Security reports burglaries in three dorms over break

by Tom Hay Senior Staff Reporter

Thieves who possibly carried special keys entered Farley, Breen-Phillips and Flanner halls over Christmas break, but losses were not extensive.

Breen-Phillips food sales was the target of intruders who apparently ate and socialized, perhaps returning more than once. Eleven pizza shells were missing, cans of pizza sauce and cheese were opened and empty pop cans and cigarette butts littered the floor.

According to BP rectress Sr. Patricia Dowd, there was no forced entry into either the hall or the food sales area, the door was securely locked. I speculate they must have had a key. They only way to get into the building is through the ramp and fire door in the back, and that takes a special master key."

Total losses were not determined.

Thieves entered Farley through a basement window, then removed items from three different rooms. The rooms involved were tow-and three-room suites, and in each case the thieves were able to unlock an unused door to gain access. 

Terry Hyland, one of the burglary victims, said, "The lock wasn’t damaged, but they broke the chain on the door. They even pushed back some dressers we had in front of it."

Security informed Hyland that the crime took place on New Year’s Day.

The two other rooms in Farley were apparently entered in the same manner, but were also ransacked. Maids had put the rooms back in order before students returned from break.

When first questioned about the break-ins, Glenn Terry, director of Notre Dame security, offered sketchy information about the Farley incident, and none on the Breen-Phillips case.

"We don’t know exactly what happened. Two or three rooms in Farley were entered. Somebody somehow or other got in - we don’t know how. We really don’t have an explanation for that yet."

When confronted with the facts, Terry acknowledged them to be true and added that "there may have been a key involved."

According to Terry, extra guards had been stationed in the dorms over break. Although extra guards were not requested, Terry added, "the ramp and fire door in the back, and that takes a special master key."

Ad rates increase

An increase in rates for display advertising in the Observer will be effective immediately. The open rate has risen to $3.50 per column inch, while on-campus clubs, student governments and activities offices for Notre Dame and Saint Mary’s will be charged $5.25 per column inch. There will be a 10 percent discount if the advertisement is prepaid. In the past five years, there has been no change in the open rate, while printing and production costs have risen steadily. The possibility of a rate increase for the fall 1980 semester became an immediate certainty when the Observer board of directors decided that 75% increase in the cost of photographic paper used in the typesetting and headlines systems.

The advertising and business departments concluded that to maintain a balanced operating budget for this semester, higher rates for advertising were necessary.

Concerning registration Students express varying views

by Mary Ern Callahan Staff Reporter

Delayed semester grades, increased registration lines, and a new procedure for adding and dropping courses, have all generated varied reactions from students, professors, and administrators. Of students surveyed yesterday, 48 percent agreed with the new regulations, while 33 percent thought to be much simpler and 17 percent thought than the previous one.

However, 33 percent of the students surveyed were dissatisfied with the new forms and cards. A large percent express", 

Although the past month marked the first time that University employees received a vacation over break, administrators made the decision to close the offices for eleven days last month. Hernandez said that notice was sent to all University offices and employees of the closure via the May 79 staff newsletter.

Of two dozen professors questioned about the 48 hour grading period, only three said they

Mexico announces plans to purchase U.S. grain

WASHINGTON (AP) - Mexico has agreed to buy 2.35 million metric tons of corn and wheat that was scheduled to go to the Soviet Union before President Carter imposed an embargo in retaliation for the Russian move into Afghanistan, administration officials announced yesterday. Mexico will buy 1.7 million metric tons of corn and 650,000 tons of wheat out of the 17 million tons of wheat and corn shipments which would have gone to the Soviet Union before Carter imposed the partial grain embargo.

Scientists discover possible cure for common cold

BOSTON (AP) - Bacteria have been programmed to produce interferon, a rare drug that can cure viral infections, including the common cold, and is being tested against viral infections.

Mondale denies questioning patriotism of candidates

Vice President Walter F. Mondale said yesterday the presidential candidates should feel free to say "what they please," even if that means an escalation of campaign debate over the Carter administration's handling of the Iranian and Afghanistan crises. Returning to Iowa to drum up support for President Carter at the state's precinct caucuses, Mondale was asked about his suggestion that candidates who oppose Carter's Soviet grain embargo are unpatriotic. "We have never, ever doubted the right of candidates to say what they please," the vice president replied. "We are not questioning anyone's patriotism."

