SU director Tom Hamel discusses Commissioner Curt Hench's resignation (Photo by Tom Jackson).

In his list of demands, Hench accuses the nine-member board - which determines money allocations to student organizations and sets student government policy - of playing 'power games,' and fighting among themselves.

According to Hench, the board decided to compensate SU workers with dinners rather than complimentary tickets - a policy he finds contradictory. However, according to Student Body President Bill Roche, this is not true.

"One person on the board suggested that," Roche said. However, the Board did not make a decision, and I don't know whether it's fair to say he was attempting to land (on the wrong runway) or was just wrong," said Roche. "We have no confirmation yet."

"Everybody didn't die right away. Some were trying to get out. Some of them... they were crying. 'Help, Help!' then they were either calm or something must of happened to them," said Mrs. Parke Dickerson Scott, 19, of Chicago, IL.

At 7:30 a.m. Saturday, it was announced that the KCIA had killed Park ac­­cidentally, during a quarrel - and capable man, decide to retire. And why would the KCIA kill Park in the first place just because he might lose his job - as President Park Chung-hee, Kim had lost favor with even that explanation. Details of the proposed bail­out package were outlined to the administration last night. For instance, why was it that Park Chung-hee, Kim's personal guard, Cha Chi-chul, were shot dead in the Blue House residence, the Blue House. The Blue House. United Auto Workers President Fraser flew to the meeting from Kansas City Mo., where earlier yesterday leaders of the auto workers at the other major auto companies, the Blue House. The Blue House. The Blue House. The Blue House. The Blue House. The Blue House.

In W ashington, a spokesman for the Federal Aviation Administration said the major question is why the pilot was attempting to land on a closed runway. Mexican authorities hope the black boxes will provide answers. FAA and National Transportation Safety Board members will be in Mexico to observe the investigation, authorities said.

"It was definitely not structural; there's no question about that," said FAA spokesman Dennis Feldman in Washing­ton. He said the examination, which included a review of recordings to determine why a Western Airlines DC-10 jetliner crashed in Mexico was completed in almost two weeks. The driver's cockpit would release data and information about communications between the plane's crew and the control tower. Dike ruptures causing many to flee homes in Florida

INDIANAPOLIS, Ind. (AP) - Hundreds of people were ordered evacuated after an earthen dike ruptured yesterday, spilling torrents of water from a reservoir over a rural area, flooding homes and roads and delaying a train. Authorities said up to 1,700 people living or camping in low-lying areas along U.S. 441 in western Martin County were being taken to Red Cross shelters. Two train crewsmen suffered cuts, but those were the only injuries reported.

House, Senate agree on proposal for 1980 budget

WASHINGTON (AP) - House and Senate negotiators reached agreement yesterday on a $347.6 billion 1980 budget that trims the Senate's demand for sharply higher defense spending by $700 million. The Senate had called for a 3 percent increase above inflation in defense spending. . .

Supreme Court upholds previous Pinto decision

INDIANAPOLIS (AP) - The Indiana Supreme Court yesterday upheld the decision of a trial court judge who denied the state access to certain corporate records in its criminal case against the Ford Motor Co. The high court voted 4-1 in support of Pulaski Circuit Court Judge Harold Studdard's ruling to deny the state "discovery" in the case beyond exchanging witness lists and exhibits. Justice Roger O. Debruler dissented from the ruling. Ford faces three counts of reckless homicide in the deaths of three teen-aged girls, burned to death after their Ford Pinto sedan exploded into flames when it was struck from behind by a van on an northern Indiana highway in August 1978.

Without alcohol

Blue Line Club supports hockey

Thelma Hessling said yesterday.

The Blue Line Club will continue its major function of promoting the Notre Dame hockey team despite a recent ACC policy change that bans the sale of alcohol during athletic events, club president Curt Hench resigned from the position of Student Union services commissioner, not student government commissioner, as was reported in yesterday's Observer. The Observer apologizes for the error.

Barnwell County lives with nuclear waste

BARNWELL, S.C. (AP) - Nuclear energy is no bugaboo in Barnwell County, South Carolina, where the country's last operating commercial nuclear burial ground is located. Folks bete support nuclear power. They just don't want to live in the nation's nuclear dump.

To that effect, Gov. Dick Riley yesterday ordered a 10 percent reduction in the amount of low-level nuclear waste that may be buried in South Carolina, a two-year process to begin immediately.

At a news conference in Columbia, S.C., Riley said the Barnwell site will continue to accept all low-level nuclear waste generated in South Carolina, but will reduce shipments from other states.

