House, Senate approve $327 mil. Vietnam aid bill

WASHINGTON UPI: House and Senate committee members Thursday approved a $327 million Vietnam aid bill which carefully limits President Ford's authority to use troops for evacuation purposes.

Reaching a swift compromise on what may be America's last Vietnam bill, the conference committee had approved the larger aid sum $327 million, granted by the original House bill but also kept the troop authority intact as spelled out in the Senate bill.

Sen. John Sparkman, D-Ala., chairman of the Senate Foreign Relations Committee, said the two houses had cleared the toughest Senate restrictions on the use of U.S. armed forces for evacuation purposes.

This included, Davis said, the Senate requirement that U.S. troops can help evacuate Vietnamese only incidentally to the rescue of Americans and only in areas where Americans were being evacuated.

The House put no such strict and definite restrictions on Ford's authority to use troops.

We have retained the essential authority of the War Powers Act that Davis said in a reference to the 1973 law which forbids any President from using U.S. military forces in Southeast Asia without congressional approval.

Trade-off between House and Senate

Sparkman confirmed the compromise essentially was a trade-off of restrictions on the use of the Senate's troop restrictions.

"I believe that is a fair explanation of what we have done," he said.

Rep. Wayne Hays, D-Ohio, said, "We have reached a general agreement on the amount of money and the objectives of getting people out who are providing us with ammunition and food."

But even as Congress moved to provide Ford some of the humanitarian aid he has requested, Hays indicated Ford's still-pending request for military aid had little chance.

The House bill passed 75 to 17 Wednesday, authorized $250 million in total aid, with $150 earmarked for humanitarian purposes and evacuation expenses and put fewer restrictions on Ford's evacuation authority.

The original Senate bill, passed 75 to 17 Wednesday, authorized $327 million in total aid, with $150 earmarked for humanitarian purposes and evacuation expenses and put fewer restrictions on Ford's evacuation authority.

Sen. Hugh Scott, R-Pa., said the conferees accepted the House's proviso forbidding any of the humanitarian aid to get to North Vietnam.

"The military situation is so far gone that nobody's going to worry about that," he said.

Passed with a few boos

The two houses passed their separate aid bills in debate marked by bitterness, anger, confusion and even a few boos, but Hays said the conferees reconciled the two bills without serious trouble.

"It was an easy going, low key and amicable as I've ever seen," he said.

The Senate bill spelled out restrictions on the use of American troops for evacuation purposes, saying they may help evacuate Americans and only in areas where Americans were being evacuated.

The Senate bill also spelled out restrictions on the use of American troops for evacuation purposes, saying they may help evacuate Americans only incidentally to the rescue of Americans and only in areas where Americans were being evacuated.

Congressional sources said therefore that the House might not be able to vote on the final compromise bill before Tuesday at the earliest. The Senate meets Friday and no delays were expected.

The Senate bill included, Javits said, the Senate requirements that U.S. troops not be used to evacuate Vietnamese.

"In addition, Congress must also pass (follow-legislation actually appropriating the money authorized by the new aid bill.

The President obviously considers this an urgent matter," said Burke to the Associated Press. "That is no indication that America's last Vietnam bill will have a hard time."

Burke replied, "I'd be surprised."
WASHINGTON (UPI) - The Federal Aviation Administration has halted all civilian U.S. aircraft flights to South Vietnam and Cambodia on grounds of safety, it was disclosed Thursday.

BANGKOK (UPI) - Thai frontier guards fired warning shots Wednesday in response to Khmer Rouge troops shooting at a Thai refugee camp along the tense Thai-Cambodian border.

NEW YORK (UPI) - A gangland-style slaying, bogus warranty claims and an undercover investigation by General Motors figured in a recent series of dismissals by the giant auto company. The Wall Street Journal reported Thursday.

GM's investigation, called "Motorgate" by one fired employee, centered on the killing of Francis Smith, a service manager working out of the Boston area Chevrolet office of GM's Volkswagen division.

WASHINGTON (UPI) - The Senate voted Thursday to offer generous tax breaks to homeowners facing foreclosures and to provide mortgage subsidies to help thousands of families buy homes.

Inmates rebel in Joliet center

JOLIET, ILL. (UPI) - More than 300 inmates took over a cell block at the Joliet Correctional Center Tuesday and tossed 10 hostages. One convict was dead, his throat slashed, and a prison guard was injured.

State police in full battle gear moved into the prison and added guards in Isolating about 75 holdout rebels in one gallery of the cell block. The police and guards took over the remainder of the block and a state corrections department spokesman said two of the hostages were freed.

Officials said scores of the rebellious convicts surrendered and were moved out of the cell block to other parts of the prison, which contains 719 inmates.

Vietnam President confers with France ambassador

SAIGON (UPI) — President Tran Van Huong conferred on Thursday with the Communists and Hanoi, in continued efforts to halt their advance, apparent diplomatic lies with both Saigon and Hanoi. Outside Saigon the Viet Cong and North Vietnamese armies halted their advance apparently awaiting the outcome of the political crisis in the South Vietnamese capital. The meeting at the presidential palace was at the request of the French envoy, Jean Marie Merrill, an official government spokesman said. He gave no other details. The final appointment on the 72-year-old Huong’s schedule Thursday was with U.S. Ambassador Graham Martin.

Students attempted to mock their roommates, friends, teachers, and administrators by voting for them and having their name put on the list.

The rules of the contest stated that students could cast a penny a vote for whomever they wanted. On Thursday and Friday, the voting was sparse. However, by Saturday night Beppo Guido was leading the pack, followed closely by Mike Sazdanoff and Digger Dziemianowicz. The ballot boxes were then moved from the dining halls to the Irish Wake, where the contributions were quite heavy for the top three candidates.

