Etienne wins SBP election; promises 'business as usual'

by Jim Rosini
Staff Reporter

Dennis Etienne and his running mate Mike Geisinger have been elected Notre Dame Student Body President and Vice-President for the 1973-74 school year.

Etienne and Geisinger won by a large margin obtaining 66.4 percent of the votes. Candidates Rick Gering and his running mate Kevin O'Brien received 19.6 percent of the votes while Brian McGinty and Bill McLean tallied 14 percent of the 1,614 ballots cast.

Etienne had this to say about the election, "I am very pleased to have won but I was disappointed with the small turnout of voters."

When asked about any new plans for the upcoming school year, Etienne simply replied, "Business as usual."

In the SLC elections, District 1, the off-campus seat, was won by Bob Kincaid over Christopher McManus. District 2, consisting of the two towers, elected Mike Hess, who ran unopposed as did District 5 winner, Jude Bremer, and District 6's Bob Connolly.

In District 3, Ed Rahill won over Matt Kubik and in a close District 4 election, Karen Moty narrowly defeated Pat Dore, 118 votes to 105.

Meet with Faccenda

No action vs. 'Nickie's' students

by Michael Welby
Staff Reporter

In a surprise move by the administration yesterday, Dr. Phillip Faccenda, vice president of student affairs, met with the 16 Notre Dame members of the "Nickie's 26."

The 16 students, all arrested at Nickie's and charged with being minors in a tavern, had been called before Dean of Students Fr. James Riehle for a 4:15 meeting in the first university action concerning the incident.

Although the meeting was scheduled in Riehle's office, it was Faccenda who spoke. Faccenda announced that the university intends to take no action against the students but warned that the police are watching Nickie's very closely. Faccenda was more concerned with the two students charged with vandalism in the incident.

(Two of the students involved were accused of letting the air out of the tires of the police cars.)

The decision not to act against the students was expected. Last week in a similar meeting, the ten St. Mary's students arrested in the raid received identical treatment.

Expected or not, the students were relieved with the decision. Jim Clarke, one of those arrested in the raid, said, "I agreed with Faccenda's action. It was done off-campus so it didn't hurt the university."
Campus roundup

Commencement finalized

A schedule of events for St. Mary's Commencement program has been released by Debbie Carvallo, Senior Class President. The schedule runs:

You will receive six tickets, four in the auditorium and two for close-circuit viewing, together with 10 announcements.

The gorgeous must be paid for when... 

...Any SMC senior who is graduating from Notre Dame and would like to attend SMC's commencement should contact Kathy Murphy (4327, P.O. Box 803) on or before March 6th. The number of seats is limited and tickets will be distributed on a first-come, first-served basis. They can be picked up at the bookstore on Wednesday, May 17th.

Ticket reservations for You're A Good Man Charlie Brown have been sent to all senior parents. Any questions should be addressed to Debbie Carvallo (phone 4018, P.O. Box 182).

Beerslayer chase

Saturday afternoon, the renowned Notre Dame Beerslayer will seek to elude dozens of thirsty pursuers in An Tostal's first Beerslayer chase.

Last night Terry "Scopp" Madden, the event's administrator, announced the rules governing the event:

1) The Beerslayer will be given a 15-minute head start.
2) Four man teams will then be given one hour to capture the ribbon attached to the Beerslayer. 
3) Upon capturing the ribbon, the quartet must return it to the chase starting point on the An Tostal field.
4) The Beerslayer is prohibited from entering any SMC buildings.

Fieldhouse party

The 75th anniversary of the fieldhouse will be celebrated on Saturday, May 5th. The celebration, sponsored by the Art Department, will include Citizen Kane and other movies, refreshments, and live musical entertainment. Everything is free.

Arts festival

The first Festival of the Arts to be sponsored by Free University, will begin this Tuesday, May 1st, and run through Sunday, May 6th. Student actors, poets, dancers, musicians, and singers will be performing on the South Quad during the lunch hour, and throughout the late afternoon and early evening each day.

Rain, the events will be held in the fieldhouse.

With TWA it pays to be young

TWA got a lot of things to help you in a lot of ways around the U.S. and Europe. But nothing comes closer to the adventure-some brave blockbuster Worldtrek experiences (arranged exclusively through TWA). 

Worldtrek

This isn't a vacation, it's an experience. From two weeks trekking the fjords of Scandinavia to 12 weeks on a pilgrimage to Kashmir. You'll find yourself camping with nomadic reindeer herdsmen, or floating across the Black Sea on Valla. 

For the exciting details, go to your TWA Travel Agent, Ticket Office, or Campus Rep. — or send the coupon below.
New problems confront Library

by James Greger

Staff Reporter

(1 Part 1 of a three-part series)

The bookouse used to sell portraits... with pictures of the library on it, calling it the "largest University library in the country. The concept of the untouchable greatness of the library is, however, dead. As Mr. David R. Sparks, the Director of University Libraries has often said, not the library; the library is instead.

According to Sparks, the Library is faced with a book costs rising at a rate of almost 15 percent a year while the Library budget has remained relatively static. The effect is that the library's status as a "curiosity," library affairs have been called into serious question. The Library must reconceive and restructure itself, something Sparks puts it, "the changing times with an unchanging budget."

At the same time, changes in the nature of "financial belt tightening" throughout the University are making the Library become more severe than ever. While the University Administration has not allowed the Library to greatly drop in the quality of its services, the needs of the community, the cost of running the library and the available library materials demand more appropriate action.

In order to understand fully the current position of the Library, it is important to know what services the Library provides, how they are maintained and utilized, why the Notre Dame Library stands in relative isolation, what the Library must do in the future and of course, how the Library can respond to the question of financial support.

It is a series of interviews with last week Mr. Sparks carefully examined those questions.

According to Dr. Sparks, "University libraries are curiously cut off from their environment." As soon as you begin to speak of the main commodity, the book, one runs into certain basic problems, one of which is the engineering problem of dealing with the high weight concentration of books and to maintain oneself, in the sheer quantity of library materials.

Along with mass of materials, the library consisting of the Memorial Library and the six college or departmental branches, must also handle microfilm, audio material and films. The University library has two basic missions: the support of the teaching and of the research in the University. Recent studies of the libraries at Cambridge and Oxford confirm these objectives as primary. The services which the University Library must provide at Notre Dame are directly related to these two missions.

In a functional sense, the activities of the library are organized into time of collection building, collection use, and special services, cataloging, and engineering. For this reason the staff of the University Library are organized into a Technical Services Division, a Public Services Division, and a Division of College and Department Libraries.

The titles of these divisions identify the services of (1) buying and incorporating books into the collection, (2) making the collections available for use, and (3) providing for the unique needs of the colleges of Science and Engineering.

