Students relate arrest experience

by Cathy Nolan  
Staff Reporter

What happened to the student who was arrested for violation of the state drinking laws? Six Notre Dame and St. Mary's students found out first-hand when they were arrested for underage drinking, Friday, Jan. 23, in a raid conducted by the South Bend vice squad.

"Once you have been busted, you just have to accept the consequences," stated one of the six students. "I knew it would be better for me to become pathological or to panic. I realized that sooner or later someone would catch me and I would be released," she said.

"I thought they were going to be arrested mid-night. It was conducted by seven South Bend vice squad members. According to several students present at the bar, no announcement of the raid was made prior to the arrival of the police. "We were not aware that the police had arrived," one student thought.

The first indication of a raid was a long decision relayed over the loudspeaker to the "Men in Blue.

The vice squad, which included at least three plainclothes officers, did not ask to see the identification of everyone at Fat Wally's. "I was sitting at a booth when one of the officers approached me, asking to see some sort of I.D. When I tried to pass off a fake card, I showed him my school I.D. He informed me that I would have to be taken down to the station. He did not state what the exact charges were against me," said one student.

The six students were taken in the police paddy wagon to the station located on Sample Street. The male students were frisked by the police before entering the paddy wagon. According to one of the students, they were asked to remove hosiery, shoes, jewelry, any other article on their body which could be considered as a weapon. The police also confiscated their wallets and said they would be returned to them after bond was posted.

When the students arrived at the station, they were placed in individual monitored cells. The Sample Street jail does not have facilities for women, so they were placed in a visitor's lounge. "The police questioned each one of us individually," one student said. "They filmed and recorded the entire questioning period, to use as evidence in court, if necessary. They read me my rights and told me I would be eligible for release if I talked to my roommate who said that someone had told him to put them away to post bond. I knew that it would just be a matter of time before I was released."

The police took three sets of fingerprints and several mug shots. The fingerprints will be sent to the FBI.

The necessity of a new athletic facility was cited by the Committee on Physical Requirements as a part of the Plan of the Regents, February 1974, the Board of Regents approved the concept of a new athletic facility.

Wernig commented that although sudden interest and expansion in sports programs constitute an immediate need for the center, St. Mary's is not becoming a sports-oriented college. "We won't go into athletic scholarships," she said. "We encourage development of the whole person. Although we've always been lacking in the sports area, we can now provide avenues to develop in all areas." Wernig concluded.
Cubans fight in Angola

LEUSAKA, Zambia—Cuban troops with the Soviet-backed Popular Front MPLA in Angola’s civil war are playing an ever greater part in the command and fighting, a report from the embattled west African country said yesterday.

Another report quoted National Union UNITA leader Jonas Savimbi as predicting pro-Western factors in preparing fallback positions as part of a west-east defense line across the middle of Angola. This would be to block the MPLA’s southward drive toward the trans-Angola highway.

Cease-fire relaxing

BEIRUT, Lebanon—Thousands of Lebanese poured into Beirut’s west to protest a relaxed mood yesterday after months of civil war, and the blare of car horns replaced the sound of gunfire as traffic piled up along seaside boulevards.

Premier Rashid Karuni announced that under the Syrian-sponsored cease-fire agreement agreed to reopen all roads by Sunday evening and to withdraw all their barricades and garrisons from the capital’s streets by Tuesday.

Desegregation begins

DETROIT—Some 15,000 black and white elementary pupils are scheduled to be bused away from their neighborhood schools today as public school integration begins in the nation’s largest city that is under a federal court desegregation order.

The city’s two antibusing organizations have called for an indefinite-class boycott but have also urged parents and students to protect the desegregation order in a peaceful manner.

CIA Operation disclosed

WASHINGTON—The Central Intelligence Agency collected information about political dissidents at Utah State University, Brown University and Boston University in 1970 and 1971, according to newly released documents from the CIA’s Operation Chaos.