At one point Digger’s supporters cast one hundred and thirty dollars worth of votes, while Beppo’s men stuffed the ballot box with ninety dollars. Never one to give up, Mike Sazdanoff and Company rushed up to the judges with a trash can which contained over five thousand pennies and enough silver coins to total $148.55.

For next year the UMOC committee is considering instituting a Mike Sazdanoff Memorial Trash Can Award for the candidate who has the largest contribution at one time.

The excitement continued to build as the voting went on at the Irish Wake. Finally at about 12:15 the tallying of the votes was completed and the money had been counted. The chairman of the UMOC committee Dan Mayo was introduced by Bob Quackenbush.

Mike announced to the large crowd at Sligo Center that the results of the 1975 Ugliest Man on Campus contest were compiled. He proceeded to call the top ten ugliest men up to the stage. Beginning with 19th place winner the audience cheered as their favorite candidates made their appearance.

At this time an announcement was made that instead of just the first place plaque, the UMOC committee had decided that the top three had such great campaigns, that each would get a plaque.

For the second year in a row, Mike Sazdanoff received overwhelming support, and once again was elected the Ugliest Man. Alpha Phi Omega will run UMOC again next year and encourages students to save their pennies.

The chairman of the UMOC committee Dan Mayo was introduced by Bob Quackenbush.

A complete list will be posted later in the huddle.

Kennerly: Man with a camera

by Terry Kennerly
Editor in Chief

When Air Force One touches down at airports across the country, the same scene invariably ensues. A bearded young man with two cameras slung around his neck in the first to emerge from the cabin. He walks down the plane stairs and turns his camera to record the first glimpse of the President as he embarks on another out-of-town appearance.

The man with the camera is David Kennerly, President Ford's personal photographer. Kennerly's job is to photograph the President on all presidential trips, including his recent appearance at Notre Dame. Kennerly recorded the trip from start to finish...and the trip begins with the appearance of the President at the top of the airline stairs.

At one time Kennerly cut such an incongruous figure when he emerged from Air Force One that he once was stopped by airport security as an intruder. "People don't believe some bearded dude is with the President," Kennerly explains.

Since that time David Kennerly has not had to worry about not being recognized. He has suddenly found himself as somewhat a national notoriety that seems to have left him unaffected.

"People believe some bearded dude photographer is with the President," Kennerly admits. "Publicity has some advantage." Kennerly adds "People know why you are and that cuts through a lot of red tape." But Kennerly prefers to remain in the background and give his boss the publicity. "The one thing I don't want is to have so much publicity that it would interfere with what I do," he says.

Kennerly has been featured in national news magazines and newspapers. His new-found role as newsmaker was highlighted by his trip in early April to Indochina. Kennerly, having requested Ford's permission to accompany Army Chief of Staff General Weyland on an inspection of Vietnam, recorded the flight of the refugees in the face of the Communist onslaught. In getting close to the action, Kennerly's helicopter was shot at and nearly downed.

Yet Kennerly is no stranger to war, especially the Vietnam conflict. Kennerly, now 29, was a full-time photographer in Vietnam at age 24. He won the Pulitzer Prize for his war photography the following year.

Kennerly's career began when he turned professional photographer at age 17. He went to work the next year for the Oregon Journal in Portland. From there he hired on with the United Press International and was stationed in Los Angeles, New York, and Washington, covering the White House office for a time.

After his stint in Vietnam, Kennerly joined Life magazine just months before it folded, when he transferred to Time. Then, on August 9 last year President Ford named Kennerly his personal photographer, having covered Ford as vice president for four years.

Since assuming his job, Kennerly has produced some of the most revealing photographs of President Ford and the First Family. His access to the President is perhaps unprecedented, having the ability to simply walk in the Oval Office and catch President Ford informally in a way restricted to the Nixon White House.

Kennerly observes that the President is more than his immediate superior. "We are personal friends and it's a very good professional relationship," he notes. Kennerly attributes much of his success as a photographer to the President, and sees little difference between the two.

"There aren't two Gerald Fords, there's one," he says. "The way he relates to people is just the way he is: He's thoughtful and a good listener."

Kennerly has achieved some national notoriety around Washington as an eligible bachelor. When Kennerly was photographed at a White House State Dinner escorting actress Candace Bergen, the photo was noted by national magazines. Gossip-prone Washington circles began to make ties for Kennerly. Kennerly, of course, does not like to comment on such personal matters. About Candace Bergen he says, "She and I are good friends."

While Kennerly has apparently lived well with his new-found fame, his effect on the Ford presidency may have earned that fame. Kennerly has done much to enhance the Ford image. Kennerly recorded intimate scenes with the President and the First Family, but he has never

Democrats to hold Mock Convention

by Jack C. Silhavy
Staff reporter

The Mock Democratic National Committee will hold a meeting on Monday, April 28 at 3:30 pm in the LaFortune Hallroom. This will be an organizational meeting and get acquainted session for the committee, which holds the mock political conventions during each Presidential election.

St. Mary's InPIRG drive successfully completed

by Margie Ir
Staff reporter

The St. Mary's InPIRG petition drive has been successfully completed. Mark Clark, a former Notre Dame InPIRG board member, now working to establish the SMC chapter, reported that he was pleased with the results, citing that the 650-700 student body support is high in Indiana.

During the two weeks of petitioning, organizers obtained over 1050 signatures.

"Most students know very little about the organization when we start petitioning. It looks now like a lot of people are interested," stated Clark. "The biggest difference in support is one of the highest in any drive in the state. St. Mary's drive even surpassed that of ND. Chairman, Ed Reilly, at 289-7564.

Next on the agenda for approval is the Student Assembly. The proposal for the establishment of InPIRG at SMC will be heard at the Assembly's May 4 meeting. If the InPIRG proposal is passed, it will then be sent to Student Affairs for final approval.

