Rally proposed at "bull session"

by Mary Pat Tarpy
Staff Reporter

A group of nearly 80 concerned Notre Dame students, including student government officers and prospective candidates for the office, met in a "bull session" sponsored by student government last night in the LaFortune ballroom and decided to stage a rally to make the desires and opinions of the student body more visible to the candidates.

In particular, the rally would provide a middle ground for discussion of various student complaints and allow the candidates to formulate their platforms for the approaching student government election.

Most of the students felt that a combined effort might get a little more response.

Student Body President Pat McLaughlin laid out the ground rules for the rally.

"We'll have each of the candidates give a three minute platform presentation, then open it up so that students will be able to say what they want," McLaughlin stated.

"There'll be the rally; the candidates will be there; the concerned students should also be there or remain silent," added.

Apathy toward student government

Discussions at the "bull session" centered on the function and role of the student government. One fear that a number of students expressed was that the student body was becoming "isolated" from student government.

McLaughlin added that "You can't give everyone a chance to speak as an example of the student apathy. "You can tell there are a lot of concerned students on this campus, when only 75 out of 3000 show up," commented one participant after surveying the crowd.

"If this is any indication how students on campus feel, then we're really in the cold," McLaughlin added.

McLaughlin continued on to explain the role of student government and how it involves itself with student problems.

"One of the first issues to come up was the alcohol directive," he said.

"It took 48 hours to get rid of the directive," McLaughlin continued.

"Of course, it's hard to say that it was all negative," commented. "The dorm becomes public relationships between boys and girls," he went on to explain. "The family is the more important thing."

The center, formerly a seminary, was a "community experience," Braun commented. "It's not as though a group of boys and girls lived together," he went on.

"The dorm becomes public relationships between boys and girls," he commented. "You're not going to improve things simply by putting men and women in the same building.

At other Catholic universities

Coeducational living policies compared

by Tony Prosco
Staff Reporter

Should Grace Hall become an experiment in coeducational living—and therefore no evidence that it will—Notre Dame will join a number of other Catholic universities already offering similar options.

One proposal, submitted Wednesday by Grace lecturer Fr. Thomas McNally, calls "adolescent vulgarity" appear to be "mildly positive," Baum commented. "It's not as though a group of boys and girls lived together," he went on.

"The dorm becomes public relationships between boys and girls," he commented. "You're not going to improve things simply by putting men and women in the same building.

"There had been a sit-in for it the year before in one of the halls," he explained.

"But when the survey came out, a lot of students wouldn't even turn it in. There just wasn't any support," McLaughlin observed.

Fr. James Kelly, Notre Dame sociology professor and former professor at Georgetown's co-ed facilities began to see a new community emerge, the dorm is intended as a "community experience."

"The overall experience has been tremendously positive," Baum commented. "We went through a period of adolescent behavior, a kind of tension, but gradually it became very relaxed, very normal."

The center, formerly a seminary, was a deliberate experiment in coeducational living.

"We have eight adults, including three priests and four women, living at the center. We feel it's our job to open up a new part of education. There's a real community feeling the people do the laundry and dishes together, eat together, and so on."

Seven college-run townhouses which do not include adult supervision are also coeducational. Baum noted that promiscuity, loud parties and what he calls "adolescent vulgarity" appear to be "less common than in all-male dormitories."

"But-playing is greater in an all-male situation," he explained. "We've found that girls knock that down very quickly."

But not all Catholic colleges have found the idea equally appealing. King's College in Wilkes-Barre, Pa., has girls in the top three floors of one residence hall and connecting stairwells are kept locked.

Although Housing Coordinator, Fr. Paul Farber, says King's administrators are "pleased" with the arrangement, there is no plan to mingle the sexes within dormitories and partial hours are enforced.

Another CSC campus, the University of Portland, defeated a co-ed housing proposal on the basis of negative student response in a university poll.

