The Convo Center just wouldn’t do. And so our loyal Notre Dame supporters took it upon themselves to let the Fieldhouse know who is Number One in their eyes.

She was stubborn at first, perhaps irritated at the temporary flirtation with Notre Dame’s new maiden. She warmed up though and welcomed them back with open arms.

One has to wonder what they’ll do next year without her.

Theology majors statement

The undergraduate theology majors of Notre Dame and St. Mary’s issued a statement this morning criticizing the university community for its complacency about the Vietnam war. It also urged campus support for the nationwide Oct. 15 moratorium.

“We, the undergraduate Theology Majors of the University of Notre Dame and Saint Mary’s College, believe it impossible to reconcile the message of Jesus Christ with toleration of the war in Vietnam. We deplore the silence and complacency which has too long implied the consent of this Christian University to that war. Specifically, we point out the impassiveness of Father Hesburgh to publicly address himself to the issue that this war necessarily raises for the Christian. We point out the lack of initiative of faculty groups in concerning themselves with the critical problems arising from this issue at a Christian university. We point out the failure of the majority of the student body to recognize the diametric opposition of Christianity to this war. We appeal to every individual in this community—student, faculty member, and administrator—to publicly participate in breaking this silence by observing the nationwide Vietnam Moratorium on October 15, 1969.”

300 people gather for a quiet afternoon, while Phil McKenna, Fred Dedrick, and Art McFarland meet with the Trustees.
Counseling innovates

Workshops, orientation programs, and a new experience-based course are all part of the Notre Dame Counseling Center's new emphasis on preventive medicine for emotional problems.

"We can take two approaches to student problems," Dr. Sheridan P. McCabe, director of the two-year-old center explained. "We can wait for a student to come to us with his worries, or we can try to help him deal with his concerns before they grow into well-developed problems."

In the past year, the center has experimented with several different plans for implementing the second approach. One mechanism of reaching the student is the workshop, the Rev. Daniel M. Boland, C.S.C., counseling psychologist at the center, explained. The workshop is an effort to break down the student's traditional approach to learning that adults have all the answers, he said. In many cases, he added, the student simply has to find his own answers, for only he can work out the problems involved in a breakdown of values.

Although workshops can deal with any subject, two which have been particularly successful looked at racism and student values. The first was sponsored by the Students Against Racism, to help while students identify and correct the sources of prejudice within themselves. The second was an effort to help students evaluate their own value systems identifying the strong elements and thinking out the weaker sections of their moral codes.

A person-centered approach to freshman orientation is another innovation of the Counseling Center sparked by student requests. Called the Student Development Program, the freshman workshops include men from 11 residence halls at Notre Dame, and several women from nearby St. Mary's College. In SDP, upper-classmen in the dormitory volunteer to help the new student make the adjustment to college life. These volunteers are trained by the center to be friends to the freshmen—someone the new student can go to (continued on page 7).

This rally just ain't the way they used to be, so everybody moved to...see top of page 1.

Law School requires tests

The Law School Admission Test, required of candidates for admission to most American Law Schools, will be given at more than 250 centers throughout the nation on November 8, 1969, February 14, 1970, April 11, 1970, and July 25, 1970.

The test, which is administered by the Educational Testing Service, was taken last year by over 58,000 candidates whose scores were sent to over 165 law schools.

The morning session of the Law School Admission Test measures the ability to use language and to think logically. The afternoon session includes measures of writing ability and general background. A Bulletin of Information including sample questions and information, and a registration form should be obtained seven weeks in advance of a testing date from Law School Admission Test, Box 944, Educational Testing Service, Princeton, N.J. 08540. Registration forms and fees must reach ETS at least three weeks before the desired test administration date.

STUDENT UNION SOCIAL COMMISSION

invites you to

HOMECOMING '69

FRIDAY, OCT. 31

SATURDAY, NOV. 1

SHOW YOUR HTH, GIRL FROM ACROSS THE ROAD, ETC., A REAL NOTRE DAME PEP RALLY AT 7pm, THEN TAKE "A VOYAGE TO ATLANTIS" WITH DINNER (OPTIONAL) AT 8:30pm AND A SEMI-FORMAL BALL FROM 10pm - 2am IN THE ATHLETIC & CONVOCATION CENTER.

TOUR THE HALL DISPLAYS IN THE MORNING, THEN AT 1:30pm, WITNESS PIRACY ON THE HIGH SEAS, IRISH STYLE, AS NOTRE DAME TAKES ON THE MIDSHIPMEN OF THE NAVY. AT 8pm, MAKE IT A REALLY "SPECIAL OCCASION" WITH THE SOUNDS OF SMOKEY ROBINSON & THE MIRACLES IN THE ACC.