The 141 pages of CIA files, the first Operation Chaos documents to be made public, also showed that the agency followed the movements of American political dissidents traveling abroad and kept track of foreign visitors to U.S. dissident groups.

Quinlan case to be heard

TRENTON, N.J.—The New Jersey Supreme Court will hear arguments today on whether Karen Anne Quinn has the right “to choose” to have the respirator that sustains her daughter at St. Clare’s Hospital in Waterbury.

Senior Dave Clarke, a chief coordinator of the campus blood drives for this year was pleased with the students’ willingness to participate in last semester’s drive, and is looking for even more donors this time around.

When asked how students should prepare for giving blood, Clarke stressed the following:

- Eat a good meal before you give.
- Do not drink any alcohol within twenty-four hours before hand.
- Do not donate if you are ill.
- Do not be nervous about the pain; it hurts less than a shot.

Clarke encourages students to be attentive to when their hall is due to give, and to go to the representative who asks them to take part in the drive.

Mock convention '76 gets underway

The 1976 Mock Political Convention Campaign for the office of President will get under way today January 26 at 11:30 a.m. with the opening of Campaign Central in the main floor of the LaFortune Student Center.

The purpose of Campaign Central is to offer the ND student community in general and the campaign devotees in particular the opportunity to find out more about the presidential candidates.

The focal point of the campaign will be the issues. All students and campaign volunteers will be meeting this week to discuss the issues. The purpose of these sessions is to make the candidates' positions clear and to make students aware of the different positions on the issues. This information will be used to prepare candidates for Mock Convention. The Mock Convention will be held January 26 and 27.

The focal point of the campaign will be the issues. The issues will be discussed in the sessions and will be used to prepare the candidates for Mock Convention.

The Mock Convention will be held January 26 and 27. It will be a full day of campaigning, with candidates making speeches, answering questions from the audience, and participating in debates. The Mock Convention will be held in the main floor of the LaFortune Student Center.

The Mock Convention will be open to all students and the public. The Mock Convention will be a great opportunity to learn about the candidates and their positions on the issues.

Please come and join us for the Mock Convention January 26 and 27.

Sincerely,

[Signature]

Man of Integrity

Dear Sir:

This letter is prompted by The Observer article portraying Professor Charles Rice of the Law School as a demanding teacher concerning his recent Torts examination.

If I speak as a "defender" of Professor Rice, he is more than capable of defending himself, if such be necessary. I speak because I believe an examination is being done to someone I know very well and admire even more.

One of the premier law teachers in this country, Professor Rice is a man of exceptional ability and uncommon courage. Moreover, he has an abundance of something that is always in short supply—integrity. He is, most assuredly, not "a trouser swaying in the wind."

It is reported that there were some twenty failures on the Torts examination. What is the teacher to do when confronted by a performance that does not meet his standards? Pretend that it does?

No, a school dedicated to the pursuit of justice that would be the worst kind of mockery.

I have been informed of collective efforts, including among other things a direct appeal to the President of the University, to force a change in the examination. One may be certain that Professor Rice will not be intimidated by these or any other improper pressures.

Moreover, he has been a professional resource. Such efforts should be better channeled toward seeking his counsel and advice so as to how the deficiencies might be corrected.

Edward J. Murphy

Thomas J. White Professor of Law

Dear Sir:

Dr. Rice is a teacher both in and out of the classroom. His impeccable personal life is a good example that I'm sure has inspired many a future lawyer's life including my own. He is one of the few professors who treats the students as equals and is willing to sacrifice a great deal of his own spare time to help the students.

I just wanted it known that not all of the professors and law school administrators view the show of those who were interviewed in Wednesday's paper—some of us think that Dr. Rice is the best professor in the whole law school.

Bob Molan

Don't Count St. Mary's

Dear Editor:

You and your "Admissions Policy Reviewed" was good because the instruction that the female professor was brought up. I've been wondering for years how many women will finally be established at N.D.