Winter still holds it's grip on the lake despite the springlike weather yesterday. Temperatures are expected to remain high over the weekend (photo by Paul Joyce).
Response from Wacky Raffle Low

by Martha Fanning

Staff Reporter

Student response to the 1975 Wacky Winter Weekend (WWW) Raffle has not been very great, according to Patty Romano, chairman of the raffle.

"So far we've only sold 300 tickets out of 500 we had hoped to sell. If we don't sell at least 300 tickets, the raffle will have to be called off and the money refunded," Romano stated.

The proceeds from the raffle are earmarked towards defraying the expenses of the weekend which is co-sponsored by the Notre Dame and St. Mary's Social Commissions. Any money left over after the expenses are paid will be used for future activities planned this semester.

"If the raffle fails, it will not only affect this weekend but also any other activities held for the remainder of the semester," commented Romano.

The winner of the raffle will be able to choose from one of four trips, a night in Chicago for two; a night in Disney for two; and another option for two; a night in Chicago for two, or, for seniors only an option for the senior ball.

"The Chicago trip senior ball options were added after the expense of the weekend which is 1,500 for tickets but only 150 was sold. "So far we've only sold 150 tickets out of 1500 we had hoped to sell. If we don't sell at least 300 tickets, the raffle will have to be called off and the money refunded," Romano stated.

The proceeds from the raffle are earmarked towards defraying the expenses of the weekend which is co-sponsored by the Notre Dame and St. Mary's Social Commissions. Any money left over after the expenses are paid will be used for future activities planned this semester.

"If the raffle fails, it will not only affect this weekend but also any other activities held for the remainder of the semester," commented Romano.

The winner of the raffle will be able to choose from one of four trips, a night in Chicago for two; a night in Disney for two; and another option for two; a night in Chicago for two, or, for seniors only an option for the senior ball.

"The Chicago trip senior ball options were added after the
tickets were printed in order to
give students a wider range of
tickets. "Romano explained. "We
never anticipated this much of a
problem selling the tickets," she
added.

The objective of the WWW is to provide a fun, inexpensive weekend.

"We would have liked to have
started a tradition like Mardi Gras
and An-Tostal, but if it fails, I
doubt that it will be tried again
next year," Romano observed.

The festivities will start tonight
with a Happy Hour at Captain's,
followed by a dance held at St.
Mary's and ending with the raffle
drawing at midnight.

The fun moves to Notre Dame on
Saturday with several events scheduled, including: Vice on Ice, the Hockey Hookers vs the In
terhall Ernam of Planner, a Han
Brinker skating race, a B-300 sack race and a Snow Sculpture contest with the theme "What Notre Dame Means to Me."

Students are asked to support the event by buying a raffle ticket. The tickets are one dollar and can be purchased at the ND and SMC Dining Halls at dinner, student Union Ticket Office, at the Dance
Saturday night or from any one of the people listed on the WWW program. Chances will be available until the drawing at midnight, Friday.

Fellman praises Supreme Court

by Kathy Mills
Staff Reporter

The purpose of the referendum is to provide an indespensible function for points of equilibrium and a method of settling controversies. The best we can hope for is to look at some of the main functions of the Supreme Court, the method of settling controversies, and the decision on whether or not there is such a thing as executive privilege. Fellman declared, "The Supreme Court has jurisdiction over many cases regarding the constitutionality of acts of Congress and the President, as well as its own acts. Yet it is improper for the Court to give advisory judgments; it can only give declaratory judgments."

Fellman stressed the importance of the Court as the "separation of powers" branch of the federal government. He remarked that the Court is often called on to define executive, legislative, and judicial powers. In emphasizing the Supreme Court's power over the President, Fellman cited the example of its decision on whether or not there is such a thing as executive privilege. He related that the Court established its legal existence and base on the Constitution as a "qualified privilege, fundamental to the operation of government and rooted in the separation of powers." He added that the Court may review the authority of any Presidential power, and that the President is not above it but is subject to judicial review. The Supreme Court has, in its history, reviewed both Presidential acts as the veto power, the right to sign a bill after the adjournment of Congress, and the power to deport enemy aliens in wartime.