Riley had foreshadowed the decision last week, telling reporters his state would not absorb the waste turned away from Washington state and Nevada, whose governors closed disposal sites there.

A month ago, low-level nuclear waste generated in South Carolina, but will reduce shipments from other states.

Riley's cutback order sharply reduces the disposal options available to hospitals, research labs and commercial reactors, which daily create such low-level waste as contaminated clothing and reactor sludge.

For now, nuclear facilities are storing waste on site. How long they can do that "depends on the type to waste," said Louise Dressen of the U.S. Department of Energy. She said hospitals which use nuclear equipment for diagnosis and treatment have only a two-to-three week storage capacity.

The governor of the three states will be meeting with NRC (Nuclear Regulatory Commission) chairman Joseph Hendrie on Tuesday to discuss what assurances they can get for now, nuclear facilities are storing waste on site. How long they can do that "depends on the type to waste," said Louise Dressen of the U.S. Department of Energy. She said hospitals which use nuclear equipment for diagnosis and treatment have only a two-to-three week storage capacity.

Players ready production

The Notre Dame Student Players are approaching the final stages of preparation for their upcoming production of "Stop the World—I Want to Get Off." Any student who wishes to become involved in the production should call Dave Ellison at 3797. Student volunteers are needed to usher and work in the box office.

The Student Players is a completely student-operated theatrical company which has produced a show every semester for the past five years.

This semester’s production is being directed by sophomore speech and drama major Jeff Mousseau. Doug Klee has served as technical director and lighting designer, and Paul Kosidowski is the musical director.

Three Saint Mary’s students are also involved in various production aspects this year. Maureen Ulicny designed the set, Colleen Quinn choreographed the dance numbers, and Belinda Goins coordinated costumes and make-up.

Chrysler contract endorsed

KANSAS CITY, Mo. (AP) - Leaders of Chrysler Corp.'s local auto workers surprisingly endorsed Tuesday night a new contract that was criticized by Auto Workers members at the local No. 3 automaker behind workers at all other U.S. auto companies.

Rodger White, vice president and Canadian director of the UAW, said there were "seven, I think, that were there showing their hands in the vote in a closed meeting of 71 plants in the United States and Canada. About 40 of the delegates were in another meeting in another room at the time.

The approval was the first step toward ratification votes that the union expects to complete by Nov. 15. The UAW's concessions were estimated by the union at $403 million over the three-year contract, when wages will be comparable to those at Ford Motor Co. and General Motors Corp.

The meeting was interrupted by the departure of UAW President Douglas A. Fraser for what he described as an "urgent" trip to Washington, where he declined to describe in detail.

"I hope it means we're going to go over what the government proposed, or go to Chrysler and do something," Fraser said before leaving.

Chrysler has asked for $970 million in loan guarantees.

"If the UAW doesn't have every reason to believe (it's going to go), it's going to be, I think a lot more satisfactory than $750 million," Fraser said.

Fraser would not say who the union at $750 million until an end of the three-year contract, when the UAW's delegates were in another meeting in Ann Arbor, Mich., who like people at Chrysler the company has made some offer is to "represent the auto workers." Fraser has said his sole certainty about it.

"I get more complaints about the ratio of supervisors to workers, particularly in layoffs. The company has made some move to the job this morning, but to leave at noon and set up picket lines in front of plant gates.

"It appears at this point that there is not enough time to reach a new agreement on the strike deadline for operations in eight states.

"I get more complaints about the mandatory overtime proposal where necessary," and the mandatory overtime proposal is unique to the Harvester area.

Bill Greenhill, a Harvester spokesman, said the firm believes it must have some provision for requiring employees to work overtime similar to that in the existing contracts with other large equipment makers.

Auto worker officials anticipate contract strike

CHICAGO (AP) Union officials held out little hope of a contract settlement that would avert a strike at noon today by 25,000 United Auto Workers members at International Harvester Co. plants nationwide.

Contract talks continued yesterday in an effort to reach an agreement on a new three-year contract before the strike deadline for operations in eight states.

"It appears at this point that there is not enough time to reach a new agreement on the strike deadline," said Curtis Williams, a member of the union's bargaining committee.

"The company has made some small concessions, but all the major things they are demanding, including mandatory overtime remain on the table."

The two sides are using a model the recently approved contract between the UAW and Deere & Co., which includes a 9 percent pay raise over three years and quarterly cost of living adjustments. However, the mandatory overtime proposal is unique to the Harvester talks.

