Last Thursday between 1:00 and 3:00 p.m., Bruce Petrovick and his roommates at 1256 East Sorin, had $1400 worth of stereo speakers stolen. The following day, burglars carried off an additional $400 worth of items, leaving the room within the space of twenty minutes.

Petrovick joins the growing number of off-campus students whose homes have been burglarized. In little over a month, Director of Off-Campus Housing Father Thomas Tallerida has learned of over thirty burglaries. Four have involved losses of over $1000.

Field students who have been victimized, Petrovick, a senior from Norfolk, Me., took his problems to University officials. In a letter written to the Observer, Petrovick described the burglaries and urged campus officials to pressure civil authorities to find the burglars.

"Both of these robberies took place in the middle of the worst class, but yet not one of us has ever seen or heard about a thing," stated Petrovick. "On Thursday the burglars stacked the stereo, calculators, televisions and space heaters into a car, "but nobody saw the car, either," he lamented.

"This is not the first time this has happened," Petrovick said. "Thus far, over the last five months, Petrovick's house has not been the only one hit by burglars. The northeast side of town, has been the scene of other thefts. Glenn Rimmer, who lives on Minor Street, a block from East Sorin, had $300 worth of stereo speakers stolen.

Petrovick called up the South Bend Police after each robbery. "They sent over two uniformed officers who just asked questions and looked around," he claimed. "The following day, Saturday, they looked around, asked a few questions and said there was nothing he could do.

"The Detective Bureau of the South Bend Police acknowledged Petrovick's account of police action. "Our first move is to send a uniformed officer to the scene of the burglary," said Captain of Detectives Walter J. Klawonn. The officer takes a preliminary account of what happened, what's missing, and/or any description of suspects," Benninghoff continues.

"We then send a detective to follow up on any possible leads that may have developed. However, most of the burglaries happen so quickly that nobody ever even gets a description of the perpetrator to start. Usually, we try to get the registration (or serial) numbers down," Benninghoff said.

"In 1974, the most stolen material has been serial numbers inscribed on it. The serial numbers of the stereos would be a waste of time. We commissioned the National Crime Information Center. If the stolen articles were in the country, the number would be traced back to where it was stolen or lost.

Ford to answer questions on Nixon pardon

WASHINGTON (UPI) - President Ford told a House subcommittee Monday he would cooperate with witnesses for 19 days to answer his questions about why he issued a full pardon to former President Nixon.

In a surprise move, Ford sent Rep. Representatives H. Peter Tullar, D-Ohio, a three-paragraph letter shortly before 6 p.m. EDT telling him, he expected to appear personally to respond to the questions, if any, in two resolutions of inquiry concerning the pardon.

If Ford appears in person before the subcommittee, he would become the only the third President in U.S. history to appear before a congressional hearing according to White House researchers.

"It will be my desire to arrange this hearing before your subcommittee adjacent to the congressional recess so that you may have the matter well within the 15 days," Ford said.

The President decided that the best approach was the direct approach, White House press secretary Ron Nessen, who also asked Ford not to appear, said. "The President is happy to appear before the subcommittee to be public. Televising the hearings would be up to the subcommittee.

"I am impressed by Mr. Ford's desire to make the record straight personally. It is consistent with his frankness and openness he displayed as a congressman," said House Judiciary Committee chairman John Conyers.

Hugate had asked Ford in a letter two weeks ago to explain the reasons he had issued the pardon. Whether he had any knowledge of Nixon's mental or physical condition prior to granting the pardon.

Whether he had been pressured by the White House to issue the pardon.

"If they did, they would find that most landlords only pay fire insurance, if they carry any at all. The students are left to take responsibility for their losses," he commented.

Tallerida is concerned about the responsibility of having to deal with this kind of personnel. Even if the student is covered by an insurance plan, what is he going to do in the future," he pondered.

Ford feels that the situation can only get worse.

"If we have $1000 of electrical equipment stolen during the day, can you imagine what's going to happen during breaks? Every off-campus student should be worried about the safety of his possessions during vacations," Petrovick emphasized.

In his letter, Petrovick stated "I am positive that our cases do not stand alone, for many students have known the situation well and many more will know it by the end of the year. I strongly urge my fellow students to write or talk to Macheca, Burchenal or Benninghoff to pressure civil authorities for a solution, because whatever steps are being taken now are totally insufficient. Off-campus students will have more to look forward to than getting ripped off."

Petrovick has talked to Fr. Hesburgh, who in turn gave him a letter of recommendation to the University. Hesburgh also advised him to "buy a dog!"

