John A. Schneider, president of CBS, urged business students to retain flexibility in their careers, in a talk yesterday. (photo by Debbie Krilich)

John A. Schneider, president of the CBS-Broadcast Group, sized the necessity of personal and career flexibility to the business world in his address, entitled “Richard Nixon, Archie Bunker, and Wall Street: A Day in the Life of a Broadcaster.” He spoke yesterday in room 112 Hayes-Healy.

“I think the message is clear: Don’t be a technician. Don’t be a business school haven. Don’t be narrow. Keep your eyes open. Keep looking around you, and listening to what people are saying, whether you like what they are saying or not,” Schneider stated in his talk, which was sponsored by the Graduate School of the College of Business Administration.

“You have to continue to grow, even if you have that great ‘passport’ called an MBA,” he told the capacity crowd. Schneider described his job with CBS as the type of job that demands flexibility. He told of how when he was the general manager of the CBS-owned television station in Philadelphia he had asked the then-chairman of CBS, William S. Paley, just how Paley wanted him to handle the job.

“What do you want?” I asked him,” Schneider related. “Do you want me to run a station that offers the best in public service? Or do you want me to be a general manager who is deeply involved in community affairs, a fellow with high visibility in this city?”

Paley replied, “We want them all.”

In his address, Schneider also stressed the importance of anticipating changes. “What you people — the business leaders of the 1980’s and 1990’s — have to ask yourselves is: What can you do to prepare yourselves to handle the problems that are not even envisioned today?” he stated. He noted that he faces many questions in his job which could not have not have been anticipated when he was a student at Notre Dame.

“One thing is to develop an entrepreneurial sense — to know about society’s changes perhaps even before they happen. A good entrepreneur has to be able to synthesize and innovate and use intuition,” he continued. “The great entrepreneurs have always been able to do this.”

Schneider also spoke of the importance of education. “And most of all, don’t stop learning once you’ve earned your MBA,” he said. “Your degree is an aid, not a crutch. I wouldn’t want to be a business run by someone who had learned nothing since he graduated from medical school in the 1930’s. Oh, and what do you want me to be a general manager of? A Broadcaster,” yesterday in the Student Union, he has proposed written job descriptions for the position.” I think he’ll do an admirable job,” he continued. “And I will help in any way possible."

Gryp was “shocked” and “overjoyed” by the Student Union’s appointment.

After nine hours of deliberation, the Student Union Appointment Board yesterday selected sophomore Tom Gryp as the Student Union’s new director. Gryp will assume the position, presently held by Ken Ricci, on April 1. Gryp was “shocked” and “overjoyed” by the Student Union’s appointment.

“Best of the best”

Gryp named SU director

by Jack Pizzolato
Senior Staff Reporter

After nine hours of deliberation, the Student Union Appointment Board yesterday selected sophomore Tom Gryp as the Student Union’s new director. Gryp will assume the position, presently held by Ken Ricci, on April 1.

Gryp was “shocked” and “overjoyed” by the Student Union’s appointment. The SU Appointment Board originally planned to choose the new SU directorship when it met last Sunday, but after almost six hours of discussion it could not come to a decision. The selection came yesterday after a second meeting which lasted three hours.

In accordance with SU policy, the final vote was not announced, but the Board did agree that a two-thirds majority was necessary for selection. The SU Appointment Board, which meets exclusively each year to choose a new Student Union director, consisted of: Student body President Mike Gassman; Student Body Treasurer Eric Ryan; SU Comptroller Marianne Morgan; SU Associate Director Watt Ling; Student Body President-elect Tom Soma; Director of Student Activities Jobs Beneke; C.S.C. Student Senator; and Student Affairs Coordinator of the Hall President’s Council (HPC) Keefe Montgomerly. Montgomery was for HPC Chairman, J.F. Representative.

An accounting major, Gryp had no prior experience in the Student Union, but has served on the Keenan Judicial Board for two years and is an alternate on the University Appeals Board. He lives in South Bend and plans to devote time to the Student Union this summer.

Gryp said, as director, he would emphasize “opening up the Student Union and bringing the organization together.” “I will be working very closely with the commissioners and with the Board of Directors,” he said. “I want them to feel their opinion really means something.”

Gassman stated that he thought this emphasis on greater use of the SU Board of Directors was "the best way to determine policy and keep a smooth relationship between the Union and the student government." He also noted that it was an important consideration in Gryp’s selection. Although Gryp plans no major structural changes in the Student Union, he has proposed written job descriptions in order to clearly outline responsibilities and the drawing-up of a comprehensive structural chart delineating the “chain of command” within the organization.

