This is the first of a three part series on the hippie movement.

By TOM FIGEL

Our criminals are no longer helpless children who could plead love as their excuse. On the contrary, they are adults and they have a perfect alibi: philosophy, which can be used for any purpose.

...Albert Camus

During the fifties, one group, whom media lumped under “the Beats”, felt the contradictions of the twentieth century in a way that made rational action impossible. Confronted by a world of madmen and women, a world which they could not comprehend, they embraced that madness, finding their joy in its perfect, lived reflection.

“Beat” is still used, and used wrongly, to describe the hipsters, a movement of the sixties, a decade with the fifties’ problems but possessed of more hope. In a sense, the two movements overlap enough to make them one. The beards, the hair, the residences with the fifties’ problems but possessed of more hope. In a sense, the two movements overlap enough to make them one. The beards, the hair, the residences

After graduation, what?  
Will you begin your career as an engineer or scientist or return to school for an advanced degree?

You can do both at NOL

If you are an engineer in the top third of your class or a scientist in the top quarter of your class, NOL offers you the opportunity to begin your career in one of the world's great laboratories and, at the same time, go ahead with your plans for graduate study.

NOL is a laboratory in the true meaning of the word, and one of the largest and best-equipped laboratories in the world. It is the nation's leading R&D establishment for Anti-Submarine Warfare (ASW), the Navy's principal high one of the largest and best equipped laboratories in the world. It is the nation's leading R&D establishment for Anti-Submarine Warfare (ASW), the Navy's principal high speed aeroballistics activity, and a leader in the development of new air and surface weapons. The spectrum of research at NOL ranges from nuclear effects to acoustics to explosives and materials. At NOL, weapons development is carried through from conception to design to prototype test and development. Since 1950, NOL has completed 200 new weapons and devices such as SUBROC, nuclear depth bombs, mines, projectile fuzes, underwater detection systems, and components and design data for POLARIS, TARTRAR, TALOS, TERRIER, ATLAS and TITAN missiles. A civilian staff of over 3,000 people includes more than 1,000 professional engineers and scientists—experts with national and international reputations. Extensive and unique facilities embrace wind tunnels operating to Mach 17, hypervelocity ballistic ranges, the world's most exceptional hydroballistic facility, shock tunnels, 300g centrifuge . . . multi-million dollar experimental facilities.

Here is your opportunity. Each year, NOL interviews outstanding engineering and science graduating students. Selects the handful that seems to be really creative. Takes them to its beautiful 875-acre "campus" (the front yard is a golf course) in the rolling hills of Maryland near the Nation's Capital. Puts them through an optional one-year professional development course with rotational assignments to various areas within the Laboratory to prepare them for permanent assignments.

From the very beginning, new staff members have an opportunity to contribute directly to significant projects . . . to be part of an organization where groups are small and emphasis is on the individual.

NOL offers you a graduate study program that is one of the largest and most productive programs in the country. Each year members of our professional staff receive M.S.'s or Ph.D.'s through this program. NOL has a significant advantage in its proximity to the University of Maryland. Many NOL staff members hold permanent part-time positions on the Maryland faculty, and graduate level courses are taught at NOL every semester. Maryland also offers many courses on its own campus—only minutes away—at times which are convenient to and keyed to the special requirements of NOL.

NOL NEEDS:
Aerospace Engineers or Hydrodynamics—design studies of high-speed, high performance re-entry systems, basic problems in theoretical and experimental aerothermodynamics, aerodynamics and hydrodynamics, and aerodynamic design and development of hypervelocity wind tunnels and ballistic ranges.

Mechanical Engineers—conceptual design and development of warhead safety, arming and target-detecting devices for tactical and strategic missiles, underwater weapons, vehicle structures, and mechanical or electromechanical time and motion-sensing mechanisms.

Electronic Engineers—design, development and evaluation of underwater communications and detection systems, weapons guidance systems, influence fusing, air-borne mis-

Goddard-the Perfect College

"It is egotism which leads a professor to believe that he can motivate a student," said Pitkin, president of Goddard College, Vermont. "Motivation comes from within the individual. It is up to the professor to discover the source and to stimulate it." Pitkin's speech, opened the four day Educational Symposium held last week on the campus of St. Mary's College. The purpose of the symposium was to investigate contemporary educational views.

According to the visionary educator, learning, an intrinsic activity, is often stifled or discouraged by conventional teaching programs. Lack of individualism and imagination in planning the student's program can, and often does, kill creativity and enthusiasm. Goddard College tries to overcome this.

