Roemer calls new position "most challenging, satisfying" by Bob Mader
Senior Staff Reporter

Dr. James Roemer, the University's new dean of student affairs, expressed his views on sexuality, alcohol regulations, campus security and his relationship with the student body in an interview yesterday.

Roemer called his position "the most challenging, yet the most satisfying" one he has held.

"I've been in tough situations before as a lawyer, but there are greater human demands in this job," he commented. "I've been in tough situations before as a lawyer, but there are greater human demands in this job."

Roemer said the human sexuality issue is "the most complicated of all the internal issues I've run into.

He said the student manual affirms the belief that sex outside marriage is not consistent with the traditions of the school. He pointed out that the lawyer he feels the issue would be simplified if the regulation was more specific in its language.

"If you got caught shoplifting in K-Mart, you'd have to go to court," Roemer said. "We won't treat this as a minor matter.

Roemer called the campus "one of the most unsafe places there is for a kid." He said he has not had enough time to formulate an official plan for improving security, but recommended that bikes be locked in well traveled areas of the campus.

Works with wife

Roemer's wife, Mary Ann, was present throughout the interview. "I've been in tough situations before as a lawyer, but there are greater human demands in this job."

Roemer explained that the current policy permits students to consume alcoholic beverages in their rooms as long as they are not disorderly and do not disturb others.

He is asking hall rectors for feedback on a proposal which would give the dorms responsibility to look into academics, residence, community, finances, and disciplinary issues.

The residentiality committee, like the other four-member committees, COUL was divided into, faced the problem of covering a great deal of important ground in a small amount of time with members who had many other responsibilities.

"We have gone in depth on each subject," Mary Ann Roemer said, "but I think we did a fairly extensive amount of research and we provided a summary of the recommendations.

The committee responded to oppositions and presented arguments to support the recommendations. "The committee on academic programs will state, "There were agreements and disagreements within the committee. We had a list in the beginning of possible topics and narrowed it down, cutting out what was being considered by other committees."

The subcommittee broke down the main topic into nine basic topic areas of residential life at Notre Dame. These topic areas are Hall Staff, Academic Programs Within the Hall, Housing, Off-Campus Life, Community, University Village, Ministry and Disciplinary Logic.

Each topic area begins with general background on the area that was studied, followed by the committee's recommendations and concluded with the implications of the recommendations.

Failing are summaries of each topic area, the recommendations and their implementation.

Hall Staff

The residentiality committee's report on hall staffs is cited in the recommendations. "The committee on student priorities (COUP) had proposed. These were that the University maintain a Student Affairs staff among whom Catholicism predominated, that they be given to competent members of the Congregation of Holy Cross, and that consideration be given to ways of enhancing the understanding of the position of the rectors.

The recommendations played a unique role in the COUL committee's own recommendations. The COUL committee criticized that the role of rectors was not as complex and demanding that the success of the system of residence was the responsibility of the rectors. This tradition is dependent upon how the better rectors fulfill their positions.

Roemer said the committee's recommendations stated, "Rectors, therefore, as well as all other members of the hall staffs, and Student Affairs program, need to be selected according to carefully defined criteria which detail as specifically as possible the expectations held of them.

The report stressed that selection of Student Affairs personnel should be as rigorous as that of rectors. "The report also noted that the performance of personnel should be regularly evaluated through a process that included student input.

The final report recommended educators who enjoyed the University relationships with students should be encouraged to join the Student Affairs staff.

Implementation of these recommendations was based upon the fact that rectors serve as life models for many residents of a hall, but that most belong to religious orders. In view of the fact that many students do not choose religious life, the committee felt that persons should be included in the Notre Dame on-campus residential population. Husband-and-wife teams could serve as life models and should be encouraged to join the Student Affairs program.

Academic Programs Within the Hall

The subcommittee reviewed three hall academic programs. Within the halls studied, the courses taught (Freshman Seminars, Humanities and Theology) were supported by rectors and students. As a result the subcommittee recommended that the administration should encourage the growth of these in hall class styles.

The committee felt that the intellectual role of the rectors could be expanded by the presentation of expanded academic courses.