Gryp has made no definite decisions on who he will appoint for the Associate Directorship or any of the four SU commissioner’s posts. “Everyone will be considered,” he stressed. Those appointments are subject to the approval of another SU selection board.

"If we keep track of what we’re here for — to work for the students and serve them — many of the conflicts of the past won’t come about.” Gryp concluded.

John A. Schneider urges business students to retain flexibility in their careers, in a talk yesterday. (photo by Debbie Krilich)
Women's Night tonight

PALM BEACH, Fla. [AP] - A former friend of Lee Harvey Oswald apparently killed himself within hours after an investigator for the House Assassinations Committee attempted to interview him, authorities ruled yesterday. The Palm Beach County medical examiner said an autopsy of Georger de Mohrenschmidt, 65, showed the fatal wound was "consistent in that of a self-inflicted gunshot," sheriff's Lt. Richard Sheets said.

Sheets said his office would consider the autopsy results before deciding next week whether to close the case. He also said a tape recorder being used to record a television program in an adjacent room picked up the sounds of de Mohrenschmidt firing the gun.

Pay those utilities!

NEW YORK [AP] - To thousands of Americans the end of the long, hard winter of 1977 also will mean that their gas and electric service will be cut off, unless they pay their overdue bills. Many of the nation's 60 million gas and electric customers, some states from Maine to California, had until yesterday to pay.

The warnings were intended to drive up prices of oil and natural gas and drive down their use, a government source said yesterday. Rough calculations based on proposals under consideration indicate they might add another six cents per gallon to the cost of gasoline and other petroleum fuels, and another $6 per year to the average household gas bill.

Carter ponders natural gas tax

WASHINGTON [AP] - The Carter administration is considering regulations and taxes to drive up the prices of oil and natural gas and drive down their use, a government source said yesterday.

Byrd said new plumbing, including new restrooms, and electrical lines have been installed.

Inside space doubled

Corby's reopens this weekend

Corby's will reopen either tomorrow or by Monday, according to Jim Dil, manager of the tavern. The bar has been closed for a month due to structural and management problems during this time. During the time, the tavern has been renovated.

During the last two weeks, Corby's has received many questions. Dil said, some remained unanswered until yesterday. The grand opening won't be for another week, possibly April 14. Dil said.

Dil said new plumbing, including new restrooms, and electrical lines have been completed by the start of school next year.

Next to Corby's, the dirt hole will be a "problem," according to Terry Phelps, library lounge.

We couldn't believe the condition of the electrical system when we took the ceiling down," Dil said. "In two months, the place could have burned down."

Inside, the wooden wall has been torn down and the doorway of the brick wall will be widened next week. According to Dil, this will double the space inside Corby's. "We figured to put $10,000 into this," Dil said. "I think we've already passed that."

Dil also plans to put a fireplace along the far south wall of the tavern. He said this will be completed by the start of school next year.

Next to Corby's, the bar has been cleared and the storage locks will be removed. This hole had been the foundation of a new bar by the former management of Corby's. However, a city ordinance prevented the work from being done.

Dil said.

Oswald friend commits suicide

WASHINGTON, Apr. 1 - An old friend of Lee Harvey Oswald has been found dead of a self-inflicted gunshot wound yesterday.

Richard B. Meyers, who had extensive contact with Oswald after the assassination, was found hanging in his Washington home.

The house had been rented to Meyers by Oswald's former wife.

Clifford Jorgensen, a friend of Oswald's and a former U.S. diplomat, said yesterday that Meyers had been a "good friend." He said Meyers had been unable to get a job since last year.

A local police spokesman said there had been no prior indication that Meyers intended to kill himself.

Meyers was reported as saving one of his main problems was his failure to find a job. He was fired from his job as an attorney after he was imprisoned for a year and a half on charges of murder.

Washington Post, The Observer 11:45 am - - "SPECIA L IS T S  SINCE 1919 E D U C A T IO N A L  C E N T E X GRIFFON Books New & Used, Bought & Sold BOOKSTORE Tolkien Figures GAMING TOURNAMENTS IN CHESS & BACKGAMMON (BEGINS APRIL 2) DUNGEONS & DRAGONS Mon-Thurs 10am-7pm Fri & Sat 10am-8pm 121A S. Moscow [AP] - Soviet leader Leonid I. Brezhnev rejected Ameri­
can nuclear arms control proposals yesterday shouting the latest U.S. ef­
fort to reach a new strategic arms
limitation treaty.