Executive discloses bribes to former GSA head

WASHINGTON (AP) - The former head of quality control for the General Services Administration's supply division has been named in federal court testimony as the recipient of at least $12,000 in bribes. The president of Atlas Paint and Varnish Co. of Irvington, N.J., testified late last year that his firm paid a former GSA official, Roger F. Carroll Jr., $500 a month from 1969 to 1971 in an attempt to win GSA contracts. Carroll recited from the GSA last September. In U.S. District Court in Newark, N.J., Atlas Paint president Dennis Tepperman said payments to Carroll and two other GSA officials were paid through attorney Arthur Lowell to ensure approval of the $5 million worth of paint the company sold to the government each year.

Held without bail

Japanese bust Beatle Paul

TOKYO (AP) - Former Beatle Paul McCartney was arrested Wednesday allegedly trying to smuggle a half-joint of marijuana through customs today as he arrived at Tokyo International Airport for a Japanese concert tour, authorities said. The two-week tour by his group, Wings, was canceled as a result.

TOKYO (AP) - Former Beatle Paul McCartney was arrested Wednesday allegedly trying to smuggle a half-joint of marijuana through customs today as he arrived at Tokyo International Airport for a Japanese concert tour, authorities said. The two-week tour by his group, Wings, was canceled as a result.

The officials quoted the 37-year-old rock star, who was led away in handcuffs, as saying he had "brought some hemp for my smoking." Japanese authorities use the term "hemp" for marijuana.

McCartney flew to Tokyo with his wife, Linda, four children and members of his singing group to begin an 11-concert tour, his first in Japan since he visited here with The Beatles 14 years ago, at the height of the British rock group's worldwide success.

Customs officers said they found 210 grams - 7.7 ounces - of marijuana in a plastic bag in one of McCartney's suitcases as he passed through the checkpoint at the airport and was sailed for the night without bail. He will face a magistrate within 72 hours, officials said.

A drug-control office spokesman said McCartney was charged with possession and smuggling of marijuana - violations of both Japan's narcotics control law and customs law.

If found guilty, officials said, he could be sentenced to a maximum of seven years in prison and face a fine of up to the equivalent of about $2,000.

Wings, his band, had been scheduled to give concerts in Tokyo next week before going on to Osaka and Nagoya and then returning to Tokyo for a final series of concerts ending Feb. 2. The tour sponsor, the newspaper Yomiuri-shimbun, said 100,000 tickets had been sold.
Terry discloses payroll check forgery scheme

by Tom Hay
Senior Staff Reporter

A 'large quantity' of blank University payroll checks were stolen from campus during Christmas break, according to Glenn Terry, Notre Dame direc-
tor of security. Terry said that twenty-three of the checks, with forged signatures, have turned up so far, involving a consider-
sable sum of money in total.

"The checks weren't named payable to three employees of the University. The signatures of certain University officials were forged on the checks, which were made payable to three employees of the University.

"We are satisfied that these employees had nothing to do with the operation," Terry stated. "Whoever masterminded this used temporary ID cards of the three employees, but they were made up new, apparently from different sources.

From the evidence gathered thus far, Terry determined that the checks were taken from the Computer Center.

The checks were discovered missing on Jan. 17, at which time area banks were notified of the theft. Twenty-one of the checks were passed on that day at various First Bank branches. The other two turned up a few days later at two supermarkets.

Terry said the University could not suffer a loss in the case of forgery.

Terry declined to comment on whether there were any suspects in the case, but said his office is currently working with the South Bend and St. Joseph County police to investi-
gate the crime further. Evidence has been turned over to the Indiana State Police for processing.

Building construction begins

Construction of a $9.3 million chemical research building has begun at Notre Dame, with completion set for December, 1981.

The new facility of 106,000 square feet will augment re-
sources and computer terminals. It will be attached to the east side of Niewland Hall, the home of chemistry education since 1957. The building will be named StepanChemistry Hall in honor of C. E. Stepan, founder of StepanChemical Company in Northfield, Ill., and an alumnus and trustee emeritus of the University. The chemical firm granted $1.5 million toward construction, and Pew Memorial Trust of Philadelphia made another major commitment of $200,000.

Chief assaults WNDU camerman

by Tom Jackman
Senior Staff Reporter

A 1978 Notre Dame graduate and WNDU employee was as-
saulted Tuesday night near South Bend Avenue in anoth-
er of the numerous incidents which have occurred in the immediate vicinity of the bars frequented by ND stu-
dents.

John O'Sullivan, 23, was walking along the 700 block of South Bend Avenue just past Corby's when his assailant surprised him from behind, forced him around a corner and

ated President's widow and to say the first requiem mass.

Informed of Cavanaugh's death, Sen. Edward Kennedy said, "He was one of my father's closest friends. For all of us he was one of the wisest and kindest of counselors."