The staff, a service of the library, without which it could not survive, is the staff. Including thirty-four Library Faculty and approximately 80 non-faculty members, the library staff has a tremendous work load. The complexity of clerical work, needed to organize 1,016,000 books into a tractable array is only one aspect of that task. For example, for every book on the shelves there are at least five cards in the card catalog. Sparks added that after the staff has wrestled with the complicated problem of a logical array they might have put the books in a practical working set-up. "Sheer quantity, detail and complexity are the core of our problem," it is also the staff's role to see that needed books are obtained, set the new books onto the shelves, and help the people looking for information to find it.

A very important staff position is that of Assistant Director for Technical Services. In this office, presently filled by Robert J. Havlik, lies the responsibility of getting books and getting them into the system. Mr. Havlik, therefore, the Acquisitions, Department, Catalog Department, and Serials Department.

The next important division is Division of Serial Services. Headed by Assistant Director Dr. George S. Serek, this division includes the Reference and Bibliography Department and the Collection Management Department, responsible for the management of the array of books on the stack tower of the Memorial Library.

Also in this division is the College Library. The College Library is primarily concerned with the support of the faculty of the University, and the graduate and undergraduate students. This division's research needs are different than for undergraduate studies and the purpose of the College Library is to be what Sparks calls "an intensive use collection."

Within the College Library there is also the public service provision of comfortable places for the students to study. The staff is then further divided among the departmental libraries in Mathematics, Life Sciences, Physics and Chemistry, Engineering, Geology, and Architecture. The Law Library is an entity completely separate from the other University Libraries.

The Library organization is designed to serve most efficiently and effectively the educational needs of the students. The next question that must be asked is whether or not the services the library are increasing or decreasing in meeting those needs.

Service Decreasing?

Mr. Sparks feels that the services of the library are not decreasing is not his job and his staff is working to ensure that they do not. In recent years the organization of the library has been made more efficient. One problem, he noted, was that, until last February, the post of Assistant Director for Technical Servs was vacant. Since Robert Havlik, who came from Nova University with an extensive background in printing, assumed the position, the problem, the have been remedied. Sparks feels that Mr. Havlik is "eminently qualified" in the technical aspects of acquiring and cataloging new books and has greatly increased efficiency in that area. "If we were to experience a diminution of services," Sparks said, "it would be because of cost and budgeting problems."

Some areas of library operation which Sparks feels could be definitely handled more effectively are the purchasing of periodicals, library security, and the expansion of non-book library services.

Every year, according to Sparks, serials occupy a larger portion of the library budget; in the current year the amount is 60.2 percent of the budget and next year it will rise to 67.6 percent of the total book budget, or over $214,000. Such increases are totally inconsistent with a barely changing book budget. The foreseeable problem is that all staff might be forced to do one job and serials and none to aid library use.

Serials, periodicals and journals are the most expensive forms of publication and their cost has also climbed the sharpest rise. Because this, and also because of serious U.S. currency devaluations, there is an acute need for careful reevaluation of priorities in such subscriptions.

Because of the nature of serial subscription, the amount paid out one year has to be available to be paid out in the next year, as well. As subscription rates do not remain static, additional funds are needed for price increases. One example is how some German periodicals which have tripled their subscription prices, and in the past year. Also, if the Library purchases a new subscription, there is need for back copies to complete the set and if an old subscription is canceled that completion is sacrificed.

There are two possible solutions.

(continued on p. 4)
Library facing new dilemma

(continued from p. 1)

to the serial problem: get more money, or be more selective and thoughtful in periodical purchases. Due to the impracticality of any substantial budget increases in the very near future, Mr. Sparks and his staff are working with the Green to highlight the last concert of ND Jazz Band

On Monday, April 30th the Notre Dame Jazz Band and the NDJB Combo, with emphasis on student solosist and compositions.

Special guest artist for this concert will be alto saxophonist Bunky Green. Green is a well-known jazz artist in the Chicago area who has played with Charlie Mingus and is currently teaching saxophone and leading the jazz band at Chicago State University. He will perform with both the Combo and the big band.

Rev. George Wiskirchen, C.S.C., Director of NDJB noted the progress of the band during the first year: "I was very gratified with our performance at the recent Collegiate Jazz Festival. During the past months every performance has seen the groups improve and we are excited about this concert especially with Bunky Green playing with the band and combo.

The program will present a varied fare ranging from Basie-style swing to rock, from thick textured big band writing to avant garde free form group improvisation and interfeeding, from blues (sung and played) to bop and beyond—all blended into an entertaining concert for all.

Solosists from NDJB will include Nick Talarico and Don Banas on trombone; Fedele Volpe and Bill Zak on trumpet; Charles Rohrs and Matt Brandes on saxophone; Mike Nickerson on bass; John Yackows and Neil Gillespie on piano; Jeff Noonan and Bob Guerra on guitar; Mike Kendall on drums and Juan Rivers on vocals and conga drum.

Doors will open at 7:30 p.m. for this concert with an admission charge of $1.00 at the door.

Chisholm to deliver lecture on Monday

New York Congresswoman and nationally known feminist Shirley Chisholm will deliver the final State of Life in America Lecture on Monday, April 30 at 8:00 p.m. in O'Laughlin Auditorium.

Ms. Chisholm was elected to the House of Congress from the Twelfth Congressional District, centering in Bedford Stuyvesant, New York (Brooklyn) in 1969. She has been a member of the Veterans Affairs Committee, and in the 93rd Congress, the House Education and Labor Committee. Chisholm is also chairwoman to the Military Affairs Committee of the Congressional Black Caucus.

Chisholm is also affiliated with the League of Women Voters, the Democratic Women's Workshop, the Brooklyn Branch NAACP, and the National Advisory Council for the Institute for Studies in Education at Notre Dame, among others.

The lecture is sponsored by the Student Union Academic Commission, the Graduate Student Union, and the Law School.

Long distance still is the next best thing to being there. And you can save money by calling nights or weekends.

WHAT'S YOUR GIRL BACK HOME DOING TONIGHT?
Coffeehouse features hoagies, sundaes, music

by David Rust
Staff Reporter

The SMC Coffeehouse contributes its share to Friday activities this evening in the shape of a hoagie-filled hall with a list of several top-flight entertainers and two SGA food specials.

Entertainment begins at 9 and runs until 11 p.m. Performing for patrons will be the Walter Brown group, Bob Tracy and Frank Martin, Buck and John, John Yackey, and Pete Snake.

Saga, the Saint Mary's food service organization, will be delivering hot fudge sundaes at 12 cents apiece and hoagie sandwiches at 25 cents.

The SMC Coffeehouse is a service that began as a suggestion from the Campus Ministry early this semester and has quickly developed into one of the most popular Friday night spots in the ND-SMC area, drawing crowds of 600 to 1000 students and faculty each evening, according to coordinators.