"I do think the University has a responsibility to the off-campus students. "If a student is forced to move off campus, and he is promptly burglarized, I feel the University should do something about it," Petrovick stressed. "The South Bend Police can't seem to do anything about the community who crime problem. Maybe the University can get some help because they have the resources to do some food co-op and a residence list," he added.

Petrovick's calls for action have gone unheeded. Tailicker, Macheca, and many other landlords have expressed concern over the rapidly growing off-campus crime. However, solutions that have been put forward have been no more serious as numerous as the complaints.

Ford has been in the northeast area has been having problems, but I'm not sure what to do about it," Tallerida stated. "The closing of the northeast area has been commonplace among college campuses. The northeast area has been having problems, but I'm not sure what to do about it," Tallerida stated.

"The residence list at the end of this year, and eliminate the University from any responsibility to [the students who live there next year against our advice. But that would not be any real purpose," Tallerida continued.

There are some very large student-faculty facilities in the northeast area and to bar students from the neighborhood would be a waste of good housing. It would

Office of the Director of Information Services.

The newly-organized ND-SMC blood drive officially gets underway today as members of Stanford Hall volunteer to donate blood at the Central Blood Bank downtown. Cars to the blood bank will leave the main circle at 9, 10:30, 12, 1:30 and 3:06 pm.

Under a new system, blood mobiles which frequently the campus in the past and the blood drives in St. Mary's will no longer be necessary. Instead, each residence hall will be allotted one Tuesday or Thursday during the semester when its members may donate blood at the blood bank in South Bend.

One reason for the change, according to ND-SMC Blood Council Chairmen John Famula and Bob Heisler is that, “Notre Dame and St. Mary's are part of the South Bend community, and as such, we students can serve that community with a continuous supply of blood.

In addition, continued Heisler, Notre Dame is a stepping stone for the national blood program in that it is getting people to donate on a regular, volunteer basis.”

For example, she continued, if a person needed eight pints of blood over the year, at $25 a pint he would have to pay $200 for the blood, plus $14 a pint, or $112 for processing. If the volunteer program can be a success, he would only have to pay the $112.

Although faculty and off-campus students have not been included in the blood drive program this year, the chairman urge them to become involved by making an appointment to donate with the Central Blood Bank.

**ND-SMC blood drive begins today**

Regular, volunteer basis”

If a volunteer blood donation program becomes successful and can provide a constant blood supply across the country by 1975, transfusion recipients will no longer have to pay for needed blood, but only for processing.

Presently, the price of a pint of blood runs between $25 and $35 plus processing fees of $14 per pint, according to Famula.

“If people give on a free basis, they can also receive blood on a free basis,” Heisler emphasized.

University directory to arrive on October 10

by Don Reimer

The final university telephone directories will be available by Tuesday, October 10, according to Richard Sullivan, University Registrar. This information has been sent to the publisher, Promotional Enterprises, in Indianapolis. Directories will be distributed as soon as they are received.

The delay in publication, according to Sullivan, will allow more accurate data to be compiled. Sullivan pointed out that, "the publication of a preliminary directory, instituted two years ago, is designed to provide the extra time needed to gather the most accurate student data." Sullivan said his office was concerned with obtaining off-campus student addresses. This process delayed the sending of the final information.

The directory is designed to provide the extra time needed to gather the most accurate student data. "Campus View apartments should also help alleviate the situation," Macheca continued.

"With the increased number of housing units added to the federal and the government, there is a need to develop the proper residence and management of these facilities. It more or less follows the theory of natural supply and demand. Hopefully, the choice of housing will get before the commenters.

Although Bruce Petrovick's property loss is not the first incurred by an off-campus resident, he is the first to publicly question the university's policy, or lack thereof, on off-campus burglaries.

Macheca, Fr. Benshurg, and Fr. Turla, because of the great concern over the plight of victimized students, have decided to do something about it. Residents will be able to drop the poorer units. It more or less follows the theory of natural supply and demand. Hopefully, the choice of housing will get before the commenters.

Wisdom in Silence

What began as a light-hearted response to a comic strip, a humorous jest, has turned into a confrontation which has brought to the fore some of the most serious aspects of sexuality on this campus.

What began as an attempt to cleverly define the characters of women and men has displayed blatantly our inability to express and relate to even the most basic elements of our own lives as human beings.

The letters which have been printed in the Observer for the past week have gone from the ridiculous to the sublime—from the humorous to the obscene. It is quite apparent by now that the letters and thepose.