Pitkin sees five disciplines which must be developed in a student: He must be able to solve problems and to develop a set of values which will enable him to do this; he must be able to make a decision which is not always the obvious one; and he must be creative. All of this is combined in what President Pitkin calls "developing a life-style." "A curriculum" says Pitkin, is a set of subjects. "It is the student's entire means of developing his life-style."

Goddard College was established because of these feelings. The thirty year old school offers a B.A degree and is fully accredited. It has no course requirements, no established entrance requirements, no exams, and no conventional grading system. "Yet, its students," according to the president, "are perhaps among the best educated and most excited students in the country."

Approximately 60% go on to graduate schools and have little trouble. Goddard allows extreme flexibility in foreign study and the "work-study" concept. Independent study is an integral part of the educational program.

In summing up the Goddard student, Pitkin is the first to admit that they are far from perfect people. "Yet," he says, "they are usually able to make a decision and are willing to accept its consequences. This is an important part of their education. The educational program usually centers around the problems which the student feels are real and relevant."

Moreau Schedules

Seminary Confab

The students of Moreau Seminary are presently completing the arrangements for a National Seminary Assembly, to be held here in April. The idea was conceived last spring after a similar assembly met at Maryknoll Seminary in Glen Ellyn, Illinois.

To this meeting, the first of its kind, forty seminaries from throughout the East and Midwest sent student delegates and a faculty representative for two days of talks and seminars. The topics centered on student government, curriculum, and the goals of the college-symposium program.

This year, Moreau has sent information and invitations to all of the 225 seminaries in the country and they are expecting affirmative replies from at least twice the number which attended last year's conference. The three day assembly, to meet from Feb. 19-21, will deal primarily with social action and involvement.

Says Patrick Gaffney, head of the speakers committee, "We wanted a program that would be more of a learning experience rather than a social gathering. Consequently, the speakers, seminars and the other activities are designed to be as relevant and stimulating as possible."

"We are seminarians, he remarked, are notorious for their lack of intercommunication. A gathering such as the upcoming conference, is an important step in solving this problem."

A natural setting for summer study.

...the '70s...

Can you project yourself into the future? What will the '70s bring? What awaits us in this changing age of the future? If serving God and man is part of your projection for your future, you might consider the Paulist order. Paulists will be a vital part of the '70s just as they were a part of the '60's...and the '50's...and every era since they were founded back in 1868.

The Paulists are men of today preparing for tomorrow. They meet the needs of all God's people in every age. Paulists are free from the stifling formalism of centuries past and they are given the opportunity to develop their own God-given talents. They are also free to use contemporary mediums and techniques to achieve their goals. Communications, for instance, is synonymous with Paulists.

If you see yourself as a priest in the future? Should you become a priest? What will the '70s bring? What awaits us in this changing age of the future? If serving God and man is part of your projection for your future, you might consider the Paulist order. Paulists will be a vital part of the '70s just as they were a part of the '60's...and the '50's...and every era since they were founded back in 1868.

It is very rarely in the mountain of material that we read monthly that we come across an article that we think might be interesting to the entire university community. The article by Henry Steele Commager entitled “The University as Employment Agency” which appeared in the February 24, 1968, New Republic magazine is just such an article.

Mr. Commager writes “Students are protesting and, where protests are ineffective, demonstrating against the practice of locating the offices of the university recruitment of students by corporations and the military. Sometimes their protest takes the form of forcibly banning recruiters from university facilities, thus exposing them to the wrath of deans and presidents, who, unwilling to face the central issue of on-campus recruitment (i.e., the problem of the obligation of the university to private corporations and to government), to embrace with enthusiasm the marginal issue of bad manners.” Two weeks ago Notre Dame witnessed its first such demonstration against Dow Chemical and also witnessed the Administration’s refusal to face the fundamental issue at hand.

The article further stated “the basic principle which should govern the relations of the university to recruiters is that which should govern all other activities of the academy. The university is not a government, it has not received from the government, no matter how wise or generous, a mandate to govern the student. The student is not the agent of government. Wherever feasible the university should make available its facilities to legitimate educational enterprises. It is under no obligation whatsoever to make its facilities available to what is not educational. By no stretch of the imagination can it be alleged that Dow Chemical Company, the Marines, or the CIA are educational enterprises, or that they contribute to the educational enterprise. Dow Chemical is a business corporation; its business is to make money, and it recruits students at universities because that is one way it hopes to make money. No university is under any obligation whatever to help Dow Chemical make money. We quite agree.