Darby's Place opened for business in the basement of LaFortune at midnight last night. Darby's, named after Fr. Griffin's cockerspaniel Darby O'Gill, provides a place where students can meet socially after midnight.

Tom Daley, manager of Darby's, stressed the point. "We want to create an atmosphere that will allow people to socialize, but still be able to study." Darby's Place will be open from 12 to 4 a.m. Sunday through Thursday, and coffee and donuts will be available.

Volunteers are needed to work at Darby's during the week.

Earthquake hits Turkey

NEW YORK (AP) — Earthquake hits Turkey.

LICE, Turkey (AP) — Rescue teams worked Thursday into remote villages of eastern Turkey on Sunday in search of survivors of an earthquake that officials estimated killed at least 1,500 persons. It feared the toll could be higher.

Premier Suleyman Demirel flew to the provincial capital of Diyarbakir and pledged, "No one will be left starving or homeless." Officials said continuing tremors, though comparatively small, were keeping survivors in a state of panic and hampering efforts to find the injured and to unearth bodies.

The earthquake, which measured 6.8 on the Richter scale, was felt at noon Saturday along the quake-prone Anatolian Fault in eastern and southeastern Turkey, and some Black Sea provinces. It toppled scores of houses and set off fires and aftershocks.

The Richter Scale is a measure of ground motion as recorded on seismographs. A reading of 6 indicates a severe quake and a 7 means a quake capable of causing widespread, heavy damage.

The semiofficial Anatolia News Agency quoted provincial officials as saying more than 450,000 people lost their lives in Lice, a town of 8,000 in Diyarbakir province, the quake's epicenter. The agency said more than 1,000 other people were believed dead in surrounding villages.

The Red Crescent Society, Turkey's Red Cross, said 17 tons of relief material — food, medicine and relief goods — had been rushed to Lice in military planes. It said two mobile hospitals had been set up in the town to care for those too badly hurt to be moved to the state hospital in Diyarbakir.

Reports Saturday put the number of dead at 1,537. Officials predicted Sunday it would go beyond the 1,500 who were killed as civilian and military rescue teams cleared paths into disaster zones.

A 1939 earthquake killed 36,000 people in the eastern province of Erzincan. A 1960 quake at Varto, not far from Lice, took 2,964 lives.

The Observer is published Monday through Friday and weekly during the summer session, except during exams and vacation periods.

The Observer is a product of the students of the Univ. of Notre Dame and St. Mary's College. Subscriptions may be purchased for $10 dollars per semester (10 issues) or $18 per academic year. A subscription covered by an I.D. card will be mailed to the address given.

New dean interviewed

Changes in Business College discussed

by Christie Herthy

The College of Business Administration will "focus on discovering new teaching methods to effectively cope with increased enrollment, said the college's new Dean, Brother Leo Ryan.

Faced with a 3,129 business major turnover, including 50 percent drop in registrations for seats in already overcrowded classrooms, the college is bent on handling this year's 74 percent student increase.

"We have pared the sections of the courses offered and are using all classrooms to capacity," Ryan affirmed. "We need to examine new methods, technology, and approach in managing our classrooms."

Appointed by faculty acting dean Dr. Yusaku Furuhashi, Ryan was a former national president of the Catholic Business Education Association, and a member of the board of directors of the Alpha Kappa Psi foundation for the promotion of business and business leadership.

He outlined his plans for expansion.

Although primarily occupying the college's present offices and buildings, Ryan foresees that the business offices will be located outside these buildings for more space. He added that senior faculty members joined the staff this year and the 50 percent of the college planned to expand the staff further. Ryan emphasized the need for retaining full-time teachers.

"In our given set of circumstances, the college's primary need for additional faculty is not the number of classroom seats, but the need for additional faculty but numbers are not the answer," he said. Ryan added that "We must examine the curriculum and determine if there are effectively, using what we already have." Impressed with the faculty, Ryan remarked that "the hallmark of this college and of this university." But such "accessibility," he continued, "has been paid at the price of the faculty's own professional growth and development."