The Male Mystique

It was one of those coincidences that we all experience at times: a combination of things happens, perhaps with similar elements, and you wonder about possible connections.

In the morning I had read a provocative and disturbing article about male violence: in the afternoon I read a letter from three women from Saint Mary's who described their experiences during the "paralyzation" of September 18th. And then that night I picked up the September 18th edition of The Observer and read the following lede in the Behavior section: "In the post-game crowd, people were saying: 'the campus is isolated, a man may be cultivated a individual; in a crowd, he is a barbarian.'

The testimony from the Saint Mary's students was deeply.

Theology and Economics University of Emory Universe and then it appears in the September 18th issue of Christia "n Century. Let me attempt to paraphrase some of his points.

The basic way by which the male in our culture establishes his sexual identity is through the dominance-conflict-aggression in the interpersonal, economic and political realms. The problem is: Are males in our society conditioned to value themselves as our equals? What are the criteria of self-worth and social acceptance among Amerian men? Do men manifest a close relationship between violence and castronism?

In addition to influences from the American family, and our

sociological framework characterize the many men who are imbued with a fear of relating to women in sex as full equals.

development of Emory
Minutes of the monthly Notre Dame Chapter meeting of September 25, 1974.

The meeting was opened with a prayer and a touching description of the Notre Dame-Purdue football game for the edification of those not present at the actual event. Attendance was excellent; in good standing present although two were forced to leave during the description of the above-mentioned game.

Old Business: the minutes of the last chapter meeting were read and amended and the improper use of a third conjunction placed under consideration.

Correspondence: two letters were noted by the secretary. The first was from one B. Bear and was read aloud by the secretary. There followed a heated discussion among the members still present as to whether it. Bear was a private animal or representing his species in which case it would be the secretary's duty to answer the letter under provisions in the constitution for correspondence with learned societies. It was eventually moved, seconded, voted upon and carried that Professor von der Vogelweide consider the letter a personal affront and answer it ever she saw fit - within the bounds of decorum.

It was moved and seconded that the Society support Darby O'Gill as chairperson of the Centennial Committee for Preservation of the Notre Dame Ducks. The motion was declined out of order because the chapter had not yet finished with the correspondence. It was agreed, however, that a deputation of selected chapter members should be sent to ascertain if Darby O'Gill would be willing to serve in the above-mentioned capacity. The president of the chapter recommended that he be noted in the minutes that all present hoped he would be appointed.

The second letter was read by the secretary. It was moved, seconded, and carried that the letter should appear in the minutes of its entirety.

September 27, 1974
The Memorial Library
Sub-basement
To the Notre Dame Chapter of the Royal Geophysical Society;
Clytemestra von der Vogelweide, Secretary

Greetings,
I make haste to correct certain errors that
have been foisted upon your membership - notably upon your esteemed and learned secretary, Clytemestra von der Vogelweide - on doubt due to her endearing trait of childish confidence. I refer the reader to page 196 of the Proceedings of the Berkeley Dark Age Colloquium, 1963, and the description of the Snipe hunt held after the banquet by the wretched Miss Gumm. The so-called Viking remains can be no older than 1475 according to my data and most probably represent the cod drying facilities of a fleet of Breton fishermen whose activities in the waters off the Northeast coasts of this continent during the fifteenth century are well documented. Perhaps if Miss Gumm would spend a little less time with fancy techniques (typewriter erasers indeed!) and a little more time in pursuit of solid scholarship she might recognize this simple fact. There do exist authentic Viking remains on the Notre Dame campus but they are considerably to the south, in the area of the Memorial Library and faculty parking lot. The lakes mentioned in the Freydis Saga lay directly over the present football field - there were no lakes on the present sites but rather the area together with the entire south quad as far as the St. Ed's-Washington Hall line was given over to a massive swamp which the Norse inhabitants referred to as the "Fish Pond of the Goddess Hel" which would account for the Indian traditions concerning the fish in the present lakes. With all the burnt baked beans and underskirt socks in the world it would seem that Miss Gumm could find something better to do than increase the sum total of man's ignorance. She could do a lot more good in the kitchen than messing around that lake - out of her depths in more ways than one.

Very truly yours,
Wilbur Force Buhndoggle
Ph.D., M.S.D.
formerly reader of reptilian phrenology at the University of Herbergia

New Business: it was moved, seconded, and carried that the treasurer be verbally reprimanded by the chapter for persisting in purchasing the tea in little bags which offends the sensibilities of several of the members.

