complying with demand
Hearst confident of daughter's safety

by Richard A. Litfin
SAN FRANCISCO (UPI) - Randolph A. Hearst said today he is convinced that his kidnapped daughter, Patricia, is "well and fine" and that he will hear from her Symbionese Liberation Army captors after he puts another $4 million in escrow to meet SLA demands.

He added that if he does not hear from the SLA after completing the escrow arrangement in two or three days he will be "very fearful."

Appearing outside his suburban Hillsborough home, Hearst answered reporters' questions about the trusteeship arrangement being set up to handle the additional $4 million offered for release of his daughter who was kidnapped Feb. 4.

The money was put up by the Hearst Corporation to supplement $2 million previously provided by Hearst for the people in need food program demanded by the SLA. The corporation funds were made contingent on the release of Patricia, with $2 million to be paid when she is freed and $2 million more on Jan. 1, 1973.

Hearst was asked about a statement of A. Ludlow Kramer, director of the People in Need program, who said Tuesday on completion of the food giveaway that it had been surrounded by "total violence."

"I think Mr. Kramer's life very well may have been threatened," he said. "I presume he got threats in the mail."

He added that he wanted to thank Kramer and others who conducted the food program and also the "people themselves who had to wait hours until it got efficiently operating."

"These people (who received the food) were very patient and very peaceful."

Hearst said he wanted to concentrate on the good things that happened during the five food distributions in the San Francisco area "and not sit around and talk about the ripoffs and some of the bad things."

"I think under the circumstances I was satisfied with it," he said.

Hearst said the additional money from the Hearst Corp. would be set up in an escrow arrangement with a bank and that three trustees would be named, who would be acceptable to any liberal group in the country.

Food service compared

by George Velech
Staff Reporter

Following up with Wednesday's food service student opinion survey and the recent food saving initiatives, the Observer interviewed directors from nine Midwestern colleges and universities.

Rising food costs have forced many of the schools to curtail special dinners, and seconds, as well as limiting the quality of food produced.

Most of the directors were reluctant to reveal budgets, but were more than eager to elaborate on innovations and exclusive treats.

Thus our appraisals:

Purdue
The students who eat in the residence halls are granted seconds for everything by the main entree, and an occasional special dessert. Miss Ellen Townsend, director, says the service operates in eight-week cycles, with rare variation.

In an experimental aspect tried in one dorm, a group of up to 40 students may request a distinctive dinner. A section of the dining area is cordoned off, and they are served the specific dinner of their choice.

Townsend calls the system very workable, adding, "Student's give a great response when they have something to do with the food they eat." She plans to expand the request program next fall.

Loyola, Chicago
Loyola's 2700 dinners eat steak once a week, and at least three different entrées at every other meal. Seconds for all but steak. A student advisory committee meets every week to help plan meals and suggest specials. Assistant Director Miles Jacobsen adds, "We've save a large part of the budget for International Week, held in April with 6 nights of foreign cuisines. And once a week, surprise deserts and mails."

Indiana
No seconds are served on breakfast or dinner meat, but Miss Jane Billye says the students are more than satisfied with the unlimited vegetable, desserts and beverages available. Steak nights are rare, but specials center around the holidays and infrequent foreign dinners.

Menu meetings are held every week and no cycles are utilized. She claims the students' requests usually meet with great success, owing to the very flexible menu plan. Despite this success few of the ten thousand dinners attend the weekly meetings. Billye explains, "We've tried to have more student opinions at our meetings, but I guess with a school so much larger the Notre Dame, enthusiasm is hard to find."

Illinois
This service works on a six-week cycle, and again, food prices have affected meal planning. Coordinator Dohrmann says simply, "There used to be steak nights. Though the food's no different, we try to change the atmosphere, and decorate for picnics and carnivals."

Sausages are only for beverages. Despite the nearly 30,000 Fighting Illini that attend, only 9,000 use the service, and perhaps we can understand why.

Ohio State
Buckeyes eat 20 meals a week, in separate dining halls, called commons. Steaks are scarce. A student board plans the eight yearly specials, when 5000 diners feast on international cuisines, and "wonderful holiday delights."

Again, only a minor percentage of all students use the service.

St. Joseph's College at Rensselaer
In order to meet ever-rising food prices, meal service director Max Morphew has cancelled higher-cost foods, and turned to cheaper meals. Citing the 69 cent per student per meal budget, the service now offers three or four different dishes nightly. A weekly monotomy break is usually a "make-your-own-sundae."

And once a month, the three week regular cycle is broken with a complete "Adventure in Dining." For 900 St. Joe's students, April means Greek.

Dayton
No seconds, but unlimited beverages and salad offered. The service runs a five-week program, and the 1500 students enjoy a monthly holiday special.

Thomas Madigan cleverly planned a German Oktoberfest, and an Irish March. And somehow, April at Dayton is Polynesian.

Marquette and Northwesterns
Both are catered by SAGA, the same folks that feed St. Mary's. The students enjoy weekly pace changes, and monthly holiday dinner treats. But steak nights, which come about once a month, are less common than at St. Mary's.
CARACAS (UPI) — Heavy weight boxing champion George Foreman was barred from leaving Venezuela Thursday until he pays $105,000 in taxes from his earnings, officials said. Foreman would have to pay $100,000 in taxes from his 1973 earnings and $5,000 in personal income taxes before he can leave the country. He was barred from leaving Thursday until he pays $105,000 in unpaid taxes from his 1973 earnings, officials said.

WASHINGTON (UPI) —  The wife and family of Alexander I. Solzhenitsyn, who refuses to move to the United States, have been barred from leaving USSR.

Mrs. Natalya Solzhenitsyn, her mother and four children will fly to Moscow on a private jet.

**In PIRG petitions tabulated**

by Drew Wallach

In PIRG, Indiana Public Interest Research Group, has completed its first petition drive, accumulating 4,067 student signatures.

The proposal will permit In PIRG, a student controlled organization whose purpose is to articulate and pursue the concerns of students and the community at large on issues of general public interest, to be financed by a special fee of $5.00 per student per year. A clause also stipulated that any student who doesn't wish to participate should be entitled to a full refund "by a convenient mechanism."

The In PIRG proposal is now under consideration by the University's administration. Hughes, chief organizer of In PIRG on campus, reported that the administration is now trying to decide upon a method for refunding the fees to students who do not support In PIRG.

Two methods being considered, he said, are a semi-compulsory fee, by which student would be given an opportunity after tuition was paid to pick up a refund, or a "negative check-off" system, in which the student would be able to indicate that he did not support In PIRG and withhold his money.

Hughes urged students to support In PIRG. "While most projects In PIRG will undertake will be indirectly affecting students, one good example of a hard-hitting issue in which In PIRG was involved was the proposed telephone increase," he said.

In PIRG Action, the group's official new paper, stated that they had saved Indiana telephone users $8.3 million in possible rate increases, as well as approximately $16 million saved during the months of hearings when the phone company was forced to delay the rate.

Hughes commented that In PIRG is also launching a grocery store survey which will directly benefit students. He explained that 20 stores in the area will be checked accompanying the prices of 5 basic foods over a 3 to 4 week period. "Results of this comparison," he said, "will be released after Easter."

Other projects currently slated include: On-campus recycling, a drugstore pricing survey, a campaign against "bait and switch" tactics of car and appliance dealers; and a look into the operations of Standard Oil of Indiana.

**Mime premieres at Meet your Major weekend**

The premiere performance of "Peter and the Wolf," a mime directed by senior Christopher Corso, will highlight Meet Your Major afternoon social sponsored by the Notre Dame—Saint Mary's Cooperative Department of Speech and Drama at 2 p.m. Sunday, March 31 in the Little Theatre of O'Leary Auditorium.

Faculty members and students majoring in the department will conduct tours of broadcasting facilities to explain new television and videotaping equipment, rehearsal areas and costumes and properties.

The department is in the process of making new concentrations available in the Speech and Drama program. These include a general concentration in speech and drama, speech, communication, theater arts, film and broadcasting, and speech education. Dance instruction will be incorporated into the program next year.