Bill Greenhill, a Harvester spokesman, said the firm believes it must have some provision for requiring employees to work overtime similar to that in the existing contracts with other large equipment makers.

Sigma Xi elects Bender to Board of Directors

Dr. Harvey A. Bender, professor of biology and adjunct professor of law at Notre Dame in 1974, received his M.S. in 1972 and his Ph.D. in 1975 from Northwestern University. He was the NSF In-Service Institute Fellow in 1962, and the Donnery Research Fellow at the California Institute of Technology in 1966. He served as chapter President, 1977-78; President Elect & Program Chairman, 1975-76; and Treasurer, 1970-72.

Sigma Xi, one of the nation's leading scientific honor societies, currently has a membership of more than 100,000 scientists.

Dr. Bender received his B.A. from Case Western Reserve in 1974. He received his M.S. in 1972 and his Ph.D. in 1975 from Northwestern University. He was the NSF In-Service Institute Fellow in 1962, and the Donnery Research Fellow at the California Institute of Technology in 1966. He served as chapter President, 1977-78; President Elect & Program Chairman, 1975-76; and Treasurer, 1970-72.

The Catholic and Protestant Committees on Urban Ministry (CCUM and PCUM) presented their annual awards for outstanding ministry during their full conference held Oct. 31 - Nov. 1 at Notre Dame.

Each group recognizes ministry on both the national and local levels, and PCUM gave its awards for the first time.

Fr. Marvin Motter, director of the Campaign for Human Development, received CCUM’s national award, and four Sisters of Notre Dame de Namur shared the award for local ministry for their work among the poor in Apopka, Fla.

The Protestant Committee on Urban Ministry presented its first national award to a Catholic priest, Msgr. John J. Egan, who founded the Catholic organization in 1967 and soon helped to form its Protestant counterpart. PCUM also recognized Rev. Nicholas Hedrick, pastor of Plymouth Church, a congregation of the United Church of Christ in Detroit, Mich., and a member of the Detroit City Council.

Fr. Motter “has journeyed through life seeking justice for the poor, housing for the elderly, and compassion for the wayward,” according to the award citation. He founded the Social Action Department in his native diocese of Davenport 10 years ago, and early efforts included legal services for the poor, organization of senior citizens, group homes for adolescents, jail ministry, and ministry to the Spanish-speaking.

Sisters Cathy Gorman, Gail Grimes, Ann Kendrick, and Theresa McElwee have lived and worked among the poor in Apopka, Fla., for more than five years. They have begun two health clinics owned and operated by migrants. Msgr. Egan is special assistant to Notre Dame’s president for public relations and director of the University’s Center for Pastoral and Social Ministry. His task is enhancing Notre Dame’s church-related scholarship and service. The founder and former chairman of PCUM, Mr. Theodore M. Hesburgh, and director of the University’s Corporate Engineering Department, Boise, Idaho 83729.

The Observer is an independent newspaper published by the students of the University of Notre Dame de la藜ac and St. Mary's College. It does not necessarily reflect the policies of the administration of either institution. The views expressed are as accurately and as objectively as possible. Editorials represent the opinion of a majority of the Editorial Board. Columns and letters are the views of their authors. Column space is available to all members of the community, and the free expression of varying opinions on campus, through letters, is encouraged.

Teddy saved Carter

Art Buchwald

WASHINGTON. You would think that the Carter people would be terribly upset that Teddy Kennedy is getting into the presidential race. Not all of them. One astute Carter supporter told me:

"This is the best thing that could have happened to us."

"This?"

"Well, look what was happening. Before Teddy went to see his mother, and got permission to run. Carter was standing there in Washington pundits were writing him off, and the city in the land was 'Anybody But Carter.' We were very upset by all this, but we couldn't do much about it. We had Ratisfied the President for years, and it got us nowhere. Money was drying up and many of us were prepared to start working on the Carter presidential library in Plains, Georgia. Then Teddy decided he had to save the country and we were off and running."

"Are you trying to tell me that you Carter people are not worried about Kennedy?"

"Well, you all have to be worried about a Kennedy, he said. "But you must be very pragmatic about it. Teddy, we were faced with a terrible opponent. Carter had to run against himself and you could imagine what that meant. Last time he ran against Washington, and that's how he got elected. Teddy, he wanted to do it again, but we exposed him to there some powerful people who thought he was part of the problem. He had no issue until Teddy decided to make his move."

"When you spell it out that way it does make sense."