He emphasized that the strength of any college is in its faculty. "When you possess a faculty that is first-rate in this field and you have the esteem of your students, you will have the respect of the community," Ryan said it will just mean more work for some of those already so engaged.

No change in proceedings have been instituted though as classes were drawn up in the spring and Ryan only recently appointed. During the course of this year, however, Ryan hopes to be able to "assign a faculty member to each student this year and the faculty members who joined the staff this year and the 50 percent of the college planned to expand the staff further. Ryan emphasized the need for retaining full-time teachers."

S.U. plans (continued from page 5)

Administrative leadership has been difficult in the recent past because of lack of continuity. Dean Murphy resigned in May 1974 and Acting Dean Dr. Furuhashi held the job until Ryan's appointment a year later. Ryan is looking forward to attending various seminars this year, one being a nationwide gathering of new business deans which will reflect on the enrollment pressures affecting other business schools.

Under the direction of Dennis Pijar, "Will focus on the area of the bicentennial and the 1978 political faculty research." The commission has also introduced the idea of a "bicentennial art" and 

Northwestern University. The Student Union has also yet compiled a schedule of concerts for the fall semester.

"Concert scheduling is such a highly uncertain business that you have to let the ink fully dry on a contract before any announcements are made," explained Birsic. "If things go as we expect, we will present one of the best concert schedules in the past three years. The bicentennial schedule will be released later this week or next week."

The Student Union has also taken tighter control of the clubs allowed on campus. Last year, the Student Union decided that the maximum number of clubs on campus was too many. To alleviate this, the university has a new policy which states that clubs are to have a "bicentennial" meeting, which will include the faculty research.

He also added that "bicentennial art" and "bicentennial art" and
Welcome, Enthusiasm

When Dr. John M. Duggan arrived on the St. Mary's campus to assume the duties of College President this fall, he brought with him something that is indispensable for the growth and maintenance of any institution, yet something that St. Mary's College has not experienced for the past few years. That something is enthusiasm, and it was clearly evident in evidence Sunday during his inaugural ceremony.

In his address Duggan channelled that enthusiasm into an idealistic appraisal of St. Mary's as a small, Catholic, women's liberal arts college. This assessment is valid, and deserves repeating; the St. Mary's community must first see where it is in order to look toward where it is going.

Duggan noted in his address that the commendable qualities of "civility, openness and unpretentiousness" which prevail at St. Mary's need not encourage a certain passivity, a lack of serious questioning of the status quo, a withdrawal from the introspective and often painful processes which characterized intellectual growth.

Dr. Duggan has assumed his duties as president in the midst of a year of growth for St. Mary's College. The College is currently being introduced in the largest freshman class in its history, and is seeking the remaining funds necessary to construct a new athletics complex. Meanwhile, the Nursing Department, itself only two years old, has moved to larger facilities in the Campus School. Along with this expansion, will come growing pains, which the College community must overcome together.

In this, his freshman year and in his successive years at St. Mary's, let all of the SMC community offer cooperation to its new president. Welcome, Dr. Duggan, and welcome to your enthusiasm.

S.U. reveals ‘75-'76 plans

by Lonnie Luna
Staff Reporter

The restructured Student Union will attempt to make use of its new system this year as it announces its plans for the 1975-'76 school year under the direction of Tom Birsic, Student Union director.

"Last year the Student Union ran into problems with the separate commissions functioning too autonomously. This year we hope to provide more direction and coordination from the top," stated Birsic.

As a result of last year’s financial deficit, the Student Union underwent vast financial restructuring beginning last May and extending through the summer, explained Birsic.

"Under the new system, we will be able to record all that is spent," said Birsic.

The Student Union officers are also trying to establish lines of communication and responsibility within the Student Union structure. This type of organization facilitates clear and efficient channels of action, added Birsic.

"We are determined to keep Student Union open to every student who has a desire to get involved. In fact, we badly need personnel. One of our biggest problems right now is that of being understaffed. We encourage people to stop by on Activities Night," stated Assistant Director Jamie Cain.

The Student Union has also announced tentative plans for this semester. The Cultural Arts Commission, under the direction of Chris Mahon, has arranged the following schedule of movies.