The program is open to all students planning to major in the department or who have a casual interest in speech and drama.

**Petitions filed for next week's class elections**

by Susan Nash

Seven tickets filed petitions with the Student Government Office today for candidacy in the senior and junior class officer elections to be held Wednesday, April 3.

The senior race drew five entrants, but the junior election have only two. Each ticket is comprised of a president, vice president, treasurer and secretary candidate. The following have declared their candidacy:

1. Tom Witters (sophomore, speech)
2. Mike Morris (sophomore, speech)
3. John Kopp (sophomore, speech)
4. John Buege (sophomore, speech)
5. Brian Butler (sophomore, speech)
6. Pat Doherty (sophomore, speech)
7. Mike Alpert (sophomore, speech)

**A rescheduling**

Dennis Banks, the Indian from Wounded Knee who was scheduled to speak last night in the Engineering auditorium, was not able to appear because his plane was delayed by the weather.

The Academic Commission has rescheduled Banks' talk for today at 7:30 p.m. in the Engineering auditorium.
Apartments purchased for married students

by Mike Rizzo, Staff Reporter

The University has purchased a set of three apartment complexes to ease the present shortage of housing for married Notre Dame students, stated Fr. James Shilts, director of off-campus housing.

In 1969, the 24 apartments, known as the Inland Terrace apartments, will officially become the University Village-Roseland apartments on April 1. In the past there has been as many as fifty people on the University's married students waiting list.

Fr. Shilts, however, indicated that the purchase is not a change in the University stance toward acquiring additional off-campus housing.

The difficulties faced by married students searching for adequate housing seemed to warrant the investment in the new buildings, observed Brother Kieran Ryan, assistant vice president of business affairs. In addition the University was offered an attractive price for the deal.

The new buildings are located one block from the present University Village at 207-217 Cripe Street behind the Randall's Inn. Apartments will be available to students beginning August 1. As the leases of the present tenants expire, they will not be renewed so that rooms will be open to students for the fall.

The apartments, which are carpeted and air conditioned, include one bedroom, a living room and a kitchen. Any full-time, married student is eligible for occupancy. Priority however, will be given to graduate and law students. No faculty or staff members will be allowed in the new lodging.

The new apartments have only one bedroom and are intended for married students without children. The present 108 University Village apartments which have two bedrooms each give priority to students with children.

Under the University's direction the apartments will be offered to Notre Dame students at substantially lower rates than those paid by present tenants to Portage Realty which built and owned the buildings. Applications for the rooms will soon be available from John T. Lynch the manager of University apartments or form the off-campus housing office.

Cook: Stans admits to perjury

By FREDERICK M. WINSHIP

Robert Scholes, author and professor of English at Brown University, will present the Ward-Phillips Lectures during the week of April 1, at 4:15 p.m. in the Library Auditorium.

Sponsored by the English Department, this year's series is entitled "The Future of Fiction and Fiction of the Future." The topics will be "The Future of Fictional Criticism" Monday, "A Genre Whose Time Has Come" Tuesday, "Structural Fabrication" Wednesday, and on Thursday, "The Good Witch of the West." The series will close Friday with a discussion of Scholes' work.

Scholes' area of interest is the modern novel and his latest work is Structuralism in Literature. His subject, fiction's future. Scholes points out, science is no longer on emphasis, in this developing form of science fiction, is no longer on important for psychological symbolism, he suggests.

In Callahan's words this new fiction is "a new wave attempting to deal through a symbolic story with the deep needs, emotions, dreams and even weaknesses of man himself." Some works fitting into this category are Sturgeon's Venus Plus X, Left Hand of Darkness by Ursula LeGuin, and The Waning Seed by Anthony Burgess. But these are only a few.

Beginning this Monday, Scholes will share his own insights into what fiction is and is likely to become.

Ward-Phillips lectures to feature future fiction

by Mary Pat Sullivan, Staff Reporter

Complaint may have been one of the last efforts at realism.

The fiction that is developing today is speculative and future-oriented, some of which can be seen as science fiction with a new angle, according to Callahan. The emphasis, in this developing form of science fiction, is no longer on scientific accuracy (in fact, Callahan points out, science is often seen as dangerous and dehumanizing), but Callahan points are dealing with questions concerning man's place in the universe. The fantastic setting is, in some stories, merely a background used to infuse an element of haunted wonder, and in others important for psychological symbolism, he suggests.

In Callahan's words this new fiction is "a new wave attempting to deal through a symbolic story with the deep needs, emotions, dreams and even weaknesses of man himself." Some works fitting into this category are Sturgeon's Venus Plus X, Left Hand of Darkness by Ursula LeGuin, and The Waning Seed by Anthony Burgess. But these are only a few.

Beginning this Monday, Scholes will share his own insights into what fiction is and is likely to become.

Of impeachment committee

Senator Griffin urges quicker inquiry

By JANE DENISON
WASHINGTON (UPI) - Assistant U.S. Attorney General Robert P. Griffin, conceding the prospect of President Nixon's impeachment is "much greater today" than a month or two ago, Thursday urged the House Judiciary Committee to speed its inquiry in the interest of fairness.

"It seems to me that it is in the national interest and in the interest of fairness to get to the truth, to get to the facts as quickly as possible," Griffin said in a floor speech.

He called on the committee, which is investigating whether grounds exist to impeach Nixon, to permit the President's lawyers to be present at its meetings and to cross-examine witnesses. The committee has reached no decision on a White House request to let Nixon's lawyers participate in the inquiry.

Later, to reporters, the Michigan Republican said that by permitting White House Watergate lawyer James D. St. Clair to cross-examine witnesses at Judiciary Committee meetings, it might "significantly shorten the process by making it unnecessary to have a trial in the Senate."

If the House votes to impeach a public official--the equivalent of an indictment--the Senate must conduct a trial on the charges.

"Then you obviously feel we are headed for a trial in the Senate?" Griffin was asked.

"Well, I would have to concede the likelihood seems much greater today than it did a month or two ago," he replied, declining to give his reasons.

Griffin said he had not talked with anyone at the White House about his speech, but had mentioned it to the ranking Republican on the House Judiciary Committee, Rep. Edward Hutchinson of Michigan, at the regular weekly breakfast of the Michigan congressional delegation this morning.

Griffin told the Senate that cross-examination is the traditional means of "getting the facts out on the table" and the right should be afforded the President's lawyers at this stage of the impeachment inquiry.

"Isn't it in the interest of everyone to find out as early as possible whether a trial in the Senate is constitutionally necessary?" Griffin asked.

He said he "hoped it would not be necessary?" later for the Senate to have to decide whether the procedures followed.

I heard that there is to be a very good seminar on Creative Writing at Indiana University at South Bend very soon. Can you tell me what it is and when it starts?

The Creative Writing Seminar will be held tomorrow at IUSB, with coffee and registration beginning at 8:00 a.m. It will be in room 108 of the North Side West Building. Among the lecturers are: "Workshop on Form, " "Film & Workshop on the Image, " "Story," "False Confession," and "Science Fiction & Creative Art?"

The seminar will be free and bus transportation is available through the regular South Bend Bus Service. To get there, take the 6:57 a.m. Bendix bus from the Circle Uptown, or the 7:15 a.m. emergency bus, take the North Side bus to Mishawaka Avenue.

When is The Goldfather playing?

The only dates which "they" permitted it to be shown is on April 1 & 2. It has two showings each day at 6:30 and 10:00 p.m. and costs one dollar, in Washington Hall.

When and where will the Anthropology Department have its "Meet Your Major" meeting?

The session will meet in the Senior Bar at 8:30 p.m. on April 2.

Police raid at Nickies held one year ago today

By Art Ferranti
Observer Staff Writer

It was one year ago today that the South Bend Police stage their infamous raid on Nickies. Twenty-six Notre Dame and St. Mary's students spent the night of March 28, 1973 in the confines of the South Bend police department jail cells.