"We couldn't have planned it better if we had wanted to. We can now go to people who never cared much for the Kennedys and say, 'If you don't give us money, Teddy will take your three marinri lunch."

"It's all it usually takes."

"I thought Carter was against the three marinri lunch, but he is, but as with most things he pays no attention to him. If Teddy wants to come away with the lunches people will start taking it seriously."

"I,' admitted. "The beauty of it all is that not only is Teddy in the race the media is all excited. When Carter had no opposition it was hard to get him on Page 10. Now when Teddy makes a speech the media expects Carter to answer him. Then they expect Teddy to come back and answer him. If Carter won't respond Rosalynn will. The contest between the two of them has wiped out all the Republican candidates."

"It's over for the Republicans. It looked for a while as if the big showdown would be in their party. Let me ask you something. Suppose Teddy gets the nomination? Won't that make you feel good?"

"Not as bad as if Carter got the Democratic nomination and didn't compete. But the Republicans... If Teddy beats us we know we can go down with dignity. But without Kennedy, Carter could have been beaten by himself- and that's a terri­bly lose to face."

DOONESBURY

by Garry Trudeau

DOONESBURY. Mr. President, the New, Famous Politics have that deadweight on the magazines. It really affects the sales in a bad way. We need a new angle."

Tug: Let me get this straight. In order to claim victory, I have to know some of the ways of the veto."

Why don't we get it off on some of the issues?"

It will be called a moral, political, and economic angle."

And I think that's the way to go."

The President: I agree.

Support for Pope's Views

Dear Editor:

This letter is in response to the unfavorable criticism of the Pope's decision to restrict the ordination of women. I am encouraged by his hope that I do not convey the impression that I have something against nuns or women in general. To be honest, I might not be at Notre Dame today if not for the excellent elementary education I received from the Sisters of Charity.

However, I do wish to point out that the Pope's actions must always be for the good of the entire Catholic Church. Sometimes as citizens of the greatest nation on Earth, we feel that the rest of the world must follow our standards, or else become backward or primitive in thought. Let us remember that only twenty-five percent of the U.S. population is Roman Catholic. In contrast, Poland, France, Israel, and many Central and South American nations are close to one hundred percent Catholic.

Pope John Paul II must gear his decisions to all Catholics. In the countries mentioned above, strong tradition reserves the priesthood for men. This is not a sexist or "sinful" train of thought, but rather a deeply-rooted custom that traces back many centuries. Perhaps as citizens of progressive America, we find it hard to understand why such traditions cannot be abolished in favor of modern thought. However, breaking such customs where Catholicism is truly a way of life would be something akin to cancelling the annual Notre Dame-U.S.C. football contest.

My point is this. The Holy Father is obligated to serve the entire Catholic world, not simply Catholics of the United States. Creating certain laws solely for American Catholics would possibly lead to a split in Roman Catholicism. In today's world, we realize the importance of keeping Catholicism a universal, influential power. We must remember to see the Pope's actions in the broad scope of the world, not through myopic, capitalist eyes.

The matter in question is not the future of men or women, Americans or Italians in the Church, but the preservation of the values and significance of the Church itself. These are, I believe, the true intentions of the Holy Father. His duty is to maintain the integrity of the church brought about by our Christian ancestors. We should evaluate his actions, but never question his decisions and then continue to live our Catholic lives in the footsteps of Christ.

James Faulkner

Group Criticizes

Hesburgh's Remarks

Dear Father Hesburgh:

As participants in the National Conference on Abortion at the University of Notre Dame, we listened with interest as Father Bukach read your greetings to us. While we agreed with most of what you had written, we were very much in disagreement with your apparent attack on pro-life activity. Especially objectionable to us, who are engaged in such activity and who do support 100% of Catholic principles of social justice, was your implication of the type of pro-lifers as unconcerned with any other issue besides abortion.

The truth is that pro-lifers in politics run a range from conservative to liberal— from Jesse Helms to Tom Eagleton and from Henry Hyde to James Oberstar. Unfortunately, the further truth is that many persons, who claim to be pro-life, are afraid to swing against the side of fashion and openly declare that the basic building block of the whole structure of human rights is the right to life itself. Instead of adding their perception and sensitivity to the struggle for all human rights, such popular groups prefer to purchase the acclaim of the secular society around by denigrating the honest efforts of often less sophisticated but deeply pro-life, and deeply Catholic, people.