Secretary of State Cyrus R. Vance, who had waited three days for response to his SALT propo­
sals, said both a comprehensive and a more limited approach had been offered but the Soviets "did not find either one acceptable."

In Washington, President Carter said Soviet failure to negotiate "in good faith" in the next round of talks might force a test-­

speed up in U.S. weapons

limits. Vance said the Moscow talks would note that "the most impor­
tant time-consuming" discussions had dealt with strategic arms

limitation.

Vance denied the proposals had been turned down because of Soviet unhappiness over American human

rights critics. He said the Russians rejected both propo­
sals because "they did not coincide with what they consider to be an

equitable deal."

The U.S. administration has stressed its commitment to human

rights matters made good relations

impossible between the Soviet

Union and the United States. Vance said the human rights

issue had "not come up" Wednes­
day and the SALT proposals "stood

on their own feet."

Other American officials, how­
ever speculated that the SALT

rejection was related to the earlier

warning.

An interim nuclear arms control accord expires Oct. 3, but Vance said "it is still possible" to reach a

SALT agreement before then.

Vance said the United States had

proposed one plan under which negotiations for controls over the American cruise missile and the Russian Backfire bomber would be

deflected, but both sides would go ahead with testings on mis­
siles, bombers and multiple me­

siles with warheads, worked out at

Vance said he then offered his

preferred package, which he said would have substantially reduced both nations' overall stockpiles of

strategic missiles and bombers.

He said it would also have reduced the number of modern, large ballistic launchers, the number of multiple warheads available for missiles and the number of missiles that could carry such warheads.

Vance said he had proposed a ban on mobile launchers with multiple warheads deployed by the Soviet Union and said he was prepared to ban all American cruise missiles with in­

ter-continental range. He said he had "not come up" Wednes­
day and the SALT proposals "stood on their own feet."

The Notre Dame St. Mary's Theatre Second Scene continues its

season this weekend with two presentations. This weekend fea­
tures After the Sexual Revolution on Friday and Saturday nights, and Camille and Perdican on Sunday and Monday nights. Both produc­
tions will be presented at Washing­
ton Hall on the Notre Dame Campus at 8:00 pm. Admission is free.

After the Sexual Revolution is a theatricalization of an essay of the same title by Benjamin duMott, a social values writer who contri­
butes regularly to the Atlantic Monthly magazine. In After the Sexual Revolution, duMott views the sexual revolt and the sexual revolt of the sixties. It is an episodic documentary, visiting marriage counselors, wet T-shirt contests, and a school for pregnant teens. In addition to its personal appeal, duMott has the actors regularly change character from narrator to subject and back again in order to animate and highlight DuMott's wry humor and vision to a wise concerning contemporary sexual mores.

Camille and Perdican, by the French romanticist Alfred de Musset, is a tragic romance of love, death, and conflict between ideals and reality. The heroine, Camille, spurns her long­­

betrothed lover Perdican because

The Saint Mary's College Department of Music will present three performances of Henry Purcell's tragic opera Dido and Aeneas beginning tonight and on April 1 and 2. The performances, which will be staged "in-the-round," will be at 8 p.m. in O'Laughlin Auditorium.

According to Susan Stevens, chairman of the music department and director of the Opera Workshop at St. Mary's, Dido and Aeneas is an excellent introduction to the world of opera.

Although the Opera Workshop has produced a one-act comic opera as part of the annual Madrigal Dinners for the past four years, the last full-scale operatic production was in April 1973 with five performances of Mozart's The Magic Flute. "Most college-age singers lack the vocal strength and maturity to fulfill the extreme demands of a large operatic role," said Stevens. "In 1973 we were very fortunate to have students of just the right voice quality and experience to fill the roles in The Magic Flute. We are equally fortunate this year to have singers who are ideally suited to meet the demands of the roles in Dido and Aeneas."

The role of Dido, Queen of Carthage, will be sung by Cheryl Pesda, a junior applied voice and piano major at St. Mary's. Valerie Manzke, a senior applied voice major at the College will sing the role of her sister and confidant Belinda. The role of Aeneas, the future king of Italy, will be sung by Susie Schowalter in ceramics, Mary Anne Brown in printmaking and painting and Barbara Dodge in etching. (Photo by Debbie Krillich.)

