Hall Councils react to abolition of parietals

Editor's Note: The following article deals with student reactions to a recent decision made by the Carroll Hall Council to "abolish" parietals. A follow-up story in tomorrow's Observer will deal with the administration's reaction to the council's move.

The Stanford Hall Council voted unanimously to abolish parietals at its regular weekly meeting last night. Ed André, Stanford Hall president, called for organization among dorms to support the movement initiated by Carroll Hall. André noted that there were several Stanford residents who were willing to work on this organization, and said he was anxious to see action instead of just talk. Last night the Stan Ed's hall council voted to poll the entire hall on the abolition of parietals. Bill Vita, hall president, stated that the council was addressed by three residents of Cantor Hall, including the originator of the movement, Mark Mocarski.

"The vast opinion (expressed at the meeting) was great dissatisfaction with the way the University was run in general and particularly with parietals," Vita explained. He added that a quick poll of one floor disclosed 30 residents in favor of abolishing parietals and one against. If the whole dorm feels that way, I guess we'll go ahead and support the action, Vita concluded. The results of the poll will be discussed at a special meeting of the hall council tonight.

Many dorms conducted hall council meetings on Tuesday night, and the resulting positions taken by the groups varied from those strongly supporting the Carroll action to those considering the move to be ridiculous. The Carroll decision came at a meeting on Monday night by a group of residents who hope that their idea will catch on campus-wide as a way of protesting University policies.

Speaking for the residents of Holy Cross Hall, Dan Darfler, dorm president, assessed the situation by saying, "I think the students are pretty encouraged by it (the Carroll action)... a lot of people are going to take it seriously." Pangborn and Flanner Halls are examples of dorms that took an even stronger stance. The hall councils of both dorms voted in unanimous or near-unanimous decisions to offer support to the Carroll group.

"If the Carroll residents start the ball rolling, we'll be with them 100 percent," remarked Tom Paese, Flanner Hall president. Joe Marrero, Pangborn Hall president, echoed Paese's comments, pointing out that his dorm is taking a similar position towards the parietals' abolition.

"We're going to lay back for now and let them (Carroll residents) lead the way. They've already got it started, so I don't want to interfere with them," Marrero said. Others are less positive of their stand on the issue, adopting "wait and see" attitudes.

For US and China

Agreements signify new era

WASHINGTON (AP) -- President Carter and Teng Hsiao-ping declared "the honeymoon will continue," signed scientific and cultural cooperation agreements yesterday, marking the start of a new era of cooperation between the United States and China.

Shortly before the signing ceremony in the White House East Room, climaxing the Chinese vice premier's four-day official visit to Washington, Teng blazed the Soviet Union in a nationally televised interview as the "main booted of war" in the world.

In separate interviews with U.S. print and broadcast correspon-
dents, Teng urged the United States, Japan, Western Europe and the United Nations to use their influence in "solid, down-to-earth united action" to thwart Soviet aggres-

sion around the world.

Teng also pledged very effort to achieve a peaceful resolution ofTaiwan and mainland China matters. The Sovernment, he said, has done that for tactical reasons he could not foresee use of armed force to gain control of the island stronghold of the nationalistic regime.

Tang, who says he is intent on pursuing a balanced course in U.S. relations with the Soviet Union as well as China, said of his talks with Teng: "We have agreed to consult regularly on matters of common strategic interest. Obviously the security concerns of the United States do not coincide with those of China, nor does China share our responsi-
bilities. But a strong and secure China is an important contribu-
tor in solid, down-to-earth united action is

ND lat professor participates in 'friendship delegation' en troops stage display of strength

TEHRAN, Iran (AP) -- Tanks and thousands of troops staged a
n Massive display of strength in the streets of Tehran yesterday to show that Ayatullah Ruhollah Khomeini's imminent return does not signal government surrender to his creation of an Islamic state.