“But, it is asserted, every student has a right to hear what these, and other, organizations have to say. So they have, and a university which sought to deny them this right would be dictatorial in its duty to its students, and to its own character. The argument is, however, wholly irrelevant to the situation which confronts us. Every student has a right to a great many things that the university is not obliged to provide. He has a right to read all newspapers, all magazines, and all books, but the university is not obliged to provide him with all newspapers, magazines, and books.” Any student who wants to read something that the university does not subscribe to can buy it at the local newstand or bookstore.

“So any student who wants to hear what Dow Chemical or the CIA wants to say, without serious inconvenience, visit them off-campus. Dow Chemical, like all corporations, can rent space in local office buildings just as it buys space in local newspapers. The Marines and the CIA can use the local post office to conduct interviews.”

Again we wholeheartedly agree.

A university should not throw open its facilities indiscriminately to all comers—business, religious, fraternal, political, military—for if it did, it would find those facilities swapped. It must and, in fact, it does, even now, discriminate. Even from the standpoint of the students it would be most unwise to open its facilities to Dow Chemical are not prepared to provide facilities for the Rotary, the Lions, the Mormons, etc. The only logical basis for discrimination is educational.

The Edge of Night

We have lived through those four years of berserk snow plows and of rising buildings, of fast fashion and doubt and doublethink. We have passed through coffee hours almost daily and we have often passed the seemingly plastic Grotto. We have gone to church before and then we have gone to church. Yet at least in the age and the time of Almighty Man we have been told by God of those who love him and then we have been told by those who hate him.

We have seen the final rise and full of pater­ nalism and even Administrators’ jiggling tricks were fruitless. We have seen the tables change and now we see we have been nationalistic in the paternalistic in our eyes. We have seen all these things and we have been all these things and we have loved Dulac through the stirring things in our heart. We have loved it because we have invested our guts here and be­ cause we have torn out our hearts in disgust at times. We shall revise its earth because it has quarshed the hardest and the worst sweat of all, the sweat of young men.

And soon we shall leave for the year is done and it is time. Time has caught the bustling and bustling boys of not long before and time has caught them as really much older but has caught them when they were younger and they have caught them when they are leaving though they are not sure why they even came.

We leave with our memories and there is no joy in them. We leave and we are graduates and some of us could have affairs with forty year old women and some of us will. But we shall leave and go forth and try to discover if it is ourselves or the world that has to be saved. And these thoughts shall form the story of their life for they are the thoughts of old and tried and grum­ bling men.

The The Mail

To the Senate:

I am announcing to you my resignation from the Student Senate.

This action comes as a result of the pedantry and supercilious attitude of Mr. Schwartz and the Student Senate, as well as my own disapproval of government as the order.

My belief is in philosophical anarchism. Man must look to the natures of the State and of the people and to the order which will bring man peace and help him join in the unity of the world.

I view your organization as 90% political bull and I am trying to play big-time politician, concerned more with an electoral stipulation for SBVP rather than the arming of campus police.

Government has no inherent evil in itself, because it is only a man-made creation. However, when viewed as something in itself, as the source of order for man, it is the order which will bring man peace and help him join in the unity of the world.

I have lived through those four years of fast fashion and fast fashion. I am announcing to you my resignation as one of your staff members, it is characterized by name-calling, in-group cuteness, and a rare fashion insanity. Nevertheless, “A Different Grain of Sand” (Feb. 12), although certainly characteristic of Schwartz’s writing, has in fact been two sentences which actually say something differentiating it from his previous columns. Despite unfortu­ nately, what they so fatefully state is simply wrong: “The plain fact is that the military is not perpetuating America. It is a fact and it is as such. We have torn out our hearts in disgust at times. We shall revere its earth because its earth has quarshed the hardest and the worst sweat of all, the sweat of young men.

And soon we shall leave for the year is done and it is time. Time has caught the bustling and bustling boys of not long before and time has caught them as really much older but has caught them when they were younger and they have caught them when they are leaving though they are not sure why they even came.

But we shall leave and go forth and try to discover if it is ourselves or the world that has to be saved. And these thoughts shall form the story of their life for they are the thoughts of old and tried and grum­ bling men.

The To the Senate:
By JOHN ALZAMORA

Crackle, burn and splatter, it's Canned Heat with a new album, Boogie With Canned Heat, thatuzzles its sound out of its grooved, black frying pan. The music is mean and dirty as it cooks out of the low, growling vocals of Bob "Bear" Hite and the Clapton-like lead guitar of Sunflower Vestine.

Canned Heat, instead of getting lost in the poeticky language of psychedelic lyrics, sticks with the mainstay of all R 'n' R, the blues, and infuses it with what the group calls a boogie rhythm. This "boogie" business has got nothing to do with the jazz form of the thirties and forties except for its strong, dominating beat. And, it's done the boogie that makes the record as exciting as it is.