There was a particularly interesting point though. Sister Miriam Jones stated that "a student body composed of 40 percent women... as in most co-ed universities) would mean we would have 3,000 women... should we balance the number of women with that of St. Mary's?"

I hate to sound unconcerned but what does the number of women at St. Mary's have to do with the number of women at St. Mary's? I have to do with the number of women admitted to N.D.? I should think the admission of an individual to N.D. should be totally independent of the number of persons attending another institution.

If other institutions manage to get along with a 60-40 ratio, why should one be able to do so also.

Sister Jones and Admissions Committee: Please don't set a quota dependent upon the number of women at St. Mary's.

Bob Tracy

When I Was

A Kid...

I was a small child when I first came to the bridge over his navel. Casey came over and looked at Obie's.

"What up, Obie?"

"I was just thinking,

"I guess?"

"What about when I was a kid?

"Yeah, How old?"

"Oh, about two or three."

"Can you remember back that far? TWO YEARS old?"

"Yeah?"

"Huh?"

"Casey sniffed and took a quick look around the room."

"Man, you high?"

"I'm serious!" Obie said.

"I am I?"

"Casey, you know I don't do that...

"Well, then, what are you talking about, two months! Nobody on remember that soon after being born."

"I mean before I was born, Casey. I mean two months in the womb."

"Give me a break!" Casey roared. "Hardly a week into the semester and you've flipped out!"

Obie sat up slowly, calmly. His face grew very, "Case."

"O'Brien raised one eyebrow, "want to hear about it?"

"Get out of here!" Then Casey smiled. "Sure."

"What do you want to know?"

"What the hell do you mean, do I know to? How Do I know what I wanted to know before the womb..." Casey felt stupid, "I mean, I can remember.

"Well, O'Brien, I can. Every detail was!"

"Like heaven," Casey stated, "I was circumsized."

"Read?"

"Well, it was either read or sleep. After all, no one was around to talk to...

"And you couldn't/play!"

"Oh, about two or three..."

"When I was a kid, Casey. I mean tw o months in the womb!"

"Yeah, that was all taken care of, Casey. But, hey! I was scared for the best part! Right after, I woke up one morning and hid this overpowering urge for a cheeseburger. About the same time, all of my organs started popping up."

"You were...ah..."

"Yeah, that was all taken care of, Casey. But, hey! I was scared for the best part! Right after, I woke up one morning and hid this overpowering urge for a cheeseburger. About the same time, all of my organs started popping up.

"Give me a break!"

"Hey, Obie, you've a warped mind!"

"You love it! And that reminds me. What causes sex, brain waves or the heart beat?"

"Heartbeat, obviously."

"You remember?"

"No, I read it somewhere," Casey reported. "The heart starts pumping around the eighteenth of March a little over three weeks later, the brain waves begin to register."

"Right you are! I got my first brain waves at 6:30 P.M. on the forty-third day."

"6:30?" Casey was incredulous.

"Eastern Standard Time."

"Well, Casey, you're a warped mind!"

"What about?"

"I mean, what was you first thought?"

"My first thought? Let's see. Oh, yes. Where the hell am I?"

"Peroform."

"Well, what would you say if you suddenly found yourself in some sort of a world?"

"I never really thought about it."

"Admissions Committee."

"And then Obie, Obie, I just thought of something really heavy. When did you get your soul?"

"O'Brien closed his eyes and said nothing for a long while. At last, he said, "Casey and Obie, I can't really remember ever being without it!"

Neither said a word, but sat quietly until Casey cleared his throat.

"Obie, Casey said softly, "I'm glad you made it."

"Me, too, Casei"
Special Offer, $10.00 Value:
Free HP-21 Applications Book

See your dealer for details.
Offer void where prohibited by law, regulation, or otherwise. Available only with the purchase of a new HP-21 before March 15, 1976.

The second generation is here.