A MAGICAL ADVENTURE

IN WONDROUS COLOR

From Ralph Bakshi, master of animation, comes an epic fantasy in wondrous color. A vision of the world, 10 million years in the future, where Wizards rule the earth. And the powers of magic prevail over the forces of technology in the final battle for world supremacy.

Pitt Easter bus: sign-ups Sunday

Pitt bus sign-ups for Easter break will begin Sunday at 6:30 p.m. in the LaFortune Hall amphitheater. Buses are scheduled to leave Notre Dame on Thursday, April 7, at 5 p.m. from the Center for Continuing Education, and they will return Monday, April 11, at 1 p.m. Prices are $30 for the round trip or $27 for members. A one-way ticket costs $20 for every

Heart of Dido, will be sung by Steve Jones, a junior science major at Notre Dame. The Madrigal Singers will make up the chorus of the opera.

Susan Stevens is the production director, stage director and vocal coach for the opera. The instrumental musical direction is being handled by Arthur Lawrence, associate professor of music at St. Mary's. Stage and lighting design is by Joe Martin, a sophomore at Notre Dame and costumes are being designed and executed by Gina Jang, a freshman at St. Mary's.

Due to the receipt of a grant from the International Musicians Union, tickets are available to the public without charge through the St. Mary's ticket office, 284-476. Those who wish tickets are urged to make reservations early since seating is limited to 175 persons per performance.

Pitt Easter bus: sign-ups Sunday
ND community comments on women priests

by Martha Fanning
Managing Editor

The Vatican's Sacred Congregation for the Doctrine of the Faith issued a "Declaration on the Question of the Admission of Women to the Ministerial Priesthood" earlier this year. The document relates the official position of the church in regard to women's ordination and concludes that women will not be ordained into the church.

In regard to this declaration, several members of the Notre Dame community were asked for their reactions to the issue.

Monseigneur John Egan, director of the Center for Pastoral and Social Ministry at Notre Dame, termed the document "unfortunate." It is unfortunate because this type of document need not have been written at this time. Theologically it gives inadequate reasons for rejecting women in the ministerial priesthood and ignores the deliberate findings of the Congregation for the Doctrine of the Faith in 1975 which states: "We have to go back to tradition" as a "poor reason for quality of women in society," he renewed understanding with the future. "He cited the arguments of the Theology department which commented the statement is a moment in depth the topic from a theological and scriptural point of view.

The historical argument is, Russell said. "I do not present convincing reasons to react against the document's statements. I hope one effect of it will be that many people will study in depth the topic from a theological and scriptural point of view."

John Hughes, a graduate assistant in theology, working at the Murphy Center at ND views the document positively. Hughes, one of the members of the "Women in Theology" group believes that the dialogue is now "two-sided."

"The document is saying what the position has been and is now in the church. ..." the publication of the document makes response and dialogue possible," she noted. That people are now talking about the topic seriously and cited the entrance of 23 theologians from the Jesuit School of Theology at Berkeley into the discussion as an example.

"The document causes people to examine very carefully, biblical symbols and 'impediments' which we have inherited, and to see if these impediments apply today," she said.

Hughes stated that the document does not support its own conclusion. "It contradicts the findings of the Biblical commission, which used many of the same texts. The declaration doesn't indicate that there are a variety of positions on those texts."

Fr. Edward Kilmartin of the Jesuit School of Theology at Berkeley discussed the document. "I feel that ultimately the priesthood will be open to women. The declaration is stressing just one more Papal document in the way that will have to be overcome."

The historical argument is, Russell said, the strongest. "It is the only one I think we can seriously consider but it can be overcome." She commented on a need to reinterpret the idea of what priestly and episcopal ministry constitutes and determine if changes are necessary. "There are so many roles in that one office that there are some that women are fulfilling now. Priesthood is the leadership of the ministry, women can be leaders, therefore official ministry ought to be opened up to women."

Another viewpoint was presented by Elizabeth Fiorenza, a Notre Dame professor of theology. She expressed concern over the sexist tenor of the declaration which she feels "could in the long run be more harmful than the actual statement."

Fiorenza explained that the traditional theology viewed women as becoming man in the generic sense so that theology always viewed Jesus as a human being. The document, however, states the decisive factor was Jesus was male.

She also described the document as "Ronse" the observer. "Ronse did not want to study the pros and cons of the situation. The conclusion was already decided-that women could not be ordained, the declaration's purpose was to present arguments against ordination."