The 1976 convention is slated for the third week in Feb at St. Mary's. The convention will run for four days and the convention will be held at a meeting, Sunday at 4:00 in the Science Hall room 204.

"All St. Mary's students are eligible to vote and run for offices. The students showed the petition drive that they're interested and now they have a chance to prove it by getting involved," Clark explained.

The first InPIRG project on which St. Mary's will be involved is a joint effort of the research and surveyors' group with the American Institute of Political Science. This will be a joint effort of the research and surveyors' group with the American Institute of Political Science.

"We're trying to get as many delegates and camp managers as possible," Clark said. "We think we'll have pretty good success, because there are not clear-cut leaders."

Clark noted that many things need to be worked out, saying, "We need rules, a platform and credentials committees." He said that he would like to see everyone at the meeting, stressing that this is a reason for its success every session.

Monday's organizational meeting is to get workers and delegates together to meet the committee members, and to generally find out what the whole convention is about.

'america' concert—love it or leave it

As is the case at any public event, there are always varying opinions on the proceedings that had just taken place. The America concert, held last night at the A.C.C., was no exception to the rule. Gregg Bangs, Mr. Left, who appropriately sat on the left side of the stage held different opinions than Leo Hansen, who obviously was positioned on the right hand side.

Right: Hey, how were the seats I got you last night?
Left: Not bad, except I think the people on the far left or right hand side had difficulty seeing the stage.

Right: Like me, huh? It didn't bother me that much during America's part of the show.
Left: I take it you didn't like the warm-up band.

Right: No, not really—what were their names?
Left: What were their names?
Right: "The band that backs up America while they're on tour."
Left: Dave Dickey was pretty good on bass though. In fact the only decent numbers they played was when he played lead guitar.
Right: He must have savored playing with America. The way he plays with them you'd think he was part of the band all the time.
Left: I kind of expected them to start off with "Miniature" and "Too Man," as they do on the Holiday album, sought of like YES does with "Firebird Suite."
Right: I was surprised that they didn't come outand try to sell us Heart's new album. They didn't get into that until the concert was nearly over. It seemed like a very professional, but honest, approach to me.
Left: I have nothing against professional performances. In fact, I really appreciated the fact that they didn't waste any time between numbers on onep-sided dialogues with the audience. However, I'm not so sure that they were honest in their performance. I think they were just softening the crowd up with a few big hits before they unloaded the new album on them.
Right: Yeah, but they played what everybody wanted to hear. Elton John followed much the same approach, but when Yes played here last semester, the crowd reaction to the older and familiar material was far greater than the response given the "Never Material," which had not yet been released.
Left: But they were leading up to the encore the whole concert. It seems as if the two encore songs, "Mr. Sandman," and "Horse with No Name" were a planned part of the show instead of a response to a calling back from a warm audience. I expected them to play "Horse" as an encore the whole concert, but the way they shoved the songs down the threat's audience took whatever thrill there could've been out of it.
Right: But don't accuse a person of rape when the so-called victim wanted it. "A Horse with No Name" is a haunting song. It means little in itself but a lot to everyone. America's songs are like that.
Left: I agree with you on that point. They leave the thinking up to you. Perhaps that's why I enjoyed the earlier part of the show more when they played more acoustically oriented songs. You know, when they get into romance, emotional feelings, all those lonely people, muskrats in love, tin men, highways California, all those better days and company.
Right: I liked the way the three of them switched back and forth from the three guitar set to diverse solo efforts which added variety to the flow of the concert. Gerry Beckley's grand white piano was mellow at times but also lively as well. Dan Peek displayed diversity by playing slide and mellotron. Neither was complex, but it was effective.
Left: Granted, Peek and Beckley were good, but Dewey Bunnel seems to dominate the group. You just have to look at the songs he's written. "Tin Man," "Ventura Highway," and "Horse with No Name." It's his songs that stand out. His vocals seem to have conviction—he makes you believe what you're hearing. The only part I didn't like about his performance was his electric guitar leads. It seemed to me he was trying to imitate Joe Walsh on a few solos. In fact, the group was trying to get into some rock an' roll music towards the end.
Right: You're right.
Left: No, you're right.
Right: Whatever. America is not synonymous with rock an' roll. I really enjoyed the concert. In fact, next to of course god america i love you.
Left: Take away the attempted rock an' roll and the leading on, and I think I could stand beside her.
Right: I think they call this falling action. Yeah, you're right.

Letters to a Lonely God

The observer

reverend robert griffin

man of la mancha

For a decade now, the Ward-Phillips Lectures have been an annual focus of interest not only for the English Department, but for the University as a whole. Each year, the English Department invites a nationally prominent literary scholar to give a series of four public lectures on a literary subject. The choice of a particular lecturer is, at least in part, a matter of accruing a body of work that challenges and provokes the audiences. The Ward-Phillips Lectures are meant to serve as a vehicle for literature to vigorously express itself through the art of speaking. Thus, the speakers' work is not only to be enjoyed, but to be taken seriously and to be communicated to the audience. The lectures are meant to be a collaborative experience, with the audience actively participating in the process of creating and interpreting the ideas presented.

The spring of this year, the eighth Ward-Phillips Lectures will be given by Frederick C. Wasserstam, professor of English at the University of California, Berkeley. The early 60's Creeks endowed Professor Wasserstam with a national reputation for his literary work and research, which continues to this day as he explores the intersection of literature and society. Wasserstam's work has been described as "astounding," and his lectures are filled with "laughable conclusions." The Ward-Phillips Lectures are meant to serve as a vehicle for literature to vigorously express itself through the art of speaking. Informing Ford

Student Body President Ed Byrne should be congratulated for bringing the political sentiments of the Notre Dame Community to the attention of a national audience.