"Every American judge has the authority to refuse to enforce a law on the basis of unconstitutionality," Fellman maintained. He noted that the Supreme Court has declared a "Faculty Service Report" subject to judicial review. The Court imposes restrictions on itself in reference to judicial review, including assuming initially that a statute is valid and refusing to consider most cases.

The Supreme Court has made it abundantly clear that separation of powers requires Congress to legislate and forbids the President from making the law. It also limits the judiciary to the function of adjudication. Yet one may question if the Supreme Court has not overstepped the boundary line to make laws," asserted Fellman. He said that the Supreme Court decision on capital punishment, among others, read like a statute. Fellman also insisted that so-called federal and state laws to uncontrollable judicial review.

(continued on page 4)

Fellman praised Supreme Court

by Kathy Mills

"On the whole, I think that the Supreme Court has served us well in keeping alive the separation of powers," stated David Fellman, Visiting Professor of political science at the University of Wisconsin, continued, "There is no legal slot machine which solves Constitutional problems. The best we can hope for is to look for points of equilibrium and agreement between competing interests and ideologies. In doing this, the Supreme Court has provided an indispensable function." Speaking to a moderately-sized audience in the library auditorium, Fellman declared, "The Supreme Court has worked well in keeping alive the separation of powers, provided an indispensable function for points of equilibrium and solves Constitutional problems."

The best we can hope for is to look for points of equilibrium and agreement between competing interests and ideologies. In doing this, the Supreme Court has provided an indispensable function. Fellman noted, "The Supreme Court has jurisdiction over many cases regarding the constitutionality of acts of Congress and the President, as well as its own acts. Faculty Senate referendum out; key faculty positions outlined

by George Eiken
Staff Reporter

The Faculty Senate is sending out a referendum today on University Governance to all teaching, research, special professional and library faculty. The purpose of the referendum is to establish faculty positions on key issues and to indicate what courses of action are to be pursued. The Senate feels a formal position of a faculty concerning these issues would be beneficial in regards to the administration because it is informed of where the faculty stands on specific administration policy. As a result, it has spent the past six months compiling reports on various aspects of governance at Notre Dame.

The Senate feels a formal position of a faculty concerning these issues would be beneficial in regards to the administration because it is informed of where the faculty stands on specific administration policy. As a result, it has spent the past six months compiling reports on various aspects of governance at Notre Dame.

"Prior to pursuing a stand before the administration, or anybody, it's good policy to know you have a certified position," he said. "Last year we conducted a poll on salary and retirement benefits with excellent feedback, but the referendum is far more extensive in its approach," Cushing noted.

Compensation increase

High on the list of priorities is compensation increase of no less than $1000, with a minimum of $200 being in salary and the remainder in fringe benefits, retroactive to the beginning of the 1975-76 contract year. Another point being stressed is the adequacy of the 600 cost-of-living supplement in the face of the inflation-plagued economy. The Senate also wants faculty input on the following issues:

1) a University budget priorities committee, requesting the administration to make available to the faculty each year a distribution of academic-year book by quarters (high, median, and low quartile) for each academic year.
2) a suggestion that each major academic teaching and research faculty be provided a "Faculty Service Report.
3) a proposal to conduct a faculty evaluation of those academic officers of the University. Fellman noted that the Senate would like to see a "Faculty Service Report.
4) a suggestion that the Senate develop a short teaching and research faculty evaluation of those academic officers of the University. Fellman noted that the Senate would like to see a "Faculty Service Report.
5) urging departmental committees on Appointments and Promotions to follow the present Academic Manual meticulously in making recommendations.
6) considerations of religious affiliation in regards to employment and promotion.
7) beginning collective bargaining at Notre Dame.

The Senate feels a formal position of a faculty concerning these issues would be beneficial in regards to the administration because it is informed of where the faculty stands on specific administration policy. As a result, it has spent the past six months compiling reports on various aspects of governance at Notre Dame.

