Director of University Housing Edmund Price said yesterday that it’s still too early to tell for certain if just-in-time housing will meet the demand next year.

"I can't tell yet at this stage of the game," Price said, adding, "The only time we'll know is when we get the housing contracts in and count them. Then we'll know if we need to move the program up the date that the housing contracts are due. "

he said.

Price stated that he has plans to move up the date that the housing contracts are due. "I think we have some dates. I would like to leave the contracts in by the end of August vacation. By this time I'll be able to tell if people will be bothered out," he said.

Plane crashes in Rockies

WALDEN, Colo. (AP) - Searchers on snowmobiles rescued 21 persons yesterday, including an infant in his mother's arms, who survived the crash-landing of a twin-engine commuter plane on a snow-covered mountain peak in a remote area.

The plane lost in the air about an hour and there was no warning before the crash. The pilot radioed that he was having turbulence and ran right into the clouds, said the plane, which was reported in the air about an hour and there was no warning before the crash. The pilot, said the plane, which was reported in the air about an hour and there was no warning before the crash. City to lay off civil workers

CLEVELAND (AP) - Police and firemen reacted angrily yesterday to the city's proposal to lay off 400 safety employees in an effort to keep Cleveland from becoming the first major U.S. city to default since the Depression. Mayor Dennis J. Kucinich claims it will be necessary to lay off 250 of the city's 1,900 police officers and 150 of its 1,000 firefighters. Thursday it or sell $5.2 million of its land to stave off default by Dec. 13 and balance the 1978 budget.

Students flush in protest

BALTIMORE (AP) - Students at the College of Notre Dame who dealt the school a royal flush have wound up in hot water over their protest designed to undermine mid-term exams and get a longer Christmas vacation. By yesterday afternoon, about 20 students admitted taking part in a synchronized flush of all 68 toilets in Doyle Hall, a dormitory housing 100 women. But apparently all the Sunday night action dubbed "Operation Royal Flush," did was knock out the dorm's water supply until plumbing was repaired Monday afternoon. Sister Kathleen Fesley, the college president, said the protest failed to change the college's exam and vacation schedules.

Weather

Partly cloudy today with highs in the mid to upper 30s. Becoming mostly cloudy again tonight with a slight chance of snow. Lows around 30. Cloudy with snow likely tomorrow. Highs in the low to mid-30s. The extended outlook for Friday through Sunday calls for a chance of snow and snow showers in the afternoon. Lows in the upper 20s to upper 30s and high 30s to low 40s. Saturday there will be a chance of snow and snow showers in the teens to low 20s.

OBUD

Q. Where can I get discount theatre tickets?
A. At the Student Union Ticket Office, open 1-8 Mon - Thursday, 9-3 Friday. These student tickets are $1.75 each, and go on sale 48 hours in advance. They're usable at any area Film Theatre, Town & Country, Riverpark, and the Scottsdale Mall.

Q. How many finals am I required to take in one day?
A. 2 exams in any 24-hour period is the maximum. If you have more than that, talk to the professors about re-scheduling. You don't have to stand for an overload, but it is the student's obligation to make any arrangements.

Q. Where can I get a ride to the airport?
A. Call Ombudsman with your name, address, and phone. You'll be called according to your destination, which goes by its telephone area code. Specify whether you need a ride/rider just for this holiday, or whether you'd like to be notified any time something's available. Then check back if you're hard to reach or you'd like your name removed.

Q. What if I have an absolutely brilliant scheme for improving life under the Dome?
A. Get any and all ideas to the Ombudsman, 2nd floor LaFortune. Drop them off or send them via campus mail. If you can't write, call. If it's at all feasible, we'll try to implement it. The little park in front of Nieuwen's was "just a suggestion."
Lottery remains uncertain: Price

Editor's note: This is the first article in a two-part series dealing with research and teaching at Notre Dame. Today's article covers an issue which received the Nobel Prize in 1977 for its work, is doing Human Rights Work with a petition drive tomorrow and Sunday, designated as Human Rights Day.

The petition is to Senator Birch Bayh and Richard Lugar of Indiana to ratify the Civil Rights Covenants of Human Rights which will be introduced to the Senate early next year.

The covenants, which have already been ratified by more than 50 nations, are international laws with such basic standards for living. Both have already been signed by President Carter, but must be ratified by the Senate. If the covenants aren't ratified, other nations won't take U.S. stands on human rights seriously.

Petitions will be available at the library and at the Notre Dame and Saint Mary's dining halls during these days. Petitioners will be informed of the occasion.