The busy schedule of Ford's St. Patrick's Day visit to this campus did not prevent him from having the opportunity to express his views to the President. The letter drafted by Byrne, we feel, expresses more accurately the concerns of the Student Government and members of the Student Affairs Office, very admirably reflects the sentiments of student opinion, was expressed vocally and in the great number of letters sent to this newspaper at the time of the President's visit.

The Byrne letter does not blatantly attack the Ford administration, but it very clearly expresses the more valid concerns of the Notre Dame community and its basic dissatisfaction with such government decisions as the Vietnam War, the policies of the Nixon administration, and the type of free expression that is desperately needed if the channels of communication established in the past between the federal government and the campus are to be opened and used beneficially.

Ed Byrne should be commended for his involvement in an issue that may come the lack of communication that plagued the President's visit to Notre Dame and the possibilities of a new line of communication.

Opinion

Cecilia Prisner

Having been involved with the ND Student Body for the past six months, I have become convinced that there is an examination regarding my attitude towards humankind and my involvement in it. I have often asked myself why I am involved in the Student Body. Is it to create a world of my own out of my platform and spurn the education that I have been given? Does it really make me so concerned about people so far away?

An explanation goes back to the fall of last semester. I am from Colorado and I have always had a certain affinity for ecology, i.e. preserving that beauty of Nature which is Man and Woman. I believe that the bestowal of an honorary doctor of laws degree upon President Ford should be regarded as an expression of the University's approval of all his policies. The relationship between the federal government and the academic world are to be opened as Ford's speech before the Special Academic Convocation, the flow of ideas must travel both directions. This means that college and university students must take the initiative to express their views in a responsible manner so that they will be heard.

The honest but respectful presentation of the political sentiments of this campus was brought to Ford's attention through Byrne's letter to Ford. The type of free expression that is desperately needed if the channels of communication established in the past between the federal government and the campus are to be opened and used beneficially.

Ed Byrne should be commended for this action which may lead to a greater understanding of the possibilities of a new line of communication.

**Naked Realities**

**Dear Editor,**

To the “nauseated” Farley resident who wishes to point out that being a “liberated woman” entails much more than equal job opportunities and seeking admission to law and med school. If women are to alter this “man’s world” to a “person’s world”, then certain naked realities must be faced on the road to liberty. There is, unfortunately, the Farley resident and others like her, the accompanying sexual element—honest, aboveboard, un Trident sexuality (see MS., Magazine). Yes, we have it. However, this reality actually benefits men as well as women, and marrying a man with a woman as myself, that W.L., will. Women (Catholics especially when they are “known” on the basis of religious and spiritual life to anyone without spiritual god) but alas, it may be that a woman cannot be liberal and still cling to her Catholic morals (see Time April 28, 1975). The antics at Farley are not to be played down in comparison to what goes on at more progressive colleges, e.g. Stanford, Vassar, Wesleyan, Teachers College. I am sure the Farley resident will be “nauseated” to learn that Stanford actually has co-ed dorms, because it is a Catholic college. Catholic as in no commitment behind it.

Let me illuminate a few fragments of reality for Mr. Kearns. Admittedly, there are a few dimwits who go around “fornicating” (to quote a well known campus authority) without punishment. However, there are also some people leaving this place every year, and marrying people they “know” on the basis of religious and spiritual life, and a lot of them don’t last very long together. Co-ed living is not an answer to the problems, but I believe that it is certainly more than opportunity to cope with constantly and in a random fashion. Further, current literature in sociology and psychology indicates that if anything, there is less promiscuity in co-ed dorms, because it is a lot harder to rack out with someone you see at meals everyday if you just don’t have to with no commitment behind it.

Finally, I, seriously, very seriously in fact, question the validity of the claim that this particular institution holds any great esteem for the teachings of Christ. I’ve only touched on the obvious argument that they were most glaringly baseless; I hope the rest of the community has the ability to see through the rest. I personally consider the rest to be so weak as to be trivial.

**Southeast Asia Spectre**

**Dear Editor,**

Yesterday the President, who was recently honored by our university, went to another “safe” academic haven, Tulane in New Orleans, to declare the ending of the Indochina war, as far as America is concerned. The President went on a call for great national reconciliation and to declare that despite the saddened events in Dan Berigan’s Land of Burning Babies, the U.S. would still lend the world the yoke of totalitarian thinking.

The President is really asking for a two-bite spoon to help him wash the blood of fifteen years of darkness and deceit out of his hands. He is saying that Vietnam is worthless now as a political pawn; it is a dead land, in a sense to us to get on with more important business, like working hard, spending hard, thinking less. But just as this Asian ghost would not let Presidents Kennedy, Johnson, and Nixon go, it will not let go of Gerald Ford. America has attached itself to a tiger and cannot let go.

Prophecy disclaimed

**Psychic accused of arson**

NEW HAVEN, Conn. (UPI) - A federal judge ordered the seer who doubts he can predict fires and other events to face charges he created a phony arson scenario.

N. David Bubar, a Baptist minister and native of Blaine, Maine, whose last pastorate was in Stanton, Tenn., was one of 10 persons charged in a federal indictment Thursday with the $14 million March 1 dynamiting and fire at the Sponge Rubber Products Co. in Shelton.

Bubar, 47, who left the ministry in 1969 to "utilize his astonishing clairvoyant abil­ities," was a consultant and spiritual adviser to Charles D. Moeller, the president of the Spengler Company, Ohio, company that owns the Shelton plant.

"Most people express a polite and distant incredulity when they find out we're not going to evacuate the entire country," the observer said back from retirement last pastorate was in Stanton, Tenn., was one of 10 persons charged in a federal indictment.