Observer Insight

Legal conference planned on sports, entertainment

Legal counsellors for several of the nation's top entertainers and athletes will participate in a forum planned by the Notre Dame Law School March 6-8. Law Faculty and students representing Bob Hope and other major entertainers. At 2:30 p.m., Herman Finkelman, special counsel to the American Society of Composers and Producers will discuss copyrights and royalties. Other speakers include James E. Fink, executive vice-president and general manager of the Chicago Bears; John Mackey, former football great, now a player's agent; and Assistant Dean David T. Lack of Notre Dame who will discuss taxation in sports. Sports columnist Bill Gleason of the Chicago Sun-Times will speak at dinner Friday night on "The Role of the Fan in Sports."

Special attention will concentrate on the legal aspects affecting new leagues, shifting franchises, problems facing star performers in different countries, and taxation interpretations in the multi-million dollar fields of sports and entertainment.

Registration for the sessions are now available at $10.00 per "Observer" for Continuing Education. Special arrangements will permit law school faculty to attend the event at a reduced rate and eligible students to enter free of charge. All other participants will be subject to a $125 fee to cover conference costs.

Our academic excellence is the reason they cite most often for coming here.

Our academic excellence is the reason they cite most often for coming here.

Required unless we have some questions," Golden further added. According to Golden, there are several reasons why someone would want to attend St. Mary's. "Our academic excellence is the reason they cite most often for coming here. Some also have friends here who like it. Our being a women's college is a secondary factor," she said. "The largest number of intents for next fall center around education, nursing and business. Many have a career orientation and may go into English or Humanities Studies with a mind to Law School later," she further added. "The Business Administration department now is the fastest growing discipline in the college," Golden stated. "Illinois is the state where the largest number of our students come from, followed by Indiana and Ohio," said Joan Organ, admissions counselor. "We also have a lot of foreign students from Bolivia, Guan, the Canal Zone, Central America, Liberia and Nicaragua," she continued.

Intelsat satellite loses control: authorities destroy it over sea

CAPE CANAVERAL, Fla. (UPI) — An Atlas Centaur rocket carrying the seventh Intelsat IV communications satellite into orbit hurtled out of control moments after launch Thursday night and space agency authorities destroyed the $30 million mission in a ball of fire over the Atlantic Ocean. Henry Slone, project manager of Atlas Centaur, said the malfunctions on the craft began two minutes and 30 seconds after the 6:35 p.m. lift-off.

"It appears everything was normal up to the booster cutoff," Slone said. Then, he added, "several things went wrong" with the rocket which caused it to tumble wildly out of control.

Slone said when it became apparent the tumbling could not be corrected and the mission was lost, the Air Force range safety officer destroyed the rocket for safety reasons. He said every rocket contains destruction charges which can be triggered in the event it goes out of control.

The remains of the rocket and the communications satellite tumbled into the Atlantic after the explosion. Cape officials said the debris fell into the ocean about 500 miles downrange from the cape at a point near north and east of the Bahamas.

They did not immediately explain how far north and east of the Bahamas the wreckage fell.

Residents of the Palm Beach and Miami coastal area reported seeing "ball of fire" in the sky over the ocean.

Space agency officials blamed a failure in the rocket's second stage for the mission's failure and engineers and technicians were inspecting tape-recorded signals from both vehicles to determine exactly what happened.

However, Slone said it may take several weeks before a decision could be reached on the exact cause of the failure of the mission. Unlike most Intelsat launches, this one was uninsured.

Space agency spokesman Chuck Hollinshead said machinists of the striking McDonnell Douglas Corp. had "nothing whatsoever" to do with the launch. General Dynamics, he said, is the contractor for the Atlas Centaur.

Tickets to go on sale for Joe Walsh concert

Tickets for the March 12 appearance of rock guitarist and vocalist Joe Walsh at the A.C.C. Student Union ticket Office and will go on sale this Monday, starting at 12:30 p.m. and continuing through Saturday afternoon.