Twenty-four students were charged with being "minor in a tavern", a misdemeanor; and two with disorderly conduct. All were released the following morning on $50 bail each. The "minors" subsequently paid a fine of approx $100 each. The disorderly students was also fined, and the other was acquitted.

Nickies was closed at the police entered. The police checked identification of all as the students left, arresting sixteen males from Notre Dame and ten females from St. Mary's. Various antics from the crowd that Thursday night, ranging from the Victory March to unlocking the door to the paddy wagon, greeted each arrested student as he or she left the bar.

Approximately forty students attempted to bail out their comrades that night at the police station but were asked to leave.

The males were released at 11:00 because the female cells were overcrowded.

Nickies was open the next night but considerably less crowded.

The Alcoholic and Beverage Commission had nothing to do with the raid, the police having decided to initiate the action due to complaints from nearby residents of outside drinking and bottle throwing. The timing of the "ND SMC 26" took place in court weeks later.

Nickies and St. Mary's themselves did not place further discipline on the students.

The American Character Series presents Tom Noel in March at Home

Sponsored by Rep. Peter N. Kyros, D-Maine, and four others, the bill requires that "all commercial domestic airline flights, smoking no longer be permitted in any form."

Kyros, who occasionally smokes a pipe, said he introduced the legislation because of recent reports indicating cigarette smoke may be as dangerous to nonsmokers as to smokers.

"In essence, when a person lights up a cigarette on an airplane—an environment over which the other passengers have no control—it is everybody's business," Kyros said.

Greats attend services offered for Revson

By MARY MCGUIRE

NEW YORK (UPI) — Peter Revson, the millionaire's son who became one of the greatest racing drivers in the world, was eulogized Thursday as "a man of skill and courage" at a Muscular Dystrophy drive service attended by some of the great names in racing and a grieving Marjorie Walace, the man's mother.

"Peter's greatest virtue was perseverance. And what he honored most was his great talent," former driver Roger Penske told mourners at All Souls Unitarian Church in Manhattan.

He was a man of skill, courage and accomplishment. It's truly his own man," Miss Wallace, 29, of Indianapolis, the first American to win the Miss World contest, was composed and dry-eyed in a green dress, sitting in the front row during the services.

Nearby sat Revson's bereft parents, who had seen the sport of professional road racing take the lives of both their sons.

Revson was wearing a gold locket from Miss Wallace with the cryptic words "If Not for Me—Mary" when his car smashed into a steel guard rail at a race outside Johannesburg, South Africa, last Friday.

Penske, Cleveland executive Roger Lyle and racing journal- istic Leo Mandel gave public praise to the 35-year-old Revson, whose body lay in a closed casket heaped with greenery and banked with white flowers.

"His life was a tribute in itself," Lyle said. "One of the newspaper's chief commentaries, a 'playboy racer'. A racer he was but a playboy he wasn't. He was a true athlete.

Lyle recalled that after Revson's brother Doug was killed in 1967 preparing for a race in Denmark, "Peter went out to race again and won.

"The greatest tribute we can give to Peter is to go out from this service and pursue our own goals.

Mandel, publisher of Auto World Magazine, said Revson had become a "figure of influence" to Mandel's own sons.

"Peter was a model for everyone," he said. "Peter always said that to persevere in the greatest thing a man can do.

Revson's father and stepmother, Mr. and Mrs. Martin Revson, his mother, Mrs. Julie Revson, and his sisters Julie Ann and Jennifer, were seated in the front of the church.

Revson's mother wiped her eyes during the eulogies. Both sisters wept quietly. The older

Charity auction to be held

by Mary Janca

Tickets to the Beach Boys and Rare Earth concerts are among the items to be auctioned by the Muscular Dystrophy campaign.

Local businessmen are donating some of the greatest names in racing and a grieving Marjorie Walace, the man's mother.

Revson was wearing a gold locket from Miss Wallace with the cryptic words "If Not for Me—Mary" when his car smashed into a steel guard rail at a race outside Johannesburg, South Africa, last Friday.

Penske, Cleveland executive Roger Lyle and racing journalistic Leo Mandel gave public praise to the 35-year-old Revson, whose body lay in a closed casket heaped with greenery and banked with white flowers.

"His life was a tribute in itself," Lyle said. "One of the newspaper's chief commentaries, a 'playboy racer'. A racer he was but a playboy he wasn't. He was a true athlete.

Ford warns U.S. of internat'l pressure

WASHINGTON (UPI) — Vice President Gerald R. Ford warned Thursday that unless the United States develops sufficient power reserves at home, it risks continued "economic and political pressure" from suppliers abroad.

He also chose the voices of doom and gloom, which predict dire effects from the Arab oil embargo and who have been sharply critical of the Nixon administration's handling of the energy crisis.

"We did not panic," Ford said. "We did not freeze. We are not in a depression. The lights are on. Gasoline is available in reasonable quantities.

"We made a policy decision last fall. We decided to preserve jobs and essential services. America chose between unemployment lines and gasoline lines. We made the right choice. We got through the winter with a minimum of suffering."

Ford told the 38th annual meeting of the student-manufacturers association.

Brand new items for the auction, such as radios, stereos, skis, furniture, golf balls, duffel bags, and gift certificates, according to Kathy Hessert, student coordinator of the Muscular Dystrophy campaign.

Other items up for auction include crafts, art and needlework, an antique sewing machine and two full-gallon gasoline cans.

"Our options are obvious. We need the dorms and the tennis and fencing teams," she said.

This allocation, Hessert explained, will give each organization some initial funding with which to begin its own muscular dystrophy drive.

At the end of the campaign, a $100 scholarship will be awarded to the organization that has raised the most money, she continued.

Between $1000 and $1500 is expected to be raised at the auction, she added.

Auctioneers will include Dr. Mark A. Bambanek, St. Mary's M.D., and Dr. Walter King, vice president of All Souls presiding at the services.

Revson was buried Thursday afternoon in the family mausoleum at Hartdale, N.Y., next to the body of his brother.

Pallbearers were drivers Skip Scott, Matt Fortelli and Pen- kie, and Mandel, Lyle and Connecticut racing promoter Jan Heyen.

Republicans gather together to worry about Watergate effects

By ROBERT KIECHHEFER

CHICAGO (UPI)—The leaders of the Republican Party's leading presidential hopefuls were expected in town for a weekend of Midwest GOP "leadership conference" and to worry together about Watergate.

In between their efforts to promote their own candidacies, the White House hopefuls planned to spend time figuring out how any of them can overcome the handicap of Watergate and lead their party to victory two years from now.

Vice President Gerald R. Ford, California Gov. Ronald Reagan and former New York Gov. Nelson Rockefeller all are scheduled to speak at conference meetings Saturday and Sunday.

Former Texas Gov. John Connally is also expected. Illinois' own Sen. Charles Percy, who has an eye on the presidency himself, was to open the meeting with a cocktail party for the birds before the expected 1,000 conferences from 13 Midwest states. The states are Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, West Virginia and Wisconsin.

Percy has been assessing his presidential chances publicly for several months and is expected to make the most of this weekend's forum.

Percy reportedly plans to tell delegates in his welcoming speech that GOP faces a "crisis of leadership...the President and the leader of our party is in danger of being forced from office."

He said he will tell delegates that the party could absorb a "potential disaster" in the 1974 and 1976 elections unless good candidates—without the taint of Watergate—are recruited at local and state levels.

The chance for a direct comparison among several contenders for the GOP nomination, however, was expected to overshadow any discussion of party presidential strategy.

Forrester Lecture set for April 3

Dr. Jay W. Forrester, a renowned authority in industrial dynamics and a pioneer in the development of high speed digital computers, will discuss "Engineering During the Transition to Economic Equilibrium" at 8:45 p.m. Wednesday, April 3, in the Center for Continuing Education Auditorium.

The free, public lecture is the fourth in the College of Engineering's Centennial Lecture Series which commemorates 100 years of engineering education at Notre Dame.