Fr. Edward Kilmartin of the theology department also expressed the declaration to view a general deal of comment from Catholic theological sources.

WASHINGTON - There was a time when being President of the United States was the highest office that any American could aspire to. But in recent years the Presidency is only a steppingstone to fame and fortune in show biz. A recent article in the New York Times revealed that the William Morris Agency has made deals for President Ford, Mrs. Ford, Jack Ford, Susan Ford and Steve Ford. The former President and his wife have contracts for two books with Harper & Row and Reader's Digest worth over a million dollars. It was suggested in the story that Ford's agent was very excited. "We'll get $2 million for the Carters than which he will get a million dollars."

We're Talking Megabucks

For any family that has ever lived in the White House, the Agency has made deals for President Carter's future as soon as he leaves work for NBC for the next five years doing documentaries, for $2 million to $3 million a year. Even President Nixon, who was driven out of office in disgrace, stands to make two or three million dollars from his book and TV appearances.

With this kind of money being thrown around no one has any idea what President Carter's worth will be. But several big-name agents are already working on forming a Carter family publishing venture. Carter is as excited as anyone, and plans to use every penny of his book deal to install the best home entertainment system. The family plans to install 36-inch television sets in every room and a state-of-the-art home theater in the garage. The family is also planning to install a state-of-the-art home theater in the garage.

Rings found around Uranus; called major discovery

by Tony Ledwell
Associated Press Writer

MOUNTAIN VIEW, Calif. (AP) — Five rings have been detected surrounding the mysterious planet Uranus, and scientists said yesterday they constitute the first major structural discovery in the solar system in 50 years.

Until the sighting from an airborne space laboratory earlier this month and followup confirmation by earthbound astronomers, Saturn was believed to be the only one of the solar system's nine known planets to have such rings.

Details of the finding were discussed by researcher James Elliott, an astronomer at Cornell University.

Elliott said he and his coworkers at the Ames Research Center here were studying the stars around Uranus, the seventh planet from the sun, from the laboratory aircraft 41,000 feet above the Indian Ocean when the abrupt sighting was made.

The rings had not been discovered before, he explained, because the light reflected from the planet is usually so bright it obscures lesser reflections from the rings.

But on March 10, the planet's position on the nightside of earth provided the right light conditions for detecting the rings.

Elliott said the rings are similar to the rings around Saturn, but much thinner. Much more research remains to be done, he added.

"We don't know why they are so thin," he said. "They are only a few miles thin, and the thinnest one is 30 to 60 miles. Saturn's rings are thousands of miles thick."

"We can't really tell what the rings are made of," he said.

"One good guess would be some type of ice. One theory about Saturn's rings is that they are made out of snowballs."

One possibility, he said, is that the rings are composed of material present during the formation of solar system that never coalesced into moons or are remnants of a moon.

He also said the discovery of the rings could have a major impact on current understanding of Uranus.

Presently, scientists believe Uranus is four times larger than Earth and has a surface temperature of 300 degrees below zero, Fahrenheit. It is 1.7 billion miles from the sun.

After the National Aeronautics and Space Agency teams first reported the rings, observatories around the world were asked to confirm the sighting. Existence of the rings since has been confirmed from observatories in India and Australia.

The last major scientific discovery in the solar system was the planet Pluto in 1930.

AIA sponsors paper airplanes

The student branch of the American Institute for Astronautics and Aeronautics, will sponsor a paper airplane contest on Sunday, April 17, at 11 a.m. in the Center for Continuing Education basement.

The contest, to be held in Stepan Center, will offer prizes for planes in three categories: distance, endurance, and aerobatics. Awards include first place, $10; second place, $7; and third place, a dinner at MacDonald's.

All entries must be constructed from any paper substance including cardboard, newspaper or construction paper, size and weight are unlimited, but no wood materials are allowed.

A complete list of rules is available in the Aero Space Building or the third floor of the Engineering Building. For more details call John Tartaglione (1271).

Alcoholism film

I'll Quit Tomorrow, a film dealing with the treatment of alcoholism and the family's potential to help treat the problem, will be shown Wednesday and Thursday, April 13-14, at 7 p.m. in the audio-visual rooms in the Center for Continuing Education basement.

It takes a lot to become a leader in the Marines. You need hard training. Rigid discipline. Emphasized responsibility. A determination to win. Confidence in those you lead. And a sense of integrity inspired by the uniform and insignia of a Marine Officer.

If you want to make it—if you think you have what it takes to be one of our leading candidates—put your leadership to our test.