Prime Minister Shapour Bakht-

iyar, saying Iran is in a "very
critical and dangerous period,"
told Iranians in a radio and television broadcast that the gov-
ernment would "resist chaos and
doubtful elements." He said,
"The government will not permit the regime of the country to be held by anyone (by) any foreign government."

Three anti-government demonstra-

tors, including two shot by troops near volatile Tehran Uni-

cerity, were killed yesterday, hospital sources said.

In Paris, Khomeini said he will return to Iran on Thursday, ending nearly 13 years of exile. Millions are expected to greet the opposition religious leader, and he said he would not be intimidated by the show of mili-

tary force.

A spokesman for Khomeini concurred that after reports reached Paris of troops taking up new positions near Tehran's Mehrabad airport, some fol-

lowers urged him to postpone his return.

"But the ayatollah has made his decision and that is it," the spokesman, Sadegh Ghasrba-

deh, told reporters in Paris.

Soviets execute three for subway bombing

MOSCOW (AP)-The Soviet government has executed three citizens convicted of setting off a bomb in a Moscow subway car that killed from four to seven persons, Tass said yesterday. The official news agency said the verdict was handed down Friday to Armenian dissident Sosyan Zadikyan and the two unidentified "accomplices," but gave no details of the execution. Human rights leader Andrei D. Sakharov said Zadikyan was not in Moscow when the bomb exploded Jan. 8, 1977, and that the KGB secret police might have planted it to discredit the dissident movement.

I&M Electric seeks appeal

FORT WAYNE, IND (AP)-Indiana and Michigan Electric Co. officials, described as "somewhat alarmed," will appeal a federal judge's order that I&M pay $12 million in damages to 10 municipal utilities, spokesman Vince LaBarbera said yesterday. U.S. District Judge Sharp ruled Tuesday that I&M violated federal and state anti-trust laws by engaging in monopolistic practices in 10 cities and towns in Indiana and Michigan. The municipalities charged in their suit that I&M had attempted to oust their utilities out of business by charging exorbitant wholesale power rates. "Since we keep our rates under the regulatory levels set by the state and federal government, it's difficult to understand," LaBarbera said.

Earthquake shakes New York, New Jersey

FERTH AMBOY, N.J. (AP)---Parts of New Jersey and the New York metropolitan area were startled by a minor earthquake that seismologists said registered 3.5 on the Richter scale. No injury or major damage was reported. The tremor was felt for three to five seconds, with the center registering at Chequessake State Park in New Jersey. It was felt in the New York City boroughs of Brooklyn and Staten Island, and in Middlesex, Monmouth and Union counties in central New Jersey on Tuesday.

Nurse skis to patients

CHICAGO (AP)---Nurse Linda Elkis took up cross-country skiing as a hobby several years ago but never thought it would come in handy in getting around Chicago to take care of patients. Elkis is one of eight nurses employed by North Side Home Health Care, Inc., a private non-profit organization. Since heavy snow has closed many Chicago side streets, she drives her car as far as she can to each patient's home as she can on main arteries. Then she does skis and glides across side-street snow drifts. Most of Elkis's patients are on Medicare. She provides medication, therapy and even food when necessary.

Weather

Snow diminishing to flurries this morning and becoming partly cloudy during the afternoon with highs in the upper teens. Increasing cloudiness and cold tonight. Low around 5. Chance for snow tomorrow. Highs around 20. Chance for snow decreasing to less than 20 percent today.

Checking accounts hit by raise in service charges

St. Joseph Bank & Trust Co., which controls a large part of student checking accounts at Notre Dame, is raising its service charge rates, effective today. News of the hike, which will push service charges up to as much as $4 per month, prompted a survey of area banks by a Student Government Task Force. The Task Force, headed by senior Mark Hurton and sophomore Randy Hack, compiled data which show that the increases by St. Joe Bank will bring it in line with the service rates of two other major area banks.First Bank and American National Bank. Another area bank, National Bank, is also in the process of finalizing an increase in service charges.