Forrester, who is the Ger­meshausen Professor at the Massachusetts Institute of Technology, holds the basic patent on the standard "memory" device for digital computers. His current interests are in applying industrial dynamics principles to urban and world problems. Industrial dynamics is an experimental and quantitative basis for designing structures and policies that enhance an organization's growth and stability.

In his book "Urban Dynamics," Forrester presented a theory of urban interactions and analyzed policies and proposals in urban policies. Most recently, in "World Dynamics," the MIT professor has applied the technique to examining the world problems.

After graduating with distinction from the University of Nebraska in 1939, Forrester came to M.I.T. as a research assistant in electrical engineering. He received a master's degree in electrical engineering from M.I.T. in 1945.

Forrester directed M.I.T.'s Digital Computer Laboratory from 1946 to 1951 and was responsible for the design and construction of Whirlwind I, one of the first high-speed digital computers. As director of the school's Lincoln Laboratory from 1952 to 1966, he guided the planning and technical design of the U.S. Air Force SAGE (Semi-Automatic Ground En­vironment) system for continental air defense.

Forrester received an honorary doctorate from the University of Nebraska in 1964 and was named professor of management at M.I.T. in 1966. He was appointed Ger­meshausen Professor in 1972.

Forrester is a member of the National Academy of Engineering and a fellow of the American Academy of Arts and Sciences. He has received many awards in­cluding the Institute of Electrical and Electronics Engineers' Medal of Honor and the Danish Academy of Technical Sciences' Vaidman Poulsen Gold Medal.

$9.95 Double occupancy

Yes, you've heard about it, but who would have expected the COSMOS to be so far removed from the reality of your daily existence. It's a sad fact, but the truth is that the COSMOS, in its infinite majesty, is capable of reducing you to a stupor of nothingness, until you are capable of rising up and dealing with the matters of the physical reality upon which you have based your existence.

Blaspheme the COSMOS in any manner and the physical reality upon which you depend for your survival will be cast aside. There is no reality superior to that of the COSMOS, and to question its existence is to question your own.

One just needs to recall how often Lew Alcindor was treated as a travelling freak show. As for his derisive comments regarding Woodens' ability as a coach, and the esteem in which he is held, one need only look at the NCAA Championships that have been awarded to UCLA in recent years.

What has been necessary for the COSMOS is that, as the COSMOS is considered sacred, it is capable of perceiving astro-sensitivities, w hich are the essence of reality. Once the COSMOS has been perceived, it becomes capable of perceiving astro-sensitivities, which are the essence of the cosmos.

Becoming a reality for the COSMOS is the saying of the day. It is the saying of the intergalactic Handlebar Moustache Cultivators, and it is the saying of the COSMOS.

In Defense of the Wizard

Dear Editor:

As an alumnus of UCLA, I would like to congratulate North Carolina State on its hard-earned and well-deserved NCAA Championship (I would only prefer that it had been Notre Dame). However, I do take exception to some statements made by Dr. Michael Quill (observer, March 27) regarding the Bruins and Coach John Wooden.

I don't know how many times Dr. Quill has been to Pauley Pavilion (probably never), but I cannot recall any instance where the opposing players were booed as they were introduced. To the contrary, the opposing player has always been well received by the crowd when leaving the floor in the waning minutes of a game.

I would wish that Dr. Quill would document his attacks against the players as individuals. I would like to know how well he is acquainted with Bill Walton to accuse him of "supreme arrogance" and "immaturity." The fact is that Coach Wooden has long had a policy of shielding his players from the demands of the press, especially one of the stature of Walton who would be constantly besieged. The players are, after all, students first and not public celebrities.
Dear Editor,

I was in Chicago on Saturday March 16 for the St. Patrick's Day Parade. Since I have been a Notre Dame fan for 20 years I was pleased to see a float bearing the cheerleading squad from ND. Unfortunately all I saw was girls! At least in years past we saw a coed institution for years until it recently went coed. Male cheerleaders were a tradition but it was only fair to allow girls to become cheerleaders since they began admitting them to the school. But why is Notre Dame ignoring the men at their school? One example of this is the absence of male cheerleaders participating in the cheering at football and basketball games.

The women are on center court or the 50 yard line doing their pom pom routines while the men are allowed to conduct a few cheers on the sidelines.

The final straw was the Notre Dame-cheerleading squad on the St. Patrick's Day Parade float represented by only half a squad.

I am proud to see that Notre Dame is in tune with Women's Liberation but Male Liberation should not be ignored. A coed Liberation but Male Liberation should not be ignored. A coed cheerleading squad but I really think that Notre Dame is in tune with Women's Liberation and Male Liberation is needed.

Sincerely,
Kathleen Schlager

Coedcheercation

Dear Editor,

I was in Chicago on Saturday March 16 for the St. Patrick's Day Parade. Since I have been a Notre Dame fan for 20 years I was pleased to see a float bearing the cheerleading squad from ND. Unfortunately all I saw was girls! At least in years past we saw a coed institution for years until it recently went coed. Male cheerleaders were a tradition but it was only fair to allow girls to become cheerleaders since they began admitting them to the school. But why is Notre Dame ignoring the men at their school? One example of this is the absence of male cheerleaders participating in the cheering at football and basketball games.

The women are on center court or the 50 yard line doing their pom pom routines while the men are allowed to conduct a few cheers on the sidelines.

The final straw was the Notre Dame-cheerleading squad on the St. Patrick's Day Parade float represented by only half a squad.

I am proud to see that Notre Dame is in tune with Women's Liberation but Male Liberation should not be ignored. A coed Liberation but Male Liberation should not be ignored. A coed cheerleading squad but I really think that Notre Dame is in tune with Women's Liberation and Male Liberation is needed.

Sincerely,
Kathleen Schlager

The Arkie Blues

Dear Editor,

Now that Spring has finally arrived at du Lac it is time for all those near to speak out. During the Mardi Gras band issues a young last praised that Notre Dame men were a sign of a something's imagination, they were never seen outside of the library. (They failed to mention which one.) But I have an announcement for all those poor, lonely Radinites and Walshites.

Girls of Notre Dame and St. Mary's! Your ship has come in. The Architecture building will be occupied with so many male afterpromers and fifth-year students from now until Easter break that any attempt to count them would be fool-hardy. So how about it girls! How about giving yourself and your fellow arkies a break? Come on over and talk to us. One cannot imagine how hard it is to spend seven nights a week staring at a drawing on a desk. Help us overcome the evils of monotony! We won't be hard to find, just look for a bright orange wall in the basement and we'll be there. We will be "working" there every night until Easter break, 24 hours a day for as long as you will allow! You'll be a welcome change to talking to other fellow arkies.

One of the many designing a chapel in steel.

T.S. '71

Rennovation?

Editor:

Your editorial "Keep Pushing" (for La Fortune renovation) solicited responses to your general Administration's plans to spend $250,000 to upgrade the present student center. One agree the students should "keep pushing" as you advise, but for not renovation. A piecemeal plan to improve a facility that will remain for short while, if the present enlarge student body, however much is spent on renovation, is not what's needed. What is needed instead is a completely new facility that will release some of the pressure on the over-crowded halls, a first-rate facility worthy of a first-rate university with a first-rate student body, paying first-rate tuition.

None of the plans that are being discussed is anything more than a piecemeal plan to improve a first-rate university or college in the entire realm of student activities than facilities for student activities than Notre Dame is socially stagnant, or so we often conclude. That activity is, of course, spending time at Kube's, please! The Sunday night band is the best, though that's not saying much.

That feat was not accomplished without the usual wailing, gnashing of teeth, and accompanying bitter invectives against the numerous un-Christians who have wielded the picket line in the past. We finally arrive at Kube's, present our IDs, find a table, and order a few pitchers.