One of our second generation calculators can save you countless hours and errors en route to your diploma and on the job thereafter. Each offers problem-solving technology you probably won't find on competitive calculators.

New low price.
HP-21 Scientific,
$100.00

The HP-21 makes short work of the technical calculations even so-called "non-technical" courses require today. It performs most arithmetic, log and trig calculations automatically. It's also the only calculator at its price that offers full display formatting; you can choose between fixed decimal and scientific notation.

If you need a calculator that does more than simple arithmetic, this is it—especially at its new low price.

New.
HP-22 Business Management,
$165.00

The HP-22 takes the starch out of the calculations you face in business courses today, in management tomorrow. You can solve most time value-of-money problems in seconds. You can breeze through business math calculations (logs, roots, %, etc.). And, most important, you can use the HP-22's statistical functions to build existing data into more reliable forecasts. No other pocket calculator at any price offers you a comparable combination of financial, math and stat capabilities.

New.
HP-25 Scientific Programmable,
$195.00

Our HP-25 does everything our HP-21 can do—and much, much more. It's programmable, which means it can solve automatically the countless repetitive problems every science and engineering student faces. With an HP-25, you enter the keystrokes necessary to solve a repetitive problem only once. Thereafter, you just enter the variables and press the Run/Stop key for an almost instant answer displayed to 10 digits. You gain time, precision, flexibility.

All three offer you HP's efficient RPN logic system that cuts keystrokes and scratch pads. All three are easy to use (e.g., the HP-25 requires no prior programming experience). And all three are almost certainly on display at your bookstore.

by Paul Hess

Minnesota in wintertime is a study in contrasts. At times it is gorgeous, its picturesque sub-Artic landscape a source of exhilaration and content. Moments later it can be awesome and menacing, however, and vertigo and disenchantment

...
The sixth man

They said it was silenced, novo natuur. There was run extenuating their, and a cheap imitation of their former self. But it let be known to one and all that on January 25, the critics were silenced. For the ups and downs Notre Dame very much had them.

Indeed the day of Notre Dame's 95-85 victory over UCLA was a very special day. They drew their first collegiate game, responded well to the pressure by hitting for ten points. The onus was on the inside of the boards.

"There is no way of gauging just how much the crowd is worth in terms of points," added ND All-American Adrian Dantley, who did much for giving awe some inspiration to the Irish, and Saturday was no exception.

"You can feel it for this game," said jubilant Irish coach Digger Phelps. "The students are unbelievable. They really psyched up our players. And we had to do it, because they psyched us up today. They had a lot of enthusiasm and we needed a big win."

The crowd makes me do things I don't think I'm ordinarily capable of doing," added ND All-American Dan Little, who did much for giving awe some inspiration to the Irish, and Saturday was no exception.

"That's the way we went about it," said Notre Dame's coach Digger Phelps. "The students are unbelievable. They really psyched up our players. And we had to do it, because they psyched us up today. They had a lot of enthusiasm and we needed a big win."

"I don't know about UCLA," Phelps explained, "but this was a game we had to win. We were in the first half, but we turned it around in the second half. The game was saved back and forth until 8:26 to go. And even the students were out there cheering, and the kids were tired."

"Duke" Martin controlled the ball superbly for the Irish, dealing off assists and scoring seven points on his own.

The cheers for the Notre Dame five were undying and the jeers for their opponents in constant evidence. UCLA was the intruder and they were rated as such. Before the game everlasted it was painfully apparent to the Bruins that they were headed for trouble. They were finished before hardly a second had played. The crowd with its taunting and Phelps with his cold stares had psych the Bruins out.

"People thought we were going to have an easy time with UCLA," Phelps said earlier in the week. "Yet they have to be the favorites."

"Duke" Martin was right on both accounts. The Irish did not have a man as tall as Ralph Dreglin. They did not have a forward as quick as Marques Johnson. Nor did they have a consistent outside shooter the likes of Richard Washington. UCLA had trounced Notre Dame earlier in the season.