Contrary to earlier Observer reports, the Coffeehouse is not affiliated with the Campus Ministry. Complete operation and maintenance of the Coffeehouse is conducted by St. Mary's students Lisa Altman, Maureen O'Connell, Janet Harrington and Kathleen McGlinch.

Fr. Roger Cormier serves as formal head of the committee.

St. Mary's student government and college administration have suggested through recent actions that they are convinced of the present and future value of the Coffeehouse. When Fr. Kimney and Fr. Cormier appeared before the government earlier this month asking for $500 funding, the got $500. And college president Edward Henry gave the Coffeehouse committee permission to use any unwarranted furniture for the committee's purposes.

It's coordinators are anxious about its future. The committee is working to get more pillows and other equipment and checking into the possibility of having a senior art major redesign and paint the coffeehouse walls as a senior thesis next year, but its main concern is to contact volunteers to help run operations. Volunteers should call Kimney at 345. Willing entertainers or persons with ideas are also encouraged to call this number.

But this evening, these concerns are of secondary importance.

Library faces new role

(continued from page 4)

Kresge Foundation, and the Area Studies Program funded by the Ford Foundation. Another unique collection is housed in the University Archives which contain valuable documents on the history and development of Notre Dame as well as notable collections on the history of the state of Indiana, America especially the personal papers of General William Tecumseh Sherman.

The casual way the Notre Dame University Library is used by non-Notre Dame's Mary's people could eventually turn the Library into what Sacks calls a "public service facility for everybody in Northern Indiana." Given its primary mission in support of teaching and research, this is something it simply cannot afford to do in the present. If students from any other universities in the area ask to use the Notre Dame Library instead of their own because of its large collections. The result is that books and study space are denied Notre Dame students. The Library staff is more than willing to assist other students if it seems it will not upset the students from any other universities the same cannot be said of Notre Dame students who simply cannot service them. To do so would be more advantageous for all concerned. If they are to be privileged in using Notre Dame Library the Library falls in line with the cooperation of our neighbors with good cause.

The Library is also widely used by doctors, clergymen, members of the Mayor's staff, etc. and costs for library service are about three hundred dollars per capita (students, faculty and staff) for the use of the library. Spacks feels that, if outsiders other than customers of the Library personnel have a need for the library, they too should be required to pay such a fee. This type of controlled access, however, would demand increases in the number of security personnel and equipment.

Library security

Another service that is not at the level Mr. Spacks would like to attain but, again, is restricted by the budget is security or more specifically, access to the building and avoidance of theft or vandalism of the collections.

The "rip-off" problem

Problems of theft also face the Library administration and the answers are not simple. "The rip-off," Mr. Spacks noted, is growing. Spacks believes the technical steps like electronic surveillance would show distinct toward the students. He feels that students are basically very responsible and finds the problem hard to solve because, "I'm not here to be a policeman but if the Library is to be a democratic freedom for everyone we have to help and complete their education." In the Library's case, students can base their basic good sense. After all, it's their Library not mine.

Multi-media services

The need for expansion of non-book, library services must also be tackled by the Library administration. To increase audio materials, films and especially microtexts is important to the maintenance of a good quality library but it takes a great deal of funds. For example, the best, most efficient method of making audio texts available is not, as is presently the case in the Library, the use of phonograph records.

A better method is to use tapes. In the long run, changing from records to tapes save a great deal of money as well as increase the preservation of recorded sound. To make the switch from records to tapes however would mean a capital investment. The Library is simply not able to make at the present time. A related problem is the utilization of microfilm material. "I haven't got the money or the capital," Spacks pointed out. "I must purchase the texts as well as the necessary microfilm readers, rooms, etc.

In spite of these problems, Spacks is quite confident that the needs of the Library can and will be met by the University Administration. The University, he notes, will not allow its Library to lower its standards. He realizes that the funds throughout the University and he feels the funds available through the administration are doing its best in being equitable to the Library.

Moreover, a closer look at the budget and the library's status as a research library.

The College of Engineering is offering several courses in the fall, 1973 semester, which are designed for the non-engineering major.

AE 213: SPACE TECHNOLOGY - APPLICATIONS AND EFFECTS ON OUR SOCIETY

Mr. Teppe, Sec. No. 703010, 11 MWF (3-0-3)

A survey of the space sciences with a discussion of the appropriate outcomes of progress that has been made and its impact on Society. Consideration of future investigations.

AE 372-106: COMPUTER PROGRAMMING

Teppe, Sec. No. 703010, 1 MWF (3-0-3)

Introduction to computer programming using batch and online techniques. The FORTRAN and BASIC programming languages, solution of numerical problems, and applications to engineering and other fields.

This course will also be offered during the Fall 1973 Summer Session, Mr. Teppe, Sec. No. 703010, 1 MWF (3-0-3)

AE 213-106: OCCUPATIONAL HEALTH

Mr. Teppe, Sec. No. 700510, 1 MTU (3-0-3)

Examination of the need for health and safety reports in the workplace with 2 sessions of any interest.

As insurance of the student's awareness of health and safety issues for the student and future profession. Students are expected to attend all classes.

The College of Engineering in the Department of Architecture is open to all students, unless otherwise specified.

Arch 141: HISTORIC ARCHITECTURE

Sec. No. 700000, 1 T III (3-0-3)

Introduction to historic architecture and historic preservation techniques and methods.

Arch 204: HISTORY OF THE BUILDING INDUSTRY

Sec. No. 700000, 1 T III (3-0-3)

A study of the development of the building industry in America and its effect on society. This course will be offered during the Fall 1973 Summer Session.

GERRY KENNEDY

TODAY

Saturday, April 27, 1973

the observer
In the middle section of today's Observer, there is a special supplement dedicated to the renovation of LaFortune Student Center. The renovation plans are the result of many hours of work put in by Ken Knevel, Rozanne Jabbar, and Ron Bitch. For their work, their desire, and their imagination in this project they should be thanked and congratulated by all the students of Notre Dame.

Hopefully, in the near future, their work and their final plans will be incorporated into action. With luck, Note used. The reason is twofold. One, the server, there is a special supplement unusable in their present form. Second, the halls. As it stands now, LaFortune is rarely all the students of Notre Dame. It should be considered a place of study and not of activity and as the philosophy building has become a place of study and not of activity and as the philosophy state, the center must become the community center of the university. That implies activity and that necessitates flexibility.

Second, despite the fact that the halls are now and will remain to be the center of leisure activity on campus, the need for a community center, and activities centered on campus is pressing and LaFortune does not fulfill that need. With renovation, LaFortune will not necessarily fill that void. It is not a sure panacea to social and leisure activities at Notre Dame. But renovation will increase the likelihood of a bettering of these atmospheres.

Next week this report will be presented to the Trustees and hopefully they will view it favorably. It must be considered seriously because it is a proposition which could greatly aid student life at Notre Dame in the coming years. It should be presented to the board with the students' complete support.