Born in Owosso, Mich., Cavanaugh received a bache-
lor's degree in commerce from Notre Dame in 1923 and an M.A. in English in 1927. After his first degree, he worked for the Studebaker Corporation, rising to the position of as-
stant advertising manager before resigning to enter the Holy Cross novitiate in 1926. He was ordained in 1931 and studied philosophy in Rome for two years before returning to Notre Dame as prefect of religion, in which position he served until he became assistant provincial for the Congregation of Holy Cross in 1939.

Appointed vice president of Notre Dame and chairman of its faculty board in control of athletics in 1940, he assisted Fr. J. Hugh O'Donnell in administering the University in the difficult days during World War II and succeeded him in 1946.

After leaving the presidency, Cavanaugh directed the public relations and development ef-
fort of the University and served in campus religious

ministry at Notre Dame and neighboring Saint Mary's be-
fore his retirement.

Cavanaugh was buried on Dec. 31 in the Community Cemetery on campus following a funeral mass in Sacred Heart Church. He is survived by his brother Francis who is also a Holy Cross priest living in retirement at Holy Cross House.

ND Alumni Board to meet with students

By Mary Finn Callahan
Staff Reporter

Students will have the opportunity to meet with members of the University Alumni Board during both Walsh and Flanner Halls. The Hall Presidents Council will sponsor the meeting.

Madeleine Darrnare, President of Flaster Hall, said “Alumni have quite a bit of influence in the University’s affairs. They do things through the university council and the hall presidents. The HPC hopes that students will voice their opinions on campus issues and policies, at their gripe sessions and question the alumni.”

According to Maureen Murphy, recent California alumna, the three-member board enjoys meeting the students. “We want to hear what the students learned from the one minute testimony, Ulrich also told the jury, over an objection to the charge Ford is facing a $63 million verdict. The new and unique nature of Ford was a leader in auto safety and testing. A guilty verdict would cost Ford between $15,000 and $17,000 per day. The charge Ford is facing the sacrifice human life for auto safety.

Consequently, the Elkhart prosecutor continued to ask the jury for the opportunity, attempting to force Cosentino to call forth the Cosentino to oppose such a motion. Investment shifts to metals

by JOHN CUNNIFF
AP Business Analyst

NEW YORK (AP) - The stock boom of the 1960s was often spurred by the slogan, "It's smart to own a piece of America." Ownership of stock, it was said, meant you were sharing in the economy's bounty.

That was back then when people had more trust in surrogate money, when they had faith that paper would always be accepted as a medium of exchange, when they believed that economic institutions were permanent.

Faith hasn't vanished, but it has diminished. When you speak today of owning a piece of America you may be talking of the real thing, about real estate, oil, metals, trees. These seem to be the new collectibles, just as diamonds, art and stamps were earlier.

It might all pass. Stampedes make a great roar coming but they leave in a cloud also, often if distance between the great powers is resumed. But for now, it's here.

Each day the newspapers document it. Gold, silver, platinum and copper are hoarded by those who hold or trade them. The active stocks are often those of natural resource companies.

Such buyers cannot consume their purchases. Because their gold is locked in a vault they cannot, for instance, admire it. They cannot make other products from it because they have no facility to do it.

For them, metal is money.

And so are other natural resources. When people suspect paper money, created as a substitute because desirable (limited) natural resources are no longer available to handle, they tend to return to the real thing.

And what causes today's suspicions? The threat of war, the instability of governments, inflation, and a fear that the old economic order is being upset again before anyone has a notion of what will replace it.

And so the retreat to basics. Gold, which was "demonetized" or, as we thought, set adrift from currencies so that it could operate as just another commodity, is reasserting itself as money. So are real estate and other natural resources - the real thing rather than substitutes.

Many collectors of natural resources do not even consider themselves investors so much as escapees.

They do not view holdings as soaring in value but instead view money as losing value.

The value of natural resources, they say, aren't rising in value so swiftly as currency in declining.

The mirage arises, they say, from denouncing values in terms of currency.

When the stampede will end cannot be foreseen, but some analysts claim they see a slowdown, a correction, a retreat that might, however, be only temporary.

The reason, they say, is that an initial quest for security by some wealthy individuals, banks and governments, has attracted investors, then speculators, then gamblers, and now most likely, the uninformed.

WASHINGTON (AP) - Smoking marijuana may cause temporary infertility in male and female smokers, medical researchers told a congressional panel, said the subcommittee should re-evaluate legislation drafted last year that would soften the federal penalties for possession of small amounts of marijuana.