The meeting was closed with a short prayer for fraternal affection among all learned men and women.

Should someone know, or anyone care,
where you sleep tonight?
You left your family and your home
for you chose not to fight.

Coward! Traitor! You turned your back!
You look no part in bloodshed.
You will not share our blame
for destroying lives and land.
While we who went forth in freedom's name
returned in sorrow and shame.

Though uncertain of our cause,
we hold on to our beliefs.
Never will we put out our lights
never daring to object.
Not for lack of courage, but to defeat our pride
who could not accept.

**NIxon to have further tests**

by Jack V. Fox

LONG BEACH, Calif. (UPI) — Former President Richard Nixon will have to undergo further tests to determine future treatment for a lung blood clot which will require his hospitalization until the first of next week and possibly longer, it was revealed Tuesday.

Dr. John Langren, his personal physician, issued a new medical bulletin indicating that Nixon would not be able to appear as a surprised witness at the opening day of the Watergate cover-up trial which starts Tuesday.

Nixon was said to be showing “marked physical exhaustion,” and only in the few past few days being able to get out of bed for portions of the day to sit in a reclining chair with his leg raised.

“I am hopeful that all the tests will be performed and that the pre-illness findings will permit finalization of his future treatment schedule by the first of next week,” Langren’s bulletin said.

When Nixon first entered the hospital Sept. 25, Langren estimated the stay might end by the middle or end of this week.

The former chief executive is under court order from U.S. District Judge John Sirica to appear as a witness both for the defense and prosecution at the trial of John Ehrlichman, H.R. Halderman, John Mitchell and two other former aides.

The statement by Langren is the first bulletin since last Friday, also said:

“Former President Nixon’s treatment is proceeding satisfactorily.

“The intravenous administration of the anticoagulant Heparin has been discontinued. Nixon now is being anticoagulated adequately by oral doses of Coumadin. He will continue to be observed at Wawasee for anticoagulation for an indeterminate period of time.

“He continues to have marked physical exhaustion. But we have been able to increase his activities. He is now out of bed for portions of the day and sits in a reclining chair with his leg elevated. He is wearing a full length, support stocking on his left leg.”

Previous statements had indicated Nixon’s only visitors were his wife, Pat, and, early in the stay, his daughter Julia Eisenhower.

It was revealed over the weekend that another visitor had been Cardinal Timothy Manning of Los Angeles Catholic Archdiocese.

Dean Hofman institutes idea

Freshman Advisory Council starts

by Bob Mader
Staff Reporter

The Freshman Advisory Council, originally instituted two years ago by Emel T. Hofman, has held its first meeting of the year on September 4.

Dean Hofman sent a letter to the hall presidents asking them to appoint representatives to the Council, since the freshmen do not know each other well enough at the beginning of the year to hold an election. However, Dr. Hofman stated that Council members are asked each year to consider alternative solutions for the selection of members. The functions of the Freshman Advisory Council outlined by Dean Hofman are:

1. To provide feedback on general problems of the freshmen.
2. To express specific problems of the freshmen to the administration.
3. To evaluate the freshmen's major courses.
4. To serve as a liaison between the freshmen and the administration.
5. To provide a forum for the freshmen to discuss their problems and concerns.
6. To promote a sense of community among the freshmen.
7. To encourage freshmen to participate in campus activities.

Dr. Hofman emphasizes that it is necessary for hall presidents to take important actions.

**The Irish Eye**

**Weekend Results**

The Irish weren’t the only unbeaten team that came out of last Saturday’s action with a blank on their record.

For Delroy Royal’s Longhorns, John Jarv datas, Bud crystal’s Sun Devils, Johnny Majors’ Panthers, Denny Stola’s Spartans and Jim Sadler’s Wolverines, Saturday afternoon was just as long as it was for Ara Parseghian’s Irish.

Purification, Arizona State, Pittsburgh, Michigan State, and Oklahoma State all left the prestige ranks of the undefeated.

But Northwestern led things off with an impressive loss to the Nebraska Cornhuskers. The Irish have already enjoyed John Font’s Wildcats. Another past foe and inconsistent team, Georgia Tech, was handed a loss by the Boilermakers.

Saturday’s action with a blemish on their record.

A few more teams were defeated by lowly Clemson 21-17.