Yet the air on campus reflected the thought that three was no way UCLA could win. In the week leading up to Notre Dame's big problem was to find a psychological defense against the Notre Dame crowd. Simply, our sixth man was much stronger than theirs.

There is no way of gauging just how much the crowd is worth in terms of points. Adrian Dantley said this way, "The crowd makes me do things I don't think I'm ordinarily capable of doing."

Dantley's superhuman efforts were nothing short of amazing. His rebounding started the game, and half the fight was engendered to a game tying, High of 30 points. The spirit of the Irish moved in the form of a Red tide. Quickly that fever spread to the rest. Dick Williams was deadl from the outside. Toby Knight attacked the boards for 11 rebounds. Ray and Dave Batton's shots proved to be off target.

"I'm proud to be a part of this," said Phelps. "We've got great kids. They don't know what they're doing, and we're coaching's all about."

Ray made three of his patented one-on-one shots from 18 feet for a 26-24 lead. It was to be their last of the game. With UCLA in a zone defense, the Irish had gone to Dave Batton to hit the outside jumpers. When Batton had gone to the line to get Mark Williams to begin to take over. Hitting two of his patented free-shot from shorts, Dick Duck ND 30 up 30-26. A jumper by Bernard Boucher and a three point play by Dantley put the Irish up 31-29, forcing a time-out by concerned Coach Gene Bartow. Bartow and the crowd to fill their box. But UCLA regrouped behind Washington, who was near perfect on his long jumps, in flight back four points, 44-40, at halftime.

UCLA had remained close in the first half through a sixteen point effort by Washington, a 36-18 rebounding edge and, as usual, a high shooting percentage. They shot .52 per cent from the field. We had four defenses ready to go. We were supposed to go on full court pressure when we scored and half-court pressure when we didn't. After the first minute-and-a-half, when I saw we could force them into turnovers, I called the kids to forget the other defense. We went with what is called our "pressure man" the rest of the way."

Wright and Batton put the Irish up by eight with two quick buckets at the start of the second half, and they continued to streak and stall for the next ten minutes. Twice they went up by eight points on the Bruins, 75-74, with 13:36 to play, and 69-55 with 12:18 left, but they could not shake the Bruins. With Washington in the process of hitting four straight baskets, with 8:26 to go, and reserved forward Gavin Smith getting a hot hand, UCLA fought back, until finally, with 7:02 remaining in the game, Marques Johnson tied the game at 85.

Dantley then went to work, hitting three baskets in a row, and doubling the lead to 87-76, with 5:39 left, and the Irish up 81-75. Digger called time out. When ND had come back, they went into their semi-stall offense where they waited for the good percentage shot only. Ray Martin and Toby Knight handled the ball magnificently and the Bruins were forced to foul. When Williams' foul shot made it 85-75, Bartow called time out with 3:22 left.

Bartow's time-out was symbolic for there was exactly 2:22 left in the UCLA-Notre Dame game two years ago when the Irish began their historic 11-point comeback. But it was not to be for the Bruins. The Irish controlled the game, and intruded farther and farther ahead at the foul line, one by leading by as much as 14 points.

"Notre Dame played a great game today," said UCLA's Bartow. "It seemed like we had to play catch-up the whole game. We had to get over the hump but never did. That percentage was very good, very quick, and very hard."

Though the Irish captured the glory, the Bruins received a fantastic performance from Washington. The junior from Portland, Oregon hit four of his 17 shots from the floor, for an unbelievable 23.5% shooting percentage. He was two for three from the free line. Sharpshooting, Gavin Smith followed with 16 points. Toward added two points, and Johnson nine.

Dantley's thirty points gives him 17 career points, 31 behind Tom Hawkins and second place on the all-time scoring list. The loss set UCLA's record at 14-2, while raising Notre Dame's to 11-3. The Irish are home this week for two tough games against DePaul on Wednesday and Maryland on Saturday.

Ernie Torriero