Mathias said the measure must be reconsidered in light of current assessment of the dangers to public health. "The bill is pending before the Senate."

Rosenkrantz said he drew his conclusions on the effects of marijuana from laboratory experiments on mice, rats and rabbits. He said there was a higher incidence of fetal deformities when the mother was exposed to marijuana smoke.

Gabriel to research Paris colleges

Astrid L. Gabriel, professor emeritus of medieval studies at Notre Dame, will be a member of the Institute for Advanced Study at Princeton, N.J., during the second term of the current academic year.

Gabriel, who is director of the Folger Ambrosiana Microfilm and Photographic Collection at the University, will be working on an iconographical index of the collection, a project of the Samuel H. Kress Foundation, using the facilities of the Institute of Christian Art in Princeton. A specialist in the history of medieval education, he will also do research on a book dealing with the history of Paris colleges at the medieval University of Paris.

Gabriel was a member of the Institute's School of Historical Studies in 1970-71. He is the former director of Notre Dame's Medieval Institute, a fellow at the American Academy of Arts and Sciences, a member of the French and Bavarian Academies of Science.

Debates of marijuana may decrease fertility

...Registration

(continued from page 1)

found the time period to be sufficient for grading finals. Some said it forced them to give short answers or objective tests which they would have rather given. However, assistant registrar David Kil saw no problem with the restriction. "They generally try to accommodate our requests; they can get them (grades) in," he said.

Waiting time in lines at the registrar's office yesterday varied from three to twenty minutes. Comments ranged from "It is so much simpler, I can go in and out of registration," to "It's like changing horses in the middle of the stream. Seniors do not need to sit down with advisors. They know what they need to take."

Though students generally admitted that the past semester's preregistration had cut lines greatly, many who did not receive their desired courses blamed the new card procedure as the cause of the problem. "Even though I used to stand in long lines, I still had a chance at getting the courses I wanted. Now with the cards, there is no way - unless you get that card," one student commented.

Of the 33 percent who showed negative reactions, liberal arts majors in particular complained of not receiving their desired courses. Responding to student comments that the cards make it more difficult for students to get their courses, Kil explained, "It wasn't that students got bumped out; they simply didn't get in. We are trying to offset oversubscription to courses."

Kil further indicated that the demand for checkmarked courses will be noted next semester when class sections are being formulated.

After being confronted with a battery of cards and forms, one student said, "There may be a screwdriver, and a key were found in a suite, "a Village People album, and a key were left on the desk in one of the rooms." The student said that none of the items belonged to anyone in the suite.

A secretary in the registrar's office said she could not yet tell if more courses were being dropped and added as a result of the new methods and forms. She explained that the bulk of the schedule changes does not appear until next week as the drop/add deadline nears.

One of the forms used for dropping and adding did not contain any instructions on how it should have been filled out. Some students waited in line only to discover when they reached the desks that they had not completed the form correctly. They then had to fill out the form again and get back in line.

"Everybody seems to be guessing about this form," one student said.

"We instructed the departmental offices about the forms," Kil said. "Common sense would dictate that the places giving the forms out should explain to the students the correct way to fill them out," he added.

Kil also claimed that the scantron computer form now used for adding and dropping courses is much simpler than the old card system. "These forms are not foreign. Everyone has taken SAT's," Kil said.

...Dorms

(continued from page 1)

hired to maintain a twenty-four hour watch on the dorms, and the same officer was assigned to both Farley and Breen-Philip.

A special key was also apparently used in the theft of two stereo systems from the fourth floor of Flanner Hall. According to one of the residents of the suite, "a Village People album, a screwdriver, and a key were left on the desk in one of the rooms." The student said that none of the items belonged to anyone in the suite.

"The key was like the one used over the summer by managers and football players," one student said. "It had a paper tag on it that says 'Drop in any mailbox.'"

Although the student reported the thefts on Tuesday, Terry did not mention the incident when interviewed Wednesday about the break-ins. The Village People album was being tested for fingerprints when the interview took place.

Regardless of new forms and new systems, lines will always be a part of registration. [Photo by Mike Bigley]

How to impress your date, satisfy your appetite, and save a few bucks (all in one night.)

Treat her—or him—to any one of our nationally-famous specialties listed below in our money-saving coupons. Because, even when the money's a little tight, you deserve the best.

Comin' in for good.

DINNER FOR TWO

SPAGHETTI DINNER FOR TWO
$4.99

when you present this coupon at any participating South Bend area Pizza Hut® restaurant. Even if you purchase only one entree, you can still enjoy our nationally famous Spaghetti Dinner. Offer good through January 24. Cash redemption value 1/20 cent.