The songs themselves lack a consistent quality; when they're good, it's good time music, when they're bad, it's, well . . . "Evil Woman" demonstrates the control that Bear Hite, a man with a form that makes his necktie look like a shoestring, has over the lyrics. He doesn't seem to try and turn it on too hard with the boogie nor give away to the easy way out, a slick mouthing of words without soul. Bear has enough fire in him to let it out slow and even throughout the piece.

Satire and black humor boil up out of "My Crime" and "Amphetamine Annie"; in the first piece the singer tells about his public offense in Denver, long hair, and the heavy handed shears of justice. "Annie," in the second cut, has one crystal clear fault that speeds it up. "Fried Hockey Boogie," a tour de force which lets each member of the band do his thing, Best solo summers of Sunflower Vestine; the Cream influence is all too evident and is what lets Sunflower bloom.

Disraeli Gears, the Cream's second l.p., in some ways is not quite as exciting as their first. There is less experimentation with rich vocal harmonies between Baker, Bruce and Clapton and not quite enough on the level of individual performances. Nevertheless, little Jack Bruce does a credible job with the vocals and Clapton when he does break loose is untouchable. Clapton's guitar goes everywhere, keeping your ear on it all times. People like Vestine try to imitate his sound but can never approach Clapton's range or skill. The album is worth getting just for his sake.

The material on Disraeli Gears, though better than most of the stuff on Fresh Cream, still isn't up to the musical potential of the trio. But, we get a lot of pleasure out of it anyway. "Tales of Brave Ulysses," sustained itself without getting too bogged down in poetic poses, but it pointed out a somewhat naive attitude to the world of drugs, a world that the Cream seem to have just discovered. "Swede" (that's how it's spelled) tries to rattle you with a chain of perception. Yet the Cream succeed best in a straight rock out mind's eye at all times. People like Vestine try to imitate his sound but can never approach Clapton's range or skill. The album is worth getting just for his sake.

News In Brief

Check The Books
Rev. James Simonson, CSC, Director of University Libraries, has announced the ND Library Council's sponsorship of the Undergraduate Student Library Contest. Each contest entrant will submit, in writing, a list of 25 books he considers to be the foundation of his personal library. Accompanying the bibliography must be an essay of not more than 500 words explaining why these 25 books were chosen and why the library collection was started.

The contest is open to all University undergraduates, and the 1st prize of $100 will be given to the first place collection, and the second place winner will receive a $50 award.

Oracle Stirs
Perhaps the label and Captain Electric will soon be charged and flying again at the Delphi Oracle. Geoff Gillette and Eddie Kurtz, two of the original seven owners of the club, believe they have found a donor to pull the Oracle out of the red.

Kurtz was introduced to the prospective donor by Rev. Joseph Schneider of the First United Methodist Church. According to Kurtz, the donor is a wealthy man interested in the ideas of the new generation. Kurtz said the donor was an active participant in the Alabama peace walk. Kurtz expects the promised $1500 to $2000 momentarily. According to Gillette, "He doesn't want to lend it, he wants to give it."

Hints From Abroad
A conference titled "Cities in Conflict" is to be held in the Continuing Education Center March 31 to April 3 will bring three prominent city planners to the campus. Dr. Jucundio Kubitschek, former president of Brazil and the first to argue for construction of Brasilia, will discuss Brazil's interior development. Donald Shap, who has served for over twenty years as the legal advisor to the Lord Mayor of London, and Rolf Schwieder, who was involved in the reconstruction of West Berlin, will discuss problems of city planning.

Poll Off-Campus
The Student New Dorm Study Committee will conduct a special poll of off-campus students on Tu., Feb. 27. The Committee wishes to ascertain how many students would willingly return to campus if space were made available. Polling stations will be maintained during lunch and dinner hours in the Huddle and South Cafeteria and from 5-8 p.m. in the Library.

IMMEDIATE ENGINEERING CAREER OPENINGS
Mechanical Engineers
Electrical Engineers
Marine Engineers
Industrial Engineers
Systems Analysts
See our representative, Ed Conley
Tuesday, February 27
He'll be at the Placement Office to answer questions, discuss qualifications, take applications for fast action.