Jerry Lukitus

Opinion

Out to See D.T.

r. thomas thues

My name is thues. I do not exist in the eyes of the law. I am also called 4-135-50-327. Again, I do not exist. I exist as A787320 in Mishawaka, and as one of my South American friends, I exist because the driver's license bureau has not given them a number. It seems that society, with its pseudo numbered labels, has trapped its members in a mass of incalculable inconsistencies in the make-believe world of Notre Dame is myth in the outside world. What is legal in one establishment is deemed illegal in another. What is legal in one establishment is deemed illegal in another. I do not exist. I exist because the driver's license bureau has not given them a number.

Mishawaka, but somewhere, people are deprived of fundamental rights. A human being, no matter what his name is, should not be deprived of fundamental rights. A human being, no matter what his name is, should not be deprived of fundamental rights. A human being, no matter what his name is, should not be deprived of fundamental rights. A human being, no matter what his name is, should not be deprived of fundamental rights. A human being, no matter what his name is, should not be deprived of fundamental rights.

We arrived at last, pulled down the collars of our N.D. jackets, and took ten cent off the beer. For our life's work, the bittersweet nature of the high class dives, we removed two I.D. cards: Notre Dame Identification Card and United States Draft Card. Everything we have come to symbolize is dead and our aesthetic desires would have been satisfied, but we forgot one detail. Notre Dame L.I.D.'s and U.S. Draft cards are not legal at Mishawaka fine art theaters. Disappointed and unfulfilled we went to the high class book store adjacent to the cinema: Our L.I.D.'s were apparently good enough for quality literature.

We browsed for ten or fifteen minutes. I guess we weren't ready for so much culture and so much art. We didn't try anything. Leaving the old men and vagrants who, as you well know, are known for their aesthetic taste, we were relieved of our pop and webraved the Mishawaka winter once again. Our ride had not arrived. Cold hungry, and ripped we left the front seat of the establishment. Not being of drinking age in the great state of Indiana, we ordered a pizza with a regular crust. The pizza was presented to us piping hot from the shelf along with a regular crust. Having only our illegal Notre Dame cards (which were under 21 anyway), we were forced to eat the Italian delicacy on the shelves of a "58 Chevy, with one headline.

Two pieces of pizza and two dollars a piece we started toward the center where our ride would be waiting. After twenty minutes and a questionably aesthetic proposition from a local Mishawaka resident, our ride came. Somehow we made it back to campus and the warmth of our dorm rooms. Now the only reason I'm telling you this story is because you may be hard-up for some aesthetic entertainment some Tuesday evening. My only solution to your social life is to get a hot dog, and put "Stuck in the Middle with You" on the Juice Box. It's much more aesthetic.
The LaFortune student center has suffered many years from the lack of student use due to its inability to satisfy the student in facilities and function. Originally, conceived through renovation, LaFortune will experience a resurrection this summer as renovation plans are once again initiated. Barring exaggeration, they are past due. Possibilities for a student center first materialized in 1953 when Fr. Hesburgh announced a $205,000 gift from an Oklahoma oilman to be used for the initiation of a student center. Joseph LaFortune made the donation to provide specifically a center on the campus for students. Since the Science building had been replaced by the Nieuwland Science Hall, it was chosen as the structure for renovation. LaFortune, a 1916 graduate who received an honorary degree in 1949, is presently an honorary member of the Board of Trustees. A South Bend native, he resides in Tulsa.

Although the principal designs were done by Frank Montana and Robert Schultz of the Architecture department, ideas and plans were first brought forth by a contest among senior architecture students. A fifty dollar prize was offered.

The principal objective of Schulz and Montana was to satisfy demands of students for facilities to hold ballroom dances and to meet. An off-campus room was also included.

Renovations, which were begun in the summer of 1953, faced completion in mid-November. The LaFortune Student Center was then officially dedicated during a ceremony after the Notre Dame-Iowa football game on November 21, 1953.

Except for the addition of the Huddle to the rear of the building, LaFortune, complete with the original furnishings of a White House interior decorator has remained untouched since its dedication.

Twenty years later, however, a committee formed at first to challenge the functions of the center, the Committee for LaFortune, has successfully brought forth plans to renovate the facilities and the function.

Due to the Committee's efforts, the plans you see on the following pages will soon be reality. Up n' coming: The LaFortune Renovation.
The proposed changes

by Michael Baum
Senior Reporter

Proposed changes in the LaFortune Student Center—designed by Renovation Architects to make the building more liveable—cover everything from such minor details at rearranging furniture to such major projects as redesigning the Huddle and opening a new food service.

Irish Pub

A student entering the basement of the revamped center through the present Rathskeller will walk through one of the major innovations—the Pub. Focusing around a central "bar" and a complete kitchen facility, the Pub will occupy the current Rathskeller space. Completely redecorated, wall booths and tables in the facility will seat 50 to 90 students "with no crowding."

Kitchen

The kitchen will occupy an existing—although unusued—coke-bar facility and be capable of serving such things as pizzas on a better scale than the Huddle's present heat-n-serve facilities, turning the Pub into a small on-campus restaurant.

Ron Blich of LaFortune Renovation Architects incorporated details other changes to the basement, designed under his supervision.

Student offices, including student insurance, Morancy Loan, Minority Counseling and Mecula will be moved to a new suite of offices in space currently occupied by the O-C office will move to the present Dine darkrooms and the International Student Lounge, evicted by the Pub, will be relocated in the cardroom-lounge along the southern side of the basement.

Walking up to the first floor, the student will find the main lounge redecorated but basically unchanged. Here similarity ends.

Tom Dooley Room

An added door on the east side of the Tom Dooley Room will make a natural corridor of it, tunneling traffic to the Huddle past, on the one hand, an information center—the probable new location of the Ombudsman's office. On the other side (to one's right), walking toward the Huddle, a doorway opens onto the central court, separated from the main lounge by a glass partition.

From the opposite (south) side of the court, the student can walk into still another lounge occupying space presently taken up by a small auditorium. Head architect Ken Knevel explained that the arrangement sets up a string of rooms with increasing degrees of privacy, from the heavily traveled information center to the secluded southern lounge. As an added touch, the information center will include a mezzanine level given over to an art gallery.

Space for a meeting left and a possible food co-op is also provided on this level, in the present lounge on the southern side of the building. Major renovations are planned for the Huddle too, now judged to be a terrible place.

A wall through the room (following the line of pillars) will partition the food service off from the cross-corridor. Entering near the centrally located door, the student will find the service area halved, if the efficiency hopefully doubled. To the left will be the food facilities, a semi self-service design formed a shaped in half the present space. The system is almost identical to an arrangement at Purdue University which can handle approximately 1000 customers an hour.

A lobby to right opens to chain of two rooms for eating, taking up the other half of the present Huddle and the one existing room.