In your own instance, an attack on pro-life political activity is in stark contrast to your support of the Equal Rights Amendment, despite the single minded reality of its main proponents. Again, your attack on pro-life political activity contrasts with your embarras­ ing silence when the U.S. Civil Rights Commission, of which you had been lately Chairman, so helpfully upheld the "right to kill unborn children."

Yet again, your defense of the Rockefeller Foundation, against overwhelming evidence that it has been a major factor in the abortion movement, must cast some doubt on your own commitment to all the principles of Catholic social justice.

In fine, it seems proper to ask why you do not save your criticism of pro-lifers, get your own house in order, and, if you really do believe in a full range and hierarchy of Catholic values, join people like Eagleton and Oberstar to promote them in the public forum.

"You're nuts."  
This was my roommate's disbelie­ving reaction when I told him I was going skydiving. "Well," he ventured philosophically, "at least I'll have a nice single for the rest of my life." On second thoughts, those arguments varied: some in requests for my earthly possessions; others inquired about taking out insurance policies "just in case"; one kind soul even volunteered to push me out if I was afraid. As different as all these reactions were, they all shared the same assumption that I was not going to live to see myself legal in Indiana. Or ye of little faith.  
My loving parents, though skeptical as always, are nonetheless well aware of the often bizarre preferences of their eldest son. "Is that what those genius teach you out there?" asked my father, who has just accepted that his son is a philosophy major. Mother was likewise outspoken. "You fell off the garage roof," she said, "in the rain amid those arguments that you lose even if you technically win, so I dropped the subject. But my mother, with all due notwithstanding, I went to the first part of Parental and peer cynicism aside, I did have what I thought were some very legitimate reasons for making the jump. First of all, my desire to jump, however irrational, was very real. It was one of those irrepressible urges. Plus, the people who had done it were very encouraging. Of course, due to the nature of the sport, I was unable to gather opinions from the less successful jumpers, who are merely limited the opposing viewpoint. My second reason for jumping was academic in nature. Because though there have been numerous skydiving articles, this is the first to be written from the perspective of a certifiable coward, one of those people who fear a great many more things than fear itself. I listened to prove that anyone could make a jump, and I offer myself as irrevocable evidence to that assertion.  
All these things were running through my mind during that first class, the subject matter of which was emergency procedure. Time is spent here on what to do when the things they say will never happen, do. We discussed high altitude emergencies, low altitude emergencies, total failures, stra­vengers, and my favorite, the "student in tow," which occurs when the static line becomes entangled and the parachutist is dangling at the end of a rope, some one hundred feet above ground, like some "Eat at Joe's" advertisement.  
When the instructor was asked what to do in this situation, my response - "Gray" - was dismissed as helpful but not immediately practical. It was very tense with the class up and my shoulders. I had a sinking feeling in my stomach when I remembered that I was a nervous wreck, and only on the second floor of LaFourne. "My God," I thought, "what am I going to be like if I don't do this?"  
But I paid my non-refundable forty dollar fee, which qualified me for the second half of my training, and then I knew that I would really do it. Those who know me will attest to the fact that I would sooner throw myself out of a plane than throw away forty dollars. Thus inspired, I reported to Goshen Airfield bright and early one Sunday morning for the final part of my training.  
At the airport, a group of us were put through various mock demonstra­tions. We climbed out of plywood planes, dangled feet in the air from a makeshift parachute, and practiced our PLF's (parachute landing falls) from a three foot platform. It was similar to an advanced kindergarten playground. Upon completion we were physically, if not psychologically, qualified to jump. We were placed in groups of threes, and made our final preparations to jump, suiting up and getting our reserve chutes ready. There were a lot of comments about the actual aircraft from which we were to jump; unpainted, it resembled a beer can, not very large, but I did as I was told when she commanded, "Get out," put on the parachute, and sit in the "hot seat," or that place in the "hot seat," or that position immediately adjacent to the door.  
"Jump," and jump I did, or, more precisely, fell. I arched my back and the next thing I knew there was a reassuring tug as my parachute opened. I checked the chute, turned around to find the airport, and only then resumed breathing. From then on there was little to do but enjoy the ride. It was beautiful up there, all alone in the sky, a quiet solitude that does not exist anywhere else. The only voice up there is your own, and I half expected God to tap me on the shoulder, I turned and turned, thoroughly enjoying the ride down. Then I even remembered not to look at the ground, and performed a halfway decent PLF when I hit the ground. Even though I originally thought I would only do it once (if at all), I began to feel more and more at ease with the whole; I even wanted to do it again. Almost everyone has the same reaction. So it looks as though my family and friends will have me around a little while longer, and my roommate won't get the single he so desired. I called my mother and couldn't tell her which made her more angry - my skydiving or my survival. But I did hear something about a hang-gliding club starting up in the spring. Hang-gliding - it sounds fun. How about that one, Mom?"
Kansas