BIDS TO THE BALL, FOOTBALL TICKETS AND A LIMITED NUMBER OF MOTEL ACCOMMODATIONS WILL BE AVAILABLE THROUGH LOTTERY. WE URGE YOU TO MAKE YOUR OWN MOTEL RESERVATIONS NOW.

FOR FURTHER DETAILS ON HOMECOMING '69, FOLLOW THIS WEEK'S OBSERVER.
The Federal Government for price-fixing, according to Kranakis.

"A lack of a great deal of information," Tim MacCarry, a senior also concerned student trustee, was accused by Kraniak of being the "pirate of Peru." Grace, also of the Motorola Corp., and a trustee, has been sued by the students. Kraniak's grandfather has been accused by Civil Rights Groups of discriminatory activities.

"I am almost positive we did not get it in the way we wanted it," McKenna's first proposal of the day was concerned with the representation on the Board and granting them full voting and speaking privileges. Except for the first fifteen minutes of the meeting, the discussion centered around this issue.

Little time was spent discussing the other proposals. Four proposals were discussed to such a small degree that he stated that he had little or no idea about what the Board's feelings were on them.

The proposals were 1) publishing of minutes; 2) a statement of the Board's investment policy and a revelation of investments; 3) granting unlimited access to the SSB to the University; and 4) an immediate disclosure as to whether the University held investments in ten major U.S. firms.

One proposal requested the participation of the Student Body in the change. "I did this because these changes would affect us in both small and major ways. I did this so that we get the greatest chance of understanding," McKenna said. The committee members were quite willing to meet four times a year. At these meetings, McKenna said he had been mandated to present the proposals in the name of the student body.

This proposal was viewed as a different light after the Board on Friday decided to reorganize the committee into the Educational and Student Affairs Committee.

"We probably will have representation on the Student Affairs Committee, but I have no idea of the form it will take," said McKenna.

McKenna said he agreed with the change and felt that it was done because the Board considered the committee as covering too wide a range of concerns. McKenna did not consider the proposed change a loss of influence for student representatives if "they envision the role of the SAC as one that will deal with all aspects of student life including the academic aspect."

The only proposal on which McKenna voices almost certainty of its approval requests the Student Affairs Council to meet four times a year. McKenna said he had been informed by Mr. Philip MacFarland, Special Assistant to the President, that the committee members were quite willing to meet four times a year.

"All the proposals came from the student senate bill passed last year. I was mandated to present them. I merely expanded on them or subtracted from them in minor ways. I did this because these changes would give us the greatest chance of consideration and passage," McKenna added.

"Any further major action" will be approved by the Senate, McKenna added.

The "very disappointing" crowd was large enough, however, to cause some concern among the BSMC members. McKenna assured them that the students were there not in any way to "intimidate us but merely to provide a non-violent show of unity."

THE OBSERVER

by Cliff Wintraud

Despite the fact that the members of the Board of Trustees were "noisy and "sincere," "I was not sure they were able to understand anything," said Edgar Whelan, Director of Student Affairs.

"They were "very gracious," McKenna said about the trustees Friday.

McKenna was in the Board meeting over two and one half hours discussing the seven proposals he had submitted to them.

The Board's decision on the requests will not be made known until sometime early this week when they will receive personal notification from the Board.

The delay in notification results from the fact that the Board was unable to hold their meetings on time.

"We exemplified yesterday, however, about what the Board's decisions would be. He based his speculation on the decision he had heard with Board members, but emphasized, however, that his statements were merely speculations.

"We didn't get representation on the Board," McKenna said in reference to his major proposal. "I am almost positive we did not get it in the way we wanted it," McKenna's first proposal of the day was concerned with the representation on the Board and granting them full voting and speaking privileges.

Except for the first fifteen minutes of the meeting, the discussion centered around this issue. Little time was spent discussing the other proposals. Four proposals were discussed to such a small degree that he stated that he had little or no idea about what the Board's feelings were on them.

The proposals were 1) publishing of minutes; 2) a statement of the Board's investment policy and a revelation of investments; 3) granting unlimited access to the SSB to the University; and 4) an immediate disclosure as to whether the University held investments in ten major U.S. firms.

At these meetings, McKenna said he had been mandated to present the proposals in the name of the student body.
It is time to end the war in Vietnam. No American, we believe, can disagree with that fact. If disagreement lies anywhere, it is over the best means of ending it.