For Joe Walsh

Earn our two-year scholarship.

A scholarship for your junior and senior years, worth up to $10,000. It will be yours if you qualify for the Naval ROTC Nuclear Propulsion Candidate Program. Tuition, books and educational materials are all included. Along with stipends for living expenses.

And, of course, the opportunity to build a rewarding career in the fast field of nuclear energy. A field which Navy technology has dominated from the beginning. Where the Navy now operates a majority of this country's reactors and has trained many of its civilian operators.

To qualify for the scholarship, you must have completed either one semester each of calculus and physics, or two semesters of calculus. And have a B minus average or better. Then, as a senior, depending on your continued performance, you will be interviewed for selection and advanced graduate-level training as an officer in the Navy's Nuclear Program. Training valued at $50,000.

Don't miss out on an opportunity for a valuable two-year scholarship. And invaluable training in the energy field of the future. Contact your local Office Officer Programs. Officer Representatives.

Next weekend, Feb. 28 to March 2, the University and the Junior Class will co-sponsor the Junior Parents weekend. An annual event, the weekend is designed to allow a first-hand experience of the community at Notre Dame other than that of the hectic first semester football weekends. The agenda will include basketball and hockey games, a special President's Dinner at which Father Hesburgh and Junior class president Augie Grace will speak and a closing breakfast Sunday morning, March 2.

When the parents arrive on Friday, they will check into one of five hotels in town where room reservations have been made for them by the Parents Weekend Committe. At 7:30 parents may attend the Notre Dame vs. Wisconsin hockey game for a reduced ticket price of $2.50 per ticket. After the game there will be a cocktail party in the ACC Monogram Room.

Saturday morning at 10:00, collegiate workshops will be in session. At these workshops, parents can become familiar with their son or daughter's program of studies and faculty instructors. The Notre Dame Alumni Association will also show the movie Notre Dame in Review starting at 12:30 p.m. and continuing through Saturday afternoon.

"Take it back," Bedcheck told his wife.

"Because Hofberger isn't going to have his house painted now that the Liggetts

are getting a divorce."

The next day Mrs. Bedcheck dragged the TV set back to Gladstone. "We don't want it."
There is nothing so absolutely touching to a priest as when a person speaks the words: “I want to go to confession.” Someone wanting to go to confession, someone wanting to go to confession to you. It is the request that cannot be refused, the reminder that there is a greatness to be exercised in Christ’s name; nothing else is as important for this moment—neither your hurry, or weariness, or discouragement, or your sense of unworthiness—nothing is as important as for you to instantly faithfully to be a ministry of mercy that is at the living center of every promise you have ever made to live worthy as God’s priest.

One of the most delightful aspects of going to confession is that confession is such a uniquely Catholic thing to do. Protestants have their confessions and are in close, personal practice. They have hymns-singing, Easter Sunday, and collective Bible reading, church supper, and church mice. But they don’t go to confession. Only Catholics go to confession. Only Catholics hear confessions. Going to confession is one of the scarcest, unimportant duties of religion that Catholics fret about.

Even priests, who are used to hearing confessions, dread being priests who must admit their human shabbiness to another priest. But confession is the human Catholic thing to do, and there is a certain elegance of style in the lives of these Catholics who drop allusions to the fact that they have their own personal confessor. “My confessor,” says the dowager queen—having confessors in the first place. Perhaps part of my problem was, I admit to myself: if I should ask my family for half a dozen cookies, and teardrops in her lovely eyes... I’ve seen sinners leaving the church on Saturday night who had felt too well to go to Mass the next Sunday. The atmosphere is chilling from the start. The reading is open to the public, and will be held this Sunday, February 23. The reading is open to the public, and will be held this Sunday, February 23. The reading is open to the public, and will be held this Sunday, February 23.