Against Purdue, the Irish had numerous scoring opportunities during the second half, but their shots were wide or high. The Boilermakers were the more defensive as Notre Dame kept the ball on the Purdue side of the field for 17 minutes. With 15 minutes left in the half, Terey Fingen scored the first goal of the game. After that the Irish attack began to let up and Purdue began to move into the attacking position. Fifteen minutes into the second half, Purdue scored a penalty kick goal when the shot bounced off the pole.

Against Purdue, the Irish had numerous scoring opportunities during the second half, but their shots were wide or high. However, Purdue’s defense was impressive as Notre Dame only moved the ball up and down the field without much trouble. Purdue’s defense was credited with several breakaways by fullback Shaun Carroll and halftime team ball. Carmen performed a score.

With twelve minutes left in the first half, Terey Fingen scored the first goal of the game for Purdue. Purdue scored two more chances to score but goalie Mark Klein preserved the tie with several good saves.

During the game the Irish suffered a key loss when Bob Ralph, quarterback, was taken off the field with a broken leg. Ralph, the president of the soccer club, will be out for the season.

Purdue scored a second goal against [IPU] during the second half. Fingen scored the third goal midway through the first half on a shot from the middle. The second goal came late in the first half on a penalty kick.

The Irish linkers down Purdue

By Bill Delaney

Coach Noel O’Sullivan and his Irish Golf Team opened their home season with a win over Purdue. Purdue, and unlike their football team, was defeated by the Irish with an impressive victory over the Boilermakers, 77/387.

The Irish had played against the Boilermakers in the fall and were successful in their worst defeat since 1923 beating them 56-14.

Rice Owls defeated LSU Tuesday night after a scoreless overtime. The score was 6-0-2 for the LSU goal in the first half of the game.

With all their scoring in the first half of the game, Purdue scored when the ball fell behind the Irish fullbacks. The Irish had a good chance to score with five minutes left, but the Purdue defense made an excellent save. Purdue had two final chances to score but goalie Mark Klein preserved the tie with several good saves.

During the game the Irish suffered a key loss when Bob Ralph, quarterback, was taken off the field with a broken leg. Ralph, the president of the soccer club, will be out for the season.

Purdue scored a second goal against [IPU] during the second half. Fingen scored the third goal midway through the first half on a shot from the middle. The second goal came late in the first half on a penalty kick.

The Irish were defeated by lowly Clemson 21-17.

Against this same team, I am really pleased with my boys—they have proved themselves. Co-captains Jeff Burrata and Mike Kistner provided some excitement for the afternoon with their identical even par 35's on the back nine of totals and 76's. Kistner, who had a 72 for the front nine, had trouble staying in bounds for his front

“Tall I know is that if there was any tree or bush or trap within 100 yards of me I found it,” said the irish Kistner.

Coach Joe Campbell of the Boilermakers had nothing but respect for the Irish. “It was a good game and we're pleased with the results. We've played some very formidable teams over the last year. The course was in fine shape, and we've got nothing to complain about.”

In other action Sunday, Notre Dame’s “B” team lost to Purdue’s “B” 287-297, but the highlight of the match was the outstanding play of Junior John Delaney. Delaney, from Endicott, Ohio, is a newcomer to Notre Dame Golf this year.

His round of 74 rewarded him with a full scholarship offer for the Irish.

John’s play Sunday proved to me that he is capable of playing collegiate golf. He'll provide fine competition for my starters, and he'll definitely get a shot to start,” said a pleased O’Sullivan.

This Friday, the Irish will host the Notre Dame Invitational, with six teams. Wayne State, DePaul, Wisconsin-Milwaukee, Wisconsin-White Water, and Illinois State vying for the prize. I'm really excited about this tournament because I've never had anything like it before, and we'll have our hands full,” said O’Sullivan. The Invitational begins at 11 and, and several exceptions play will be displayed by the Notre Dame Lithens.

St. Mary’s tennis team defeats Evansville 6-3

by Kathi Paterino

Victory was the word for the SMC tennis team Saturday afternoon. They upped their record to 2-1 by defeating the University of Evansville women’s squad, 6-3.

A threat of rain moved the match to the indoor courts of the nearby Minihawks racquet club where S.Mary’s took five of the six singles events and one of the three doubles.

The number one SMC player.

Track meeting set for Wednesday

Coach Faley would like to extend an invitation to all interested track candidates to attend an in-service clinic Saturday, October 1, Athletic and Convocation Center - 9:00 p.m. first floor conference or film room (C-100). The agenda for the meeting will include: fall track, indoor-outdoor track schedules, and introduction of assistant Coach Joe Plane.