A St. Joe official, who attributed the hikes to spiraling inflation, emphasized that it is the first time in 16 years that the bank has increased this type of charge. "Our costs are going up," the official stated, "and low balances are an expense to us. We like to encourage higher balances in savings accounts rather than make the charges." With the new increases, St. Joe Bank will charge $4 per month for checking accounts with less than $100 minimum balance. (continued on page 4)

Amtrak proposes cuts in passenger service

INDIANAPOLIS (AP) - Rail passenger service would be discontinued for most of Indiana under a new Amtrak Transportation plan to restructure the statewide system.

The plan, which would be effective Oct. 1, but is subject to congressional approval, drew immediate criticism from Gov. Otis Bowen's administration.

Three of the five Amtrak trains now serving Indiana - the north-south Floridian, the east-west National Limited and the Cardinal - would be eliminated. That would mean no rail passenger service for Lafayette, Bloomington, Richmond, Peru, Marion, Muncie, Indianapolis and Terre Haute.

The Lakeshore Limited, providing service from Chicago to New York and Washington through South Bend, Elkhart and Gary, would be maintained.

The Broadway Limited, also connecting Chicago, New York and Washington, would be rerouted through South Bend and Elkhart rather than Fort Wayne.

"It virtually wipes out rail passenger service in Indiana," it amounts to the end of Amtrak as a truly national rail passenger system," Sen. Birch Bayh, D-Ind., transportation adviser to Bowen, said.

Watt said the recommendation to shut down the Cardinal, once named the James Whitcomb Riley, was not made by the Broadway Limited and the National Limited are really disturbing.

He said new equipment was needed for rail passenger service in Indiana. It amounts to a total of four trains Amtrak as a truly national rail passenger system.

Bayh said the restructuring is necessary because "we have not been getting the kind of service hoped for when Amtrak was created back in 1971, and it is equally clear that the federal tax is not bottomless and cannot continue unending and ever-increasing subsidization of a system that gets worse by the day.

"It said the case arguing that Amtrak service should be eliminated for being uncompetitive and ever-increasing subsidization of a system that gets worse by the day.

"If any state feels it is imperative that Amtrak service should be eliminated for being uncompetitive and ever-increasing subsidization of a system that gets worse by the day.

"Amtrak service should be eliminated for being uncompetitive and ever-increasing subsidization of a system that gets worse by the day.

Packing lot snow removal continues

Because of the number of complaints by students, Security and Maintenance, the Student Government has come up with a plan for snow removal in D-1 and D-2. All students must move their cars to lots C-3, C-4 and C-5 by 8 a.m. Saturday.

Students are then asked to move their cars back to D-1 and D-2 by 2 p.m. because the cars C-3, C-4 and C-5 are needed for the basketball game that night.

Students needing jumper cables, shovels or any other form of assistance should stop by the Security Office. Security will notice the plan and Maintenance will clear the lots Saturday morning.
In response to students concern
Saint Mary’s retains gynecologist

by Pam Dugnan

In response to a campus-wide appeal, the services of gynecologist Dr. Samuel Bechtold have been retained by the Saint Mary’s Health Services for the spring semester.

According to Student Body President Gail Darragh, Dr. Bechtold will be available in the student infirmary in Holy Cross Hall Thursdays between 10 a.m. and 12 noon on the following dates: Feb. 1, Feb. 8, April 5, 12, 19, 26, and May 3 and 10.

The need for a gynecologist on campus has been a major concern of many students for the past several years. Positive action was finally taken last semester when a questionnaire dealing with the possibility of a resident gynecologist was issued to the student body.

Seventy-four percent of the responses agreed that they would definitely use these services. Also, an overwhelming majority concurred that payment for any type of service rendered should be based on individual need. A standard $5 fee will be charged for any type of routine examination. Billing is confidential and fees will be paid through the Student Billing Office.

Bechtold requires students to call for an appointment to insure proper care and attention to each pattern. He is also willing to visit the dorms to answer questions concerning the various services that are accessible on campus.