- Sept. 19-20: Chinatown
- Sept. 23-24: Stagecoach
- Oct. 9-10: The Conversation
- Oct. 14-15: M
- Oct. 19-23: Ingmar Bergman Film Festival
- Oct. 28-29: King of Hearts
- Nov. 4-5: The Servant
- Nov. 11-12: All Quiet on the Western Front
- Nov. 19-20: The Parallax View
- Dec. 2-3: Lost Horizon

The Student Union will again sell patron cards for $5. The purchase of a patron card entitles the bearer to see all the above films with no further charge. The season pass schedule begins with Chinatown.

Other plans include the Midwest Blues Festival, scheduled for Nov. 14 and 15.

The Social Commission, headed by Kathy Smouse and Charlie Moran, are preparing for Homecoming, the weekend of the USC football game, Oct. 24 and 25. Homecoming Chairman Dave Shaheen and the commissioners have begun to search for a location for the Homecoming Dance slated for Friday, Oct. 24.

The Social Commission will again offer a ticket package consisting of a combination of football, concert and dance tickets. Also, due to popular demand, the Social Commission will again sponsor the Quikie Shuttle to the Michigan bars.

Services Commission, under Casey Nolan, has been renting and distributing refrigerators, compiling the Freshman Register, selling unpainted furniture and operating Student Union Book Exchange in La Fortune.

"The Services Commission has the majority of its work during the first two weeks of school, which makes things quite hectic," explained Birsic.

The Services Commission will again sell theater packages soon.

The Academic Commission will continue to work on their fall semester plans. (continued on page 3)

Coed-off-campus housing reviewed by C.O.U.L.

(continued from page 1)

Stressed that however logical this fear may seem on the surface, it has not been substantiated in fact. The available data on this subject led to the conclusion that sexual activity in coeducational residences may well have decreased when compared to that which occurs in sex-segregated halls," the report noted.

The recommendation of the committee on this topic area was as follows: "That the Office of Student Affairs be instructed to begin the necessary planning year so as to implement a coeducational student living program."

In regard to the implementation of this program, the committee recommended that the Keenan-Stanford complex be designed as coeducational halls.

The committee noted that Keenan and Stanford house approximately the same number of students (Stanford 286, Keenan 301) and would provide equal size in male and female populations. Also pointed out was the fact that because Keenan and Stanford are separate and complete halls connected by common areas, the conversion to a coed residence center could be accomplished with no physical changes.

Off-Campus Life

Concerning off-campus life, the committee recognized the fact that a significant minority of students will have to live off campus in the future. As a result, the committee stressed that the University had a responsibility to the neighborhood near the campus.

The recommendations which the report presented urged that the University fulfill as quickly as possible the graduate student housing commitment it made when Lewis Hall was converted to an undergraduate residence. The resulting increase in beds on campus would lessen the problem of student residents. The Northeast neighborhood which is an older, integrated neighborhood which is struggling for stability. Student pressure on housing drives rent up, as well as causing conversion of family housing. Students can be of great value to the neighborhood, but they need University support. We feel that a joint student-trustee committee on Neighborhood development would be of great advantage."

The report went on to say that such a committee of trustees could handle many problems, including the driving up of rents, police protection, zoning and private apartment construction.

Students Off-Campus

The residentiality committee pointed out that while many people think of life off campus as being unpleasant, the committee believed that there were many positive aspects.

"Off-campus living is a challenge, one we all have to face after graduation, and it can be extremely rewarding and educative when shared with others," the report stated.

It pointed out, however, that the impetus for sharing was not being generated by the students or their parents.

As a result, the committee recommended that the students and South Bend residents should be working together to solve common problems such as crime, zoning and community relations.

As a means of implementing this cooperation, the report stated that the heads of neighborhood groups such as Hartz Heights and the Northeast Neighborhood could be sent a mailing list of students living in their area so they can notify the students of meetings in the neighborhood.

The committee also recommended that a separate alphabetical listing by street name could be drawn up for off-campus students to enable them to contact other students in their area. Also proposed was an off-campus ombudsman service.