Learn to handle men, money, and material this summer at Quantico, Virginia. Management work-study program—transportation, room and board, books, and uniforms provided free plus $113 per week, see the selection team in La Fortune today through Friday.

2-YEAR NROTC SCHOLARSHIP OPPORTUNITY.

Immediate Benefits For Those Who Qualify

• FULL TUITION FOR JUNIOR & SENIOR YEAR
• ALL BOOKS
• ALL EDUCATION, LAB FEES
• $100 MONTHLY SUBSISTENCE

A lot of companies will offer you an important sounding title. But how many offer you a really important job? In the Navy, you get one job as soon as you earn your commission. A job with responsibility. A job that requires skill and leadership. A job that's more than just a job, because it's also an adventure.

IF THATS THE KIND OF JOB YOU'RE LOOKING FOR, CALL

Foregoing the usual post-grad­ uation alternatives of jobs, grad­ school, or marriage, St. Mary's '75 graduates Therese Booth and Joanie Durlacher embarked on a unique alternative—they became Holy Cross Lay Missionaries in Brazil.

Working with the Human Pro­ motion Center at Telemaco Borba, Parana, Brazil since Fall 1976, Therese Booth and Joanie Durlacher will leave February 20, 1977, while Durlacher will stay until February 1978. Both girls spent the summer in South Bend studying Portuguese before heading for Brazil.

"With the improvement in our ability to communicate came pro­ gress as well as a growing awareness of the need and conse­ quence of mission work," they said. "The Human Promotion Center (our mission work) under the direction of Sr. Rose Martin, attempts to attend to the needs of the poor in an area populated by approximately 47,000 people.

"This includes three favelas or slum areas, each located in a different neighborhood of the city," they continued. "It is difficult to describe the multitude of services which we provide without drawing on specifics."

The Holy Cross missions office encourages candidates to become volunteers in its programs. Ac­ cording to Sister Mary Ann Ueb­ ser, the Minnesota Mission Secretary, persons of college age or above, with a degree or work experience related to the mission, are still needed.

The mission provides a "good outlook on life, a new dimension of meaning, and resourcefulness."

These interested in the lay missionary program should contact the Holy Cross Missions Office, Bertrand Hall, St. Mary's (284- 4650).

Coffeehouse offers Hoagie special

by Maria Frigyesi

St. Mary's Social Commission is once again sponsoring the popular "Coffeehouse" at The Black Bar. Begun at the start of the second semester, the promotion will run April 29, every alternate Friday, according to Social Commission head Mary Kalssen.

This Friday the "Coffee House" will feature the trio Steve Bowser, Sally Kelly, and Mike Lewis, popular Nazar entertainers. They will perform from 8 to 9:30 p.m.

Marian Hoke and Pam Butcher will be free-flowing "freebies." Chip and dip will also be served, as before.

SAGA food services will continue to offer various specials at reduced prices. This week, the special will be an Hawaiian Free Flow Chip and Dip and will also be served as before.

Friday's special will be a free-flow chip and dip, sponsored by the Nazar Trio.

SANTA CRUZ DE TENERIFE* Canary Islands AP - Spanish offi­ cials for an analysis in the presence of KLM and Pan Ameri­ can officials were unable to identify the voices.

KLM released the last nine minutes of conversation recorded on the cockpit tapes of Royal Dutch Airlines Boeing 747's, the key to the why the dutch pilot began his fatal take-off run directly into the American jet.

Investigators said the KLM jet had not been given clearance to take off.

Both flight recorders were reco­ vered and impersonated by the Spanish, who are in charge of the investigation.

According to Dutch and American of­ ficials asked to report with two Spanish representatives in the tower Sunday when the connectivity ceased.

The dead toll in the crash rose to 577 as two of the 71 persons who survived the crash and were expected to live died overnight. All 71 escaped safely from the Pan Am jet, and the dead include 323 Americans.

One survivor is a U.S. Air Force passenger on the American plane, to the States, some bound to the States, some bound for Arica, on board the American plane.

Fourteen people, Dutch, British and American of­ ficials prepared to repatriate the hundreds of charred remains collected at a hospital. Officials said positive identification for many survivors will take 43 days, if they want to hear the tapes to see if there was a misunder­ standing.

An interdenominational funeral service for the victims was scheduled Wednesday night in a Roman Catholic cathedral near airport.

The chief U.S. investigator, Rebecca B. Evert, also is seeking a grant. The money will be used in the construction of the new sports and recreational facilities.