Student reactions concerning this new health program are mixed. "It's good to have a service like this on campus. It's much easier to take advantage of these services than to look up a doctor's address and make an appointment," said one student.

Other responses include having a preference for a woman gynecologist.

Dr. Bechtold is a respected member of the South Bend community. Although he has retired from his gynecology practice, Bechtold still teaches obstetrics and gynecology at Saint Mary’s.

"There has been a general consensus voiced by the majority of the students for gynecological services on the campus. Due to the efforts of several students this year and in previous years, we have these services available," says Darragh.

"We have these services available. We're close to the Student Billing Office. We have to give another thought to what kind of a Middle East we might see in a couple of years," says Dr. Bechtold.

Whatever happens, it is not likely to be translated into a direct military threat, Israelis believe. Iran is more than 600 miles away, and Iran's Persian population - not Arab, though Moslem like them - is not expected to take an active role in the Israeli-Arab conflict.

One official, imagining the worst possible military response, said that Iranian acquiescence might allow Iran and Iraq to solidify an alliance of radical adversaries on Israel's eastern front - the two enemies have already indicated they are getting together. Such a Soviet tie could solidify an alliance of radical adversaries on Israel's eastern front - the two enemies have already indicated they are getting together. Such a Soviet tie could solidify an alliance of radical adversaries on Israel's eastern front - the two enemies have already indicated they are getting together. In the Mid East

Iran conflict stalls peace talks

TEL AVIV (AP) - The strife in Iran casts a dark shadow over Israel by complicating the peace talks with Egypt, threatening energy supplies, possibly endangering Iranian Jews and underpinning a rare tie between the Jewish state and a Moslem nation.

When demonstrators in Tehran burned portraits of Shah Mohammad Reza Pahlavi, Israelis saw a major threat to their silent supporter of Israel under attack.

Now that the shah has been driven from his country, there is deep concern here over what will happen next.

Foreign Minister Moshe Dayan worries that Iran's surge of Islamic fundamentalism may spread to the Arab nations, including the one-peace-partner, Egypt.

"It is like throwing a stone in a lake," Dayan said this week in his first public speech on the subject. "The waves around it are really spreading towards all the Arab countries. We have to give another thought to what kind of a Middle East we might see in a couple of years." His officials.

Wherever happens, it is not likely to be translated into a direct military threat, Israelis believe. Iran is more than 600 miles away, and Iran's Persian population - not Arab, though Moslem like them - is not expected to take an active role in the Israeli-Arab conflict.

Unite and abolish parietals.

The motion to abolish parietals which unanimously passed the College Council last week was one of the first positive steps taken by the students to change a University regulation in recent history. This motion does not at all affect the University regulation on visitation. At the very least, it will demand the full attention of the HPC. It is now high time that the administration be forced to make a University-wide statement on the rationale behind this issue.

All hall presidents derive their power from their elected position, not from any responsibility to hall residents. This responsibility is shared by the hall council. Carroll Hall has brought their challenge to the attention of the HPC. It is now each hall president's responsibility to represent the viewpoint of the hall residents if the hall presidents do not follow through with Carroll Hall's challenge to the administration, the abolition of parietals will fail. And what is worse, the hall presidents will fail the students.

RA applicant protests cut

Dear Editor:

The following incident is being related here so that no one in the University community will ever have to suffer from similar problems again.

A total of 36 RA applicants from a total of 56 eligible applicants were interviewed for the position. This is simply cut from further consideration by the current hall staff. These 36 applicants were never interviewed nor given the opportunity to apply for RA positions to any member of the hall staff. Of the remaining 20 applicants, 6 will be selected to be RA.

Numerous members of Keenan Hall feel that this action is tactless and downright unfair. Especially since applicants were told that they would be objectively interviewed perhaps with some assistance from outside the hall. Currently there are many applicants (56) but there are also many days (20) until the deadline for packing RA's. Perhaps two panels of four members each could have interviewed the candidates at ten minutes per candidate, 200 hours. If there were intensive interviewing of 15 or so surviving candidates. Certainly the future of a hall is not nearly as important and the alienation of nearly half of next year's Keenan seniors too dangerous.

