Shea said only that the deal was not done.

"They're pretty optimistic, but nothing's done yet," he said.

The agreement comes one year after Valentin vowed to leave the Red Sox following a spring training dispute in which he was stripped of his shortstop's position despite promises that he would have a chance to compete with rookie phenom Nomar Garciaparra for the job.

Garciaparra went on to win the Rookie of the Year award. Valentin played second base until he was moved to third in July after Tim Naehring sustained a season-ending elbow injury.

MEN'S BASKETBALL

Irish look to put the squeeze on the Orangemen

By BRIAN REINTHALER
Assistant Sportswriter

The Orangemen of Syracuse hit the Joyce Center tonight, giving Notre Dame another opportunity to impress a national audience by beating a ranked conference opponent.

The Irish are coming off a very disappointing loss to Seton Hall, which brought to the forefront Notre Dame's chronic lack of offensive options and tainted a two-game road trip that could have been a legitimate turning point for the program.

"It's kind of frustrating at times," explained shooting guard Antoni Wyche. "We seem to have some of our worst games at the most inexplicable times."

After knocking off then No. 20 West Virginia on a last-second jumper by sophomore Keith Fred, the Irish stranded senior Da'Tarrion on Saturday, as the forward dropped in 37 of Notre Dame's 58 points in a losing effort.

Garrity, who will likely be honored by the Big East with its Player of the Week award, has been as hot as any player in the country lately. He now leads the conference in scoring (24.1 points per game) by a margin of almost two points.

However, John MacLeod's squad is going to have to find some alternative firepower if they hope to compete in the Big East Six. Their 3-4 conference record currently places them in fifth place in the division, with only Boston College trailing at 2-5.

"I know that I'm capable of scoring," Wyche said in response to a question about who will be called on to add some offense for the Irish. "(Against Seton Hall), we were settling for jump shots and getting no penetration. Some one has got to step up."

Syracuse enters this evening's battle with a record of 5-1 in conference play and the lead in the Big East 7. Their 15-2 overall mark has earned them enough votes for a No. 15 ranking in both the Associated Press and the USA Today/ESPN polls.

The Orangemen are led in scoring by Todd Burgan and Ryan Blackwell who are averaging 16.9 and 14.4 points a game, respectively.

Blackwell also finds himself among the top five rebounders in the conference with 8.7 rebounds per game.

The Irish will look for more offensive production from Antoni Wyche.

---

WOMEN'S BASKETBALL

Syracuse presents challenge for Irish

By BILL HART
Sports Writer

The Notre Dame women's basketball team will face a double challenge tonight when they travel eastward to face the Syracuse Orangemen. Not only will the Irish have to rebound from a close loss to Boston College on the road, but they will have to do it against a team in the midst of one of their best seasons in recent history.

"Syracuse is a good team. They're battling for first place in their division, and this game's really important to them," Head Coach Muffet McGraw remarked. "They think they can win this game, and BCM beat us, I think everyone in the league thinks we're beatable."

Irish forward Julie Henderson played a key role in last year's blowout win against Syracuse. The sophomore hopes to have another outstanding performance on the road.

Syracuse has already improved on last season's 6-21 record going 10-6 heading into tonight's contest. After riding a seven-game winning streak to start the season, Syracuse dropped five straight contests before rebounding in the brunt of conference play.

In its only game of the week, Syracuse earned a 99-93 overtime win at West Virginia on Saturday. The Orangemen outscored the home team, 17-11 in the overtime.

Junior Annette Davis scored a team-high 23 points off the bench to lead five players in double figures. Paula Moore recorded the game's only double-double with 11 points and 11 rebounds.

The Orangemen are led by senior guard Raquel Nurse, who scored 12 in the win against the Mountaineers. Nurse leads the team in assists, averaging 5.1 a game, while ranking second in steals with 29. Nurse is second on Syracuse's career assist list with 475 and needs 55 to become the all-time leader.

Irish head coach Muffet McGraw has put a heavy emphasis on Notre Dame's chronic lack of scoring, "It's very frustrating at times," Wyche said in response to a question about who will be called on to add some offense for the Irish. "(Against Seton Hall), we were settling for jump shots and getting no penetration. Someone has got to step up."

Syracuse enters this evening's battle with a record of 5-1 in conference play and the lead in the Big East 7. Their 15-2 overall mark has earned them enough votes for a No. 15 ranking in both the Associated Press and the USA Today/ESPN polls.

The Orangemen are led in scoring by Todd Burgan and Ryan Blackwell who are averaging 16.9 and 14.4 points a game, respectively.

Blackwell also finds himself among the top five rebounders in the conference with 8.7 rebounds per game.