In another innovation, the far (east) end of the building will open onto a terrace built over the pool hall facilities. Plans for the terrace, which is to be an added area for eating, are not yet final, but will probably call for a space half glassed-in and half open air, to allow year-round use. A similar terrace on a smaller scale is also proposed for the south side of the building, opening off of the present eating area. First floor design changes are under the direction of Roxanne Jahira of Architects Inc.

Changes on the second and third floor levels of LaFortune were plotted with an eye to simplifying the locations of and access to student services. Student union and student publications offices currently lie behind a system of doors and hidden stairways grouped over and around the "Finstra Lounge."

Knevel, who has responsibility for this part of the plans, detailed the proposed changes. Student service organizations will be concentrated on the second floor. A bridge will take students from the ballroom, now to be graced by a wall opening over the lounge below, across the central court directly to the student services office. Walking through space presently taken up by the Finstra Lounge, the student will enter a central reception lounge. Off to the right, in space now used by the Observer, will be the offices of the Student Union. Expanded Student Government offices, including cabinet offices, will be off to the left, as usual.

The crosswalk over the court will at the same time pass by the Black Cultural Arts room, moved to the southern side of the building to provide increased visibility. At present a student wishing to reach the third-floor room, say, the Huddle, must walk up one of two main flights of stairs to the second floor, turn through a doorway, find a second flight of stairs, which on the south side is hidden behind still another door, and proceed up to the third floor. This is to be changed.

Publications Floor

The two main staircases, north and south, will be extended to the third floor level, the two back stairs removed. In the office space on the third floor will be grouped all student publications, including the Observer, the Scholastic, and the Dome.
The renovation history

by Tom Drake
Senior Reporter

Renovating LaFortune has been a task elusive to efforts since its dedication twenty years ago. That is, it had been. The Committee for LaFortune, conceived last fall and spearheaded by a dedicated few, will hopefully commence restructuring this summer. Their ultimate goal, as stated in the renovation philosophy, is to make LaFortune, "the community center of the University, a meeting place for all members of the college: students, faculty, administrators, alumni, and guests." As the focal point of the University, the student center must provide for the services, conveniences, and social needs of the community in an atmosphere which is both open and alive. It must encourage and facilitate informal association among members of the University. The residence halls, because of their size and nature, cannot adequately provide for this function. Nor can other places of student congregation such as: the library, dining halls, and Alumni Club (Senior Bar). And because of the large number of off-campus students, the need for a place where these students can congregate has become increasingly important. The existing student center has not achieved this goal. It has become a place of study rather than activity, of futility rather than flexibility, of incompleteness, of inconstancy, of exclusion rather than inclusion—by few rather than many. We recommend that the present building be renovated for the following reasons:

a. Because of its location and tradition, the center, and all that it could be, offers excellent opportunities for development. It would be less expensive than constructing a new building.

b. Because such renovation is structurally feasible and would take less time to implement.

c. We offer these guidelines for the renovations of LaFortune Student Center:

1. Atmosphere - The center must be opened up both physically and symbolically to the Notre Dame community. Such an invitingly bright and colorful atmosphere is a necessity. This is most easily implemented through the appropriate use of present space and the carefully planned use of renovated areas. Both innovative design and proper color and lighting must be utilized effectively.

2. Control - The student center exists as an extension to the philosophy and principles of the university. Support of this important objective, it is recommended that the governance of the facility be the responsibility of a tripartite Student Center Board comprised of students, faculty, and administrators. Accepting their general responsibility, through the Vice President of Student Affairs, the Student Center Board will implement, interpret, and revise its operational philosophy.

3. Programs - The center should be more than a building. It must also be an ongoing program. The center, its facilities, and programs must be flexible enough to meet the changing needs and diverse interests of the university. Programs will be approved and regulated by the Control Board.

4. Services - Those offices that have student life as their primary concern should be housed in the facilities provided by the center. The specific allocation of office space is the responsibility of the Student Center Board.

5. Social needs - The Student Center must meet the social needs of the University, especially in light of the advent of coeducation. This can be accomplished by providing areas for:

- lounges
- small lounges
- informal meeting areas
- outdoor playgrounds
- billiard and ping pong areas

Through the successful implementation of these recommendations, the LaFortune Student Center can become the living embodiment of the philosophy we have just presented.

The LaFortune philosophy

The LaFortune Student Center must be the community center of the University, a meeting place for all the members of the college: students, faculty, administrators, alumni, and guests.

As the focal point of the University, the student center must provide for the services, conveniences, and social needs of the community in an atmosphere which is both open and alive. It must encourage and facilitate informal association among members of the University. The residence halls, because of their size and nature, cannot adequately provide for this function. Nor can other places of student congregation such as: the library, dining halls, and Alumni Club (Senior Bar). And because of the large number of off-campus students, the need for a place where these students can congregate has become increasingly important. The existing student center has not achieved this goal. It has become a place of

Promotion

Charge of Promotion

Each of the sub-committees was entrusted to thoroughly research and then detail specific proposals. Dr. Ackerman, according to Schipp, Caruso, and Knevel, has been instrumentally invaluable in the work of the committee and sub-committees. "Without a doubt, Bob Ackerman has been a main force and behind us from the beginning," said Schipp.

With the completion of the Philosophy for renovation in mid-February as well as the enrollment of student architects in the form of Architects, Inc., the Committee for LaFortune began experiencing progress.

Priority: A Philosophy

Primary in the minds of the committee members, who now include Steve Carter, Susan Darin, Mary Ann Gillispie, Rod Braye, Joe Gazzano, Denis Eileen, Roxanne Jabarra, Ron Blitch, Tom Rosanelli, Bob Stucker, Art Quinn, and Dante Orfei, was a written goal towards which to direct their work.

The solutions were in the Philosophy sub-committee in their "Proposal for the Renovation of LaFortune Student Center." Written not only to give the committee direction the philosophy also points out the background of the committee. Emphasized in the report is the need for a student center as the focus of the university life and to meet the lacking social needs. The five guidelines were prepared to be self-fulfilling by the students.

Architects, Inc.

In order to utilize talents within the University, specific proposals and plans, the committee appointed Knevel as its own request to establish Architects, Inc.

Organized on a business level, the student architects are responsible for planning the committee's wildest dreams into blueprints. Their office has been located on the third floor of LaFortune with a very open door policy.

Knevel's partners, Roxanne Jabarra and Ron Blitch, are sophomore architecture students and compose with Ken, Architects, Inc. Ron has been especially in illustration and design while Bob's efforts have been directed towards his design talent. Knevel has been invaluable with his experience and drive.

According to Knevel, "APresent chairman of the committee, Architects, Inc. should be an example for university priorities to follow to cultivate their emphasis on quality rather than quantity. "Building wise, the community has stopped growing. Now we should work on the quality of the community," said Knevel.