PIZZA DINNER FOR TWO
$4.99

when you present this coupon at any participating South Bend area Pizza Hut® restaurant. Offer includes one small two topping Thin 'n Crispy® or Thick 'n Chewy® pizza with beverage and small salad of our choice. Offer good through February 7. Cash redemption value 1/20 cent.

SANDWICH AND SALAD DINNER FOR TWO
$4.99

when you present this coupon at any participating South Bend area Pizza Hut® restaurant. Offer includes any small sandwich and salad of your choice. Offer good through January 24. Cash redemption value 1/20 cent.

There are better ways to handle a tough semester of math.

Choose the Texas Instruments calculator that's right for your major.

When you're working in a specialized field, you need a specialized calculator. That's why Texas Instruments designed the Slimline Business Analyst-II™ for business and finance . . . and the Slimline TI-50® for science and math. Each provides the tailored power and the reliability you'll need as you learn to solve the problems you'll face as a professional. And each has a price you'll appreciate as a student.

**Slimline Business Analyst-II.** Sleek LCD calculator with versatile business capabilities.

Solving financial problems with the Slimline Business Analyst-II can make working with your old calculator seem like pencil and paper arithmetic. The functions required to perform many common business, financial and statistical calculations are built in to help you make quick, accurate evaluations of many complex business situations.

Special financial keys are used to handle time and money problems such as compound interest, annuity payments, mortgage loans, investment yields, amortization schedules and more.

Statistical and linear regression capabilities provide the power you'll need to boil down data and automatically handle problems such as sales and earnings forecasts.

Profit margin calculations concerning cost, selling price and margin can be performed rapidly when any two of the variables are known. Other features include a four-function data register with Constant Memory™ feature that retains its contents even when the calculator is turned off. Two miniature batteries provide up to two years of operation in normal use. And TI's APD™ automatic power down feature helps prevent accidental battery drain.

The Business Analyst-II, with detailed owner's manual and needle-look vinyl wallet with pockets for notes, $40.00.

The Slimline TI-50 packs 60 powerful functions into a handsome, compact package.

The pocket-portal Slimline TI-50 is a remarkably powerful LCD slide-rule calculator. Yet it's as thin as a pencil and weighs only three ounces. Its 60 versatile functions can help you handle a wide range of college math problems. Capabilities include common and natural logarithms. Six trigonometric operations that can be performed in three angular modes (degrees, radians or grads). Two constant memories that retain their contents even when the calculator is turned off. And more.

Seven built-in statistical functions simplify the task of boiling down large sets of data points so you can perform accurate analyses and draw reliable conclusions.

The power of the Slimline TI-50 is made easy to use by TI's AOS™ algebraic operating system, which provides 15 sets of parentheses and accepts up to four pending operations. That means you can enter most problems just as they're written, left to right.

Two miniature batteries provide up to two years of normal operation. And TI's APD™ automatic power down feature helps prevent accidental battery drain.

The Slimline TI-50 includes a detailed owner's manual and a durable vinyl wallet, $40.00.

Make sure your next calculator has the specialized power to handle the problems unique to your major: the TI Business Analyst II and the Slimline TI-50 at your college bookstore or other TI dealer today.

**Texas Instruments technology—bringing affordable electronics to your fingertips.**

**School tries new approach to handle problem students**

COLUMBUS, Ohio (AP) - Giving up on the paddle and other traditional means of punishment, school officials in nearby Groveport plan to begin isolating habitual troublemakers in restrictive classrooms.

Problem students in the Groveport-Madison School District will be separated from classmates and required not only to complete class work, but also to write a plan on how to change behavior.

"It's an attempt to provide a more workable disciplinary policy for students," Superintendant L. Neil Johnson said yesterday. "Suspending students doesn't seem to be effective."

Johnson said students often consider a reward to be suspended and sent home. In addition, he said, not only do suspended students run the risk of losing class credit, the experience could make them lose interest in education.

"The new policy will affect grades 6 through 12--about 3,500 students" and will begin in January, he said. A total of 6,400 students are enrolled in the school district, on the outskirts of Columbus.

Students assigned to the special classroom will work at separate cubicle-style desks. They'll be deprived of several privileges such as eating lunch with classmates and won't be permitted to participate in extracurricular activities.

The minimum "sentence" will be three days, but school officials expect the average stay to be about five days.

In approving the program last week, the board of education also adopted more restrictive and detailed guidelines on corporal punishment. The board agreed that paddling should be used only as a last resort before suspension or expulsion.