The facility was designated by C.F. Magnan, executive vice president of Chicago, and is being built by the Hickey Construction Co. It is to be completed by fall of 1977.

The Tri-level building will in­ clude basketball, volleyball, and tennis courts. The main area will house a gymnasium. The ground level will include faculty offices and team dressing rooms and showers. A partial third level will contain two racquetball courts.

The Holy Cross Educational and Charitable Trust gives support to community, food and unified appeal organization and community development and im­ provement of the area.

The last chance: pick up bikes on Friday

Students who stored their bicycles in the stadium during the winter and forgot to respond by Friday, between 2 p.m. and 4 p.m. This is the last pick-up time available.

by John O'Donnell

At the inauguration of Stepan Center, its purpose was to provide "a new facility for convocations, concerts, and other special events at the University of Notre Dame. Mary an goed prevent do believe that the building has been neglected and has failed to fulfill its service to the students.

According to Brother John Ben­

esch, Director of Student Activities, a lot of activities do go on, but that there are open days as well. Benesch explains, "Stepan Center is reserved for student activities. Once student activities are taken care of, then other departments can use it. If people have ideas that they would like to do, it's there to be used."

One difficulty Benesh mentioned is the size of the building. "Since Stepan is so large, its main intent is behind commercial, varsity, and physical education departments." Napolitano also made reference to the tight schedule which is forced upon interhall athletics. "Ever since the Rocke Memorial has forbidden interhall basketball games, we've had to cut down on the number of teams in each hall, which is opposed to the whole concept of interhall athletics. If we could find a way of using Stepan Center, we would be greatly de­lighted."

However, Napolitano also cited three drawbacks which at the present makes Stepan Center less attractive for athletics: concrete floors, the lack of dressing rooms, and the conflicting events scheduled by Student Affairs. Regard­less, if Napolitano could be assured of sufficient dates which do not interfere with student affairs, then Stepan Center could be increasing­ly used for student athletics.

Presently, the only athletic activity which occurs regularly at Stepan is women's volleyball. According to Ken Ricci, presi­dent of Student Union, the reason why more activities aren't planned for Stepan is because activities there do not draw well. "The only event that has gone well in the past is the homecoming dance, and that was only because the football team played Southern California that weekend. It doesn't draw too well because size is a problem—for it's too big for an intimate bar or dance floor."

Ricci stated, "the concerts at Stepan have been bummimg. An average year would include three concerts in Stepan resulting in an estimated total loss of nine to ten thousand dollars. "What Stepan is well suited for," Ricci stressed, "is the up­coming Jazz Festival. Here a casual atmosphere is created as the audience can recline on the floor." Remedies to Stepan's problems are not obvious. Ricci, however, offered possible solutions. "The first thing to do is to decide on a specific use. Stepan would be ideal as a round theatre to replace Washington Hall as a large auditorium. The other major possibility would be to use Stepan strictly for athletic purposes."

Detroit wildcat strike ends

DETROIT [AP] - Dissident Uni­ted Auto Workers at a Chrysler Corp. electrical plant in Indianapolis returned to their jobs yesterday ending a 12-day wildcat strike. A company spokesman here said members of UAW Local 1226 halted picketing in the afternoon, although absenteeism was high on the second shift. He said a normal workforce was expected Wednesday.

The 3,100-member local, which struck March 18, voted earlier in the day to return to work following a meeting with UAW international Vice President Douglas Fraser, who heads the UAW's Chrysler section, flew to Indiana­polis to urge the members to go back to their jobs. The interna­tional union had labeled the strike an unauthorized work stoppage.

The walkout at the plant, which produces auto electrical compo­nents was triggered by a fight between a foreman and a union steward.

On Monday, management fired Local 1226 President Larry Schick, three other officers, five commit­tees and 14 shop stewards for leading the walkout. The company also suspended 44 pickets.

In addition, a multi-million dollar damage suit filed by the automaker a week ago against the local is still pending in U.S. District Court. The suit seeks $218,000 a day in real damages and $1.5 million in puni­tive damages.

The company spokesman said the dismissal, suspensions and court suits were not dropped yesterday. But plant management had agreed to meet with representa­tives of the local today to try to resolve their differences.

Meanwhile, a strike by 2,500 members of UAW Local 323 con­tinued for a 10th day at the Ford Motor Co. assembly plant in the St. Louis suburb of Hazelwood, Mo. Ford said the walkout began March 20 over unresolved griev­ances concerning working condi­tions.