Educationally, the architects have profited as well, points out Knevel. Due to the support of Dr. Richardson, chairman of the architecture department, the three architects can apply their renovation efforts toward design credit.

"Without a doubt, should be greater opportunity to benefit the University's architecture in an education aspect," notes Knevel.

The architects have redesigned the center in accordance with their philosophy. Conceptualizations include floor plans, architectural design, structural bringing actual construction closer. Dr. Facenda, vice president of student affairs, has described the work of the architects as well as the committee as "fantastic."
The renovation outlook

by David Rust
Senior Reporter

University administrators voiced varying states of praise for the architectural sketch and plans for renovation of the LaFortune Student Center which they examined at their officers meeting earlier this month.

Of major significance is that the plans drawn up by a three-student architectural committee, have been passed on by the University for cost determination.

According to Ken Knevel, chairman of the group which drafted the sketches, and Vice President for Student Activities Robert Ackerman, the subject of renovation and discussion of the committee's particular renovation plans will be included on the agenda of the next meeting of the Board of Trustees sub-committee concerning student affairs. The committee meets May 2.

Ackerman explained the plans would then be passed on to the Board of Trustees. The Board will meet sometime later in May, although no final date has as yet been established.

Hesburgh

"The plan the students brought to us looked very, very good," said University President Father Theodore Hesburgh, referring to the regular University officers meeting at which Knevel's committee presented its work. At present the renovation proposals are being "costered," said Hesburgh, and then they 'll come back to us.

"I think most of the officers were in agreement with the plans in general."

Faccenda

Vice President for Student Affairs Philip Faccenda, whose office is the most critical of any of the University in the progress of the plans' course of adoption, was hesitant to discuss chances for the plan's acceptance.

"I think we're at the very earliest stage of renovation," said Faccenda. "We can't even begin discussing chances for adoption until these sketches have been gone over to greater extent."

Faccenda did think that the "Student architects presented a tremendous set of plans," but added it was "way too early to give the issue the public airing through the media that would come before plans were finalized and either accepted or rejected.

"We have to do quite a few things before that time comes," said Faccenda. "We have to figure out the basic rough cost, determine if the University can afford it, see if funds can be raised, decide whether these plans mention the student requests and acquaint the Student Affairs sub-committee of the Board of Trustees with these plans," he continued.

"We're not going to hammer down the walls right after Commencement," he predicted. "I can't imagine any actual work beginning anytime during this summer."

The administration had first looked for professional architects to draft renovation plans, said Faccenda, but had "decided that our own student architects, with their peers as mentors, had just as much expertise as any professional we could have hired.

"So these are the plans we have," he concluded. "If things go quickly, if everyone is in agreement, if we find no problem we can't solve right away, then the adoption will go quickly. If not, then it will take more time. I think it's just too early to say right now."

Ackerman

Student Activities Vice President Ackerman, who has been in close working contact with the renovation committee since it began operation last February in LaFortune's second floor central lounge, said the committee members had been "very encouraged" by what the University officers told them at the officers April meeting. "They found them very receptive," he reported.

"The next step is to take the matter to the Board of Trustees subcommittee on Student Affairs in May for their approval, and then later in May to the Board itself," he said. "Now whether or not they buy the whole thing, or even parts of it, is up in the air."

"You see, the committee members developed a professional idea of what a student union building should be, and then tried to take LaFortune and turn it into an embodiment of their philosophy," Ackerman explained. "Ackerman was one of those who developed the student center philosophy."

"It's a solid plan, well thought out," he said. "It's first in the whole history of this discussion of LaFortune renovation that anyone has developed plans anywhere near as solid as these. The committee went at it right."

Ackerman said: "Money is probably the big stumbling block.

"But the problem remains, he said, of "Where do we get the money?" Ackerman continued, "That's why we've got to get the Board to accept either all or parts of our philosophy."

The Philosophy Contended

The philosophy embraces two major ideas, among others, to conserve space ("The buildings too cramped up right now— one million square feet is moved into vast sections with no regard for space economy") and to get similar services into the same general areas.

Byoblander

According to Pete Bolblander, newly-appointed assistant Student Union director, the general consensus of the student commissioners is that "We'd rather stay where we are.

The student union offices are now located on the third or top floor of LaFortune.

Committee plans would move to the north side of the second floor, separated by a reception-lounge area from the student government offices. The whole complex would be located in the area where the student government offices, the Observer offices, and the Fiesto Lounge is now.

"For one thing, we have more room up here," said Bolblander. "And I personally can't see how putting a lounge where we are now will benefit the students. I can't see them moving up three flights of stairs to just sit around."

Bolblander was correct in that the plans would put a small lounge in the center of the third floor hall area, with the Dome and Scholastic offices on one side, and the Observer offices on the other.

Bolblander added that he disagreed with the committee's plans concerning renovation of the Rathskellar, Bolblander continued, "Personally, I rather see no renovation at all than have the committee's plans accepted."

Gorch

LaFortune manager Brother Francis Gorch, reminded that one of the reasons ND alum Joseph LaFortune donated the money in 1953 to turn the then Science Building into a student center, "to give off-campus students a place to relax, to eat their lunches, to have someone to go between classes."

Gorch, who has managed the student center for just over eight years, does not believe that the renovation plans as drawn up by the student committee emphasize this point enough.

"The students have come in and talked to me about it," he said. "They want to make the Rathskeller into some kind of restaurant. That would kill all the idea of giving off-campus students somewhere to go between classes."

Presently the Rathskeller, which is the large central area on the lowest level of LaFortune, is used as a lounge by the off-campus students. It is adjacent to the off-campus offices.

"I would like to see some redecorating, repainting and installation of new draperies," he explained, "to put some new color and beauty into place. (Otherwise) I'd rather see the money go towards building a whole new student center instead of renovating this one."

"After all, you spend two and a half million dollars on renovation and you still have a building constructed in the 1950's."

From surveying the reactions of space-conscious students from the current holding space in LaFortune, it appears that some complaints will be heard before the committee's plans are ultimately accepted or rejected.

Rod Brayre

"I absolutely don't think that would work," says Brayre, explaining that photographers need a place where they can work in solitude, removed from the pressures of demands flat and night editors.

"We have "not terribly enthused" about the plans for moving publications offices in the manner prescribed by the committee.

"I can't see a need for it," the Dome editor complained. "Originally they were going to put the Scholastic and Dome where they were on either end of the hall over on the Observer up in between. I don't know where we'd go after that." Brayre added.

"I don't think that would work." Brayre concluded.

Lutkus

Besides the fact that Observer Editor-in-Chief Jerry Lutkus agreed "The darkroom should stay where it is," all other organization spokesmen surveyed, including Lutkus, liked the renovation plans.