The principal apparently will have the final word on just what type of offenders could be assigned to the special classroom. Students who are not necessarily classified as habitual offenders could be included.

"A student caught smoking in the restroom, or fighting, or somebody who has been truant for several days. It depends on the severity (of the offense). One offense would qualify," said Johnson.

"We're sparing the rod, but adding more discipline," he said.

The program does run a risk of alienating some punished students, Johnson said, but he believes it's better than just forgetting about them until their suspensions are over.

He and other school officials hope the program will also reverse the district's dropout rate. During the past three years, the rate has been 10 percent to 15 percent higher than the national average.

A search is under way for a teacher to monitor the special classroom. Asked what qualifications were necessary, Johnson said he was looking for a "superman" who would be able to do both the teaching and empathy in dealing with the students assigned to the classroom.

---

**Women start support groups**

The Notre Dame Women's Organization is forming support groups open to faculty and students. The groups will be similar to the consciousness-raising groups that arose out of the feminist movement. They are leaderless groups composed of 6 to 8 members who meet each week for an hour and a half to share their experiences as women.

Anyone interested in signing up for a group may call 5729, 5714, or 3848 before Friday, Jan. 25. Men who would like to form a group may call. If the number is sufficient, a group can be started.
New report terms abuse of elderly problem 'serious'

While child abuse and wife beating are considered considerable attention, another serious family problem—battered grandparents—has gone mostly unnoticed, a research says.

Abuse of the elderly may be as severe as child abuse, said Marilyn R. Block, a researcher for the University of Mary­land's Center on Aging.

"It's one of the stages that child abuse was 20 years ago. People are horrified at the notion," said Ms. Block, who conducted a one-year, federally funded study of the elderly.

Most of the abuse was psychological rather than physical, Ms. Block said she found. And, although the elderly were more likely to suffer verbal assaults, threats and psychological abuse, they were usually unsuccessful in getting help.

Most physical abuse involved neglect and worse resulting in welts and bruises rather than broken bones. "It seems to be slapping, shaking and yelling rather than being hit with a line," she said.

She added, however, the study did uncover some cases of cuttings, fractured skulls and bones and being tied to a bed or chair.

Psychological abuse centered on verbal assaults, threats and fear. She also said some elderly people are isolated while their money and property is being stolen or misused by their children.

Other elderly persons are de­ceived medication, treatment, eyeglasses and false teeth, she said.

Ms. Block noted there are ques­tions still to be answered, such as how many of the abused parents had abused their children and how many deaths result from abuse of the elderly. She said abuse of the elderly can be harder to identify be­cause senior citizens are not as visible to the public.

"If an elder stays in the house for a year, who's going to notice?" she said. "It makes it easier to ignore the problem."

"To be old is to be a burden, to be senile, to be useless. Many Americans don't like old people, don't want to be around them and they don't want to be bothered with them," she said.

She added that an adult off­spring caring for a sick parent or grandparent expects the patient to be strong and when that's not true, the elder is 'punished... for not behaving properly,'" she said.

Ms. Block's study, conducted with a $100,000 grant from the Federal Administration on Aging, showed the typical abuser was white, mid­dle-aged, middle-class, female and Protestant. In addition, the abusers were most frequently adult children of the abused.

Herman J. Smith, vice presi­dent-treasurer of the National Association of Home Builders, testified that housing starts next year will plummet to between 1 million and 1.5 million units, compared with 1.75 million this year and more than 2 million in 1978. Others put next year's figure at 1.4 million units.

The construction slump will increase unemployment in the housing industry by 20 percent, affecting 1.5 million workers, Smith said.

Janns said, "If the downturn is too severe and protracted, the resulting unemployment in pro­duction will cause a large pent-up demand for housing."" Ironically, this will lead to another surge in housing prices by 1981, making it virtually impossible for young families and those with lower incomes, especially to afford housing," he said.

half, as the Wildcats, paced by Fred Coutard's 14 points, shot 63 percent from the field, including 14 layups.

But the Irish, trailing 60-57 with nine minutes left in the game, got a break when the Kentucky bench was called for a technical foul after Rich Brounning was fouled. Brounning hit three of four free throws, and then Bill Hanzik scored on a jump shot when the Irish got the ball back. Tracy Jackson scored on a 16-footer to cut the lead to 60-59.

The Wildcats built the lead back to 10, 73-63, but with 2:1 left and the Irish trailing 73-69, Jackson was fouled by Derrick Ford and had a chance to cut the lead to four. But Jackson missed the front end of the one-and-one attempt, and Kyle Macy's three-point play following the miss gave the Wildcats all the points they needed to hold on.