Bubar "foresaw" the Shelton fire in a conversation with a woman employee at the plant a few days before it happened. He turned aside all adverse suggestions, telling newsmen later the prediction rested solely with his psychic powers.

But the cynics prevailed.

Moeller, who is the special agent in charge of the Connecticut FBI office, announced Bubar's federal indictment along with that of his Southern Supply Co., of Memphis, Tenn., $500,000 in February and later in March.

The federal indictment charged Bubar with conspiracy and maliciously damaging or destroying or attempting to destroy buildings and trees and explosives, that is dynamite, stemming from a massive attack he said they welcomed the refugees, but others were uneasy over the prospect of a massive influx at a time of high unemployment. According to Immigration and Naturalization Service statistics, annual immi­gration from all areas averages about 100,000, and 125,000 Vietnamese would amount to four months' normal flow.

House and Senate conference committees meanwhile approved a $337 million Vietnam aid bill. Sen. Jacob Javits, D-N.Y., said the bill would allow U.S. troops to evacuate Vietnamese but only incidentally to the rescue of Americans and only in areas where Americans were being evacuated.

That would permit a repeat of the Phnom Penh evacuation two weeks ago in which U.S. Marines secured a helicopter landing zone and took 276 Americans, Cambodians and third-country nationals.

Brown said the United States has evacuated about 14,000 Vietnamese and expects to keep taking more out as fast as possible by aircraft.

"Anything could happen at any minute," and the Vietnamese he is allowed out of Saigon, "I don't think we'll ever get the 125,000 evacuation doubts he can predict fires and other events.

React to outpouring

Refugees divide Americans

Give me your tired, your poor,
Your huddled masses yearning
To breathe free,
The wretched refuse of your teeming shore,
Send these, the homeless, tempest-tossed, to me.

Americans were sharply divided on how the "melting pot" of the world should operate in the impetus of refugees from Vietnam.

"I would certainly welcome them," Carol Sals of Houston, Tex., said. "I don't know how they will adjust. I don't know where else they could go."

But John Faltin of New York City said, "It seems we've got enough refugees here as it is." And Glen Owen of Lansing, Mich., said: "I'd burn a cross in their front yard if they moved next door to me."

In a spot check in scores of communities from coast to coast, United Press International found opinions that ran the gamut from frank hostility to warm acceptance.

Radio talk show announcer Joe Pickett of Indianapolis, Ind., who took a poll of his own, said his listeners appeared divided "about 50-50."

"Lots of them said it was humanitarian thing to do," he said. "About half said, 'Let's take care of our own first.'"

In New Jersey, where the unemployment rate is above 10 per cent and unemployment compensation is reported on the brink of bankruptcy, Mrs. Rose DeStefano of Brooklyn, N.Y., said: "They're human beings. How could you turn them down? They're going through hell."

"I'm sure those refugees will take care of our own first."

"We're supposed to be the melting pot," Thomas Campbell, 24, of Louisville, Ky., said. "It seems we've got enough refugees here as it is."

"Melting pot" of the world...to me...

"It is clear that this is merely a maneuver of the Ford administration aimed at shoring up its lackey."

"It is the first agreement that the Ford Administration is viewed during your senior year for the Navy's Nuclear Propulsion Candidate program. Along with $100 a month to help you with your living expenses. And on top of that you have full scholarship assistance in this new NROTC Nuclear Propulsion Candidate program."

We call it "The New Colossus," but quickly added: "This country supposedly has immigration laws and why should we lift them for the Vietnamese or any other nationality?"

Almost in the shadow of the Statue of Liberty, Alphonse DelStefano of Brooklyn, N.Y., said: "They're human beings. How could you turn them down? They're going through hell."

PARIS (UPI) - The Viet Cong's Provisional Revolutionary Government yesterday rejected Saigon's offer of an unconditional cease-fire and proposed a "dialogue" with the United States, designed to set up an "independent and neutral" South Vietnam.

"I am sure that those refugees will take care of our own first," one of the merchants said. "I am sure that those refugees will take care of our own first," another said.

New US trade agreement underway with Romania

WASHINGTON (UPI) - President Ford asked Congress Thursday to approve a new trade agreement giving Romania "most favored nation" status in U.S. markets and representing a major effort to improve American relations with the communist nation.

The agreement was signed April 2 by representatives of the two countries and the White House said it was the first agreement negotiated under trade reform legislation passed last year.

Ford made his request for approval in letters to the House and Senate which were accompanied by a copy of presidential proclamation extending "most favored nation" treatment for Romanian products exported to the United States.

Romania has been regarded as the most independent of the Soviet Union's allies in foreign policy. Former President Nixon visited Romania — the first American president to travel to an East European communist state since World War II.

Now, full scholarship assistance for your junior and senior years, plus chance to become a leader in the nuclear energy field.

Tuition: books and educational fees are all included. In this new NROTC Nuclear Propulsion Candidate program. Along with $100 a month to help you with your living expenses. And on top of that you have full scholarship assistance in the fast-growing nuclear energy field.

To qualify you must have completed one semester each of calculus and physics, or two semesters of calculus and have a B average or better.

Depending upon your performance, you will be interviewed during your senior year for the Navy's Nuclear Propulsion Candidate program. Also with $100 a month to help you with your living expenses. And on top of that you have full scholarship assistance in the fast-growing nuclear energy field.

For full details on this new NROTC Nuclear Propulsion Candidate program; phone or see your local Navy recruiter.

Be someone special in the Navy.

Students occupy building

PROVIDENCE, R.I. — Black and Latin American students seized the main administration building of Brown University Thursday to demand a better deal for minorities on the campus of the 213-year-old Ivy League institution.

About 500 other students, including several hundred white sympathizers, gathered near the building, which is a national historical landmark built in 1770. At times they sat on the wet grass in silent vigil and at other times clapped and chanted “Black versus Brown.”