Kansas brought its highly polished traveling show to South Bend Oct. 19, back in its new album "M Bibb," and rocked the ACC like no one has ever done to them. With a fairly good warm-up job from the Faith Band, the pair provided an entertaining encore set. Kansas pulled out all the stops visually—explosions, lasers, dry ice, and the works. But the beginning of their disappointingly short 12-song, 75-minute set, was the most unusual of them all. While sitting in the dark waiting for the curtains to open, we were treated to a collection of voices and noises being played slowly, reminiscent of Revolution No. 9. This probably had no significance as the solemn Indians which adorn the cover of their new album. "Victim of Love," is a perfect as the band opened with two new songs, including the single, "People of the Southwind." This was surprising well done, despite the fact that the intro sounds like a bad Elton John song and the lyrics are better suited to the Doobie Brothers. Walsh is fun just to watch, as he bops about in his stage Adidas gymn suit like a chorus girl, while often playing chords on the keyboard at the same time. Violinist Bobby Steinhardt was crisp and unerring throughout the show, an important part of Kansas' perception of themselves as a symphonic rock band. Compositions such as "Magnum Opus" and "Lampight Symphony" are also part of this concept, but Kansas left these out of their short show.

Mingling in new songs with old hits, the band was quite well received. Points of Kneel" were reproduced almost exactly like the studio version, which may be good or bad, depending on whether or not you see that as a virtue. Lead guitarist Livgren wove in some needed texture with his occasionally synthesizer work, especially on "Elusive Chronicles," which also featured green lasers knitting through the Air, to the delight of the crowd. Kansas' last lugubrious single, "Dust in the Wind," marked the midpoint of the set, replete with dry ice for effect. Again, the song was accurately reproduced, but Walsh's overdramatic phrasing and pleading tended to detract from the effect, abetted by Steinhardt's accompanying harmonica. This was Walsh and Livgren's attempt to write a "Blown in the Wind" or "Masters of War" for the seventies, but instead they came closer to "Rainy Day Women #12 & 35." The set was closed with "Child of Innocence," "Portrait" and "Gimmie Some Home," the first two of which featured Livgren and Rich Williams trading some hot guitar riffs. "Portrait" is Kansas at its rocking best, and it affords the group's two virtuosos the opportunity to take off in whichever direction they wish, and Livgren and Williams did this without stopping in any monotonous runs along the way.

On last year's tour, "Portrait" segued beautifully into Kansas' biggest hit, "Carry On Wayward Son," but in this show they saved that for the second and final encore. Livgren and Williams form the base on this song around which everything else revolves, with the rest of the band building off their driving, almost pulsating rhythm. "Carry On" is the tune everyone came to hear, and Kansas didn't disappoint. Livgren's all-important solos at the bridge and conclusion were, however, commendably spontaneous but unfortunately uninspired, making the difference between a good rendition and a great one. But you can't expect outstanding creativity night after night, and the concert as a whole was first-rate. The Faith Band served as the acceptable, if no better, back-up band for Kansas. Although they exhibited the ability to rock on several songs, most notably "Yesterday's News," they must also should­er the responsibility for writing and performing "Put On Your Dancing Shoes," unquestionably one of the worst songs ever associated with Kansas.

The group must be credited for one thing—they recognize who their only virtuoso is, and they let him have it. Guariner John Cascella also plays the keyboards and had to take solos on each trip to the step in front of his cowboy boots and tenor sax, the crowd prepared itself for something exceptional, and Cascella never let them down. Ripping into several thoughtful solos with full force, yet with remarkable clarity, Cascella was constantly soaring, swooping, explor­ing and discovering new heights with his sax. Posings questions and then answering them, telling stories which it would have taken a month for the rest of the band to do, Cascella's sax did some talking which one rarely sees from anyone in any rock band. It was surely one of the highlights of the evening.
Hospital volunteers help Thai

SA KAEW, Thailand (AP) — "We've done things we never expected to do. We've seen things we never expected to see. I don't care how many pictures you see on TV, how many stories you read, you cannot believe this exists," said one young US Embassy wife. "At 10 o'clock last night I was baking banana bread at home and I got a phone call. In the morning I was here... I feel that I have had the chance to do something really important."