"I thought we put ourselves in the hole early in the game," Phelps commented, "but I felt we made a great run at the end to cut it to six."

Bill Hanzik spaced the Irish with a season-high 18 points, while Kyle Macy led the Wildcats with 21 and was selected most valuable player for the game.

"I'm proud of this team and the way they bounced back," Phelps added, "This just typical of our performances over the holidays, and Kentucky played very, very well."

have to urge Americans to boycott the Moscow Olympics and hope public sentiment coupled with the prestige of his office, would force the U.S. Olympic Committee to agree. But the presidents of the U.S. Olympic Committee, Robert C. Kane, said Wednesday the government should look for an alternative to a boycott. In a television interview, Kane said a U.S. boycott of the Olympics would be "inappropriate and gauche."

[continued from page 11]

The Irish played like anything but an injured team the first two periods in the opener against Minnesota, building a 5-2 lead midway through the second stanza. But the Gophers bombarded Notre Dame goalies Laurion and Branning in the third period with 27 shots. Laurion was spectacular, but Minnesota got the tying goal with 9:05 to play. Tim Harrier won the game for the Gophers at 4:30 of overtime on their 60th shot on Laurion.

"It was certainly disheartening to lose the way we did," said Smith, "but I was very pleased with the way we came back the next night. It took a lot of character, but we played solid hockey Saturday."

Logan paced the Irish victory with two goals while senior Ted Welnini added a goal and two assists. Freshman Bob McNamara stopped 33 shots, 15 in the final period, while Notre Dame rattled Gopher goalie Jim Jelatin with 52 shots.

In Grand Forks, the Irish played even the first two periods the first night and were tied 2-2 heading into the final 20 minutes. But Notre Dame scored the first goal of the third, scoring four unanswered goals in a span of less than six minutes. Phil Sykes paced the Sioux with a hat trick, his first goal coming with 1:10 to play.

"We played well until the third period," said Smith. "We made some mental mistakes there and just didn't do the job defensively. That killed us."

Saturday night was the same story. The NoDaks capitalized on two defensive mistakes by the Irish for two goals in less than two minutes and led 2-0 at 2:31 of the second period. Kevin Weidtmann and Mike Brown responded with goals in a span of less than six minutes. Phil Sykes paced the Sioux with a hat trick, his last goal coming with 1:10 to play.

U.S. boycott lacks support

WASHINGTON (The Associated Press) The United States has received little encouragement on its call for a boycott of the Olympics and may decide to try to boycott the games alone, State Department officials said today.

Western European governments are likely to remain sympathetic to the idea of punishing the Soviet Union for its military invasion of Afghanistan by boycotting the Moscow games, the officials said.

But the allied governments have indicated they fear public opinion in their countries would be too strong to remain out of the games. Allied government officials also say they are keen on their ability to enforce an unimportant or weak boycott or the wisdom of trying to do so, said the State Department officials, who asked not to be identified.

Only one country, Saudi Arabia, has come out of the games, and it is widely reported to have done so because of the recent Soviet occupation of Afghanistan. But Olympic officials say the Saudis had given notice last October that they could not send a team to Moscow.

Riding the crest of Miscy Conboy’s hot shooting, Notre Dame women’s basketball team defeated St. Joseph’s 75-64 last night at the ACC. The win snapped a two-game Irish losing streak, and raised their season record to 11-2.

Conboy, who fills the popular sixth man role for coach Sharon Petro, was instrumental in bringing the Irish into a 5-6 deficit into a 1-61, second quarter. Her two free throws at 11:24 of the first half gave the Irish the lead, and her teammates continued to lengthen it. Two free throws by Notre Dame’s starting center Jan Politiski, who will be lost for the remainder of the season due to an appendectomy, gave the Irish the lead that would not be challenged.

The Irish, now 10-2, travel to Louisville to explode in the second half. The Irish came within a hard-fought 79-59 win.

Missy played very well tonight, and I think that’s better than when I played badly I got down on myself. This year, when I get into a game, I know that I’ll stay in the game, I think that’s the difference. We’ve been having some problems of late, and it doesn’t help not having three players who are each 5-11. We don’t have the bench that we need, and everybody’s getting to play. We’re going to come back strong as much time as the starters, and I seem to do well coming off the bench. She has been using her bench real well this year, and everybody’s getting the chance to play.