Well, the weekend has finally arrived. After struggling in from of the last of the Friday classes, I begin my usual end-of-the-week ritual of taking my shoes off, grabbing a beer and reeling on the couch for a few hours. Ah, the joys of a Friday afternoon! As the tensions of the recently completed week begin to eke out of me, my thoughts turn to the prospects for the upcoming weekend. While my mind continues to focus on what is in store for me and my fellow arkies, I cannot help but wonder how the weekend will unfold. Will the party be as wild as I've hoped it would be? Will the weekend be filled with laughter and joy, or will it be marred by disappointment and frustration?

As you know, the Notre Dame community is a unique and vibrant place. A place where tradition meets modernity, and where old ways are given new life. It is a place where the past and present coexist, and where the future is always just around the corner. It is a place where we are encouraged to challenge the status quo, and to think outside the box. It is a place where we are called to be the best that we can be, and to strive for excellence in all that we do.

As we look towards the weekend, I am excited for what it holds. I am excited to be with my friends, to laugh and to share in the experiences of others. I am excited to be part of a community that is always looking for ways to improve and to grow. And I am excited to be a part of a community that is always striving to be the best that it can be.
I remember a conversation I once had with a girl in high school, when we were both about 13 years old. We discussed the sexual drives, and how nearly irresistible they seem in their temptation. Sex, we said, was the everyday matter of most of our minds, and on the minds of our friends. Sexual in­timacies, which we had all engaged in, if we had dared. But we didn't dare discuss them. She had got into deep trouble with God, and the girl could get pregnant, and be thought cheap. The girl was new in town, and had just moved, and she had a friend, a girl said, was because he was selfish and had a dirty mind. After he had had his way with her, she would go off and talk about her, and wouldn't have any more to do with her, as she certainly would never marry her. She would be considered the high school tramp, and nobody else would want to marry her, either.

Teased by desires we only half un­derstood. Our conversation itself became a kind of sexual game, until finally, we had worked ourselves into a mood ap­proximating rage. "Why," we asked our­selves, "did God make sex into such a dirty trick, then let us be tempted out of our minds to the disaster lurking everywhere in our senses, in the urges that never sleep?"

Thus in Maine, in the summer of '41, two children asked themselves an ultimate question as to the nature or the source of the sex urge, by the ugliness of sex than they were open to its joy. But there was beauty in our in­nocence, our curiosity, and our shy need of another for summer-talk. If, a year or two later, we had touched and loved one another, there would have been beauty in the young hungrers of our flesh, and a greater innocence than we would ever know again, though the experience in its af­termath would have shattered us.

Early in life, our sexuality is a wound that troubles us. In a child close to infancy, I experienced desire; it is almost my earliest memory. It was also a secret I knew I must not tell anyone. To be speaking of it, I was embarrassed because I was naked before another, and she teased me about nakedness. "Oh, mother," I thought to myself in tskish despair. "Don't you un­derstand anything about this? You should never notice, or never speak about?"

I will speak of it again. But I was always embarrassed at the assumptions I made. I assumed I was innocent, because I knew the unholiness of my mind and the dreams, hiding in my pillow, that I played with every night and morning.

As I grew older, I became afraid of sin. I would take down from the shelf the one volumes of a great family Bible, about the very first page of it. I would turn the book on the floor and kneel on it, resting my back on the very page I expected a promised mercy. Then, I would ask God to pray not to damn me forever, and I would vow never again to be the sensual child. Sometimes I would kneel on those Scrip­tures two or three times in the same mor­ning, when grace failed repeatedly to sustain my fervent prayers.

Later, in high school, I remember when a chum confided to me that he had com­mitted sexual sins also. I knew I wanted to say if I had committed sexual sins also. Papal inquisitions could not have dragged out of me, as the confessor did, the confession I made. From his confession, I judged him to be a fool, from my denials, he judged me to be a eunuch. Today, I am a priest, and he is a Baptist minister. Because of my denial, he judged me to be a eunuch.

Why does the grown man, then admit publicly, the the private sins of the child? Because the man has learned what the child never knew: that sexuality is the way we have of belonging to the brotherhood of all things that live. Except as Franciscan metaphor, the star is not my brother; the rocks are not my sisters. Moonlight is lovely, but it begots no children, and has never needed a father's love. But there is a blood stream in the cosmos, a spirit criss­crossing the universe, making kinmen of birds and flowers and fish and children.

Now, if the idea is not that there is a clothed as the unfeeling, the unamused who are being then the experience in the human soul, as that of a woman's to be a eunuch. Today, I am a priest, and he is a Baptist minister. Because of my denial, he judged me to be a eunuch.

As a man who is neither child nor eunuch, I am useful for the gift of the eunuch. Celibacy has not wholly quitted the joyful roasting of the eye balls when a girl appears with ankles that could have danced in a chorus. A little while ago, I met a chap in whose eyes there hung a sty trying to live, as though his legs were taking off in different directions, like a Jesuit afraid that his right foot will find out that his left foot is doing. I noted with annoyance his knobly knees. Why is it, in the springtime around here, that all the knobly-kneed chaps wear Bermudas, and all the dimple-kneed girls are in pants? I think the Dean of Students should pass a rule making it mandatory for the coeds to wear mini-skirts. Darby and I would get more exercise, if he did. I believe in God because of roses, in kneecaps as on altars.

I am not writing to you as an old man whose fire is banked, with the thermostat turned down for the night. I may yet be carried off by Reedsbrook while harboring an unchaste thought. Consciences is treacherous, but it is one of the ways we are alive to beauty, and I won't knock it. I don't think God is waiting to zap us for our lapses over sin. If he had known God well enough, he would have realized that the sin he was dealing with was only the confusion of a child bewildering by his inner mystery. In the note of '41, there were too many teen-agers who feared that God had given them their sexuality as a trap to damn them. It was not God When they needed to fear, but theologies made up about Him, and the commandments imposed in His name. Theologies and commandments are the system by which well-intentioned men sometimes lay their hangups and self­distrust on the rest of us, as the directions for ruling our lives.

When the Dance and Drama Series of the College of Communication Presents "An Evening with Mark Twain" on Sunday evening, the audience will be delighted with the performance you won't stop laughing. For all the good directions, like a Jesuit afraid that his right

I am grateful for the gift of sexual desire. It is the last flicker of originality in a passing epoch as it faces the onslaught of staleness and boredom."

And Twain, writing in the "Innocents Abroad, just to mention a few."

a monument to
man's imagination

By Herb Juliano

Superdome: lounge at field level and 64 box suites with private seating below the terrace (or upper deck) level. You will be able to see the major sport from professional football to hockey, college football and basketball, the Sugar Bowl, the Super Bowl and major league baseball.

General entertainment events such as "Disney on Parade" and the circus, big-name performers and personalities, rock groups, musical extravaganzas and Mardi Gras can be accommodated. No wonder Dean Gerald McLindon of Louisiana State University's School of Environmental Design said: "This is the most usable public building ever designed in the history of man."

giant screen TV

You won't be able to buy a bad seat in the Superdome. Not even if you wanted to. That's because the Superdome's revolutionary giant-screen, color television system will furnish every spectator with a bird's-eye view of all the action as it happens inside the stadium.

Six huge television screens, each 26 feet wide and 22 feet high, will be suspended on a giant gondola from the peak of the Superdome and will provide spectators with a superb "up-close" view of nearly every event as well as "instant replay" from his seat in the Superdome. When completed, the Superdome will be the largest dome. Not even if you wanted to. That's because the Superdome's revolutionary giant-screen, color television system will furnish every spectator with a bird's-eye view of all the action as it happens inside the stadium.

The control room for the giant screen TV system will be located on the Superdome's third level. Here you find the same equipment you find in a modern television station ... video tape machines, film and slide projectors, a special effects board capable of 14 "wipes" or patterns, and a lot more, all designed to let you see the action... at least twice.

There is no worry if your ticket for Superdome football puts you in an end zone seat. When the Saints, South End Zone seat in the Superdome, watching the south end zone seat. When the Saints, south end zone seat the opposite end of the field, will be turned into a spectacular on-the-ball close-up on the color screen, each approximately 475 times larger than a home TV set.