Whatever happened to democracy and openness? Let's hope it still survives in some halls.

The Chinese are Coming

**art buckwald**

WASHINGTON—FBI Director William Webster told newspapermen the other day that, with the recognition of the People's Republic of China, the United States could become over­ run with Chinese spies pretending to be students and diplomats.

The FBI is charged with keeping an eye on foreign spies in the country, and Mr. Webster says there are about 20,000 Chinese on file. If only 2,000 Chinese envoy plus 100 students were permitted to enter the country in the first year, the FBI would have to keep an eye on each one. This would require three agents working 24 hours a day to watch every Chinese person.

The Federal Bureau of Investi­ gation could handle this number, but in a few years the People's Republic might insist on sending over tourists at the rate of, say, 10 a month. Then the FBI's resources would be strained.

To complicate matters, the United States has a large popula­ tion of Chinese-Americans who are loyal citizens of this country but who could easily be mistaken for People's Republic Chinese. Then we also have Taiwanese students who are violently anti-­ Manchuria China but who could be followed for months before the FBI found out where their politi­ cal sympathies were.

There has to be an answer to this problem.

One solution would be for President Carter to work out a deal with Vice Premier Teng when he arrives in Washington this month. At the moment, in the first flush of recognition and goodwill, it would be easy for the arrangement.

All mainland Chinese diplo­ mats and students would be required to wear dark blue Mao jackets and baggy pants when they went out in public in the United States. Anyone caught wearing an alligator skin shirt would be assumed to be a spy and deposed back to Peking with the next shipment of Coca-Cola. Chinese students would be required to carry their little Red Books to classes at all times, so the FBI undercover professors would be able to confine them with anti-Communist members of the Chinese-American communities.

To further separate the good Chinese and those involved in black and dagger operations, the FBI would post wall posters in every Chinatown in the United States. Those who stepped up to read the posters would be con­ sidered suspect and worth follow­ ing. Those who ignored the wall posters would be eliminated from further suspicion.

One of the biggest problems for the FBI in this counterespionage effort is how to discover what the Red Chinese are doing on the mainland and what sort of information to the mainland.

This would require Congress to get court orders to open every Chinese fortune cookie going out and in out of the United States. In order to keep the Chinese from finding out that we were reading their fortune cookies, the FBI would have to addaded funds from Congress to build its own fortune cookie factory where the mes­ sages could be replaced after being studied.

Additional money would also be needed to break the codes in the fortune cookies... "You are going to have a nice day!" could really mean "U.S. Navy is building new Cruise missile underwhich Pasadena Rose Bowl" or "A man who has friends will never run out of toothpaste!" could mean "Soviet defector was caught in massage parlour last night with expired American Express cards."

It goes without saying that, unless the FBI were to buy all mainland Chinese in the United States, the CIA were to extend their own agents to China.

This is where President Carter can make a deal. In exchange for Teng's people watching only Mao, the American President will promise that the CIA people will watch only Broks Brothers suits with button-down shirts and striped ties. In this way both countries will be able to save vast sums of counterespionage money, not wasting time following the wrong people.

(c) 1979, LOS ANGELES TIMES

SYNDICATE

It is the task of both government and media to explain the situation in Viet Nam to the American people. This is a difficult task. But no American President can afford to fail. If the American government fails to explain why it is necessary to support the National Liberation Front, the American government will lose the war it is fighting in Viet Nam and fail it as the only fair thing that could be done.

Tom Haller

Alan Himebaugh

by Garry Trudeau
"Give it the Old College try," Well, at Notre Dame, particular effort is being made by a group of young men to do just that. These young men are thinking about the priesthood, and this year their home is the Old College.