Theatre
Theatre performances matter. What matters is what we experience and share with an audience. In some respects, Medea is a difficult experience to share as we are close to the characters, and as the moaning and writhing is difficult to take at face value. Yet, in contrast, we are so often prepared to begin a part of the ritual.

Boston Catholic diocese defends abortion jurors in bias claim

BOSTON (UPI) — The Roman Catholic Archdiocese of Boston Thursday defended the predominantly catholic jury which found Dr. Kenneth C. Edelin guilty of manslaughter of a fetus in a legal abortion.

Ending an editorial silence which extended throughout the six-week trial, the archdiocese said, "The juror is not the villain of the piece." It was responding to Edelin's post-verdict charge that an unbiased jury was unobtainable in Boston.

The editorial in The Pilot, the official organ of the archdiocese, also criticized the press for biased reporting in defense of the 36-year-old Boston City Hospital obstetrician, who was convicted Saturday.

The nine-man, three-woman jury included at least nine Roman Catholics.

Edelin's attorney, William Homans, had said in retrospect to have vast powers vested in a non-elected official in view of what has happened to the Presidency.

"No one should do anything to prevent institution of restrictions into the constitution, and appointing the judges for a limited time with full benefits after their terms," Homans wrote.

The three defendants, the other co-defendant and professor of Government at Notre Dame, applauded Fellman's paper, and concluded that the Supreme Court "has protected the province of the judiciary. We must consider whether it is good for the country to have vast powers lodged in a non-elected official in view of what has happened to the Presidency.

"No one should do anything to prevent institution of restrictions into the constitution, and appointing the judges for a limited time with full benefits after their terms," Homans wrote.

Syria to decline mandate renewal

By United Press International

A Beirut newspaper which reflects views of the ruling Baath party in Damascus said Thursday Syria told Secretary of State Henry A. Kissinger it will not renew the mandate of the U.N. peacekeeping force on the Golan Heights which expires on May 30.

In Tel Aviv, Prime Minister Yitzhak Rabin said Israel has not sought a defense pact with the United States and does not intend to ask for one. He said Israel would rely on its own strength.

Egyptian parliament speaker Sayyed Marei told a visiting Yugoslav parliamentary delegation in Cairo that reports Egypt's "equal part" and must be a party to any solution of the Middle East conflict.

The Beirut newspaper Al Sharaq, in a front-page editorial, said: "It is known that Syria has informed the American Secretary it will not extend the mandate of the U.N. observers in the Galien Heights which expires on the last day of May.

"Syria asked for the reconvening of the Geneva conference this month or early next month in order to determine the (Middle East) situation once and for all," Rabin, speaking to students at Bar Ilan University near Tel Aviv, said.

"Israel's position is and remains not to appeal to the United States or any other country and to ask for guarantees for its security and existence.

"Israel is strong and wise enough so that when her security is discussed in the framework of the Arab-Israeli conflict she must rely on her own strength and her own ability to protect her boundaries."

Rabin, however, conceded Israel could not protect itself if the Soviet Union intervened.

"Just as Europe cannot protect itself from military intervention of the second great power of the world," he said, "I doubt that even with our strength we could stand against her ourselves."

Rabin said he would "be happy" if Kissinger's diplomacy could help Israel "go from war to peace in one step," but added, "I'm afraid this is impossible."

The question of possible U.S. military guarantees for Israel's security came up this week in reports that Kissinger was considering such a move as a way of enabling Israel to make more concessions in its peace negotiations with the Arabs.

Gross National Product drops, prices soar in record jump

By LEONARD CURRY

WASHINGTON (UPI) - Prices inched up in a record 14.4 per cent annual rate in the final three months of 1974 while the Gross National Product fell 9.1 per cent, the Commerce Department said Thursday.

The inflation rate was even worse than the 13.7 per cent rate the Department said Thursday.

"Syria asked for the reconvening of the Geneva conference this month or early next month in order to determine the (Middle East) situation once and for all," Rabin, speaking to students at Bar Ilan University near Tel Aviv, said.