Americans have argued for a long time now about what that way is. Total withdrawal, phased withdrawal, negotiated settlement, and military victory, are terms that Americans have at each other since the war began. The American public has yet to figure out when it did. It has been a strange war even though it can not be called one. America never decided to start it. We never made an overt commitment to it. We just never made a national decision to do anything about it.

That indecision has exacted a very costly toll. Close to 40,000 Americans have lost their lives. Dissent over the war has helped tear America apart. Funny thing, but the two groups that probably have something very significant in common. Nobody has ever really told them what Vietnam is all about.

The American "spirit" is perhaps responsible for that one tragic flaw. It was always more or less taken for granted that anytime America fought—it was fighting for right. That is—if anyone can figure out when it did. It has been a strange war even though it can not be called one. America never decided to start it. We never made an overt commitment to it. We just never made a national decision to do anything about it.

It is not yet clear how much the public can stand of this kind of war. The Senate, in any case, is ready to do its part. The whole nation needs to think—not only for a day—but for many days; until we are able to give the Senate the time it would demand (and deserve). There is a real danger that the Senate would go out on a limb on an issue without proper research with the result that they would be unable to address groups at major American colleges and universities—or about traveling in safety in any part of these United States.

The saga of rock 'n' roll

**by Michael Kendall**

Hypothesis: Rock is thirty-one years old. That's right: three, one. Now, adults won't admit it and the kids won't believe it but that's where it's at. Rock 'n' roll has roots that sink deep into the black soil that bred jazz. The style is basically the gospel shout of the Negro spirituals, the same influence that produced the dissonant sounds of jazz. The style of jazz itself was played throughout the black artists. Fats Domino, Leadbelly were writing and playing the foundations of today's rock 'n' roll. The jazz they played was essentially the same as any jazz you'll find today.

But this rock did add some new twists to popular music. Traditionally all pop tunes were written in a 32-bar structure. These musicians dispensed with this and replaced it with repeating eight-bar measures.

Hunsaminsky, rock 'n' roll also relies on repetition. Many listeners would stand up in repetition, triplets behind a steady four-beat backbeat.

**Black Music For Blacks**

Jazz history in America was generally one of white musicians taking black music and smoothing it out for white audiences. The war it was white bands that America swung to.

The material was originated by black musicians. It was played by white bands for white dance crowds and the Negroes remained, moving in the ghettos. Unwillingly whites were laying the groundwork for the end of jazz as dance music. A new wave of white musicians, a new generation of disillusioned urban Negro musicians introduced a new style to jazz "that white boys could dance to."

Besop was the name given to the new music. It was made up of a blend of flattened fifths and polyphonic chords. These were displayed amidst nervous and aggressive rhythms.

It was here that jazz unwillingly knocked itself off the dance floor. With its inclusion of the blues, rock 'n' roll became nearly impossible to dance to.

And jazz and rock benefited from this. Jazz, tired from the construction of the dance floor, was allowed to evolve its various levels. Rock served its purpose and fell the gap on the dance floor.

One of the most innovative of the rock onto the dance floor was Alan Freed, a Cleveland DJ. In 1954 radio station WINS brought Freed to New York for the sole purpose of pushing rock 'n' roll. And push he did.

**Haley's Hello**

The first white man to make a hit rock 'n' roll record was Bill Haley with "Cress Cat Crazy." Released in 1951, the record sold over a million copies, most in 120 radio stations between 1954 and 1956.

Then in 1953, Haley came up with his tried uncorrectly to get the people to stop standing on the chairs. They had waited too long and had no hope of controlling the furtive masses. Only the sight of the Chambers Brothers blocked, but also their vocal sound. Too many people were crowded into the front of the stands, white riffs were their only hit song, "Rock 'n Roll Time," was all but drowned out. The only ones who could hear anything else were those lucky 150 who were on the dance floor. Overall, the concert was a success to its audience by three dimensions. First, local campus folk talent was teamed up with professional, wildly popular performers. Second, a great deal of the audience was checked out of the full sound of the Chambers Brothers by a small number of groupies. Third, the Brothers played only 8 minutes rather than the promised 90 minutes. In the final analysis, however, the concert was entertaining.
Co-ex program will expand

by Bill Carter

With its first semester of extensive activity now in progress, the co-ex program is currently being studied for further expansion within the next two semesters. Fr. Charles Sheedy, head of the committee working on the project, described some of the ideas that were agreed upon when the present program was formulated last year.