Fencers Foiled Again
Streak Ends at 31--Curses
Notre Dame's fencing win streak ended at 33 on Saturday when the Irish lost a 14-13 match to Wisconsin. The streak, longest in school history, reached 31 when the fencers downed Milwaukee Tech 20-7 and Iowa 15-12 on Friday night. Notre Dame began all over by beating Illinois 16-11 in the second match of Saturday's twin meet.
Pete Farrell set a new meet record in the 880-yard run as the Irish took the team title in the Central Collegiate Conference meet on Saturday night. Notre Dame totaled 73 points, 13 better than runner-up Western Michigan. Farrell also took the 1000-yard run. Other Irish winners were: Jim Reilly--shot put (52 ft. 8 in.), Ed Broderick--high jump (6 ft. 8 in.), Chuck Velhoren--mile run (4:12.7). and the freshmen mile relay (3:24.7). Bill (Soul Bird) Hurnd put in a good night's work, finishing second in the 60-yard dash (.10.2), second in the 300-yard dash (.30.1), and fifth in the long jump (22 ft. 2 in.).

Collin Jones hit on 16 of 26 shots from the floor and 6 of 7 free throws to lead the Notre Dame freshmen cagers past De Paul 92-70 on Friday. Jones' 38 points sparked the Irish to their fifth victory in six starts, while dropping the Demons to 15-6. After falling behind 5-2, the IrishFreshmanCougarsputup De Paul's 92-70 on Friday. Jones' 38 points sparked the Irish to their fifth victory in six starts, while dropping the Demons to 15-6. After falling behind 5-2, the Irish freshman cougars put up a good fight, scoring 20 points.

Western Michigan's Dave Polshinski held off a last-second bid by Notre Dame's John May in the last leg of the 400-yard freestyle relay to win the swimming meet for the Broncos 63-50 on Saturday night. May's effort forced a deuce's decision which went against the Irish who needed the seventh relay point to pull out the victory. Notre Dame's fifth

Tuesday, February 27, explore an engineering career on earth's last frontier.

Talk with Newport News On-Campus Career Consultant about engineering openings at world's largest shipbuilding company—where your future is as big as today's brand new ocean. Our half-billion-dollar backlog of orders means high starting salary, career security, with your way up wide open. It also means scope for all your abilities. We're involved with nuclear ship propulsion and refueling, nuclear aircraft carrier and submarine building, marine automation. We've recently completed a very oceanographic one survey. We're a major builder of giant water power and heavy industrial equipment. We're starting to apply our national nuclear know-how to the fast expanding field of nuclear electric power generation. We're completing competitive systems designs for the Navy's $1 billion plus LHA fleet concept.

Interested in an advanced degree or research? We're next door to Virginia Associated Research Center with one of the world's largest synchrocyclotrons, offering advanced study in high energy physics. We're close to Old Dominion College and University of Virginia Extension Division, where you can get credits for a master's degree, or take courses in Microwave Theory, Solid State Electronics, Nuclear Engineering and other advanced subjects. Ask about scholarships, tuition grants, study and research leaves to implement these opportunities.

Ask, too, about the pleasant living and lower living costs here in the heart of Virginia's historic seaside vacation land, with superb beaches, golf, fishing, boating, hunting.
We're getting ready for tomorrow. We have to. We're responsible for helping Chicago become the city of tomorrow. We need the talent, ambition and dreams of today's graduate engineers. Young men who can handle the problems of urban expansion. Who can create solutions on a drawing board or out in the field. Who can manage the implementation of their solutions. Men who want to find their way to high-level management positions.

If this is the opportunity you've been preparing for, interview with The Peoples Gas Light and Coke Company of Chicago. An Equal Opportunity Employer.

Peoples also has openings for academic majors in Accounting, Business Administration, Economics, Finance, Home Economics, Liberal Arts, Marketing, Mathematics and Statistics.
Sign up for an interview at your placement office—even if you’re headed for graduate school or military service.

Maybe you think you need a technical background to work for us.

Not true.

Sure we need engineers and scientists. But we also need liberal arts and business majors. We’d like to talk with you even if you’re in something as far afield as Music. Not that we’d hire you to analyze Bach fugues. But we might hire you to analyze problems as a computer programmer.

What you can do at IBM

The point is, our business isn’t just selling computers. It’s solving problems. So if you have a logical mind, we need you to help our customers solve problems in such diverse areas as government, business, law, education, medical science, the humanities.

Whatever your major, you can do a lot at IBM. Change the world (maybe). Continue your education, certainly, through plans such as our Tuition Reimbursement Program. And have a wide choice of places to work (we have offices at locations throughout the United States).

What to do next

We’ll be on campus to interview for careers in Marketing, Computer Applications, Programming, Research, Design and Development, Manufacturing, Field Engineering, and Finance and Administration. If you can’t make a campus interview, send an outline of your interests and educational background to Mr. J. C. Pfeifer, IBM Corporation, 100 South Wacker Drive, Chicago, Illinois 60606. We’re an equal opportunity employer.