"Israel's position is and remains not to appeal to the United States or any other country and to ask for guarantees for its security and existence.

U.S. spying operations threatened

By CLAY F. RICHARDS
WASHINGTON (UPI) — CIA Director William Colby said Thursday legitimate American spying operations are threatened by false charges that his agency engaged in massive domestic intelligence.

Strongly defending his beleaguered agency, Colby said "mistakenly raised by news reports. He said "almost hysterical excitement" surrounding news stories about CIA spying has "raised questions whether secret intelligence operations can be conducted by the United States."

The CIA is being investigated by a special presidential commission headed by Vice President Nelson A. Rockefeller. In addition, special House and Senate committees have been created to investigate the agency.

In testimony prepared for the defense subcommittee of the House Appropriations Committee, Colby was particularly critical of the New York Times, which on Dec. 23 printed the first story of domestic spying. He said reporter Seymour M. Hersh "mixed and magnified" two separate subjects — legal activities and "those few activities" that may have been illegal.

"The sensational atmosphere surrounding intelligence, however, encourages oversimplification and disproportionate stress on a few mistakes rather than on the high quality of the CIA's basic work," Colby said.

"There may have been occasions when CIA may have exceeded its proper bounds. They were undertaken in the belief that they fell within the agency's charter to collect foreign intelligence or to protect intelligence sources and methods."

Colby called for "sober and reasonable" investigations by Congress and said he hoped they would be conducted in secrecy so ongoing operations would not be jeopardized.

Colby for the first time denied specific allegations, including:

— New York Times reports the CIA engaged in telephone wiretaps and break-ins in New York City, which he labeled "false.

— The CIA maintains a "$200-million-a-year top secret corporate empire" to circumvent the will of Congress, "false," he said.

— Involvement in the Watergate cover-up. He said the CIA "certainly had nothing to do with Watergate" after contacts with Watergate burglars prior to the actual break-in.

The CIA manipulated local police for domestic activities. This Colby denied although he said the agency maintained "friendly liaison relationships" and "extended mutual courtesies" to local police departments.

— Colby acknowledged the CIA invited U.S. firms to bid on a contract to study new foreign developments in transportation technology, but denied this was aimed at spying on friends.

Hewlett-Packard introduces a smaller uncompromising calculator: the HP-21 Scientific.

$125.00

Now $125.00 buys:
More power than our HP-35. 32 pre-programmed functions and operations vs. 22 for our HP-35. The HP-21 performs all log and trig functions, the latter in radians or degrees. It's our only calculator short of the HP-45 that does full register arithmetic (M+, M-, Mx, Mx) ; calculates a common antilog (10X) with a single keystroke. The HP-21 also performs all basic data manipulations (1/x, yx, Vx, r) and executes all pre-programmed functions in one second or less. In sum, it's designed to solve tomorrow's problems as well as today's.

Smaller size, 6 ounces vs. 9 ounces for our HP-35.

Full display formatting. The display key (DSP) lets you choose between fixed decimal and scientific notation and lets you control the number of places displayed. (The HP-21 always uses all 10 digits internally.)

If a number is too large or small for fixed decimal display, the HP-21 switches automatically to scientific. It never confuses a smaller number with zero.

Finally, if you give the HP-21 an impossible instruction, the Display spells Err-o-r. The HP-21 executes each function immediately after you press the function key.

Here's what this unique logic system means for you:

• You can evaluate any expression without copying parentheses, worrying about hierarchies or re-structuring beforehand.

• You can solve all problems your way—the way you now use when you use a slide rule.

• You solve all problems—no matter how complex—one step at a time. You never work with more than two numbers at once.

• You see all intermediate answers immediately. The HP-21 executes each function immediately after you press the function key.

• You can easily backtrack when you err. The HP-21 performs all operations sequentially.

You can re-use numbers without re-entering them. The HP-21 becomes your scratch pad.