Picture yourself on a Sunday afternoon sitting in a south end zone seat in the Superdome, watching the other end of the field, it will all be up there, big as life, on giant screen TV.

But sports won't be the only events during which the giant screen TV system will be utilized. The TV system will also provide additional revenue for the stadium with commercial television advertising during timeouts and intermissions. Convention and trade show executives will find the TV system a superb
town college games, either before or after a local college game. The possibilities boggle your mind. And you would believe full theatrical lighting and full theatrical sound, also housed in the same unique gondola? It's true. From Sonny and Cher to the Metropolitan Opera, a performance in the Superdome will have sound and lighting facilities that will match anything, anywhere.

How do the pictures get on these giant screens? Eidophor Corporation of Switzerland has designed and is building six huge high intensity projectors, the likes of which never before have been made. TNT Communications of New York, pioneer in closed circuit TV, holds the contract for the innovative system. These projectors, located on the fifth level of the Superdome, will project the image onto the screens. Images, by the way, which are sharper, brighter, and with more contrast than your home television set, even with every light in the Superdome turned up to full brightness.

In the case of the Sugar Bowl, it would be officially opened, the Superdome will rise some 273 feet into the sky's line higher than the Empire State building. Some 20,000 tons of steel and 150,000 cubic yards of concrete will support the huge structure. It will require 9,000 tons of air-conditioning and heating to keep the Superdome at a comfortable 72 degree the year round.

When completed, the Superdome will be the largest dome ever designed in the history of man.
Herb Juliano is a member of the Notre Dame Staff and lives on the campus. He is a television sportscaster, announcer, a baseball author and writer, and a well-known baseball critic. His recently completed book on the future of baseball, which is to be published, is titled: "A WHOLE NEW BALL GAME: THE MOST TIMELY BOOK ON BASEBALL EVER WRITTEN." Another book, "A STRIKE, THEN THIS MUST BE BASEBALL," is just in the planning stage.

This is Mr. Juliano's second time around at Notre Dame. He spent nearly eight years here in the 1940's, when he assisted the late Joe Boland in the sports department of WSBT and WSBT-TV, the South Bend Tribune stations.

visual aid, enabling one to see a close-up of every booth in an exposition without leaving his plush, stadium seat.

With this multiplicity of usages, one wouldn't expect the TV system to double as a part-time traffic controller. But it will. Here's how:

Immediately after a football game, highlights of the contest are shown on the TV system. This additional TV attraction is expected to keep a large portion of the crowd in their seats, thus eliminating a rush to the parking lot.

Another aid to traffic dispersal that is being considered by Superdome event planners is the possibility of showing highlights of network grid games as well as a late-afternoon West Coast pro contest, immediately following the prime event. This will at least partially eliminate the mad rush out of the stadium to see the afternoon football game on home TV. After all, why go home when you have all the comforts of home, including color TV and exciting stadium atmosphere, right in the Superdome?

The immense structure is still unfinished. Seating in the Louisiana Superdome has been the subject of much public speculation recently, resulting in considerable—and understandable—confusion. The Superdome is the largest covered stadium in the world, about one-third again larger than its nearest rival, the Houston Astrodome, which could almost easily inside the Superdome. Seating is not a simple subject because the Superdome is not a simple structure. As befits a great building, the Superdome is intricate and involved in its conception, its construction, and to some extent in its operation. It is a complex building in order to make it simple for the spectator to use. In fact, it was designed for the spectator: his arrival, his stay, his viewing, seating and convenience, the air he breathes, the sound he hears, his thirst, hunger and body comfort, his contact with the game, his physical contact with the building, his peace of mind as to his movement, parking, safety and easy exit.

The Louisiana Superdome is more than simply a football stadium. It is also a baseball park, a basketball arena, a light, a convention and trade show hall, a parking facility and other such structures leading to better citizen services. A all of these qualities are being brought under the ring. A ll of these qualities are being brought under one roof. And there is a chance for the nation's outstanding college basketball teams in the Superdome. Tulane, LSU, Dillard and Xavier will play in the Superdome, and other schools from around the state will be invited to "home teams" there. Double-headers, too. And there is a chance for the NCAA regional playoffs, and later, even the national NCAA championship. Pro basketball on a regular basis is a definite possibility.

This projected image of the exterior of the Superdome after complete makes the structure look as magnificent as it sounds.

It's immensity was founded on the belief that even tomorrow is in danger of obsolescence.

Seating in the Louisiana Superdome has been the subject of much public speculation recently, resulting in considerable—and understandable—confusion. The Superdome is the largest covered stadium in the world, about one-third again larger than its nearest rival, the Houston Astrodome, which could almost easily inside the Superdome. Seating is not a simple subject because the Superdome is not a simple structure. As befits a great building, the Superdome is intricate and involved in its conception, its construction, and to some extent in its operation. It is a complex building in order to make it simple for the spectator to use. In fact, it was designed for the spectator: his arrival, his stay, his viewing, seating and convenience, the air he breathes, the sound he hears, his thirst, hunger and body comfort, his contact with the game, his physical contact with the building, his peace of mind as to his movement, parking, safety and easy exit.

The Louisiana Superdome is more than simply a football stadium. It is also a baseball park, a basketball arena, a light, a convention and trade show hall, a parking facility and other such structures leading to better citizen services. A all of these qualities are being brought under the ring. A ll of these qualities are being brought under one roof. And there is a chance for the nation's outstanding college basketball teams in the Superdome. Tulane, LSU, Dillard and Xavier will play in the Superdome, and other schools from around the state will be invited to "home teams" there. Double-headers, too. And there is a chance for the NCAA regional playoffs, and later, even the national NCAA championship. Pro basketball on a regular basis is a definite possibility.

The immense structure is still unfinished.

It all began eight years ago. On November 8, 1966, the voters of Louisiana overwhelmingly approved the constitutional amendment creating the Louisiana Stadium and Exposition District. And, on that day, the Superdome was born. Besieged for five years in the courtroom, the District and its eleven-man Board of Commissioners survived seemingly endless legal skirmishes. Finally, on August 11, 1971, a combine representing banking interests in the states of Louisiana, Georgia, Florida, Mississippi, Tennessee, Arkansas, Illinois, Missouri, South Carolina, North Carolina and Texas, purchased $128.5 million worth of revenue bonds.

The Louisiana Superdome is a public facility, owned by the people of Louisiana. It is being built at a total cost of over $143 million. Originally, the cost of construction was estimated at $35 million, but by 1971 when the $129.5 million revenue bond issue was authorized, the entire concept and location had been changed. By 1974, latest cost estimates had reached the $163 million mark. Operators of the Superdome, however, believe $34,500 a day to break even. As usually happens in ventures of this magnitude, money for the Superdome comes from the multi-billion dollar bond issue, from interest on the bond money invested during the time construction, and from a hotel-motel occupancy tax.

In the case of the Superdome, the four percent occupancy tax on hotel and motel rooms in Orleans and Jefferson Parishes has already reached a 15 percent average annual growth rate, far exceeding the projections of 11.6 percent made by Standard Research Institute in March, 1971.

Estimates for last year indicate the hotel-motel tax will bring $24 million.

The District's investment of idle funds will generate over $11.2 million of interest income during the construction phase. This is $2 million more than the amount projected in 1971.

An additional $37,500 annually.

Anything goes in the Louisiana Superdome! From great sports events to major cultural attractions, religious services, Broadway productions and political conventions, the potential is as endless as man's imagination, and his needs. The immensity of the Louisiana Superdome was founded on the principle and the belief that we inhabit an age when even tomorrow is in danger of obsolescence. The Louisiana Superdome is beyond tomorrow. And its functional quality is no accident. It was planned that way. Perhaps as a reflection of the State of Louisiana... which exhibits similar variety in its heritage, its interests, its people... the world's greatest festivals, superb fishing, hunting, great sportsmanship in the stadium, on the field and in the ring. All of these qualities are being brought under one roof, in the Superdome, with an unobstructed view.