Other Topic Areas

There were other topic areas which the C.O.U.L. subcommittee studied. One topic area involved a detailed listing of physical improvements to the University Village facility for married students. The report called for more attention to be focused on the facility by the University. Improvements ranged from structural storage spaces, repair of heating, to environmental/lack of shade trees on property, to community group insurance rates and aesthetic facilities.

Off-campus ministry was investigated. The report proposed that resident chaplains be placed in the Notre Dame apartments and Campus View. It also called for the increased involvement of Campus Ministry with local parishes and neighborhood centers to reach the off-campus student population.

For expert calculations, count on these Texas Instruments

Scientific calculators especially for you engineering students, anyone! With the need of a machine with the expertise to solve the most complex problems. All lightweight portables. All with AC adapter/charger.

The New SR51A 149.95

It's programmed for engineering conversions! The full-function scientific calculator you've been waiting for.

• Performs all the classical slide-rule functions plus linear regression, mean, variance and standard deviation.
• Features algebraic keyboard with dual function keys that increase the power without increasing the size.
• Has bright 14-character display—display provides overflow, underflow, error indications.
• Three user accessible memories permit storage, recall, sum, product operation.
• Plus many, many more features which are new and unique to this machine.

(Not Shown) The SR50A, 99.95. A pride of Texas Instruments. Provides all the classical slide rule functions—simple arithmetic, reciprocals, factorials, exponentiation, roots, trigonometrics and logarithmic functions, all in free floating decimal point or scientific notation. 14-Character display.

The SR16 69.95

A multi-function scientific slide-rule calculator.

• Solves simple arithmetic as well as complex technical problems.
• Includes keys for expanded calculating capabilities.
• Displays numbers in full floating decimal point or scientific notation.
• And much, much more! For so economical a price!

Gallen assumes Murphy Center directorship

Rev. John J. Gallen, S.J., former associate嗄副牧主教 of pastoral theology at Woodstock College in New York and an assistant director of the Murphy Center for Liturgical Research at the University of Notre Dame, has been named as the first president of the newly formed North American Academy of Liturgy, succeeding Rev. James D. Shaughnessy, a Peoria, Ill., diocesan priest and former head of the Federation of Diocesan Liturgical Commissions. Father Shaughnessy, who has headed the Center since its establishment in 1971 by a gift of Mr. and Mrs. George J. Murphy of Wilmette, Ill., will continue as director of the board of the Center, which has returned to parish work in the Peoria diocese.

Father Gallen did his undergraduate work at Fordham University in New York City and was ordained in the Society of St. John the Evangelist in 1967. In addition to his work at Woodstock, he taught at Weston College as well as Saint John's (Collegeville) and Princeton, Princeton, Universities. He has edited two books, "Scripture Services," in 1969 and "Eucharistic Liturgies" in 1970. Notre Dame's Murphy Center is one of four centers of a four-center program designated by the American bishops to do liturgical research, and Father Gallen said it is the cultural adaptation of the newly revised books of Roman liturgy. "Essential to the cultural adaptation project," Father Gallen noted, "is the pastoral task of providing explanation and understanding of everything contained in the recently revised books of Roman liturgy. We need to master, in both theory (theology) and practice, the contents and spirit of these revisions. To do so is an essential and non-dispensable element in any hope to provide for cultural adaptation."

In his four years as Center director, Father Shaughnessy developed it as a point of contact and exchange between diocesan directors of liturgy and scholars in the field, principally through an annual symposium as well as workshops and conferences conducted off campus. The Center also produced audiovisual materials on the Church's traditions of liturgical practices, including the films, "The Eucharistic Prayer of Hippolytus" and "A First Century Lord's Supper." Liturgical implication of ritual behavior was one of the research interests of the Center, which published "The Roots of Ritual" in 1973.