"We've taken care of most of the objectives set up for this semester," said Sheedy, "We originally set out to extend the program to sophomores, which was done, and then open it up to 250 freshmen. We thought it important that the program for new students be initiated on an entirely voluntary basis since we didn't know what the reaction to the idea would be."

Fr. Sheedy indicated that the incoming freshmen were all offered the opportunity to sign up for the program before they arrived on campus. The response was so great that an overlay resulted, causing the committee to limit the selection of students to participate in the program. There are over 600 involved in the co-ex program right now, including the Notre Dame upperclassmen who are taking education courses at St. Mary's.

One of the more definite ideas involves a system of joint registration for those participating in the program next year. This would include a joint catalogue of the courses open to the exchange students from both schools. Fr. Sheedy said that no real listing of any further courses to be included in the program could be made yet, because most of those plans will have to be worked out at the first meeting of the committee this year on Oct. 15. But he also indicated that from a personal viewpoint he expected as many courses at possible could soon be incorporated into the program.

One of the early problems to be settled this year concerning the co-ex program registration according to Sheedy, is the conversion of the data processing capabilities in order to handle the new load of scheduling.

The question of the 10 cent fare for nightly shuttle bus ride may also be discussed, although Fr. Sheedy conceded that the committee involvement with the financial aspects of the bus system has been rather limited. About the only information he had on that subject was that he knew the busses were expensive.

The more concrete plans for the future of the program should become clarified during a committee meeting on October fifteenth, Sheedy indicated.

The committee members include Fr. Sheedy, Fr. John E. Walsh, Professor Frederick J. Crossen, dean of the College of Arts and Letters, Professor Robert McInnis, and Professor Stanley S. Sendler, of Notre Dame, as well as Sister Jeanne, Sister Alma, Sister Basil, Sister Elizabeth Noel, Mr. John Deuel and Mr. Schlesinger, of St. Mary's.

Dr. Karanjit Rai, professor of biology at Notre Dame, breeds his killer mosquitoes that sterilize their species.

"Killer mosquitoes" who unthinkingly destroy their companions and then destroy them, are one of the latest weapons in the war against disease in tropical areas. Dr. Karanjit Rai, professor of biology at Notre Dame, has been using this weapon. He recently returned from that South American country where he was selected as a consultant to the International Atomic Energy Agency and the Brazilian government in setting up an insect control laboratory.

Many of the techniques which Brazil can now employ to reduce its fierce mosquito population were developed or tested at Notre Dame's Mosquito Genetics Laboratory which pioneered research in the field of insect genetics and was recently designated by the World Health Organization as an international reference center for insecticides.

Brazil is particularly concerned about its immense mosquito population, since this tropical species carries the dread diseases of malaria, yellow fever, and filaria.

Filaria, called elephantiasis in the later stages, does not kill its victims, but disfigures and weakens them, causing severe and painful swelling of the limbs. In some areas of Brazil, Rai said, 10 per cent of the population is infected with filaria.

"The mosquito can go anywhere, or even your chemicals, can't go," Rai said in explaining the technique of using mosquitoes to control other mosquitoes. "He can search out his kind under leaves, in the deepest jungle, or in the cans of water left in backyards. After all, he is searching for the member of his opposite sex."

Rai said.

The insect control center's job will be to release "traitor mosquitoes" and make sure they do a lot of damage when they mate.

Currently, work is underway at Notre Dame to develop several other methods of mosquito control Rai explained. One of these, which may provide longest-lasting control of insect populations, would involve releasing a large number of mutant mosquitoes, which produce offspring who are 80 per cent sterile. While 20 per cent will be able to reproduce, they in turn will pass on the trait of sterility to 80 per cent of their progeny.

For longer-range control, researchers at Notre Dame are developing mutants which carry lethal genes on three chromosomes. These genes will spread through the entire mosquito population, guaranteeing that a large percentage of offspring will die each generation. Though the method may never eliminate the mosquito completely, Rai admitted, it could be quite effective in keeping its numbers low for many generations.

One of the most common and widely tested methods of control is to release large numbers of male mosquitoes which have been sterilized with a small dose of radiation. Since a female mosquito only mates once, each male is capable of rendering several females infertile, thereby preventing several hundred eggs from hatching.

If enough sterile males are released, the population can be effectively obliterated in a relatively short period, Rai said. The technique has almost eliminated the screw-worm fly in the United States, and done much to control a pesky fruit-fly in Central America.