The Covenant on Civil Rights guarantees such basic civil rights as freedom of movement in and between countries, fair trial of criminal charges, privacy, freedom of thought, conscience and religion, peaceful assembly and the right to form and join trade unions. This covenant prohibits discrimination on such grounds as race, color, sex, nationality, religion or political opinions. It also bans torture, arbitrary arrest, slavery and other infringements on a person's right to a secure life.

Al to petition for Human Rights Week

Amnesty International (AI), an international human rights organization which received the Nobel Peach Prize in 1977 for its work, is doing Human Rights Work with a petition drive tomorrow and Sunday, designated as Human Rights Day.

The petitions are to Senators Birch Bayh and Richard Lugar of Indiana to ratify the International Covenants for Human Rights which will be introduced to the Senate early next year.

The petitions, which have already been ratified by more than 50 nations, are international laws with such basic standards for living. What makes research important?

Professors also are concerned about the University's expectations concerning the importance of research work.

"We're all trying to do what's best for the students," he adds.

Observer runs last issue on Friday

The final issue of The Observer for Dec. 8, the final issue for the spring semester will be Fri., Dec. 8. The initial issue for the spring semester will be Fri., Jan. 19, 1979.

Fall subscribers who wish to extend their subscription for the spring semester should remit $8 payable to The Observer, Box Q, South Bend, Ind., postmarked before Jan. 1, 1979. To insure delivery of the Cotton Bowl wrap-up and *Year in Review* features which comprise the initial Observer for the spring, this cut-off date will be strictly adhered to by our Circulation Department. No complimentary copies will be allowed.

Dear Children belonging to the Notre Dame-Saint Mary's Family (i.e., Faculty, Administrators, Married Students, Maintenance Staffs, Office Personnel, etc.):

Along with your parents you are invited to a St. Nicholas Day party this evening, Dec. 6, St. Nicholas' Day. In the LaFortune Ballroom, following the lighting of the Campanile Christmas tree in front of LaFortune at seven o'clock, Santa Claus will be there, along with elves, gifts out of Santa's bag, a magic show, music, and good things to eat.

Students who are friends of St. Nicholas (alias Santa Claus) are also invited.

Rev. Robert F. Griffin, CSC, The University Chaplain

CAIRO, Egypt [AP]—The lion's body of the Sphinx is firm, but the human face of the majestic monument is showing the effects of 5,000 years of howling sandstorms, scorching desert days and chilling nights.

Its seven-foot nose has been missing for centuries. The left eye is sagging and the entire left side of the 13-foot face is distorted.

"The Sphinx is sick," the daily newspaper Al Akhbar reports. "It's suffering from acute anemia. Unless the right medication and treatment is applied, the neck could give in to begin with."

But the method of treating the time-honored patient sharply differs from those of the ancient Egyptians. "It's suffering from acute anemia. Unless the right medication and treatment is applied, the neck could give in to begin with," says Zahi Hawass, inspector of the Giza pyramids section of Egypt's antiquities department. "The outer layer is peeling off all over."

"If badly needs another shot," says Zahi Hawass, inspector of the monuments section of Egypt's antiquities department. "The outer layer is peeling off all over." The father of terror.

But another expert, Ahmed Salem, the department's director of research and restoration, advocates building a "windshield" around the monument. "It needs trees around it to protect against sandstorms," he told Al Akhbar. "Those sand particles become a cyclone—they are carried away like dust."

"But another expert, Ahmed Salem, the department's director of research and restoration, advocates building a "windshield" around the monument. "It needs trees around it to protect against sandstorms," he told Al Akhbar.

Behind the Aging Wonder

The Sphinx has been one of the world's most famous landmarks for thousands of years. It stands as a testament to the ingenuity and skill of the ancient Egyptians, who created this magnificent statue over 4,500 years ago.

Despite its ancient origins, the Sphinx is far from invincible. Over the centuries, it has been subjected to countless storms, floods, and other natural disasters, all of which have taken their toll on the statue's surface. The sandstorms that sweep across Egypt have left their mark on the Sphinx's nose, which remains missing to this day.

Restoration efforts have been ongoing for decades, but they have been met with mixed results. In recent years, authorities have taken steps to protect the Sphinx from further damage, including the installation of a "windshield" to shield it from the sandstorms.

The Sphinx remains a symbol of Egypt's rich history and culture, and it continues to captivate visitors from around the world. Despite its age, it remains a striking reminder of the ingenuity and skill of the ancient Egyptians. With proper care and protection, the Sphinx will continue to stand as a testament to their legacy for generations to come.
**Fontana decorates Christmas trees**

**DETOIT (AP) — Shoes by Gucci. Fashions by Halston. Now there are Christmas trees by Fontana. Jeff Fontana hires out to affluent Detroit-area folks who pay him $300 to $1,000 to decorate their Yule trees.