H-P quality craftsmanship. One reason Nobel Prize winners, astronauts, conquerors of Everest, America's Cup navigators and over 500,000 other professionals own HP-calculators.

Your bookstore will give you a demonstration today. Challenge our new HP-21 with your problems. See for yourself how much performance $125.00* can buy. If your bookstore doesn't have the HP-21 yet, call us at 800-538-7932 (in Calif. 800-662-9862) for the name of a dealer who does.

Track team at Kalamazoo for Central Collegiate

The Notre Dame track team will travel to Kalamazoo, Mich., Friday night for the 49th running of the Central Collegiate Conference track meet. Twenty teams will converge at Western Michigan University in hopes of beating out the Irish and claiming Eastern Michigan. The Irish will try to improve on their fourth place finish of a year ago as Mike Gogahan will also be trying to repeat his first place showing in the 100-yard run. Several records in the state are expected to be broken as the Irish host the invitationals.

The Irish will be on March 1, when the Notre Dame fencing team will open the season ever in a season highlighted by a 10-game winning streak.

Following that the Irish will host the Great Lakes Fencing Tournament on March 7 and 8, which will feature some of the best teams in the country.

AFT Season Ticket holders enjoy a 20% discount on all shows. Please give Judy a break for our engagement to Joni Mitchell.

The Salesians of St. John Bosco were founded in 1859 to serve youth. Unlike other orders whose apostolate has changed with varying conditions, the Salesians always have been — and will be, youth oriented. Today we're helping to prepare young people for the world that awaits them tomorrow. Not an easy task. It seems that service to youth can be a matter of life and death.

As a Salesian, you are guaranteed the chance to help the young in a wide range of endeavors...as guidance counselors, technical and academic teachers, coaches, psychologists,...in boys clubs, summer camps,...as missioners. And you are given the kind of training you need to achieve your aims.

The Salesian family is a large one (we are the third largest religious clerical order), with varying conditions, the Salesians always have been — and continue to be — devoted to the education, theology, etc., majors.

Phelps squad out to up 16-7 record, ice tourney bid

by Bill Brink

Whether they step into the Midwest or Midwest division, Digger Phelps' Irish cagers have one last tournament to do and are determined not to be denied entrance now.

The Irish will have to put their best foot forward in their third remaining regular season contests, beginning tomorrow afternoon, as they travel to Alumni Hall in Chicago to take on the Blue Demons of DePaul. Tipoff is scheduled for 3:00 p.m. CST.

For Phelps and his players, the prime motivation now is the chance of receiving a bid to the NCAA tournament, a bid which would be the fulfillment of the season's expectations through a viscous schedule and series of heartbreaking defeats. It would appear that the more mature, experienced Irish ball club is at the point of achieving that goal.

"It took us a while, but I think we've finally made it," said DePaul's Digger. "We're now a team to be reckoned with. Considering the youth of our team..."

"I expected a certain learning process. Sure we're still going to make some mistakes, but this team has come a long way."

It has certainly been a long way to maturity for the Irish last past their three games, starting with what Demon coach Ray Meyer calls' "the finest victory Saturday. DePaul 81-77 Notre Dame," a convincingly narrow 86-64 defeat atAUDences of Duquesne on Sunday.

Last year Notre Dame's most consistent player, Dave Corzine, had 30 points on 18 of 29 field goals, but Meyer (a 1948 ND graduate) returns six lettermen, including four starters.

The open starting position is rather noticeably filled this year by freshman guard David Ferrie. Ferrie's talent and experience has enabled him to respond by averaging 18.8 points per game.

Director of Player Development Dave Ferrie comes off the wing, where he has responded by averaging 18.8 points per game.

The team, meanwhile, will be rich in experience and capture their tenth victory in their last eleven games.

"Delays beat Notre Dame on Tuesday night, and they have responded by averaging 18.8 points per game.

"The open starting position is rather noticeably filled this year by fresh­man guard David Ferrie. Ferrie's talent and experience has enabled him to respond by averaging 18.8 points per game.