About 40 students occupied the building without incident at 8:30 a.m., eight workers inside left when the demonstrators entered, but two college deans stayed. A spokesman said there would be no damage to property. A security guard said the doors to all buildings were locked.

Demands for minorities entered, but two college deans left when the demonstrators approached the building without incident at 9:00 a.m. Sheriff Don Striepke said Wednesday that traces of blood were found at a remote roadside by a very strong young suspect, and you can take it and it is that strength, he said.

He also said he believes the killer was written of his intended random killing of two young women there and planned to go to Grand Junction, Vail, and Aspen Colo., to Santa Fe, N.M. to investigate similar killings.

The mysterious Zodiak killer has claimed a victim in the San Francisco Bay area in recent years, though police have confirmed only six.

The Zodiak killer has claimed over 30 random killings on the West Coast, some in the San Francisco Bay area in recent years, though police have confirmed only six.

A list of demands aimed at upgrading privileges and services for minorities on the faculty and in the student body was read by William Jackson, a blue-jean clad student standing on the front steps of the four-story brick building above him, an effigy hung by its neck from a third floor window. He said it represented an attack on the university that might be oppressed.

Among demands were calls for complete legal and academic amnesty for the demonstrators, a greater proportion of black students to be admitted, and increased financial help for blacks and Latinos.

“At least there are those of us who are going to occupy the building until the university agrees to our demands,” said Jackson. “We demand that our proposals be responded to.”

Maurice Glicksman, dean of the graduate school, began meeting with Organization of United African Peoples representatives after the takeover of the administration building. The school has 5,120 students. The two administrators inside were identified as Tom Lechel, acting dean of the college, and James Kelley, dean of freshmen, both of whom were said to be well liked. Richard Marker, a Jewish chaplain, also remained in the building as an observer for the American Civil Liberties Union.

Students at the school boycotted classes last week in support of alternative budget demands. The administration’s proposed budget was passed without a change at a meeting of the Board of Trustees Saturday.

Black students claim the tight budget will affect scholarships for the needy and the admission of minorities.

Measles outbreak

Seizes Notre Dame

Zodiac killer believed obsessed

by witchcraft in ritual murders

SANTA ROSA, CALIF. — Sheriff Don Striepke said Wednesday he believes the “Zodiac” killer is obsessed with witchcraft and that there are similarities between the killings in the San Francisco area and the letters filled with twigs, with two stones lying inside one of the rectangles.

Dr. Robert Thompson, of the San Francisco Medical Examiner, stated that the sickness is communicable during the two-day period before the development of the rash. The sickness is spread through the air, by kissing, and by using other people’s glasses. It usually takes 10 days after the time of exposure to develop the symptoms. These symptoms include a slight sore throat and a stuffy nose.

Many students have developed cases of the three-day measles disease over the past few days. As of today, there were 13 cases of measles confined to the Notre Dame Student Infirmary with a number of other cases in student dorms.

The meanders last anywhere from seven to 10 days with a rash for three to four days. While the sickness is a nuisance, Thompson pointed out that the meanders are generally not serious and should not greatly interfere with a student’s ability to study. He added that it usually does not cause any permanent effects.

CATERING FOR ALL OCCASIONS
Government suggests new water allocation controls

WASHINGTON (UPI) - Water prices may skyrocket and powerful energy industries may outhead farmers for limited supplies if price alone is allowed to determine who gets water in the future, experts warned.

New government allocation controls may be needed to ensure a fair distribution of vital water resources, they said.

Assistant Interior Secretary Jack O. Horton said his agency, along with others, would have to play a role in determining water prices. "Unless we do something, we'll see something like we see in natural gas," he said.

Dakota Gov. Richard F. Kneip. noted that "not only is our country faced with a surplus of water, but we are not using it at all." He said farmers are now 'outheading' water supplies by virtually every type of expanded energy production - proved a major concern of conference participants.

Other issues raised in the closing session of the three-day meeting included charges that many federal water programs are a failure and demands that the government should be given a larger voice in policy making.

"The resistance to expanding the federal role is increasing," said Kneip, who headed a panel on the role of federal water programs.

The conference, sponsored by the cabinet-level U.S. Water Resources Council, was the first of its kind in 15 years. It drew experts from across the nation, to consider relationships between water and energy, food, environment, flood damage, transportation, industry and government.

Dr. Fayex Sayegh, a member of the University of Colorado, head of a panel on flood damage, criticized the "delinquent" performance of federal agencies charged with water policy responsibilities. He said even the Water Resources Council was not doing its job.

Similar criticism came from Laurence R. Jahn of the Wildlife Management Institute, head of a seminar on environmental issues, who said federal agencies and regulations pay much too little attention to the need for environmental planning.

Democratic Leader Mike Mansfield expressed concern about the high ratio of South Vietnamese to Americans being taken out of the country.

Following the House Armed Services Committee action, Mansfield announced that a final vote on the contingency measures would be delayed at least until Wednesday. Speaker Carl Albert said the same was true of a House measure to authorize $471 million in economic and humanitarian aid to South Vietnam.

Leaving both houses said they would hold off action until the Wash­ington meeting around which substantially more Americans have been removed from Vietnam.

At the White House, Republi­can congressional leaders said after having breakfast with Ford that the President assured them Americans staying behind in Vietnam were being kept to the "barest minimum number."

Sen. Clifford Case, R.N.J., quoted the President as saying "about 1,500 Americans would be left in Saigon by this evening to carry on a skeleton operation."

Rejection before the Senate would give the President limited authority to use U.S. military." I think we ought to consider the 'chess game is over.'" The White House reported that substantial American forces would go along with its appropriations, which Monday approved $186 million in military aid and $165 million in economic assistance to South Vietnam.