"We're really happy with the prospect of moving upstairs," said Lutkus. "We'll have more room, for one thing. They'll be blowing out all the non-structural walls and the committee is going to sit down with us to discuss how to construct new walls to best suit our purposes." Lutkus also liked the idea of moving the publications offices on one floor.

McNamara

Kerry McNamara, new Editor-in-Chief of the Scholastic, acquiesced. "I like the idea of putting all publications on one floor, and services on another, which will also give us a chance to clean up the place.

McNamara has seen the plans, he said, and "They look really excellent. As long as we have as much working space there as we have here, I'll be happy," he concluded.

Swanson-Mathew

Erik Swanson, student representative of the Student Insurance office, said he was satisfied with committee plans to move the office "suites the insurance policies, the Morrision Loan Fund and the Minority Counseling Center, to the area near the Student Center, the Morrissey Loan Fund and the Minority Counseling Center, to the area near the Student Center."

Nelson

Regina Nelson, a grad student associated with the Black Cultural Affairs Center, was satisfied with committee plans to move that office "suites the culture students."

"I believe just about everybody gains a couple more square feet." Ackerman's own office will remain where it is presently located. "This office should remain close to the student activities we're supposed to be working with," said Ackerman.

"And if the proposed LaFortune Student-Faculty Management Board should ever come to be," he concluded, "it would work out of one of these offices in our Student Activities office suite."

Conclusions

Ackerman answered some of the organization people's fears by saying that "I believe just about everybody gains a couple more square feet." Ackerman's own office will remain where it is presently located. "This office should remain close to the student activities we're supposed to be working with," said Ackerman.

"And if the proposed LaFortune Student-Faculty Management Board should ever come to be," he concluded, "it would work out of one of these offices in our Student Activities office suite."
Great epic journeys do not generally begin in South Bend Indiana, nor does the epic hero travel by car over the expressways of Ohio, across New England to pressways of Ohio, across Route 80 forever, and its "...vianions are the shore proud kingdoms but the sea lives must come to men and cities, and all the Eternity is in the landscape here; death must come when He wishes to brood alone."

The journey's end of an epic hero but last week, 37. Container of consecrated hosts really not much of a sense of triumph when at home, I may not Jason or Aeneas, but I was a little bit like Barry Fitzgerald.

Class elections on Tuesday at SMC
Carrie Bellock and Martha Santare are running for class president. Joanne Dubrovich is the candidate for vice-president. Kathryn Hutter and Beth Jones are the rest of the vice-presidential candidates. Those running for president of the class offices are Kay Thomas and Judy Mardosian, while Carrie Bellock and Martha Santare are running for class secretary.

In Vietnam the enemy was everywhere. Another aspect of the Vietnam war was that he said an effect was the "John Wayne thing," an unfeeling sense of maleness, that for too long has been a "symbol of the American ethos of virility." Overcoming this, learning to feel again, is a major problem for returning veterans. He called it a "psychic numbness," i.e., that many Vietnam veterans have an inability to love or to feel: "to cry would be considered something of a victory."

Lifton also commented upon the recently returned POW's. He called the "orchestration" that surrounded their return an attempt to relieve the feeling of guilt about the war on a national level, and bring about a return to the "mythology of pure American virtue."

A further topic that was discussed was the question of amnesty. He said that amnesty for everyone could affect a raising of the level of national consciousness.

The Vietnam War would have served some national, and indeed, some human purpose.

Much of Lifton's analysis was derived from his involvement with psychological services for veterans for the last three years, there he led "rap groups" for veterans.

His talk last night was largely based on his latest book, "From the War." He also written Death in Life: Survivors of Hiroshima and Boundaries: Psychological Man in Revolution The talk was sponsored by the Student Academic Commission.

Four years of change

by Patrice Conroy

Saint Mary's College has changed quite a bit in the past four years and, from the looks of things, will continue to do so.

Changes have occurred in several areas of the college community. The college itself became incorporated in 1972, with the coming of its new lay president, Dr. Edward Henry. Since the failure of the merger with Notre Dame in 1971, it is becoming more independent from Notre Dame. The college has programs associated with I.U.S.B. and has initiated the new Tucson program.

The college has changed not only structurally, but in its students. "The freshman class in '69 came to college at a point when the idea of going to college was at a peak. It was the thing to do," commented Sr. Raphaelita Whalen, director of admissions at St. Mary's. "The stress then was on a broad liberal arts education."

Academic Interest

As statistics concerning the academic interest of freshmen in 1969 and 1972 reflect, interests have changed. In the class of '72, 63 came in with English as their major intent, followed by 62 in Education and 44 in Mathematics. In the class of '76, 29 indicated Pre-med as their major intent, followed by 36 in Art, economics and business, 24 in Education and 22 in Mathematics.

The largest difference was in English, down from 63 in 1969 to 17 in 1972. Another significant difference is that in '69 no one declared any interest in pre-med as a major, but in '72, 29 did. Those intending to major in education dropped from 62 in '69 to 24 in '72. Only 22 were "undecided" four years ago, but last fall 182 were undecided.

There seems to be a trend towards more career oriented majors such as economics, business, science and law, away from history, philosophy, sociology and French. "Today's freshman is more career minded," noted Miss Janice Wheaton, guidance counselor at SMC, "but I feel much of it is due to the Women's Liberation movement, in that it has focused attention on women's needs. With the movement has come more opportunity for women in careers."

Although enrollment has gone down from 464 in '69 to 425 in '72, with 650 expected in fall of '73, there have been fewer cancellations.

Some things have remained the same though. In geographic distribution Illinois, Ohio, Michigan, Pennsylvania and Indiana contributed the largest number of students. There are still very few foreign exchange students.

Admissions

"With this year's freshman class I was prepared for a year of maladjustment and it was very surprising that they have adjusted as well considering the circumstances. It is much to their credit that they settled down so quickly," commented Raphaelita. "The circumstances that she is referring to concern the admissions procedure prior to the cancellation of merger plans. Girls applying for fall of '72 could only apply to SMC only, ND only, or both. All were matriculated by St. Mary's."

Mary's. The results were that 312 applied to ND only, 274 to SMC only, 784 to both and 43 no choice. Many rejected at ND or who indicated no preference, ended up at St. Mary's.

Quality of Admissions

Academic standards in relation

(continued on p. 10)
New trends appearing at SMC

(continued from p. 9)

to high school records, such as valedictorians, National Merit finalists, National Honor Society and National Merit semi-finalists have varied slightly. Those in the class of '73 outnumber those in the class of '76 in all categories, for example in 1969 there were 22 valedictorians admitted as opposed to 9 admitted in 1972. All other categories were closer in number but those in the National Honor Society numbered 185 in 1969 and 128 in 1972.

Can Saint Mary's make it alone?

Rank in class remained about the same averaging 36 per cent in the top tenth of their high school class, followed by 76 per cent in the top fourth, 86 per cent in the top third, and 2 per cent in the lower half.