The city is great. For labor, it will mean an estimated $1 billion of construction in the metropolitan area, providing thousands of needed jobs. For the city and state governments, the increased spending will mean increased tax revenues, ultimately leading to better citizen services.

And for the Louisiana, it will usher in a new psychology of progress and pride with which to identify...
Minimum wage act to be signed into law

By GENE POTTHRESS

WASHINGTON (UPI) - Congress approved legislation Thursday boosting the nation's minimum wage in three steps to $2.30 per hour and extending it to about 10 million more workers.

President Nixon said earlier Thursday that he would not veto the measure - he did last year because he thought it was inflationary - so the minimum wage will increase from $1.60 to $2 or May 1, to $2.10 next Jan. 1, and to $2.30 on Jan. 1, 1976.

The House voted 345 to 50 and the Senate 71 to 19 to accept a conference committee bill that was a compromise between separate, slightly different versions.

Domestic employees covered

The law extends coverage for the first time to domestic employees, all government workers and retail chain employes.

Thursday boosting the nation's passage means almost immediate pay hikes for some 4 million workers now paid less than $2 an hour and adds another 10 million to minimum wage protection.

Maisy newly-covered workers

The newly-covered workers include local, state and federal government employees, domestic and household workers and some retail and service workers. About 6 million workers are still exempt, most of them employees of small retail and service establishments.

The immediate cost was estimated by economists at $1.5 billion.

The bill also requires overtime to be paid to policemen and firemen after a 48-hour week beginning next January. The hourly requirement goes to 58 hours in 1976 and 54 hours in 1977.

Farm workers covered

Farm workers also will be getting raises, but not as quickly as most others. The minimum wage for agricultural employes, now $1.30, goes to $1.60 May 1, to $1.80 next Jan. 1, to $2 on Jan. 1, 1976, to $2.30 on Jan. 1, 1977, and to $2.30 on Jan. 1, 1978.

The Senate version of the bill was more liberal than the House version, and most of the changes reflected the House bill. The Senate backed away from a $2.20 hourly wage next Jan. 1 and from overtime for policemen and firemen after 40 hours.

If signed into law, as expected, the measure will represent the fruit of three years of division between the President and Congress.

With new parietals

Few problems occur at SMC

As far as male visitation went there were no violations but there were two or three incidents of drinking. Kathleen Mulaney, dean of students, asked "that students act responsibly because we have to respect Indiana State Laws regarding alcohol, especially during open hours. If the rule is abused it could possibly affect male visitation."

According to Hall Life Commissioner Ann Smith, "It was a pleasure to feel a more natural atmosphere on campus, but it is important to remember that other rules are still in effect such as the drinking regulation. However, St. Mary's students on the whole showed responsibility in handling the new hours.

The general reaction to the conduct of St. Mary's students under the new parietals has been good. From the hall directors to the students most people seemed happy that the students have an expanded opportunity to have a more natural atmosphere on campus.

New parietals were put into effect for the first time last weekend at St. Mary's. They allowed for male visitation on Fridays from 6 p.m. to 10 p.m. and on Saturdays from 1 p.m. to 10 p.m. in addition to the previous 7 to 5 visitation on Sunday afternoons.

Art display closes week long exhibit; use of LaFortune proves successful

by Kathy Lawrence
Staff Reporter

An art reproduction display and sale held in the lobby of LaFortune Student Center closed last night after a week-long stay. The sale was conducted by the R.P. Avner Arts Company of Chicago and sponsored by the Office of Student Activities.

The Avner Arts Company contacted Fr. David Schlaver last Friday and proposed the art sale. Schlaver, director of Student Activities, said he accepted to see if La Fortune could be used satisfactorily for such a purpose.

Originally the presentation suffered from a lack of publicity, but it eventually attracted many students. Schlaver spoke approvingly of the response given the showing, and said that La Fortune needs more activities of this kind.

BULL SHED

A nice place to begin your weekend
Mass & Dinner 5pm Every Friday

THE BEACH BOYS

Saturday, April 20 at 7:30
Tickets on sale now

tickets are $5.50 a pair or $3.50 and are on sale at the ACC Ticket Office and the S.U. Ticket Office. When Irish Wake tickets go on sale Friday, a discount will be offered to anyone with a pair of Beach Boys tickets. A special courtesy from the HPC and Student Union.
SMC Presidential Search Committee formed

By Judy Petersen
Staff Reporter

Sister M. Catherine Francis Ford, F.S.C., chairman of the SMC Board of Regents, has announced the formation of a Presidential Search Committee.

The committee was established following a recommendation by the chair of the Board of Regents, the Rev. Donald Weis. He recommended that a search be established to replace President Frederick D. G. Globe.

Ford, who will serve as acting president, is a member of the Catholic hierarchy and has served as rector of St. Mary's College, Indiana, and as the head of the Catholic Theological Union in Chicago.

Sister M. Francesca M. Kennedy, who has served as associate vice president and dean of the College of Liberal Arts, was elected as the first vice president of the committee.

Chairman of the Student Board of Governance have been elected to serve on the committee.

Ford, who has served as the president of St. Mary's College Alumni Association, and the chairman of the Student Board of Governance have been elected to serve on the committee.

The committee will consist of Ford, Kennedy, and the chair of the Student Board of Governance.

The committee will begin its work immediately and will begin meeting on a regular basis.

Ford said that the committee will begin its work immediately and will begin meeting on a regular basis.

Mariner 10 to take photographs of Mercury

PASSadena, Calif. (UPI) — Mariner 10 was set Thursday to begin taking 1,000 nonstop closeup pictures of Mercury to give astronomers and scientists their first real information about the remote little planet.

The 1,000-pound spacecraft, closing in on Mercury after a celestial voyage of more than 84 million miles, was heading for a passby about 415 miles away from the planet at 1:46 p.m. PDT Friday.

Beginning Thursday night, the controllers at Cal Tech's Jet Propulsion Laboratory were turning on the cameras to operate around the clock for a period of about 48 hours ending Saturday night.

 Those photographs will have a "resolution" down to about 500 feet on Mercury's surface and should give intimate detail of the planet's topography.

Male and female life expectancy gap closing

GENEVA (UPI) — The gap between male and female life expectancy in Europe is closing because women smoke more and increasingly combine outside jobs with taking care of the home and children, the World Health Organization (WHO) said Thursday.

This trend is especially noticeable in the 45-54 age group, it said.

An analysis of life expectancy statistics by Dr. Bernard Benjamin of London University said, "a new and distressing factor now emerging is that in some countries the margin between the mortality levels for males and females has recently narrowed."

This is not because male life expectancy has improved but because that for women is not improving, Benjamin said.

"The emergence of this trend," he said, "coincides with . . . "The lengthening period of commitment of women to cigarette smoking, now at a much higher level of consumption than before World War II, and, "The increased entry of women into the labor market, often involving the double strain of housekeeping and motherhood, together with industrial employment."

The study said married people in general live longer than single persons because of greater economic security and a difference in life styles.

Circulatory diseases now account for 30 per cent of all deaths in Europe and cancer for 20 per cent, it said.

Acute respiratory infections, pneumonia and influenza account for 10 per cent of deaths while accidents and injuries cause about five per cent.

Infant mortality in Europe is declining throughout Europe and is now 13 per 1,000 live births in Sweden, and 58 in Portugal.

"There is every indication that a rate as low as 10, or even lower, is attainable," the report said.

Wander through loads of jewelry, too! Mexican sterling silver, abalone, and turquoise. Lots of rings from Thailand. Necklaces, earrings, and African trade beads! Jewelry and clothes for all occasions!
Diamond truck hijacked

NEW YORK (UPI) — Police today sought three men who hijacked at gunpoint a diamond exchange counter truck in mid-Manhattan and made off with 42 bags of jewelry and watches.

Detectives said it would take some time to check the value of the valuables taken Thursday but that it could range anywhere from $30,000 to $400,000. They said each of the seven jewelry establishments where pickups had been made prior to the hijacking would have to be considered.