Cultural bargaining discussed at Notre Dame

The Executive Committee of the American Association of Professors (AAPP) and the Faculty Senate met last night at the University Club to discuss the issue of collective bargaining and how it might relate to conditions at Notre Dame.

The program consisted of viewing a film on collective bargaining prepared by the National AAPP and discussing the contract negotiated by the AAPP at Temple University.

The tape, entitled "The AAPP and the Collective Bargaining in Higher Education," presented a documentary with $100,000 in support of Joseph Duffy, the General Secretary of the AAPP, and Woodlief Osborne, the AAPP's Director of Collective Bargaining.

According to Edward Truman, local chapter president of the AAPP, they stressed that the concept of collective bargaining was inappropriate for higher education and indicated that collective bargaining should, instead, be concerned with such issues as academic freedom and due process. They maintained that the AAPP policy sees collective bargaining as a voice in matters of educational policy and faculty status.

Osborne cited the Temple contract, with its emphasis on peer evaluation and mechanisms for resolving faculty-administration disagreements, as one of the best examples of a negotiated at a major university.

107 Dixie Way North - Just north of Randall's Inn
Military and civilian transport planes flew into Guam almost hourly Thursday, bringing thousands of Americans and Vietnamese fleeing the Communist advance toward Saigon.

The planes landed 75 to 200 evacuees at a time on the 30-mile-long Pacific Ocean island, a U.S. territory. For every one American who was evacuated, there were about 5 Vietnamese.

Pentagon sources said intelligence reports indicated Communist fighters had moved surface-to-air missiles to almost within bombing range of Saigon, raising a new threat to the airlift.

The Soviet-manufactured SAM missiles could close Saigon’s Tan Son Nhut Air Base—where the air force and Army’s 3rd Air Division teams got to within 20 miles of the city.

A Ford administration spokesman in Washington said 5,000 persons a day are being flown out of Saigon and there are enough aircraft to handle double that number, if the U.S. Embassy in Saigon can clear potential obstacles.

The Vietnamese and Americans are now arriving at Guam’s Andersen Air Force Base, the launching point for bombing attacks on Indochina during the U.S. military involvement in Southeast Asia.

U.S. congressional sources estimated there were 4,000 Americans in Vietnam before the Communist offensive, which began two weeks ago and moved into high gear this week.

President Ford had ordered the number of Americans in South Vietnam reduced to less than 1,000, a figure considered small enough to be flown quickly if Saigon falls to a sudden Communist attack.

A U.S. Embassy source in Saigon said some thousands of “official” Americans in South Vietnam will be flown down to “around 500” with the rest.

In Washington, L. Dean Brown, Under Secretary of the Air Force, said about 12,000 Americans had been flown. He said “some Americans, have been flown out of the country."

The plane was not hit, but Thai border patrolmen fired shots into the plane just as it was landing.

The plane was first directed to Clark Air Base in the Philippines. But 4,000 evacuees arrived there Tuesday to bring the total number at Clark to 7,000, some living in tents when the movie theaters, dormitories and other buildings were filled.

Despite the airlift, a backlog of around 5,000 persons still remained in the main Saigon staging area for the emergency evacuation operation, an area dubbed “Pentagon East.”

Commercial aircraft of several nations were leaving Saigon for Hong Kong, Singapore, Bangkok, Manila and other points all fully booked, or nearly so.

The Senate and House approved separate plans to provide up to $2 billion for refugee relief and for limited use of troops to evacuate Americans and South Vietnamese from Saigon.

Guam Gov. Ricardo Bordallo predicted as many as 150,000 Vietnamese refugees could be brought to Guam: an island of nearly 67,000 people, in the next few weeks.

The airlift was first directed to Clark Air Base in the Philippines. But 4,000 evacuees arrived there Tuesday to bring the total number at Clark to 7,000, some living in tents when the movie theaters, dormitories and other buildings were filled.

**Communist forces control Cambodia**

By United Press International

Communist-led Khmer Rouge forces Thursday claimed to have all of Cambodia under control but refugees continued to pour across the border into Thailand, officials said.

One group said they were Khmer Rouge border guards killed 25 refugees trying to escape.

Some were civilian contractors who previously worked in Vietnam and came back from as far away as Alaska, Saudi Arabia and Korea to pick up waiting wives or marry girl friends they left behind.

Terrorists bomb German Embassy

**BONN (UPI) — The West German government withheld comment Thursday on Chancellor Ludwig Erhard’s decision to turn down demands by terrorists who took over and later blew up the German embassy in Stockholm with hostages inside.**

“We’re not saying anything just yet,” a government spokesman said. “It’s possible we’ll have something to say a bit later.”

Schmidt, a Social Democrat, had set up a special “crisis staff” to debate what to do about the guerrilla demands.

Sources in the opposition Christian Democratic party said the government was likely to make a statement in parliament Friday explaining its decision to reverse previous policy and take a tough stand.

Schmidt ordered his ministers to tell the leaders of all four main political parties how far the government would go in what a government spokesman termed a “crisis conference at the federal level.”

Government officials likened the conference to the “crisis staff meetings” Schmidt set up during the three days of celebrations and mourning which began by the rebels about five years of warfare as Phnom Penh fell last Thursday.

The entire country had been “liberated.”

The place is in chaos," UPI reporter Barbara Larson said. "People are jumping from windows, and rioters are fighting to cut off their escape."

There was no word on the fate of West German Ambassador Dietrich Stoecher. The place is in chaos," UPI reporter Barbara Larson said. "People are jumping from windows, and rioters are fighting to cut off their escape."

There was no word on the fate of West German Ambassador Dietrich Stoecher. The place is in chaos," UPI reporter Barbara Larson said. "People are jumping from windows, and rioters are fighting to cut off their escape."