Score intervals in the College entrance exams have also changed. In '69, 17 scored between 800 and 700 on verbal, 15 scored at that same interval in mathematics that year as opposed to only 5 scoring at that interval in '72. The incoming class in '69 scored significantly higher in each interval group than those coming in the fall of '72. This does not necessarily mean that admission standards have been lowered, since there seems to be a national trend to put more emphasis on the total record of the incoming freshman, instead of on SAT scores.

Coming to St. Mary's

When freshmen came in the fall of '69, the co-exchange program was a big selling point. To those coming in '72 it was not. Part of the reason for this is the fee that was attached to co-ex classes and an hour quota was added. While some have come to St. Mary's as a second choice to Notre Dame, many have come because they feel SMC itself has something to offer that ND does not. Among those things are: the Business Administration program, the Arts and Sciences and the Roome program. "Also in the current freshman class there is a feeling that you don't have to go to college so that those who do come tend to be more goal oriented and are quite mature," explained Raphaelita.

Wheelan echoed Raphaelita's statement by noting that freshmen and sophomores have been coming in for placement counseling whereas in other years they did not. Previously only upper classmen used the placement services. "Now also, there seems to be a tendency to look for subjects that will put them into the field of their choice rather than picking a course because they like it or are interested in it. Students seem to want more assistance in their planning sooner in their college career," said Wheelan.

Ms. Kathleen Mulaney, dean of students also noted some changes. She sees a trend of increased involvement on the part of the student within the college community and also in the South Bend area, citing the number of community volunteer programs students are working with. The students' role in the college community seems to have increased. They are represented on all the planning committees and task forces along with one representative on the Board of Regents. They (the students) have really come into their own, in the decision making process. Opportunities to influence programs is open to them and always will be unless they let the reins go," commented Mulaney.

Many seniors would disagree with Mulaney in regard to the extent that students are involved in activities. More of them note a growing apathy, pointing out recent elections as an example. In the recent election there was only one office where a candidate did not run uncontested.

They also noted that last year they had trouble getting people to be a big sisters for incoming freshman and transfer students, whereas when they came here as seniors they were all the planning co-committees and also in the South Bend area, the number of community volunteer programs students are working with.

Stan Urankar

Trivia: face-offs and free throws

For a true sports fan, four years at Notre Dame rates as a season to some of the best athletics found anywhere. It's a special season. He can walk into anyone's room on campus and talk sports.

Being connected with the vast Golden Dome athletic machine has brought a lot of food memories for Urankar, and the facsimiles of columns:

For a center block, a rocker or normal, has a favorite trivia question that can spice up any conversation, especially calling to mind many memorable events which ND recalls a lot of questions and answers.

Picking his favorite which comes from the Notre Dame: basketball, baseball and hockey of 1970-71. Some will get a kick out of some of the memories of the offensive trio and ND's biggest players. Test your Notre Dame memory with these:

Basketball

1. First game this season saw the Irish defeat Temple. Who scored five points, and whose record did he break?

2. Last time ND played Temple, who was the high scorer, and what was his record?

3. The victory over UCLA sophomore year is unforgettable. The Bruins started that awesome front line with the Ron Vitale-Schulz-Anderson trio. Name this year's edition.

4. Austin Carr drove the Irish fans wild with his outside shot and moved to the bucket, and he participated in the team's second line. Name him.

5. Who was Carr's replacement if he was injured? Who was named the offensive co-captain for the 1973-74 campaign, has accomplished this

6. Gridiron's questions and answers came to Notre Dame and a 6-20 record. Can you name him?

7. Last season, to Gridiron's this season, to Gridiron's questions and answers came to Notre Dame and a 6-20 record. Can you name him?

8. The famous "fifth foul" game came in the next, the NCAA encounter at Ohio State. Kentucky's All-America forward, who had five personal foul midway through the second half, finished the game. Name that player who keyed the Wildcat triumph.

9. Another memorable Notre Dame loss was in the final game of this season, when what happened?

10. In Carr's last home game, the Irish dumped Western Michigan, but surprisingly, it wasn't Austin who took scoring honors for that contest, but another Irish senior, much-maligned in his career. Name him.

11. The NCAAA tournament appearance after Carr's senior season sent Johnny Dee's squad to the Midwest Regional. The Irish had a couple of cackling tumbler, (the second time in the season's game). Who were those three teams that Notre Dame could have played in the West Regional?

12. How about the double overtime victory over Marquette freshmen? The game was locked, deuced by two without the ball, four seconds to go in the first overtime period and the Irish got the ball, but had it slapped away by an off-keyed Irish senior guard. Who got into the lane where a junior led another junior, and which three freshmen did they proceed to?

13. Throughout last year's 60-20 nightmare, Photos often shifted his starting lineup. Can you name the team five who began the year as starters.

14. To date, Notre Dame has made it to the District IV tournament once in four years. What year it was, and who were the other two teams in the tournament (Big Ten champ, 7-3-1, and who?)

15. Austin Carr was named the offensive co-captain for the 1973-74 campaign, has accomplished this season. Now, what was the record?

16. Name the offensive co-captain for the 1973-74 campaign, has accomplished this season. Now, what was the record?

17. This junior third baseman made the Ivy League at 5-0-0. Who was he and what was his record?

18. Junior Pete Schmitt has played in all but three games throughout three seasons of varsity baseball to date, but each year he played at a different position. This year, the Plainsfield, N.J. native is at second base; where did he play in '71 and '72?

19. After setting an ND record with his 1974 hit total in his junior year, this shortstop set another mark in his senior year with 17 errors. Name him.

20. Junior Pete Schmitt recently broke the school record for career shutouts when his 14th was hit. What was the record?

21. Who was Notre Dame's all-time leading goal scorer before this season?

22. A redshoed freshman forward, he set the school record for penalty minutes in his first season, though he departed the ND offensive game this year.

23. Name him.

24. What was his name?

25. Name the offensive co-captain for the 1973-74 campaign, has accomplished this season. Now, what was the record?

26. The famous "fifth foul" game came in the next, the NCAA encounter at Ohio State. Kentucky's All-America forward, who had five personal foul midway through the second half, finished the game. Name that player who keyed the Wildcat triumph.

27. Another memorable Notre Dame loss was in the final game of this season, when what happened?

28. The famous "fifth foul" game came in the next, the NCAA encounter at Ohio State. Kentucky's All-America forward, who had five personal foul midway through the second half, finished the game. Name that player who keyed the Wildcat triumph.

29. Name the offensive co-captain for the 1973-74 campaign, has accomplished this season. Now, what was the record?

30. The famous "fifth foul" game came in the next, the NCAA encounter at Ohio State. Kentucky's All-America forward, who had five personal foul midway through the second half, finished the game. Name that player who keyed the Wildcat triumph.