Roemer speaks

Dean of Students James A. Roemer will be present at an open discussion in the House of the Student Union at 8:30 p.m. on Monday. He will be the featured speaker for the meeting of the Student Union Social Commission. Father Gallen did his undergraduate work at Fordham University in New York City and was ordained in the Society of St. John the Evangelist in 1967. In addition to his work at Woodstock, he taught at Weston College as well as Saint John's (Collegeville) and Princeton, Princeton, Universities. He has edited two books, "Scripture Services," in 1969 and "Eucharistic Liturgies" in 1970. Notre Dame's Murphy Center is one of four centers of a four-center program designated by the American bishops to do liturgical research, and Father Gallen said it is the cultural adaptation of the newly revised books of Roman liturgy. "Essential to the cultural adaptation project," Father Gallen noted, "is the pastoral task of providing explanation and understanding of everything contained in the recently revised books of Roman liturgy. We need to master, in both theory (theology) and practice, the contents and spirit of these revisions. Liturgical implication of ritual behavior was one of the research interests of the Center, which published "The Roots of Ritual" in 1973.

Social Commissioners Kathy Simoue and Charlie Moran revealed to half representatives plans to avoid conflicts in Notre Dame social life at last night's meeting of the Student Union Social Commission.

"We are going to try to give a new outlook on social life," stated Moran. "Instead of having five events in one night, we will spread them out for your benefit."

The commission is planning to work on the premise that the campus in a year before finance two big events, and that the halls must work together in planning and coordinating their events. The fact that each hall must call in to the commission to inform them of their plans will help prevent conflicts. In this way the commission can decide whether or not it is feasible to plan this activity for this night.

As Kathy Simoue said, "We can advise you whether or not it has a chance to work, but we can't stop you from planning anyway. It all depends upon how smoothly you would like campus social life to run.

The commission will work through the Ombudsmen to inform that organization of all information regarding upcoming social events. The Ombudsmen can then inform students of conflicts, time and place of all social activities. There will also be posters and bulletins boards around campus and in LaFortune.

Moran concluded, "Hopefully, people will stop saying there's nothing to do."

Slager number one QB; Browner starting fullback

Senior Rick Slager got the nod as the Irish's number one quarterback yesterday after having run neck and neck with sophomore Joe Montana throughout the fall.

Slager was designated first team in yesterday's practice and is expected to start when the Irish open their season next Monday night against Boston College. Coach Dan Devine had said after Saturday's practice that Slager's probability to start and play most of the way against the Eagles.

Right behind Slager in Montana, a free passer whose strong showing this fall has made him the number two contender for the starting position. Frank Alonso made a fine attempt after separating his shoulder last spring, but has not recovered enough yet. Sophomore Gary Foryak was also in contention. Neither Alonso nor Foryak saw action in Saturday's scrimmage.

Jim Browner became the only freshman to crack the starting lineup by nailing down the fullback position. He is joined by fullbacks Mark McClane and Russ Korndorfer. Al Hunter, Steve Orsini, Dan knot, Jerome Heaven, Terry Kurke, Jim Weisberg and Mike Korndorfer are the back-ups.

There is no surprise at the receiving spots. As expected, Ted Burgmeier will start at split end and Ken Marciano at tight end. Doug Knoth, who figures to see action in the backfield, is expected to start there as well.

The first team offensive line will be what it has been all fall with Ed Bauer and Pat Pohlen at tackles and Al Wujciak and Ernie Hughes at guards. Steve Quehl will start at center. Terry Eurliek, Jim Weiler and Steve Schmitz are the backups.

ND women's rowing club wins '75 Championship

The Notre Dame Rowing Club's first crew, a light eight, heavyweight's crew, ended their season on May 28 by winning the Mid-Atlantic Champion. The championship combined with their earlier Midwest Sprint victory gave them domain over all the country save the West Coast and University of New England, and made them Notre Dame's first undefeated team, a light-eight team in 1975. Their victories along the way included: Princeton, Nebraska, Minnesota, George Washington University, Albion, Mercyhurst, Grand Valley, and Kansas State.

The varsity lightweight's crew, dominated by juniors and sophomores, has a strong team for next Spring, but is second in the current standings. Coach John Johnson, a two-time All-American at Western Reserve, is very high in Warren, Ohio. Brother, Jim, stands 6-3, 220, and weighs 205 and has played all over the field.

 freshmen, beat Nebraska, Mercyhurst, Grand Valley, and Kansas State.