There was no word on the fate of West German Ambassador Dietrich Stoecher.

The street was bailed as darkness as the explosions blew out street lights and left the block one. One police officer was injured in the blasts. Relatives of the hostages who had arrived in Stockholm from Germany hours before went to the building Monday when they saw the building go up in flames and were away by police.

Quarterback position scrambled

by Ernie Turriero

For the second time in as many years Dan Devine is faced with the problem of finding a starting quarterback for his football team. Last year at Green Bay, Devine went through two quarterbacks (Jerry Tagge and Jackie Con-cannon) before he frustratedly resigned the position to John Haid. Devine has his work cut out for him once again, as he seeks to replace four-year Irish starter Tom Clements. Only this time, he does not have any draft choices to barter away if all fails.

"You've got to understand," Devine explains, "that we have lost 14 starters from last season. It's (ought to replace someone with a caliber of Tom Clements. We are trying to give everyone a chance to play. But it is tough in the spring because many of the players have late classes. The coaches are also busy trying to implement the new offense. Under the circumstances, I think that Rick (Slager) has done a fine job. But the wait is a long one in the fall. We will be able to tell a lot more then."

But Frank Allocco separated his shoulder in the squad's second scrimmage. Allocco was running neck in neck in the battle for the starting quarterback position. "He is out for the remainder of the spring," Devine said. Why? Because Frank and Rick are both like Cannon. Both like to roll out and exercise the open field running. Rick Allocco has a two inch height advantage over Slager (6-1 to 5-11) and he also may have the stronger arm. On the other hand, Slager throws better on the run and his open field running is a definite plus. Rick also has two years of eligibility left as opposed to Allocco's one. Frank wants to come back and give it another crack. But everything is contingent on how well his shoulder heals. He does have more game experience than Slager. Yet that should not make much of a difference in Devine's decision of who is to start.

Freshman Joe Montana is in the back-up man behind Slager. Though he saw only junior varsity action last season, Montana's high school record speaks for itself. He threw 56 completions in 122 attempts for 1,162 yards and nine touchdowns, while running for 374 yards and four touchdowns at Haggard High School in Western Pennsylvania. It was there that he was rated "the best arm in Donora, Pa., since Stan Munizal."

There is no doubt about the strength of Joe's arm. Yet his running ability is not up to the capacity of a Slager or an Allocco. Nevertheless, Montana has a real good shot at the starting berth.

Behind Montana are freshmen Tony Forystek and Mike Falash. Both came to Notre Dame after outstanding high school careers. Forystek led Divine Child High School in Dearborn Michigan to three straight state titles while Falash captained Highland High School in Federal, Idaho to state championships his last two years. Falash was the most impressive of the young quarterbacks during the junior varsity season. He appears to have a good combination of all the tools. But there is no doubt that Forystek possesses the best arm of all the Irish quarterbacks. Yet he is hampered by the fact that he is mainly a drop back type of quarterback.

Irish hoping for injury-free scrimmage

by Bill Brink Sports Editor

Spring football drills enter their final stage this week, beginning with the fourth scrimmage tomorrow afternoon in the Notre Dame stadium. This spring has been appa- rently that Head Coach Dan Devine's main concern is trying to emerge from tomorrow's scrimmage with enough healthy bodies to field in next Saturday's annual Blue-Gold Game.

In the spring's past this week, it meant on the Irish forces. But for the first time this spring, Notre Dame's defense was down three. Tight end Robin Weber's career was ended with a career-ending injury during offensive tackle Barry Woobekenberg was suffering from mononucleosis, and defensive back Tim Simon was giving his injured eye more time to heal.

Things only got worse once the hitting started Thursday. As Irish linebacker Tim Parise pulled a hamstring in the final drill, defensive tackle Steve Quelh hurt his ankle.

THE STARTING quarterback job appeared to be in the hands of Frank Allocco, until he was hit and separated his shoulder two weeks ago.

NOW RICK Slager is at the helm, but the position is still very much up for grabs.

The saying is that at Notre Dame, you can't afford to get in injured as long as there's always someone as good as you waiting for their chance. Certainly Devine and his coaches are hoping that is true. And with so many injuries they are getting their chance to see some of the reserves in action.

Rick Slager and Joe Montana have moved up into the top two quarterback slots, and former QB nominee Ted Burgmeir has been switched to wide receiver.

Forystek may not fit the style of Devine's offense.

Sophomore Jerry Moraitis and junior Curt Henehan are the third string offense. Moraitis is the smallest Irish quarterback (6-3), thereby his size is a factor. Moraitis has good speed and a strong arm. His favorite target in high school was Pete Demmerle, is the team's only fullback. But Falash expresses cautious optimism. "We have a long way to go until the fall, if the fair practices really tell anything."

"It sure is a lot different than last year," says Falash.

The fall practices will really tell us where things are. But Falash is at guard now, replacing guard in the starting lineup. Some of the reserves in action. But Falash is cautious. "We are aiming for the national title this fall. But Falash expresses cautious optimism. "We have a long way to go until the fall, if the fair practices really tell anything."

One of the keys, if Notre Dame is to challenge for the national title in 1975, will be the ability of Devine to get his man capable of generating the offense. It does not take long to think back to the 1965 and 1971 seasons when the Irish stumbled through the campaign without a bonafide offensive general. Our solution most likely will be to fill the needs of the quarterback rather than attempting to mold the quarterback to the needs of the offensive pattern. As a quarterback watchers point out, the fact that Notre Dame has had a tradition of fine offensive leaders is something that Devine doesn't need to handle on the spring game before his sophomore year. That the favorite to fill the vacant position is John Huarte story, the man who separated his shoulder the spring of his junior year and came back the next fall to win the Heisman Trophy. Touch Devine may be hoping that lightning can strike twice in the same place.