The United Parcel panel truck had completed the second of the two daily rounds it makes through the midtown diamond exchange along Sixth Avenue near Rockefeller Center and was headed back to the Universal Terminal shortly before when police said

Miss Rawlins dies at 36

(continued from page 5)

third time. A fire department ambulance crew said the death appeared to be natural, an accident, or suicide. An autopsy was ordered.

Miss Rawlins, 36, married Damone in October, 1963. They had three daughters and were divorced in June, 1971. She was found dead in bed by her youngest daughter.

Damone’s first wife was actress Pier Angeli, who died of an overdose of drugs in 1971. Only Tuesday, Damone announced his engagement to marry Becky Jones, 26, reportedly a Houston oil heiress. A spokesman for Damone, who is singing in Las Vegas, said she was “crushed” by Miss Rawlins’ death and the wedding scheduled for April 12, may be postponed.

Tom Clements, one of this season’s co-captains, will lead the Irish in spring drills starting tomorrow afternoon.

I think that the squad is aware that their performance in the fall of 1974 is not going to be based on what they did last year,” noted Parseghian. “I’m concerned somewhat about the possibility of complacency on the team, but it is the duty of myself and the rest of the coaching staff to keep the squad members aware of what could happen and avoid such a mistake.”

The Irish begin workouts tomorrow afternoon at 1 p.m., and as in the past will attempt to create image management Wednesday and Saturday afternoons ending with the annual Blue-Gold game on May 4.

make our team members more aware of our strategical position.

"Last year we started out after having lost our last two games of the previous season at a zero position on the graph. We climaxcd with our performance against Miami in the last game of the regular season, but due to time factors, practice facilities, inclement weather we slumped a little for the Sugar Bowl. This spring we want to pick up at that point on the graph and just keep on moving."

Freshman Willie Fry saw a lot of time last season, and is a more than capable replacement for Stock.

While the Irish will stick to their basic offensive strategies of last year there is a chance the fans will see some added variations next fall.

"We’re going to be working on multiple defenses going from even to odd fronts," explained Parseghian. "And we’ll be working very hard on defending the option. The noseguard position vacated by Potempa is wide open, a few people, Marv Russell, Joe Prats, and even Steve Niehaus could play some there."

Despite the loss of Townsend and Rudnick, the defensive backfield will be solid. Reggie Barnett, Luther Bradley, Bob Zanot, Pat Sarb, and Tom Lopienksi will all be returning. The only loss at linebacker is Potempa and reserve Tim Sullivan, while all the starters will be returning on the defensive line. The return of Steve Niehaus is a positive point.

"Talked to Steve yesterday," offered Ara, "and he seems to be 100 per cent of where he was at this point last year. He’s been playing a lot of basketball, cutting sharply and most of all he’ll see action this spring. Jim Stock, however, will be out for the entire spring. The shoulder injury that he received in the Sugar Bowl isn’t completely healed so he won’t be seeing any action.

The offensive backfield, with the acquisition of Gary Daminick in completely intact while there will be a couple of battles at offensive and tight ends. Dick Moore and Al Wujciak are the top prospects to replace Pomarico, while Ed Rawlins is wide open all of last season with an injury, and Steve Quarl will contend for the spot left open by the graduation of All-American Casper.

Despite all the plusses there is some worry that success will go to the Irish’s head,
Shumate decides: plans to go pro

by Greg Corgan
Sports Editor

To those who know him, it came as no surprise.

John Shumate announced today that he will be graduating from the University this May in hopes of pursuing a professional basketball career. Thus the big center from Elizabeth, New Jersey ended months of speculation as to his future status, and in the process raised the hopes of more than one cellar-dwelling pro team.

"I had pretty much made up my mind before Tuesday, but I didn't want to say I was or wasn't leaving because I felt there were a few things I had to straighten up first."

"The basic reason I'm leaving is because of my family. Sure there are certain advantages for myself, but I always considered my family first."

"And as I said to coach Phelps, there comes a time in a man's life when he has to go on. Even if he has to leave loved ones behind. You have to learn to deal with adversity, but what I'm saying is that my parents need my help right now."

"My goal has been to enable my mother to stay home and raise my sister and not have to work anymore, and if I play pro ball I think I'll be able to help them out."

For the "big Shu" the decision didn't come easily, and it certainly wasn't reached without a great deal of consideration.

"I just didn't think I should prolong my decision any longer. I weighed the factors of Notre Dame basketball against the situation of my family, and I felt that the program would be able to get along a lot more easily without me than my family would. In addition because of the people involved here, the administration, the alumni, Digger, and the rest of the coaching staff, and the whole Notre Dame family, we'll still be able to maintain Notre Dame's status as a national power in basketball."

Although coach Phelps was on a recruiting jaunt back East and not available for comment he had earlier been quoted as saying that he felt the decision was Shumate's alone, and he wasn't going to try to change anything that John decided in any way.

Shumate will leave Notre Dame as one of the University's most prolific scorers and rebounders despite having only two years on the varsity level. His performance this season, coupled with the fact that he is a consensus All-American virtually assures Shu of becoming one of the top two or three picks in the professional drafts to be held later in the spring.

By virtue of the two poorest records in the NBA and the result of a coin toss Portland and Philadelphia will have the two top picks in that league while the Memphis Tams of the ABA will choose first in that circuit. For now, Shu has no preferences.

"It doesn't matter what league or team I play with just so long as I'm beneficial to that team, and that team is beneficial to me. I just want to go where I can do the best job."

The "big Shu" has already made his final appearance as a collegian and will make his debut as a professional Monday, April 1 in the Pizza Hut Classic to be held in Las Vegas. For John, leaving will not be easy.

"I just want to take the time to say thank you to the faculty, students, all the athletic officials, Fr. Joyce, Fr. Hesburgh, and everyone that has been involved with me directly and indirectly. They've added a new dimension to my life here at Notre Dame.

Gridders open '74 season: start workouts tomorrow

by Greg Corgan
Sports Editor

Part one of the 1974 Notre Dame football season begins characteristically enough tomorrow afternoon when the Irish hold the first of their thirty or so spring workouts.

But coming off a national championship which includes an undefeated season, head coach Ara Parseghian and his charges find themselves in the precarious position of having no room for improvement, at least as far as a won-loss record is concerned.

In addition the Irish ranks have not been severely depleted by graduation losses. Tri-captains Mike Townsend, Dave Casper, and Frank Pomarico will be missed along with defensive back Tim Rudnick and linebacker Gary Potempa. However, this list, while formidable, constitutes only five of last season's 22 starters.

The area of immediate concern may be the kicking game where both punter Brian Doberty and placekicker Bob Thomas will be graduating. Both ranked within the top ten in the nation in their particular categories this past season, and the importance of their contributions places added pressure on the coaching staff to come up with a replacement next year.

"I've emphasized time again the importance of the kicking game," noted Parseghian. "This year we lost Bob Thomas and Brian Doberty, who did an excellent job, and center Joe Alvarez who also played a very important role in handling the snap, something people tend to overlook." "Right now the heir apparent to the punting position seems to be Tony Brantley who has performed consistently well for us over the past year. Placekicker is wide open. As a matter of fact, for the first time in my career as a college coach, I've awarded a grant-in-aid to a high school placekicker."

A great believer in leadership among his team captains, Ara finds it a crucial situation considering the loss of Casper, Townsend, and Pomearico.

"Hopefully we'll be able to duplicate the leadership on last year's squad," he said. "I feel the monogram winners made an excellent choice in selecting Tom Clements and Greg Collins as the team captains for the upcoming season, and I think they will provide us with the leadership qualities we will need."

While the only improvement on 11-0 can be 12-0, Parseghian, like most good coaches, sees room for needed adjustments and the avoidance of certain pitfalls this spring.

"Just because we were successful last year, and a player had a good year won't mean he'll automatically have a good one this year. We have to avoid that, and we'll do it by giving each player more of challenge at his position, and we'll align our personnel so we can do this."

"We're striving for a better defense and a better offense," continued Ara. "And we want to (continued on page 15)