The Old College is the original University of Notre Dame. Built in 1843, it is the oldest building on campus. It was personally designed by two Holy Cross religious, Brother Francis and Father Socius, whom you might remember founded the University of Notre Dame.

Old College is a stone building. It is located on the main road, at the southeast corner of St. Mary's Lake (behind the Architecture Building, or behind Merchants Hall). Originally constructed as a multi-purpose building, Old College served as the university (classrooms), student dormitory, and dining hall. Its versatility has certainly been an asset since then. At various times, it served as a bakery, convent for Holy Cross Sisters, farmhouse, house of studies for teaching brothers, head-quarters for the Holy Cross Mission Band, retreat house and residence for visiting priests.

In 1972, the University experienced a severe housing crisis. Old College was utilized to house 25 freshmen. Under the auspices of Father Jim Flanagan, Old College acquired a softball that year.

"Father Flanagan's Boys Town."

Atmospherically, Old College is a nice amalgamation of peace, gregariousness, and music. Everyone mingles well. Br. Paul Loos, the Assistant Superior, greets all newcomers from his second floor office with a cordial. "Hello, how are you. Friendliness, Musically, one can choose from the progressive jazz dominating the second floor to some classical pieces competing with the pulsating rock of Springsteen on the third floor.

Extensive interior refurbishing took place during the summer of 1977. Brother Clarence Breenbach, with the assistance from Br. Paul, Mike Cizlik (Moreau Seminary), Mike Barrett (North Hall), et. al., did a sparkling job of transforming the then haggard looking interior into its present decor. Old College today, through their efforts, is one of the newest residences at Notre Dame. The Old College is a self-contained, three-story unit. It has all the amenities of any regular house. There is a kitchen, living and dining rooms, and eleven bedrooms. Br. Paul lives in the bedroom once inhabited by Fr. Sorin. Queried about recurring rumors of Fr. Sorn's "ghost" appearances there, or rattling chains, Brother Paul said: "Lately, there have been fewer disturbances, but sometimes I wonder if those rumors are rumors."

So much for legends.

Fr. Tom McNally is the Superior at Old College. He is ably assisted by Br. Paul and staff member William Dohar, a Moreau Graduate presently pursuing studies in medieval history. There are six candidates this year: four juniors (all transfer students) and two freshmen.

The program consists of daily community prayer, as well as Mass in the nearby Log Chapel. It is designed to allow each candidate one year to explore their faith, the university and the Holy Cross community. At the end of this year, each one has hopefully discovered if the priesthood is a viable road worth traversing. If their decision at the end of that time is affirmative, they move to Moreau Seminary for further intellectual and spiritual training.

Community life at Old College is supplemented by other activities. On Tuesday nights, there is Community Dinner, whereby each candidate invited friends to partake of a home cooked meal. Thursday evenings are spent at Moreau Seminary. Mass and dinner are shared, thus facilitating Old College's communication and identification with the larger religious formation members.

Each candidate has a spiritual director. The spiritual director functions as sage, guide and friend to the candidate, giving him the necessary criticism, perspective, advice and love that he needs.

In addition, each man has an individual weekly chore, deemed "cho­dence." There are two retreats each semester. Retreat masters are invited to deepen the seminarian's awareness of his unique opportunity to live the life of a potential Holy Cross priest.

Seminarians are strongly encouraged by the staff to integrate themselves into the larger university life. This is done in various ways. Members of the Old College are active at The Observer, Knights of Columbus, the Rugby team and various intramural squads, WSND- radio, AELSC (Aes and Letters Student Advisory Committee), tutoring and the Justice and Peace Center. Through these outlets, the individual gifts, talents and potential of each candidate is maximized to its fullest. Stagnation and spiritual sloth are not problems at OC, because its members have too much energy and too many diversified interests to allow their talents to atrophy.

Consequently, Notre Dame is enriched by their talents, contributions, and the Holy Cross community is strengthened through their efforts.