However, for any of these plans to work, he said, the researchers must know quite a bit about the particular mosquito common in the area. "You must know how many there are, where they live, and what their physiology is like," Rai explained. These factors are important in determining how many "traitor mosquitoes" to release, when to release them, and what dosage of radiation will render them sterile without warping their offspring.

Preventive medicine is emphasized.

Rai added. In this effort to help students develop their own resources rather than pinning the answers of their elders, the center is sponsoring a three-credit seminar on "Effective in Human Relations." Again, the class is inspired by requests from student government - this time members of the Notre Dame Student Union. The seminar has 22 students, all involved in student government, Notre Dame men and St. Mary's girls.

The class is an effort to relate the student's experience outside the classroom to formal, theoretical learning within the class. We want to teach the students how to diagnose a troublesome situation, identify the relevant information, and plan constructive action," McCabe explained.

In addition, the class will cover such diverse aspects of human relations as conflict resolution, leadership style, the decision-making process, group dynamics, and communication. "All of it," McCabe added, "in ten years the job skills to mosquitoes generally will be obsolete. We should really be teaching people who can be effective in an atmosphere of change, who can learn new skills as they come along, and who can adjust easily to continually new situations."

Three are attacked

A Notre Dame student, Stanley Smirallo, and two Notre Dame students, Susan Sejewicek and Irene Baurcek were attacked by seven "traitor mosquitoes" earlier this week, early Sunday morning in front of LaFortune Student Center.

The blacks attacked the three and knocked one girl down and six others down before they left. The victims were able to escape and tell their friends what had happened.

The students said they were interested in talking to the professor about the attack. "We just got bitten, and we don't really know why," one student said. "We don't really know why they did it."

The students were also interested in what could be done to prevent such attacks in the future. "We don't really know what could be done to prevent such attacks. We just want to know why they did it," another student said.

The Observer

Can Joe throw? Ask the Spartans

by Mike Pavlin
Observer Sports Editor

"We went in throwing," that's how Ara Parseghian explained his offensive game plan. "We had to establish our passing attack first and we felt then we could run successfully." Using this philosophy, Notre Dame buried Michigan State 42-28 Saturday in a game as full of surprises as a Dining Hall meat pie.

First of all, Duffy Dougherty didn't open with his own publicized Veer-1 offense. Instead, he replaced the fleet Erie Allen with Gordon Bowdell, a wide receiver. The resultant "half-Veer" met with only partial success. When the Spartans reached the vicinity of the Irish twenty, Parseghian revealed that he had several talks with Joe after the Purdue game. "It was very important not to have him lose his confidence," he had a great week in practice." Helping Theismann work his passing magic were receivers Ed Zeigler, Bill Barz, and especially Tom Gatewood. "It was a very important day for him (Gatewood), because the experience will give him confidence," said Ara. The sophomore split end gathered in ten passes for 155 yards and a TD. Barz and Ziegler each caught scoring passes and several of the trio's grabs were of the circus variety.

The Irish sprung some new passing formations on the Spartans: a wingback set with one man left in the backfield, and a tight formation with halfback Denny Allan rather than Gatewood split. Theismann's scrambling contributed greatly to the effectiveness of the offense. His total of 51 yards rushing almost equaled his 54 yards he had accumulated during the season's first two contests. Theismann's passing began to click in the second quarter after a change by Don Highsmith, who ended up with 345 pass to Gatewood. He directed the Irish on a six-play scoring march. He passed to Barz for lb, Gatewood for 13, and Zeigler for 29 yards (TD) on the last three plays to make it 21-14.

During the third quarter, ND put the game out of reach as Joe Theismann hit 7-9 passes for 119 yards and the Irish racked up 81 yards on the ground. A 23-yard pass to Gatewood made it 35-21 at the end of the period.

Michigan State was forced to come from behind the entire game, which hurt Duffy's half-control style. MSU quarterback Bill Tripplet couldn't pass with any consistency, although he did complete some long gainers. The Spartans got one touchdown off a fumble free of charge when a quick kick by Jim deArree was grabbed right off his foot by Ross Cull on the ND five.

To say the least, the victory was an important one for Ara Parseghian. "It was very meaningful for us, first because a loss would have been the second defeat in a row, second because it is a traditional rivalry, and third because we have no conference championship to point for which makes the rankings important." Allan's 29 carries (for 102 yards) tied a school record and the total of 70 points scored were the highest in the ND-MSU series.

Joe Theismann had his day against MSU. His passing performance (20-33, 294 yards) was the finest ever recorded in the series.