His only rules: no colored spotlightings shining on aluminum trees, and no plastic, revolting Santa Clauses.

"I'll even decorate a plastic tree if it's in keeping with the look a client wants to achieve. You have to look at the tree and the people. Things have to balance," Fontana stresses.

For the client trying to buy elegance, Fontana might remove some inner branches and twine silver garlands around the center of the tree. Pheasant plumes, gold sprays and satin bows go on the branch tips.

"I try not to overdo a tree," the decorator says. "But some of my clients go a little ga-ga at Christmas. One, he's an attorney, he's like an 8-year-old kid at Christmas."

"He's got a plastic Santa with a button for a nose. You press the nose and an Oriental voice says, 'Melly Christmas.' I've tried hiding that thing but he insists on using it every year."

**Due to fuel shortage**

**Price of gasoline will increase**

**NEW YORK (AP) — Motorists will be paying a couple of cents more for a gallon of gasoline within a week because of the current tight supply of the fuel, industry analysts said today.

"Before next week is out, you will see a few cents increase in most markets," said Dan Lundberg, publisher of the Lundberg Letter, an influential industry newsletter. "This won't take place in specific areas, it will take place on a national level - and especially in rural areas."

"There's no question the shortage is going to bring some insecurity," said Charles Mattie, a West Hartford, CT, Exxon dealer who is president of the National Congress of Petroleum Retailers.

"I would expect to see a few cents upward movement."

The increase is expected to last as long as there is tightness in supply. The oil companies estimate that the tight supply will last about a month, but some experts say it will be longer. The oil companies and the Energy Department say there is no shortage.

According to figures compiled by Lundberg, the price of a gallon of gasoline has already started. The national average price of a gallon of gasoline rose 1.5 cents in November. So far this year, the national average is up by four cents a gallon.

In Indianapolis, for example, premium gasoline containing lead cost 73.3 cents a gallon in November. In Des Moines, it was up 2.7 cents to 76.7 cents a gallon, according to Lundberg.

The prices rise stems in part from tightness in gasoline supplies. Shell Oil Co., the nation's largest gasoline producer, has cut supplies of all products to service stations. Standard of Indiana, which sells Amoco gasoline, has cut dealers' supplies of unleaded gasoline.

Other major companies say their supplies are also light, but they haven't announced plans to ration the product to dealers.

Dealers are raising their prices to compensate for what in many cases, especially Shell and Amoco, will be lower volumes.

"It's just economics," said Mattie. "If a dealer now only has 75 cases, especially Shell and Amoco, he's got a plastic Santa with a button for a nose. You press the nose and an Oriental voice says, 'Melly Christmas.' I've tried hiding that thing but he insists on using it every year."

"I try not to overdo a tree," the decorator says. "But some of my clients go a little ga-ga at Christmas. One, he's an attorney, he's like an 8-year-old kid at Christmas."

"He's got a plastic Santa with a button for a nose. You press the nose and an Oriental voice says, 'Melly Christmas.' I've tried hiding that thing but he insists on using it every year."

Professors express ideas on research and teaching

O’Meara told new faculty members that, “Our faculty is expected to do first class research and to publish it.”

Press agrees with the provost. “If you don’t publish your work it’s worthless,” he remarked, going so far as to define research as “meaningful publication.”

However, publication in major journals can be difficult, with students and the authors.

work in the journals were graduate

6 the observer

article rejection rates running at

ing so far as to define research as

meaningful publication.”

It does appear that publication is crucial, however, because the pres­

ent has made it clear that letters of eval­

uation from established faculty at other institutions are essential in as­

sessing the significance of a professor’s research. Without publica­

tion in recognized journals, it would be difficult to gain recognition anywhere off the

medium campus.

Commenting that research is business in the University that helps cut operating costs, the unnamed source took another view on the question of what makes research necessary.

“The importance of research seems to be in how well it is funded by outside sources,” he said.

According to the source, by receiving a research grant from such an organization as the National Science Foundation, a professor can, in effect, “buy up teaching time.” By following this course of action, faculty members can reduce their teaching loads or take com­

plete leaves of absence during the time they are conducting research.

Only a small minority of the faculty are involved in such an arrangement, however, according to the source.

revenue is closely related

The tenure system is tied to discussions of research, especially for untenured professors, because tenure has made it clear that one cannot expect to be promoted without a solid research background.

In his August address, O’Meara told the faculty, “Three things: excellent teaching, distinguished research, compatibility with the goals of the institution (are needed). Not some of the above. All of the above.”

Where this leaves presently tenured faculty, if they fail to live up to such research expectations, is in question.

O’Meara admitted that there are some faculty members who are not active in research, adding, “perhaps their job security (that comes with tenure) is excessive.”