Overall, the year at Old College is one of seeking and exploration. It is a year in which each person determines whether he will advance to the next stage, Moreau Seminary. In addition to the emphasis on spiritual growth, the main thrust of the program at Old College is to develop a balanced life and person­ality. Of major importance is an openness to the immense diversity, complexity and beauty within the university, ourselves, and our environment.

The guys at Old College are typical Notre Dame students. They take full advantage of everything the university has to offer. They major in anything they choose, go to ballgames, concerts, parties, date, play sports, and get involved in various clubs and organi­zations.

This does not exactly fit the stereotypical view of a guy who is socially withdrawn, finds sports dull, girls disgusting, and whose idea of a good time is sitting in a dark corner conjugating Latin verbs. The ministry today is as dynamic and diverse as the people it serves. The missionary, in order to effectively serve the people, needs to be an experienced, well-rounded, and thoroughly educated individual. The priest of today doesn't just say Mass, bear confessions, and sit in his room contemplating his navel. It's good to see those considering the priesthood aren't either.

On abortion issue
Wilke to present illustrated program

Dr. Jack C. Wilke and his wife, Barbara, nationally know spokesmen for the Right to Life movement, will present an illustrated talk, “Abortion: Is it Right to Choose? Medical and Social Aspects,” in the Memorial Library Auditorium at 7 p.m. tonight. The program is sponsored by the campus Right to Life group, Student Union, Campus Ministry and the Departments of Biology, Philosophy and Theology and is open to the public.

The Cincinnati couple has presented programs in scores of American, Canadian and European cities in recent years and are frequent radio and television guests. They are the authors of several books, including Handbook on Abortion, The Wonder of Sex, Sex and Love and others.

The program will include a lecture-slide presentation, question and answer period and an optional film of an actual abortion. A reception with refreshments will follow in Library Lounge.

... Iran

Pentagona

The oil issue has become a must for Israel in peace negotiations. “We are close to most of the world’s oil, but only countries far away will sell it to us,” an official complained, emphasizing that Iran wants to avoid as much as possible paying to transport oil across oceans when there are surpluses next door. Iran’s community of 80,000 Jews is the focus of discreet Israeli government efforts, so far not very successful, to encourage them to come to Israel and escape a possible pogrom if Moslem fanatics gain the upper hand.

Molarity

WASHINGTON (AP)—The popular pain reliever Darvon appears no more effective than aspirin, is easily abused and its abuse has been implicated in a number of deaths, a group of doctors and drug experts warned yesterday.

"I would seriously question whether the use of Darvon is a good medical practice at all," said Dr. Charles G. Moertel of the Mayo Clinic in Rochester, Minn.

Moertel was one of six witnesses who appeared before the Senate Small Business Subcommittee on Monopoly to discuss the use of propoxyphene—the chemical which is the basis for Darvon, the trade name used by Eli Lilly and Company, and for several other compounds marketed under other names.

Eli Lilly officials did not testify yesterday but in a statement the company said Darvon had given relief to millions of people since its approval by the Food and Drug Administration in 1962. The company denied that propoxyphene products have "ever caused death or serious injury when recommended by their physicians."

It also said a study of propoxyphene-related deaths showed most of the deaths involved use of the drug along with other drugs in excess of their therapeutic levels and in combination with alcohol and other drugs.

Dr. Kenneth A. Durbin, director of the Office of Compliance and Regulatory Affairs of the Drug Enforcement Administration, told the Senate subcommittee that "Propoxyphene is an abused drug and its abuse can do serious harm to patients."

"I'm sure that when the hall councils bring it up, it will be accepted," observed Marty Paulson, Dillon Hall president, who added, "So many campus student officials predict that Carroll's action will be embraced by other dorms."

The administration, told the Senate committee on Monopoly to discuss the use of propoxyphene—the chemical which is the basis for Darvon, the trade name used by Eli Lilly and Company, and for several other compounds marketed under other names.

Lilly officials did not testify yesterday but in a statement the company said Darvon had given relief to millions of people since its approval by the Food and Drug Administration in 1962. The company denied that propoxyphene products have "ever caused death or serious injury when recommended by their physicians."