The volunteers include housewives, members of the embassy's staffs, businessmen and students who found that they could not stand from the desperate need. Caught up in a spirit of helplessness, most of them asked that their names not be used.

The need for volunteers, in the camp and along the border, is overwhelming. Said one young US Embassy wife: "Five or seven are enough. It worked better when we had that many before."

Hench proposed a five-member board consisting of the Student Body President, the Student Government Treasurer, the Student Government Director and the President of the Student Government Executive Committee. If seven members were required, Hench would include an additional HPC and SU representative apiece.

Tenure Committee meets

There is a mandatory meeting for all members of the Student Committee on Tenure tonight at 7 p.m. in LaFortune Ballroom. Anyone interested in the tenure issue is welcome to attend.
Mountaineering is a skill of timing as well as technique. The wrong moment, like the wrong method, marks the gap between amateur and aficionado. So the key to successful mountaineering is to choose the occasions wisely and well. When, then, is it appropriate to slowly quaff the smooth, refreshing mountains of Busch Beer?

Celebrations, of course, are both expected and excellent opportunities to test your mountaineering mettle. Indeed, on major holidays it is virtually mandatory to do so. Imagine ushering in the fiscal new year or commemorating Calvin C. Coolidge’s birthday or throwing caution to the wind during Take-A-Sorghum-To-Lunch-Week without the benefit of Busch. A disturbing prospect at best.

On the other hand, not every event need be as significant as those outlined above. Small victories like exams passed, papers completed or classes attended are equally acceptable. Remember the mountaineer’s motto: matriculation is celebration. Interpersonal relationships are also meaningful times. There are few things finer than taking your companion in hand and heading for the mountains, transcending the hum-drum in favor of a romantic R & R. Naturally, couples who share the pleasures of mountaineering run the risk of being labeled social climbers. But such cheap shots are to be ignored. They are the work of cynics, nay-sayers and chronic malcontents.

Similarly, the ambience of an athletic afternoon (e.g. The Big Game) is another ideal moment. Downing the mountains elevates the morale of the fan and, hence, the team. Therefore, if you care at all about the outcome, it is your duty to mountaineer.

When should one not enjoy the invigoration of the mountains? Here, you’ll be happy to learn, the list is much briefer. Mountaineering is considered declasse with dessert, improper during judicial proceedings and just plain foolish while crop dusting around power lines. Otherwise, as the hot-heads of the sixties used to say, “Seize the time!”

Don’t just reach for a beer. Head for the mountains.

So pick up the phone and call Continental or your travel agent today. Then, do one other little thing. Please. Call Mom and let her know you’re coming.

SMC Student Government President encourages students to conserve energy

by Mary Leavit

Focusing on an issue of national significance, Saint Mary’s College is sponsoring a program geared toward energy conservation on the campus under the direction of a campus energy commission.

"We are asking people to save energy while working towards the International Energy Day in March. We hope the program will be a success and are planning something really big for March," Saint Mary’s Student Government President Pia Trigiani said.

Many different approaches are being taken by the energy commission to conserve energy. Students and faculty have been given pamphlets containing energy conservation tips and stickers to be put on the light plates in all dorm rooms and offices reminding students and faculty to turn off all lights before leaving.

Amy Hartzel, president of the chemistry society at Saint Mary’s, has organized faculty members to speak in the Wedge Room at Saint Mary’s dining hall this week from 12:00 p.m. to 1:00 p.m. every day to students interested in saving energy.

Dr. Joseph Bellina, chairman of the energy commission, is trying to enlist workers in the federal government to speak at Saint Mary’s on technical issues concerning energy conservation.

"I want the talks to be geared towards students but I am also hoping that people from the South Bend community will attend," Bellina said.

Trigiani is working in conjunction with Charlie Flaim, director of SAGA, in an attempt to conserve on the use of such things as glassware and napkins in the Saint Mary’s dining hall.

A poster showing the college’s progress in conserving energy is hung in the dining hall. A graph shows that at this time, SMC’s total use of energy is approximately 4 megawatts lower than the average for the past three years.

Unfortunately, despite all the propaganda, Bellina says that student response has been marginal.

"Right now, there are very few students interested," Bellina said. "It’s hard to keep the whole thing moving."

Despite this, the energy commission is optimistic about the program’s future.

"The program is still in a developmental stage," Bellina said. "I expect as time goes on and we accelerate, more students will become aware and interested in what we’re doing."