"I would get real nervous, and when I was playing, I wasn’t playing to my performance. Coach Petro was additionally pleased with the performance of Conboy, who fills the popular sixth man role for coach Sharon Petro. The Irish have designated this game in the Northern Illinois Tournament last weekend, and have two games scheduled, one against St. Louis at 1 p.m. Sunday afternoon.

"I would like to take this opportunity to thank the officials acknowledge have a good solid defense and three ex-Steeler players who will be lost for the remainder of the season due to an appendectomy. But Olympic officials say the Saudis had given notice last October that they could not send a team to Moscow.

Jackson saves Notre Dame with last second heroics

by Paul Malloncy

Jaxny tracy Jackson came very close to having nightmares Tuesday night. With only 26 seconds remaining, and Notre Dame clinging to a one-point lead over Villanova at the ACC, Jackson missed the first of a one-and- one free throw opportunity.

As Jackson sat in his seat, hating that possession, as fate would have it, guard Royce Spmon drove the left baseline past Stian Wilcox for the game-winning basket with five seconds remaining on the clock.

The Irish had ridden forward Digger Phelps with a mere three seconds showing on the clock. Jackson was hopeful of making amends for his earlier free throw miss.

"We had three options to get the shot off their double pick," Phelps said of the play he had designed for them. "One was going to the basket, and we were going to try it, and just to let it go. I guess you could say it was just a matter of timing."

Tracy was our second option to get open, and Wilcox was the third.

"Whenever one got the ball was going to dribble as deep as possible, and we would then get the shot. Three seconds was a long time," Tracy said.

But for Jackson, it was just everything. He had scored the free throw in the Irish backcourt, the junior forward dribbled down the left side of the court, and Jackson looped a super close eye on the scoreboard clock.

Jackson scored two seconds ticked away, was pulled 30 feet away - belly-to-belly with Villanova forward Aaran Howard - and released an off-balance jumper that hit nothing but net while the final horn sounded a 70-69 Notre Dame victory.

I knew that three seconds would be enough. It was an emotionally-drained Jackson afterward. "I kept my eye on the clock, and knew exactly when I had to let it go. I guess you could say I knew exactly when I had to let the shot go on the basket and the other on the backboard.

"I realized that I had to get a good Arch on the shot, and told myself just if it looked pretty good, and I knew it would be the better. It also beat a stubborn Wildcat squad which regrouped after trailing by 18 points, 31-13, in the final stanza - about the same time that Irish guard Bill Hanlinik drew his fifth personal foul.

"When Handlinik fouled out we just didn't execute," said Phelps. "We didn't have the same defensive intensity as we did when he was at there.

"But you can't take nothing away from Villanova. We really didn't deserve to win with the way they outplayed us in the last ten minutes.

"The Irish, who shot only 30 percent from the field, had missed some other key free throws in the final minutes. That, coupled with the fact that they could only muster two field goals in the final seven minutes prior to Jackson's heroics, bodes that Villanova get back into the game.

"I thought it was a pretty good effort on the part of the Irish," said a shell-shocked Rollie Boebling of the Irish slain. "You don't lose but maybe one out of 100 games like this, but I guess this was the one.

The game was nip-and-rip for the first 16 minutes of play, Notre Dame, however, managed to pull away for a 70-69 Notre Dame victory.

Pittsburgh

"City of Champions'

by Frank LaGrotta

by Brian England

A holiday jinx? The post-
Christmas blues? Just a rotten timing.

Locating the exact trouble and putting it label on it is hard. Figuring out the consequences is easy - it all spells a hard fall for the Western Collegiate Hockey Association standings for Notre Dame.

The Irish dropped five of six in December -3-1 in non-league play versus U.S. International in San Diego Dec. 29-30, the Irish split at Minnesota: Jan. 4-5 in Minnesota and dropped two at North Dakota in Grand Forks Jan. 11-12.

Notre Dame blew a three-goal lead the first night against Minnesota and lost 6-5 in overtime, but came back the following night for a convincing 6-3 win over the Gophers. After spending the week in the Twin Cities, the Irish lost 7-4 and 3-1 to first place North Dakota in a force themselves into playing a game of catch up as the season progresses.

Seven weeks remain in the regular schedule. If we play five good periods, we can catch up, said coach Digger Phelps. "I think for a second that an athletic can do this week."

"I'd heard so many people say that Pittsburgh would be a big test and I did not think that that would be the case. Funny, if Pittsburgh was going to be a game we would have remembered that.

"We played five good periods that night there. He was just making it a comeback from a bout with viral meningitis and appears to be ready for action this weekend.

Junior defenceman Scott Care

osen refereed a game in which the Islanders were 0-3 on the year, that was just the start.