It also said a study of propoxyphene-related deaths showed most of the deaths involved use of the drug along with other drugs in excess of their therapeutic levels and in combination with alcohol and other drugs.

"I'm sure that when the hall councils bring it up, it will be accepted," observed Marty Paulson, Dillon Hall president, who added, "So many campus student officials predict that Carroll's action will be embraced by other dorms."

The hearing was called as a result of a federal government executive order banning use of any pain reliever that cannot be sold over-the-counter because it is "too effective." If the drug were to be reclassified as an "abuse liability product," its manufacturer would have to do additional research to substantiate its "comparative analgesic efficacy to aspirin."

Getting exposure

Two-mile relay team head West

"I'm really nervous right now," Rodgers admitted. "I have something to prove to myself, and also I'd like to help the team as much as possible." Rodgers comes to Notre Dame with an impressive list of credentials. Racing out of Kapaun-Mt. Carmel High School, he placed first in the state in the quarter­ mile two years in a row, with a best of 48.5 seconds. But racing in the half is going to be a challenge for him. "I ran at 1:35 at Purdue, and I would like to equal that or do better," Rodgers said. "I did a lot of distance work over Christ­ mas, and I should help my winds a lot. If I can keep up the pace and stay in the thick of things, we should do well."

Piane has Rodgers leading off this Friday, which should help his confidence. But teammate Pete Burger is continuing, and Rodgers can do as well. He has impressed me very much, since he had to beat out a lot of good runners to get into the relay. This is a new role for him, but he has taken it well."

The race is now new for Burger; however, before coming to Notre Dame from Jesuit High School in Beaverton, OR, he placed fourth in the state in the half­ mile, and was a valuable member of last year's record­setting team.

"We are hoping to qualify for the NCAA's this year," Burger said. "We missed by only a few seconds of a last­place finish, and we thought we were good enough to make it."

"This will be our first out time, so I hope we can do it right away," he continued. "A 7:32 should get us in, and a 7:33 will win it."

Running the second leg for the Irish will be Chuck Aragon, who is coming off of a very successful freshman year. In addition to helping the two-mile relay team, he competed in the NCAA Indoor Championships, and also ran for the AAI National Junior Team that toured Russia and West Germany last summer.

Aragon comes to Notre Dame from Los Lunas High School in New Mexico, where he built up an impressive record, winning the state cross-country title two straight years and placing first in the half his senior year, en route to being selected a high school All-American.

The trip abroad over the summer was "quite an experience," Aragon said, "running in high caliber meets like that. But even with the international competition, Aragon gets the pre-meet jitters. "I keep telling myself that I shouldn't be so nervous, but for the buildup of the meet, I'm going to be running against the Russians or against someone else at the ACG."

"I would like to see us (the relay team) qualify for the NCAA indoor meet," Aragon continued. "As far as personal goals, I would like to get some good times in the 800­-meter over the sea­ son."

Running the all-important anchor leg is Jay Miranda, and according to Burger, this is the best place to have Jay. "Jay usually does it for us, because he is such a tough competitor," Burger said. "We were in third place going into the final leg at Kansas, and he passed two Kenyans from New Mexico and West Texas State to win. When Jay goes, we usually do well."

Miranda admitted that "being the last runner, there is a little added pressure. If you're a little behind, your teammates are looking to you to make up the gap. And if you're in the lead, they look to you to hold it. But we have all our little pressures."

Miranda, who went to West Technical High School in Cleveland, OH, placed second in the half mile in his junior year and won state in his senior year. Jay has set similar goals for his college career.

"My main goal is to qualify for the NCAA's," Miranda said. "If I qualified last year, and made it to the semifinals. I hope to reach the finals this year. Also with the Olympics coming up, I would like to hit 1:40-40.5 for the half mile. It's a really good qualifying time for the Olympic [continued on page 11]