Hassett’s
3-point-plays
lead Pacers

INDIANAPOLIS (AP) - The 3-point-plays came to the National Basketball Association this season and Indiana’s Joe Hassett has become a valuable part of the Pacers offense as a result.

Hassett, a 6-foot-4 guard Indiana acquired off the waiver list after the current season begins, hit three of the long range shots in helping the Pacers rally Wednesday for a 133-129 overtime triumph over Houston.

The three-pointers are an old weapon of Indiana during the days of the American Basketball Association, helped Hassett score a career-high 21 points as Coach Bobby Leonard’s club rallied from a 15-point first-half deficit.

"I’ve used his head. He’s pretty good on the three-point-er,” Leonard said about the three-year pro who is now fourth for 13 on three pointers this season. "He’s got a good feel on the right time to take the shot.

‘I’ve always been a good outside shooter,” said Hassett, who was one of seven Pacers to finish in double figures. "Leonard hasn’t told me when to take the shot and when not to take it. Tonight I felt like I couldn’t miss. I was real loose and I just wanted the ball.

Evert-Lloyd discusses difficult season

Fort Lauderdale, Fla. (AP) Chris Evert Lloyd, who has lost in the past two years, says she now has "figured out if it is still worth it to be No. 1" in professional tennis.

"Lloyd lost both the U.S. Open and Wimbledon singles titles this year...something the 24-year-old has not done in over two years. She lost first-round matches, and her streak on clay courts has ended.

Tracy Austin even got up to No. 2 in the Wightman Cup matches with Great Britain this week in West Palm Beach. "This year I didn't deserve to win so many majors," Lloyd told the Fort Lauderdale News in an interview published Wednesday. "I wasn't hungry enough. I was bitterly disappointed. I definitely know what I should have."

"If I had wanted a major title badly enough, if it was my first priority, I would have won one. But it just wasn't in me. There was my marriage and all the outside things taking over my attention."

"I don't waste my time worrying about what I have in much richer winning a tennis title. Some people look a lifetime for something like that...I have one and now I'm looking for another."

"But where do I go from here? It's something I ask myself every day."

**Kuhn continues Martin investigation**

NEW YORK (AP) - Commissioner Bowie Kuhn continued his investigation Wednesday into Billy Martin’s bout with an Illinois marshal. salesman which resulted in Martin being fired as manager of the New York Yankees. "We expect to wrap up talking to the witnesses in a day or two," Kuhn said. "Then we will talk to Billy. It will certainly go into next week before it is concluded." Martin has requested a meeting with the commissioner to tell his side of the story. "I have nothing to hide," Martin said earlier in the week in a statement released through his agent, Doug Newton.

**Irish, Belles compete in quad meet**

The Notre Dame Volleyball Club hosted its final match this season on Tuesday at Saint Mary’s, Goshen, St. Joseph’s, and the Irish met in a quad meet. Notre Dame defeated the Belles for the first time this fall, game scores were 8-15, 15-6, and 15-11. Both the Belles and the Irish held off Goshen Saint Mary’s loss to the Goshen team 8-15, 15-5, and 15-3, while Notre Dame succumbed 15-7, 15-11. Saint Joseph’s handed Irish their second loss for the night with game scores of 15-12 and 15-8. Notre Dame will travel to Purdue Calumet on Tuesday for a tri-meet with Bethel.

**McCandless meets Regina for crown**

The McCandless Hall football team defeated Holy Cross Hall, 8-6, last night in Saint Mary’s interhall football action. Scoring included a safety for McCandless by Kelly Sullivan and a two-yard touchdown run by Kit Bernardi for Holy Cross. On the last play of the game, with the clock running, Kelly Sullivan caught a touchdown pass from Marc Parenteau to clinch the victory for McCandless.

**Soccer squad falls to BGSU**

"Too little too late"

The Saint Mary’s College volleyball team chalked up an impressive victory over Fort Wayne Bible College last night in the Angola Athletic FACilities with the Belles’ last home match of the season. Game scores were 15-2, 15-1, and 15-7.

"Sophomore Amy Terri again was outstanding for the Belles, scoring eight kills out of eleven attempted spikes in the match. Coach Erin Murphy cited play by sophomore co-captain Amy Morris and junior Karen Monahan as important factors in the victory. Morris and Monahan combined for an accurate setting play in the match."

"We’ve been giving much attention to setting lately," commented Murphy, "so I was happy to see the improvement.

"Murphy also complimented junior Marianne Dills for her impressive play in front line action."

**Volleyball squad chalks win in final home match of ’79**