Tenure is defined in the Faculty Handbook as “permanence of appointment.” This means that a faculty member who is tenured may be removed under such extreme circumstances as neglect of academic duties, conviction of a felony or “disregard for the Catho­

lic character of this institution.”

The unnamed source agreed with O’Meara that there are professors who fail to live up to research expectations once they secure tenure. “Most of the pressure is on the associates (who have not yet secured tenure), but for the full professors, there are no more carrots,” the source remarked.

He added, however, that there are several factors such as adher­

ence to a sense of duty and enjoyment that continually cause professors to continue their re­

search work. At the departmental level, informal pressure from the chairman as well as smaller pay increases than normal also make keeping up one’s research work a good idea.

However, Conway pointed out that tenure notwithstanding, “it’s not impossible to get rid of some­

one under the present situation if someone really wants to get rid of you.”

Faculty members make suggestions

It is clear that many of the faculty members feel that there are prob­

lems concerning the issues of research and tenure at Notre Dame, and many of them also have expressed suggestions to improve the situation.

Conway stressed that there should be enough flexibility in the tenure selection process to allow for the promotion of people who are not strictly research-oriented.

However, O’Meara’s statement to a university CAP (Committee for Advancement and Promotion) system in February notes that, in some cases, individ­

ual departments have more rigid rules for advancement than the University.

Press suggests that the University should aim for the maintenance of small, high-quality graduate programs whose professors are highly regarded in their research. To balance the graduate programs, he advocates an excellent under­

graduate level as “role models,” ress emphasized, “Teaching at an undergraduate level doesn’t mean less quality, but a lot less effort. There’s a lot less concern with the details and more concern with the synthesis of your particu­

lar subject to make it more interest­

ing to students who aren’t going to

By Ray O'Brien

While Notre Dame's guards and forwards have already been tested defensively by high scoring players at the University of Florida and Valparaiso games, tonight the Irish centers will get to show just how ready they are as they go up against UCLA center Jerry Butler.

Jerry is a seven-foot pivot man that has been the wildcats focal point on offense. The transfer student from jc college can score points in nearly one game to date. He is also a good passer off the block for Bill and Laimbeer before he meet their team at UCLA in the Pavilion on Saturday night.

This year has always been a key area to any team's success; so it says something for Digger Hackett's squad that his two co-captains are stationed there. It has been a while since Notre Dame boasted a dominated center but Flowers showed in the Rice game that he can be a big influence on the team's success, as he is in which so far so lacking last year.

"This year is going to be different from last year," explained Flowers after winning MVP performance in the 105-61 trouncing of the Owls.

"I wish I was the type of player who could step on the plane (going home) and play it over," but I'll get a chance to do that Monday and Philadelphia resume the series. Then there is the job of winning.

Eventually, that was exactly what happened as Monday night she never had seen the game. But UCLA is two games away from finishing their 1978-79 season with an impressive victory over the Huntington College Foresters.

The Belles were led to their victory by Diane Kucik and Mark Kelly, who scored 14 points apiece. Huntington jumped to a three-point lead three minutes into the game. A Mod Holland drive at 11.55 p.m. at the Angela Athletic facility.

The next game on the schedule is a tough rebounding of Huntington's Linda Haye kept the Foresters in the game.

Kelly Tripucka has accounted for all of the clubs who bid for him. "I wish I could have played a year with each of them," he said.

At that point, Bill Giles, executive vice president of the Phillies, called Rose and asked the owner of the Phillies, and said, "I wish I could have played a year with each of them," he said. At that point, Bill Giles, executive vice president of the Phillies, called Rose and said he had to make the 37-year-old super star on Thursday.

"He said he would get back to me if anything developed," Rose said. "I didn't take the best offer, but I did.

After the game, Flowers' statistics bear out just how good of a player he is this season. The senior co-captain in his first year with each of them," he said. At that point, Bill Giles, executive vice president of the Phillies, called Rose and said he had to make the 37-year-old super star on Thursday.

"He said he would get back to me if anything developed," Rose said. "I didn't take the best offer, but I did."

"Tonight I was just in the right spot, so it's no wonder I played well. But UCLA is two games away from finishing their 1978-79 season with an impressive victory over the Huntington College Foresters.

"He said he would get back to me if anything developed," Rose said. "I didn't take the best offer, but I did."

"Tonight I was just in the right spot, so it's no wonder I played well. But UCLA is two games away from finishing their 1978-79 season with an impressive victory over the Huntington College Foresters.

The Belles were led to their victory by Diane Kucik and Mark Kelly, who scored 14 points apiece. Huntington jumped to a three-point lead three minutes into the game. A Mod Holland drive at 11.55 p.m. at the Angela Athletic facility.