The plant normally builds 720 full-size Mercurys a day.

Another drawback is the poor acoustical system which is due to the cement floor, the steel ceilings, and the high space within the building.

Ricci suggested that Stepan would be ideal for an army party, but that such an event would lead to conflicts with Dean Roemer concerning the use of Stepan.

Ricci also discussed the trouble of arranging concerts for Stepan. "If a concert is relatively cheap—below $100—then it won’t draw. If a concert calls for a much larger sum of money, then we can’t afford it."

Earlier this year, Hall and dates were to make an appearance at Stepan for $600—which amounted to $1 per ticket. Within the week, the price increased to $12,000, which was too expensive for Student Union.

New WSND staff to take over

by Janet Liberti

The newly appointed WSND AM and FM department heads will assume their new positions April 1, according to Peter Goerner, newly appointed Station Manager. The annual selection, made by the present station manager and department heads, allows for "evaluation of where the station and the programs are," Goerner said. It also permits interested persons to apply for the positions each year.

Goerner, a former university major who will replace Dom Fanuele as head of all station departments, has been with the station for the past two years, and held the positions of promotions and relations manager last year. Goerner hopes to "make sure the station responds to the needs of Notre Dame and St. Mary's." Specifically, he plans to work for a more technically consistent sound on both AM and FM and to acquire more underwriting for the non-commercial FM stations. Goerner also intends to pursue more diversified on-air programs.

The new WSND management major, will continue his current position as program director. Thomas will oversee all aspects of programming, including news, sales, and promotions, said Goerner. He has been with WSND since freshman year, working on both AM and FM remote broadcasts and monitoring. Goerner has also handled the station's annual banquets.

Tom Weber, as chief engineer, is responsible for all technical aspects of the station, including installation, repairs, maintenance, remote broadcasts and monitoring. Weber has worked for the past three years as the engineering staff.

Ted Robinson will continue his duties as sports director of both the AM and FM stations. He is responsible for the sportscasts and broadcasts. For the past three years, Ted Robinson has done four remote-broadcasts of several sports.

Mike Murphy was appointed news director for both WSND AM and FM. Murphy will bring news programs, and news reporting will be under his direction. Murphy held the position of AM program director last year. He was also a member of the WKDQ AM news staff.

Goerner believes that "the many changes in the staff will make everything run more smoothly than it was last year," according to Goerner. Murphy and Weber have "a good team." Goerner said. Murphy and Weber have "a lot of experience and a good combination of skills," Goerner added. Weber has worked for the station since junior year, and Murphy has been with the station since freshman year. Goerner believes that "the many changes in the staff will make everything run more smoothly than it was last year," according to Goerner. Murphy and Weber have "a good team," Goerner said. Murphy and Weber have "a lot of experience and a good combination of skills," Goerner added.

WSND is an active station and has a strong audience base. The station has a variety of programs, including news, sports, and music. The station also has a strong student following, with many students working at the station. The station is also involved in community events and organizations.

The station has a strong presence on campus, with many students involved in the station. The station has a variety of programs, including news, sports, and music. The station also has a strong student following, with many students working at the station. The station is also involved in community events and organizations.

Last spring, for the first time in 42 years, the Notre Dame team took the diamond under a new coach. Before the Irish could implement the new mentor, Dr. Tom Kelly, winning nine of their first 12 games, the spring, though Kelly doesn't prom¬
ounce them, seemed to look like being an exciting season in store for the Irish.

The Notre Dame baseball system is not as new to Kelly as it might appear. Serving as an assistant to the man he succeeded, Clarence "Jack" Klein, Kelly oversaw the Notre Dame system from the inside for many years. "It was a tough position in an administratively apportioned role," said Kelly. "I didn't want to enter the fray," he added. "With all due respect, I had to be a leadoff man at center and every slot from first to third in the batting order." After a "long look," Kelly has promised the Irish fans he will try to make the program a "contender in college baseball." Combining solid pitching with good hitting, the Irish have nine returning competitors a run for their spots, Kelly said. Kelly is back in his third year in the spring break trip to Florida. Kelly needs to know everyone last spring, and get a feel for the players. Kelly commented Kelly, "It was good for me to see the way the Irish baseball team has changed in the last few years. Kelly also had a dream that was to get to know everyone last year. "I have a dream," Kelly said, "and it's to get back to college baseball as the leadoff man at center and every slot from first to third in the batting order."
